Now! From Diamond to Radio

A BIG LEAGUE SHOW!

Phil Rizzuto's Sports Caravan

a sparkling 15 minute transcribed radio series

About Phil. Everyone knows him . . . 12 years with the world champion Yankees.

About the Show. A fast-moving 52 quarter-hour sports program for twice-weekly broadcast. 26 weeks beginning mid-April through September, including a free-upon-request separate disc on which Phil will transcribe 5-second personalized lead-ins to commercials.

Production. Each transcription is double-faced, with 2 complete 15-minute shows, open-end for 1-minute commercials: open—middle—close.

Cost. Priced at incredibly low "quick-sale" rates.

Hearing Cases . . .

ABC-Paramount Merger Decision—FCC issued decision authorizing merger of American Broadcasting Co. and United Paramount Theatres Inc., into new entity to be known as American Broadcasting-Paramount Theatres Inc. (Dockets 10031 et al.). Effect is to grant and transfer to new corporation various authorizations covering 6 AM, 6 FM and 5 TV stations. These existing stations are KECA KECA-FM KECA-TV Los Angeles, Calif.; KGO KGO-FM KGO-TV San Francisco, Calif.; WENR WENR-FM WENR-TV Chicago, Ill.; WXYZ WXYZ-FM WXYZ-TV Detroit, Mich.; WJZ WJZ-FM WJZ-TV New York, and WSMB WSMB-FM New Orleans, La. Commission granted consent to acquisition by new corporation of Balaban & Katz Corp., and transfer of Balaban & Katz TV station WBKB (TV) Chicago to Columbia Broadcasting System; also transfer of control of Paramount Television Productions Inc., licensee of KTLA (TV) Hollywood, Calif., from Paramount Pictures Inc. to Paramount Pictures Corp., entity separate from American Broadcasting-Paramount Theatres Inc. Commission held Paramount Pictures Corp. controls Allen B. DuMont Laboratories Inc., within meaning of Sec. 310(b) and five-TV-station limit but renewed certain authorizations covering DuMont's TV stations WDTV Pittsburgh, Pa.; WTTG Washington WABD New York. Comrs. Hyde and Sterling joined in opinion dissenting in part; Comrs. Webster and Hennock dissented in part in separate opinions; Comr. Merrill issued a separate opinion concurring in part and dissenting in part..

Commission finalized its show cause order requiring WBKB Chicago to shift to Ch. 2, and dismissed application of Zenith Radio Corp. for new TV station in Chicago to operate on Ch. 2 (BPCT-322) and Zenith's further request for special temporary authorization to commence commercial TV broadcasting on Ch. 2. Comrs. Walker, Webster and Hennock dissented.

KMYR Bcstg. Co., Denver, Col.—FCC denied petition filed by KMYR Bcstg. Co., Denver, Col., for review of hearing examiner's order of Oct. 16, 1952, granting petition of Metropolitan Television Co., for leave to amend its application for new TV station in Denver to operate on Ch. 4, to show addition of Don Searle as minority stockholder and executive vice president, show minor changes in corporate stockholdings and in persons originally holding offices of executive vice president, secretary and treasurer. (Dockets 9043 and 10238; BPTC-488 and 941. Memorandum opinion and order Feb. 2.)

Metropolitan Television Co., Denver, Col.—FCC granted a petition filed by Metropolitan Television Co., Denver, to substitute it in place of National Broadcasting Co., formerly licensee of station KOA Denver as party in proceeding in re application of Harbenito Broadcasting Co. for construction permit to change facilities of KGBS Harlingen, Tex., from 1240 kc, 250 watts, unl., to 850 kc, 5 kw, DA, unl. (Docket 8336; BP-6350). Order Jan. 30.

Denver, Col.—FCC Hearing Examiner James D. Cunningham issued initial decision looking toward grant of application of Aladdin Radio & Television Inc. for construction permit for new TV station at Denver, Col., to operate on vhf Ch. 7, with ERP of 316 kw visual and 158 kw aural, subject to condition that its antenna structure shall be painted and lighted in accordance with

Sec. 17.25 of Commission's rules (Docket 9041; BPCT-426), and denial of mutually exclusive application of Denver Television Co. seeking same channel at Denver (Docket 10240; BPCT-951). Initial Decision Feb. 5.

Flint, Mich.—Trebit Corp. and W. S. Butterfield Theatres Inc. FCC denied petitions seeking review of hearing examiner's memorandum opinion and order of Jan. 14, granting petition of WJR, The Goodwill Station Inc., for leave to amend its application for new TV station in Flint, Mich., to operate on vhf Ch. 12, to move its transmitter site and to make certain other minor changes. Commission's memorandum opinion and order with respect to its action denying petitions for review and affirming the hearing examiner's allowance of WJR amendment will be released at later date. (Dockets 10268 through 10270; BPCT-967, 968 and 953). Action Jan. 30.

Portland, Ore.—FCC denied petition filed by Oregon Television Inc., Portland, Ore., for review of hearing examiner's memorandum opinion and order of Oct. 1 which granted petition of Northwest Television & Broadcasting Co. for leave to amend its application for a new TV station in Portland, Ore., to show certain changes in engineering data. (Oregon Television Inc., Northwest Television and Broadcasting Co., and Columbia Empire Telecasters Inc., are applicants for new TV stations in Portland, Ore., to operate on Ch. 12 and are in consolidated hearing in Dockets 10246 et al.) Memorandum opinion and order Jan. 30.

Duluth-Superior, Wis. — Commission (1) dismissed as moot request of Head of Lakes Bcstg. Co. for deletion of issue relating to legal qualifications of applicants in proceeding involving its application for new TV station in Superior, Wis., and that of Red River Bcstg. Co., Duluth, Minn., both seeking Ch. 3 (Dockets 10289 and 10290; BPCT-621 and 903); (2) denied request of Red River Bcstg. Co., for deletion of 307(b) issue in the Ch. 6 Duluth-Superior proceeding involving applications of Ridson Inc., for new TV station at Superior, Wis., and Lakehead Telecasters Inc., for new TV station at Duluth, Minn. (Dockets 10291 and 10292; BPCT-728 and 981); (3) denied petition of Head of Lakes Bcstg. Co. for consolidation of applications in Ch. 3 and Ch. 6 proceedings; and (4) granted petition of Head of Lakes Bcstg. Co. for inclusion of a 307(b) issue in Ch. 3 proceeding, and added issue "To determine in light of Section 307(b) of Communications Act of 1934, as amended, which, if either, of these applicants would provide the more fair, efficient and equitable distribution of radio (television) service". Order Jan. 30.

Rules and Standards . . .

Public Safety Radio (Docket 10174)—Terms and extent of possible use of facilities in Special Emergency Radio Services were clarified and enlarged by Commission in report and order amending Part 10 of its rules governing Public Safety Radio Services, effective March 27. Proposals were made April 17, 1952.

Experimental Radio Services (Docket 9751)—By report and order Commission revised Part 5 of its rules covering experimental radio services except those authorized under the developmental rules of the various regular radio services, effective March 17. This is pursuant to rule-making proceedings initiated Aug. 2, 1950, and revises present Part 5 which dates from Oct. 1, 1939.

Revision of Subpart E of Part 11, Rules Governing Special Industrial Radio Service (Docket 9703)—Further notice of proposed rule making announced Feb. 13, substituting for proposals advanced earlier. Comments due March 16.

Corrupt Voice

CORRUPTION—even possible sabotage—is alleged by a Senate committee studying operations of the controversial Voice of America. It demonstrates the mischief of Government engaging in activity which, prior to the war, was forbidden area.

Aside from the shocking disclosures of gross inefficiency and astonishing waste, one would judge that the Voice has been a liability even in dispensing propaganda. Engineering advice evidently has been ignored. There's apparent proof of favoritism in awarding of multi-million dollar contracts for seemingly worthless installations.

Literally hundreds of millions have been expended in Voice operations, for both plant and personnel, with highly questionable results. In contrast, Radio Free Europe, and latterly, Radio Free Asia, have been eminently successful in combating communism through publicly supported operations. Under auspices of the Crusade of Freedom, ram-rodded by a group of public-spirited citizens, these operations have used long-wave transmission which could be received on conventional sets. They have not been inhibited by State Dept. policies. They have been operated by practical broadcasters.

The Government has no business in the trade of broadcasting. The McCarthy Committee investigation indubitably will hasten the day of full-scale Voice reorganization. Perhaps the Crusade for Freedom, having demonstrated its know-how, is the answer. Or perhaps the whole project should go to the private operators who hold the licenses taken over by the State Dept. before Pearl Harbor.

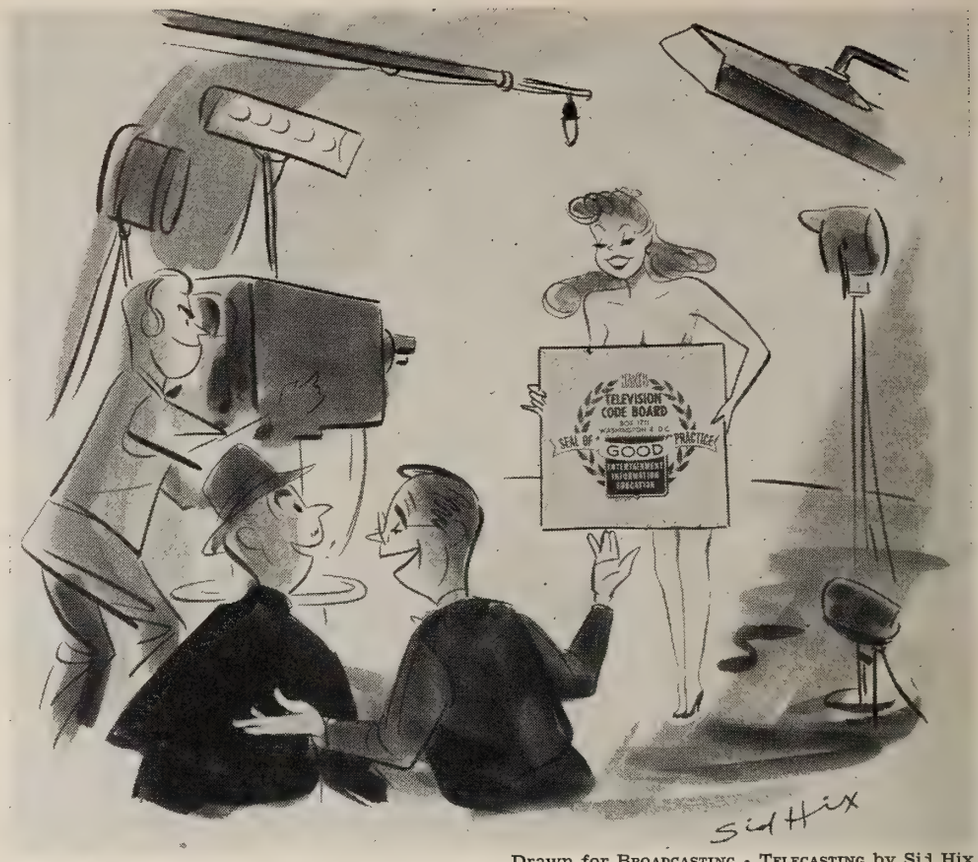
Parenthetically, it behooves those who have beaten their breasts for educational television to take another look. Our educational system is bureaucratic. It is beholden to local or state Government. The Voice is Federal Government. The parallel is evident.

The Politic Way?

THE industriousness of the NARTB in setting out to obtain a modification of the restrictive law governing political broadcasting deserves unqualified approval. We wonder, however, if in this case industriousness has overwhelmed practical reasoning.

The expressed hope of the NARTB is to effect repeal of Section 315 of the Communications Act which prohibits broadcasters from censoring speeches of political candidates. That failing, the association would settle for an amendment giving broadcasters the power to censor defamation out.

However desirable either accomplishment would be, political considerations probably prevent its attainment. Certainly few Congressmen will wish to relinquish more than a smattering of the extraordinary *carte blanche* they now enjoy in their aerial appearances during campaigns for reelection. Assuming a majority agreed in principle to a modification, we doubt that a majority would then agree on the language.



Perhaps the more practical way to achieve the much needed relief would be to avoid a frontal attack on Section 315. A new approach is suggested.

The main hope of broadcasters at this time is to extricate themselves from the dilemma of being prevented from censoring libel without also being immunized against damage suits arising from it. There is a way that this hazard could be appreciably reduced—by amending the U. S. Criminal Code to make it a crime for defamatory material to be knowingly uttered or allowed to be uttered on radio and television.

If that statute were in effect, a broadcaster could appeal to the federal courts to enjoin the commission of a crime, if a candidate submitted a defamatory speech and insisted on broadcasting it. Even if the injunction failed, the mere fact that the broadcaster had endeavored to prevent the utterance would certainly serve to mitigate his liability.

It is our belief, based on more than causal discussions with legislative experts, that such an amendment would have a much greater chance of acceptance than any attempt to modify Section 315.

By retaining the anti-censorship provisions of Section 315, the politicans would be assured that the ideology of their campaign speeches would not be tampered with. With a criminal statute preventing defamation, radio and television operators would be provided with a means of avoiding libel actions.

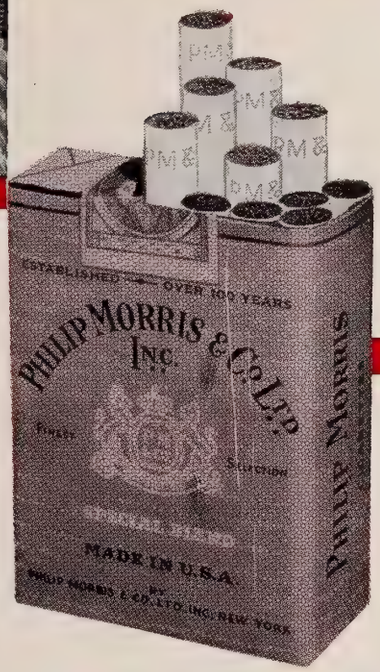
"That agency man's suggestion to the Code Board sure pepped up viewer interest in the Seal of Good Practice."

Fair Deal FCC

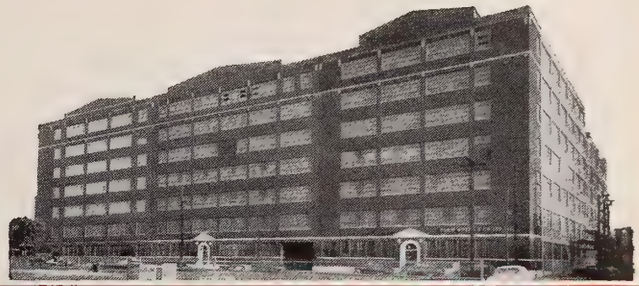
THE BUSIEST man in America, beyond question, is President Eisenhower. He took over just 34 days ago.

In that time he has put together his first team. He has handled a prodigious schedule at a terrific pace.

Hence there may be those who will feel that we may be off base in commenting that there's need for prompt Presidential consideration of the regulation of communications.



Indeed, the President himself recognizes the importance of broadcasting to the national welfare. He is the first President to consider direct, regularly scheduled broadcasts and telecasts from the White House on a "report to the nation" basis. At his first news conference last Tuesday he opened his remarks by welcoming radio and the press—in that order.



The President should do something about the FCC. It remains Democrat-controlled, under a Democratic chairman and with department heads whose allegiance is to the New Deal and the Fair Deal. Last week the FCC appeared before the House Interstate & Foreign Commerce Committee—four Democrats, two Republicans and an Independent. This week, hearings begin on appropriations, before a House subcommittee organized by the Republicans.

There are important matters of public policy involved in the FCC's operations—notably as to television. Without the naming of names, it is common knowledge that there are at the White House dossiers on a number of candidates for Commissionerships. The way is open for the appointment of a Republican chairman. There can't be any reorganization until the chairman is named.

We hope the President will see fit to give prompt attention to the FCC. Until that happens, the FCC at best, can only tread water.

PHILIP MORRIS... DOES A COMPLETE JOB...

SO DO HAVENS AND MARTIN, Inc. STATIONS... WMBG WCOD WTVR

"Something wonderful happens when you change to Philip Morris." This slogan prophesies the pleasant completion of a cycle that includes the buying of fine tobaccos . . . storing . . . curing . . . the manufacturing and selling of cigarettes. Just as millions of smokers today "Call for Philip Morris . . ."

Millions of loyal listeners and viewers tune to Havens & Martin, Inc. Stations—WMBG, WTVR, and WCOD, serving the rich Virginia markets around Richmond. And "something wonderful happens" to advertisers on these First Stations of Virginia! They profit from the *buying action* stimulated by the power of Richmond's one and only complete broadcast institution. It should happen to you!

FIRST STATIONS OF VIRGINIA

Awed by its size and power, the Northwest's Chippewa Indians called the Mississippi River the Mee-zee-see-bee, "Mighty Father of Waters." It flows through nearly 100 counties all the way from Minneapolis to the Gulf.

Mightier than the Mee-zee-see-bee!

Think then how awed the Chippewa would be at 50,000-watt WCCO (Mighty Granddaddy of All Radio Stations!), which surges through 109 counties in four states alone*—reaching more people in 82 of these counties than any of the more than 200 other stations heard throughout the entire area.

Compared with other Twin Cities stations, WCCO is overwhelmingly dominant in the Minneapolis-St. Paul market, too. WCCO captures a bigger audience, on the average, in one evening than the next-best station does in seven... and delivers this audience at a 31% lower cost-per-1,000 than any other station!

How? For details, powwow with CBS Radio Spot Sales or... **WCCO**

SPIRITED activity last week on FCC reorganization but no announced result. Chairmanship and new appointments were discussed in high places, with prospect that things will jell this week. Still best bet: Rosel Hyde to Chairmanship, but with appointments to two vacancies still wide open. One appointment expected to be practical broadcaster and other executive experienced in public utility-common carrier field to take over detail of Chairman Paul A. Walker, whose forte is telephony.

★ ★ ★

THAT million-dollar TV BMB-type project unveiled at NARTB's TV board meeting several weeks ago is meeting unexpected complications even in exploratory stage. Recalling BMB's strictures, NARTB's first forays into TV measurement field have led to adoption of "extreme caution" policy.

★ ★ ★

LONG RANGE prognosticators in Washington, notably after visit here fortnight ago of Adlai Stevenson, are now predicting 1956 ticket: Stevenson and Lyndon B. Johnson, Senate minority leader from Texas, and only man in Congress identified with both AM and TV ownership. Mrs. Johnson owns KTBC-AM-TV Austin.

★ ★ ★

WHILE PRINCIPALS in Marciano-Walcott fight signed last week for title bout in Chicago April 10, details on radio-TV-movie rights were still in negotiation. Report is Gillette will pay $250,000 for radio-TV rights and IBC has scaled Chicago Stadium at $750,000, making it $1 million match. While Chicago and Milwaukee will be blacked out locally on TV, radio coverage won't be restricted.

★ ★ ★

ANOTHER SESSION on direct radio-TV broadcasts of President Eisenhower's news conferences scheduled for this Wednesday by James C. Hagerty, Ike's news secretary, with representatives of Radio-TV Correspondents Assn., but with little likelihood of definitive result. White House is still exploring most expedient means of developing "report to nation" type of presentation but hasn't yet found answer.

★ ★ ★

NARTB's newly formed Television Information Committee, set up last month to resist frontal attacks, whipped into action last week. Chairman Harold Fellows, NARTB president, sent vehement protest to Mrs. Ogden Reid, publisher of *New York Herald Tribune*, against editorial on N. Y. State Commission TV report ridiculing commercial TV on educational and cultural programming. Mr. Fellows asked that in interest of "accuracy and fair play," *Tribune* publish complete list he would supply of educational and cultural programs now telecast on New York City's seven stations.

PRELIMINARY meetings between Florida Citrus Commission and J. Walter Thompson executives in N. Y. this week set stage for final budget sessions next week in Lakeland, Fla. Budget may run $3 million as compared with last year's $2.6 million.

★ ★ ★

EVERETT HOLLES, veteran newsman, will be named this week to succeed Hollis Seavey as director of Washington operations of Mutual. Since joining MBS, August 1950, he has moderated *Reporters Round-up* and has served as White House correspondent for network. Mr. Seavey has joined Clear Channel Broadcasting Service as director [B•T, Feb. 23].

★ ★ ★

REPORTS of sale of KONA (TV) Honolulu, second TV station in Hawaii, have this much in fact: Herbert M. Richards, owner of all voting stock, is in hospital after being stricken with heart attack just before Christmas. He subscribed to all voting stock, but only paid for 25%. It is other 75% which is object of negotiations with West Coast industrialist.

★ ★ ★

FCC LAST Thursday had good day before House Subcommittee on Appropriations to justify budget estimate of $8 million for 1953-54 fiscal year. That was Truman estimate. Budget Bureau under GOP has asked for revised estimates looking toward reduction. That matter was subject of Feb. 23 special meeting of FCC.

★ ★ ★

WATCH FOR U. A. Sanabria, TV pioneer, proprietor of American Television Inc. and American Television School, Chicago, to petition FCC to withhold final approval on color TV. Mr. Sanabria and his engineers currently working on three-dimensional TV device, which he feels should be part of any TV receiver. Such ruling, he thinks, would benefit both manufacturers and general public.

NARTB Mails Ballots For Radio Board Election

FINAL ballots for election of directors to NARTB Radio Board — including odd-numbered and at-large classifications—mailed Friday by C. E. Arney Jr., secretary-treasurer. They must be returned to NARTB's Washington headquarters by March 13.

Automatically elected without opposition [B•T, Feb. 16] are F. Ernest Lackey, WHOP Hopkinsville, Ky., Dist. 7; Hugh K. Boice Jr., WEMP Milwaukee, Dist. 9; Kenyon Brown, KWFT Wichita Falls, Tex. (incumbent), Dist. 13; R. M. Brown, KPOJ Portland, Dist. 17.

Incumbent directors who did not run for re-election were Hugh B. Terry, KLZ Denver, medium stations; Leonard Kapner, WCAE Pittsburgh, Dist. 3; Thad Holt, WAPI Birmingham, Dist. 5; Robert T. Mason, WMRN Marion, Ohio, Dist. 7; H Quenton Cox, KGW Portland, Ore., Dist. 17.

Incumbents who are candidates for re-election are William B. McGrath, WHDH Boston, Dist. 1; Harry W. Linder, KWLM Willmar, Minn., Dist. 11; John H. DeWitt Jr., WSM Nashville, large stations; Edgar Kobak, WTWA Thomson, Ga., small stations; Ben Strouse, WWDC-FM Washington, FM stations. Merrill Lindsay, WSOY Decatur, Ill., did not run for re-election as Dist. 9 director but is a nominee in the FM category.

Of those nominated in more than one category, selections were as follows: Paul R. Bartlett, KFRE Fresno, Calif., Dist. 15; Victor C. Diehm, WAZL Hazleton, Pa., Dist. 3; Fred Fletcher, WRAL Raleigh, N. C., FM stations; E. J. Gluck, WSOC Charlotte, N. C., FM; Simon Goldman, WJTN Jamestown, N. Y., small stations; Robert B. Hanna Jr., WGY Schenectady, N. Y., large stations; Herbert L. Krueger, WTAG Worcester, Mass., Dist. 1; John F. Meagher, KYSM Mankato, Minn., Dist. 11; G. Richard Shafto, WIST Charlotte, N. C., medium stations; Calvin J. Smith, KFAC Los Angeles, medium stations; Jim Woodruff Jr., WRBL Columbus, Ga., Dist. 5.

Nominees who withdrew their names from balloting were George D. Coleman, WGBI Scranton, Pa., Dist. 3, W. B. Smullin, KIEM Eureka, Calif., Dist. 15 and medium stations, Otto P. Brandt, KING Seattle, large stations; Ted Leitzell, WEFM (FM) Chicago, FM stations; Nathan Lord, WAVE Louisville, medium stations; William B. Quarton, WMT Cedar Rapids, Iowa, medium stations.

TV BEATS BATHTUBS

THERE are now more TV sets in use in Chicago area than home telephones or bathtubs, Admiral Corp. reported Friday. W. C. Johnson, vice president of sales, pegged latest TV census at 1,360,000, compared to 1,320,000 telephones and 1,260,000 bathtubs in area. Many cities which have had TV at least five years boast more receivers than phones, among them L. A., Philadelphia, St. Louis, Cleveland and Boston, Mr. Johnson added.

• BUSINESS BRIEFLY

GENERAL FOODS SPRING DRIVE • General Foods, N. Y. (Sure-Jell), planning to start its annual spring spot announcement radio campaign in April in about 125 markets. Starting dates varied following fruit jelly making seasons. Agency: Benton & Bowles, N. Y.

GM BUYS DINAH • General Motors Chevrolet Div. and Chevrolet Dealers to sponsor Dinah Shore musical show on full NBC radio network, Mon. and Fri., 10-10:15 p.m. EST, for 15 weeks March 23 through July 3, and also are extending sponsorship of *Dinah Shore Show* on NBC-TV, Tues. and Thurs., 7:30-45 p.m., for six additional weeks, through July 2. Agency: Campbell-Ewald, N. Y. and Detroit.

LIFE ADDS 15 • *Life* Magazine, through Young & Rubicam, N. Y., adding about 15 markets to radio chain breaks and minutes campaign. Magazine uses announcements three days weekly for 13 weeks to boost newsstand sales.

HUBINGER CAMPAIGN • Hubinger Co. (Quick-Elastic), Keokuk, Iowa, buying minutes, 10- and 15-minute program participations on Don Lee network and 10 other major cities, starting March 16 for 39 weeks. Some TV spots will be placed. Agency: Compton Adv., N. Y.

SPOTS FOR LINCOLN-MERCURY • Lincoln-Mercury cars, through Kenyon & Eckhardt, N. Y., buying radio spot announcement campaign for six weeks in Kansas City, Atlanta and Jacksonville areas starting about March 29.

THOR ON ABC-TV • Thor Corp. (home appliances) to sponsor *Quick as a Flash* quiz show with Bobby Sherwood, on ABC-TV on alternate Thursdays, 10:30-11 p.m. EST, effective March 12. Agency: Henri, Hurst & McDonald, Chicago.

HOWDY DOODY BOUGHT • Continental Baking Co. (Hostess cakes) to sponsor another segment of *Howdy Doody* on NBC-TV, Mon.-Fri., 5-6 p.m., effective May 6, Wed., 5-5:15 p.m. portion and Standard Brands (Royal dessert) starting March 17 adds Mon., 5-5:15 p.m. segment. Both contracts signed through Ted Bates, N. Y. Show completely sold except for one quarter-hour on Fridays.

ABC PLANS EXPANSION, ADDS AFFILIATES

BROAD expansion of both radio and TV networks of ABC being announced today (Monday) on heels of meeting of top officials with ABC radio stations advisory committee Friday to discuss programs, operations, and general planning with respect to ABC radio alone. Similar meeting for TV will be held with ABC TV stations advisory committee next Friday (March 6).

Network expansion, described by national station relations director Alfred R. Beckman as both "broad and strategic," adds new TV affiliates in 14 markets, bringing total to 95, and extends radio affiliate roster to 362 by addition of five stations.

Described as "notable" among new affiliates were KING and KING-TV Seattle, both becoming basic ABC affiliates. KING-TV operating on vhf Ch. 5 became basic affiliate yesterday (Sunday). KING-AM operating with 50 kw on 1090 kc will effect its ABC affiliation in June, replacing KJR Seattle.

Other new TV affiliates, Mr. Beckman said, will greatly expand ABC television service in Atlantic seaboard, south, midwest, and southwest.

In addition to KING stations, new affiliates are:

KSTL-TV St. Louis (Ch. 36; owned by Broadcast House Inc.; William E. Ware, general manager), starting July 1; WBUF-TV Buffalo (Ch. 17; WBUF-TV Inc., Sherwin Grossman, general manager), starting June 1; WENS (TV) Pittsburgh (Ch. 16; Telecasting Co. of Pittsburgh; Larry H. Israel, general manager), starting July 6; KGUL-TV Galveston (Ch. 11; Gulf Television Co.; Paul E. Taft, general manager), starting March 1; WFTV (TV) Duluth (Ch. 38; Great Plains Television Properties; James C. Cole, general manager), starting March 1; KFDX-TV Wichita Falls (Ch. 3; Wichtex Radio & Television Co.; Howard H. Fry, general manager), starting April 1.

Also WCOS-TV Columbia, S. C. (Ch. 25; Radio Columbia; Charles Pittman, general manager), starting April 1; KCBD-TV Lubbock (Ch. 11; Bryant Radio & Television; George L. Tarter, general manager), starting March 15; WBKZ-TV Battle Creek (Ch. 64; Booth Radio & Television Stations; Harry E. Travis, general manager), starting May 15; WEEV-TV Reading (Ch. 33; Hawley Broadcasting Co.; Thomas E. Martin, general manager), starting March 1; WABI-TV Bangor (Ch. 5; Community Telecasting Service; Murray Carpenter, general manager), already on air; WSUN-TV St. Petersburg (Ch. 38; City of St. Petersburg; George D. Robinson, general manager), starting May 1; WILK-TV Wilkes-Barre (Ch. 34; Wyoming Valley Broadcasting Co.; Roy E. Morgan, manager), starting April 1.

New radio affiliates, in addition to KING, are:

WJAN Spartanburg, S. C. (1400 kc, 250 w; owned and managed by James C. Byrd Jr.); WHKP Hendersonville, N. C. (1450 kc, 250 w; headed by Beverly Middleton as president); WERI Westerly, R. I. (1230 kc, 250 w, owned by Radio Westerly Inc., with Warren Greenwood as manager); WCON Cornelia, Ga. (1450 kc, 250 w; owned by Habersham Broadcasting Co.; John W. Jacobs Jr., manager); KLIL Estherville, Iowa (1340 kc, 100 w; owned by Estherville Broadcasting Corp.; William E. Schons, general manager); WQUA Moline, Ill. (1230 kc, 250 w; owned by Quad City Broadcasting Corp.; Dalton LeMasurier, general manager).

Meanwhile, in their first meeting since ABC merged with United Paramount Theatres, members of ABC radio stations advisory committee in all-day session in New York Friday heard top officials of network outline plans for gradual but steady development of new programs and new talent, aiming primarily for sales for next fall's season. Members volunteered to scout own areas for programs that might be developed for network use.

ABC group at meetings included Leonard H. Goldenson, president of ABC's parent AB-PT; ABC President Robert E. Kintner; Executive Vice President Robert H. O'Brien; Charles T. Ayres, vice president in charge of radio network; Ernest Lee Jahncke Jr., vice president and assistant to president; Robert M. Weitman, vice president for programming and talent; Oliver Treyz, in charge of sales development and presentations; Station Relations Director Beckman, and Station Relations Dept. Manager William A. Wylie.

Committeemen attending: Roger W. Clipp, WFIL Philadelphia, committee chairman; J. P. Williams, WING Dayton; Verl Bratton, WKTY LaCrosse, Wis.; T. B. Lanford, KRMD Shreveport; Harold V. Hough, WBAP Fort Worth; Frank Carman, KUTA Salt Lake City, and A. D. Willard Jr., WGAC Augusta, Ga. Committeeman J. Archie Morton, KJR Seattle, which gives up ABC affiliation when KING joins, not present.

Antenna Rules Made Final; Other FCC Actions

AMENDMENT of Sub-part C of Part 17 of FCC's rules governing construction, marking and lighting of antenna towers finalized by Commission Friday as proposed last November [B•T, Nov. 17, 1952]. FCC, however, deleted proposed specifications for marking and lighting of guy wires. Comrs. George E. Sterling and Robert T. Bartley dissented in part, favoring extending to 55 ft. present limitation of 20 ft. for uhf masts which may be installed on existing antennas without additional marking and lighting. Amended rules become effective March 30.

Sterling to Raleigh

FCC Comr. George E. Sterling to participate in seminar on uhf TV at Raleigh, N. C., March 4, sponsored by Sir Walter Television Broadcasting Co., permittee of uhf Ch. 28 WETV (TV) there.

Tampa-St. Petersburg Findings

Proposed findings filed in Tampa-St. Petersburg vhf Ch. 8 hearing Friday by Chief of FCC Broadcast Bureau, holding all three applicants propose operations in accord with Commission rules. "None of the applicants are to be preferred for engineering reasons," he concluded. Hearing record closed Jan. 21. Contestants are WFLA Tampa, WTSP St. Petersburg and Tampa Bay Area Telecasting Corp., St. Petersburg.

D. C. Action Withheld

Commission advised District of Columbia Board of Education it is withholding action on board's application for noncommercial uhf Ch. *26 in Washington pending approval by President Eisenhower of request to Congress for funds to construct station. Asking for more details on program plans and policy, FCC also noted letter from representatives of local cultural-educational organizations asking delay of Ch. 26 action pending exploration of wider community participation in application, possibly with Ford Foundation money. Group met with superintendent of D. C. public schools Friday.

Authorizations to WHP-TV, KMO-TV

WHP-TV Harrisburg, Pa., uhf Ch. 55 grantee, authorized to change antenna height from 920 ft. to 910 ft. above average terrain and make other equipment changes. WHP-TV's effective radiated power: 240 kw visual, 120 kw aural.

KMO-TV Tacoma, Wash., vhf Ch. 13 grantee, given modified permit to change ERP from 115 kw visual and 58 kw aural to 120 kw visual and 71 kw aural, increase antenna height from 560 ft. to 780 ft.

Flint Hearing Ends

Flint, Mich., vhf Ch. 12 TV hearing concluded Friday before FCC Examiner Benito Gaguine, making it sixth post-freeze case to end hearing. Proposed findings due March 20. Contestants: WJR Detroit, WFDF Flint and W. S. Butterfield Theatres Inc. Transcript totals 2,000 pages.

NBC PROMISES COVERAGE

DESPITE provision in New York state's civil rights law prohibiting telecast of proceedings of court or committee administrative agency (story, page 72), NBC reported Friday it would cover on television Senate subcommittee hearing investigating Voice of America scheduled for last Saturday. Spokesman said hearing would be carried on WNBT(TV) New York 3-4 p.m. EST and rest of network, 2-4 p.m. EST. Other TV networks and stations reported they did not plan to cover proceedings.

NARTB Draws Tributes For Get-Out-Vote Drive

HIGH PRAISE paid NARTB and broadcasters Friday by key Congressional figures and FCC Chairman Paul A. Walker for top award from American Heritage Foundation for industry's role in bringing out record vote last autumn. John F. Patt, WJR Detroit, headed the NARTB campaign. Excerpts from their comments:

Sen. Charles W. Tobey (R-N. H.), chairman Senate Interstate & Foreign Commerce Committee—"Radio and TV broadcasters went beyond the call of duty in serving the public interest. The record vote is a testimonial to both the responsibility of American broadcasters and the impact of their media."

Rep. Charles A. Wolverton (R-N. J.), chairman House Interstate & Foreign Commerce Committee—"We are all proud of the role stations played in what was a convincing demonstration of Democracy at the polls."

FCC Chairman Walker—"The effective manner in which radio and TV sought and delivered a record vote is in the finest traditions of broadcasting, indicating a high sense of civic responsibility."

NBC-TV Woos P&G

NBC-TV, it's understood, trying to sell Procter & Gamble hour-long, daytime, Monday-Friday strip with P&G using money saved by cancellation of *Those Two* on NBC-TV. P&G already sponsors NBC-TV's *Kate Smith Show*, Tuesday through Thursday, 4-4:35 p.m. EST, and *Welcome Travelers*, 3:45-4 p.m. Monday through Thursday. NBC-TV's reported plan is to have advertiser extend this half-hour to full hour with two new shows. NBC offer supposedly made directly to client, not through its various agencies.

ILL. EDUCATIONAL TV

APPROPRIATION of $1 million for Chicago educational TV station will be sought from Illinois State Legislature in bill to be introduced Tuesday by Rep. Charles H. Weber (D-Chicago). He said he would ask emergency action on money for Chicago and similar sum for U. of Illinois TV station at Urbana to beat June 2 FCC deadline on educational reservations. Funds for lake-front fair for Chicago, allocated in 1951, could be used for purpose, he added. Both Chicago and U. of Illinois have extensive educational TV plans (early story page 48).

PEOPLE

SIGURD S. LARMON, president of Young & Rubicam, N. Y., has accepted chairmanship for solicitation of city's advertising, publishing and entertainment industries for 1953 fund campaign of New York chapter, American Red Cross.

LEWIS H. AVERY, president, Avery-Knodel, appointed chairman of station representative section of New York Red Cross fund raising drive.

GEORGE F. MAEDEL, vice president and general superintendent of RCA Institutes since 1948, appointed chairman of school, **BRIG. GEN. DAVID SARNOFF,** RCA board chairman, will announce today (Monday). Mr. Maedel, who joined RCA Institutes in 1933 as mathematics instructor, succeeds **MAJ. GEN. GEORGE L. VAN DEUSEN** (U.S.A. Ret.) who retired, effective yesterday (Sunday).

VAN BEUREN DE VRIES, production manager, WMAL-TV Washington, with outlet since inception, named program director, KRTV (TV) Little Rock, Ark., effective March 1.

Chandler With WSB-TV

SPURGEON (Spud) CHANDLER, former Yankee pitcher and ex-U. of Georgia football star, last Friday joined WSB-TV as sports director and as first assignment will handle play-by-play TV of Atlanta Crackers (Southern Assn.) [CLOSED CIRCUIT, B•T, Feb. 16]. He left Yankees Jan. 1 as scout and is celebrated in athletic circles both as Rosebowl player in 30's and as World Series figure.

Meeting Sites Listed For BMI-BAB Clinics

LIST of hotels and cities at which BMI-BAB joint clinics will be held in late spring augmented Friday by following: New York—Rochester, Hotel Seneca, June 1-2; Idaho—Boise, Hotel Boise, June 29-30; Iowa—Des Moines, Savery Hotel, June 1-2; California—Los Angeles, Beverly Wilshire, June 19-20; Arizona—Phoenix, Westward Ho, June 17-18; Massachusetts—Boston, Copley Plaza, May 26-27; Nebraska—Omaha, Blackstone Hotel, June 3-4; Ohio—Columbus, Deshler-Wallick, June 12-13; West Virginia—Charleston, Daniel Boone, July 10-11; Maine—Portland, Eastland Hotel, May 25-26; Maryland — Baltimore, Emerson Hotel, June 5-6; Montana—Billings, Northern Hotel, July 6-7.

ASCAP Affidavit

ALL-INDUSTRY TV Per Program Committee served Friday with ASCAP affidavit supplementary to one filed in August 1951 designed to relieve ASCAP of necessity of issuing per program licenses to stations with blanket licenses from BMI and to permit ASCAP to charge on adjacencies as well as on programs containing ASCAP music. After study, committee will reply and then date for argument will be set, according to Stuart Sprague, counsel to TV Committee. Industry group in July 1951 asked court to set fair fee for ASCAP TV per program license after lengthy negotiations had failed to achieve agreement between ASCAP and TV broadcasters.

WABC-TV Buys Film

PURCHASE of more than $100,000 worth of film programming from Motion Pictures for Television by WABC-TV New York (formerly WJZ-TV) announced by station Friday. Films, which will occupy 6-7 p.m. EST time slot every day but Thursday, include half-hour adventure series and some 175 half-hour western features.

MISSISSIPPI'S FIRST TELEVISION STATION

WJTV

UHF INTERFERENCE-FREE SIGNAL
. . . WITH VHF COVERAGE

That's the unbeatable combination we offer in Central Mississippi—one of the nation's fastest-growing markets. Only last month the Product Performance Division of Philco Corporation, in a survey conducted throughout the area, determined that WJTV is being received . . . and clearly received . . . in television homes at distances up to 55 miles from our broadcasting site. Here's a quote from a letter concerning the survey:

"We have had the opportunity of closely observing your station performance since January 20, which was your first day of actual telecasting, and we are very happy to say that your station has made great strides in bringing to this new television market a standard of quality performance far beyond our expectation.

"We feel that your station is delivering quality television signals, with coverage comparable to VHF stations that have been established for many years. Considering that WJTV is only radiating 18,000 watts of power, which is only a fraction of power used on VHF stations, your present coverage of fifty miles radius from Jackson is more than we had anticipated. Naturally, since we are a Philco distributor, we are vitally interested in covering as large a market as possible for the sale of Philco television receivers.

"The Product Performance Division of Philco Corporation recently conducted a sixty mile UHF performance survey of WJTV's television coverage. This test was conducted over a period of eight days and consisted of sixty-five (65) separate surveys and thirty-four (34) towns and cities, within a radius of sixty miles of WJTV."

And here's a sample item from the report . . .

"In Tallulah, Louisiana, 55 miles airline distance west of Jackson, with an antenna elevation of 55 feet, we received 99 microvolts of signal."

/s/ V. P. Spence
Philco Sales Manager
Cabell Electric Company

We are happy to get the Product Performance Division of Philco Corporation's field strength survey and to know from these facts that WJTV's performance is far broader than engineers originally anticipated on paper.

Number of sets? Well, we're pretty happy about that situation too. As of January 2 of this year—18 days before WJTV hit the air—the RTMA county-by-county survey showed the number at 6,588. But an end-of-February count, derived from a survey of leading distributors and dealers, is 11,300 sets. And it's increasing every day.

Yes, sir . . . we're doing just fine with television here in Mississippi. WJTV has been on the air only five weeks and has already been programming from ten o'clock in the morning straight on through until almost midnight. WJTV is a full-time, fully-staffed station, operating in one of the most modern RCA-equipped television studios in America.

Controversy about UHF? No, indeed. It's television . . . it's Operation Smooth . . . and Mississippians like it.

CAMEL NEWS CARAVAN

Mon.-Fri., 7:45-8 p.m. on NBC-TV.
Sponsor: R. J. Reynolds Tobacco Co.
Agency: William Esty & Co.
Producer: Francis C. McCall.
Director: Ralph Peterson.
Writer: Reuven Frank.
Featured Commentators: John Cameron Swayze, in New York; David Brinkley, in Washington; Roy Neal, in Los Angeles; Jack Angell, in Chicago.
Weatherman: Clint Youle, in Chicago.

THE PIONEER video daily news program, now in its sixth year on NBC-TV *Camel News Caravan,* is still providing its viewers "today's news today" for 15 minutes each weekday evening in much the same fashion as it did on the date of its inaugural telecast on Feb. 16, 1948. Nor is that pattern much different from the theatre newsreel formula of news, comedy and cheesecake perfected over the years into a form as rigidly standardized as Greek drama or classical ballet.

Last Tuesday's *Camel News Caravan,* for example, included a pickup from Omaha where NBC-TV affiliate WOW-TV had just become the first vhf station to begin operating with 100 kw power, maximum permitted for vhf by the FCC; the opening of the UN general assembly in New York; scenes of the tense situation in Berlin; "a day in the life of Mrs. Eisenhower," dealing mainly with the unending stream of individuals and delegations coming to the White House bearing gifts for the First Lady; a fashion show of bathing and play suits staged in a snow-covered winter resort at Three Lakes, Wis., plus an assortment of orally-presented late news bulletins as the program's commentator, John Cameron Swayze, "hopscotched the world for headlines."

JOHN CAMERON SWAYZE
"Glad we could get together"

Main changes in the *Camel News Caravan* have been in the expansion of its audience, with stations added as rapidly as the growth of network TV would permit, and in the concurrent expansion of news pickup points. A switch in producers from Fox Movietone News, which handled the show during its first year, to NBC's own news staff, in charge since then, has doubtless wrought many changes behind the scenes but none immediately apparent to the viewer at home.

The main attraction of *Camel News Caravan* to many viewers is Mr. Swayze, whose suave handling of the news matches perfectly his handsome face and impeccable garb that have won him hands down the title of best-dressed TV news commentator. On Tuesday, Mr. Swayze wore a horizontally striped tie (a pattern that shows up clearly on TV), a comfortably wide-collared shirt of white (or what appeared as white on the home screens) material, and a solid color double-breasted coat whose peaked lapel bore the fresh boutonnier that has become Mr. Swayze's visual trademark just as his closing "That's the story, folks. Glad we could get together" is his oral identification.

Dean as well as fashion-plate of TV's newsmen, Mr. Swayze over the years has perfected a technique of news delivery which permits him to speak straight to (and look straight at) his home audience, with a minimum of his attention given to notes on the news he reports.

This is especially noticeable during his "hopscotch" period which winds up each evening's telecast. As he finishes each news item, its contents apparently absorbed by osmosis for he has not glanced at it, his right hand gracefully takes it from the pile before him and drops it somewhere off-camera to the right while he reads (if that is the word) the next item without taking his eyes from the camera. Whether this is done by phenomenal memory or by some simple back-stage TV technical trick, it's extremely effective for the viewers at home.

* * *

MY HERO

Sat., 7-30-8 p.m. EST on NBC-TV.
Sponsor: Dunhill Cigarettes.
Agency: Biow Co.
Executive Producer: Don Sharpe.
Director: Harold Daniels.
Writers: Robert Cummings and others.
Cast: Robert Cummings, Julie Bishop and John Litel.

A COMEDY SERIES frequently suffers from a generic weakness of plot, and *My Hero* is no exception. The story-line is obvious and often banal, but the program nevertheless manages to provide a carload of chuckles and occasional guffaws.

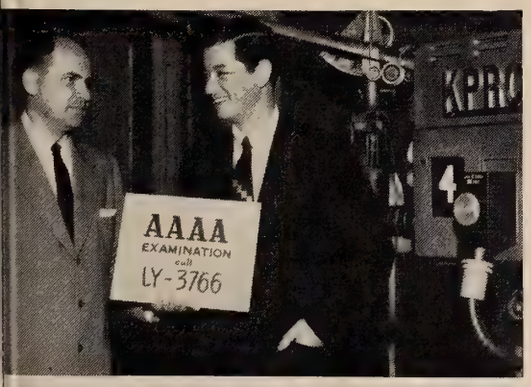
In fact, *My Hero* is at its best when it borders on the farcical. The program under inspection here included some uproarious scenes in which Robert Cummings, as Robert S. Beanblossom, a real estate salesman with the most charm but the least aggressiveness and the lowest sales record in the office, decided to change his ways.

"Gr-r-r-r-r-r," Mr. Beanblossom growled into his mirror, "I'm gonna be a tiger. Just watch me. G-r-r-r-r-r-r."

But Mr. Beanblossom, who usually is blissfully unaware that people are cold and shrewd in business, occasionally slipped out of his tiger role and went soft. Then, reminding himself that he is not a nice guy but a habitant of the jungle, he turns hard again . . . and vice versa. These alternating moods are a source of excellent low comedy and provide Mr. Cummings with a show case for his talents as a comedian.

Undoubtedly, the sharp characterizations of the leading players, notably Mr. Cummings, compensate in large measure for the program's paucity of plot. Julie Bishop gives a finished performance as Julie Marshall, the boss' secretary who often surmounts great odds to keep Mr. Beanblossom's job for him. And John Litel lives up well to the stereotype of the boss who is continuously harassed by Mr. Beanblossom's blundering but will not permanently discharge him because he is really a warm-hearted person underneath a cold-blooded exterior.

My Hero is not likely to establish any records for longevity as a television series. But it will provide a pleasant interlude until viewers become tired of the nice-guy-turned-into-tiger theme.



TV NEWSREEL

MENNEN Co. becomes co-sponsor of *Broadway TV Theatre* on WOR-TV New York with contract worked out by (l to r) Warren Wade, station mgr. and exec. prod. of drama series; Ben LaRue, station salesman; Leonard Colson, adv. mgr., Mennen; Basil Matthews, acct. exec., Kenyon & Eckhardt.

our respects

to RICHARD W. SIERK

RICHARD W. SIERK, advertising manager of Ironrite Inc., makers of electric ironing machines, found himself confronted by a problem when television reached its postwar popularity.

"Human nature being what it is, the appliance salesmen were letting people come to them for television sets, not spending much time digging for Ironrite sales," he says. "Dealers and distributors were all wrapped up in their television set business to the extent that white goods were being neglected."

Although Mr. Sierk thinks Ironrite is a top product and says postwar demand was and continues to be great, "I must admit television gave us some anxious moments."

Mr. Sierk found the solution simple by making use of an old axiom: "If you can't lick 'em, join 'em."

"That's just what Ironrite did by putting its advertising on television, so that the same people who had been running to salesmen to write up a television set sale, now came running to the same salesmen to write up an Ironrite sale."

Mr. Sierk and Ironrite entered television "rather quietly" in May 1949 with a series of 12 five-minute films on a dozen stations. The series, *Petticoat Parade,* featured two minutes of entertainment, two more minutes of ironing demonstration with no commercial mention of Ironrite, then "a one-minute payoff commercial."

Prospects Showed Up

The Ironrite people couldn't help but be enthused, Mr. Sierk relates, because prospects started showing up the day after these programs—and buying.

The uninterrupted demonstration formula was retained by Mr. Sierk when Ironrite started planning for expansion in the television medium. "Ideally," he says, "an Ironrite commercial should contain 2½ minutes of uninterrupted demonstration. That could be accomplished with a half-hour show which permitted a brief introduction, the solid middle commercial and a brief payoff at the end."

Thus, in September 1950, Ironrite launched *Hollywood Screen Test* on ABC-TV with a basic list of only eight stations. Today the list is up to 25 and still is increasing as new stations and availabilities open up, Mr. Sierk says.

Mr. Sierk is sold on the live TV commercial: "We chose live commercials because there is so much more credibility in such a demonstration. The viewer knows that on film an ironing operation could be shot and reshot until perfect. We prove with our live commercials that it's really simple to iron anything on an Ironrite. We've even used a nine-year-old girl on the commercial to get across the point."

Sales Figure Cited

The success of Ironrite's method of television advertising is demonstrated, Mr. Sierk would add, by sales figures "that give us as much as 50% of the ironer business in the areas where our TV is running."

Mr. Sierk joined Ironrite in the fall of 1945 after service as an officer with the Army tank destroyers. He had been graduated in 1940 from the U. of Michigan Journalism School, afterward spending a year doing publicity for the National Exchange Club in Toledo before his Army service.

The Ironrite advertising manager was born in 1917 at Warsaw, N. Y. He is married to Virginia Joffa Sierk and the pair have three children, Ricky, 8, Judy, 6, and Barbara, 1.

Mr. Sierk belongs to the AmVets, PTA and the Detroit Sports Guild, but says he is not very active in any because of his extensive travel for Ironrite.

But he "loves sports and will spend every night at Madison Square Garden when in New York if commitments permit."

Mr. Sierk handles all Ironrite's advertising and sales promotion activity with the help of Brooke, Smith, French & Dorrance, New York agency.

Sees Greater Reach

He hopes to see the time when Ironrite's television advertising will reach 95% of the country's people, "rather than the approximately 45% currently reached."

His ambitious plans for Ironrite seem to have been at least partially accomplished: "I once looked forward to administering a million dollar budget. Now it is very close to two million."

Experience

has made KOIN the number 1 radio station in Oregon and Southwest Washington

The BEST programming "know-how" stems from service and understanding by experienced personnel who are part of the community.

Six out of every 10 members of the KOIN staff have been with the station 10 years or longer. Eleven staff members have served with KOIN more than 20 years.

The average service of the entire KOIN staff is above 11 years....All this radio experience, the finest in the Pacific Northwest, is yours when you use KOIN. There is no need to take less...when you can have the best.

This 20-year pin is a symbol of that basic ingredient in successful advertising—"know-how".

Cover Story

EDITOR:

This world is upside down enough without "my bible" falling heir to the despair of the business.

I have just sat down with the Feb. 16 issue of B•T; my desk is reasonably clean; most everyone else in the office is out to lunch; I am ready to lean back and have a casual cigarette and see what words of wisdom I can collect from your current sheet; open up the cover page of the publication and discover that I am looking at the back page and upside down at that.

Being not very bright, I turn the magazine over and see the lovely girl from WHB swinging upside down (if you will do the same you will note this is a very advantageous view); open the back page and discover that I am looking at the front of the magazine right side up.

I am here—where are you?

Eldon Campbell
General Sales Manager
Westinghouse Radio Stations Inc.

[EDITOR'S NOTE: In a quandary. Apparently Mr. Campbell's copy, unique as far as the editors can learn, was bound with the cover on backwards.]

El Paso Passed Up

EDITOR:

We are amazed that B•T would let John Crandall's article on the future of TV slip through [B•T, Feb. 9]. It does irreparable damage to the omitted markets by planting a seed in the minds of timebuyers that those markets do not merit consideration. It also

Now! From Diamond to Radio

A BIG LEAGUE SHOW!

Phil Rizzuto's Sports Caravan

a sparkling 15 minute transcribed radio series

About Phil. Everyone knows him . . . 12 years with the world champion Yankees.

About the Show. A fast-moving 52 quarter-hour sports program for twice-weekly broadcast. 26 weeks beginning mid-April through September, including a free-upon-request separate disc on which Phil will transcribe 5-second personalized lead-ins to commercials.

Production. Each transcription is double-faced, with 2 complete 15-minute shows, open-end for 1-minute commercials: open—middle—close.

Cost. Priced at incredibly low "quick-sale" rates.

completely overlooks the fact that many stations such as KROD-TV, which are omitted, are now operating successfully with the full potential still ahead. El Paso has a tremendous trading area within range of our transmitter. City alone exceeds 140,000 and already more than 17,000 sets are in the area. We have 120,000 friends across the Rio Grande in Juarez and more than 50,000 army personnel not included in census only five miles from our transmitter.

Actually, we serve a greater potential than Crandall requires. We feel certain many other markets overlooked are in similar positions. Since we provide TV service for southern New Mexico and southwest Texas, we feel El Paso is a must for any advertiser wanting national coverage. Feel certain your magazine will want to emphasize that this is only one agency man's opinion and urge you to give full recognition to potential markets not included in his analysis.

Val Lawrence
President & General Manager
KROD-TV El Paso, Tex.

[EDITOR'S NOTE: Far from letting Mr. Crandall's article "slip through," B•T eagerly published it to let its readers know how at least one big agency was thinking about TV. Another article, taking a less restrictive view of TV development, is scheduled for the future.]

Winter Cheesecake

EDITOR:

I know that during the good old summertime you receive plenty of pictures of bathing beauty contest winners and "cheesecake" in general. However, I am sure the enclosed picture, taken in the middle of winter, is news worthy. It is of Miss Sally Ardrey, our entry in the beauty contest held during the Pageant of Sara DeSota here last week. It's easy to see why Miss WSPB won over all to become Miss Sarasota of 1953.

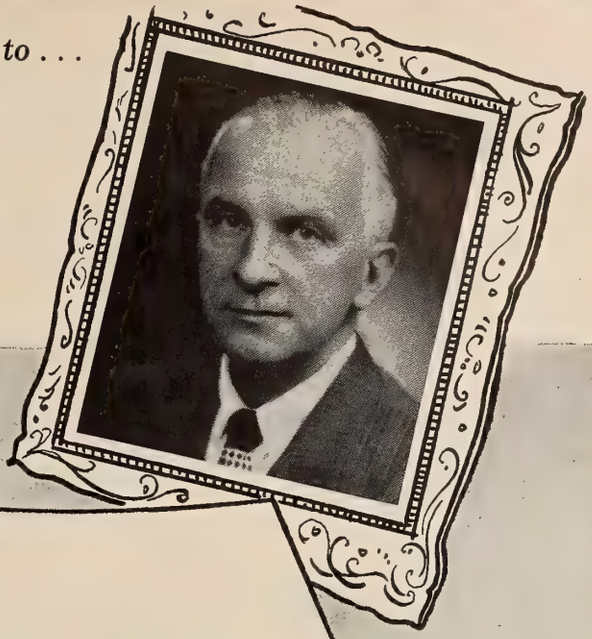
Unsolicited Testimonial



EDITOR:

I was ready to dash off a boquet of roses on my typewriter to the author of that so excellently worded review on *Talent Patrol* [B•T, Jan. 26] when I suddenly realized that quite a number of ex-G.I.'s must feel the same way I did and that "Open Mike" would therefore be swamped with praises . . . To my great surprise all I could find in this week's issue (Feb. 9) was a letter . . . in which the reviewer was called everything from a "frustated ex-PFC" to a "poor man's John Crosby." Judging by the signature and address the writer of the letter must be connected with the Army by several miles of red tape.

I only would like to tell him that if the "product" the Army is "selling" is really all it is

How Many Medicines In Your Doctor's Kit Came From a *Meat Packing Plant?*

Actually more than 100 medicines, and medical products that your doctor regularly uses in the practice of his profession *get their start* in a meat packing plant.

Among them are ACTH and cortisone for the treatment of arthritis, asthma, rheumatic fever, and other ailments, epinephrine for allergies and certain emergency heart conditions.

Other products include surgical sutures and fibrin foam which control bleeding to make surgery safer.

Many, like insulin for the control of diabetes, can be obtained from *no other source.*

To make these medical products available to your doctor the meat packing companies developed new facilities for saving or processing glands of meat animals, and in "partnership" with the medical profession, promote research for still more life-saving, health restoring medicines.

Perhaps you'd never thought of it before, but doesn't this important service make the meat packer a sort of right-hand-man to your own family doctor?

Did you know

. . . that it takes the pancreas glands from *1,500 cattle* or *7,500 hogs* to make a single ounce of crystallin insulin . . . that there are more than *4,000 individual companies* in the meat packing industry . . . that recovering *everything of value* (as glands for medicines) helps this service industry bring you meat at a *lower service cost* from farm to table than almost any other food?

AMERICAN MEAT INSTITUTE
Headquarters, Chicago • Members throughout the U. S.

said to be, its soldiers would be its best advertisement and recruiting would be no problem. But since this is not so the reviewer of *Talent Patrol* had a right to make some remarks about the "sponsor's product" of which he and myself and thousands of others were dissatisfied "users." . . .

Remote Control

EDITOR:

Your story on our automatic remote control equipment installation at KEAR [B•T, Feb. 2] attracted more than 90 stations requesting copies of our information brochure. We have been forced to set the brochure up in more substantial printed form than the previously planned mimeograph edition, and we would appreciate it if you could advise all who wrote us that there will be a slight delay of about another week before mailings will be completed.

We can handle a limited number of other requests. We asked that postage be included; the amount required to mail it out will be about 30 cents so ask any others to put that much in their request. . . .

S. A. Cisler, President
KEAR San Mateo, Calif.

Sam Nathanson

on all accounts

SAM NATHANSON, vice president in charge of sales and distribution for Helen Ainsworth Corp., Beverly Hills, has more than 30 years in different phases of the motion picture industry to give him the experience in showmanship he believes is desperately needed in TV.

Convinced TV entertainment will improve in quality when the sponsor places his confidence in the producer, he believes "the day will come" when producers will prove they are qualified showmen who consistently can incorporate in their productions those elements which guarantee the largest audience potentials.

"When TV was born, the industry was considerably under the influence of men who were technical experts, but unconditioned in showmanship." Now, Mr. Nathanson asserts, "there must be a trend toward personnel who have this flair for producing, selling and promoting their product."

A native of Chicago, educated at Western Institute, that city, and City College in Detroit, he entered show business in 1915.

Moving on to New York, he became stage manager of the play, "Blossom Time." In 1921 he joined Standard Motion Picture Co. in Detroit as a film salesman. Returning to New York, he became affiliated with Producers Distributing Corp.

The next seven years found Mr. Nathanson back in Detroit as city sales manager for Columbia Pictures Corp., after which he was transferred to Los Angeles.

After a period of organizing film distribution companies, he and his son, Stuart, opened a public relations firm and handled publicity on such motion picture productions as "Red Shoes," "Macbeth," "Quartet" and "Cyrano de Bergerac."

Last summer he joined forces with talent agent Helen Ainsworth and now is preparing for stepped-up television activity. Supervising national distribution of *The Adventures of Patches,* half-hour film series, is the first step, and Mr. Nathanson is constantly on the lookout for other products.

Now setting up agency representatives in major cities in Europe and South America, Mr. Nathanson recently completed a coast-to-coast tour establishing distribution offices in this country.

Mr. Nathanson married the former Rae Davis some 30 years ago. Their family consists of son Stuart, a Hollywood children's TV program packager, and a daughter, Gloria, now Mrs. Irving Milberg. The Nathansons make their home in Hollywood where he sometimes indulges in his principal hobby, golf.

March 2, 1953 Vol. 44, No. 9

BARTLETT SUGGESTS INTERIM GRANTS FOR COMPETITORS

CBS President Frank Stanton seconds proposal by California TV channel competitor Paul R. Bartlett that the FCC grant interim TV construction permits and licenses to joint trusteeships of competing applicants, with the victor reimbursing the loser for his investment and sharing interim profits after FCC's final award of channel.

REVOLUTIONARY plan for accelerating the spread of TV service across the country by permitting the erection of TV stations before instead of after FCC hearings and their operation on an interim basis until a decision, is proposed in a letter sent last week to all applicants for TV now waiting FCC hearing.

Proposer is Paul R. Bartlett, president and general manager of KFRE Fresno, Calif., for whom the delay caused by competitive applications is no mere academic problem since KFRE and KARM Fresno both have applications on file for a station on vhf Ch. 12 in that city.

Mr. Bartlett's proposed solution for himself and all other competitive applicants is for a combined interim operation.

"It is proposed," he states, "that two or more competing applicants in a community cause a new 'trustee corporation' to be formed for the purpose of obtaining an interim license and operating the station during litigation over final exclusive right to use the channel by one of the applicants."

Stockholders and directors of the "trustee corporation" would include one or more "public members," community-minded citizens with voting power to resolve any disputes arising among the individual applicants, who would jointly finance the interim operation.

Competitors' Agreement

Plan calls for agreement among the competing applicants and the FCC that the Commission waive its multiple application rule for the duration of the interim operation period and for the conclusion of the trustee operation when a final decision as to the licensee is made. At that time the successful applicant would purchase the assets of the trustee corporation so as to repay to the loser his original investment plus his share of any operating profits or minus his share of losses.

Immediate approval of plan was voiced by Frank Stanton, president of CBS, who said:

"The general approach suggested by Paul R. Bartlett represents a significant and constructive suggestion for the solution of one of the most critical problems now facing the FCC, the industry, and the television public. In existing circumstances and under present procedures, large segments of the public are being deprived of television service altogether and equally large segments of the public are being deprived of that choice of programs which is necessary to the health of a competitive industry. As a result, the pressures on the Commissioners and staff of the FCC are enormous and the economies of the broadcasting and manufacturing industries are being unnaturally retarded.

Interim Method

"The interim method suggested by Mr. Bartlett of permitting competing applicants on a temporary basis to join forces so as to put television stations on the air during the many months and years which the Commission must necessarily otherwise consume before it can decide among the competing applicants, would eliminate these difficulties. The plan therefore deserves the most serious and constructive consideration by all those who are interested in the early full maturity of television."

Mr. Bartlett's "general outline" in full text:

The Need

"There are 69 markets of 25,000 population or more without TV stations and where competing applications may prevent the building of new stations for several years. In addition there are 51 communities which now have only one station and cannot normally expect to have another for many months. In the latter group of communities there are three and a half million families with receivers who are confined to one program service.

The Problem

"Despite its establishment of orderly rules of procedure and efforts to speed the handling of applications, the FCC now faces a backlog of some 900 TV applications, many of which will require competitive hearings involving lengthy testimony. Meanwhile public and Congressional pressure is mounting for additional TV service.

Solution

"Some method needs to be found whereby new stations may be built at once and operated on an interim basis pending final FCC decisions as to who the eventual licensee will be. This method must preserve for competing applicants all their legal rights.

Method

"It is proposed that two or more competing applicants in a community cause a new 'trustee corporation' to be formed for the purpose of obtaining an interim license and operating the station during litigation over final exclusive right to use the channel by one of the applicants.

"Participating in the 'trustee corporation' as stockholders and directors would be one or more community-spirited citizens or public members who would have voting power to resolve any conflicts between the competing applicant stockholders in the temporary operation. Capital contributions would be provided jointly.

"In the case of two competing applicants the stock could be held 49% by A and 49% by B, with the public member holding 2% and forming the third man on the directorate of three. The variety of other combinations could be used to suit individual needs.

"Among other things the competing parties would":

A. Ask the FCC for a waiver of the multiple application rule and agree to having a license granted to the "trustee corporation" on an interim basis pending final decision in the hearing between them.

B. Agree that no testimony based on the operation of the station under the trusteeship would be admissable as evidence in the hearing.

C. Agree that the applicant who is finally successful would purchase the assets of the trustee corporation in such a manner as would return to the loser all his original investment plus his share of any operating profits or losses.

D. Agree to employ independent management in the trustee operation.

E. Agree with the FCC that the authorization for the trustee operation would end whenever both competing applicants ceased to prosecute their individual applications, and/or at the time a final decision is made as to who will be the licensee. This would provide for termination of the trusteeship and at the same time prevent the parties from effecting a permanent merger without FCC approval.

Conclusion

"Authorization by the FCC for competing applicants to adopt this basis procedure, or a variation of it, would serve public interest by:

"1. Permitting the almost immediate operation of many new stations in presently unserved or underserved areas.

"2. Preserving for competing applicants all their individual rights to orderly presentation of their cases for eventual full ownership of the station.

"3. Encourage more permanently competitive industry by reducing the tendency of competing applicants to merge permanently in order to avoid costly and protracted delays.

"4. Ending or shortening the present or future monopolies caused by one or two stations operating in a market while lengthy litigation delays use of other frequencies.

"5. End the anomalous situation which sometimes finds the strongest and best qualified applicants in a community unable to provide service because of competitive applications while less well prepared applicants succeed to the use of channels through the fortuitous circumstance of being unopposed."

REPEATS, DISCOUNTS IN SUMMER PLANS

TV advertisers are making their 1953 summer plans as such things as inducement discounts are dangled before them, along with ideas that include summertime repeats of the past winter's better offerings.

TV networks and advertisers are slowly coming around again to the problem of the summer program. In a cross check of this seasonal action, B•T learned:

The networks are beginning to develop their 1953 policies with respect to "incentive plans" calculated to keep sponsors on the air throughout the summer.

CBS-TV officials reported that their special inducement this year would be comparable to that of last summer, when virtually all CBS-TV sponsors remained on. This year, shows in Class A time periods will be eligible for 30% program rebate during the eight-week period starting July 5 and ending Aug. 29. Last year the rebate was 25%. Officials said that this year, due to overall liberalization of the network's discount policy, no aditional time discount will apply. The incentive plan is available to all currently contracted time periods with network origination in Class A time, plus all new business starting not later than the week of April 5.

NBC-TV Considers

NBC-TV, which offered no special summer inducement concessions last year, currently is considering the question but as yet has come to no final decision, an official reported.

Several advertisers, in another approach to reduce costs, are studying the precedent set last year by *Dragnet* and the *Groucho Marx Show*, wherein the advertisers repeated, as summer fare, the best programs of the winter season.

Dunhill Cigarette is contemplating that formula, in plans calling for six re-issues of its NBC-TV program, *My Hero*, while running a total of twelve summer episodes.

Four Star Playhouse, the Singer Sewing Machine production on CBS-TV; General Electric's *I Married Joan* on NBC-TV, and General Foods *Our Miss Brooks* on CBS-TV are all expected to issue some re-runs of their winter successes. Since all these shows are on film, the production cost involved in the repeats will be negligible.

On the other hand, there is still a fair complement of programs which will give way traditionally to summer replacements.

The great advance of that policy to an agency or advertiser is the opportunity it gives to test new programs which often survive as winter staples. Philip Morris, for example, which this year will replace *I Love Lucy* for the summer, last year mined a winner in *Margie*, the *Lucy* alternate which went on to to become a winter companion-piece to the program it replaced.

Another example of similarly successful testing was the *Mr. Peepers* show which spelled the Ford program during the summer and returned in the winter as the regular offering of the Reynolds Metal Co.

Summer Replacements

Two shows which this year will definitely take on summer replacements are *Mama*, sponsored by General Foods on CBS-TV, and *Red Buttons*, same parent company, same network.

Several shows, it is known, will proceed through the summer without hiatus. Two of these are *My Little Margie* on CBS-TV (Philip Morris) and Pepsi Cola's *Short Short Stories*, also on CBS-TV.

The "no vacation" policy will also obtain generally for the syndicated film productions. The film packagers as a rule negotiate their contracts with the stations on a broad 52 or 39 week basis, with a minimum term of 26 weeks.

One of the large syndicate firms that expressed unconcern with the summer hiatus problem is the Frederic W. Ziv Co. An executive there pointed out that Ziv offers its television programs "on a firm 52 week basis only."

Similarly, Aaron W. Beckwith, sales director of United Television Programs, declared that many advertisers are working on a 52-week basis though the company prescribes a minimum of 26 weeks. He said "There is no such thing as a summer hiatus for us," attributing the increased business activity to new stations coming on the air and to "a continuous education of the advertiser to keep their messages before the public all year round."

Halsey V. Barrett, eastern sales manager for Consolidated Television Sales, noted that most of their contracts are for 39 or 52 weeks and therefore "the summer constitutes no problem for us." He observed that "repeat" showings of films are popular because many new stations have come on the air and a heavy portion of the audience of older stations may not have viewed the show during its first run.

INTENSIVE merchandising plans, including distribution of 100,000 balloons, 45,000 club buttons and 30,000 health and good deed charts, are made by officials of WTOP-TV Washington, which has sold a $250,000 package to Giant Food Dept. Stores. Chain of 26 stores purchased Pick Temple, cowboy-folk singer, on exclusive one-year basis for 1¾ hours, seven days weekly. Heidi bread, a private brand, will be plugged initially. Negotiators include (l to r): Seated, John S. Hayes, president, WTOP Inc.; Richard Wheeler, station salesman; Mr. Temple and his dog, "Lady"; Clarkson Gemmill, Giant advertising director; Robert Maurer, TV director, Henry J. Kaufman Assoc., agency; standing, Lloyd W. Dennis, program director, WTOP Inc.; H. Thomas Tausig, program director, WTOP-TV; Larry Beckerman, producer, of the Temple show, and Morrie D. Schwartz, Mr. Temple's attorney.

N. Y. Area Drug Stores Set Merchandise Plan With WOR

AN extensive merchandising tie-in involving WOR New York and the Pharmaceutical Council of Greater New York, an organization representing more than 4,100 independent drug stores, has been announced jointly by William Crawford, WOR sales manager, and Dominick Forlizzo, president of the Council.

WOR's part in the project will include a 15-minute Monday-through-Friday program, "Tello-test," which will carry institutional announcements as well as commercials promoting the interest of druggists. The station will continue to carry announcements saluting druggists in the area and will schedule interviews with leaders in the drug field.

The council has pledged the cooperation of participating drug stores. They will display WOR-advertised merchandise prominently and make use of merchandising aids. Wholesalers will also assist. Drug Store Advertising Assoc. made arrangements for the tie-in.

Dunhill Plans for Its Cork Tip

DUNHILL king-size cigarette will introduce a new cork-tipped style in addition to its plain tip product, effective March 16 in four key states, California, Texas, Massachusetts, and Ohio. It will go national on April 13.

Intensive radio spot announcements will be used in the four test states. The newest version will also be promoted on Dunhill's NBC-TV program, *My Hero*.

In the last 18 months, Dunhills were intensively promoted in television, newspaper and radio campaigns from coast to coast. As a result, Dunhill executives announced, it has a firm grip on the 85mm market with an impressive sales gain of more than 600%. Biow Co., New York, is agency.

Tea Firm Ups Radio-TV

NATIONAL Tea Co., Chicago's largest retail newspaper food advertiser, last week quadrupled its TV advertising and also added two radio programs to its local station schedules.

Total value of time, talent and production exceeds $600,000 a year, according to C. H. Lilienfeld, vice president, Schwimmer & Scott Inc., agency which handled negotiations. He said increased commitments make the National Food stores "the largest retail sponsor of television and radio in the nation." Firm now will use one hour and 10 minutes of TV daily, Monday through Friday—a one-hour program on Saturday, and a half-hour on Sunday. An intensive schedule of TV spot announcements also was announced.

Brand Names Releases Spots

BRAND Names Foundation released to stations throughout the country yesterday (Sunday) a kit containing two series of radio spot announcements keyed to Brand Names Day, April 15. CBS Radio prepared the announcements.

L&M Defends Chesterfield Advertising Claims

LIGGETT & Myers Tobacco Co. has denied to the Federal Trade Commission that it has made false claims in its radio and television commercials and other advertising for Chesterfield cigarettes.

In its formal answer, filed by the New York law firm, Simpson, Thacher and Bartlett, the company denies that such slogans under attack as "much milder," "cooler smoking," "no unpleasant after-taste" and claims about non-irritating effects are false. FTC is charging "false, misleading and deceptive" claims and "misrepresentations" in Chesterfield advertising for the second time, the earlier suit in October having been dismissed with an appeal still pending.

Chesterfield attorneys also filed several exhibits of printed advertisements and continuity on broadcast commercials. A tentative hearing has been set for March 24 in New York.

Ad Awards for Women

WOMEN'S Advertising Club of St. Louis is accepting radio and TV nominations until March 15 for the annual Erma Proetz awards, given annually to outstanding women in creative advertising. TV awards will be presented by George M. Burbach, general manager, KSD-AM-TV St. Louis, at a May luncheon meeting in the Hotel Statler that city.

Nominations can be sent to Jean Drewett, Gardner Adv., 915 Olive St., St. Louis, for work done between March 1, 1952 and March 1, 1953. Awards honor Erma Perham Proetz, past president of the St. Louis club and the only woman represented in the Advertising Hall of Fame of the AFA.

John L. Anderson Dies

JOHN LUTHER ANDERSON, 67, retired treasurer of McCann-Erickson, New York, died Feb. 21 at his home in Dobbs Ferry, N. Y., after a long illness. He also was a vice president and director when he retired in 1952 after working with the agency since 1919.

In 1922, he was general assistant to the late A. W. Erickson, and Mr. Anderson became treasurer in 1930.

Surviving is his wife, Mrs. Una Page Anderson.

The Clients' Reactions

METHOD of presenting success stories of sponsored products has been devised by Philip Norman, director of KNX Hollywood *Housewives' Protective League,* and Don Ross, merchandising manager for the station and program. Representatives from four sponsors have transcribed off-the-cuff remarks, telling how the sale of their respective products has been aided by the station's merchandising support.

Participants are Joe Varner, Southern Calif. district manager, Peter Paul Inc.; Lou Casey, L. W. Casey & Co. (manufacturers' representative for Soilax); Doug Riach, district representative, General Foods; and Ed Belford, advertising manager, McDaniel's Markets.

Copies of the transcription have been sent to all CBS Radio Spot Sales offices to be used in demonstrating the KNX-HPL success story.

PEOPLE prominent in the agency field when Paul H. Raymer Co., station representatives, opened for business two decades ago, help the Raymer company celebrate its 20th anniversary party at the Hotel St. Regis in New York last month. All those pictured above, plus Jack Latham, formerly of Young & Rubicam; Wilfred King, J. M. Mathes, and Margaret Jessup, formerly of McCann-Erickson, were at Raymer's 10th anniversary in 1943. Seated (l to r): Linnea Nelson, formerly J. Walter Thompson Co.; Medeleine Vose, Raymer; Elizabeth Black, Joseph Katz Agency; Reggie Schuebel, Wyatt & Schuebel. Standing (l to r): Ned Midgley, Ted Bates; Paul Raymer; Hubbell Robinson Jr., CBS-TV; Fred Brokaw, Raymer; Frank Barton, Lennen & Newell; John Davidson, Davidson & Maddux Assoc., and Ralph McKinnie, Raymer.

Fellows Tells TV Seminar Of Advertising's Role

THE TAXES needed to produce under government operation such spectacles as TV's coverage of the recent political conventions and campaigns would be intolerable, NARTB President Harold E. Fellows told the Third Annual Regional Television Seminar Friday, opening day of a two-day session in Baltimore.

The seminar was held at WAAM (TV) and Johns Hopkins U., Baltimore in cooperation with American U., Johns Hopkins U., U. of North Carolina, Temple U. and the U. S. Office of Education.

Praises Present System

Contending that the government should not own or control public media, Mr. Fellows said he did not believe that unsponsored TV "could hope to perform as magnificently as our present system."

Taking part in a career panel at the seminar were Herbert B. Cahan, WAAM program manager; Jack Harrington, president of Harrington, Righter & Parson; Lester Lewis, Lester Lewis Assoc.; James O. Luce, chief radio-TV timebuyer, J. Walter Thompson Co.; Sig Mickelson, CBS-TV director of news and public affairs; Edward B. Roberts, script editor, *Armstrong Circle Theatre;* Kenneth Tredwell, assistant vice president, WBTV (TV) Charlotte, N. C.; Charles Underhill, ABC's TV program department director.

Judges to Choose 'Lulus'

PANEL of five judges who will select winners in the seventh annual Frances Holmes awards competition, sponsored by Los Angeles Advertising Women Inc., include Frances Corey, publicity-sales promotion director of The May Co.; Kai Jorgensen, executive vice-president, Hixson & Jorgensen Inc., and John K. West, vice president in charge of NBC Western Div. Presentation of "Lulus" will be made April 12 during the awards luncheon at the Hotel Statler, Los Angeles.

Southwest Agency Meet Has Record Attendance

RECORD TURNOUT of 350 agency executives and guests attended the annual convention of the Southwestern Assn. of Advertising Agencies in Fort Worth Feb. 12-14.

Speakers included Rowland Broiles, president of the agency of the same name, who served as general chairman at the meeting; Frederic Gamble, president, American Assn. of Advertising Agencies; Arthur Towell, president of the Madison, Wis., agency of that name, and Dean J. E. McCarthy, College of Commerce, Notre Dame.

Host chairman for station representatives was Joe Evans of Free & Peters, Fort Worth, while Harold Hough, director of WBAP-AM-FM-TV, was host chairman for station and sales managers.

JOHN D. METZGER (r), radio-TV director, Byer & Bowman Agency, Columbus, O., explains fundamentals of conducting a radio-TV campaign to an advertising class at Ohio State U. Discussion followed a class tour of the agency's new offices.

NEW BUSINESS

Spot

Jordon Sales Co., Phila. (refrigeration equipment), planning TV spot campaign in 30 markets in next four months. Agency: Gresh & Kramer, Phila.

Interstate Bakeries, Kansas City, renews *The Cisco Kid* in 16 markets in Midwest and West for third year.

Seven-Up Bottling Co., L. A. (soft drink), started radio spot announcement campaign on KFWB KLAC Hollywood, KOWL Santa Monica and KWKW Pasadena, for 13 weeks from Feb. 16. Agency: Mogge-Privett Inc., L. A.

Western Air Lines, L. A., started spot announcement campaign, week of Feb. 1 for 13 weeks, on KTTV (TV) KTLA (TV) KNBH (TV) KHJ-TV KLAC-TV and KECA-TV that city. Agency: Buchanan & Co., L. A.

Piel Bros., N. Y. (Piel's light beer), adds two TV programs in New York area: *Sports With Jim McKay* on WCBS-TV, 11:30-15 p.m. Tues., Thurs. and Sat., and *Boxing From Ridgewood Grove* on WJZ-TV, 9-10:30 p.m., Tues. Agency: Young & Rubicam, N. Y.

Haffenreffer & Co., Boston (Pickwick ale and Boylston beer), sponsoring Douglas Fairbanks Jr. half-hour film series on WBZ-TV Boston, WABT-TV Bangor, Me. and WWLP (TV) Springfield, Mass., for 26 weeks. Agency: H. B. Humphrey, Alley & Richards, Boston.

Westinghouse Electric Supply Co., L. A., started *George Putnam and the News* on KTTV (TV) Hollywood, 10 minutes thrice weekly, quarter-hour twice weekly, for 13 weeks from Feb. 9. Firm started 52 weeks' spot announcement campaign Jan. 12 on KMPC KECA KLAC KFWB that city and KBIG Avalon. Agency: Irwin Co., Beverly Hills.

Networks

Household Finance Corp., Chicago, starts *Frank Goss News* on 14 Columbia Pacific Radio Network stations, thrice weekly, 5:45-5:55 p.m. PST, for 34 weeks from tomorrow (Tuesday), Agency Needham, Lewis & Brorby, Chicago.

Chevrolet Motor Div., General Motors, Detroit, starts Dinah Shore on Monday and Friday quarter-hour programs on NBC radio, March 23, in format similar to singing star's twice weekly NBC-TV show for the firm. Agency: Campbell Ewald, Hollywood.

General Products Corp., L. A. (Looz dietary supplement), renews *Stuart Craig Show* on 46 CPRN, Mountain and Arizona stations, Sat., 12:30-12:45 p.m. PST, for 52 weeks from March 7. Agency: Dean Simmons Adv., L. A.

Liggett & Myers, N. Y. (Chesterfield cigarettes), will sponsor *Stork Club*, Sat., 7-7:30 p.m. EST on CBS-TV, effective April 4, every week instead of alternate weeks. Agency: Cunningham & Walsh, N. Y.

Dwight Edwards Co., Vancouver (tea and coffee), started *Tea and Coffee Time* on Feb. 16 for one year on 15 western Canadian Dominion network stations, Mon., Wed. and Fri., 7:30-7:45 p.m. Agency: Ruthrauff & Ryan Inc. Toronto.

Agency Appointments

Aqua Flor, L. A. (tooth decay preventive for home drinking water), appoints Factor-Breyer Inc., that city. TV is being used.

Pearl-Wick Corp., Queens, N. Y. (clothes hampers) appoints Al Paul Lefton Co., Phila.

Joy Hosiery Co., Clifton, N. J., appoints O'Neil, Larson & McMahon, N. Y. Radio-TV will be used.

Guide Lamp Div., General Motors Corp., appoints D. P. Brother & Co., Detroit. Account executive is **Albert C. Cochrane.**

Kleerex Inc., St. Paul, and **Van Patten Pharmaceutical Co.,** Chicago, appoint Frank E. Duggan Adv., Chicago. Radio campaigns are being contemplated.

Colonial Savings & Loan Assn., S. F., appoints Wyckoff & Downard Adv., that city.

National Paper Corp. of Pennsylvania, Ransom, Pa. (Swanee products), appoints Geyer Adv., N. Y.

Stapleton-Spence Packing Co., San Jose, Calif. (dried fruits), appoints Richard N. Meltzer Adv., S. F. **William Callahan** is account executive.

PHILLIP'S Radio & TV Inc., Washington, D. C., applicance chain, signs to co-sponsor Washington Senators baseball games on WWDC, that city, with National Brewing Co., Baltimore. Signing are (l to r), Wolfe Filderman, merchandise manager, and Mike Filderman, vice president of Phillip's; Calvin Griffith, Senators vice president; Phillip Filderman, Phillip's president; Ben Strouse, vice president-general manager, WWDC, and Alvin I. Miller, partner, Cohen & Miller agency, Washington, which placed the business.

Industrial Tape Corp., New Brunswick, N. J. (division of Johnson & Johnson), appoints Young & Rubicam, N. Y., for consumer products advertising, effective March 1.

Segal Lock & Hardware Co., N. Y., appointed James Thomas Chirurg Co., N. Y.

Max Factor & Co., Hollywood (Pan-Cake Make-Up and Creme Puff), appoints Young & Rubicam, that city. **Jack Smock** is account executive.

McDaniel's Markets, L. A. chain, and **Guide Post Stores,** that city (appliance chain), appoint Jimmy Fritz & Assoc., Hollywood. TV is being used.

National Electrical Contractors Assn., Washington, D. C., names New York office of Fuller & Smith & Ross to handle its advertising. The agency has prepared a kit of material for NECA members which includes suggested radio releases.

Allied Tube Corp., Brooklyn and Phila. (toys and juvenile goods), and Fund-Raiser Products Co. appoint Adv. Assoc. Agency, Phila.

Monarch Mfg. Works appoints Parkside Adv., Phila.

Eco Engineering Co., (Allachem and Eco pumps) appoints Michener Co., Phila.

Vic Tanny Gyms, L. A. (Southern Calif. chain), appoints Hixson & Jorgensen Inc., that city. **William T. Reedy** is account executive.

Walter N. Boysen Co., Oakland, Calif. (paint), appoints Atherton Adv. Agency, Hollywood. TV will be used.

Ed Fountain Lumber Co., L. A., (lumber), appoints Charles Bowes Adv., that city.

Universal Detergents Inc., Long Beach, Calif. (industrial chemical products), appoints Roger T. Case Assoc., that city.

Mutual Orange Distributors, Redlands, Calif. (fresh fruit), appoints Charles Spruance Adv., San Gabriel. Radio test campaign starts in Portland this month.

Pellissier Dairy Farms, Whittier, Calif. (Michael's cheesecake), appoints L. J. Swain Adv., that city.

R. A. Reed Electric Co., L. A., appoints Boylhart-O'Connor, that city. **George Balsam** is account executive.

Weber-Waukesha Brewing Co., Waukesha, Wis., appoints Richard N. Meltzer Adv., S. F., in 11 western states. **William Callahan** & **Vernon Norris** are account executives.

Max Factor & Co., appoints Doyle, Dane, Bernbach Inc., N. Y., for Max Factor Lipstick and Pan-Stik.

Colonia Inc., N. Y. (toiletries), appoints Weiss & Geller, New York Inc., N. Y.

Sailor Al's Mercury Motors, L. A., (used car dealer), appoints Holzer Co., that city. **Lou Holzer** is account supervisor; **Blanche Renze** and **Fred Eggers** are account executives. Radio-TV will be used.

Miscellaneous

Bozell & Jacobs, Chicago, relocates at 205 N. LaSalle St., same city.

Edw. A. Grossfeld & Staff, Chicago, relocates at 1020 North Rush St.

Marks & Neese Inc., Jackson, Miss., elected to membership in Affiliated Adv. Agencies Network, Madison, Wis.

KATZ LOGS TYPES IN RADIO AUDIENCE

NEW AUDIENCE measurement concept — total listeners per thousand radio homes, based on sets-in-use and weighted by listeners per set—is used by The Katz Agency, station representatives, in a special study of radio listening patterns just released. Based on Pulse surveys made in January and February, 1952, in 18 major cities, this report shows the number of men, women, teen-agers and children, and total radio listening in 1,000 homes for each of the 18 hours from 6 a.m. to 11 p.m., weekdays, Saturdays and Sundays.

These figures, Katz points out, differ from usual audience composition figures which, as a rule, "are listeners per 100 listening homes with no relation to the number of sets-in-use at any given time." Difference is illustrated by a hypothetical example where, at 6 a.m., with 10% sets-in-use, there were 80 men listeners per 100 listening homes and 80 per 1,000 radio homes, while at 6 p.m., with 20% sets-in-use, there were 45 men listeners per 100 listening homes, but 90 per 1,000 radio homes.

Katz data reveals that 8 p.m. is the hour when the largest number of individuals (517) per thousand homes listened to the radio. On weekdays, most male listeners (195) were counted at 9 p.m., most women (276) at 10 a.m., and most youngsters (87) at 6 and 7 p.m. None of the components reached its peak at the same hour as the total. Tabulations also show there are more women listeners than men every one of the 18 hours.

CBS Radio Tops Nielsen For Week of Jan. 18-24

CBS Radio made a clean sweep of the top 10 evening once-a-week network radio shows in number of radio homes reached for the week of Jan. 18-24, according to A. C. Nielsen figures. The Inaugural ceremonies presented by ABC, NBC and CBS took the three top weekday spots in the Nielsen report, while CBS shows comprised the seven remaining spots on the list.

The listings:

Rank	Program	Homes Reached (000)
EVENING, ONCE-A-WEEK (Average for All Programs)		(2,775)
1	Jack Benny (CBS)	7,027
2	Amos 'n' Andy (CBS)	6,311
3	Charlie McCarthy Show (CBS)	6,311
4	Our Miss Brooks (CBS)	5,236
5	Lux Radio Theatre (CBS)	4,789
6	My Little Margie (CBS)	4,610
7	People Are Funny (CBS)	4,341
8	Suspense (CBS)	4,252
9	Arthur Godfrey's Scouts (CBS)	4,073
10	Gangbusters (CBS)	4,028
EVENING, MULTI-WEEKLY (Average for All Programs)		(1,477)
1	Lone Ranger (ABC)	2,641
2	One Man's Family (NBC)	2,506
3	Lowell Thomas (CBS)	2,462
WEEKDAY (Average for All Programs)		(2,014)
1	Inaugural Ceremonies (ABC)	5,192
2	Inaugural Ceremonies (NBC)	4,744
3	Inaugural Ceremonies (CBS)	4,431
4	Romance of Helen Trent (CBS)	3,536
5	Our Gal, Sunday (CBS)	3,491
6	Aunt Jenny (CBS)	3,357
7	Wendy Warren and the News (CBS)	3,312
8	Arthur Godfrey (Liggett & Meyer) (CBS)	3,267
9	Ma Perkins (CBS)	3,178
10	Arthur Godfrey (Toni) (CBS)	3,133
DAY, SUNDAY (Average for All Programs)		(1,298)
1	True Detective Mysteries (MBS)	3,401
2	Shadow, The (Sylvania) (MBS)	2,775
3	Shadow, The (Wildroot) (MBS)	2,327
DAY, SATURDAY (Average for All Programs)		(1,835)
1	Theatre of Today (CBS)	3,804
2	Stars Over Hollywood (CBS)	3,178
3	Fun For All (CBS)	2,999

(*) Homes reached during all or any part of the program, except for homes listening only 1 to 5 minutes. For 5-minute programs, Average Audience basis is used.

Does the Jingle Jangle?

MOST effective TV commercials are those which, not surprisingly, are best liked, according to a study of the Columbus, Ohio, area by Dr. Kenneth Dameron, professor of business organization at Ohio State U.

Analyzing why viewers like commercials, Dr. Dameron said 37.46% like them because they are "cute, clever, entertaining," 20.12% "like announcer(s)," 11.15% "musical approach," 8.67% "unique, different," 8.05% "convincing sales approach," 8.05% "informative," 7.74% like "humorous, cartoon-type (animated)" commercials and 7.12% like "integrated or incorporated form" of commercial.

Reasons commercials are disliked, Dr. Dameron reported, are: 23.47% "dislike announcers," 20.66% "bad taste," 16.43% "too lengthy," 13.15% "too repetitious," 11.27% "irritating," 9.39% "foolish and/or false claims" and 7.98% "uninteresting, boring."

BAB Study Points Up Daytime Serial Impact

EFFECTIVENESS of the daytime radio serial drama as an advertising vehicle when used on a regular, continuous basis is pointed up in a new BAB presentation distributed last week to members, advertisers and advertising agencies.

Entitled "The Cumulative Audience of 'Soap Operas,'" the report stressed that "nearly one-half of all American families listen to a radio daytime serial drama some time during the week." Another significant conclusion of the study was that a single average radio soap opera, or adjacent announcement series, enables an advertiser to reach one-fifth of all families in the market on the average of six times in less than a month.

The report is the third in a continuing BAB series on cumulative, unduplicated audiences reached over a period of time by various types of announcements and program schedules. It was developed from data supplied by Audimeter reports of A. C. Nielsen Co.

Experimental News Show

AN experimental television news program, which will attempt to study and report on the effects of news events on average persons, will be launched shortly by WPIX (TV) New York in cooperation with the Columbia U. Graduate School of Journalism.

The station reported *News-o-rama* will be presented Mondays for 12 weeks as a public service. Arrangements were worked out by Walter Engels, WPIX (TV) news director, and Prof. John Foster of the School of Journalism.

Dean Carl W. Ackerman of the School of Journalism called the project "a significant development in journalism."

N.Y. RADIO UP 4% FROM 1947–WOR

America's largest market has over one million radio-only families, WOR tells in its newest report.

NEW YORK, long billed as the nation's largest TV market, also is the largest non-television market in the nation, WOR New York reported last week in a research report on "Non-TV New York." Radio listening in the area's non-TV homes is 4% higher now than it was five years ago, the report noted.

Based on Pulse data and covering the 23-county area comprising the New York television market, the study put the number of radio-only families at 1,080,400, which exceeds the total family population of any other market except Chicago, Los Angeles, Philadelphia and Boston.

The New York radio-only total also exceeds the number of TV families in all but four television markets (New York, Los Angeles, Chicago, Philadelphia), and is "bigger than the top 16 markets combined which are now without television service."

Radio-Only Families Up

Since 1947, when TV penetration in New York was about 2%, average sets-in-use among radio-only families has increased from 23.5% to 24.4%, which represents an all-day average of 263,620 families, the report showed. There are only nine cities in the U. S. with a family population exceeding the average quarter-hour listening audience in non-TV New York, it showed.

Morning radio listening by radio-only families is up 30%, compared with 1947 figures for all families, and the afternoon figure is up 21%. Nighttime listening between 6 and 8 p.m. is down 4% and, between 8 p.m. and midnight, is down 22%. Even with this 22% decline, however, sets-in-use (24.9) still top the daytime average (24.4).

Sportscasts on Upgrade Among Canadian Viewers

WHILE sets-in-use dropped to 77.8 during the first week of February in the Toronto area from a January high of 82.2, the bulk of TV viewers tuned to WBEN-TV Buffalo according to rating of Elliott-Haynes Ltd., Toronto. In Montreal, the report shows, sets-in-use continue to rise because of increasing popularity of sportscasts to French and English language groups.

Sports Top List

Most popular programs on the Toronto and Montreal CBC-TV stations are sports. At Toronto, *NHL Hockey* received a rating of 58 in the Elliott-Haynes report, followed by *The Big Revue*, 29; *Wrestling*, 27.8; *March of Time*, 27.1, and *Now's Your Chance*, 25.2. Montreal's most popular programs were *NHL Hockey* 72.5, followed by *Wrestling*, 66; *Basketball*, 57.9; *Studio One*, 55, *and Le Nez de Cleopatre*, 55.

Truman's Farewell

FORMER President Truman's farewell address Jan. 15 on all TV networks was seen by 16,974,000 viewers, the American Research Bureau reports. His address was aired in nearly 7½ million homes, on nearly one-half of all sets in areas where the program was available and in more than one-third of all TV set homes in the U. S.

The only previous Truman address rated by ARB was that given March 6, 1952, when a one-half hour speech on all four networks gained an audience of 8,880,000 representing viewers in 3,700,000 homes. At that time, this figure was less than one-fourth the total TV homes and was slightly more than 29% of all sets in areas where the telecast was available.

Compared to other January telecasts, Mr. Truman was sixth in rating and 11th in total number of homes reached, ARB reported.

Movie-Going Is Declining Among N. Y. TV Set Owners

TV OWNERS in the New York area are seeing fewer movies than they did a year ago, and are more willing now to support subscription television to see first-run movies at home. These reports were issued last week by Advertest Research, New Brunswick, N. J.

Latest analysis of "The Television Audience of Today" shows that only 45% of viewers queried in January of this year had gone to a movie "in the past month," while the figure was 64% the year before. This year, 55.8% of the respondents said their movie attendance had decreased since getting a TV set, compared with 35.7% in 1952; and 30.2% said there was no change in movie-going, contrasted with 62.3% the previous year.

Another January survey among 750 TV owners disclosed that 52% would be willing to pay to see a first-run motion picture at home, while only 34% said they would a year earlier, according to Advertest. In 1952, the average family was willing to pay 60 cents per picture; in 1953, 51 cents. Results are based on personal interviews.

$2 Million Damages Asked For Films' Release to TV

PRODUCERS of eight theatrical motion pictures last week filed a $2 million damage suit in Los Angeles Superior Court against seven distribution companies, charging inadequate distribution and "wrongful" assignment of their product to television, and requesting a preliminary injunction to prevent their films' release to the medium.

Named in the damage suit are Chesapeake Industries (formerly Pathe Industries), United Artists, Eagle Lion Classics, Eagle Lion Films, Pictorial Films, Motion Pictures for Television and Motion Pictures Unlimited. Also named, but not for damages, were Bank of Manhattan Co., KTTV (TV) KLAC-TV Los Angeles, NBC, CBS and several individuals.

The suit was brought jointly by Equity Pictures Inc., Equity Films Inc., Orbit Productions Inc. and Orbit Pictures, and charges the defendants with laxity in distributing the eight feature films and with discrimination against them in favor of other movies.

Equity Pictures Inc. in mid-January [B•T, Jan. 19] obtained a preliminary injunction restraining the same distributors from releasing the feature film, "Shed No Tears," to TV.

ABC-TV-Guild Films Sign For New Network Series

GUILD Films Co. and ABC-TV have signed for the exclusive use of *Lash of the West* film series on ABC-TV, effective immediately, Reuben Kaufman, Guild president, announced Wednesday.

Transaction represents a departure for the company, Mr. Kaufman noted, because it previously had operated exclusively in the syndicate field. Under contract terms, the quarter-hour Western series will become an exclusive ABC-TV program and will not be syndicated until the network has completed its scheduling. *Lash of the West* will be expanded from its present 13 episodes to a total of 91.

Film Sales

Frank Wisbar Productions, Hollywood, will start shooting a new block of 44 half-hour films for NBC-TV's *Fireside Theatre*, March 23, for **Procter & Gamble Co.** (Duz, Crisco, Ivory). The contract for 1953-54 season was signed for a reported $1,350,000. Agency is **Compton Adv. Inc.,** New York.

* * *

Lewis Food Co., Los Angeles (Dr. Ross Dog & Cat Food), has started a weekly half-hour filmed series, *Hank McCune Show,* on **KLAC-TV** Hollywood and **KRON-TV** San Francisco, for 13 weeks from Feb. 26. The series, filmed by **Video Pictures Inc.,** Hollywood, also is sponsored by Lewis Food Co. on **KPTV (TV)** Portland, **KPHO-TV** Phoenix and **KING-TV** Seattle with more stations to be scheduled. Agency is **Rockett-Lauritzen,** Los Angeles.

Availabilities

Monsanto Chemical Co., St. Louis, has announced the availability of a new film on synthetic chemical soil conditioners. The film, "Garden Wise," is a sequel to "Soil Structure: Key to Productivity," an earlier motion picture on the soil conditioner. Prints of "Garden Wise" may be obtained from Monsanto's Merchandising Division.

* * *

Cecil B. DeMille's "The King of Kings," famed silent movie, is being offered for TV use on commercial or sustaining basis during the current Lenten season (through April 5) by **Cinema Corp. of America**, Paterson, N. J., which reserves the right of approval of sponsor and any film editing. Running time: 115 minutes. Sound track consists of music and sound effects, no dialogue. Both 16 mm and 35 mm prints are available, the company said.

* * *

Young Men's Christian Assn. is making available to TV stations a half-hour dramatic-documentary motion picture, "My Son's Dad," which sums up contributions of the Y to good citizenship. It was produced for the Y by **March of Time** with **Jack Glenn** as writer, producer and director. The film is obtainable at local YMCA branches.

* * *

Educational Film Sales Dept., University Extension, U. of California, Los Angeles, announces the availability of *Shakespeare's Theatre: The Globe Playhouse,* narrated by **Ronald Colman.** The film visually describes the Globe Playhouse, and shows how the stage was used in the presentation of some of Shakespeare's plays and includes excerpts from some of his plays.

* * *

William E. Jordan and **Margaret R. Jordan** wrote and directed the film, which was produced by the Motion Picture Div., Dept. of Theatre Arts, U. C. L. A.

Production

Frank Ferrin Co., now shooting at Telepix Studios, Hollywood, is producing eight more half-hour programs for CBS-TV's *Smilin' Ed's Gang,* sponsored by **Brown Shoe Co.,** St. Louis, for the past four years. Being incorporated into the new films are 80,000 feet of color footage, shot in India by **Ellis Dungan.**

* * *

Bing Crosby Enterprises, Culver City, is producing 26 half-hour films for *Crown Theatre* series, set for April release by **CBS-TV Film Sales. Gloria Swanson** will introduce films, starring in four of them.

* * *

Screen Gems Inc., Hollywood, for first time, is in simultaneous production on two half-hour programs for NBC-TV's *Ford Theatre.* **Edmond O'Brien** stars in "To Any Soldier," produced by **Irving Starr** for release Easter week. **Merle Oberon** stars in "Allison, Ltd.," produced and directed by Mr. Starr and **James Nielson,** respectively.

* * *

Norman and **Irving Pincus,** producers of *Ellery Queen* TV film series, telecast until recently on ABC-TV live from New York, are in Hollywood to produce a pilot film for the film series. Production starts today (Monday) at Hal Roach Studios, Culver City.

* * *

Stanley Murphy, Hollywood, has acquired TV film rights to the syndicated comic strip, "Dixie Dugan," from creator-owner **J. D. McEvoy.** Script assignments have been given to **Fred Freiberger and William Tunberg,** motion picture writers, and a half-hour film series will go into production shortly.

* * *

Filmcraft Productions, Hollywood, is completing two one-minute TV film announcements, starring **Groucho Marx,** for Los Angeles County Heart Assn. and Sister Kenny Foundation.

Random Shots

Report analyzing the total audience potential available to sponsors of industrial, advertising or institutional films can be obtained on request from **Dynamic Films Inc.,** New York. Of special interest is an entire section on television, giving facts on the actual dollar value of sponsored films that qualify for TV time.

Paramount Pictures, pleased with successful use of TV film trailers to exploit its new feature film release, "Road to Bali," is in production on one 20-second and two 60-second spots for "Come Back, Little Sheba" and "The Stooge." Four to six 20-second spots are being filmed for "The Stars Are Singing," "Off Limits," "Pony Express" and "War of the Worlds," under direction of **Phil Pemberton,** trailer department head.

* * *

Jerry Layton Productions, New York, radio and TV program productions, has changed firm name to **Wilbur Stark-Jerry Layton Inc.,** and has moved offices to 4 West 58th St., New York 19.

* * *

Edward Lewis Productions, Hollywood, has moved to 226 S. Beverly Drive, Beverly Hills. Telephone: Crestview 1-5727.

New Disc Jockey Service

NEW SERVICE for disc jockeys, Show Stoppers, has been launched by Robert J. Clarkson, former manager of Columbia Records Transcription Div. Show Stoppers are 10-inch, 78 rpm discs containing 17 to 20 bits of recorded monologue, dialogue and sound effects, each bit running from 5 to 30 seconds, which can be used to add variety and color to record programs. Show Stopper records will be sent monthly to subscribers, who will have exclusive rights in their markets. Prices vary according to size of market, starting at $5.50 a month for markets of under 25,000 population.

Shields Reveals 'Stagette'

UNIT called the St. Louis Stagette is being sold by Shields Studio, St. Louis, as a multiple-use basic setting for TV stations. The stage enclosure is a room 4 feet deep and 15 feet wide, with a center, rear draped opening and a proscenium setting which includes a valance, two side tabs and a pair of traverse draw front curtains on tracks. Within the enclosure are from 1 to 12 roll-up scenes which can be changed "in seconds," the company reports. Address is 5537 Suburban Tracks.

New Public Health Series

EIGHT quarter-hour transcriptions are being released by the Communication Materials Center of Columbia U. Press to promote local and state health education. The dramatic series, *The Search*, is enacted by leading Broadway and Hollywood performers, as supervised by the U. S. Public Health Service. Series is available for a small charge at 413 W. 117 St., New York 27. A similar program, *Seminar*, is available to TV stations.

Free Income Tax Shows

AMERICAN Institute of Accountants again this year, as it has annually since 1949, has prepared public service material for use by radio and TV stations in giving listeners and viewers hints on filling out income tax returns.

This year's AIA material includes three packages: Eight one-minute spots for radio stations, available as scripts or transcribed by Kenneth Banghart; two 13-minute transcribed radio quiz shows with Milton Cross as announcer and Walter Kiernan as moderator; four 45-second cartoon-and-sound film spots for TV stations.

Material, provided free to stations, is being distributed through the state societies of CPA's. AIA estimates 500 stations will use its material up to March 15.

'Korean Mud' Released

GOVERNMENT is releasing radio and TV spots to stations and a new song, "Korean Mud," to disc m.c.s to promote blood donations. It is sung by Elton Britt, RCA recording artist, who returned recently from Korea. The lyrics point up the increasing need for blood by the National Blood Program. Release is being made by Paul Gaynor, program coordinator, Office of Defense Mobilization, Washington 25, D. C.

Joan Caulfield Signed

JOAN CAULFIELD, who was under contract to Paramount Pictures five years, has been signed to a long-term CBS-TV contract to star in the TV version of *My Favorite Husband*, scheduled for a fall premiere, the network announced last week. The comedy had its debut on CBS Radio in 1948 and ran two and a half years with Lucille Ball playing Liz Cooper.

PLANNING an expanded advertising, production and merchandising campaign for 1953 is this group of World Broadcasting System executives: (l to r) Dick Lawrence, sales manager; Pierre Weis, general manager; Robert W. Friedheim, vice president, and Leo Gutman, advertising director. Firm envisions a boom year for local radio [B•T, Feb. 23].

WEMP PUBLIC SERVICE POLICY IS DESIGNED TO AID YOUTH OF BOTH HIGH SCHOOLS AND COLLEGES

High school group wins Junior Achievement Award; Marquette University students air dramatic radio workshop series.

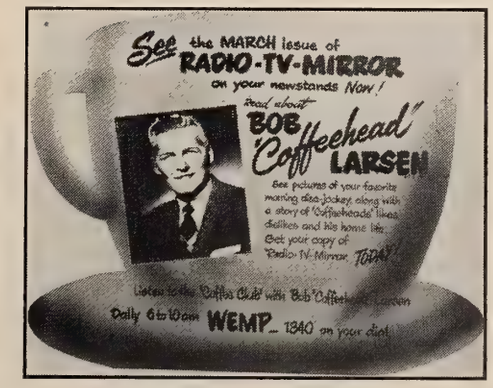
WEMP's long-time interest in educating young people to commercial radio was emphasized again this month with the presentation of a Junior Achievement business charter to the station's Junior Productions company.

The company, composed of Milwaukee high school students, is sponsored by WEMP. Hugh Boice Jr., WEMP general manager, made the presentation in behalf of Junior Achievement, Inc., during ceremonies of a regular Junior Productions broadcast carried on WEMP.

The J. A. company earned the recognition by developing, selling and broadcasting a weekly popular music program, "High School Hit Parade". Weekly instruction in radio and guidance in the production of the program is provided the group by WEMP staff members and other Milwaukee advertising professionals.

WEMP also encourages radio work on the college level by assisting with and donating air time for the weekly Marquette University Radio Workshop. Program is a half-hour dramatic series.

AL KOEHLER (right), president of Junior Productions, WEMP Junior Achievement company, registers approval with the Junior Achievement business charter presented his group. Robert Tongas (left) of Klau-Van Pietersom-Dunlap advertising agency, and Lou Riepenhoff, WEMP public service director, group advisors, extend congratulations.



WEMP SHOWS 33% INCREASE

JANUARY AND FEBRUARY BILLING in 1953 is up 33% over the same months in 1952, it was announced today by John Gagliano, sales manager for the successful Milwaukee independent.

"It is interesting to note", Gagliano observed, "That both local and national business show the same percentage increase of about one third. The total is a new all-time high for the station for any 60 day period."

Coffee-Cup Cutouts Promote Radio-TV Mirror Salute

MARCH ISSUE of Radio-TV Mirror contains full page picture and story feature on Bob "Coffeehead" Larsen. Alert station management ordered posters in advance shaped like a coffee

cup promoting the magazine article and the program.

The posters were put up by station promotion department in record shops, news stands, hotels, schools and public buildings to coincide with distribution date of magazine's March issue.

This is the A.M. show that amazed the experts a few years ago with a straight up rating curve. Naturally, it's sold out, but some smart advertisers' names are to be seen on the waiting list. Must be worth the wait.

EVER *Psychoanalyze* A CITY?

WEMP DID and found that MILWAUKEEANS prefer

- ***MUSIC***

Another reason for the year 'round popularity WEMP enjoys in homes, stores, offices, clubs and cars—day and night.

- ***NEWS***

Thirty times daily, prepared by Milwaukee's largest independent radio news department.

- ***SPORTS***

More sports broadcasts than any other Milwaukee station. Earl Gillespie, Wisconsin's favorite, does three sportscasts daily, and all play-by-play reports.

They add up to consistently high ratings all year long. Remember, for $100 to $300 per week, or more, a WEMP spot campaign delivers 2 to 2½ times more audience per dollar than any network station in town.* Call Headley-Reed!

* Based on latest available Hooper Comprehensive and SR & DS rates.

N. Y. GROUP DASHES COLD WATER ON STATE'S EDUCATIONAL TV PLAN

New York educators were told last week that there was "no justification" for large-scale state financing of the proposed 10-station educational TV network. The special commission report also noted that educators are not using all the time available on commercial stations.

THE PROPOSAL that New York State build and operate a 10-station network of educational TV stations was rejected by a special commission last week in a report which found the plan neither "necessary" nor "desirable" and held that educators aren't using all the time available to them on commercial stations.

The group—the temporary State Commission on the Use of Television for Educational Purposes—adopted the report by a 10-to-5 vote that was generally regarded as doom for the network plan, which, although funds have not been appropriated, already had progressed to the point of getting FCC grants for seven stations. Observers held no doubt that the state administration would accept the report; in fact there was speculation that the administration had virtually dictated it.

The majority, which turned down the dissenting group's proposal that the state set aside $500,000 for a pilot or "experimental" station, recommended "the use of available private funds through quasipublic nonprofit educational corporations to build and operate one or more educational TV stations, as is being done in Los Angeles, San Francisco, Houston, Dade County, Fla., and elsewhere." (See earlier "pilot" story, page 96.)

Wants Reservations Continued

It also recommended that FCC continue "for at least five to 10 years the allocation of the channels which have been made available for educational purposes," on the ground that more time is needed to explore the possibilities of educational TV, plus the fact that FCC faces "years" of work in processing applications for other channels.

The report favored "development of television for educational purposes to the broadest possible extent," and noted that "new methods for using television may well be devised in the years to come." But, the majority held:

"As of today, we find no justification for the expenditure of large sums of money for the construction of state-owned and operated television stations. On the other hand, there are affirmative steps which can be taken for the sound and sensible development of the potentialities of television in the best interests of education."

Among these, included in the report's recommendations, were "broadening the use of educational workshops and similar cooperative efforts to develop sustained programming on free time presently available on commercial stations;" continuation of commercial stations' practice of offering free time, and having it made available on a regular basis at hours suitable to the audience to which program is directed; and that "our educational institutions take full advantage of the present great opportunity to establish that they can supply a greater flow of television material in the educational and cultural fields."

In order to make "a continuing study of the development of the use of television for educational and cultural purposes," the report also recommended that the commission's work be carried on by either this or a similar group.

In broad effect, the recommendations contained in the report adopted on a 10-5 vote were not much different from those in a larger report on which, it was said, the entire commission was in substantial agreement a week earlier.

The dissenting report, preliminary to a more formal "minority" report, stressed that the final report was not the one tentatively agreed upon at the previous meeting and was not circulated to the commission members until the afternoon of the day before the final meeting.

No Time to Study

Because they "did not have time to study either of the reports," they said they dissented. They also noted "The commission was unanimous in requesting that further time was needed to study the over-all problem of educational television."

It was in connection with such further studies that the dissenters proposed—but were out-voted—that the state put up $500,000 for a pilot station.

In addition to the forthcoming formal minority report, at least some members of the majority were said to be planning to issue separate reports. Among these, Michael R. Hanna of Cornell U.'s WHCU Ithaca planned to prepare one in which, he said, he would arrive at the conclusions and recommendations contained in the majority's final report, but would do so on different grounds from those in the majority document.

Paul R. Lazarsfeld of Columbia U., a commission member but not able to attend the final meeting, also was said to be considering a separate report.

The body of the majority report stressed construction and operating costs, the limited audience appeal of educational programs, the relatively few hours of programming contemplated for the proposed stations, and failure of educators to take advantage of all the free time available to them on commercial stations.

"Many educational programs are now being carried by commercial stations, with time and all technical, production and engineering costs paid by the stations. The free program time offered by commercial stations to the colleges, universities, and public schools of the state has been only partially accepted. . . . It seems unwise to launch a program of government-operated television stations costing many millions of dollars when other inexpensive means of presenting all possible programs are available," the report declared.

Costs Estimated

It estimated that construction costs for the 10 stations would be at least $6 million, operating costs at least $8,250,000 a year, plus another $10 million initial outlay if half of the state's 80,000 classrooms were to be equipped with TV sets at $250 each, plus $4 million additional operating expenses per year if special films were produced at the rate of five $20,000 films per week for 40 weeks.

"If the major use of educational television is to be the showing of educational films, there has been no testimony before the commission that this could not be accomplished by the simple use of motion picture projectors and screens now available in most schools," according to the report.

The New York educational channels are uhf, and the majority noted that a U. of North Carolina commission, studying the allocation of both vhf and uhf educational channels, concluded that it would be "unwise" to build uhf outlets "because it was unlikely that they would, in the foreseeable future, acquire an audience."

It also was brought out that, of the 10 proposed stations, the most programming proposed by any one was 17¾ hours a week during an academic year of 36 to 40 weeks, noting that "far more than two or three hours a day would be necessary to justify venturing upon this immense enterprise. . . ."

The report cited WPIX (TV) New York and

EXECUTIVE board of the 1953-54 Radio-TV Correspondents Assn. meets for the first time in the U. S. Capitol. Seated (l to r): Richard Harkness (NBC), vice chairman; Martin Agronsky (ABC), chairman; Hollis M. Seavey (MBS), retiring chairman; standing, Carmen Garcia, secretary, Senate Radio-TV Gallery; Robert Menaugh, superintendent, House Radio-TV Gallery; D. Harold McGrath, superintendent, Senate Radio-TV Gallery; Bill Costello (CBS); secretary; George J. Marder (UP Radio), member-at-large; Julian Goodman (NBC-TV), member-at-large; J. F. McCaffrey (MBS), treasurer, and Ann Corrick (Crosley), member-at-large.

QUIZ FOR TIME-BUYERS

with an eye on the PITTSBURGH market

Q What station attracts more than twice as many morning listeners as the nearest competition in the 108-county area surrounding Pittsburgh?

A *According to the latest Nielsen, it's KDKA.*

Q What program draws this amazing audience?

A *Ed & Rainbow (of KDKA's Musical Clock) by far the most popular radio team in the area.*

Q Who are Ed and Rainbow.. and when?

A *They are Ed Schaughency and Rainbow Jackson. They dominate the Pittsburgh airwaves from 7:10 to 8:15 AM, Monday through Friday (to 8:00 on Saturday). They've been morning favorites for 15 years on KDKA.*

Q What's their program format?

A *They provide awakening Pittsburgh with time announcements, weather reports, news, recorded music, friendly humor. They make getting up a pleasure.*

Q Is it a participation show?

A *Yes. One-minute announcements.*

Q How does one go about purchasing a chunk of "Ed and Rainbow" or one of KDKA's other popular morning shows?

A *CF & P**

REG. U.S. PAT. OFF.

SCOTCH BRAND

Magnetic Tape

High HO *Output*

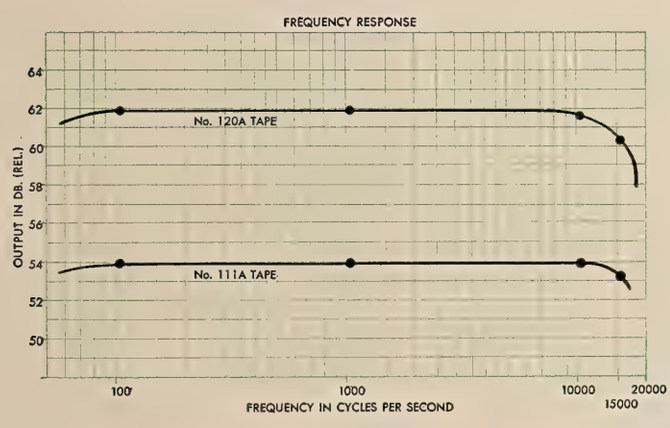
TRADE MARK

NEW, IMPROVED COATING!
"Scotch" Brand *High-Output* Magnetic Tape is coated with a revolutionary new magnetic material that offers unparalleled sensitivity.

UNEQUALLED OUTPUT LEVEL!
Actually produces 8 db and up to 12 db more output than any conventional magnetic tape with no increase in harmonic distortion.

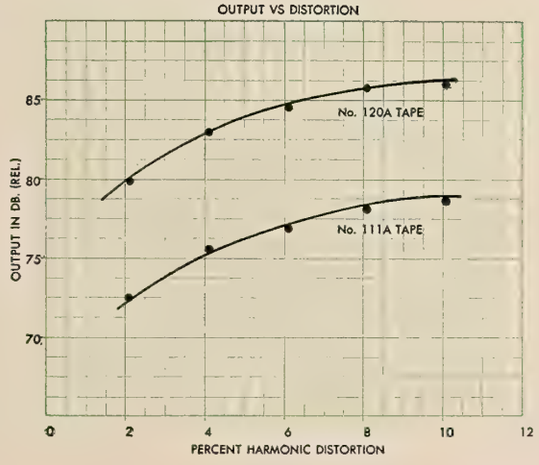
SPECIAL NEW COLOR!
This new tape is colored a distinctive grey-green for easy recognition.

"Scotch" Brand No. 120A *High-Output* Magnetic Tape gives the recording engineer a new and potent tool for the production of truly high fidelity recordings. The 8 db minimum added output of *High-Output* Magnetic Tape increases significantly the available signal to noise ratio, making possible for the first time low background noise recordings of orchestral works having wide dynamic range. Besides offering unparalleled output at all audio frequencies (see graphs), this new tape retains all the physical and magnetic properties that have made "Scotch" Brand No. 111A the recognized standard of the recording industry: high tensile strength, freedom from elongation, stable anchorage, low noise level, excellent uniformity, ease of eraseability.



Freedom from squealing, cupping and curling is assured thanks to exclusive "Dry Lubrication" feature. *High-Output* tape is guaranteed 100% splice-free (up to 2400-foot reels)

The term "SCOTCH" and the plaid design are registered trademarks for Sound Recording Tape made in U.S.A. by MINNESOTA MINING & MFG. CO., St. Paul 6, Minn.—also makers of "Scotch" Brand Pressure-Sensitive Tapes, "Underseal" Rubberized Coating, "Scotchlite" Reflective Sheeting, "Safety-Walk" Non-slip Surfacing, "3M" Abrasives, "3M" Adhesives. General Export: 122 E. 42nd St., New York 17, N. Y. In Canada: London, Ont., Can.



3M

output

or harmonic distortion!

The frequency response characteristics of both No. 120A and No. 111A tapes are virtually identical at 15 ips tape speed. These curves were made with each tape set at optimum bias and an input level 15 db below 1% 3rd harmonic distortion.

This graph shows the 8 db increase in output of *High-Output* Magnetic Tape No. 120A over No. 111A at any given distortion level. *When compared with other brands of magnetic tape, the difference in output is as much as 12 db!*

GI Bill Grad

FIRST KOREAN veteran to complete vocational training under the new GI schooling bill is Jerome Bloom, 24-year-old from Brooklyn, N. Y., who started work as a cameraman at WHBF-TV Rock Island, Ill., on graduation day, according to the Veterans Administration. Mr. Bloom, a former machine shop worker, read of FCC's authorization of 2,000 TV stations while stationed in Germany, and decided to become a video cameraman and studio technician when he returned. The CBS-TV basic station where he works recently increased power to 100 kw.

Rochester's WHAM-TV as among commercial stations which have offered educators more free time than the educators have used. It also quoted the president of the U. of Maryland as saying, in connection with a day-long closed circuit medical presentation by WBAL-TV Baltimore, that "as long as there are stations like WBAL-TV providing the facilities and fine technical staffs to help the university fulfill its dream of bringing TV into the home, I see no need for, nor would I back, an educational channel."

Offers Go Begging

It was pointed out that out of 260 half-hours a year offered to an upstate New York City school system by the local station, only 154 have been accepted. The report added:

"This is a typical situation. It is also typical that when operations commence in the large number of commercial channels now available and for which applications are pending, there will be a steadily increasing amount of time available for educational television. This will increase the surplus of time available above the amount educational institutions have accepted. . . .

"The way to determine the amount of time education can use is by the process of intelligent development on a gradual basis. Any other course might prove to be a serious setback to the cause of education and of educational television. Progressive development of the use of existing facilities appears to us to be the sound approach. . . ."

The majority consisted of Chairman Douglas M. Moffat, a New York City attorney; Mr. Hanna; Ben C. Duffy, president, BBDO; Young B. Smith, former Columbia U. Law School dean; Clarence C. Carruth Jr., attorney, New York; State Sen. Arthur H. Wicks; Assemblyman Oswald D. Heck; State Sen. Walter J. Mahoney, Senate Finance Committee chairman; T. Norman Hurd, Budget Director, and Harold Keller, Commerce Commissioner.

The minority consisted of Sen. Francis J. Mahoney and Assemblyman Eugene F. Bennigan, who wrote the dissenting report, and Chancellor John P. Myers of the State Board of Regents, Mrs. Isabel H. Kideney, former president of the state chapter of the American Assn. of University Women, and Norman S. Goetz, representing trustees of the State University.

No Deadline Extension

FCC has issued a public notice advising it has no intention of extending its June 30 deadline for halting the use of certain medical diathermy equipment (mostly manufactured before July 1, 1947) which reportedly interferes with TV reception. The Commission said it had learned such equipment now is available, the operation of which causes no interference.

FCC GRANTS 19 NEW TV PERMITS; 4 TO MERGED COMPETITORS

Four so-called "marriage" applications are approved in the Commission's list of CPs granted. Total of 19 permits authorized is a new weekly high, topping by one the number issued last July.

TOPPING all previous records, FCC last week authorized a total of 19 new television stations. These included four CPs to applicants formed by mergers of previous competitors for the channels granted.

El-Cor Television Inc., representing a merger of the competitive bids of the *Corning Leader* and the *Elmira Star-Gazette,* was awarded uhf Ch. 18 at Elmira, N. Y., conditioned upon principals in the *Corning Leader* divesting themselves of their interest in WELM Elmira. The *Corning Leader* also owns WCLI Corning and the *Star-Gazette* owns WENY Elmira.

One of the first "marriage" applications submitted to the Commission in order to preclude need for competitive hearing, the El-Con Television bid originally proposed that all three AM stations would continue separate competitive operation but the Commission subsequently questioned this policy [B•T, Dec. 8, 1952]. Last week WELM tendered a transfer application to FCC to show withdrawal of the *Corning Leader* principals.

Other "marriage"applications granted by the Commission last week included that of T. E. Allen & Sons Inc. for uhf Ch. 46 at Durham, N. C.; Midwest Television Inc. for vhf Ch. 3 at Champaign, Ill., and Television Montana for vhf Ch. 6 at Butte, Mont.

T. E. Allen & Sons Inc., headed by Ambassador to Yugoslavia George V. Allen and his wife, was reconstituted within the past fortnight to provide 50% interest to WTOB Winston-Salem, N. C., previously competitor for Ch. 46 at Durham.

Midwest TV Reorganized

Similarly, Midwest Television, previously controlled by principals in WDWS Champaign, was reorganized to give 20% interest to WSOY Decatur, Ill., former competitor for Ch. 3 at Champaign.

Television Montana is owned 45% by KXLF Butte and 14% by KBOW there, with KXLJ Helena and KXLQ Bozeman holding minor interests.

New competitive bid for Ch. 46 at Durham was filed with the Commission just hours before FCC granted the Allen-WTOB application. It was tendered by Public Information Corp. of Durham, owned by P. M. Sawyer and family and Harold H. Thoms, 13.5% stockholder in WSSB Durham and principal owner of WISE Asheville and WEAM Arlington, Va. It could not be considered, however, because of FCC's 24-hour rule.

Last week's 19 construction permits were one more than the weekly record total of 18 issued by the Commission at the time of its first post-thaw grants last July [B•T, July 14, 1952].

FCC moved down the Group A-2 priority list to Benton Harbor, Mich., city No. 286, with a 1950 population of 18,769. Total of 16 permits went to Group A-2 cities (those without service) while three CPs went to Group B cities (those with service).

Since lifting of the freeze, at which time 108 vhf stations were on the air, FCC has approved 87 new vhf outlets and 187 uhf stations. Of the 274 post-thaw stations, 17 vhf and 13 uhf grantees are on the air.

TV stations authorized in the U. S. and its territories now total 382. Of this number, 14 are post-thaw noncommercial, educational outlets.

Here are the new permits issued by FCC last week:

Scranton, Pa. (City priority Group A-2, No. 20)—Union Broadcasting Co. (WARM), granted construction permit for uhf Ch. 16, effective radiated power 245 kw visual and 130 kw aural, antenna height above average terrain 1,260 ft.

Springfield, Ill. (Group A-2, No. 41)—Plains Television Co. (permittee of KETV [TV] Little Rock, Ark., KWTV [TV] Sioux City, Iowa, and WFTV [TV] Duluth, Minn.), granted uhf Ch. 20, ERP 18.2 kw visual and 10.2 kw aural, antenna 340 ft.

Durham, N. C. (Group A-2, No. 52)—T. E. Allen & Sons Inc. (owned 50% by Ambassador to Yugoslavia George V. Allen and associates and 50% by WTOB Winston-Salem), granted uhf Ch. 46, ERP 17 kw visual and 9.5 kw aural, antenna 460 ft. Comr. Eugene H. Merrill dissented.

Champaign, Ill. (Group A-2, No. 65)—Midwest Television Inc. (chiefly owned by WDWS Champaign principals and 20% by WSOY Decatur, Ill.), granted vhf Ch. 3, ERP 100 kw visual and 50 kw aural, antenna 810 ft.

Elmira, N. Y. (Group A-2, No. 81)—El-Cor Television Inc. (*Corning Leader*, licensee of WELM Elmira and WCLI Corning, N. Y., and *Elmira Star-Gazette*, licensee of WENY Elmira, principal stockholders), granted uhf Ch. 18, ERP 58 kw visual and 33 kw aural, antenna 780 ft. *Corning Leader* principals must divest themselves of all interest in WELM Elmira.

Eau Claire, Wis. (Group A-2, No. 122)—Central Broadcasting Co. (WEAU), granted vhf Ch. 13, ERP 52 kw visual and 26.5 kw aural, antenna 840 ft.

Butte, Mont. (Group A-2, No. 144)—Television Montana (KXLF Butte owns 45.35%; KBOW Butte, 13.6%; KXLJ Helena 22.68%, and KXLQ Bozeman, 11.33%), granted vhf Ch. 6, ERP 2 kw visual and 1 kw aural, antenna minus 690 ft.

Pocatello, Ida. (Group A-2, No. 195)—Tribune-Journal Co. (*Idaho State Journal*), granted vhf Ch. 6, ERP 7.2 kw visual and 3.6 kw aural, antenna 20 ft.

Pocatello, Ida. (Group A-2, No. 195)—Eastern Idaho Broadcasting & Television Co. (KWIK), granted vhf Ch. 10, ERP 3.2 kw visual and 1.9 kw aural, antenna 870 ft.

Sedalia, Mo. (Group A-2, No. 253)—Milton J. Hinlein (KRDO), granted vhf Ch. 6, ERP 6.3 kw visual and 3.2 kw aural, antenna 360 ft.

Valdosta, Ga. (Group A-2, No. 264)—WGOV-TV (WGOV), granted uhf Ch. 37, ERP 98 kw visual and 52 kw aural, antenna 320 ft.

Decatur, Ala. (Group A-2, No. 266)—Tennessee Valley Broadcasting Co. (WMSL), granted uhf Ch. 23, ERP 21.5 kw visual and 12 kw aural, antenna 120 ft.

Pittsburg, Kan. (Group A-2, No. 275)—Pittsburg Broadcasting Co. (KOAM), granted vhf Ch. 7, ERP 105 kw visual and 53 kw aural, antenna 540 ft.

Idaho Falls, Ida. (Group A-2, No. 277)—

Gunning for meat in Kentucky radio?

In Kentucky, it's easy — and inexpensive — to bag the big ones. 55.3% of the State's retail sales, 51.3% of its food sales, 59.8% of its drug sales are made in the big Louisville Trading Area — a compact market covered *thoroughly* by WAVE, with no waste circulation.

WAVE's rates are low because WAVE is powered *just right* (5000 watts) to give you the part of Kentucky you really *need,* plus a big chunk of Southern Indiana with another quarter billion dollars in effective buying income!

Ask Free & Peters about the smart advertisers who have racked up new Kentucky sales records, *with WAVE!*

WAVE

5000 WATTS • NBC • LOUISVILLE

Free & Peters, Inc., *Exclusive National Representatives*

Idaho Radio Corp. (KID), granted vhf Ch. 3, ERP 6.3 kw visual and 3.2 kw aural, antenna 260 ft.; Comr. Eugene Merrill did not participate.

Idaho Falls, Idaho (Group A-2, No. 277)— Idaho Falls Television Inc. (KIFI), granted vhf Ch. 8, ERP 23.5 kw visual and 12 kw aural, antenna 240 ft.; Comr. Eugene Merrill dissented.

Benton Harbor, Mich. (Group A-2, No. 286)— Palladium Pub. Co. (WHFB), granted uhf Ch. 42, ERP 17.5 kw visual and 9.3 kw aural, antenna 460 ft.

New Orleans, La. (Group B-4, No. 184) — New Orleans Television Co. (R. L. Wheelock, W. L. Pickens and H. H. Coffield, permittees of new uhf TV stations in Dallas and Houston, Tex., and applicant for new vhf TV station in Corpus Christi), granted uhf Ch. 20, ERP 180 kw visual and 98 kw aural, antenna 500 ft.

Tulsa, Okla. (Group B-4, No. 197)—Elfred Beck (owner of Albec Oil Co.), granted uhf Ch. 23, ERP 180 kw visual and 95 kw aural, antenna 520 ft.

Charlotte, N. C. (Group B-4, No. 199)—Inter-City Advertising Co. of Charlotte, N. C. Inc. (WAYS), granted uhf Ch. 36, ERP 85 kw visual and 48 kw aural, antenna 540 ft. Francis M. Fitzgerald must divest himself of all interest in WGIV Charlotte.

Comr. Frieda B. Hennock did not take part in last week's grants and Vice Chairman Hyde was present for the Decatur, Idaho Falls (Idaho Radio Corp.), Pocatello, Pittsburg and Sedalia actions only.

Following is a list of the contested TV applications passed over by FCC in its actions last week on uncontested bids:

68 CLAY PIGEONS ON FCC WALL

The turnover in federal jobs expected from last November's Republican election is taking place. Still open to administration shuffling and without the safeguards of Civil Service status are 68 FCC staff posts. B•T made a check prior to publication of the official document listing such availabilities and found out this:

BIGGEST guessing game in Washington broadcast circles this week is who are the 68 FCC staff executives who are not protected in their jobs by Civil Service status and who are likely to be replaced by the 20-year-long, job-hungry Republicans.

The answer will be known in another week when an official list of all Government jobs available to the new Republican administration, will become public. The list, compiled by the Civil Service Commission for the Senate, is now in the hands of the Government Printing Office.

A careful investigation by BROADCASTING • TELECASTING at the Civil Service Commission unearthed an Oct. 30, 1952, report which indicated that there were 68 FCC positions available as GOP plums when the Eisenhower administration gets around to filling them. All are in Washington. The FCC as of that date had 1,117 employes, of which 1,091 were in the U.S., and 747 in Washington.

Commissioners Not Included

This number does not include the Commissioners, all of whom are appointed for seven-year terms. At the present time, Comr. Eugene H. Merrill, Utah Democrat, is serving as a recess appointee and could be replaced at once. Chairman Paul A. Walker is serving under an executive order waiving compulsory retirement at age 70, issued last summer by President Truman. It is understood that the retirement waiver could be withdrawn by President Eisenhower at any time. Mr. Walker's term, however, expires June 30.

These are the positions exempted from Civil Service status by statute:

(1) Legal and engineering assistants and a secretary of the Commissioners.

(2) Administrative assistant to the Chairman.

Also exempted from status by the Civil Service Commission (Schedule A of Civil Service Manual, Chapter E 15, Sept. 8, 1952) are:

(1) Secretary of the Commission.

(2) Private secretaries or confidential assistants to each Commissioner.

(3) General Counsel and Assistants General Counsel.

(4) Chief Engineer and Assistant Chief Engineer.

(5) Chief Accountant and Assistants Chief Accountant.

(6) Chiefs of Bureaus.

These add up to 23 jobs in the FCC. These 23 jobs include seven attorneys.

However, it was learned from other sources that only 17 of the Commission's present 57 attorneys have Civil Service status. Attorneys were appointed to Government agencies before 1941 without status. In that year, all attorneys were blanketed in under Civil Service and those appointed from then until 1947 had to be cleared through the Civil Service Commission. However, in 1947, Congress removed attorneys from the Civil Service requirement, so that all lawyers appointed since then do not have status.

Therefore, excluding attorneys from the list of exempt jobs, there are 16 positions which under law or regulation are without Civil Service status. Added to these are the 40 attorneys without status, making a total of 56 known plums for GOP dispensation.

Just who the other 12 personnel are who are also without benefit of Civil Service protection will not be known until the Senate document comes off the Government Printing Office's presses.

All the exempted jobs are considered to be confidential or policy-making.

Filling the exempted positions is relatively easy. The present occupant is merely notified that he is no longer desired, and a new man is appointed.

However, should the job-holder be a veteran, he cannot be dismissed so summarily. A veteran can only be dismissed for cause "to promote the efficiency of the service." He can ask for charges, request a hearing, appeal to the head of his agency, and all else failing, appeal to the Civil Service Commission.

This is the same policy protecting those Government employes who have Civil Service status.

Junking of Materials Plan To Aid in Getting Metals

MANUFACTURERS of receivers, transmission equipment and components will have an easier time getting basic materials after June 30, when the Controlled Materials Plan of rationing steel, copper and aluminum will be dropped.

The flow of these basic metals, however, will not be regular until sometime in April because of ordering technicalities, according to Arthur Flemming, defense mobilizer who has announced the end of the government's allocations system.

The one governmental contingency is that buyers with Controlled Materials Plan allotments must get priority over other customers from metal producers. Procedure is being handled by the National Production Authority. April delivery seems likely for most buyers because of the required "lead time," which is 45 days in the case of all three metals.

WJEL Salutes FCC

HALF-HOUR salute to the FCC (and its predecessor, the Federal Radio Commission) on the government regulatory body's 26th anniversary was made Feb. 23 by WJEL Springfield, Ohio, in a special public service broadcast reviewing regulatory efforts from the first broadcast by Lee De Forest in 1909. Special guest on the program was Lester E. Noble, board member of Radio Mfrs. Assn. (now RTMA) from 1926-30, who as a member of a special committee was instrumental in getting the government to set up a regulatory law and a regulatory body (FRC) for radio in 1927.

merchandising magic in Baltimore

BRENT GUNTS
Baltimore's top M.C. has the winning way with women!

JOE CROGHAN
Announcer and B.G.'s man-friday sells 'em for keeps.

DON REDDING
WBAL's Sales Service Manager, correlates local broker and terrific K.K. results.

ROLLIE BOURBEAU
Merchandising Manager — personally supervises campaigns for sponsors.

JIM MARKIEWICZ
Detail man on the street, checking sales, displays. Gets orders. Reports weekly.

"Honest to goodness magic," say Kitchen Karnival sponsors!

And here's why: Participating sponsors are guaranteed concentrated merchandising in Baltimore area food stores, with point-of-sale displays planned by active in-store merchandising men. Products are mass displayed . . . given as prizes . . . or used as refreshments on luncheon broadcasts of Kitchen Karnival . . . the show that keeps producing more and more and more customers.

Nationally Represented by Edward Petry & Co.

PENNSYLVANIA Gov. John S. Fine presented eight radio stations Pennsylvania Week promotion awards at ceremonies in his office. Receiving the framed plaques, donated by the state broadcasters' association were (l to r): Dean Close and Herb Martin, WKBI St. Mary's; Dick Owens, WISL Shamokin; James Murray, KQV Pittsburgh; Gov. Fine; Charles Petrie, WISL Shamokin; Tom Price, WBVP Beaver Falls; Vic Diehm, WAZL Hazleton; George A. Koehler, WFIL-TV Philadelphia. Winners not represented in the picture: WCAU-TV Philadelphia and WHLM Bloomsburg. Judges included the governor, broadcasters and industrialists.

CHICAGO EDUCATORS WOULD ALLOW COURTESIES, BUT NO COMMERCIALS

Spokesman for the applicant-to-be describes plans for announcements placed by certain contributor firms and individuals which will finance Ch. 11 operation. However, it is maintained, the outlet would be non-commercial.

WITH plans to file sometime this week at the FCC for non-commercial TV facilities in Chicago on vhf Ch. 11, the Chicago Educational Council envisions a financing plan that would permit courtesy announcement for contributing corporations and individuals alike. Station, however, would remain non-commercial, according to a Council spokesman.

This view was expressed last Thursday at a conference called by the Chicago Educational Television Council to announce a committee set up to raise funds for the station.

In a long step in that direction, Dr. John T. Rettaliata, president of Illinois Institute of Technology and temporary CETC chairman, announced the personnel of the money-raising group that read like a veritable "who's who" of industrialists.

Edward L. Ryerson, prominent industrialist and civic leader, has accepted the chairmanship of the committee, whose purpose will be to raise at least $500,000 for educational television in Chicago.

The Council hopes to be on the air within a year after approval by the FCC. Preparation of papers of incorporation also is underway for submission to Springfield, Ill. [B•T, Feb. 9]. Mr. Ryerson said he would call a luncheon meeting this Tuesday to map plans for the money drive.

Mr. Ryerson, who is board chairman of Inland Steel Corp., said he accepted the chairmanship as a "challenge and thought" it would be a "disgraceful episode in the history of Chicago if we fail to make use of the channel."

Both Mr. Ryerson and Dr. Rettaliata felt corporations and individual citizens would "see the value" of contributing funds. Dr. Rettaliata thought it conceivable that "corporations could contribute to the support of the station"— before and after it takes the air. Once vhf Ch. 11 goes on the air, he continued, the station could run announcements before a block of programs explaining they are "being brought to you through the generosity" of such a company— and still remain non-commercial. He said he had checked into the ethics of such a procedure.

Other leading citizens who have agreed to serve on the fund group are Dr. Robert E. Wilson, board chairman, Standard Oil Co.'s, Guy Reed, executive vice president, Harris Trust and Savings Bank; Harold Swift, board chairman, Swift & Co., and James D. Cunningham, president of Republic Flow Meters Co.

The Chicago educational television council has set June 2—current deadline for picking up educational channels as set by the FCC—as the date by which it hopes to raise $500,000. Actually only $200,000 is lacking from this goal since $150,000 has already been committed by the Ford Foundation and a similar sum by the Chicago Board of Education.

The council will serve as a non-profit corporation and governing body and will be, in fact, the actual licensee. It hopes to get some programs from the Educational Television and Radio Center, to be located in Chicago and for which plans were announced last fall. It has not as yet been set up.

L. A. Red Probe on Air

HEARING sessions of the House Un-American Activities subcommittee probe on Communist infiltration in motion pictures, radio and television resumes in the Los Angeles Federal Bldg. March 23 for seven days. Hearing will be broadcast and telecast, according to Chairman Donald L. Jackson (R-Calif.).

Rep. Reed Bans Radio-TV From New York Hearing

BAN on radio-television coverage of the House Judiciary subcommittee investigating the Dept. of Justice was imposed by Judiciary Committee Chairman Chauncey W. Reed (R-Ill.) last week.

The subcommittee is headed by Rep. Kenneth B. Keating (R-N. Y.).

This is the first House committee which banned radio-TV coverage since Speaker Joseph W. Martin Jr. (R-Mass.) repealed a broadcast media prohibition imposed by his predecessor Rep. Sam Rayburn (D-Tex.).

TV film cameras "shot" a hearing of the House Armed Services Committee investigating recent air crashes in January [B•T, Jan. 12].

Two weeks ago, radio and TV were permitted to cover the Senate Investigation Committee's probe of the Voice of America [B•T, Feb. 23]. This committee is headed by Sen. Joseph R. McCarthy (R-Wis.).

Earlier, the Senate Foreign Relations Committee refused permission for radio-TV newsmen to be present when it held hearings on the confirmation of John Foster Dulles to be Secretary of State in the Eisenhower cabinet [B•T, Jan. 19].

Action on Resolution Deferred

Rep. Reed's statement revealed that the House Judiciary Committee in its Jan. 27 meeting considered a formal resolution to prohibit radio, TV, motion pictures, sound recording and photographs at official hearings of the committee or subcommittees. Action on the resolution was postponed, Rep. Reed said, with the understanding that the spirit of the proposal would be followed at the discretion of the chairman or until the committee acted on the resolution.

Pending before the Congress are two bills to permit radio-TV coverage of Congressional hearings at the desires of the committees involved. One is H. Res 21, by Rep. Patrick J. Hillings (R-Calif.) and the other is HR 2109 by Rep. Jacob K. Javits (R-N. Y.). Generally considered opposed to permitting broadcast media to cover Congressional meetings is H Res 86, by Rep. Emanuel Celler (D-N.Y.), which deals with rights of witnesses before committees.

Text of Rep. Reed's statement regarding the New York hearings is as follows:

In accordance with temporary action taken by the Committee on the Judiciary at its first meeting held on January 27, 1953, request has been made to me as chairman of the committee to give my assent to the broadcast by radio and television of the public hearings to be held in the city of New York on or about February 27th by our special Subcommittee to Investigate the Department of Justice.

At the Committee meeting of January 27th there was presented and discussed a formal resolution to prohibit radio or television broadcasts (as well as motion pictures, sound recordings or photographs) of official hearings or other proceedings of the Committee on the Judiciary or any of its subcommittees. Following such discussion a motion was passed postponing consideration of the proposed resolution with the understanding that the spirit of the resolution should be followed at the discretion of the chairman until such time as the committee acts thereon.

After studied consideration, I have concluded that I should not deviate from the spirit of that resolution in this instance. Accordingly, I have declined to grant the requested permission to broadcast by radio or television the hearings of our special Subcommittee to Investigate the Department of Justice scheduled to be held in New York on or about February 27, 1953.

In view of the pendency of this general subject before the committee, I deem it inappropriate to discuss in this announcement the various grounds upon which this ruling is based.

what's the score in milwaukee?

WCAN IS AHEAD ON ALL COUNTS!

and now television!
we've been awarded Milwaukee's much-wanted second channel.

the local picture: since the advent of new management in April '52, a steady upsurge in hard-to-get local orders.

the national story: the same trend here, too . . with 35 of the largest advertising agencies in the land now placing business on WCAN.

plus a sizeable across-the-board increase in listenership (Pulse, January '53)

VOA PROBE EMPHASIS NOW OVERSEAS

Dr. Robert Johnson succeeded Dr. Willis Compton while reports persisted that President Eisenhower will divorce the Voice operations from the State Dept. These were but two of last week's many developments.

EMPHASIS of Sen. Joseph R. McCarthy's (R-Wis.) Voice of America investigation, which had concentrated on the operation's management in the U. S., seemed headed last week to a probing of U. S. information programs abroad. Public hearings resume in Washington today (Monday) by the Senate permanent investigations subcommittee which Sen. McCarthy heads.

Among last week's developments:

• Dr. Robert L. Johnson, president, Temple U., took over as acting director of the International Information Administration, replacing Dr. Wilson Compton, who resigned a week earlier [B•T, Feb. 22].

• President Eisenhower reportedly may give the go-ahead to a plan that would divorce the information program, including the Voice, from the State Dept.

• Alfred H. Morton, one-time NBC vice president, drew a one-day suspension as chief of VOA's radio operations when he disagreed with a State Dept. directive barring use of material by "controversial" authors in broadcasts aimed behind the Iron Curtain.

Compton Makes Charge

• Dr. Compton charged the Senate inquiry was unfair while former Assistant Secretary of State for Public Affairs Edward W. Barrett, who once headed the Voice program, criticized the Senate investigation, recommending a more "responsible" inquiry.

• A Senate Foreign Relations subcommittee received an additional $25,000 to study the U. S. overseas information program.

Early in the week, the State Dept. directed employes to give the McCarthy group full cooperation, thereby rescinding an earlier directive. The agency also planned to appoint a liaison officer to work with investigators. Sen. McCarthy had charged the department with "hamstringing" his efforts to quiz State employes.

Dr. Johnson, willing to give Sen. McCarthy "the benefit of the doubt" in the probe, is former chairman of the Citizens' Committee for the Hoover Report which recommended an independent agency for VOA and related work. He reportedly discussed this with Secretary of State John Foster Dulles and the President before accepting his new post.

Meanwhile, the U. S. Advisory Commission on Information called for such a consolidation on a cabinet level. The five-man commission, created in 1948, includes Judge Justin Miller, NARTB's board chairman and general counsel, and Philip D. Reed, board chairman of General Electric.

Mr. Barrett's criticisms of the McCarthy inquiry were contained in a bylined newspaper article. He suggested the "full story" be told in taking the probe "out of the circus ring." While admitting VOA shortcomings, he asserted only "10-15%" of the charges made before the committee are true.

Cites VOA Problems

VOA problems, he said, include these: Inability to get top executives and engineers, "complexities" and frictions because of a daily broadcast load, governmental regulations and red tape, and wasted time because Voice officials spend "more time combatting irresponsible charges of non-existent faults than they could give to correction of real faults." He cited several Congressional and independent studies made of the operation.

Meanwhile, the Senate group is expected to look into the VOA request for nearly $4 million to construct a second floating transmitter, similar to the *Vagabond*, equipped to move closer to communist areas and to avoid Soviet jamming.

TV in Cold War?

Among the topics to be studied by the Senate Foreign Relations Subcommittee is whether television would help the U. S. cold war. The question was raised in an interim report filed by the subcommittee (82d Congress) three weeks ago. Also to be considered is whether the Voice and other information units would be better off if taken out of the State Dept.

This group does not intend to duplicate efforts of Sen. McCarthy's group, although information will be exchanged, according to the Foreign Relations Subcommittee chairman, Sen. Bourke B. Hickenlooper (R-Iowa), who held an organization meeting last week.

Murrow Defends Barrett VOA Views on CBS Newscast

CURRENT Senate investigation of the Voice of America, Edward R. Murrow told his CBS Radio audience Tuesday evening, "fails to concern itself with the final product, namely what is being broadcast."

Noting that, despite charges against the effectiveness of the Voice, the Russians consider it "serious enough so that they devote about a thousand transmitters and the efforts of more than 10,000 men to jamming it," Mr. Murrow said:

"The Russians apparently regard it as a serious threat. Most reasonable men would agree that the product could be improved. Maybe the whole operation should be taken out of the hands of the State Dept.

Effective or Not

"But the current investigation is not concerned with the product. These broadcasts are either effective or they aren't. They are either subversive or they aren't. They are accurate or inaccurate. There are simple methods of reaching conclusions on these matters. But it does not appear that the committee is interested in this type of information upon which judgment could be based."

He prefaced his observations by quoting the views of Edward Barrett, who as a former Assistant Secretary of State was in charge of Voice operations some two years.

Mr. Barrett, he noted, feels a weapon such as the Voice cannot be constructed or reconstructed overnight—that, without feeling the organization is perfect, he believes the source of real trouble lies in inability to hire enough top-flight executives and engineers for several reasons, including low pay and fear of being slandered; red tape that slows recruiting of personnel, and complexities inherent in an organization that broadcasts daily in 40 languages. Further he feels, Voice officials have had to spend more time defending against irresponsible charges than they can devote to the correction of real faults.

The constructive course, as phrased by Mr. Murrow in his citation of the Barrett views, "is hardly that of a daily televised procession of hand-picked witnesses consisting almost entirely of disgruntled persons who have been fired, demoted or passed over; the kind of malcontents to be found in any large organization. Mr. Barrett contends that an inquiry devoted solely to the lurid testimony of the disgruntled would make any agency or private business seem disgraceful."

Mr. Barrett's view was that a responsible investigation should concern itself with whether effectiveness of the broadcasts can be improved, whether transmitters are located properly, etc.

Morton Suspension

Mr. Murrow's broadcast was made the day Alfred H. Morton, chief of the Voice's International Broadcasting Service, was suspended, but before the suspension was lifted. Of the suspension, the newscaster said:

"Mr. Morton is not accused of doing or thinking anything subversive. Apparently what happened was that Mr. Morton sent a memorandum to other officials of the Voice of America, saying that he disagreed with a directive from the State Dept. forbidding the use of any material from communist or fellow-traveler sources. This directive, if literally applied, would mean that the Voice of America in its broadcasts abroad could not refute allegations made by Vishinsky at the United Nations, could not contradict articles published in Moscow claiming that we are employing germ warfare in Korea. For in order to refute it, it is necessary to quote, and the department's directive forbids that."

Theatre TV Petitions FCC To Okay Carrier Facility Use

New move seen as possible way out of the impasse on theatre TV allocations. Use of common carrier frequencies would be limited.

WAY out of the theatre TV allocations impasse appeared possible this week following a request by theatre TV adherents late Friday that the FCC authorize the use of common carrier frequencies by a limited common carrier devoted exclusively to theatre TV programming.

This move presumably is a recognition by motion picture interests that their fight for exclusive theatre TV frequencies was not winning FCC sympathy. Hearings, which began last October, have been marked by critical questions by Commissioners.

The petition filed in behalf of the Motion Picture Assn. of America and the National Exhibitors Theatre Television Committee (exhibitors) declared that a seeming conflict existed between the Commission's efforts to have large-screen proponents put in a detailed case and its anxiety to keep the presentations within bounds in order to speed up the *en banc* hearings.

Offers Compromise

On the grounds that theatre TV facilities by existing carriers are still a long way off, the motion picture interests offered this compromise:

- Let the FCC authorize the use of existing common carrier frequencies by a "limited" or "restricted" common carrier furnishing only theatre TV service. These facilities would be available to all customers, the petition stated.
- But, at the same time, the Commission must order, through a policy declaration or otherwise, that all existing common carriers cooperate with the theatre TV carrier through joint planning, interconnections, etc., the petition pointed out.

This is because for some time the theatre TV carrier will not be able to service all customers in every area of the country at the same time, it was said.

The petition also said that theatre TV interests will continue discussions with Western Union regarding the establishment of a big-picture TV service [B•T, Jan. 26].

Just who would run the motion picture common carrier was not made public—either in the petition or by the parties. It is understood that some sort of a cooperative company is envisaged, similar to Press Wireless or Aeronautical Radio Inc. Press Wireless serves newspapers and Aeronautical Radio the airlines.

Theatre TV hearings began last October with technical and accounting data [B•T, Oct. 27, 1952]. Motion picture theatre TV proponents asked for an exclusive frequency allocation of 360 mc in the 5925-6875 mc band (now allocated for common carrier use). Their proposals envisaged a 30 mc video channel (to permit fidelity as great as that achieved in 35mm film, they said), with two channels for each service and with six services to insure competition. Need for exclusive frequencies was pinned on assertion that common carriers (AT&T and Western Union) did not have the facilities of this high order and that their rates were unreasonable.

As alternates, the motion picture interests said they would accept an assignment in the Industrial Radio Service allocation (6575-6875 mc, but extended down to 6425 mc), or a band beginning at 10,700 mc (band 10,700-11,700 is now allocated to common carrier).

Request for exclusive common carrier frequencies was opposed by AT&T, which indicated that research and development projects underway now could result in suitable facilities for theatre TV.

Early in February, the Commission halted further hearings on the subject and propounded eight questions on the use of theatre TV frequencies. These were answered by MPAA attorney Vincent B. Welch and NETTC attorney Marcus Cohn three weeks ago [B•T, Feb. 16]. FCC Chairman Paul A. Walker recessed the hearing following oral argument.

FCC to Be Questioned Further By House Unit March 12

HOUSE Commerce Committee's meeting with FCC officials will continue March 12, it was announced last week, with prospects that color TV, sales of stations, the Clear Channel case and legal and engineering fees will be among the subjects touched on. These will be in addition to the probable further inquiry into subjects on which FCC Chairman Paul A. Walker was quizzed two weeks ago [AT DEADLINE, Feb. 23].

Among the topics on which Mr. Walker was queried in the all-day first session Feb. 20 were (1) workings of the McFarland amendments to the Communications Act, (2) chain broadcasting rules, (3) educational TV, (4) length of TV hearings, (5) "strike" applications, and (6) changes in Sect. 315 of the Communications Act.

Also to be continued is the questioning by Rep. William L. Springer (R-Ill.). Rep. Springer surprised observers by apparently suggesting that FCC should bar newspapers, motion picture interests and even radio broadcasters from holding TV licenses in the interest of diversification of the media of mass communications.

In an amplification of this implication last week, Rep. Springer told BROADCASTING • TELECASTING that what he had mind was the establishment of a policy by the FCC which would look askance at the grant of a TV station to any in these three categories if there was to be only a single station in the market. He feels, he said, that the Commission should look with more favor on a non-newspaper, theatre owner or broadcaster if grant means a monopoly.

Schenck's Views

Another GOP Congressman, Ohio Rep. Paul F. Schenck, representing the 3rd Ohio Congressional District (Dayton, Hamilton, Middletown), also amplified some comments he made two weeks ago regarding blanketing of smaller communities by "high powered" big city TV stations. He was, he told BROADCASTING • TELECASTING, referring to Cincinnati TV stations whose signals come in fairly strong to Hamilton and Middletown. This made him fearful, he said, that TV stations in smaller cities would find it difficult economically to buck the major markets' TV stations for national advertising and network affiliations.

He feels, he said last week, that since the FCC licenses TV stations, it should see that no economic restraints are placed in the path of small city TV stations.

He also observed, two weeks ago, that if the Commission were to schedule hearings quickly on contested applications, that might serve to eliminate to a great degree "strike" applications. His theory, he said last week, was that an early hearing would force all applicants to "put up or shut up."

KFMB-AM-TV Sale Application Is Filed at FCC

FORMAL application for the sale of KFMB-AM-TV San Diego, Calif., by John A. Kennedy for $3.15 million to Wrather-Alvarez Broadcasting Co. was filed Thursday at FCC [B•T, Feb. 2].

Wrather-Alvarez Broadcasting Co., a new corporation, is owned equally by Mrs. Helen Alvarez and J. D. Wrather Jr., owners of KOTV (TV) Tulsa and applicants for vhf Ch. 11 at Little Rock, Ark. They also hold 50% interest in Superior Television Inc., applicant for vhf Ch. 10 at Corpus Christi, Tex. Mrs. Alvarez is applicant for uhf Ch. 40 at Sacramento, Calif., and Mr. Wrather has filed for uhf Ch. 44 at Boston.

Sale price of the KFMB stations includes a $150,000 retainer to Mr. Kennedy for management consultation to the new owners during the next five years. Contract calls for payment of $200,000 cash in escrow at time of signing, plus an additional $400,000 cash at time of settlement following FCC approval. The remaining $2.4 million would be paid at the rate of $20,000 per month, the balance bearing 4% interest.

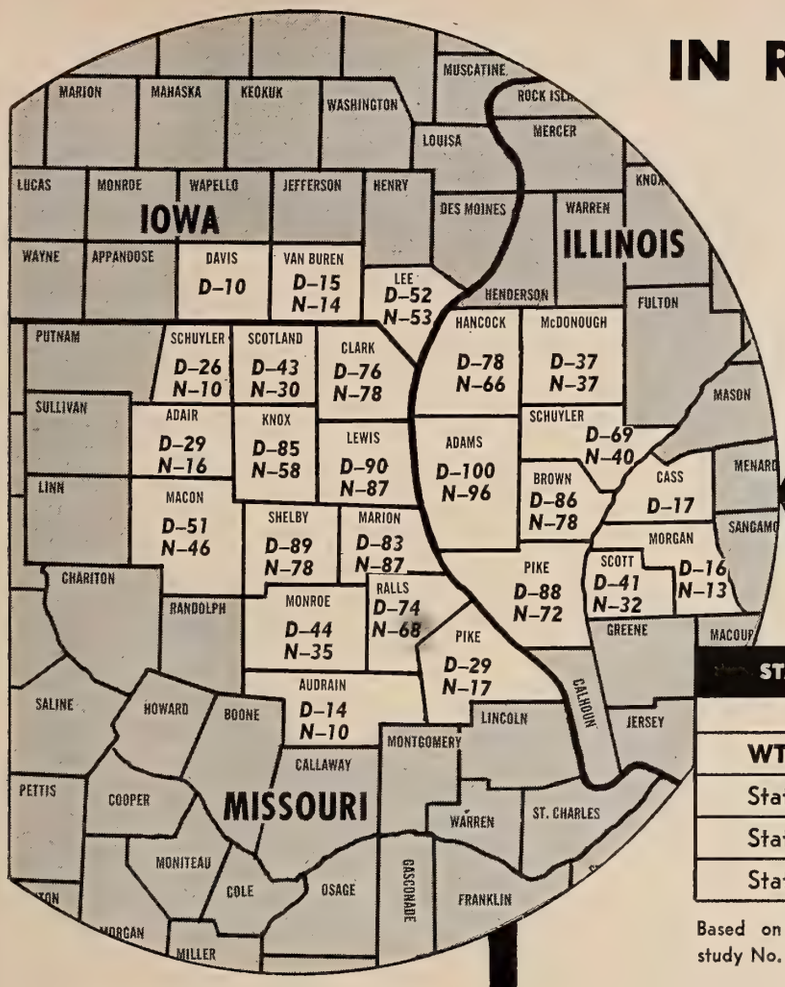
Mr. Kennedy, who bought KFMB-AM-TV two years ago from Jack Gross for about $1 million, is selling the properties because of ill health.

Both KFMB and KFMB-TV are CBS affiliates. KFMB is on 550 kc with 1 kw directional. Application is pending for 540 kc. KFMB-TV, on vhf Ch. 8, is operating with effective radiated power of 27.4 kw visual and 13.7 kw aural. They are housed in the five-story KFMB Bldg., which includes a TV theatre studio in downtown San Diego. The structure and adjacent properties owned or under lease are included in the transaction, valued at $1.09 million.

Leonard Marks of Cohn & Marks, Washington radio law firm, represented both the buyer and seller in preparing the application for assignment. Kennedy Broadcasting Co. was also represented in the transaction by Desser, Rau-Christensen-Hoffman, Beverly Hills, and Wrather-Alvarez Broadcasting was represented by Kaplan, Livingston, Goodwin & Berkowitz, Hollywood, and by Ray King, Wichita Falls. The KFMB sale was handled by Blackburn-Hamilton Co., station brokerage firm.

WGRD Takes Protest to Court

MUSIC Broadcasting Co. (WGRD Grand Rapids) has filed an appeal in the U. S. Court of Appeals, District of Columbia, to set aside an FCC order dismissing WGRD as a party in interest in a grant of uhf Ch. 35 in Muskegon, Mich. [B•T, Feb. 9].



After grant of Ch. 35 was made to Versluis Radio & TV Co., WGRD filed a protest, claiming that Versluis intended to operate the new TV station as a Grand Rapids, not a Muskegon, outlet. If this happens, WGRD claims, Mr. Versluis can offer a combination rate for AM, FM and TV, since he is the owner of WLAV-AM-FM Grand Rapids. Since WGRD can base its rates only on AM operation, it claims it would be placed in an unfair competition position.

In the appeal filed last week, WGRD holds that FCC's actions in denying a hearing prior to the grant, and in dismissing its protest, acted contrary to the law. The Grand Rapids broadcasters, also applicants for uhf Ch. 23 in Grand Rapids, ask that the Court set aside both the Ch. 35 grant and the denial of hearing.

Libel Protection in 21 States; W. Va. Is Latest to Adopt

TWENTY-ONE states now have generally similar libel laws releasing radio and TV stations from suits for utterances over which they have no control. Latest to enact such legislation was West Virginia.

A bill sponsored by the West Virginia Broadcasters was passed by both houses of the Legislature without a dissenting vote, according to WVBA president, John T. Gelder Jr., WCHS Charleston, who headed a committee which contacted legislators in the state.

Members of Mr. Gelder's committee were William Rine, WWVA Wheeling; C. L. Golliday, WEPM Martinsburg; A. W. Vickers, WMON Montgomery; George Clinton, WPAR Parkersburg; Ellis Landreth, WRBW Welch; Joe L. Smith Jr., WJLS Beckley.

States now having radio-TV libel protective laws are California, Colorado, Florida, Georgia, Iowa, Idaho, Kansas, Louisiana, Maine, Michigan, Missouri, Montana, Nebraska, Oregon, North Carolina, South Carolina, South Dakota, Utah, Virginia, West Virginia and Wyoming.

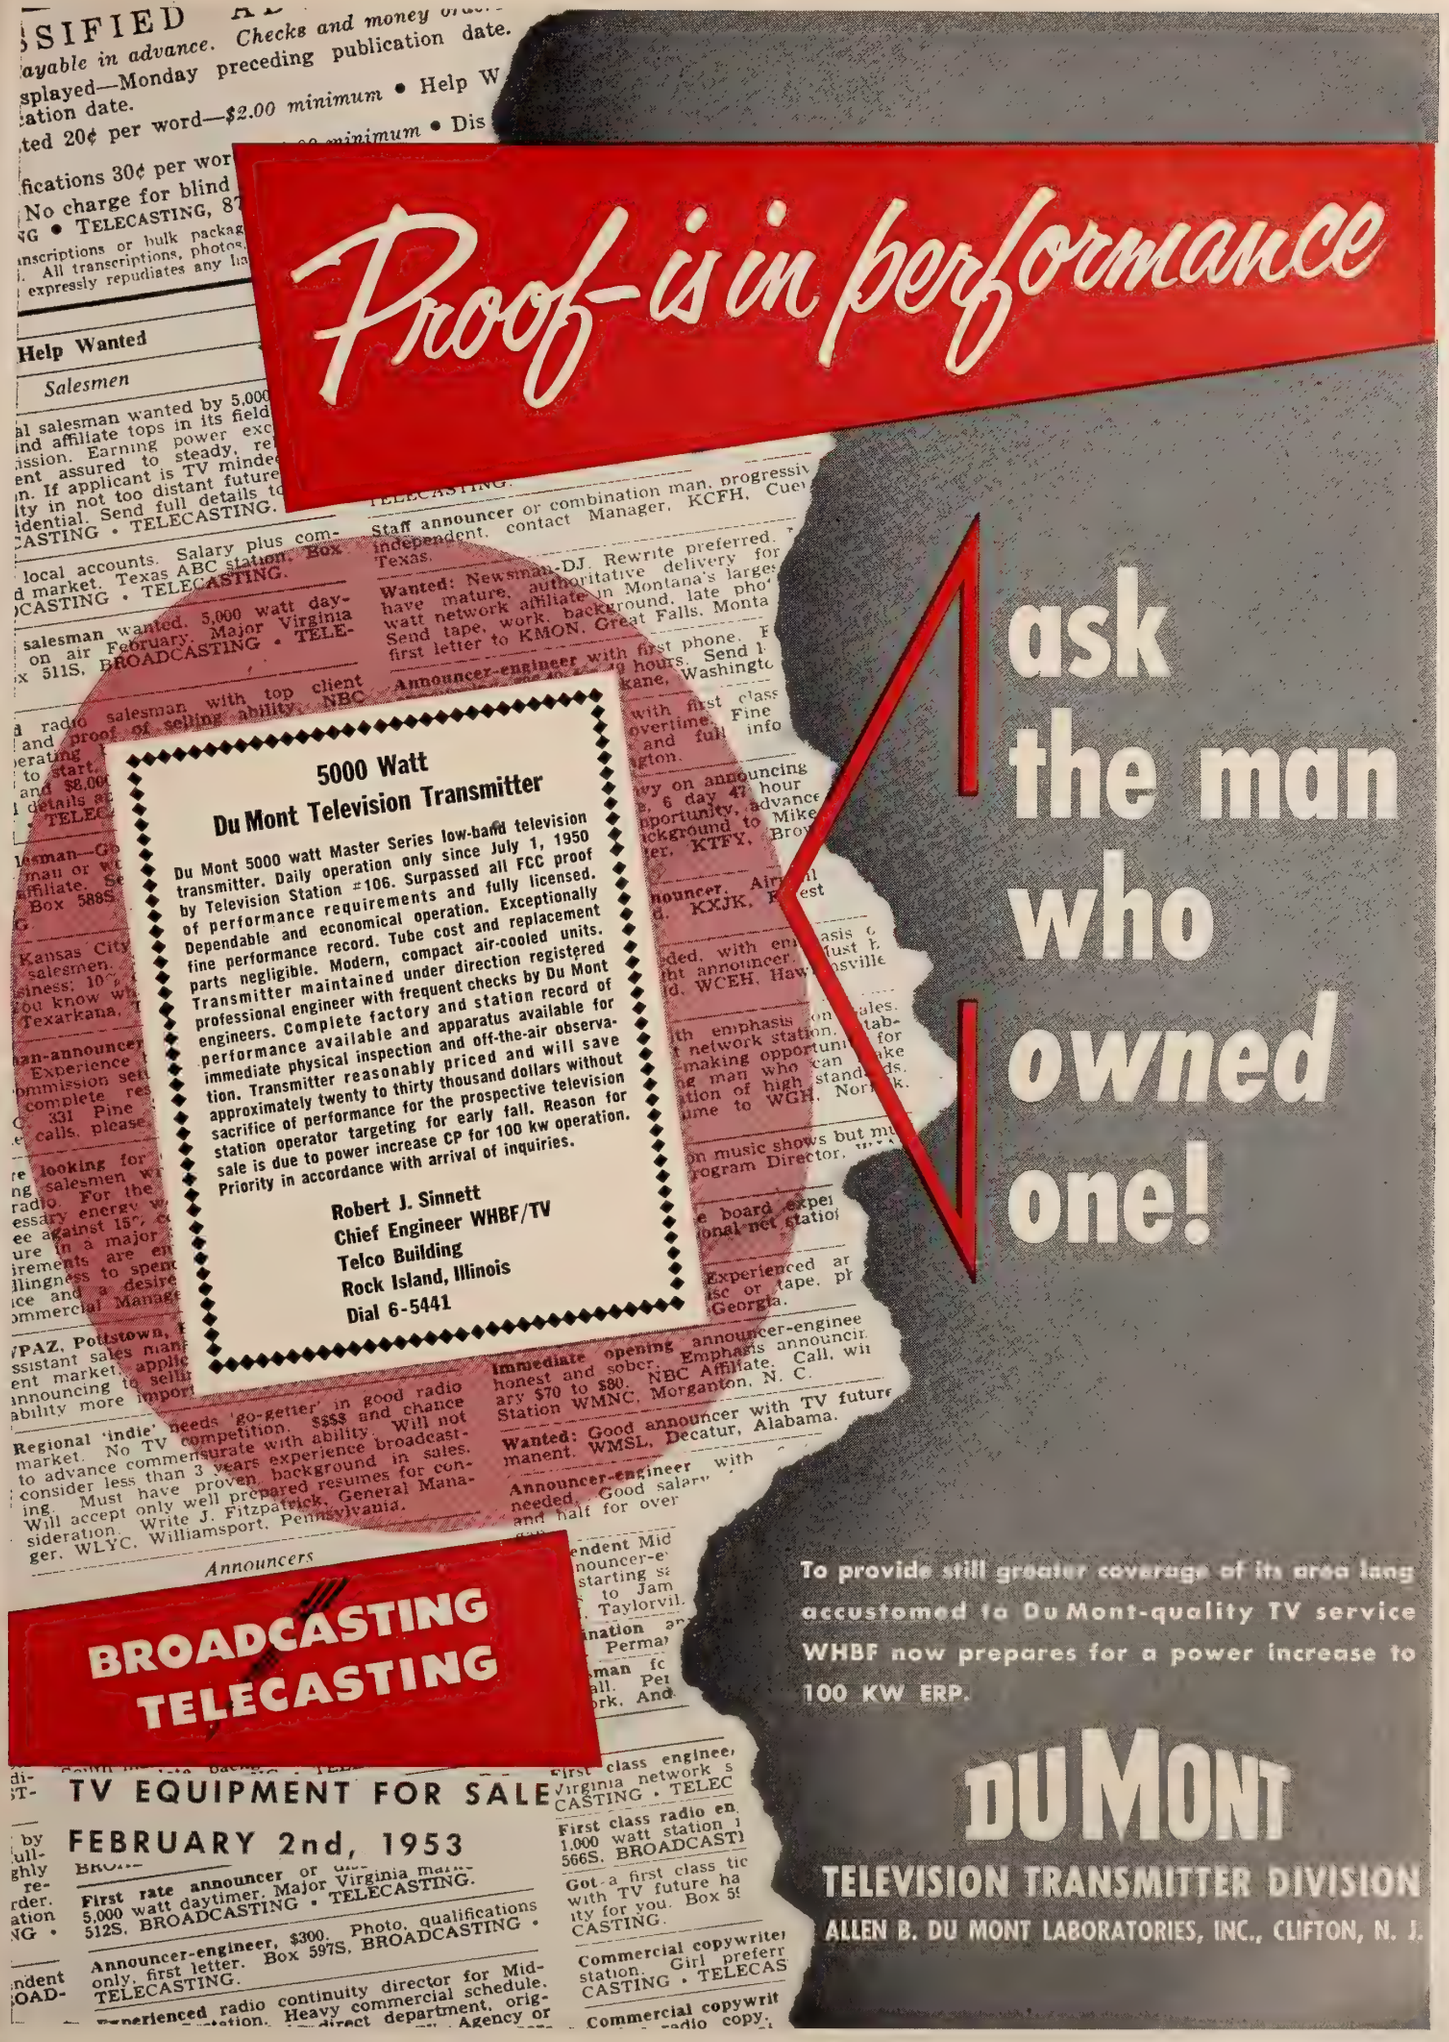
Texas' Anti-Liability Bill

TEXAS Assn. of Broadcasters is sponsoring a bill in the Texas House to protect radio-TV owners and operators for defamatory statements for which they are not responsible. The bill, authored by Rep. J. B. Paxton of Palestine, Tex., would not hold a broadcaster liable for damages for defamatory statements uttered in connection with any election.

FCC Approves WTVN (TV) Sale From Lamb to Taft Family

THE TAFT family of Cincinnati last week was given FCC approval to buy WTVN (TV) Columbus, Ohio, for $1.5 million from Edward Lamb, broadcaster, telecaster, and newspaper publisher.

Hulbert Taft Jr., executive vice president of WKRC-AM-FM-TV Cincinnati, owned by the Cincinnati *Times-Star* and in turn controlled by the Taft family, told BROADCASTING • TELECASTING that the sale would be closed "within ten days."



WTVN (TV), now owned by Edward Lamb, began operations in August 1949 on vhf Ch. 6 and operates with effective radiated power of 19.8 kw visual. Six weeks ago it received FCC permission to increase its ERP to full 100 kw.

Hulbert Taft Sr., publisher of the Cincinnati *Times-Star,* is president of WKRC-AM-FM-TV. He is a cousin of Sen. Robert A. Taft (R-Ohio). David Taft is secretary of the radio properties and Robert A. Taft Jr. is general counsel.

Mr. Lamb is being retained as a consultant to WTVN (TV) for ten years for an annual retainer of $12,500. He is being paid $1,340,000 for broadcast equipment and $160,000 for land and buildings.

It has been reported that WTVN (TV) has monthly earnings of between $25,000 to $30,000. Its transmitter is located atop the LeVeque-Lincoln Tower in downtown Columbus and its studios and offices are at 753 Harmon Ave.

Mr. Lamb still retains WICU (TV) Erie, Pa., and WMAC-TV Massillon, Ohio. He is licensee of WTOD Toledo, WIKK Erie and WHOO Orlando, all AM stations. He is publisher of the Erie *Dispatch.*

5000 Watt
Du Mont Television Transmitter
Du Mont 5000 watt Master Series low-band television transmitter. Daily operation only since July 1, 1950 by Television Station #106. Surpassed all FCC proof of performance requirements and fully licensed. Dependable and economical operation. Exceptionally fine performance record. Tube cost and replacement parts negligible. Modern, compact air-cooled units. Transmitter maintained under direction registered professional engineer with frequent checks by Du Mont engineers. Complete factory and station record of performance available and apparatus available for immediate physical inspection and off-the-air observation. Transmitter reasonably priced and will save approximately twenty to thirty thousand dollars without sacrifice of performance for the prospective television station operator targeting for early fall. Reason for sale is due to power increase CP for 100 kw operation. Priority in accordance with arrival of inquiries.

Networks Study Civil Rights Law in N. Y.

TELEVISION networks indicated last week they plan to take "a long and hard look" at provisions of Section 52 of the Civil Rights Law of New York State that prohibits "the televising, broadcasting and taking of motion pictures of certain proceedings" before a court, commission or committee administrative agency in the state.

Waterfront Probe

Both ABC-TV and CBS-TV said their attorneys were examining the law closely in view of plans to cover the forthcoming investigation in New York of waterfront crimes by Sen. Charles Tobey's (R-N. H.) Interstate & Foreign Commerce Committee.

NBC authorized the statement: "NBC's attitude is this: We do not think this law could interfere with the carrying of federal hearings."

The law, passed in April 1952, specifically notes that the ban covers "testimony of witness by subpoena or other compulsory process" and that "any violation of this section shall be a misdemeanor."

It has been reported that DuMont's New York outlet, WABD (TV), has offered to carry Sen. Tobey's investigation as a public service and that NBC, CBS-TV and ABC-TV planned film coverage.

Radio's
GROWING

Because Radio reaches and sells more people at far lower cost than any other medium.

And here's what an advertiser says about WGN: "The general results we are obtaining on WGN at the present time are superior to the results we are obtaining in printed media and in direct mail. . . . We thought you would be interested in knowing that we are finding radio, and WGN in particular, to be a most successful media for us at the present time."

KBIG Tells FCC It Should Grant Application

KBIG Avalon, Calif., in response to protests filed by KMPC Los Angeles and KCBS San Francisco, alleging interference, told FCC last week that it "was constructed and is presently operating in full compliance with every provision of its construction permit."

Accordingly, KBIG said, FCC should grant "forthwith" its application for a station license to cover the construction permit and dismiss the protests.

KCBS claimed there is objectionable co-channel interference within its normally protected 0.5 mv/m daytime contour. KCBS is licensed on 740 kc with 50 kw, DA-2. KBIG is operating on 740 kc with 10 kw daytime only, DA.

KMPC Los Angeles asserted there is overlap between the 25 mv/m contours of KMPC and KBIG. KMPC is licensed on 710 kw with 50 kw daytime, 10 kw night, DA-N.

KBIG stated that no reliable evidence contrary to its contentions has been presented to the Commission. It said it got its CP after a full FCC hearing and that it has spent $222,903 constructing the station in reliance on the construction permit.

FCC BACKLOG STATUS REPORTED

FCC bit into its backlog of pending broadcast cases, completed action on about 50 in the month of January. That was apparent from a study of the second report submitted by the Commission to Congress last week in line with the McFarland Act requirement that it report all pending cases three months or older for uncontested applications, and six months or older for contested cases, from the time hearings have concluded.

Second report, listing such cases up through Jan. 31, is 65 pages. This compares with 101 pages in the first report, which was a roundup as of Dec. 31, 1952 [B•T, Feb. 2].

Of the approximately 950 broadcast applications pending, 600 involve TV, the report showed. This compared with the approximately 635 reported pending for the end of 1952.

The Commission reported that 50 contested cases were still unresolved, although hearings had ended at least six months ago. This compares with 89 reported for the end of 1952.

The report indicated that 315 uncontested broadcast applications were three months old or older and that 44 applications were pending for renewals or transfers that were three months old or older. Of the 315 broadcast applications, 30 involve FM. The report also showed that there were 12 applications for auxiliary stations pending for at least 90 days.

Unreported were applications which do not fall in the 90-day or 6-month category. Just how many they add up to cannot be determined.

House Unit Names Staggers

REP. HARLEY O. STAGGERS (D-W. Va.) is the newest member of the House Interstate and Foreign Commerce Committee. Mr. Staggers takes the place of Rep. Thomas B. Stanley (D-Va.) who has resigned from Congress. With Rep. Staggers' appointment, the House Commerce Committee has full membership, with 17 Republicans and 14 Democrats.

NARTB'S CONVENTION AGENDA IS SET

Both radio and TV share heavily in conferences planned for the April 28-May 1 annual convention. An added feature this year is scheduling of a keynote speaker.

FOUR-DAY program of business and engineering features has been drafted by NARTB for the 31st annual "Gold Rush" convention to be held in Los Angeles April 28-May 1.

The Management Conference runs through a four-day schedule of meetings, with the separate Engineering Conference occupying three days.

Roughly the schedule lines up like this:

Management: April 28—Annual industry equipment exposition opens; TV meeting and election; FM roundtable; BAB radio sales program. April 29—Formal opening; keynote address; luncheon address by NARTB President Harold E. Fellows; five-city management market study results. April 30—Uhf panel; TV code session; film panel; Voice of Democracy feature; luncheon speech by FCC Chairman Paul Walker; small-market TV workshop; radio program panel; labor workshop; merchandising panel; sports-public events panel; banquet. May 1—FCC panel; trade press panel; noon adjournment.

Engineering: April 29—Technical papers; joint NARTB luncheon; reception. April 30—Technical papers; joint luncheon; low-budget TV clinic; banquet. May 1—Technical papers and inspection of network studios. Inspection trip to Mt. Wilson antenna farm is planned May 2.

A new feature added this year is the keynote speaker, a prominent industry figure whose name has not been announced. The keynoter will be presented with an award for outstanding service to broadcasting.

While television is occupying a heavy share of the time, plenty of features have been scheduled for aural broadcasting, particularly in connection with the Management Conference.

Program arrangements are being drawn up by a committee headed by Clair R. McCollough, WGAL-AM-TV Lancaster, Pa.

Robert K. Richards, NARTB administrative vice president, is directing convention program planning in cooperation with the committee. C. E. Arney Jr., secretary-treasurer, is in charge of physical arrangements. Arthur C. Stringer is managing the equipment exposition.

Light and heavy equipment exhibits will be held in the Biltmore Hotel display areas, with service displays and some of the lighter gear concentrated in the second-floor sample rooms. Management Conference meetings are to be held in the Biltmore Theatre, adjoining the hotel. Engineering sessions will be in Burdette Hall, diagonally across the street.

Two Luncheon Meetings

The two luncheon meetings will include the combined management-engineering delegates and the banquet, to be held at the Palladium, also to be a joint affair.

A high spot of the management agenda will be the five-city radio market study, conducted under the direction of Richard M. Allerton, NARTB research manager. Results of the extensive inquiry into radio markets will be reviewed by Mr. Allerton and President Fellows. Also taking part in the Wednesday afternoon session at which the market study will be presented will be Paul W. Morency, WTIC Hartford, and Mr. McCollough.

Radio station sales problems will be analyzed at the BAB Tuesday afternoon meeting, with BAB showing dramatically how to sell time and attract sponsors. FM's special problems will be reviewed at the Tuesday morning workshop.

Radio program discussion is scheduled Thursday afternoon concurrently with a labor workshop. These will be followed by separate merchandising and sports-public events panels.

A new feature Friday morning following the FCC panel will be a trade press session at which Mr. Richards will preside.

Mr. McCollough will formally open the Management Conference Wednesday morning. He will present Judge Justin Miller, NARTB board chairman and general counsel. After preliminaries the keynote award will be made and the keynote speech delivered.

Tuesday morning's TV meeting will be of a business nature for TV member stations. TV directors whose terms expire at that time are: William Fay, WHAM-TV Rochester; Campbell Arnoux, WTAR-TV Norfolk, Va.; Kenneth L. Carter, WAAM (TV) Baltimore; Henry W. Slavick, WMCT (TV) Memphis. The four vacancies will be filled at the meeting.

Thursday morning is strictly television. Thad

ENGINEERING chiefs of five networks took part in selection of papers for NARTB Engineering Conference to be held during convention week, April 28-May 1. Meeting of guidance committee included (l to r): A. James Ebel, WMBD Peoria, Ill.; Rodney D. Chipp, DuMont TV Network engineering director; William B. Lodge, CBS engineering vice president; O. B. Hanson, NBC vice president and chief engineer; Raymond F. Guy, NBC manager of radio and allocations engineering, committee chairman; Neal McNaughten, NBC engineering director; Frank Marx, AB-PT engineering vice president; E. M. Johnson, MBS engineering and station relations vice president; Absent, Carl G. Nopper, WMAR-TV Baltimore.

* * *

Brown, NARTB TV vice president, will submit his report, to be followed by a uhf panel and discussions of TV code and film problems. John E. Fetzer, WKZO-TV Kalamazoo, Mich., chairman of the NARTB TV Code Review Board, will lead the code discussion. Robert D. Swezey, WDSU-TV New Orleans, will preside at this session in his capacity as TV Board chairman.

Pre-registration fee for the Management Conference is $35, with $25 for the Engineering Conference and $15 for the ladies program. Saving of $2.50 in registration can be obtained up to April 15. NARTB is exclusive agent for all rooms in the Biltmore and Statler.

Topics to be featured at the engineering agenda include remote control of transmitters, uhf, antennas, lens, TV boosters, AM signals, from high TV towers, studio lighting, personnel problems, TV tape recording, panel on low-budget TV operations.

One of the papers that is attracting advance attention deals with a plan for technical operation of TV stations, using a staff of two. Neal McNaughten, NARTB Engineering Dept. manager, is making arrangements with the help of a guidance committee (see photo). A West Coast arrangements committee consists of Les Bowman, CBS Los Angeles, chairman; A. E. Towne, KPIX (TV) San Francisco; R. E. Arne, KHJ Los Angeles; C. W. Mason and H. L. Blatterman, KFI Los Angeles, and P. G. Caldwell, AB-PT Los Angeles.

Running all that week at the Statler Hotel in Los Angeles will be a convention of the Society of Motion Picture & Television Engineers. Many of the NARTB technical delegates will attend the SMPTE Wednesday evening banquet.

Mr. McNaughten said the Guidance Committee was able to select only a small portion of the papers considered for the NARTB technical sessions.

Papers to be Read

Papers to be read at the engineering discussions were tentatively listed as follows:

"Automatic Station Operation," Ross Snyder, Ampex Electric Corp.; "UHF Television Waveguides," J. S. Brown, Andrew Corp.; "Contouring of TV Antenna Patterns," L. O. Krause, General Electric Co.; "Methods of Controlling the Vertical Pattern on uhf and vhf Antennas," L. J. Wolf, RCA; "Television Antennas," ABC; "Studio Zoomar for TV Cameras," Dr. Frank G. Back, TV Zoomar; "Remote Control of FM 10 kw Transmitter," Ben Akerman, WGST Atlanta; "Operation and Installation Problems of Remote Control Equipment," Rust Industrial Co.; "Proof of Performance Measurements for Television," Rodney D. Chipp, DuMont TV Network.

"Experimental Booster Station for WSM-TV," John H. DeWitt Jr., WSM-TV Nashville; "High-Efficiency AM Radiation From High TV Towers," Glenn Gillett; "Tower Maintenance,"

Roger Hayden, Dresser-Stacy Co., Ideco Div.; "Approved Wiring and Control Methods for TV Studio Lighting," Herbert A. Kliegl, Kliegl Brothers; "How to Set Up a TV Technical Operation With Two Persons," A. J. Baracket and J. Valentine, Federal Telecommunication Labs.; "Flying-Spot Scanner for Opaques and Film," G. R. Tingley and J. H. Haines, Allen B. DuMont Labs.; "Transistors," Bell Labs.; "Developments in Application of Transistors," A. A. Barco, RCA; "Television System Measurements," Roy Montfort, NBC.

"New Developments in Television," Neal McNaughten, NARTB; "Video Tape Recording," John Mullin, Bing Crosby Enterprises; "Requirements for High-Quality TV Film Projectors," W. E. Stewart, RCA; "Projector Maintenance and Test Films," Fred Whitney, SMPTE, and Paul Huhndorf, KPRC-TV Houston; "Development of Staticon Camera," L. L. Pourciau, General Precision Lab.; "CBS Television City Audio and Video Facilities," R. S. O'Brien, R. B. Monroe and P. E. Fish, CBS.

"National Television System Committee (NTSC) Color Television," Dr. W. R. G. Baker, NTSC chairman, General Electric Co. (I. J. Kaar, GE, alternate); "Conelrad," FCC Comr. George E. Sterling (Conelrad officials will be available for discussion); Symposium on "Low Budget TV Operation" James L. Middlebrooks, KING-TV Seattle, arbiter; Leroy E. Kilpatrick, WSAZ-TV Huntington, W. Va.; Joe Herold, KBTV (TV) Denver; others to be named.

17½ ACRES OF SERVICE!

With 17½ acres of modern film production facilities, Alexander Film Co. offers the advertiser and agency the world's most complete film commercial service! Sponsors who order the series receive six months exclusive, unlimited use of the films in the TV market or markets selected. . . . First come, first served. For complete information write ALEXANDER FILM CO., COLORADO SPRINGS, COLO.

Ford Fund Antes $20 Million For Civil Liberties Studies

FORD Foundation announced Wednesday it has allocated $15 million for studies on civil liberties in America, which is expected to include an examination of censorship, and blacklisting and boycotting activities in radio and television as well as other fields.

A foundation spokesman in New York said Thursday the general subject of censorship, boycotting and blacklisting will be explored under the program but specific areas of study have not yet been defined. He added he was "reasonably sure that radio and TV problems would be covered."

The appropriation will be administered by the Fund for the Republic, an independent agency of the foundation established in December. Paul G. Hoffman, the foundation's retiring president, will be chairman of the new fund's board of directors.

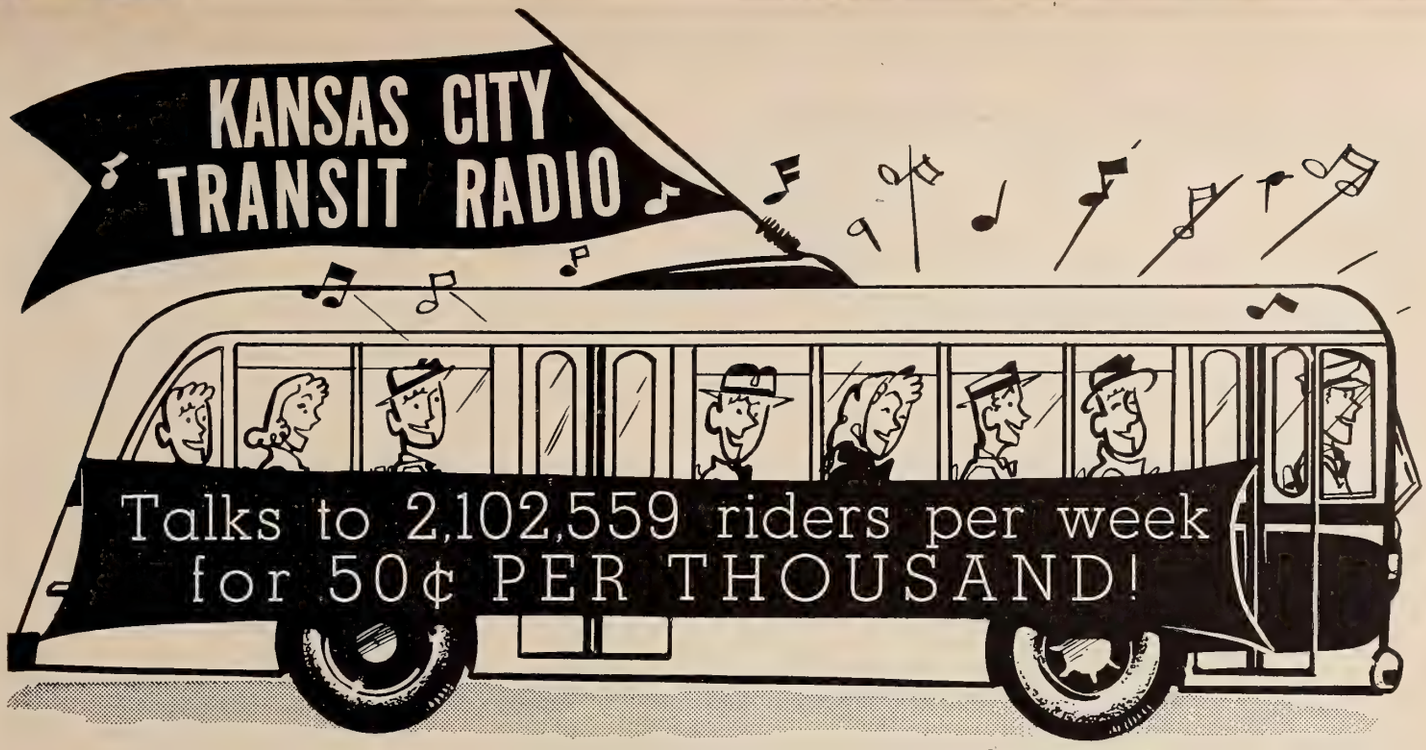
The foundation said the Fund for the Republic will try to eliminate restrictions on freedom of thought, inquiry and expression and "restore respectability to individual freedom." Other immediate projects will be studies on restrictions and assaults upon academic freedom, due process and equal protection of the laws and protection of the rights of minorities. The foundation noted workers will examine communist influence in the nation, because communism is "the major factor affecting civil liberties today."

Oregon Broadcasters Elect McCready Pres.; Discuss Sales

S. W. McCREADY, KUGN Eugene, Ore., was elected president of the Oregon State Broadcasters Assn., at a winter meeting. At the February sessions, devoted largely to sales problems, the state's new, relaxed rules on beer and wine radio advertising were explained. Rules had limited hours of broadcast devoted to alcoholic beverage advertising, and they were relaxed after a seven-year association campaign.

New selling formula was presented by Alan Torbet, general manager, KFSO San Francisco, and the success story of Sunny Jim peanut butter was delivered by Dave Crockett, radio-TV director, Mac Wilkins, Cole & Weber, Seattle.

Resolutions were approved favoring a new journalism building at the U. of Oregon and expansion of association activities in the coverage of high school athletics.



Others elected for 1953: Paul Walden, KODL The Dalles, vice president; Joe Schertler, KEX Portland, treasurer; directors, Jennings Pierce, KMED Medford, and Dick Maguire, KYJC Klamath Falls.

Ala. Broadcasters to Meet

NEW OFFICERS will be elected at the annual spring meeting of the Alabama Broadcasters Assn. in Florence March 26-28. Thomas E. Martin, WAPX Montgomery, is president of the group, working with Richard B. Biddle, WOWL Florence, on convention plans.

Penna. Meet May 19-21

ANNUAL convention of the Pennsylvania Assn. of Broadcasters will take place at the Bedford Springs Hotel, Bedford, Pa. May 19-21. Roger W. Clipp, general manager, WFIL Philadelphia, is president of the group.

SRA'S 'CRUSADE FOR SPOT RADIO'

Organization's John Blair and Tom Flanagan urge stations to contribute funds to be used to employ another salesman and to conduct clinics.

INVITATIONS to radio stations to join with Station Representatives Assn. in a national "Crusade for Spot Radio" are in the mails.

They were sent over the weekend from SRA headquarters in New York. The letters are signed by John Blair, president of SRA and head of his own radio and TV station representative organization, and by Tom Flanagan, SRA's managing director.

Citing SRA's accomplishments in its five-year existence, the letter reports the feeling of SRA's 14 members that "we haven't done enough" and attributes failure to a lack of funds, "in spite of the fact that some of our members individually contribute nearly $10,000 annually to the association."

SRA proposes that each station contribute to the crusade one-half of its one-time, one-minute announcement rate, per month. It suggests that payments be made quarterly, or annually, in advance, starting as of March 1, 1953.

If the individual radio station operators accept SRA's invitation to join in a Crusade for Spot Radio, SRA states, "One primary purpose will be to employ a top-flight radio salesman who will devote all his time to selling spot radio to advertisers. To aid him in this work, we plan to use part of the funds to provide him with a brand new spot radio presentation which will be so designed that it will be slanted to the peculiar problems of each advertiser who sees it."

The work of this salesman would be added to that of Mr. Flanagan, who will continue his present practice of making presentations to advertisers, SRA explained. SRA also plans to expand the activities of its Chicago Council, inaugurating spot clinics in that area and calling on all spot radio prospects there. Comprehensive quarterly reports on activities will be made to all subscribing stations.

Answering the obvious question as to how the proposed SRA Crusade will fit in with the efforts of BAB to sell radio, SRA lauds BAB for doing a "good job," noting in passing that many SRA members are also BAB subscribers, and admits that "there may be some overlap in what BAB is doing and what we propose to do."

But, SRA declares, "We see no fault in this, since the more sales effort that is devoted to radio, the more sales we are going to make."

Disclosure of SRA's plans brought from William B. Ryan, president of BAB, a statement that BAB favors "any effort" that will increase the number of national radio advertisers and their expenditures and also that BAB's own presentations in this area have steadily increased and shortly will be tripled. Outlining BAB's plans along the same lines, he said:

"The concentrated work of the sales staffs of spot representative organizations, SRA, and the networks sales staffs are all necessary to solve the fundamental problem—developing more national advertisers who believe in radio as their primary advertising tool."

Treynor Promoted, Succeeds Stubblefield at NARTB

WILLIAM K. TREYNOR last week was promoted to manager of the NARTB Station Relations Dept. following resignation of William T. Stubblefield, who joins Blackburn-Hamilton Co., radio-TV-newspaper brokers.

Mr. Stubblefield's resignation was announced Thursday at NARTB. Simultaneously, it was disclosed that Mr. Treynor, assistant station relations manager and head of the West Coast office in San Francisco, has been named to fill the vacancy.

Effective March 15, Mr. Stubblefield joins Blackburn-Hamilton as a member of the firm, which has offices in Washington, Chicago and San Francisco. Partners in the firm are James W. Blackburn and Ray V. Hamilton. Mr. Stubblefield is to headquarter in the Washington office, located in the Washington Bldg.

NARTB's station relations work was taken over by Mr. Stubblefield Dec. 1, 1951. He succeeded John F. Hardesty when the latter went to BAB in New York.

Mr. Treynor was an account executive at WTOP-TV Washington before joining NARTB Dec. 26, 1950, a few months after the station relations department was organized. He entered radio in 1939 at WOL Washington.

Texas Group to Meet

DISCUSSION of TV's impact on aural broadcasting will feature the March 16 meeting of Texas Assn. of Broadcasters, meeting at Commodore Perry Hotel, Austin. Boyd Kelley, KTRN Wichita Falls, is TAB president.

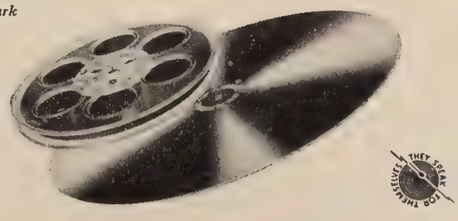
. . . and over 43% used **audiotape**† *for the original sound!*



Like Audiodiscs and Audiotape, this record speaks for itself.

Of the thirty top hit records of the year, all but one were made from Audiodisc masters! And that *one* — a London Record — was made abroad.

It is significant, too, that the original recordings for over 43 per cent of these records were first made on Audiotape, then transferred to the master discs. This marks a growing trend toward the use of Audiotape for the original sound in the manufacture of fine phonograph records.

Yes — Audiodiscs and Audiotape are truly a record-making combination—in a field where there can be no compromise with Quality!

NEW TV GRANTEES BEGIN AIR PLANS

Most of the 19 new TV CP holders look to operation before next fall. Pre-freeze stations plan power or program increases while post-freeze grantees aim for air debuts.

MOST of last week's 19 new television station grantees (see story page 44) do not expect to get on the air before next fall.

The most optimistic report came from Pittsburg, Kan., where KOAM, vhf Ch. 7 grantee, said an Aug. 1 starting date was contemplated. RCA equipment is specified. KOAM (AM) is affiliated with NBC. No decision yet has been reached on station representation.

E. D. (Dee) Rivers Jr., president of WGOV-TV Valdosta, Ga., uhf Ch. 37 permittee, said his station plans a late summer or early fall starting date, contingent upon RCA equipment delivery. Southern Television & Radio Sales Inc., Atlanta, Mr. Rivers' own representative firm which serves about 100 southern stations, also will represent WROV-TV. Network affiliation is to be determined.

William M. Dawson, general manager of WARM Scranton, Pa., which was granted uhf Ch. 16, said the on-the-air date is early fall. National representative will be George P. Hollingbery Co. Equipment is to be General Electric. Network plans are not yet formulated, Mr. Dawson said.

Harry S. Hyett, general manager of WEAU Eau Claire, Wis., said that the contemplated starting date for the vhf Ch. 13 station is this fall. George P. Hollingbery will be the national representative, Mr. Hyett said, and conferences are scheduled within a fortnight to arrange network affiliation. RCA equipment is specified.

B. T. Whitmire, general manager of WFBC Greenville and an official of the Inter-City Advertising Co. of Charlotte, N. C., uhf Ch. 36 grantee, stated a fall target date has been set. Equipment will be either RCA or DuMont, he said, with The Bolling Co. Inc. as national representative. Network affiliation has not yet been negotiated.

KIFI-TV's Plans

J. M. Brady, president and general manager of KIFI-TV Idaho Falls, Idaho, new vhf Ch. 8 grantee, said the starting date was planned for late this year. Network affiliation will be with ABC, but national representative and make of equipment have not been determined, he reported.

Pocatello Plans

Frank Carman, president of Eastern Idaho Broadcasting & Television Co., Pocatello, Idaho, said his station, granted vhf Ch. 10, expects to be on the air by spring of 1954. George P. Hollingbery will be the station's representative and RCA equipment will be used.

Ed Craney, a partner in Television Montana, which received the vhf Ch. 6 grant for Butte, Mont., declared that consideration was being given to modification of the plans for the installation in order to provide more effective service in the area. Consequently, he said, no target date has been set for beginning operation.

WOW-TV Omaha, claiming to be first in its area and saying it is the sixth outlet in the nation to do so, increased to 100 kw maximum power last Tuesday. Shown during final adjustments are (l to r) Frank P. Fogarty, general manager; Bill Kotera, chief engineer; Lyle DeMoss, assistant general manager, and Frank Porter, RCA field engineer. The boost completes WOW-TV's $110,000 expansion, which included increase to 28 kw last December.

T. V. Taft, treasurer of El-Cor Television Inc., Elmira, N. Y., uhf Ch. 18 permittee, reported that the starting date is unknown. DuMont equipment will be used, he declared, and national representative will be Everett-McKinney. There are no plans for network affiliation, he said.

While last week's new grantees busied themselves by signing equipment contracts and arranging for network affiliation and national representation, pre-freeze stations either were planning to increase power or expand programming while post-freeze stations were concerned with getting on the air.

WOW-TV Omaha, Neb., last Tuesday began regular program service with 100 kw effective radiated power (visual). The station tested its maximum power a week ago Friday, and went to the maximum power allowed by FCC on vhf Ch. 6 during the *Camel News Caravan* program Feb. 24 at 6:45 p.m. CST.

Frank Fogarty, general manager of WOW-TV, claimed the station is the first in Omaha to boost its power to the maximum allowable, and he believes the station is the sixth in the nation to do so. "Viewer response, Mr. Fogarty said, has been most gratifying."

Lee Higgins, manager of KTNT-TV Tacoma, Wash., said that his station was to begin commercial programming yesterday (Sunday).

WKNB-TV's Coverage

Peter B. Kenney, manager of WKNB-TV New Britain, Conn., reported that the most rapid growth of a uhf television audience in the U. S. is taking place in the greater Hartford area served by his uhf Ch. 30 station.

According to Mr. Kenney, an actual count, completed last Wednesday, among officials of all distributors of leading makes of TV sets and converters in the Hartford area, "authenticated by sworn statement, shows 36,647 sets in WKNB-TV's coverage area now equipped for Ch. 30 reception."

In order to get on the air sooner, the KGNC-TV Amarillo, Tex., board of directors last week decided to order an RCA 2 kw transmitter with a single-bay antenna instead of waiting for equipment which would allow operation

It's So Easy to Listen to WBNS

Central Ohioans set their dials at WBNS and relax. More Central Ohio people listen to WBNS than any other station. Popular staff personalities, plus top CBS programs add up to the *20 top-rated programs* and hour after hour of listening pleasure. Sponsors profit more when they reach this big audience of steady listeners.

ASK JOHN BLAIR

COLUMBUS, OHIO

— Robert M. Feemster, Chairman of Exec. Comm., Dow-Jones & Co., Inc.

"You can't sit on the news!"

In 1940, The Wall Street Journal circulation was 29,000. Today it's 255,000 —and still climbing!

"Like any news," said Chairman Robert M. Feemster, "news of business is worthless unless it's fresh!

"We set out to make The Wall Street Journal the truly *national* business daily —one that would reach executive desks all over the country on the same morning. We first decentralized our printing plants—publishing in New York, San Francisco, Chicago and Dallas. But we still couldn't deliver fresh news from these points without the fastest, most *reliable* shipping service.

"That's why we called in Air Express.

"Now, 6500 pounds of Wall Street Journals go Air Express daily. Only hours later they're in a score of other major cities. And on practically every shipment, Air Express rates are the *lowest in the field.*

"We knew we could build circulation. We knew we had the news and features vital to American business. Our problem is to deliver the papers! Air Express helps solve it! If you're building circulation or sales, look into Air Express rates and benefits."

Represented by: HEADLEY-REED CO.

with an ERP of 10 kw visual. With the expected early delivery of the 2 kw transmitter, the vhf Ch. 4 station expects to begin airing a test pattern about the middle of March, with programming scheduled for one week later, according to Tom Kritser, KGNC-TV general manager. The temporary transmitter location will be atop the Amarillo First National Bank, Mr. Kritser said. He hopes for 100 kw operation by mid-summer from an 833 ft. tower. KGNC-TV network affiliation will be with NBC and DuMont, according to Mr. Kritser.

Target dates for the three stations owned by Jacob A. Newborn Jr. were announced by John Summerfield, program manager of the trio, last week. Mr. Summerfield said KBMT (TV) Beaumont, Tex., was aiming for an April 1 start; representative will be O. L. Taylor Co. KETX (TV) Tyler, Tex., should be on the air June 1, and WTVS (TV) Gadsden, Ala., is aiming for Aug. 1. Representative for WTVS (TV) is to be Weed Television. General Electric equipment is planned for all three stations.

James E. Gordon, vice president and general manager of WJMR-TV New Orleans, uhf Ch. 61 grantee [B•T, Feb. 23], said that national representative would be The Bolling Co.

Robert R. Tincher, general manager of KVTV (TV) Sioux City, Iowa, vhf Ch. 9 grantee, said the station would be affiliated with the DuMont network, in addition to CBS-TV.

WKST-TV New Castle, Pa., uhf Ch. 45 permittee, expects to begin its test patterns the second week in March. A. W. Graham said that the station, which will start with an ERP of 20.8 kw, to be increased upon delivery of a high power transmitter later in the year to 208 kw, will serve the Pittsburgh-Youngstown territory, having within its primary coverage area a population of 680,000 persons.

Mr. Graham said figures furnished by major set distributors show an increase in the last 20 days of 502 uhf homes per day in the WKST-TV primary coverage area. He said that from Jan. 10 to Feb. 17, the number of uhf homes increased from 3,973 to 20,765.

The station's RCA transmitter is now being installed, Harry W. Reith, WKST-TV production manager, reported.

WCOV-TV Montgomery, Ala., grantee for uhf Ch. 20, said all equipment deliveries are on schedule with the exception of an RCA uhf antenna, but that the station hopes to get a test pattern on the air by late March.

The WCOV-TV Stainless Tower was to have been completed yesterday (Sunday). The first section of the tower was erected Feb. 19.

John W. Boler, president of KCJB-TV Minot, N. D., vhf Ch. 13 permittee, said the station may be on the air April 1 with the use of temporary facilities.

FACING KRON-TV San Francisco cameras at a special telecast when the station increased its power to 100 kw, are (l to r): Walter L. Eggert, president, Oakland Chamber of Commerce; Harold P. See, station manager, and J. W. Mailliard III, president, San Francisco Chamber of Commerce.

* * *

KCJB-TV has considerable equipment on hand, with the balance in transit, and with favorable weather conditions is in a position to begin telecasting at an early date, while permanent installations are being constructed south of Minot, Mr. Boler declared.

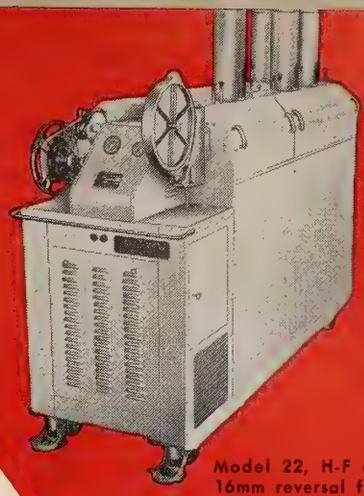
The station will be a primary CBS affiliate.

Philip Merryman, president and general manager of WICC-TV Bridgeport, Conn., stated last week that a television audience survey of the metropolitan Bridgeport-New Haven markets shows that WICC-TV will receive widespread acceptance. Mr. Merryman, citing statistics contained in the results of a survey conducted by Froman Market Research, said set ownership saturation ranged from 45% in Newton to 85% in Norwalk, with 70% in Bridgeport. He said that 75% of these sets probably will be converted to receive WICC-TV within the next year.

WGLV (TV) Easton, Pa., named Headley-Reed Co. as its national representative.

WHUM-TV Reading, which began operation on uhf Ch. 61 a week ago [B•T, Feb. 23], is operating from 11 a.m. to 11:30-12 midnight weekdays and from noon until 11:30-midnight Sundays. Station is a CBS-TV affiliate.

* * *



INSPECTING new amplifier which will boost WOAI-TV San Antonio's power to 100 kw, upon installation in mid-March, are (l to r) Al Hilstrom, TV supervisor; Charles L. Jeffers, enginering director, and Arden X. Pangborn, general manager.

Welcome to the Radio Engineering Show—

March 23-26, 1953
at New York City

19 IRE Professional Groups have prepared skillfully organized symposia and technical sessions on all phases of radio, TV, and electronics. These papers will keep you up-to-the-minute on the developments which are to come in the next few years—for the IRE Convention Theme is:

Radio-Electronics
"A Preview of Progress"

The colorful Annual Meeting on Monday at 10 (opening morning) will feature the "Founders' Award". Social Events include the "Get Together Cocktail Party" Monday, and the Annual Banquet Wednesday, all at the Waldorf Astoria Hotel.

405 Exhibitors are using 58,680 square feet — the entire four floors of Grand Central Palace, to give you a "Preview of Progress" in the apparatus, components and instruments of Radio-Electronics. Registration: IRE Members $1.00, Non-Members $3.00. Register at Grand Central Palace, 47th & Lexington Avenue, or The Waldorf Astoria Hotel, 49th & Lexington Avenue, New York City.

THE INSTITUTE OF RADIO ENGINEERS

Robert M. La Follette Jr., WEMP Chmn., Found Dead

ROBERT M. La FOLLETTE Jr., 58, chairman of the board of WEMP Milwaukee, was found fatally shot at his Washington, D. C., home last Tuesday. The death was pronounced suicide by the coroner.

Mr. La Follette

Funeral services were held Friday at Grace Episcopal Church, Madison, Wis.

Since his defeat for the Senate in 1946 by the incumbent, Sen. Joseph R. McCarthy (R), Mr. La Follette had been an economic adviser and consultant, with offices in the National Press Bldg., Washington.

As board chairman of WEMP Mr. La Follette owned 315.625 shares of a total of 2,525 shares of Class A stock.

Surviving are his wife, Mrs. La Follette; two sons, Joseph Oden and Bronson Cutting, students; his brother Philip, former governor of Wisconsin and now a lawyer practicing in Madison.

KUDL to Begin May 1

CONSTRUCTION has begun on KUDL Kansas City, Mo., which is expected to go on the air with 1 kw on 1380 kc May 1, with its tower at 6200 Independence Ave. and studios at the Baltimore Bldg. David M. Segal, owner, will manage the station, with Bill Simons as chief engineer and Lee E. Baker consulting engineer.

KOKO Warrensburg, Mo., another station to be operated by Mr. Segal, is expected to be on the air in early summer, and together with KUDL and KDKD Clinton, Mo., will form a local network fed from Kansas City, Mr. Segal said.

Webster of McClatchy Dies

NORMAN D. (Hap) WEBSTER, 45, technical director of the McClatchy Broadcasting Co., died last week in St. Joseph's Hospital, Baltimore. He was stricken with a heart attack Feb. 11 while enroute from Washington to Camden, and was taken to the hospital from the train at Baltimore. Mr. Webster and John Hamlyn, general counsel for the McClatchy Broadcasting Co. had been participating in the Sacramento Ch. 10 TV hearings in Washington which began in the middle of November, and which were recessed Feb. 19. Mr. Webster was enroute to RCA regarding the McClatchy TV grant in Fresno, Calif.

As technical director for McClatchy Broadcasting Co., Mr. Webster supervised KFBK-AM-FM Sacramento, KMJ-AM-FM Fresno, KGW Stockton, KERN-AM-FM Bakersfield, KBEE (FM) Modesto, all California, and KOH Reno, Nev.

WTIC Plans to Put AM, FM, TV In New, $2 Million Building

NEW RADIO-TV studio building costing $2 million will be constructed by WTIC Hartford if re-zoning and its TV plans are approved by the Hartford City Council and FCC, respectively. Paul W. Morency, vice president of Travelers Broadcasting Service Corp., has applied for a change in zoning laws to permit construction of the building 2½ miles from the city's center.

The proposed two-story building would occupy 80,000 square feet, including studio space for AM and FM, now housed in Travelers Insurance Co.'s buildings in the downtown area, and for television. Offices and administrative space would surround studios, built around a large glass rotunda enclosing a circular staircase. TV transmitter and antenna would be placed at WTIC's present transmitter site in Avon, Conn.

WTIC filed for a TV grant in 1947, and amended its request after the lifting of the freeze by petitioning for Ch. 3 with 100 kw.

Radio-TV Contribute $5,303,192 in Time to NCCC

DOLLAR value of time contributed by radio and television stations to the Broadcasting and Film Commission of the National Council of Churches of Christ in the U.S.A. during 1952 was estimated by the commission last week at $5,303,192.

This figure was contained in a report by the commission to be presented to its board of managers at the commission's annual meeting in New York tomorrow (Tuesday) and Wednesday.

The report said radio stations and networks granted some $2,355,023 in free time and television stations and network approximately $2,948,169 worth. For the year the total number of commission radio broadcasts were placed at 1,315 and TV broadcasts at 352.

"During 1952, representatives of 21 denominations participated in our programs," the report noted. "The total number of churchmen involved was 565 and the total number of workers, other than churchmen, was 10,728 for a grand total of 11,293 people."

The commission provided material and talent for 75 local and network TV special events programs and for 50 local and network radio shows of this type, according to the report. Singled out for especial cooperation were the *Mike and Buff Show* on CBS-TV, *Jack Berch Show* on ABC radio, and *Strike It Rich* on CBS-TV.

The summary described some 16 radio and TV programs currently produced by the council and offered suggestions for several new shows under consideration for 1953. It stressed that actual production costs of radio and TV programs during 1952 were $184,758 but would have run to $1,543,355 if the shows had been produced commercially.

The report listed overall commission expenses for 1953 at $480,051 and estimated income at $483,610. The budget already has been approved by the general board of the National Council of Churches.

Included on the docket of the annual meeting at tomorrow's session at the Henry Hudson Hotel will be a review of the commission's programs and a dinner meeting address by Harold Fellows, president of NARTB. Highlighting Wednesday's meeting will be election and installation of officers of the commission.

Lambert Named Director of U. of Missouri's TV Operation

APPOINTMENT of Dr. Edward C. Lambert of the School of Journalism, U. of Missouri, as director of the university's TV program, which embraces establishment of a commercial station on Ch. 8 to begin operation in July, was announced last week by the Board of Curators. He will also serve as assistant to the president, Frederick A. Middlebush.

Dr. Lambert, who was promoted from assistant professor to a full professorship in the School of Journalism, will have supervision over both radio and television curricula. He has been with the university for eight years and heretofore has been in charge of the radio sequence at the journalism school, as well as the news department, which includes news broadcasts over the university's AM station, KFRU.

Lester E. Cox, chairman of the Board of Curators and owner of KWTO Springfield, said that announcement of executive staff appointments of the new television station would be forthcoming soon. The station will be operated as a regular commercial entity but with emphasis on education.

WHUM-TV Interconnected

WHUM-TV Reading, Pa., was connected into the Bell System's intercity TV network facilities last Tuesday, getting network programs via a branch microwave channel stemming from the transcontinental microwave system at a radio relay station outside of Philadelphia. With the addition of WHUM-TV, AT&T now serves 121 stations in 77 U. S. cities.

E. P. (Bud) Mills Dies

ELLSWORTH P. (BUD) MILLS Jr., 53, commercial manager of WELL Battle Creek, Mich., died in that city Feb. 22. Mr. Mills had been with WELL since 1949. He was active in local civic affairs, especially boys' clubs. He is survived by his wife, Mrs. Dorothy Lee Mills, and a daughter, Mrs. Robert Rhinard of Eau Claire, Mich.

TV Booster Books Help Finance Crackers' Baseball

FAN FINANCING is offered as a solution to the problem of telecasting baseball games of the Atlanta Crackers on WSB-TV, that city. Earl Mann, Crackers president, is selling TV Booster Books for $5, tickets being good for any four games at the Atlanta park.

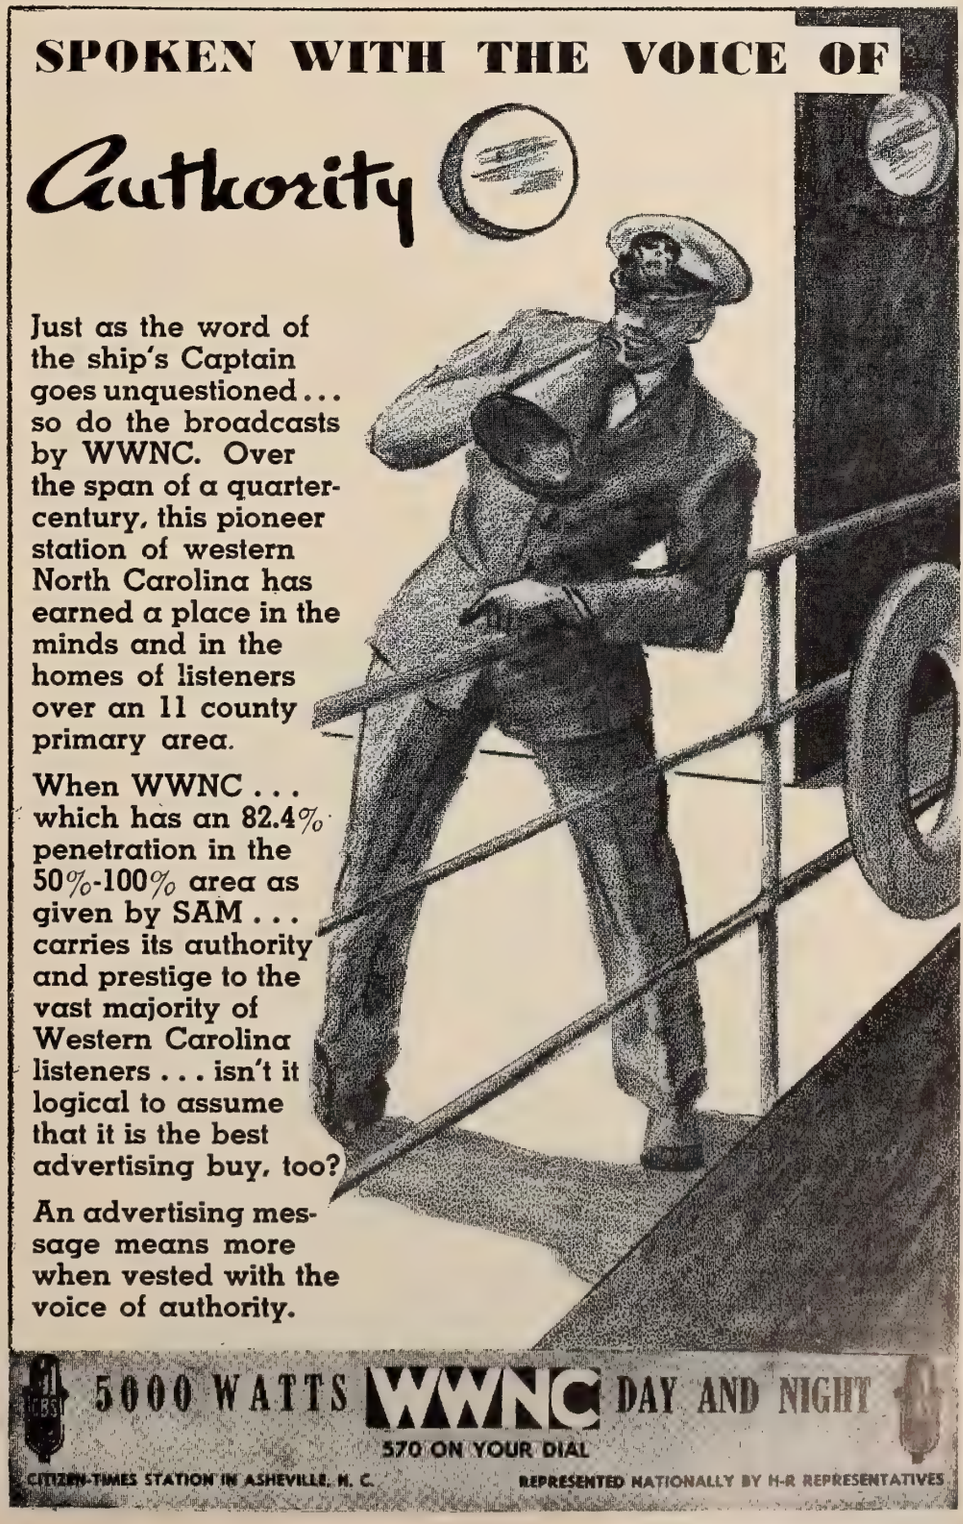
Under sponsorship of the Junior Chamber of Commerce, the public is asked to buy 25,000 of the $5 books. Complete games will be telecast Monday and Wednesday nights and Sunday afternoons, on WSB-TV.

"We know television is here to stay," said Thomas Richardson, president of the Eastern League and member of the minor league television committee, adding, "We hope minor league baseball is, too. But from the people that stay home and still see both, local clubs must have some compensation.

"The television monster—and it can be a marvelous monster—must live with baseball in the minors, and pay some compensation to be a partner. Televising major league baseball into minor league territory has definitely damaged the game. The setup in Atlanta looks good because baseball will get some direct monetary benefits. . . ."

Kane Heads NCAA Committee

NCAA's new TV committee, under chairmanship of Robert Kane, Cornell U., will explore the association's 1953 controlled football TV program at a three-day meeting later this month.



Mr. Kane was named to head the group at a two-day session in Chicago last week. Asa Bushnell, Eastern Collegiate Athletic Conference commissioner, was retained as TV program dirctor. Meetings were at La Salle Hotel.

The TV committee meet in Kansas City March 19-21 will get down to brass tacks. It will hear recommendations and suggestions from members and attempt to put the program into concrete form before submitting it to the full NCAA membership for referendum vote.

Red Cross Drive for Funds Opens With Ike Broadcast

PRESIDENT EISENHOWER yesterday (Sunday) officially opened the 1953 Red Cross fund campaign for $93 million in a message scheduled on all major radio and TV networks at the end of separate half-hour radio and TV shows starring well known figures.

The Red Cross goal, $8 million above last year and highest since the war years, had the support of networks and individual stations which were scheduled to feature or mention the Red Cross appeal on a majority of programs from 7 p.m. yesterday to 7 p.m. today. Also scheduled yesterday was the annual Red Cross broadcast of NBC's *Theatre Guild on the Air*, sponsored by U. S. Steel Co.

Broadcasters Begin Tour Of Europe, Middle East

ABOUT 35 broadcasters and newspaper editors and publishers were scheduled to leave New York by air Friday for a look at the world situation in Europe and the Middle East.

Government officials, including Mutual Security Administrator Harold Stassen, briefed the group in Washington Thursday. The group, each person paying his own expenses, was to visit Germany, Austria, Yugoslavia, Greece, Egypt, Lebanon, Italy, France and Britain. Broadcasters include:

J. Patrick Beacom, WVVW Fairmont, W. Va.; Mr. & Mrs. John Biddle, WHUN Huntingdon, WCPA Clearfield, WAKU Latrobe, all Pennsylvania, and WJCM Sebring, Fla.; Mrs. Martha Hoiles, WFAH Alliance, Ohio; Josh Horne, WCEC Rocky Mount, N. C.; F. Parker Hoy, WLAM Lewiston, Me.; Bennett O. Knudson, KATE Albert Lea, Minn.; Mr. & Mrs. Karl F. Steinmann, WCUM-AM-FM Cumberland, Md.; Mrs. Sarah M. Scanlon, KRJF Miles City, Mont.; A. W. Schweider, KID Idaho Falls, Idaho; Marjorie R. Vickers, KPAC Port Arthur, Tex., and Ronald B. Woodyard, WONE-AM-TV Dayton and WTVQ (TV) Pittsburgh.

KING-TV Signs With NBC

OFFICIALS of KING-TV Seattle have signed a basic affiliation contract with NBC. The station became the primary affiliate in the Seattle-Tacoma area yesterday (Sunday). Plans for a new, 100 kw output are complete, and new equipment is expected to be operating by early summer, station executives report.

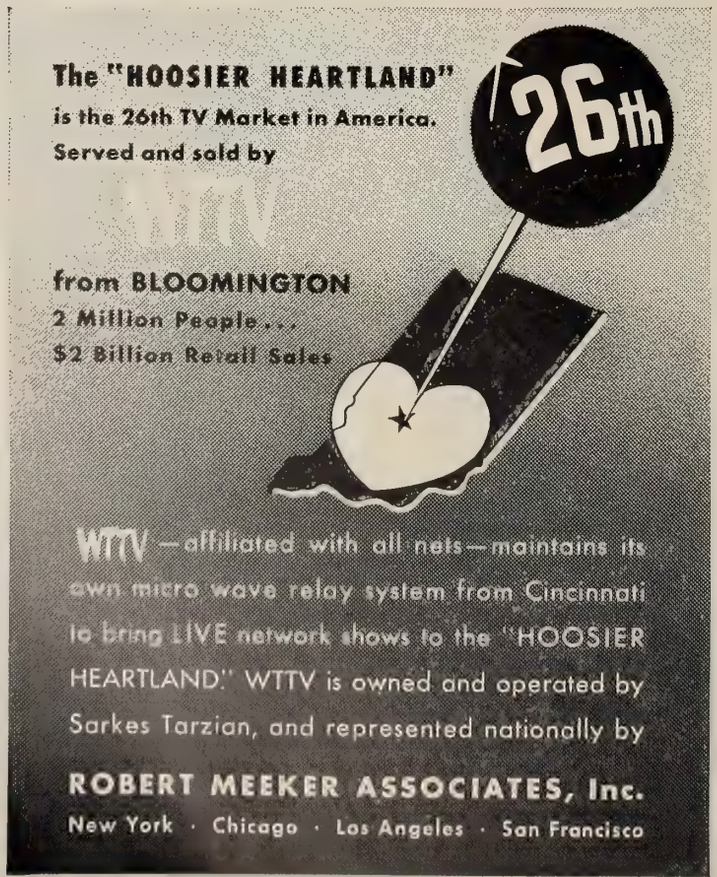
WAVE-TV Hoists Antenna

WHAT it claims to be the largest TV antenna ever completely assembled on the ground—with bat wings, coaxial cable and beacon lights in place—was hoisted last Tuesday to the top of a 500-ft. tower by WAVE-TV Louisville at its new tower site nine miles northwest of that city.

The new RCA six-bay antenna was 120 ft. long and weighed 9¼ tons, and WAVE-TV claims its coverage area will be increased 50% when it changes from Ch. 5 to Ch. 3 in April. A new RCA transmitter will boost the outlet's power from its present 24 kw to 100 kw, the station reports. Tower Engineering Co. Inc. of Houston, Tex., installed the antenna.

Representatives Shorts

Sears & Ayer Inc. appointed national representative by KARE Atchison, Kan.

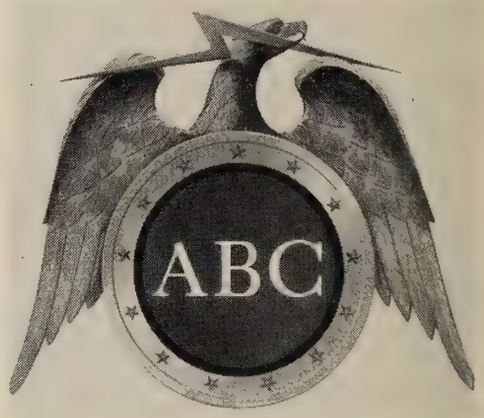


Everett-McKinney Co., N. Y., appointed national representative by KLBS Houston, Tex.

National Radio Representatives, West Hempstead, N. Y., relocates at Empire Theatre Bldg., Glens Falls, N. Y.

Robert S. Keller Inc., N. Y., named New York representative by KPOL Los Angeles.

Everett-McKinney Co., N. Y., appointed representative for WNLC New London, Conn.



Stephens & Towndrow, Toronto, appointed eastern Canadian representative for CHUB Nanaimo, and CJAV Port Alberni, B. C.

It's Now WABC-AM-FM-TV; ABC Also Changes Slides

ABC was set to integrate its network call letters into those of its owned AM, FM, and TV stations in New York yesterday (March 1), changing them from a WJZ base to WABC-AM-FM-TV and at the same time adopting new station identification slides for all five of its owned TV outlets.

The network, still busy on plans for expansion under its new sponsorship and operation by American Broadcasting-Paramount Theatres Inc. [B•T, Feb. 16, 23], also was slated to start use yesterday of a new symbol: An American eagle on a "Federal Mirror," which will be featured on the TV network indentification signature, on ABC equipment and buildings, and on advertising, promotion and other printed material of the network (see cut).

The new station identification slides of ABC-owned stations—WABC-TV, WBKB (TV) Chicago, WXYZ-TV Detroit, KECA-TV Los Angeles, and KGO-TV San Francisco—feature the call letters over a bolt of lightning, symbol of communications, and bear a large "7," the channel number of all five outlets.

The switch of WJZ's call letters to WABC returns that call to New York where, until a few years ago, it was used by CBS' key station, now WCBS.

Stone Succeeds Hede at ABC

ROBERT L. STONE, business manager of ABC-TV's sales department, has been named business manager of the network's television services department, effective today (Monday), succeeding Henry Hede, who was named administrative assistant to the ABC treasurer Jan. 1.

Malcolm (Bud) Laing, business manager of ABC-TV station clearances, will succeed Mr. Stone. In turn, George Smith, manager of ABC-TV's co-op sales department, will replace Mr. Laing as business manager of station clearances for TV.

'Doc Corkle' Settlement

SETTLEMENT of contracts involved in the NBC-TV *Doc Corkle* program, sponsored by Reynolds Metals Co. last fall and cancelled after four weeks, has been completed by Freeman Keyes, packager. Eddie Mayehoff, comedian and star of the short-lived show, reportedly accepted a settlement of $50,000 for his 39-week contract; and Arnold Stang, a supporting player, received $10,000. Other contracts yet to be settled, it is understood, include those of Billie Burke, Hope Emerson and Connie Marshall, and writers Robert Fisher, Devery Freeman and Alan Lipscott.

DECEMBER NETWORK REVENUE UP

Publishers Information Bureau says a big reason for the drop in network radio and TV gross sales is the 10% rate reduction effected by NBC and CBS in mid-1951. Last year's sales were bolstered by about $2 million in political purchases and another $2¼ during conventions and the election.

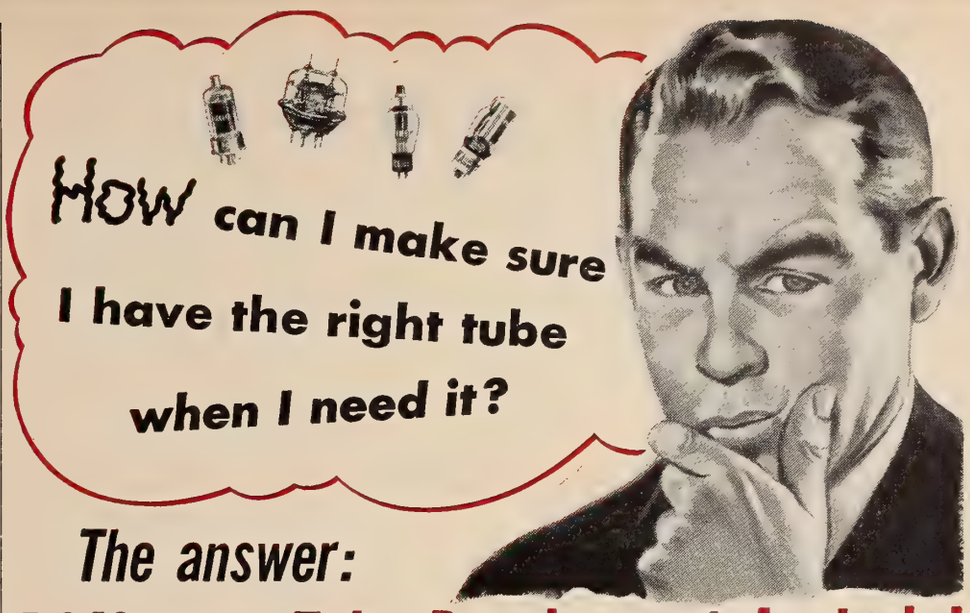
GROSS TIME SALES of the four nationwide radio networks in December were slightly ahead of the gross for December 1951—$14,925,099 to $14,619,048—although the totals for the full years show 1952's gross of $163,453,466 more than $11 million below the 1951 total of $174,718,594, according to data compiled by Publishers Information Bureau.

Explanation, at least in part, is that a 10% reduction in gross rates was effected by CBS and NBC in July 1951, so that all of 1952 business was calculated at the lower rate in comparison to only half of 1951, while both Decembers were figured on the same rate basis. PIB figures are based on one-time rates, before discounts of any kind.

Gap between 1951 and 1952 billings would have been even wider if 1952 had not been a Presidential election year, bringing the networks $1,700,569 revenue (gross) from time sales to the political parties and organizations, and another $2,274,266 worth of time purchased by business concerns which sponsored broadcasts of the political conventions of Democratic and Republican parties and of the election return tabulations, as well as a *Pick the Winner* campaign series sponsored by Westinghouse Electric Corp.

Westinghouse also sponsored convention and election coverage on CBS, as did Admiral Corp. on ABC and Philco Corp. on NBC. General Tire & Rubber Co. and *Farm Journal* sponsored convention newscasts on MBS and General Motors Corp. bought Mutual's election night coverage.

Political groups spent about $250,000 more for periods on radio networks than they did for TV network time [B•T, Feb. 23], contrasted with commercial sponsors of political broadcasts who bought $800,000 more TV than radio network time. In both instances, political expenditures do not completely represent additional network business because many campaign speeches were broadcast in time recaptured from other sponsors and because advertisers buying political programs might otherwise have sponsored other network shows.



In December, Procter & Gamble Co. was,

The answer:

RCA's new Tube Requirement Analysis!

Now you can stop worrying about the possibility of a station shutdown because of tube failure—in the event you have neglected to reorder a key tube type. Now you can also save money by avoiding "overstocks." RCA's new Tube Requirement Analysis gives you smooth control over your broadcast tube requirements.

Get in touch with your RCA Tube Distributor

Give him all the information you can about your electronic equipment, the tube types involved, and your special requirements. In this way, you bring him up to date on the services in which your tubes are operated.

He analyzes your needs

Then your RCA Tube Distributor can prepare a record of movement on each tube type required for your station equipment—can study *your* specific tube requirements.

He recommends a plan for YOU

Now, your RCA Tube Distributor presents a tube inventory plan—simplified and "tailored" specifically to your operations. He keeps up to date on your inventory . . . and backs it up with inventory service on his end, too! No overstocking. No shortages. Yet you can be sure you have the right tube—when you need it!

RCA's new Tube Requirement Analysis is available exclusively through your local RCA Tube Distributor. Call or write him, today. There is no charge or obligation for this service.

Mickelson Defends Rights Of Radio-TV in Courts

RADIO and television has a right to cover all events in the public interest, Sig Mickelson, CBS-TV director of news and public affairs, declared Friday at a day-long Fair Trial Free Press Conference of the New York County Lawyers' Assn.

Mr. Mickelson represented radio and television in a panel on the law and the press in general, including radio and TV.

Mr. Mickelson asserted that the "collision which occasionally occurs between the courts and the press is a contest, not between right and wrong, but between two rights."

He declared radio and television were not strongly concerned with coverage of court trials, as are the printed media, saying structures of the media are such that protracted trial coverage is not likely. But he said the broad subject was of paramount concern to radio and TV because of "legislation, hearings and investigations which accompany the framing and execution of laws."

NBC Promotes Heilweil

PROMOTION of Murray Heilweil, assistant manager of NBC's merchandising department, to the newly-created post of manager was announced Wednesday by Fred N. Dodge, director of the department. Mr. Heilweil joined NBC's merchandising department as assistant manager in Jan. 1952 at the time of its organization. He served previously for six years with the *American Weekly* as assistant to the merchandising director.

Mr. Heilweil

New DuMont Stations

AFFILIATION of four new TV stations with DuMont Television Network was announced Feb. 20 by Elmore B. Lyford, DuMont's director of station relations. Bringing DuMont's total to 94, new affiliates are:

KTNT (TV) Tacoma, owned and operated by *Tacoma News-Tribune*, scheduled to go on air on vhf Ch. 11 March 1; WPAG-TV Ann Arbor, Mich., owned and operated by Washentaw Broadcasting Co., uhf Ch. 20, March 15; KAFY-TV Bakersfield, owned and operated by Bakersfield Broadcasting Co., uhf Ch. 29, May 1, and KTTS-TV Springfield, Mo., owned and operated by Independence Broadcasting Co., vhf Ch. 10, March 1.

CBS Signs WHYN

SIGNING of WHYN Holyoke, Mass., as affiliate of CBS Radio, effective June 15, was announced Feb. 20 by William A, Schudt, network vice president in charge of station relations. Station, on 560 kc with 1 kw and currently affiliated with Mutual.

CBS-TV New Affiliates

SIGNING of two new affiliates by CBS-TV—KEYT (TV) Santa Barbara, Calif., and WBAY-TV Green Bay, Wis.—was announced by the network last week. Both will be primary supplementary noninterconnected affiliates, effective March 15 for WBAY-TV and April 1 for KEYT. KEYT, assigned vhf Ch. 3, is owned by Santa Barbara Broadcasting and Television Corp. Harry C. Butcher, owner of KIST Santa Barbara, is chairman of the board. WBAY-TV is owned by the Norbertine Fathers, licensee of WBAY, and is assigned vhf Ch. 2. Hayden R. Evans is general manager.

KGNC-TV to Join NBC

KGNC-TV Amarillo, currently under construction and slated to commence operations March 18, last Thursday signed for affiliation with the NBC television network. KGNC-TV is owned by Plains Radio Broadcasting Co., licensee of KGNC, and is headed by B. E. Walker.

NBC SALES ARE 23% OF '52 RCA INCOME

RCA annual report shows record profits, taxes. NBC signed 16 radio, 6 TV affiliates in '52.

NBC SALES totaled $162,561,000 in 1952, a new record high that topped the 1951 record by 18.4% and accounted for 23.4% of RCA's total income of $693,941,000, according to RCA's annual report, distributed last Friday.

RCA's 1952 gross represented a 15.9% increase over the 1951 gross of $598,955,000. Profit before taxes was $67,362,000 in 1952, up from $62,033,000 in 1951 but representing only 9.7% of the gross, whereas the 1951 profit amounted to 10.4% of that year's gross. Net profit, after taxes, was $32,325,000, 4.7% of the gross and $2.52 per share of common stock. In 1951 the net was $31,193,000, 5.2% of the gross and $2.22 per common share.

Total RCA taxes for 1952 were $66,607,000 up 7% above 1951. "In relation to earnings, this was the largest amount for any year since the end of World War II," RCA reported.

Preferred dividends of $3,153,000 ($3.50 per share) were declared during 1952, and common dividends of $13,858,000 ($1 per share). At the end of the year there were $181,605 RCA stockholders: 13,421 holders of preferred stock and 168,184 holders of common.

Discussing the 1952 activities of NBC, the RCA report noted that during the year 16 stations joined the radio network, bringing the total to 206, and six new TV affiliates were added to give the NBC-TV network a total of 70, with 13 more signed who are expected to go on the air early this year.

NBC's Integration

Integration of NBC's radio and TV operations "permitted the consolidation of many positions and other economies in the use of personnel," the report stated, but expansion of NBC operations, particularly in TV, found NBC in December with more than 4,200 regular employes, approximately 100 more than in December 1951.

Radio and TV network gross time billings were "higher than in any previous year," the report said. "The stations owned by NBC also established an all-time record in sales volume for the group."

Work on transistors, uhf equipment and color TV, performed by RCA laboratories in cooperation with the engineering staffs of NBC, RCA Victor and other RCA divisions, highlighted the section devoted to RCA Labs.

RCA Victor, the corporation's manufacturing division, in 1952 had its biggest year in sales of products and services, the report stated. Despite government controls on materials, the number of TV sets sold during the year was about the same as in 1951, although "dollar volume was down slightly because of lower prices." Although TV's rising popularity "resulted in an industry-wide decline in the sale of radio receivers, RCA Victor's preeminence in the field was maintained and strengthened."

A complete range of equipment for uhf transmission and reception was in production by the end of the year, including three types of uhf selectors and a combination vhf-uhf tuner, and a uhf oscillator tube for TV receivers, as well as two uhf transmitting tubes. Increased sales of TV station equipment were the main cause of an increase of more than 20% in commercial sales of engineering products in 1952 over 1951.

Raytheon Explains Uhf

RAYTHEON Television and Radio Corp. claims a "first" by telecasting TV set servicing information to the public via WFPG-TV Atlantic City.

The one-hour public service telecast was aired a fortnight ago by Willis L. Ashby of Raytheon's sales engineering and service department with the cooperation of William King, coordinator of audio-visual education for the New Jersey Dept. of Education.

Material was based on Raytheon's service training program, "How to Interpret What You See in Uhf," and was telecast by WFPG-TV, credited with being the first factory-built uhf outlet in the nation to go on the air.

AT&T Boosts Net Income

NET INCOME of AT&T during 1952 was $358,493,204, compared with $326,944,708 during 1951, the company disclosed in its annual report last week. Earnings per share were $10.09, compared with $10.54 per share in 1951.

Cleo F. Craig, AT&T president, reporting on new radio relay and coaxial cable systems, pointed to development by Bell Labs. of the transistor, the tiny electronic device which, he explained, "can do many things that vacuum tubes do and many more besides."

Multi-TV Trend Continues

DEFINITE trend to two and three-television receiver homes, with an increase in the number of multi-TV set homes following the pattern of radio 20 years ago, were noted last week by Dan D. Halpin, general sales manager of the receiver division, Allen B. DuMont Labs. Mr. Halpin said two to three million sets of the current 22 million already are second sets, and only 2% of families purchasing new receivers turn in their sets. The old receiver goes to the children, in a recreation room or perhaps a bedroom, he added.

DuMont Quarterly

BOARD of directors of Allen B. DuMont Labs. has declared regular quarterly dividend of $0.25 per share on 5% cumulative convertible preferred stock payable April 1 to stockholders of record at close of business March 16.

Western Electric Income

WESTERN Electric Co., New York, announced Friday that total gross income for the year ended Dec. 31, 1952, amounted to $1,318,979,725 as against $990,520,773 for the corresponding period in 1951. Net income for 1952 was $47,081,705 as compared with $45,812,205 in 1951.

WGN-TV Using New Lens

WGN-TV Chicago now is operating the first of two electrically controlled Walker Electro Zoom lenses, designed especially for studio use. It has proved very effective on news programs and panel shows, according to engineers and directors. Device permits a single stationary camera to switch from a closeup to a wide-angle shot and may be adjusted to positions ranging from 8 to 100 feet.

60 Attend RCA Victor's Video Clinic at Camden

WEEK-LONG TV clinic opened Thursday by RCA Victor Div. at its Camden, N. J., plant was attended by more than 60 broadcast engineers who toured the firm's new experimental studios and laboratories for development of broadcast studio equipment.

The engineers, including two from Japan and several from Canada, witnessed demonstrations in the firm's new experimental broadcast studios. Included also are two control rooms, an auxiliary control room, a film projection room and a power supply room.

The laboratories visited included systems, audio, film projection, advanced development, microwave, camera, advanced video development and terminal equipment.

CBS-Columbia Ad Plans

ADVERTISING program plans for the first six months of 1953 for CBS-Columbia television sets are complete, Gerald Light, advertising director, said last week. The advertising and promotion budget will be the highest in relation to sales in the industry, he said. "No media will be ignored" and radio and TV spot campaigns will be part of the plan, he said. An agency representative of Ted Bates Inc., New York, said no starting date is set for spot activity.

New Cable Triples Load

NEW coaxial cable system with three times the capacity of earlier ones was put into operation Tuesday on the New York-Philadelphia route, A. F. Jacobson, director of operations of AT&T's Long Lines Dept., announced. One cable along the route has been equipped with the new system, known as "L-3 carrier," he said, with one pair of coaxial tubes able to transmit as many as 1,800 telephone conversations simultaneously or one TV program in each direction plus 60 phone conversations.

Shorts

Stancil-Hoffman Corp., Hollywood, announces production of three channel stereophonic 35 mm magnetic film reproducer identified as Model S5. Occupying rack space of approximately 50 inches high, it includes film transport, three reproducing amplifiers, power supply and differential motor. Space is provided for maximum of 16-inch reel.

Daven Co., Newark, N. J., announces development of decade counter switch, Type 410, designed particularly for work requiring indication of shaft position at remote points.

Equipos Electronicos de Mexico, S. A., named co-distributor of Motorola communications products in Mexico.

Daven Co., Newark, N. J., announces development of patented molded "Knee-Action" rotor for use on its 1¾" diameter attenuators and switches.

Neely Enterprises Inc., L. A., appointed manufacturer's representative to electronic industry for Reeves Soundcraft Corp. Neely firm will cover California, Nevada, Arizona and New Mexico.

Radio Shack Corp., Boston, has published eight-page rotogravure sales bulletin featuring firm's TV and industrial electronic parts.

Audio & Video Products Corp., N. Y., has released four-page illustrated catalog with specifications and prices on complete line of Ampex recording equipment and audio accessories.

Hycor Co., North Hollywood, Calif., announces development of new sound effects filter, Model 4200, requiring only 3½ inches of rack space.

Crenshaw Co., Memphis, Tenn., appointed distributor of radio-TV receivers for CBS-Columbia Inc., Brooklyn, N. Y.

C. J. Voneman & Assoc., Lakewood, Ohio, appointed representative for H. H. Buggie & Co., Toledo (communications and electronic equipment), in Ohio, Kentucky and southern Indiana.

Helipot Corp., South Pasadena, Calif. (precision electronic products), opens temporary quarters at 57 State St., Newark, N. J. Permanent building at Mountainside, N. J., will be ready for occupancy in late March.

Hugh H. Eby Inc., Phila., announces availability of new crossover network which combines uhf and vhf in single antenna system.

Lundey Assoc., Waltham, Mass., announces production of Series #199, new group of miniature, hermetic terminals with current rating 8 amperes. Terminals are available in three electrode styles: Hollow electrode with eyelet for minimum internal clearance, solid electrode with single turret and solid electrode with double turret.

Clark R. Gibb Co., Minneapolis, Minn., appointed representative in Minnesota and North and South Dakota by Condenser Products Co.

Hewlett-Packard Co., Palo Alto, Calif., announces production of new signal generator for use as power source for driving bridges, slotted lines, antennas and filter networks. Unit is designated Model 612A.

Daven Co., Newark, N. J., announces availability of new Attenuation Network Series 790. Type is designed for use in gain and loss measurements on filters, transformers, amplifiers and associated transmission equipment for both audio and video range.

Emerson Radio Westchester Inc., White Plains, N. Y., appointed distributor of Westinghouse Reliatron tubes in Westchester and Putnam Counties, N. Y., and Fairfield County, Conn.

Berkeley Scientific Div., Beckman Instruments Inc., Richmond, Calif., announces production of events-per-unit-time meter Model 5558, high-speed electronic counter combined with time base to provide instrument that will automatically count and display number of events that occur during precise time interval.

Kearns Argues in Favor Of New Labor Bill

ARGUMENT in favor of a bill (HR 3146) to plug loopholes in National Labor Relations Law, affecting featherbedding, and which has significant implications for broadcasters, was made last week before the House Educational and Labor Committee by its sponsor, Rep. Carroll D. Kearns (R-Pa.).

The House Labor Committee has been holding hearings on revisions of the Taft-Hartley Act and has heard sponsors of the various measures.

Rep. Kearns, a card-carrying member of the American Federation of Musicians (he used to teach high school music) who is also a long-time member of the House Labor Committee, proposed to amend the anti-featherbedding provisions of the Labor Law by making it an unfair labor practice "to cause or attempt to cause an employer to pay or deliver or agree to pay or deliver any money or other thing of value, in the nature of an exaction, for services which are not performed or not to be performed, or not necessary or required to be performed. . . ."

The present law calls an unfair labor act only payment or attempted payment for services not performed or not to be performed.

That this provision does not now apply to services not necessary or not required was the ruling of the National Labor Relations Board in the case of Gamble Enterprises Inc. The NLRB was overruled by a U. S. Court of Appeals and appealed to the Supreme Court, which heard oral argument last November [B•T, Nov. 24, 1952].

In the Gamble case, the local AFM union attempted to require the Palace Theatre in Akron, Ohio, to hire a house orchestra, even though the theatre used "name" bands and a local orchestra was not required.

As of last week, the AFM had not asked to be heard on Rep. Kearns' bill. NARTB was planning an appearance on all facets of the Labor Law concerning broadcasting.

Publicist Guild to Vote

NBC and ABC Hollywood publicists' unanimous vote to withdraw from the Publicists Guild and join the National Assn. of Broadcast Engineers and Technicians (CIO) will be discussed and voted upon at a PG meeting tonight (Monday).

If the guild, which has charged NABET with raiding its membership, refuses to honor the request, network units will petition the National Labor Relations Board for an election. The present guild contract expires April 30. Proposed switch involves nine members from NBC and six from ABC.

SAG-Producers Contract

RATIFICATION of a proposed contract covering actors in TV filmed commercials was expected to be completed over the weekend as some 3,500 Screen Actors Guild members in New York, Chicago, Detroit and Hollywood voted on the proposal.

An SAG spokesman pointed out that if the contract were approved by the membership, it would end a 13-week strike against the producers and would make union actors eligible for work on filmed TV commercials today (Monday). The pact was approved by SAG's board of directors and the Film Producers Assn. of New York on Feb. 19 [B•T, Feb. 23].

IN MICHIGAN...

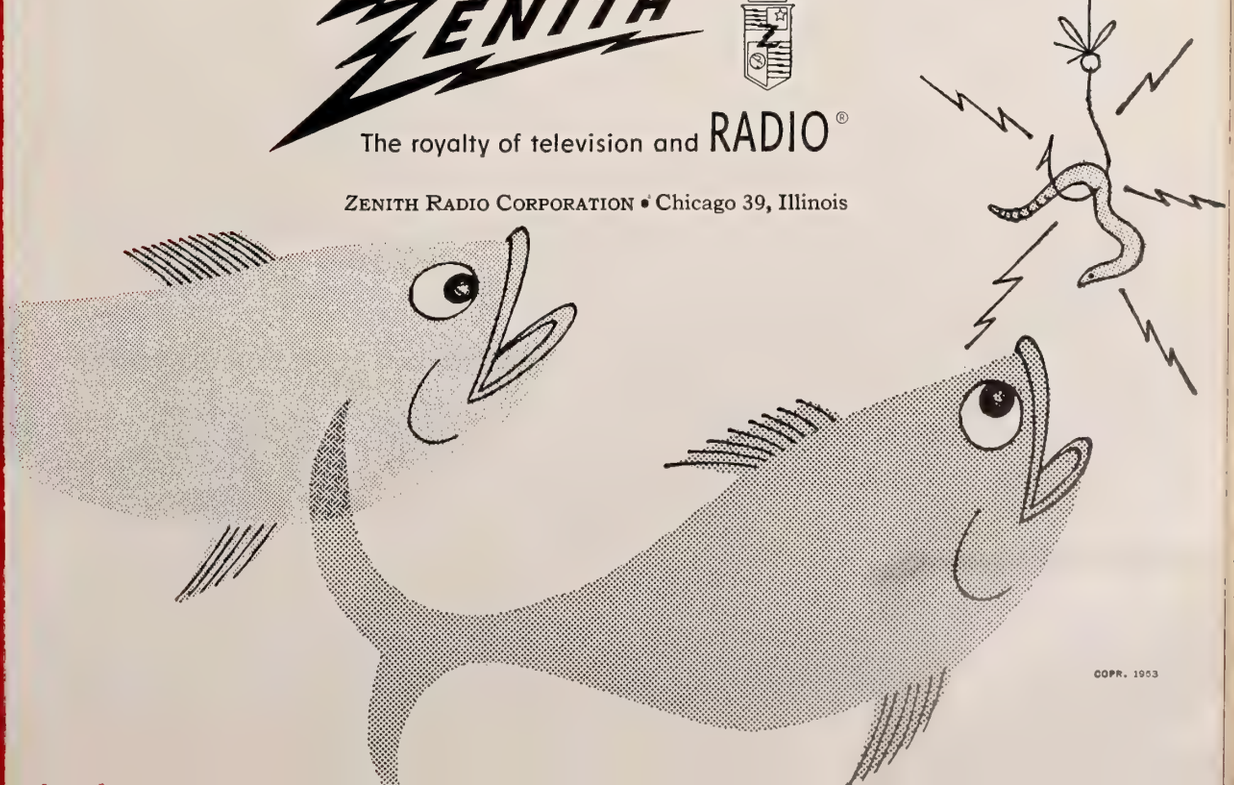
FM Pulled Twice the Inquiries at 1/8 the Cost

FM commercials in Grand Rapids and Detroit areas *only* out-pulled same commercials broadcast over AM with full-state coverage.

Are you up-to-date on FM? This is another report of actual results in a nationwide campaign of keyed spot announcements for Zenith Hearing Aids. It adds actual case history results to your surveys and statistics on FM coverage of AM "holes" and "white spots."

More "pull" for less money. In the state of Michigan, for example, full theoretical AM coverage was used, while FM coverage was purchased only in Grand Rapids and Detroit. In spite of this, FM out-pulled AM two to one, with a cost per inquiry only 1/8 that of AM.

Help where you need it. Better investigate *all* the areas where you *thought* AM could do the job alone. You'll find many areas where you need FM to get your message through because of static and local interference. FM gets results—at lower cost.



Note to FM Stations:

Your Zenith distributor will gladly help promote your station and programs through dealers, in newspaper ads and displays. Get in touch with him today.

PIONEER UHF STATION ORDERS G-E 12 KW TRANSMITTER

California's Experimental Station KM2XAZ Prepares New Mt. Wilson Site For Arrival Of G-E High-Power UHF Transmitter

John Poole

After nearly five years of experimenting with UHF broadcasting, the John Poole Broadcasting Company, Los Angeles, has ordered a General Electric 12 KW UHF Transmitter for the earliest possible shipment.

At present, Poole Broadcasting is operating 10 KW AM Station KBIG, daytime only, on Catalina Island and a UHF Station, KPIK, on a new Mt. Wilson site. The transmitter now being used for the television station delivers approximately 100 watts output and was built for John Poole by Stanford University. It utilizes a special system of modulation which combines the output of two separate chains of RF amplifiers.

KPIK's new UHF transmitter site on Mt. Wilson. KPIK will serve the country's third largest market from a mile above metropolitan Los Angeles

These two amplifier chains amplify frequency modulated signals which are combined in the output in such a phase that amplitude modulation results.

Operation Manager Pleased

Clif Gill, Operations Manager, recently said: "We wouldn't have ordered the G-E 12 KW Transmitter unless we knew it would bring us the kind of results we are after. Our UHF technicians have checked very carefully the specifications of this transmitter. Their genuine enthusiasm makes us feel certain we'll be satisfied."

The John Poole Broadcasting Company AM Station KBIG is the well-known Westcoast station that defied those who said, "there wasn't room for another station in Los Angeles." Poole decided he would enter the California broadcasting picture with something a little different to offer, creating a "product" tailored to fit listener needs, and promoting it to the maximum. The station was set up on Santa Catalina Island to take advantage of the salt water strip between it and the mainland. The station delivers a signal of great clarity over a tremendous area —more than 26,000 square miles of Southern California and surrounding states. KBIG went on the air in June, 1950 and by August it was in the black.

Long FM Tube Life Surpasses Guarantee

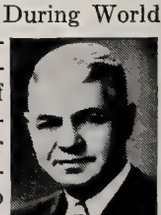
Although the 7D21 tube used in the G-E 3 kilowatt FM Transmitter was originally supplied with a 2000 hour guarantee, based upon certain limitations, it has gone far beyond that guaranteed life.

Plaudits From KTNT

Among the many satisfied customers who have written to General Electric about their satisfaction with this tube is Max Bice of Station KTNT, Tacoma, Washington. Bice says: "The last pair of tubes we replaced showed a total life of 14,760 hours and were still going strong." It is performance like this that has led Bice and his associates to order a 5kw transmitter, 6 bay bat-wing antenna plus studio and film equipment from G. E. for their TV station on Channel 11 in Tacoma.

From WFNC

J. J. Ikner, Jr. of WFNC, Fayetteville, N. C., recently wrote: "I thought it would be of interest to you to advise that we have just retired one of your GL-7D21 tubes used in our three Kilowatt FM Transmitter after 13,140 hours of use."



These are just two of the comments that back up the G-E designing engineers desire to provide long-life tubes for economical operation. The engineers feel that while this cannot always be done at the start, the purpose is eventually achieved.

Sales Manager Celebrates 25 Years with G. E.

John Wall, District Broadcast Sales Manager, is another General Electric employee who has been with the company for 25 years or more. Wall began his association with General Electric Supply Corporation in 1928. He moved around in the company after that, holding mostly positions that involved sales responsibilities for receivers, tubes, specialty products and broadcast equipment.

Broad Electronics Experience

He was commissioned in USNR in 1934. During World War II he was assigned to the office of Chief of Naval Communications as officer in charge of landline and radio connecting facilities. He received the Secretary of Navy Commendation citation and now holds a permanent commission of Commander in USNR.

John Wall

Wall, whose office is in Cincinnati, Ohio, has held Amateur Radio and Station Licenses since 1923 and is active in various Amateur Radio and Engineering organizations and societies.

It started with a fan letter

A NEIGHBORLY gesture by WOWO Fort Wayne, Ind. has unexpectedly turned a crippled Iowa boy into the biggest advertiser in his home town.

A 22-year-old youth named Billy Walker, confined to a wheelchair all his life with spastic paralysis, wrote a fan letter to WOWO from his home in Greene, Iowa. At the end of his note of praise, Billy apologized for the performance of his battered and broken typewriter.

Station staffers, motivated by friendship rather than charity, asked listeners to donate spare pennies to the purchase of a portable typewriter. The staff people had expected, they thought optimistically, to get enough to buy a new machine for about $100. Collections far exceeded this modest goal, resulting in 78,000 pennies from listeners in 39 states, the District of Columbia, Canada and even Bermuda.

A new scheme had to be formulated after Remington Rand donated an electric typewriter to Billy Walker, so WOWO decided the money could be used best in promoting the shut-in's small magazine subscription business. Deciding to continue the use of radio, this time on a commercial bassis, station officials bought $500 worth of time on KXEL Waterloo, nearer Mr. Walker's home, and KXEL matched the amount with free time.

To these WOWO staffers fell the toilsome job of counting the 78,000 pennies sent in by listeners in 39 states, Canada and Bermuda after the station asked for one-cent contributions to buy Billy Walker a typewriter.

WOWO also bought $150 worth of space in the local newspaper, the *Iowa Recorder,* which, in turn, donated an equal amount of space. In addition, WOWO contributed a three-year typewriter service contract worth $75 and a $22 typewriter ribbon coupon book.

Mr. Walker, nonplussed by the results of his lone fan letter, has the double distinction in his home town of being the only man with an electric typewriter and the one with the biggest advertising account.

It's not too early for stations to be making plans to counteract the summer slump that historically hits audience and advertising volume. Here's how the Crosley TV stations boosted business last year with a big promotion called . . .

Clippings at left are of newspaper stories of Crosley station summer promotion. Trick in getting this press publicity was the "If I Were President" contest which evoked interest throughout coverage area. Contest was covered widely by papers while it was in progress and when winners were announced.

THE television (or radio) broadcaster who is looking ahead for a way to keep his time sales climbing with the mercury this summer, who would like to keep every member of the television family at home by the TV set during the hot months, and who would be tickled to see his call letters emblazoned before advertiser, agency and public—should take a long look at last summer's Ohio video promotion venture by Crosley Broadcasting Corp.

Looking for a method to stir both viewers and advertisers out of normal summer slumps, Crosley came up with "Operation Sunburst," a dual salesmen-viewers contest offering 128 prizes to viewers and a bonus-prize incentive plan to Crosley salesmen at WLWT (TV) Cincinnati, WLWD (TV) Dayton and WLWC (TV) Columbus, and the firm's New York and Chicago offices.

Operation Sunburst's happy result was that sales from mid-June to Oct. 31 rose 35.2% in dollar volume above those for the same period in 1951.

Client Increase

A continuing check on all advertisers using the three Cincinnati TV stations indicated, according to Crosley, that WLWT had 71.5% of the 224 accounts reported during the typical months of August. Of the accounts, 60.3% were exclusive with WLWT. The situation was similar in each of the other two Crosley markets, Dayton and Columbus, Crosley reports.

Inaugurated as a salesmen's contest in the summer of 1951, Operation Sunburst reached full flower last summer when Crosley happily decided to add an audience-promotion angle. The viewers' contest found a natural peg in the Presidential campaign, with contestants answering 90 questions concerning the Presidency, and then writing a 200-word essay on "If I Were President."

To keep viewers' attention focused on their sets, the three stations incorporated clues to the 90 answers "at random and in rotation" into their full daily programming schedules.

To make such viewing worthwhile, Crosley offered as first prize a $25,000 completely furnished prefabricated home, as second prize a Chevrolet convertible auto-

Operation Sunburst

mobile and as third a fully-equipped Crosley kitchen. The 125 smaller prizes included refrigerators, TV sets, washers, dryers, dishwashers and other home appliances.

Crosley reports the 400,000 entry blanks placed for distribution in grocery, drug and other retail outlets "were snapped up with a rapidity which fascinated" the retailers. Some 53,000 entries were made from the coverage areas of the three stations, which the firm claims covers some three-fourths of Ohio and parts of Indiana and Kentucky.

The extensive Crosley publicity, promotion and merchandising facilities were put into action for the contest. Newspapers carried promotion stories all through the contest; and advertisers, besides being offered higher audience ratings because of interest in the contest, were confronted with Operation Sunburst promotion through direct mail and on their TV sets.

Five of the modern, six-room homes were constructed and opened for public inspection—two at Dayton and one each at Hamilton, Cincinnati and Columbus. Crosley reports nearly a quarter of a million people visited the homes.

Crosley also claimed some less tangible results: In erecting the five homes, the stations introduced several new clients to the potency of TV as an advertising medium Among these were the building industry, plumbers and others whose products are not normally considered TV material. A New York firm which provided the draperies for the homes currently is contemplating a large-scale TV campaign, Crosley reports.

The summer-long TV promotion also drew interest from stations in New York, Atlantic City and Cleveland, and one inquiry from representatives of the Commonwealth Broadcasting Corp. of Sydney, Australia, all of whom have sought more detailed information on the Crosley contest.

Nearly quarter-million people visited the "Sunburst" homes in Dayton, Hamilton, Cincinnati and Columbus. Here a crowd waits to go through the house in Cincinnati. Gift of "Sunburst" house, worth $25,000, was top prize of summer promotion contest.

Some telecasters whose operations are either active or planned are beginning to look to Wall Street financing to obtain capital or the tax advantages it can provide. And Wall Street is looking for "growth" companies to invest in. Chances are that more and more TV station owners and financiers will get together.

By Alexander Eisemann Jr.

NEW CORNER:

AS FAR AS the broadcasting business is concerned, Main Street and Wall Street have run their independent courses a thousand miles apart. But a change is taking place. The chances are very good that these important thoroughfares not only will come closer together but may intersect before long.

Main Street television is going to become involved in Wall Street finance. And both the telecaster and the financier will be the better off for the association.

The dynamics that are drawing these two heretofore disassociated businesses together are, to state them simply, these:

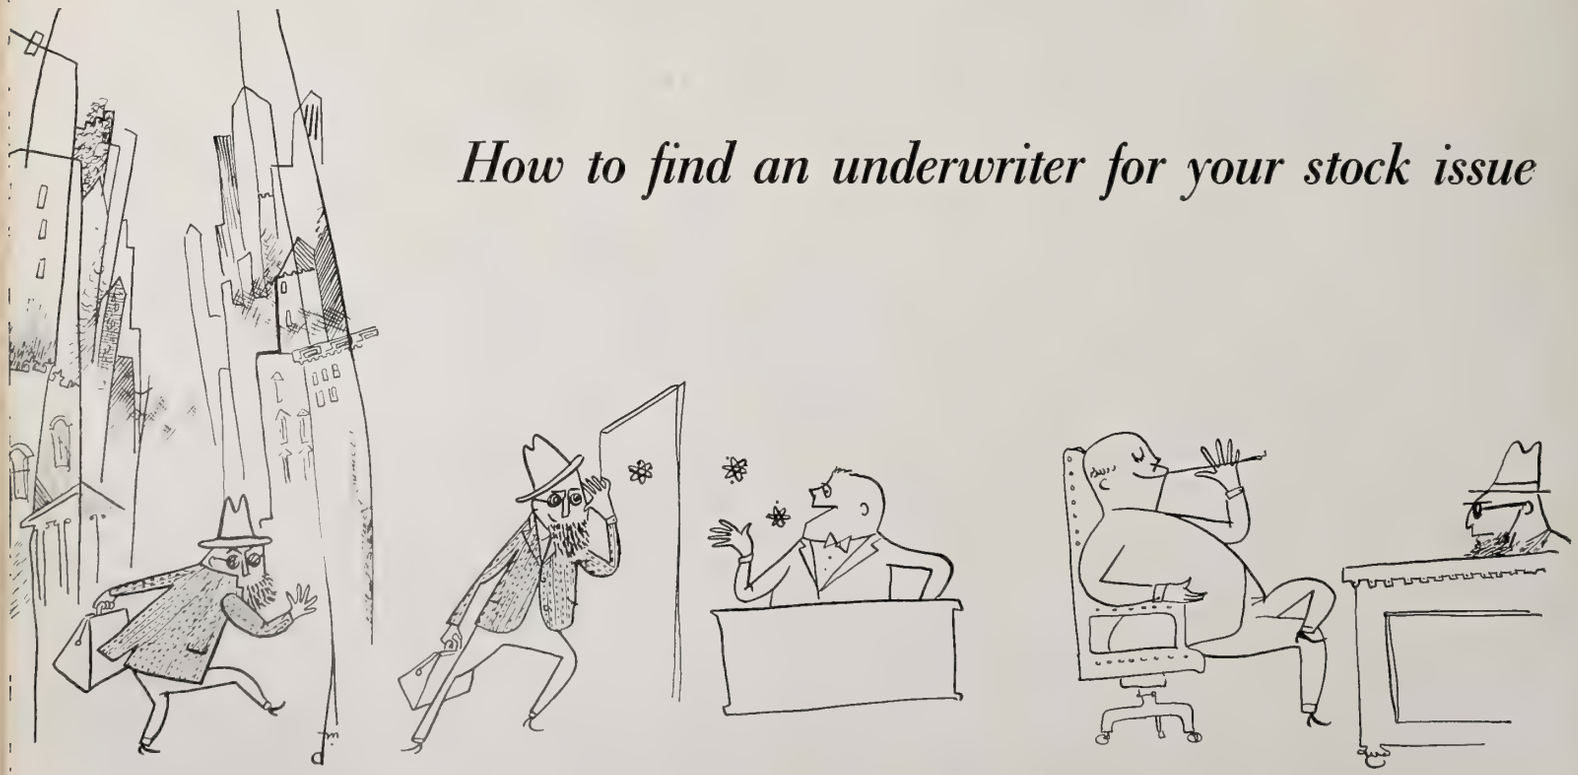
Wall Street is looking for "growth" companies to finance. TV certainly qualifies. It is a strictly franchised industry with local but limited competition and, in combination with radio, it has a fine history of progress since 1924. Stockwise, TV is a potent prospect for long-term capital gain. The customers of Wall Street seek that capital gain as much as, if not more than, they seek dividend return. They want issues that stand a good chance of going up in price. TV issues in well managed stations fill that requirement nicely.

While as yet there may be relatively few telecasters actively seeking Wall Street financing, we suspect there may soon be more. Some will require the capital that they can obtain in the nation's biggest money market. And others, though not in need of capital, will realize that they can use the investment banker to achieve important tax advantages by means that will be described later in this article.

Before the Main Street-Wall Street traffic increases, however, a get-acquainted process must take place. It is up to the broadcaster, more than to the financier, to set this process in motion.

Underwriters are waiting for sound financial set-ups to *be presented to them.* Wall Street already envisions television as an ideal vehicle for legitimate public participation. The ice is already being broken. But underwriters will not go to the telecasters. You, the telecaster, must go to them. And that entails a somewhat intricate approach.

Here are seven preliminary steps for a telecaster to take before he goes to the market.



1. He would do well to select one of several firms of financial advisors specializing in this field. These advisors carry on the other six steps of the preliminary preparation.

2. They study the past record of the company, going back before its TV days, and then evaluate its future potential earning power.

3. With this knowledge, they set up a financing program which not only satisfies the telecaster and his legal counsel but which they believe will be geared to the known ideas of the underwriter to whom they have planned to present it. Some underwriters prefer a straight common stock offering. Others lean to convertible preferred stocks. Still others like debentures with warrants attached.

4. The financial advisors, with the help of financial attorneys and the legal counsel

How to find an underwriter for your stock issue

1. Don't let Wall Street know you're looking.
2. Find the underwriters who know electronics.
3. But dodge those that are too big for you.

of the telecaster, prepare a draft of the prospectus. At the same time they often draft the underwriting agreement itself. (Sometimes underwriters want changes, but they may also accept the papers as drawn.)

5. An agreement is signed with the financial counsel, providing for the contingent fee which is a small percentage of the net amount of money, payable after the proceeds of the issue are actually received. The few New York firms which operate in this field seldom ask for a fee of more than 5% of the new money raised. In difficult cases a small block of stock may be added.

6. An underwriter is "selected." This delicate job is described below.

7. The draft of the prospectus and the draft of the underwriting agreement, together with all historical, financial, commercial and personal data, are bound into a dossier and presented to the underwriter as a package.

Selecting an underwriter is a tricky and complicated job.

First, one must learn which investment bankers are most conversant with the electronics industry through former underwritings and, therefore, have less resistance to making an underwriting commitment in that field.

Second, one must eliminate those who cannot entertain the issue because of its size. Many firms in Wall Street are so geared to a large security distributing organization that they cannot handle issues involving less than, say, $2 million. Others are geared to handle issues of from $300,000 to $750,000. A few can handle smaller issues. Quite independent of the merit of the business, an underwriting may be turned down merely because it is too small for the underwriter to whom it is presented. There is never a problem of the issue being too large.

Third (and most important), after having found the underwriting houses geared to underwrite that size issue and friendly to that industry, one must determine which house is not now "loaded up" with issues awaiting clearance through the Securities and Exchange Commission. Obviously, if the underwriter already has six other underwritings ahead of you awaiting clearance through SEC, you must wait your turn. Delay may cause your turn to arrive when the public market has gone and then your issue stays on the shelf until the market improves. Sometimes it takes years.

How To Time It

The time to seek an underwriting, quite independently of other considerations, is during periods in which the stock market is active. We are now in such a period, but such periods are often punctuated by many intervening years of market inactivity.

In selecting the underwriter to whom you wish to make your presentation, you must avoid letting the news get out that you are in the process of such a search. Once the name of a company has been bandied about, perhaps by well-wishing friends who think they have "good Wall Street contacts," it is virtually finished as far as underwriting is concerned. An issue that has been shopped around Wall Street is an issue that has little chance of coming out. In Wall Street protocol, left-overs are unwelcome. Before deciding where to present your issue, you must comb the underwriting market thoroughly but adroitly, without even mentioning the name of your company.

To obtain the best price, you should select a firm which may have been in many syndicates managed by other firms but which has not for some time "originated" an issue of its own. To be the originator and managing underwriter is much desired, and if the other elements of the issue fit that firm's facilities, its need for a new issue paves the way for rapid and satisfactory negotiations without too much haggling over price.

While on the subject of price, I would like to dissent from the opinion expressed by Dr. Henry H. Buba in his article on some phases of this subject [see "How To Finance TV Stations," B•T, Jan. 26]. Dr. Buba said that smaller investment houses will undertake "the floating of a stock issue of a local TV station for a fee ranging from 20% to 30%." His estimates are excessive. In 20 years we have never seen any reputable underwriter taking down 30% even on the lowest grade speculative deal. Conservative underwriters of stock issues add 7½% to 15% to the amount supplied to the company.

On the question as to who pays the underwriter's so-called "discount", let us take an example. Suppose that in a small issue the underwriter agrees to supply $250,000 for, say, one-fourth or one-third of the common stock. The underwriter re-sells

4. And look twice at smaller ones unfamiliar with TV.

5. Your best bet is one that needs your issue.

6. If he is OK on other counts, you're in.

From where I sit
by Joe Marsh

Surprise Ending!

That raffle for our Volunteer Fire Department went over fine. We're going to have enough money to get a new engine—and then some.

Our local merchants really donated some wonderful prizes. Like Buzz Ellis, the radio-TV dealer, giving that big television set . . . and the Superior Motors putting up a new car.

There was a humorous note, too. The prize of a year's supply of coal—donated by Baker Coal Yard—was won by Mrs. Thayer, whose husband is the biggest fuel-oil dealer in the county! What did Mrs. Thayer do with the coal? She gave it to a church she's not even a member of. (Her Church uses her husband's fuel oil.)

From where I sit, that's real *generosity. But then, Mrs. Thayer never did believe in dividing people into groups. She's "for" everybody—whatever church they go to, whether they like TV or radio, people who enjoy temperate beer, people who don't. A really* warm-*hearted person.*

Joe Marsh

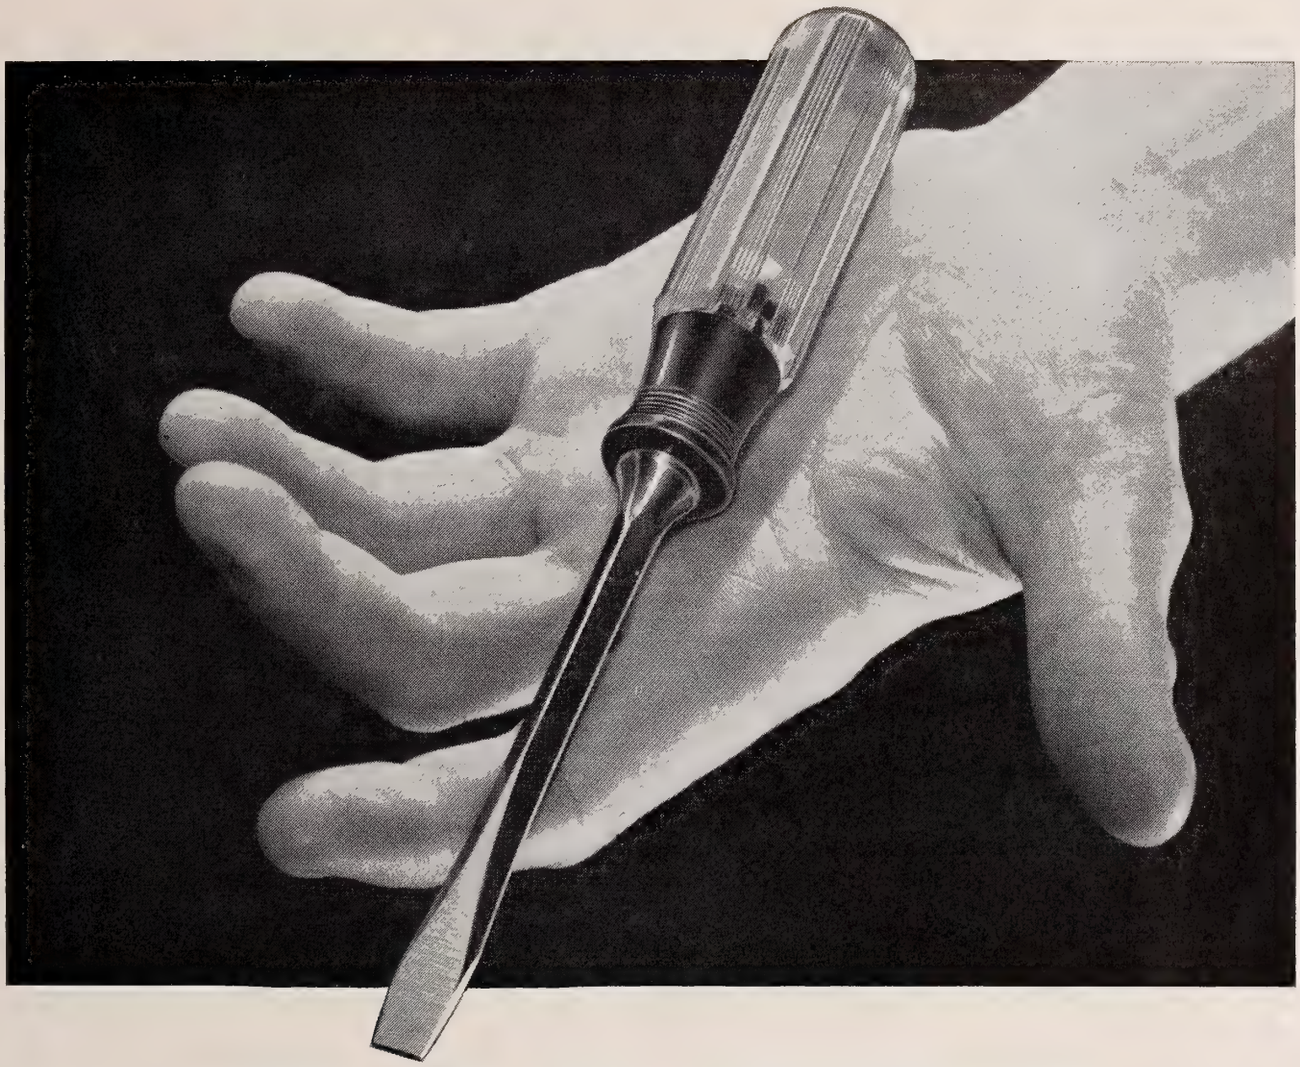
that stock for, say $300,000. The difference is $50,000. But does the broadcaster pay that $50,000? Is that $50,000 a "cost" to the broadcaster?

Certainly not. That "overage" is paid by the investors. Out of that $50,000 the underwriter pays his security dealer distributing group usually one-half or two-thirds. The remainder, after expenses, is the underwriter's profit. True, the broadcaster is expected to pay dividends (if earned) not only on the $250,000 but on the whole $300,000. But that is a small element of "cost."

In setting up a public issue, the telecaster can arrange an added advantage—the issuance of warrants. Such warrants, good for three to five years, are issued to the owners. Warrants provide the right to buy stock from the corporation at, say, the public issue price. If the business prospers and the stock rises in the public market, the owner can later sell the warrants personally as a "security" for a sum equal to the difference between the price named in the warrants and the public market price. The profit would be taxed as long-term capital gain.

ABOUT THE AUTHOR

Alexander Eisemann Jr. is president of Eisemann Industrial Corp., New York, specialists to technical industries on financing through public issues of securities. His family were founders in 1923 of the Freed-Eisemann Radio Corp., and his father was on the board of the then Radio Manufacturers Assn. until he left radio for a Wall Street career in 1928. Eisemann Industrial Corp. grew out of the New York Stock Exchange firm of Alexander Eisemann & Co., of which Mr. Eisemann's father was senior partner.



In "growth" companies, such warrants have proved extremely valuable when there was a substantial rise in the market price of the stock. In Wall Street language, warrants are a three to five year "call." Management, in a new issue, often has 25,000 to 100,000 warrants issued to itself. Sometimes this is neglected simply because management is unaware it can be done.

If a telecaster seeks capital but for some reason does not want to go into a public stock issue, he can, of course, turn to private venture capital. There exist in New York a number of private syndicates, groups of financially substantial people organized to distribute individual risks and yet undertake investments that would be too large for any one of the members.

Certain Wall Street firms have venture capital funds organized by their individual partners. Also there are "management companies", or pools of capital which the management can employ at its discretion.

Funds from such sources are more quickly obtained than through the underwriting of a public stock issue, but they "trade harder." They customarily buy on a lower "times earnings" basis than that of public stock issues and often insist on control until the new capital or loans have been repaid.

Contrary to popular impression, investment bankers, underwriting issues to be

TOOL KIT FOR MICROWAVE

This is it . . . a screwdriver . . . the only tool needed for quick field replacement of Philco microwave units. Philco microwave is the answer to the need for swift, reliable communications. Philco design emphasizes minimum field maintenance time and cost. All major components are "packaged units", quickly and easily replaced on the site with only a screwdriver, permitting convenient depot checkout, for fullest use of field time.

Using JAN (Joint Army-Navy) specification components wherever applicable, Philco microwave is the only equipment available for commercial use with such high standards of quality. Philco microwave gives propagation and equipment reliability unmatched in the field . . . you should investigate.

offered to the public, do *not* desire control. In fact, if a controlling interest were to be offered to them, the motive might be suspect. In Wall Street such a manuever would look like a "bail out," meaning the owner no longer has confidence in his business and wants to unload.

Since investment bankers do not want the problem of supplying management, new issues of securities nearly always consist of a minority interest. Once a public market is available on the stock exchange the subsequent sale of the remaining interest by an owner is relatively easy.

It is here that the public issue has another advantage over the use of private capital. The liquidity of a public market is useful for retirement or for one's heirs.

This brings up the subject of the desirability of issuing minority stock for purposes other than merely obtaining financing.

Owners of stations which already have ample capital can achieve a substantial tax advantage by selling a minority interest to investment bankers without affecting control of their companies. The technique here is to sell a block of personally owned stock to underwriters to obtain long-term capital gains. Later the shares may be listed on one of the stock exchanges.

Tax Advantages

In these days of high taxes on corporate earnings and double taxation (through secondary taxation of salaries and dividends), the owners, by selling a minority interest, pay only 26% federal tax on the difference between the cost of the block sold and the price paid by the underwriters for that block of stock. Such a purchase would:

(a) Not disturb existing control;

(b) Yield a long-term capital gain to the seller;

(c) Enable further diversification of his capital;

(d) Provide a market for the rest of his holdings on a capital gain basis should he decide to retire;

(e) Provide a market (if needed by the owner's estate) for payment of inheritance taxes.

Many businesses are being liquidated or sold at a fraction of their real value by banking trustees when large inheritance taxes become due. These taxes cannot be paid in machinery or other assets. One needs cash, and it is an unfortunate fact that constantly businesses are being destructively liquidated by banking trustees or sold privately at a fraction of their real value to obtain tax funds.

Unless he has sufficient cash or liquid securities *outside* the corporation, the tax-conscious station owner may consider selling a minority interest to investment bankers while the market for new public issues exists and thus obtain a liquid market for use upon retirement or death.

After a station owner grows on in years and wishes to retire and sell his business, he is best served by doing that in two stages. First he sells a quarter or a third interest, and a year or so later, after a public market has been established through that sale, he has a ready market for the remainder of his holdings. And if the earnings are high, the sale of that remainder may go at a surprisingly high price.

THESE BRICKS AREN'T GOLD, BUT THEY SELL LIKE IT

OCCASIONALLY an advertiser will deny that radio has any direct sales value. Most advertising minds will insist that it holds little or no sales value for a manufacturer of bricks.

Executives of The Remillard-Dandini Co., to a man, however, will argue with anyone on this count. For that firm, operators of Remillard-Dandini Sand-Mold Brick Kilns and San Jose Brick & Tile Co. at San Jose Calif., has, during the past five years, been selling millions of clay bricks to people in the San Francisco bay region who had not seriously thought of them as a material for building until they learned of them via radio.

With a very modest annual advertising budget of slightly over $12,500 this firm earmarks 75% to local radio, utilizing a nightly 15-minute recorded program, *Memories in Music,* on KEEN San Jose. The program which started back in 1948 has varied little in format, except for harder selling copy and the various merchandising gimmicks that are essential with seasonal and changing times.

Those Responsible

William S. Stanley, president of Remillard-Dandini Co.; its secretary, Eugene K. Sturgis; Joseph Feasil, superintendent at the San Jose sand-mold plant, and Jack Dair of the wire-cutting plant, are the four principals primarily responsible for the successful radio and merchandising campaign.

When Floyd Farr, vice president and general manager of KEEN, first approached those company executives with a plan to use radio as an institutional medium, they went along with the idea. Having been founded in 1863 and one of the oldest brick manufacturers in the West, they agreed with him that more people should know about the firm and its products.

Then came the problem of preparing the proper type of commercial copy. They wanted to tell the story of brick in a way that would be interesting, yet different—not just a straight selling job. They wanted no tuning out of their commercials, Mr. Stanley said.

From the company's experience, it felt many people had to be educated to the fact that brick was not expensive as compared to other building material. Therefore it had to be convincingly told that brick was more beautiful than any other material, that it was safe, and above all, that it was adaptable not only to wall construction but to scores of other uses in the yard and garden.

Remillard-Dandini Co. was just as anxious to sell small quantities of brick as large ones. The executives decided to make the pitch to the home owner who wanted to build a barbecue pit as well as to the person planning to construct an entire house.

The program started building a following almost immediately and, most important of all, it sold bricks from the beginning, according to Messrs. Stanley and Sturgis. Customers told them they learned about clay bricks and their various uses through the nightly musical program.

Company executives then decided they wanted a brick contest. But if one were to be conducted on the nightly program, to make any sort of an impression, it had to be a really big one.

So a total prize of 50,000 clay bricks was established. They were to be given away in amounts of 500 bricks to each winner. There were to be two winners each night. Thus, for 50 nights a thousand bricks would be given away.

Getting together with KEEN General Manager Farr and Program Director George Snell, Messrs. Stanley and Sturgis came up with a "mystery melody" contest. The first two persons correctly identifying the mystery tune each evening were to be awarded the 1,000 bricks.

"It went over with a bang," Mr. Stanley declared. "It was the biggest thing that happened to the brick business in the bay area in years. Seems like everybody wanted to win a truckload of Remillard-Dandini clay bricks."

Of the 100 winners in the contest, more than 80% ordered additional bricks to complete building projects they had in mind, he reports.

Sales Shoot Up

With sales of sand-mold bricks having increased 80% since start of the first contest and the curve still mounting, company executives felt it advisable to immediately extend the contest for an additional 13 weeks on KEEN.

This time, however, the giveaway was one nightly prize of 500 clay bricks. There were an even 100 winners in the second contest which ran through the summer and fall of last year. Here again, from 75% to 80% of those receiving the 500 free bricks purchased an additional supply, using the contest prize as a starter for whatever construction they planned.

As an example of the effectiveness of radio advertising, Mr. Sturgis said that with an expenditure of only $1,188 during a period of 13 weeks, he credits sales of approximately $60,000 worth of sand-mold brick (1,200,000 bricks—retail price about 5¢ each) to the medium.

"Over the years," Mr. Sturgis says, "our radio expenditures have come back to us many fold. We estimate that at least 50% of our business increase in the last five years is directly traceable to our radio campaign."

"Our faith in radio advertising is based on a long and continued record of increased sales. We are entirely convinced that we can reach more people, over a greater area, at a lower unit cost by radio than by any other available medium."

Filmcraft Productions is using synchronized cameras to film big TV shows. The technique is not unlike live production and costs far less than older Hollywood methods.

This Camera Control System Cuts TV Film Costs 20%

By David Glickman

DESIGNED to cut production costs by more than 20%, a camera technique perfected by Filmcraft Productions has been in use by that Hollywood firm for over two years in the filming of television shows.

Invented by Dr. F. H. Fodor, executive in charge of production, the system makes it possible to film programs in much the same manner as live shows are telecast.

Through this process, patented as Filmcraft Camera Control System, he declares it is no longer necessary to use the expensive and time consuming single-camera system now generally utilized by major motion picture studios. Furthermore it isn't necessary to stop production to reload cameras or to use clapboards so that sound and picture will be in synchronization.

Permitting a show to be filmed in continuous action, the new photography technique makes it possible for that company to shoot the DeSoto-Plymouth Dealers of America-sponsored Groucho Marx program *You Bet Your Life* on NBC-TV without a halt. Filmcraft also uses that system for its own productions, including the *Mark Twain Television Theater* series which gets under way late this month.

Film Patents

Dr. Fodor, holder of some 41 other patents pertaining to motion picture filming equipment, long had the idea for the camera control system. Blueprints were made, but actual construction of the equipment wasn't started until the company was awarded a contract by NBC to film *You Bet Your Life* for John Guedel Productions, more than two years ago.

"During the planning of the show, it became clear that the program must be a continuous one without stops for any reason," Dr. Fodor explained. "The spontaneity and rapid pace of the radio version had to be maintained in the TV program. Inasmuch as the contestants were amateurs without any show business experience whatsoever, it was necessary to keep cameras rolling at all times, otherwise it would be almost impossible to match action and dialogue.

"This presented us with a problem that had to be met and overcome," Dr. Fodor continued. "Hollywood's generally accepted technique was and still is to film scenes in short takes. Usually they run two or three minutes in length. Ours was to be a one-take show running a full hour. The sixty-minute production then would be carefully edited to a half hour's presentation."

Film magazines for the cameras, however, hold only a thousand feet of negative—approximately eleven minutes running time, he pointed out. Even with 2000-foot magazines, the best that one could obtain, would be approximately 20 minutes.

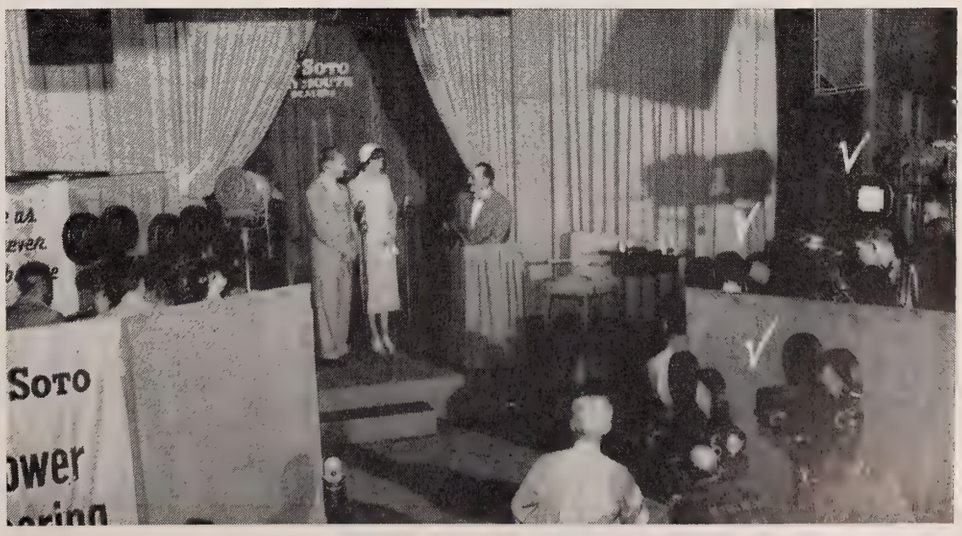
To overcome this, Dr. Fodor placed two 35mm Mitchell cameras side by side. While one camera is operating, the companion camera is being reloaded. Both have identical lenses and stops and no difference of picture can be detected from the complementary cameras.

While this overcame the difficulties of continuous film, it presented a staggering problem of synchronization between picture and sound track, he pointed out.

"Having cameras going on and off the line many times during a show makes for an almost impossible job for the editorial department," he explained. "An editor must run the film back and forth in a moviola many times to lip sync it with a sound track.

"On a program such as *You Bet Your Life,* it would take several cutters more than a week to get all the picture and track in sync. With a weekly release schedule, it would have been an extremely trying and unprofitable method."

To overcome this, the Filmcraft Camera Control System was further developed. Assisted by Paul Schmutz Jr., the firm's assistant technical director, Dr. Fodor worked out a method that optically scribes a reference line on a separate strip of film during the entire photographic period of each camera.



"The heart of the system is centered around a recorder in the control booth, and a central control panel on the stage connected with a 39 conductor cable," Dr. Fodor elaborated. "The cameras are individually controlled by interconnecting cables originating at the control panel.

"When a camera operator activates the camera switch, a small bloop light positioned in the camera matte box lights and fogs the picture for exactly 12 seconds," the inventor continued. "We achieve this through the use of high quality photographic timers.

"At the instant the camera switch is actuated, the camera motor starts; the bloop light operates and the electrical timer is set in motion. At the end of 12 seconds, which gives the camera and sound motors time to reach speed, the controlling relay turns off the bloop lamp and lights a recording lamp in the main panel. Light from the lamp scribes a line on the special film in the main panel.

"A film editor by comparing the start

(Continued on Page 88)

Four camera positions are used to film *You Bet Your Life,* without halt. Show, starring Groucho Marx, is in production in this picture. Eight cameras, in banks of two, are checked.

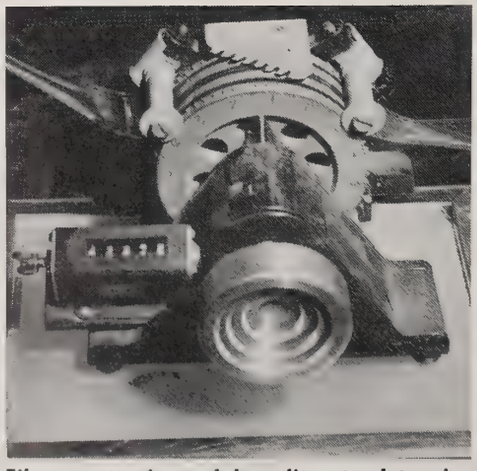
Dr. F. H. Fodor, inventor of Filmcraft Camera Control System and production chief of company, uses intercommunication system to instruct cameramen. In rear is master control panel.

(Continued from page 85)



mark on the picture film with the start mark on the special track, and measuring this with the sound film can obtain perfect sync in a matter of seconds."

He stated that the master panel and scriber currently handles eight cameras (the number used to photograph the Marx show), but can be enlarged to accommodate as many cameras as might be desired.

"These eight lamps are mounted in a block positioned just above the film path in the master panel recorder," Dr. Fodor pointed out. "There is one tiny lamp for each camera. And each lamp scribes a line on the film in its special section on that film.

"As a result, the editor, by looking at the master film, can tell which cameras were operating at any particular moment during the entire program. Editing, consequently, is greatly facilitated. Each lamp also has a corresponding indicator light on the exterior of the machine so that the operator at all times during the filming of a show can see what cameras are in operation. By using an intercommunications system, the technical director cues each of his eight operators, directing their every movement."

The master recorder, incidentally, operates at a film speed of 30 feet per minute, according to Dr. Fodor. As this is one-third the speed film travels through a standard motion picture camera, special footage counters installed in the recorder are geared three to one so that an accurate count of camera and sound footage is maintained at all times. The slower speed is desired, so that an entire program (66 minutes maximum) can be controlled with a single roll of 2,000-foot film.

Film counter is used by editor to determine exactly when each of the eight cameras goes on and off the line during actual filming, thus makes easy synchronization possible.

"The complete operation is accurate to 1/192nd of a second or to one-half sprocket hole," Dr. Fodor proudly pointed out.

The continuous filming and synchronizing problems were not the only ones to be overcome by Filmcraft when it was given the *You Bet Your Life* program to photograph. A new lighting system also had to be developed by the firm.

With regular motion picture lighting too bright for comfort, and knowing that he'd never be able to see his audience clearly, Groucho Marx requested that a new type of lighting system be worked out. He wanted one that would permit him to watch the audience carefully to better time his remarks.

"Usually such programs are filmed with a base of between 250 to 400 key (foot candles)," Dr. Fodor explained. "After much experimenting, we worked out a new system, which we like to think is exclusive, that makes it possible to shoot the program with a base of below 75 key (foot candles). The exact figure is a company secret. It also might be interesting to know that no latensification is used in processing the film."

Back of master control panel shows timers and intricate circuits. Device enables Filmcraft Productions to film shows like *You Bet Your Life* without a stop.

Dr. Fodor estimates that the Filmcraft Camera Control System saves more than 20% on TV production costs, a healthy figure when one realizes that the firm has filmed 125 Groucho Marx programs to date alone. This savings on the Marx program, added to that from other shows which the company has photographed, has benefited Filmcraft clients in excess of a half million dollars, he declares.

Compared to standard motion picture techniques, the savings become fantastic. Major movie studios in Hollywood generally budget at least a month's work to get one hour of film. Filmcraft gets it in exactly one hour and credits its patented camera control system for this saving in time and money.

FEMININE LISTENERSHIP

NBC RADIO Spot Sales has issued a promotion piece titled "If It's Women You Want . . . " which describes local radio "feminine appeal" shows on NBC's WNBC New York, WRC Washington, WTAM Cleveland, KNBC San Francisco and WMAQ Chicago. The folder claims these programs reach hundreds of thousands of working girls and housewives at an approximate cost of $1 per thousand women listeners.

BOOK REVIEW SERIES

NEW program series entitled *The Best in Books* is being seen on WBAL-TV Baltimore. Weekly show features a critical review of one book on each program. Thomas J. White Jr., station's news and publicity manager, has been assigned book review editor as well, and is the critic on the series.

PIE CRIMPER PROMOTION

LATEST in the continuing series of WIBW mailing pieces is a plastic "Pie Crimper". Folder says "To roll up more Kansas sales . . . Hire WIBW." Copy then points out that "It's easy as pie to increase Kansas sales of your product or service. Just follow this simple recipe: Hire WIBW." Mailer is signed by Ben Ludy, general manager.

MERCHANDISING LAB.

NEW "merchandising laboratory" for station clients has been set up by WNBC-WNBT (TV) New York, it was announced last week by Max Buck, merchandising, advertising and promotion manager of the NBC outlets. Stations have joined with London Terrace Super Market in a plan which will provide nearly 30,000 square feet of product display space for experimental testing by WNBC-WNBT clients. The arrangement with the super market is another phase in the stations' concept that "the deal isn't closed until the beans have been sold off the shelf and the toothpaste off the counter."

WSYR-TV's Whodunnit

WSYR-TV Syracuse turned a secondary disaster into a promotion contest when during the film showing of a mystery show, *The Eleventh Hour,* the film broke just before the murderer was revealed.

An avalanche of telephone calls from irate viewers demanding to know the identity of the murderer gave announcer Dusty Rossell an idea. He announced that the first 10 viewers to guess the murderer each would receive a free case of the sponsor's beer, Carlings Black Label.

The two local newspapers played up the accident, thus giving the contest a free publicity shove, according to the station. More than a thousand persons wrote in their choices for the murderer, who subsequently was revealed to all, and the sponsor was pleased at the response to the after-midnight show, WSYR-TV reported.

EVENING FORMAT RESPONSE

WENR Chicago is pulling in mail orders from 40 states and reports "enthusiastic audience and commercial reception" to its new late evening format, built around two programs aired from 8-11:30 p.m. Complete sellout of time periods for *Family Get-Together* and *Country Junction* was reported by Ed Lynch, WENR sales manager. Among the firms buying time are Artists Publications, Trado, Penmaster Pen Co., Real Values, LaRose Hosiery and Stewart Sales Co. Emcee chores on two shows are handled by Jay Arlan and William A. Sheetz.

STORY OF WOR

HISTORY of WOR New York and its growth from a 250-w station set up in the corner of a Newark department store to a 50-kw outlet broadcasting from a modern building overlooking New York's Times Square is detailed in a 30-page booklet prepared by the station's press information department in connection with the station's 31st anniversary on Feb. 22. Titled "31 Years on the Air—the

INTRODUCING THE AMPEX 450

- *Up to eight hours of uninterrupted performance—day after day, year after year*
- *Requires no attention during operation*
- *Lowest cost per hour*

Model 450 rack-mounted. Also available in portable or console mount.

The new AMPEX 450 gives you hours of high-quality background music delivered at *lowest cost per hour* of any musical reproduction system. With the AMPEX there are no interruptions, no records to change and no attendants since it *needs no attention* during operation. It plays at the touch of a button and keeps on playing for as long as eight hours without repetition. Because tape doesn't lose quality with repeated playings, music is always scratch-free and pleasant, with less background noise and distortion.

The Model 450 is engineered to rigid AMPEX standards and is capable of delivering thousands of hours of service with no breakdowns and minimum maintenance.

FEATURES

- 50 to 7500-cycle frequency response at 3¾ inch tape speed
- Standard NARTB reels up to 14 inches
- Pushbutton controls
- Automatic reverse control available as an accessory permits full eight hour program without interruption.

IF YOU PLAN FOR TOMORROW, BUY AN AMPEX TODAY

Story of WOR—One of America's Great Stations," the booklet was distributed to the trade and consumer press.

SPOT HEADLINES

EXTENSIVE series of spots, called "These Are the Headlines," has started at WIP Philadelphia. Announcements consist of headlines of several top news stories of the hour, plus a quick weather report and a tag line giving the time of the next full news broadcast.

LANNY ROSS PROMOTION

MBS promotion piece in the form of an "engraved" certificate announcing the new *Lanny Ross Sings* program is being sent to editors and newsmen by the network. Show, heard every Sunday effective March 1, will be sponsored by J. R. Wood & Sons Inc., a jewelry firm, through BBDO, N. Y.

'NAME-THE-PROGRAM' CONTEST

THREE-week "Name-the-Program" contest, recently completed at WHAS Louisville, brought 3,667 entries, according to a report from the station. The winning title, *Fun Fair,* is now the name of the daily 8-9 a.m. time segment. Show features live local talent. The winner of the contest was awarded a radio-phonograph combination.

SUNSHINE COVERAGE

COMPLETE with the slogan "KPOL (Los Angeles) Covers Southern California Like the Sunshine," the station has instituted a new program format with emphasis on creating its own disc m. c. personalities. Contest now underway asks those who enter to complete the statement "I want to be a DJ for a day because . . . " Winners will trade places with station's Jack Stanley for a day. Also included in the new format are taped interviews with guest celebrities.

STEEL ITEMS DISPLAYED

CHICAGO public relations office of United States Steel Corp. collected 65 steel items from its plants all over the country for use on NBC-TV's *Mr. Wizard* show in that city Feb. 14. TV insight into the steel industry brought out some interesting facts for viewers during program featuring Don Herbert as "Mr. Wizard" and Bruce Lindgren as Willie. Program is carried by NBC-TV coast-to-coast on 46 stations.

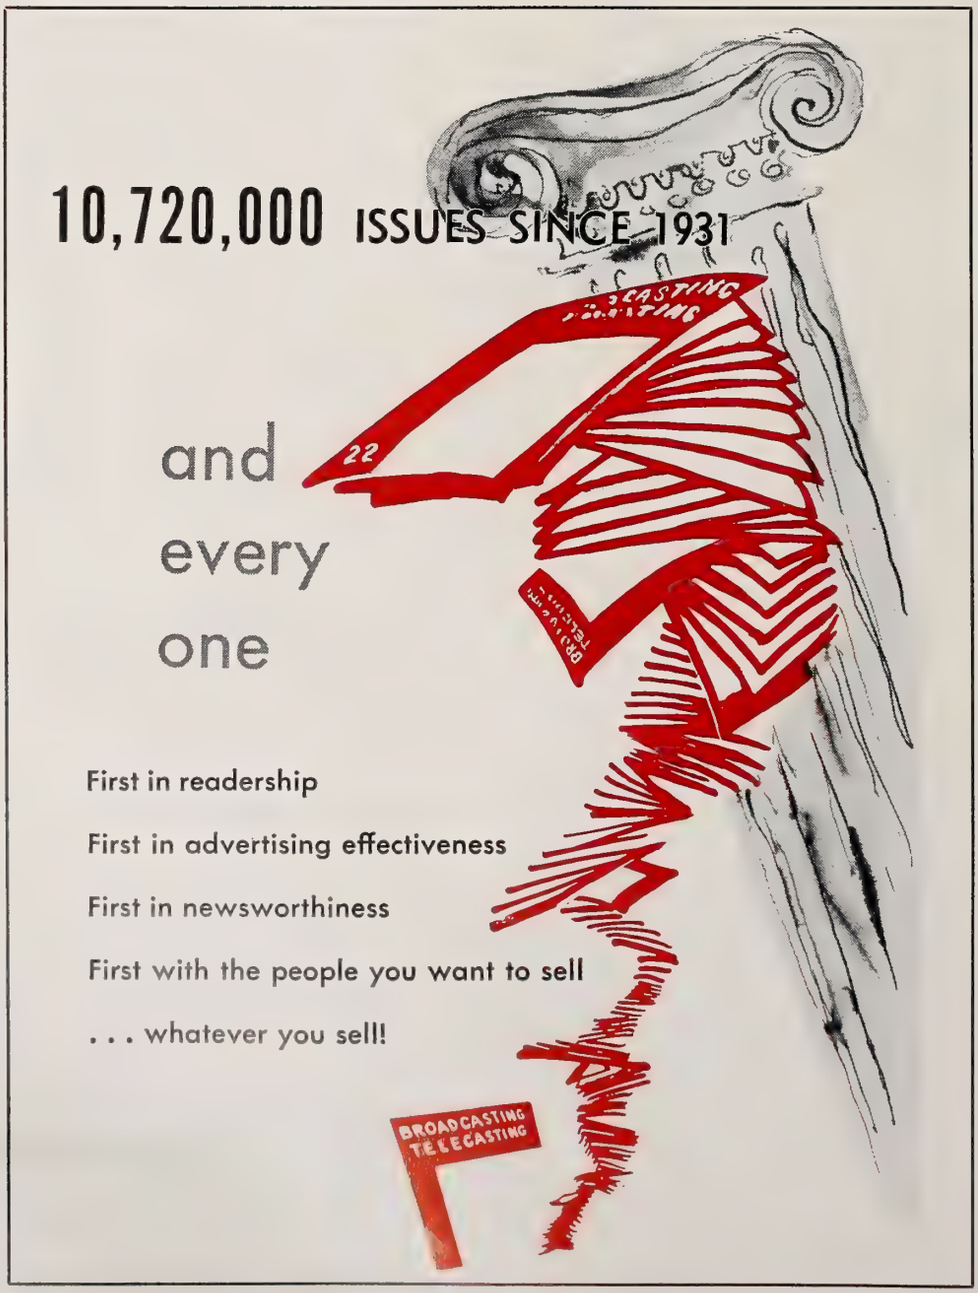
WLAW Hunts G.I. Talent

WLAW Boston on its *Stairway to Stardom* talent show Thursdays is conducting a contest seeking the most talented man or woman of the armed forces in five broadcasts, each airing performances by five members of one service.

Mr. Flynn

A preliminary finalist from each service will perform in a broadcast March 12 and a finalist will be named. All selections will be made by listener vote. The five preliminary finalists will receive awards and the finalist a grand prize at a dinner. The contest will be under leadership of Arthur Flynn, conductor of *Stairway to Stardom* and Peabody Award holder for his radio work for funds in behalf of a paraplegic veteran. The show's producer, Paul Harriman, will assist Mr. Flynn.

JIGSAW CONTEST



VARIATION of the jigsaw contest has been started on KNXT (TV) Hollywood *International Wrestling,* sponsored by Thrifty Drug Stores, on behalf of Allen's Formula 25. Viewers can win by identifying jigsaw photos of mystery wrestlers and will be called after submitting entry blanks. Each week the jackpot grows as another piece of the photo is put into correct position. Agency is Dan B. Miner Co., L. A.

RECORD PRESENTATION

RECORDINGS and historical broadcasts and speeches during the past 25 years have been given by WTMJ-AM-TV Milwaukee on a permanent loan to the Milwaukee Public Library. The presentation of 376 transcriptions was made by R. G. Winnie, assistant general manager of the outlets. Records include speeches by Churchill, Hitler, former Presidents Roosevelt and Truman and other prominent figures.

CONTEST FOR PARENTS

KLAC-TV Hollywood *Televentures,* two 20-minute filmed serials shown five times weekly and sponsored by Southern Calif. Retail Grocers Assn., has added contests to appeal to parents as well as children. To be eligible, parents must enclose grocery sales slips, which give participating sponsors a record of sales, and enable contestants to win washing machines and gas ranges. Program m.c. Gary Goodwin makes personal appearances in the stores during special feature sales. Contest will run for 52 weeks.

CBC TALENT PROBLEM

Meetings will be held with a view toward applying the Massey recommendations on more local talent and programs.

MEETINGS with independent Canadian broadcasters are planned for the near future by the board of governors, Canadian Broadcasting Corp., to study practical methods of implementing recommendations of the Massey Commission on using more Canadian content in programs. CBC officials report that CBC would like to see new regulations in force as soon as possible, but there is no intention of "forcing" new or "impractical" regulations on Canadian broadcasters.

CANADA

Suggested regulations for Canadian program content vary from having such shows aired from 30% to 40% of all broadcast time, depending on the status of the network station and the area population.

The Massey Commission reported too little Canadian talent and programs are used by Canadian stations. The report, signed by the governor-general of Canada, Vincent Massey, recommended greater development of Canadian talent of all types.

CBC board reportedly believes some independent stations there are not in accord with the brief presented on this by the Canadian Assn. of Broadcasters. CBC board believes broadcasters, at informal sessions with board members, could suggest practical methods of furthering Canadian program development.

CBC has no plan to withdraw proposed regulations completely, it was learned. Some modernization of present regulations is needed, board reports, and it will collect opinions from all sources as the regulations are a "long term proposition."

CBC hopes to finalize regulations as soon as possible in order to get to the problems of licensing independent TV stations. CBC regulations for AM stations will probably apply to TV also, with some leeway expected on live program content in order to get stations on the air.

TV Production High

CANADIAN TV set production for January totaled 25,272 units valued at $10,565,428, according to figures of the Radio-Television Mfrs. Assn. of Canada. Of the total, 10,776 sets had picture tubes of 17 inches or less. January production brings total Canadian production since the start in 1949 to 250,083 sets, of which 54% are in the Toronto-Niagara Falls area, 22% in the Windsor (opposite Detroit) area, 18% in Montreal, and the rest scattered.

CANADA

CMBF-TV Havana Operating Six Hours Daily

HAVANA'S new vhf Ch. 7 station, CMBF-TV, went on the air Feb. 2 with six hours daily operation, according to Goar Mestre, director general of Circuito CMQ, S. A. The station was to be on the air nine hours a day by yesterday (Sunday), with continuous motion picture performance consisting of local news, international news, a cartoon, a documentary film, a feature picture and sports events, Mr. Mestre said.

HAVANA

Another outlet, vhf Ch. 2, was reportedly going on the air Feb. 18. Mr. Mestre predicts that there will be a total of five TV stations in Havana plus five other transmitters in the interior [B•T, Jan. 26].

CMBF-TV is equipped with a 5 kw DuMont transmitter and 6-bay superturnstile antenna, installed on top of Radiocentro Building, 300 feet above sea level. The Cicuito CMQ, S. A., director general reports that reception has been excellent, even with few high channel antennas, and that picture quality is the best yet received in Cuba.

CAB Convention Set for Next Week in Montreal

ADDITIONAL sessions on television will be on the agenda of the annual convention of the Canadian Assn. of Broadcasters at the Mount Royal Hotel, Montreal, March 9. Final afternoon sessions will deal with "How to Apply for a Television License," by Wilbert Smith, Dept. of Transport, Ottawa, and "What Happens to AM in Television Markets?," with Gene Seehafer, research and promotion manager of CBS, New York.

CANADA

Opening session on "Agency Day" will include a short business meeting in the morning and talks by Richard Gettell, Time Inc., New York, on research; sales rates and values by Pat Freeman, CAB sales director; election of directors in afternoon; discussion on programming pitfalls by Mrs. Harriett Moore, Social Research Inc., Chicago, and "How to Live With Television and Survive," Harold E. Fellows, NARTB president.

Tuesday sessions will begin with a resume on CAB's teen-age book parade program by Charles Clay, Ottawa; report on press rights committee; talk on behavior dynamics by W. H. Wulfeck, William Esty Co., New York, and discussion of public service programming. In the afternoon the annual meeting of the Bureau of Broadcast Measurement will be followed by programming discussions headed by Ted Cott, NBC, New York.

On Tuesday evening, awards will be distributed at the annual dinner.

Wednesday business sessions will begin with reports of General Manager T. J. Allard and Sales Director Pat Freeman, followed by discussion on program popularity surveys, report of standard accounting committee, the constitutional committee and new constitution, and BMI Canada Ltd., and discussion on associate member fees.

Final business sessions, TV licensing and AM programming are scheduled for the concluding session on Thursday.

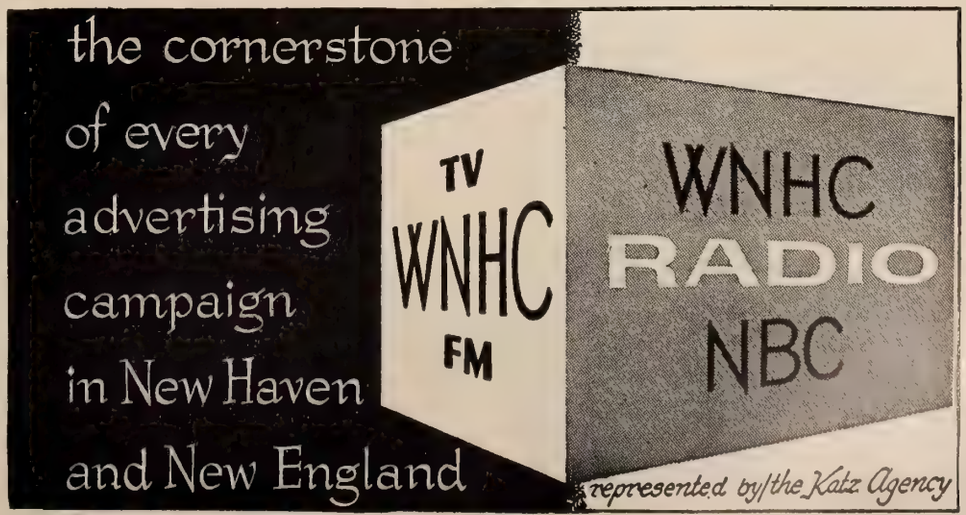
CBC to Receive Support From Tax on Sets, Parts

Government to keep separate books on revenues from set sales for maintenance of both radio and TV systems by CBC.

CANADIAN Broadcasting Corp. will be supported by the existing 15% excise tax on all radio and TV sets and tubes and components, Finance Minister Douglas Abbott said Feb. 19 in announcing abolition of the country's annual $2.50 $2.50 listener fee. [AT DEADLINE, Feb. 23].

CANADA

The Canadian government has been concerned for some time about where to obtain its revenue and still keep CBC from becoming a political patronage operation. Public opinion against the annual "nuisance" fee has mounted in recent years and political party leaders have advised the government to drop it.



To offset argument that CBC might be controlled by the political party in power, Mr. Abbott said the excise tax will supply revenue for CBC. Separate books will be kept on this revenue, dividing it into AM-FM and TV categories for maintenance of both systems by CBC. CBC expects to receive about $12 million from this source, judging the figure on the present excise tax income.

Fee Off on All Sets

The listener fee was removed from both radio and TV sets.

The new revenue source will replace about $6 million received in recent years from the listener license fee, and provide some $6 million needed for TV operations in the coming fiscal year. Revenue from TV set sales will increase as sales increase, and CBC expects to need $10 million for its TV operations within the next few years. Some of this will come from commercial program revenue.

CBC continues to receive the statutory grant of $6,250,000 for the next three fiscal years. Abolition of the annual listener license fee will save the government an estimated $500,000 in collection expenses. Move was based on the theory that the new method of financing CBC will place the cost on persons and groups receiving benefits. This especially applies to TV, which will for many years be seen in limited areas of Canada, and is designed to stop complaint that TV is paid for by the general taxpayer who may not live in a TV area.

Station Income Base for Music Fees, Court Rules

CANADIAN independent broadcasters, through a test case involving CHML Hamilton, have lost the first round in an appeal against collection of music copyright fees based on station revenue. The Exchequer Court at Ottawa Feb. 23 upheld a 1952 decision of the Canadian Copyright Appeal Board, doubling the copyright fees charged independent Canadian stations.

CANADA

The court upheld the Canadian Copyright Appeal Board's powers in basing the fees on gross revenue of the stations rather than on the number of licensed radio sets in Canada. The Canadian Assn. of Broadcasters will appeal this judgment to the Supreme Court of Canada.

In 1952, the Canadian Copyright Appeal Board ruled that independent stations should pay the Composers, Authors and Publishers Assn. of Canada (CAPAC) 1¾% of gross revenue, instead of the previous seven cents per licensed receiver. Canadian Broadcasting Corp. made a similar arrangement with CAPAC based on its commercial revenue plus one cent per capita on the total Canadian population.

This brought CBC fees to about $170,000 from $152,000 in 1951, and fees of independent stations from $152,000 to $350,000. Independent stations objected to CAPAC being allowed inspection of station books.

Harry Engel Applies For AM Outlet on Guam

APPLICATION for a grant to operate an AM station on the island of Guam was announced last week by Harry M. Engel, owner-manager of KVEN Ventura, Calif. Mr. Engel said Phil Berg, a motion picture and entertainment pioneer, will be associated with him.

GUAM

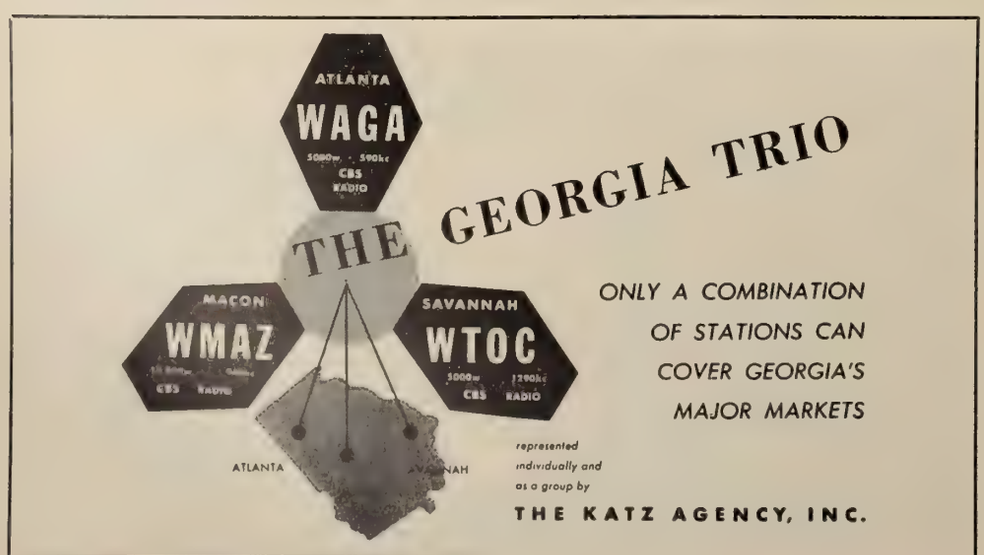
Mr. Engel said the application specifies 1 kw on 610 kc, and that operation would be 18 hours daily. He said Guam, a U. S. territorial possession, and other islands of the Marianas group, have a population of more than a hundred thousand. Guam itself has thousands of U. S. civilian and military personnel, a large native population, and has a thriving business community distributed in several population centers, he said.

Legal counsel is John Hearne, San Francisco and Los Angeles, and engineering was prepared by T & T Measurement Co., Long Beach, Calif., Mr. Engel said.

'Culture' Unlimited

FIFTEEN per cent more telecasts will originate in Moscow this year than last, according to a report from Radio Moscow received by the State Dept. The report, aired in Russia Feb. 7 for a European audience, said the number of TV viewers increases daily and now is "several times more'" than can be accommodated at one time in all of the city's theatres and concert halls. Twenty-two theatres there will telecast their best shows in an effort to "satisfy the growing cultural demands of the Soviet workers." Proposed series have been titled "Our Motherland," "The Great Construction Sites of Communism," "The Stalin Prize Winners" and "The Map of the World."

U.S.S.R.



CBC TO HEAR TV BIDS IN MARCH

APPLICATIONS for first independent Canadian TV stations will be heard by the Canadian Broadcasting Corp. board of governors in Ottawa March 26-28. Applications were filed with the Dept. of Transport, Ottawa, by Feb. 23. CBC board is to announce today (Monday) which applications will be heard.

CANADA

Applications for Canadian independent TV stations are expected from all parts of Canada. CBC has stations at Montreal and Toronto, and plans to operate stations at Ottawa, Halifax, Winnipeg and Vancouver. How much service area CBC stations will have has not been announced, and some applications from cities near these CBC-TV centers may be turned down.

Part of the TV license application was a question as to whether applicants would be ready to carry a minimum of 10½ hours weekly of CBC programs, sustaining, sponsored or both. CBC officials base this question on recommendations of the Massey Foundation that private TV stations should be part of the national CBC system by carrying a percentage of CBC-TV programs, either on film, kinescope or by microwave relay. CBC program executives believe most applicants for TV stations will welcome the minimum specification for sustaining programs.

Floridians Work to Keep All 9 School TV Channels

FLORIDA educators are working to get the state's nine allocated educational TV channels on the air, after plans were detailed at the Governor's Conference on Educational Television in Gainesville a fortnight ago. Gov. Dan McCarty named the General Extension Div. of Florida, representing state-supported colleges and universities, to handle arrangements for the conference.

Educators and consultants, meeting with members of the National Citizens Committee for Educational Television, the Joint Committee on Educational Television and Florida's Junior Chamber of Commerce, integrated local and state plans, and adopted a resolution calling for the governor and legislature to preserve and keep allocation of all the channels reserved for Florida.

List of Speakers

Speakers included NCCET representatives Clarence Adamy and Earl Minderman, both Washington; representing JCET, Graydon Ausmus, director, WUOA U. of Alabama; Franklin Dunham, radio-TV chief, U. S. Office of Education; Seymour Krieger, legal counsel, Washington; Warren Pierce, *St. Petersburg* (Fla.) *Times;* I. Keith Tyler, Ohio State U., and Harold Wigren, director, audio-visual education, Houston public schools.

Two of nine cities affected are taking definite action. Miami has applied for a construction permit and St. Petersburg has an educational TV committee. These cities, along with Pensacola, Panama City, Tallahassee, Gainesville, Jacksonville, Orlando and West Palm Beach, will submit nominations for membership on the State Committee on Educational TV.

'Pilot' Outlets Proposed

A BILL authorizing establishment of three "pilot" educational television stations by the New York State Board of Education has been introduced in the state legislature by Sen. Earl W. Brydges (R), of Niagara, chairman of the education committee.

Sen. Brydges' office said the measure would appropriate about $1.6 million to construct the three stations and $275,000 to operate each during the first year.

Proposal for the state to operate a network of 10 educational TV stations anticipated by FCC's allocations table has been the subject of wide controversy and some sources believe a personal appeal by Gov. Thomas E. Dewey would be necessary to win legislative approval for state-operated outlets. Education Commissioner Lewis A. Wilson said the Brydges bill was not sponsored by his department or by the Board of Regents.

Iowa State Offers TV News

TELEVISION NEWS is being offered as a new course by the State U. of Iowa's School of Journalism to "well-qualified persons with a background in editorial reporting and pictorial journalism." It will become a regular part of the curriculum under Prof. Arthur M. Barnes.

Capital Educators Ask FCC To Withhold Action on TV Bid

GROUP of representatives of educational and cultural institutions in the Nation's Capital asked FCC fortnight ago to withhold action on the noncommercial, educational TV application of the District of Columbia Board of Education for at least eight weeks. The purpose is to allow the drawing up of plans for community-wide participation in the station, perhaps using money from the Ford Foundation's Fund for Adult Education. Reserved uhf Ch. 26 is involved.

The request was contained in a letter to the Commission following a meeting of the group Feb. 16. The session was spurred by Earl Minderman, field liaison officer of the National Citizens Committee for Educational Television, who now is assigned full time "to do something about the Washington situation." Mr. Minderman previously was assistant to FCC Chairman Paul A. Walker.

NCCET, whose honorary co-chairmen are Dr. Milton S. Eisenhower, Pennsylvania State College president, and Undersecretary of the Treasury Marion B. Folsom, is a companion unit of the Joint Committee on Educational Television.

Since the Fund for Adult Education will not make a grant to a single entity, but rather prefers the TV applicant to be a cooperative venture representative of all aspects of a community, the group had explored means to expand participation in the Washington educational bid. Conferences with Board of Education officials are scheduled.

Delbert Clark of the Fund for Adult Education told the group the fund would consider a grant of $100,000 under certain conditions if a cooperative venture is arranged.

Southwest Radio-TV Meet

TEXAS and Oklahoma broadcasters will meet with students and teachers from colleges in five states March 5-6 at the 11th annual radio-TV conference at the U. of Oklahoma. Dr. Sherman P. Lawton, coordinator of broadcasting instruction at the university and a member of the conference planning committee, has arranged seminars on personnel, TV jobs, copywriting, selling, program standards, film and audience composition.

New Petitions . . .

February 19

Proposed new policy to govern assignment of fixed nonbroadcast stations in 72-76 mc band so as to reduce interference to TV Chs. 4 and 5 (Docket 10315)—Comments filed by CBS, submitting alternate proposals. On Feb. 20 FCC also received comments from RTMA, KSL-TV Salt Lake City (request for additional time to file data on local interference), A. Earl Cullum Jr., Associated Police Communications Officers Inc. and Aeronautical Radio Inc. Latter two contend certain provisions of proposals are too severe on fixed stations.

February 20

ABC and United Paramount Theatres merger and WBKB (TV) Chicago (Docket 10047 et al.)—Petition filed by Zenith Radio Corp. for reconsideration of memorandum opinion and order of Feb. 9 approving merger of ABC-UPT, granting transfer of WBKB (TV) to CBS and denying Zenith protest.

Storer Bcstg. Co.—Petition to reconsider memorandum opinion and order of Jan. 30 requiring Storer to elect within 30 days which of its TV applications at Miami and Wheeling it wished Commission to prosecute. FCC decision was based on its rule on multiple ownership which limits each licensee to five outlets. Storer asked stay of 30-day period until 10 days after FCC rules on petition to reconsider.

Transit Riders Assn. Inc. vs. FCC in U. S. Court of Appeals for D. C.—Brief for FCC filed with court in reply to appeal.

Mid-State Bcstg. Co. and LeRoy E. Parsons, Chehalis, Wash. New AM, 1420 kc (Docket 10126, 10127; BP-8187, 8354)—Petition by Mid-State to continue hearing at least 30 days from March 5.

February 24

Edwin J. Schuffman, Kinston, N. C. New AM grantee, 1230 kc, 100 w (BP-8438)—Petition by Wilmington Bcstg. Service for reconsideration of Jan. 23 grant to Schuffman so as to include condition station will be subject to such interference as may be caused by grant of Wilmington Bcstg. Service application (BP-7930) for 1230 kc, 250 w, at Wilmington, N. C.

FCC Report to Congress—Commission sent to Congress report of pending applications and hearing cases as of Jan. 31 pursuant to provisions of Communications Act as amended by McFarland Act.

Routine Roundup . . .

February 19 Decisions

WJAR-TV Providence, R. I., to 9-9-53 (BMPCT-983); **WBHP Huntsville, Ala.**, to 4-23-53 (BMP-6132); **KPFA Berkeley, Calif.**, to 5-1-53, extension of STA for reduced hours of operation (5:00 p.m. to 11:00 p.m.) on Saturdays and Sundays for period ending in no event later than May 1, 1953 (BMPH-4812).

Modification of CP

KIBS Bishop, Calif., Inyo Bcstg. Co.—Granted mod. CP for approval of ant., trans. and studio location and change type trans. (BMP-6055).

Granted License

KVSC Logan, Utah, Utah State Agricultural College, College Hill—Granted license for noncommercial educational FM station; Ch. 201, 10 w (BLED-129).

Granted Request

KOFO Ottawa, Kan., Ottawa Bcstg. Co.—Granted request for waiver of sec. 3.71 of rules for authority to sign off at 6 p.m. CST, Feb. through Sept. 1953.

Modification of CP

WBAM Montgomery, Ala., Deep South Bcstg. Co.—Granted mod. CP to make changes in ant. system and frequency control equipment of AM station; conditions (BMP-6104).

Extension of Completion Date

WEBC-FM Duluth, Minn., Head of the Lakes Bcstg. Co.—Granted mod. CP for extension of completion date to 8-19-53 (BMPH-4809).

BY COMMISSION EN BANC

Midway Bcstg. Co. Inc., Pittston, Pa.—Granted CP for new AM on 1540 kc 1 kw D; engineering condition (BP-8567).

Tallassee Bcstg. Co., Tallassee, Ala.—Granted CP for new AM on 1300 kc 1 kw D; engineering condition (BP-8414).

KIFN Phoenix, Ariz., Western Bcstg. Co. Inc.—Granted CP to increase power from 250 w to 1 kw, operating D on 860 kc; engineering condition (BP-8585).

Feb. 25 Applications

ACCEPTED FOR FILING

Change Name

KMPC Los Angeles, KMPC Inc.—Mod. CP to change name to KMPC, The Station of the Stars (BML-1537).

Change Transmitter Location

WGMS Washington, The Good Music Station Inc.—CP to change trans. location from Falls Church, Va., to Potomac, Md. (BP-8764).

Extension of Completion Date

WHWD Hollywood, Fla., Circle Bcstg Corp.—Mod. CP (BP-7750), as mod., which authorized new AM, for extension of completion date (BMP-6138).

Change Studio Location

WHYN Holyoke, Mass., The Hampden-Hampshire Corp.—Mod. license to change studio location from Holyoke, Mass., to South Hadley Falls, Mass.

Change Transmitter Type

WIHL Hammond, La., Cefalu Radio Station—Mod. CP (BP-8355), which authorized change in frequency and hours of operation, to change type trans. (BMP-6127).

WJMC Rice Lake, Wis., WJMC Inc.—Mod. CP (BP-8600), which authorized change in trans. and studio location and installation of new ant. and ground system, to change type trans. (BMP-6139).

License Renewals

Following stations request renewal of license: **WWWR Russellville, Ala.**, Bankhead Bcstg. Co. (BR-2302); **WGLS Decatur, Ga.**, DeKalb Bcstg. Co. (BR-2255); **KWNO Winona, Minn.**, Maxwell H. White (BR-955).

TENDERED FOR FILING

Modification of CP

KCTG Cottage Grove, Ore., Coast Fork Bcstg. Co.—Mod. CP to change trans. and studio location from Cottage Grove, Ore., to Springfield, Ore.

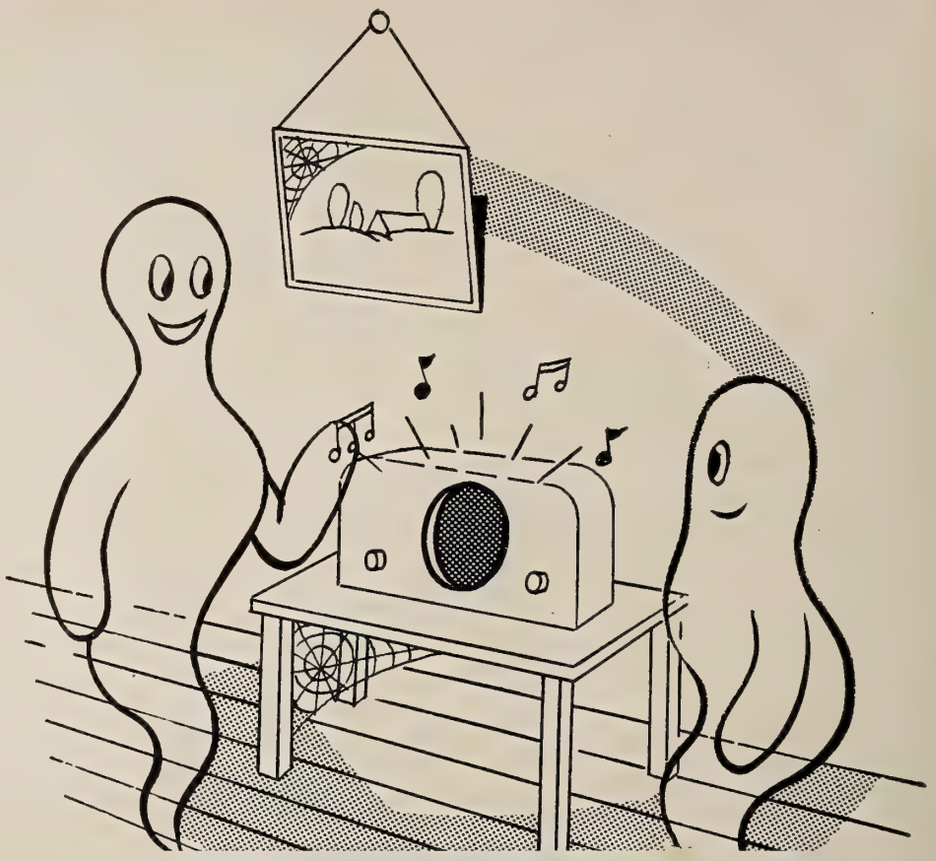
Topnotch TV RADIO PERSONALITY

17 years all phases of broadcasting. Station manager, program, news, special events director. TV producer-director. Staff NBC, N. Y.; WNEW, N. Y.; WJAR, Detroit; WLW, Cincinnati; WTAM, Cleveland. Wife is British starlet and only BBC disc jockey in country. Excellent husband-wife team.

If you're looking for TV-AM program director who will be your outstanding air personality, I'm your man.

Write, wire or phone Don Cordray, c/o Tom Slater, Vice President, Ruthrauff & Ryan, Inc., 405 Lexington Ave., New York, N. Y.

Spot Sell



MANY broadcasters may at first react antagonistically to the proposal of the Station Representatives Assn. that they contribute funds for a "Crusade for Spot Radio." It would be a natural reflex, in view of the numerous other enterprises that broadcasters are called upon to support.

It is to be hoped, however, that their first reactions will not survive a reconsideration of the plan, for in our opinion there is much to be said for it.

To begin with, there is merit in the argument that the spot crusade is a necessary addition to the basic work of selling radio which BAB is doing. As the SRA letter points out ". . . BAB, by its very nature, is unable to refine its activities specifically to the promotion of spot." The truth is, of course, that spot is sold not only in competition with other media but also in competition with the other form of national radio business—network. It would hardly do for BAB to get into an intra-medium fight.

Without touching on the question of whether network or spot is the better technique (indeed we doubt that a general answer to that question is possible), we are all for the promotion of all types of radio advertising. The networks are equipped and financed to carry on vigorous campaigns. We see no reason why spot broadcasting should not be similarly equipped.

The contributions asked individually of stations for the "Crusade for Spot Radio" appear to be reasonable. Half the price of a daytime minute announcement per month certainly won't put any station out of business. If enough contribute and the money is used well, it might put some stations in bigger business than they have been in.

Drawn for BROADCASTING • TELECASTING by Frank Tabor

"I prefer the disc jockey shows. Live broadcasts are so boring."

Educated TV*

THE ARGUMENTS against non-commercial, educational television have never been more clearly stated nor the reasoning behind them more sensibly explained than in the majority report of the New York temporary state commission that studied this subject.

The report seems the more remarkable for its level-headedness in comparison with the befuddled behavior of the New York State Board of Regents which has applied for and been granted construction permits for seven non-commercial, educational stations without having a penny to build and run them.

The regents' utopian plan is to build a total of 10 such stations. It is their belief that the stations can be erected for $3,855,540 and operated for $2,273,940 per year. Compare those figures with the estimates of the special commission's report.

The commission says it would take $6 million to build the stations and $8,250,000 per year to run a bedrock operation. We don't know where the Board of Regents got its figures, but we'll choose the estimates of the commission without question.

The commission included members who demonstrably know what they're talking about. Ben Duffy, president of BBDO, knows about television costs the hard way—as chief executive of an agency that spends more money than any other in TV. Mike Hanna, general manager of the Cornell-owned WHCU Ithaca, which holds a CP for a TV station that will be *commercial*, like its radio sister, is a serious and successful broadcast businessman.

The commission's report deserves attentive study by educators who have been mesmerized by more flowery, but less intelligent, arguments urging them to take the plunge in non-commercial, educational TV.

Killing Pace

LAST Monday night, Norman (Hap) Webster, 45, chief engineer of the McClatchy stations, died in Baltimore. Heart failure.

He was en route to Camden from Washington where he had participated for weeks in hearings before an FCC examiner on McClatchy's application for TV in Sacramento. The hearings had begun on Nov. 17.

Hap Webster had undergone months of intensive preparation for these hearings. He sat in on proceedings all day. At night he and other McClatchy executives prepared for the next day. The pace was more than even his young physique could stand.

Hap Webster is a martyr as truly as if he had been in the front lines. More, he is a symbol and a warning. He is the only fatality ascribable to the FCC's grueling comparative hearing procedure—so far. But he isn't the only casualty. One of his colleagues, John Hamlyn, executive and attorney of the McClatchy newspapers and stations, suffered a near collapse and was hospitalized.

In the Denver Ch. 4 hearing last fall, Al G. Meyer, manager of KMYR, suffered a heart seizure while on the stand. The toll has been heavy on other participants.

Never in the annals of administrative practice have we witnessed anything so trying and oppressive. In their zeal to make the best showings, opposing counsel have forced witnesses to bare their souls. Thus far, just five hearings of 23 which have started since the thaw last April, have been completed. Some have run 100 days. The transcripts are staggering. A rough estimate places the cost of a single average participant at $75,000. This includes housing and feeding of staff executives in Washington, attorney's fees, transportation and transcript.

This now becomes trivia. Human life and well-being are involved.

What's the answer? How can the proceedings be trimmed to essentials, eliminating self-serving testimony, ludicrous cross-examination and brow-beating? There must be a complete revision of the rules of the game.

The hearing process is getting nowhere. The hold-over Democratic FCC hangs in suspended animation.

What's needed—and fast—is a new chairman who has the backing of the administration. This is no criticism of the incumbent who knows he serves by sufferance, and who is surprised the change didn't come Jan. 20.

Last week we implored President Eisenhower to name his new chairman and get the reorganization underway. This week, we cite the tragic case of Hap Webster.

...to the time buyers for food and drug advertisers

FACT THAT no announcement was made of appointment of Rosel H. Hyde to FCC chairmanship following his half-hour session Friday with President Eisenhower (see story page 27) doesn't necessarily preclude appointment. It was pointed out that Edward B. Brossard, Republican member of Federal Tariff Commission, was called to White House last Wednesday, and his appointment as chairman of that agency wasn't announced until Friday.

★ ★ ★

SHORTLY TO be unveiled will be multi-million project, as New York's answer to Hollywood on TV. New life has been breathed into Tele-City Inc. by both New York State and New York City authorities, who proposed gigantic development at Flushing Meadows, site of famed World's Fair, with Frank Connaughton, New York City commerce commissioner, and Porter Moore, executive director of Manhattan Downtown Assn., ram-rodding project. Plan has gone to point where all networks and many related TV independent production enterprises have been contacted to set up fully integrated, all-purpose TV (and radio) live and film production, with all modes of transportation direct from New York.

★ ★ ★

E. LANSING RAY, venerated publisher of *St. Louis Globe-Democrat,* which owns minority of KWK, conferred with President Eisenhower last Wednesday. It's reported he made plea for speedy hearing on KWK's application for vhf Ch. 4, citing "one station market" aspect and fact that competitive newspaper, *Post-Dispatch,* has only facility. Competing for Ch. 4 assignment are KXOK, owned by former publisher, Elzey Roberts, interests; KMOX (CBS owned), and Meredith Engineering Co. (Meredith Publishing Co.).

★ ★ ★

ONE NEW "wrinkle" in projected General Mills spot plan (see story page 9) is firm's insistence on "two weeks on, two weeks off" basis, thus giving client "floating" schedule. General Mills thus hopes to ride crest of "economic and psychological" benefits perhaps bypassing certain periods in summer months.

★ ★ ★

GENERAL MILLS new philosophy may be summed up this way: Radio is worth more in some markets than others. More radio-TV stations (both network affiliates and independents), following lead of networks' special plans (tandem, etc.), are offering "package purchases." With local competition what it is, stations will succumb more readily to GM overtures.

★ ★ ★

CONCERN BEING evinced in some Congressional circles over diversification of station ownership. Inquiries directed to FCC, it's learned, have questioned newspaper ownership of both radio and television stations and, latterly, have raised same issue about theatre or motion picture ownership. Newspaper ownership issue has bobbed up repeatedly for past 20 years. ABC-United Paramount merger believed responsible for inciting theatrical ownership queries.

★ ★ ★

WALTER J. DAMM, vice president and general manager of WTMJ-AM-TV Milwaukee, won't attend NARTB convention in Los Angeles next month. A former NAB president (1930-31), he contends convention should be anchored in New York like ANPA and not shifted from place to place.

★ ★ ★

UHF OUTLETS have better chance with ABC than other networks, according to spokesman for newly emerged AB-UP organization. Its approach, presumably, is to add affiliates irrespective of spectrum assignment, where markets fit into its operating plan.

★ ★ ★

CRUSADING Commissioner Freida B. Hennock may have new horse to ride—literally. Returning to FCC councils last week after Florida trip, she took off on horse racing programs on Miami stations. Many stations in past have been temporarily licensed because of purported aiding and abetting of bookies.

★ ★ ★

CHANGE in Administration has given rise to question whether Conelrad project assuring continued operation of AM broadcast stations in event of national emergency needs approval of President Eisenhower. Prior to administration change, all clearances, including White House, military and Federal Civil Defense Administration, had been procured and FCC last week moved to integrate plan in its rules and regulations. But to avoid any possible slip, it's likely matter will be brought before President Eisenhower shortly for his reaction and hoped-for blessing.

★ ★ ★

STRONG campaign underway to elect Emilio Azcarraga, Mexican radio-TV station owner, as president of Inter-American Broadcasters Assn., which he helped found six years ago. He would succeed Goar Mestre, head of CMQ radio-TV enterprises in Cuba, who has served three years. Convention gets underway this week with expected attendance of 200 at San Juan.

★ ★ ★

SOMETIME SOON FCC, *en banc,* will meet with its hearing officers in effort to simplify and expedite hearing procedures, notably in connection with TV. Also upcoming: Elimination of nine o'clock starting time which has brought general protest both within and outside of FCC.

★ ★ ★

WHILE NARTB is setting up catechism session to instruct members of special committee assigned to evaluate projected BMB-type survey of television coverage, it's understood CBS has devised method of its own to give factual picture of network's television coverage and markets.

ABC Plans Four Television Fights Each Week

PLANS for expanding TV fight coverage to four nights per week and launching new weekly dramatic series reportedly unveiled to members of ABC TV Stations Advisory Committee among other program and operational plans Friday as network officials held first meeting with committee since ABC merged with United Paramount Theatres (earlier story page 72).

March 19 *Motor City Fights* is slated to start as Thursday night feature from Detroit (9 p.m.), and pickups of Chicago and west coast bouts scheduled to be added in early or mid-April. Dramatic series, set as Sunday evening half-hour called *ABC Album,* scheduled to start April 12 and to include all drama forms. On third show, May 3, it is planned to introduce *Pageant,* two-part adaptation from classics. Among stars reported under consideration for *ABC Album* are Paul Douglas, Audrey Christie, John Hodiak, Allen Mowbray, Walter Slezak and Joseph Schildkraut. One already signed is Brandon DeWilde.

In another program move, *Dr. I. Q.* TV show may be launched shortly, alternating with *Quick as a Flash,* which starts Thursday.

Expansion of affiliate list, "the new ABC," other blueprints for building ABC-TV into top-flight competitive network were among other subjects discussed at all-day meeting with affiliates group. No new chairman named to succeed Mort C. Watters, WCPO-TV Cincinnati, who has resigned as chairman of affiliates committee.

RADIO, TV BEAT

UNMATCHED mobility of radio and TV as news media underscored as networks flashed news of Premier Josef Stalin's death immediately after first report received at 8:12 p.m. EST Thursday and followed with news of Georgi M. Malenkov's appointment as his successor Friday afternoon.

CBS Radio claimed to broadcast death bulletin at 8:13 p.m. and ABC radio, NBC radio and Mutual, 8:14 p.m. TV networks carried reports minute later, with DuMont interrupting regular programming at 8:20 p.m.

TV Election Procedure Is Started by NARTB

ELECTION forms for certification of TV station executives eligible for nomination to NARTB TV board mailed Friday by C. E. Arney Jr., secretary-treasurer. Four vacancies to be filled at balloting April 28 during NARTB Los Angeles convention. Expiring station-director terms are those of William Fay, WHAM-TV Rochester; Ken Carter, WAAM (TV) Baltimore; Campbell Arnoux, WTAR-TV Norfolk, Va., and Henry W. Slavick, WMCT (TV) Memphis.

Committee of three named to certify results of NARTB Radio Board elections next Friday. Odd-numbered districts and one each of at-large classifications involved.

• BUSINESS BRIEFLY

MAXWELL HOUSE REGIONAL • Maxwell House regular coffee, through Benton & Bowles, New York, placing approximately two-week radio campaign in lower New England area and some southern markets starting Wednesday.

BIBLE SHOWS • Revised Standard Version of the Bible, through BBDO, N. Y., using five-minute shows, three times daily, for 10-day period starting Tuesday in seven radio markets.

BBDO PUSHING *KEEP POSTED* • Television program *Keep Posted,* which Curtis Pub. Co., through BBDO, N. Y., cancels at end of this month (see story page 29) being pitched to two other BBDO clients, E. I. du-Pont and Hamilton Watch Co.

FLOUR AGENCY • Martha White Mills Inc., largest flour advertiser in South, names Noble-Dury & Assoc., Nashville, as agency for Martha White flour and other food products. Cohen Williams, president of advertiser, said firm uses radio, TV and other media. Account formerly split between Griswold-Eshleman, Cleveland, and Cruttenden & Eger, Chicago.

NEW PHARMCO PRODUCT • Pharmco Inc., introducing new product called Medigum, medicated chewing gum, planning radio spot announcement campaign starting mid-March in about 25 markets.

ARMSTRONG CONSIDERS NEWS • Armstrong Rubber Co., Westhaven, Conn., likely will take over early-morning Peter Paul Candy radio news shows on regional basis during June, July and August, repeating its policy of last year. Maxon Inc., New York, handles both Peter Paul and Armstrong.

GENERAL MILLS SEEKS 'PACKAGE' OFFERS

GENERAL MILLS, Minneapolis, will rely on "package purchases" offered by radio-TV stations in different markets rather than on uniform rate formula of last year, it was revealed Friday.

Starting date for 52-week schedule on two week-alternating basis is April 5. Campaign will run through Oct. 11. Reduced schedule planned for period from Oct. 18 to March 27 with considerable number of announcements—predominantly radio—in over 125 markets, Lowry Crites, GM radio-TV-media director, told B•T. Company has asked stations to submit availabilities. Company used over 900 announcements last year.

Rates expected to differ in varying markets, depending on what stations offer, with stations to be selected on basis of budgets, costs, ratings, coverage, whether TV or not is involved and type of schedule to be offered. Blueprint is amalgamation of four separate plans covering different products: Wheaties, Cheerios, and others.

Spot adjacencies for Wheaties spots will be sought in late afternoon and evening hours around children's shows and those of general adult interest.

Plan throws General Mills business into wide open competitive scramble according to some radio-TV representatives.

Executives of Knox-Reeves Agency, Minneapolis, conferred with representatives Thursday. Agency reported favorable response. Mr. Crites said that "far, far more" than 20 "top" stations previously reported as approving have expressed interest in campaign. GM budget for radio-TV or product breakdown still unset, he added.

Here are the features of four plans for Wheaties campaign:

Plan No. 1—Starts April 5, or actual broadcasting weeks, 10 announcements per day, 70 per week for total of 980. Second campaign starts Oct. 18, with nine announcements per day for 24 weeks. Total schedule: 1,196 announcements.

Plan No. 1A—Same as plan No. 1 except second Oct.-March drive is eliminated. Total announcements: 980.

Plan No. 2—Same as plan No. 1 save schedule is reduced 50%. Oct.-March is same. Total announcements: 706.

Plan No. 2A—Same as plan No. 2 without Oct.-March schedule.

All major plans provide scheduling contain at least 50% of night spots be minutes.

April-September campaign is non-cancellable, but fall-winter drive is cancellable at 13-week cycles on 30 days notice.

General Mills also will use additional schedule of 25 announcements per week for six months for its Kitchen Tested Flour, to be placed through Dancer - Fitzgerald - Sample, New York, in some markets. Wheaties plan also calls for 1,000 TV spots over 52-week period in key markets.

Pooled Atom Broadcast

POOLED telecast of atom blast at Yucca Flat March 17 will be carried by ABC, CBS and NBC TV networks, 8-8:30 a.m. EST, with Frank LaTourette, manager of ABC newsroom in Los Angeles, producing. CBS-TV will do live telecast of aftermath 4:30-5 p.m. and TV documentary 8-9 p.m., as well as preview March 15, 2-2:30 p.m. NBC-TV will do live aftermath pickup 4:45-5 p.m. plus film coverage on *Camel News Caravan* 7:45-8 p.m. Du Mont schedule not set, probably will be film coverage. Radiowise, ABC will cover blast 8:15-8:30 a.m.; NBC also will have early morning from-the-scene broadcast, plus report on *News of World* 7:30-7:45 p.m. and 11:15-11:30 p.m.; CBS and MBS will cover event, but times still unscheduled Friday.

Stanton, White to Speak

CBS PRESIDENT Frank Stanton and NBC President Frank White will address closed session on television, scheduled for final afternoon (Friday) of 44th Spring Meeting of Assn. of National Advertisers, March 18-21, The Homestead, Hot Springs, Va. Mr. Stanton will speak on TV's cost and contribution to advertisers; Mr. White on programming as responsibility to advertisers as well as broadcasters.

...to thoughts of securing increased summer sales for his client (that is, if the young man happens to be a timebuyer).

Early selection of salesman "Speedy" to cover the Billion Dollar Toledo Market will leave many leisurely moments for the young man's fancy to turn to thoughts of more enjoyable pastimes.

Radio, TV Kept Detroit Lions in Black

RADIO and TV broadcasts accounted for $113,000 of total $114,000 profit made by champion Detroit Lions professional football team in 1952, General Manager Nicholas Kerbawy testified as final defense witness in trial of government's anti-trust suit against National Football League in Philadelphia. He said club lost money in 15 of its 17 years and that he didn't know how its franchise kept going. Lions made $65,525 in 1951 and $114,000 in 1952, he reported.

Jerry Jordan, radio-TV research specialist who has made extensive studies into impact of radio-TV on sports gate receipts, slated to appear Wednesday as government rebuttal witness (early story page 58). Mr. Jordan is son of C. L. Jordan, executive vice president of N. W. Ayer & Son, Philadelphia. Defense rested its case last Thursday.

Share-Time Application; Other FCC Actions

ANOTHER share-time application filed late last week at FCC, following first share-time grant two weeks ago at Salinas-Monterey, Calif. [B•T, March 2]. Veterans' Bcstg. Co. (WVET) and WHEC Inc. (WHEC), both Rochester, N. Y., amended post-thaw applications [B•T, July 7, '52] to request grant of vhf Ch. 10 on share-time basis (alternate days, alternate nights), construction and operating expenses of transmission facilities to be shared equally. Applications amended to change cost estimates, certain facility descriptions, program schedules.

Other applications filed late last week:

El Dorado, Ark.—TV Enterprises Inc. (KARK Little Rock), vhf Ch. 10, ERP 31.6 kw visual, 17.05 kw aural, antenna 324 ft. above average terrain. Construction $196,921, operating $110,000, revenue $150,000.

Waterloo, Ind.—Tri-State TV Inc. (WDOK Cleveland), uhf Ch. 15, ERP 20.3 kw visual, 10.98 kw aural, antenna 919 ft. Construction $198,582, operating $203,640, revenue $244,200.

Television actions reported by FCC Friday included:

WNBF-TV Binghamton, N. Y., operating on vhf Ch. 12, granted change in effective radiated power from 52.5 kw visual and 26.25 kw aural to 310 kw visual and 160 kw aural. Antenna height above average terrain changes from 820 ft. to 810 ft.

KCTY (TV) Kansas City, new grantee assigned uhf Ch. 25, granted change in ERP from 93 kw visual and 51 kw aural to 94 kw visual and 50 kw aural, increase antenna from 390 ft. to 820 ft. and move transmitter site from Broadway and 26th St. to Overland Park. Studio is specified as Pickwick Hotel.

WTVI (TV) Belleville, Ill., new grantee on uhf Ch. 54, granted change in ERP from 220 kw visual and 120 kw aural to 205 kw visual and 105 kw aural, increase antenna from 614 ft. to 630 ft. and change transmitter site from 0.8 mi. west of city on 88th St. to studio location, 10200 W. Main St.

WFTL-TV Ft. Lauderdale, Fla., new grantee on uhf Ch. 23, granted reduction in aural ERP from 56 kw to 50 kw with visual ERP of 100 kw remaining same. Studio site is changed from 1785 SE 15th St. to 229 SE 1st Ave.

WFBM-TV Indianapolis, operating on vhf Ch. 6, granted boost in ERP from 28.2 kw visual and 18.1 kw aural to 100 kw visual and 50 kw aural, antenna height of 400 ft. remaining unchanged.

WTVP (TV) Decatur, Ill., new uhf Ch. 17 grantee, granted change in ERP from 18 kw visual and 9.8 kw aural to 17 kw visual and 9.3 kw aural, increasing antenna height from 310 ft. to 540 ft.

KTTS-TV Springfield, Mo., new grantee on vhf Ch. 10, granted special temporary authority for interim operation using temporary 85 ft. tower for period March 5 to June 8. ERP in regular permit is 12.76 kw visual and 6.38 kw aural.

INCREASE FOR RADIO

"RADIO has been so effective for us this season," James R. Roberts, account executive on Monticello Drug Co. (666) account for Charles W. Hoyt Co., New York, told B•T Friday, "that we expect to increase the schedule of radio markets in the fall." Meanwhile, present cold remedy schedule ends this month.

AFTRA WJBK Boycott Threat

NEGOTIATIONS between AFTRA Detroit local and WJBK-AM-FM-TV Detroit broken off following last-minute effort to avoid strike call set for this (Monday) morning. Union has been seeking entry into WJBK, having contracts at all other Detroit stations, it says. Currently union has been trying to have exclusive representation of freelance employes at WJBK.

Love Lucy More Efficient Than 'Life' or Papers

PHILIP MORRIS President O. Parker McComas regards company's $8-million contract for *I Love Lucy* (CBS-TV, Mon., 9-9:30 p.m.) as probably "one of, if not the most, efficient advertising buys in the entire country." Addressing financial analysts of Philadelphia, he said:

As you must be well aware, this show is the all-time phenomena of the entertainment business. On a strictly dollars-and-cents basis, it is twice as efficient as the average nighttime television show in conveying our advertising message to the public. It is nearly three times more efficient dollarwise in reaching adults than *Life* or your own Philadelphia newspapers. Three times more people see every Monday night's *I Love Lucy* show than watched all the major league baseball games last year. Dollarwise, although the entire sum sounds huge, it is probably one of, if not the most, efficient advertising buys in the entire country. In addition, we derive many supplementary merchandising and publicity benefits from the show. As you can see, "We love Lucy."

Contract, signed with "Lucy" stars Lucille Ball and Desi Arnaz and hailed by CBS-TV as "largest single contract ever signed in television," is non-cancellable agreement for showing of "Lucy" on CBS-TV under PM sponsorship for another 2½ years [B•T, Feb. 23].

W. L. Day Rites

FUNERAL of William Leamy Day, 67, New York advertising executive, founder of Day, Duke & Carlton and president until agency was dissolved, was to be held yesterday (Sunday) at Frank Campbell funeral home in New York. Mr. Day died Thursday after long illness.

Surviving are his wife, Mrs. Frances Breedon Day, one son, Sherwin Cathcart Day, and one daughter, Mrs. Richard V. Goetz.

KTVH (TV) Signs CBS-TV

KTVH (TV) Hutchinson, Kans., signed as CBS-TV basic interconnected affiliate, effective July 1, network announced Friday.

PEOPLE

DAVID C. KETNER, previously advertising vice president of Pepsodent Division, Lever Bros., N. Y., and before that advertising manager, Procter & Gamble, Cincinnati, elected president of Stoppers Inc., N. Y. (Stoppers and Chasers, breath sweetener confections) succeeding **J. ROY ALLEN,** who was promoted to chairman of board.

SAM HENRY Jr., vice president and account executive with Robert W. Orr Assoc., N. Y., to ABC-TV's sales department as an account executive.

HERB LUND and **RUDOLPH M. SINGER Jr.,** account executives, Ruthrauff & Ryan, Chicago, elected vice presidents of agency.

AWARD for 50 years membership in Sigma Alpha Epsilon fraternity presented Friday night to FCC Chairman **PAUL A. WALKER** at annual Founders Day dinner held at National Press Club, Washington. Presentation was by Carleton U. Edwards, president of Washington Alumni Assn. of fraternity.

JAMES F. BLACK, previously with William H. Weintraub Co., to Benton & Bowles, New York, as account executive, and **WRIGHT FERGUSON,** formerly with Connecticut General Life Insurance Co., to B&B as assistant account executive on Mutual of New York account.

WILLIAM R. ARNOLD, formerly WOR-TV account executive, to ABC's WABC-TV New York (formerly WJZ) in similar capacity. He was eastern sales manager, Pittsburgh & West Virginia Railroad, from 1938 to 1951.

Postpone WGRD Decision

U. S. Court of Appeals in Washington Friday postponed decision on request by WGRD Grand Rapids for stay order on FCC grant of Muskegon uhf Ch. 35 to Versluis Radio & TV Co., but expedited case by scheduling oral argument for March 19 on merits of WGRD appeal against FCC dismissal of its protest against the FCC Muskegon grant. WGRD is opposing Versluis grant on grounds that it is more Grand Rapids station than Muskegon station. FCC dismissed WGRD protest because it said Grand Rapids station had no standing as a party in interest. Oral argument before Court took place Thursday (see earlier story page 52).

Csida to Music Publishers

JOE CSIDA, executive editor of *The Billboard*, amusement journal, has resigned effective March 20 to become vice president and general manager of group of music publishing and talent management houses. Companies are Santly-Joy, Oxford and Hawthorne, members of ASCAP, and newly-formed house to be affiliated with BMI under corporate name, Trinity. Mr. Csida will participate in ownership of group. He will be succeeded by Roger Littleford, co-publisher, who becomes acting editor-in-chief.

Unity Promotions

SYDNEY MAYERS, New York film attorney, named to newly-created post of administrative vice president in charge of legal and contract departments of Unity Television Corp., N. Y., by Unity President Arche Mayers. He also reported following additions to sales staff: Bill Young, formerly with Vitapix and Lang-Worth features, as regional manager in Chicago, Detroit and Cleveland; Vic Bikel, previously with United Artists, southwest division manager, and Phil Besser, formerly with Roshon Films, as southeast division manager.

KOA
DENVER

Covers the West BEST!

Sells the West BEST!

No other available medium covers as much territory—reaches as many people in the West

KOA covers over 1,100,000 square miles. There are nearly 10,000,000 people in this area.

The area covered by KOA is radio country — and it will be for years to come. IT'S BEYOND TV HORIZONS...only a few spots are being reached by TV — yet *ALL* of this area is being covered by KOA.

KOA program schedules are designed to appeal to the greatest possible number of western listeners — to match KOA'S extensive coverage.

There is still a chance on KOA — for you to own a valuable western advertising franchise.

Ask for our periodic bulletins THE WESTERN MARKET

THE EDDIE ALBERT SHOW

Mon.-Fri., 3-3:30 p.m. EST on CBS-TV.
Packaged by CBS-TV.
Cast: Eddie Albert and Ellen Hanley.
Producer: Franklin Heller.
Director: James Sheldon.
Writers: Jack Woods, Charles Romine and Leslie Lieber.
Music: Norman Paris Trio.

TELEVISION programming underwent no drastic change when Eddie Albert, stage, screen and radio actor, and vocalist Ellen Hanley introduced a half-hour variety show on CBS-TV last week. For lack of a better title, Mr. Albert almost apologetically explained in the first few minutes of the telecast that the daily show had been christened *The Eddie Albert Show*—just a friendly little get-together and he hoped the audience would like it. As the half-hour rolled by, it became evident that as much time and planning had gone into the production as had been spent on the title. Pace-wise, this is about as slow as shows can get.

Mr. Albert with the help of Miss Hanley, conducts an interview, talks a little, sings a little and looks all-thumbs a lot. He is plain un-

comfortable and for good reason too. This new vehicle is no challenge to a versatile performer. The package show, a sustainer incidentally, has been thrown together with a minimum of planning and a great faith in Mr. Albert's ability to cover up the rough spots. Outlines are all well and good as a departure point, but in this case nobody got around to working out the details.

Although Mr. Albert is most at home in situation comedy, his writers make no use of this talent. Chatter was straight, folksy and in content ran the gamut from Hi-all-you-nice-people-in-Timbuktu to Be-*sure*-you-see-*Studio One*-tonight!

Capt. Hassold Davis, an explorer, was a guest on the initial telecast. He made a few statements, in reply to Mr. Albert's questions, on the kick one gets out of treasure hunting.

Ellen Hanley, who helped Mr. Albert hold the fort, is an attractive girl with an equally attractive way with a song. Her solo spot would have been all the more pleasing if it had been staged and directed well.

Behind-the-scenes people who come up with new program ideas often presume on the talent of a star. It's an exceptional actor who can talk and sing his way through 30 minutes effectively when he hasn't been supplied with good material. This was Mr. Albert's assignment. Execution of same met with rather mediocre results.

NEWS-O-RAMA

Mon., 9-9:30 p.m. EST on WPIX(TV) New York.
Producer: Columbia U. Graduate School of Journalism and WPIX(TV).
Director: Ted Estabrook, WPIX(TV).
Featured Commentators: Columbia U. journalism students.

THE PROBLEM of presenting news on television has plagued the most experienced of broadcasters, who have long groped for a formula that will overcome the time lag in pictures. Wisely, the producers of *News-O-Rama* have shunned the element of immediacy in the news, and have chosen to view the parade of world events from the wide end of the telescope, concentrating on such long-range implications of the news as its effect on average members of the community and its impact on tomorrow's headlines.

Produced in the main by graduate students at Columbia U.'s School of Journalism, *News-O-Rama* lacks the gloss and polish of many commercial news programs. But this semi-professional coating, if you will, is no handicap. It serves to emphasize that the participants are earnest, intelligent and well-intentioned citizens of the community trying to find out what happened; what it means to them, and what it is likely to mean to them next week, next month, next year.

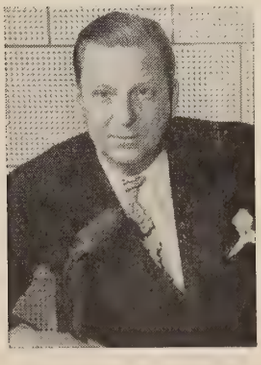
Frankly described as an "experimental" news program that is scheduled to run at least 12 weeks, *News-O-Rama* stands as a tribute both to WPIX(TV) and Columbia U. for their contributions toward the understanding of current events. It considers the limitations of background of the average viewer and attempts, without pretension or condescension, to "fill him in" and sharpen his judgment on the meaning of news events to him as an average citizen.

Two Documentaries

In this perspective, the initial program last Monday highlighted a 10-minute documentary on the current meat situation and a similar report on the United Nations. The first presentation was directed toward answering one vital question: "What does this all mean to Mrs. New Yorker in the way of meat prices?" The UN report, stressing that Lester Pearson of Canada was likely to be named as secretary-general of the world organization, embodied an analysis of what leading figures at the UN recommended as means by which friction between the Soviets and the western world could be minimized.

One outstanding departure from most news programs is the use of Prof. John Foster of the School of Journalism as a gentle but forceful "heckler." Undoubtedly, many TV viewers often wished they could stop a newscaster to ask him to clarify a technical term or justify the validity of an extreme statement. In this role, Prof. Foster interrupted a student newscaster from time to time to ask, for instance: "Now exactly what does 'parity' mean?" "Will meat prices continue to drop or is this just a short-time thing?" "What makes many people at the UN think that Mr. Pearson can deal with the Russians?"

It would seem the program's format may well be adaptable to any community, large or small, located near a university. In programming such as this, mobilizing the technical know-how of professional TV practitioners and the resources of an institution of higher learning, may well lie part of the answer to improved television-for-education.



This is Mr. B. E. Claypool

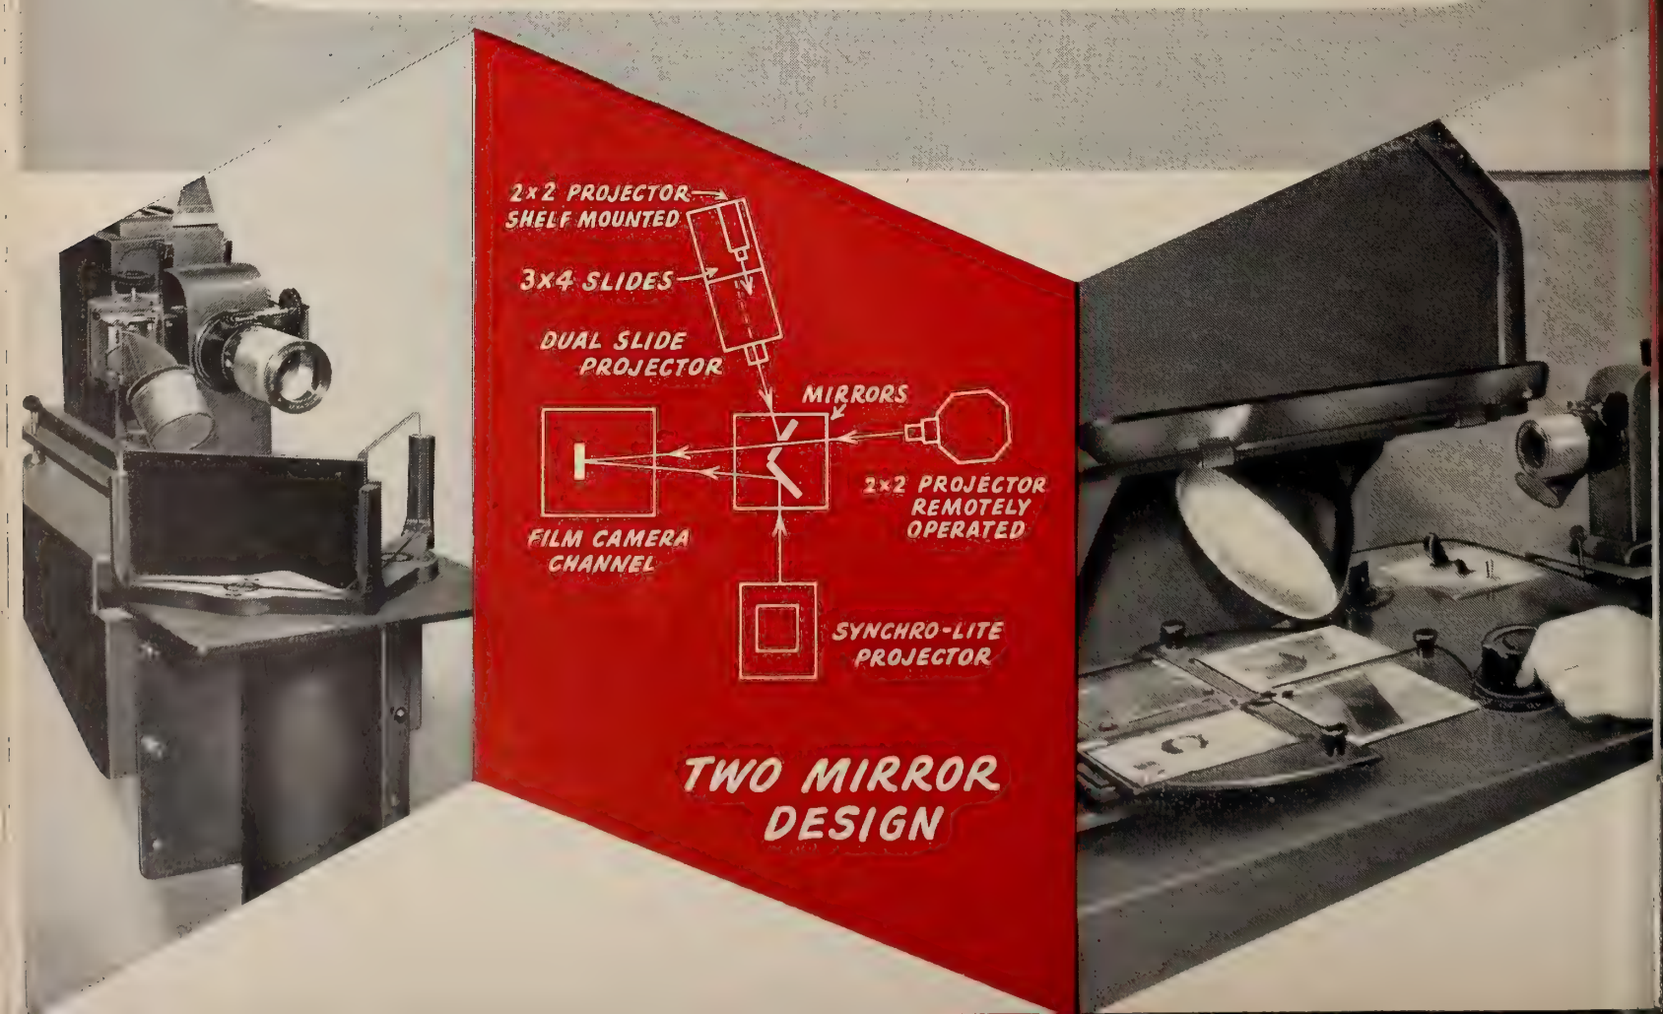
This is what he says

"*The Merchants National Bank* (of which he is president) *is happy to renew, for the third year, sponsorship of the Fulton Lewis, Jr., program* (on WMON, Montgomery, W. Va.). *Fulton Lewis, Jr., is our number one salesman. As our only regular advertising medium, his program has brought us an increase of 50% in Christmas savings club accounts, plus many new depositors and customers for our bank.*"

This is Fulton Lewis, Jr.

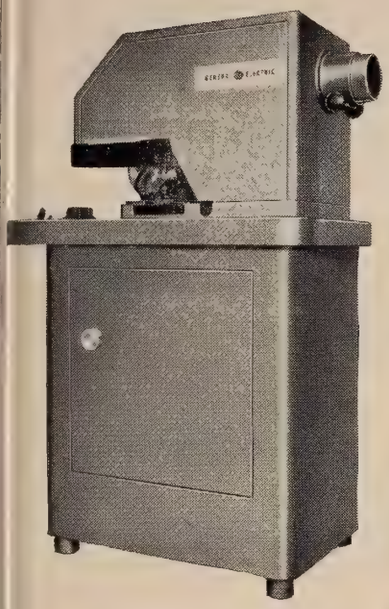
whose 5-times-a-week program is available for sale to local advertisers at local time cost plus pro-rated talent cost. Currently sponsored on 364 Mutual stations by 752 advertisers (including 60 financial institutions), the program offers a tested means of reaching customers and prospects. Check your local Mutual outlet or the Cooperative Program Department, **Mutual Broadcasting System,** 1440 Broadway, NYC 18 (or Tribune Tower, Chicago 11).

G-E PROJECTION ROOM EQUIPMENT



PLUS YOUR IMAGINATION GIVE

Amazingly Versatile Film Effects!



Film is the money-making "life-blood" of every TV station! That's why you should insist on the complete line of G-E Projection Room equipment. Use General Electric units...use your imagination...and you'll come up with so many versatile effects, you'll be amazed! G-E's ready-to-order line includes the top-performance Film Camera Channel, the newly advanced Synchro-Lite*Projector, the tremendously versatile Slide Projector, and two new Mirror Change-over Designs.

General Electric offers you all your TV projection room needs—as well as all other equipment necessary for television broadcasting. And remember, behind this advanced, station-tested equipment is 75 years of electrical and electronic progress. For further, complete details...contact the G-E broadcasting equipment sales representative in your area, or write direct to:

our respects

to H. EARL RETTIG

VERY few financial experts got their start in the business world by unbalancing the books to the tune of $10 million, but H. Earl Rettig, recently named director of finance and operations for NBC's Western division, makes this claim.

It happened during his first month in the accounting department of Halsey, Stuart & Co., Chicago investment firm. In his late teens, he set such a record—and it still stands. The blunder was apparently forgiven, for he remained in the company's employ several years.

A native of Chicago (he was born June 4, 1903), he confesses the initial "H" in his name is only decorative, his father having added it "as a sort of balance." Young Rettig thought it a good idea and did likewise.

A tireless energy which marks Mr. Rettig's career manifested itself early. While attending Lakeview High School in Chicago, he worked at Montgomery Ward & Co. during Christmas vacation, and for Halsey, Stuart & Co. in the summer. He also worked briefly at Chicago's Post Office, alongside Walt Disney. Neither knew, however, the other was there until years later when the future NBC executive went to work for the now-noted motion picture and animated cartoon producer in Hollywood.

After graduation from high school in 1919, he joined the investment company on a full-time basis, beginning an association which continued until 1928. Starting as office boy, he subsequently moved into the account department. When the books were balanced at the end of his first month, he was off $10 million. That is the "record" about which he is much kidded.

Served in Ohio

Named assistant manager of the firm's Cincinnati office in 1925, he was transferred to Dayton two years later in an executive capacity. That's where he had his first and indirect contact with Groucho Marx, star of NBC-AM-TV's *You Bet Your Life* originating in Hollywood. The Marx Bros. came to town in "Cocoanuts," and the lonesome stranger, with time on his hands, saw the show five times in one week.

Mr. Rettig was transferred eventually to the corporation's New York buying department, but in the meanwhile had made several vacation trips to California, where he was much impressed with the climate. The unfavorable contrast with New York hit home hardest once in 1927 when he left the sunshine of Los Angeles to return to a frigid New York. The sudden change brought about an equally sudden decision to change his career.

Because Halsey, Stuart & Co. had handled financing of the Fox Studios in Hollywood, Mr. Rettig's long-time employer was able to give him a good entree to his newly-adopted home.

He started out by making a strategic error. When asked what salary he would expect, as assistant to the Fox studio manager, he answered in characteristically modest fashion, "Oh, it doesn't matter." As a result, he worked "for practically nothing" to learn the movie business. He remained with the studio until 1934 when a new management took over.

After leaving Fox Studios, he was associated with many of Hollywood's top producers.

Cast Alan Ladd

As casting director for Hal Roach Studios, he cast a young actor named Alan Ladd in a film titled "Captain Caution," now going the rounds on TV. At that time, however, he couldn't convince his studio that the young actor had a movie future.

The Chicago's Post Office Alumni finally joined forces again in 1940, when Mr. Rettig became associate producer of "The Reluctant Dragon" for Walt Disney. He returned to handle finance on a large scale in 1941 when he became RKO Radio Pictures Corp. assistant treasurer and studio treasurer, serving also on the board of directors of Western Costume Co. as RKO representative and assistant treasurer of the holding corporation which bought the property leased by NBC for its first Hollywood studios.

In 1945, he was with Leo McCarey as secretary-treasurer of Rainbow Productions, which made "The Bells of St. Mary's". When Paramount Pictures acquired Rainbow in 1947, Mr. Rettig went along with the deal. After 18 months, however, he joined Dennis Day, radio-TV singing star, to handle his business affairs.

He joined NBC in 1950, but had no title at first. Eventually, he was named manager of television network operations, holding that position until TV and radio were consolidated. In the recent reorganization and integration of radio and TV operations, he was made director of finance and operations for NBC's Western division.

Despite his "addiction" to chain smoking (at least three packs of cigarettes a day, plus a pipe and cigars), he shows little outward indication of working pressures. He remains unruffled, applying energy not used for hobbies to work.

Mr. Rettig married the former Rosalie Castner Dec. 2, 1934. With their three sons—H. Earl Jr., 16, and Rickey and Ronney, 9-year-old twins, they live in the Cheviot Hills district of Los Angeles.

Have you ever tried to sell a Pangolin?

(Pangolin — scaly anteater from Southeast Asia)

Probably not, but Station WNBQ has—and quite successfully. Not only a pangolin but also other unusual creatures at the Chicago Natural History Museum.

When attendance at the Museum during January to August 1952 showed a decline from the previous year, officials turned to Station WNBQ for help. A schedule of live station breaks was started in September and attendance during the remainder of the year jumped 18.5 per cent over the same months in 1951.

> *"The lion's share* (of the credit) *goes to WNBQ,"* reported Miss Christine Tardy, of the Public Relations Division of the Museum. And she also wrote, *"We find the live breaks an excellent method for stimulating interest."*

Here is further proof that WNBQ sells and the live station break technique which WNBQ pioneered and perfected is just one of the many aids Chicago's number one television station offers its advertisers.

Map Missed

EDITOR:

I have received my copy of your BROADCASTING • TELECASTING the 1953 Yearbook issue.

However, I was surprised to find that, unlike last year, this issue did not include the usual BROADCASTING • TELECASTING *map.*

Was this omitted from my copy, or do you intend sending it along later under separate cover?

Jean-Francois Pelletier
Young & Rubicam Ltd.
Montreal, Canada

[EDITOR'S NOTE: Because of rising costs, B•T was obliged to eliminate the map from the Yearbook package. However, copies of an up-to-date map are available at moderate cost—$1 for one copy, $4.50 for five copies, $8.50 for 10 copies and $20 for 25 copies.]

Real Service

EDITOR:

Two articles in recent issues of your esteemed publication have interested my television associates and me very much; the piece by Crandall ["How Big Will TV Be?"; B•T, Feb. 9] and the one giving the figures on revenue per set [B•T, Jan. 26, "Facts & Figures"]. Publication of these have been a real service to us, as I am sure they have been to many others. . . .

Harry C. Butcher
President

Board of Review

EDITOR:

Sid Hix did all right February 23. I have clipped this piece and carefully inserted it in the file for formal consideration of the Code Board during the course of its next meeting. Undoubtedly our action will be formalized by resolution, copy of which will be forwarded to you.

I am sure Mrs. Bullitt will object to the hairdo, Jack Jett will take very violent exception to the complacency exhibited by the cameraman, Lennie Reinsch will deplore the lack of attention on the part of the producer and Walter Damm will scream at the plunging neckline. As far as I am concerned, I think the seal is a very good likeness.

John Fetzer, President
WKZO-AM-TV Kalamazoo, Mich.

[EDITOR'S NOTE: The Hix cartoon to which Mr. Fetzer, who is chairman of the Television Code Review Board, refers is reproduced below.]

"That agency man's suggestion to the Code Board sure pepped up viewer interest in the Seal of Good Practice."

Injunction

EDITOR:

. . . Your editorial, "The Politic Way" [Feb. 23], says, "If that statute (meaning one making it a crime to defame by radio) were in effect, a broadcaster could appeal to the federal courts to enjoin the Commission of a crime, . . ."

That is really wrong. The federal courts will not, and the state courts will not, enjoin the utterance of defamatory matter. There is a very famous United States Supreme Court decision on this, *Near vs. Minnesota,* 283, U.S. 697.

January 27, 1953

Dear Mr. Sherman:

I just received your letter of January 20 relative to the merchandising activities of Station WBNS-TV on our "Telesports Digest" Program.

After reviewing the samples you enclosed, I'll say you've done an outstanding job on our behalf. This type of merchandising tie-in, plus the obvious interest and attention of the station and its personnel, is most impressive to me.

We at DREWRYS certainly appreciate the excellent co-operation we are receiving from your station. We earnestly believe that our association with such a promotion merchandising-minded organization is bound to prove beneficial to us.

Again, many thanks for the samples and keep up the fine work.

Sincerely yours,
DREWRYS LIMITED U.S.A. INC.

L. D. Fairbairn
Advertising Manager

Seventeen years — and over 6,000 broadcasts ago, WWVA—The Storer station in Wheeling, West Virginia, launched the *Tri-State Farm & Home Program.*

From the very beginning, it won a bumper crop of listeners in West Virginia, Ohio and Pennsylvania. For from the very beginning, it was well nourished by the contributions of Federal agricultural experts . . . extension services of three great universities . . . of county agricultural specialists — with WWVA providing its talents, towers and even transmitter site to assure the success of the show. (That site was converted into a 160-acre soil conservation exhibit and a game preserve.)

Today, with early morning and noon broadcasts, the program daily serves thousands of families on farms and in towns and villages of three states with the latest information to help them in their living and labors.

STORER BROADCASTING COMPANY

Storer

BROADCASTING

COMPANY

Public interest programs like this are typical of Storer station operation. With different formats . . . different objectives . . . different audiences—they all produce this common end-result: They build a bond between station and listener that's as impressive as it is immeasurable. National advertisers know it exists. It helps explain the fact that for over 25 years they have reaped an abundant harvest from the audiences served by Storer Stations.

"Isn't radio wonderful!"

...says Les Cottrill of

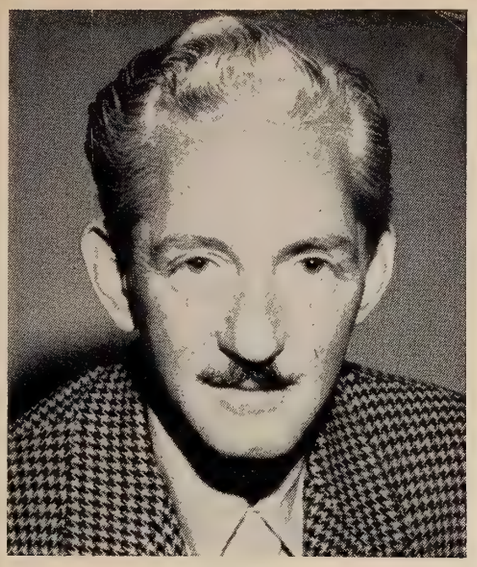
Nutrena® Mills, Inc.

E. C. Fuller, of Nutrena Mills home office, has forwarded the following report from Les Cottrill, their St. Louis Division Manager:

"An inquiry to station WLS and our follow-up of the inquiry has sold two loads of egg mash crumblized for 7000 pullets and now the man wants to know what a carload of chick starter will cost him for 10,000 Leghorn pullets that will arrive March 13. Isn't radio wonderful."

This one inquiry represents the responsive and highly profitable nature of the WLS market....one of many such reasons why Nutrena Mills has used WLS regularly since discovering what this popular radio station can do for them, more than seven years ago.

You, too, will find that sound appeal to the vast WLS audience will get comparable results for you...will step up your sales and profits, particularly throughout the great mid-west, where WLS reaches millions of the nation's most prosperous and progressive people.



WLS GETS RESULTS *for the* **AGRICULTURAL INDUSTRY**

Better see your John Blair man...or contact us, today...and start enjoying the kind of results WLS can deliver for you and your products.

Frank Ferrin

on all accounts

WHEN Frank Ferrin was a Chicago agency executive jousting with clients, time salesmen and discount structures, he was the last to think he'd do the same some day with tigers, elephants and pythons.

His early experiences stood him in good stead, for CBS-TV's *Smilin' Ed's Gang*, which Frank Ferrin Co. packages and produces in Hollywood, is so successful it has been sponsored continuously by the Brown Shoe Co., St. Louis, since August 1950. Brown, through Leo Burnett Co., has sponsored the radio version (currently on ABC in non-TV cities) since September 1943.

Using his original radio show as a base, Mr. Ferrin began filming *Smilin' Ed's Gang* in 1949, when many of today's TV film producers were only thinking about entering the field. With Ed McConnell as narrator, the 30-minute East Indian jungle adventure series is one of the few using footage actually made with authentic animal and native scenes.

Mr. Ferrin and a crew spent several months in India last year. Another crew has been filming there since July, shooting 50,000 feet of color film thus far to add to 30,000 feet taken previously. From color, black and white prints are made.

"When color TV comes, we'll be ready," Mr. Ferrin says, adding that the reason for shooting footage in India is that "Even in Hollywood, we can't get 100 elephants, 200 head hunters or a herd of rhinoceri when we need them."

Mr. Ferrin believes this authentic jungle footage, to which is added necessary Hollywood-shot dialogue and action by a large cast, is responsible for the program's appeal.

Born in Minneapolis Nov. 13, 1904, Mr. Ferrin ran away from home after completing high school and joined a circus.

Entry into the advertising business came after he organized Midwest Recording Inc., Chicago production and transcription concern of which he was sales manager and executive producer. His start in radio took place at WRHM (now WTCN) Minneapolis, where he did a nightly comedy act, *Nels and Ole*, after selling time during the day.

Before forming Frank Ferrin Co. in 1946, he was vice president in charge of radio for Leo Burnett Co. He was associated previously with H. W. Kastor & Sons and with Henri, Hurst & MacDonald, both Chicago.

His wife is the former Barbara Steen. They make their home in suburban Northridge, and have two daughters, Colleen and Jacquelyn (Mrs. Don Olson).

Sales-winning radio schedules for the Great Southwest just naturally include this pair of top-producing CBS Radio Stations. Results prove this! Write, wire or phone our representatives now for availabilities and rates!

March 9, 1953 Vol. 44, No. 10

HYDE SEES EISENHOWER ON FCC CHAIRMANSHIP

Visits with President for half hour, but expected announcement of his appointment as Chairman was not forthcoming. It was presumed announcement being delayed pending decision on selection of Republicans to succeed Messrs. Walker and Merrill.

ROSEL H. HYDE, the man thought most likely to become the new—and first—Republican Chairman of the FCC, conferred with President Eisenhower last Friday for half an hour, but he didn't leave the White House with the appointment in his pocket.

In keeping with the White House tradition of never quoting the President, unless authorized, Mr. Hyde was non-committal following his visit. He had been called to the Executive Mansion and, it was assumed the purpose was to receive notification of his promotion, along with a mandate to reorganize the agency along Republican lines.

But, when no announcement came, the view then was expressed, notably in informed circles on Capitol Hill, that the President perhaps wanted to "look Hyde over." There has been no outspoken opposition to Mr. Hyde, but it's known that a number of Republican stalwarts, insistent upon "cleaning up" the old Democratic agencies, have felt that a "new broom," rather than a career man should be named to the FCC. Whether Mr. Hyde sold himself to the President appeared to be the question.

Mr. Hyde came up through the ranks from docket clerk on the old Federal Radio Commission, and served successively as attorney, hearing examiner, Assistant General Counsel, General Counsel and Commissioner. He has been described by members of the Senate Interstate & Foreign Commerce Committee as the "ablest man on the Commission." If Mr. Hyde should lose out, the expectation is that an "outsider" with no alliances on the FCC would be named.

May Hold Appointment

There also was speculation about the possible withholding of Mr. Hyde's appointment until the President is ready to nominate Republicans to the two available positions on the Commission, transferring it from Democratic to Republican control, and thereby giving the new Chairman a working majority. There are now four Democrats, two Republicans and an Independent on the Commission.

Word was spread that Mr. Hyde, heavily endorsed by private communications companies and broadcasters, as well as by important party leaders, would get the Chairmanship. The final step awaited was the inevitable session with the President. When that happened Friday morning, the appointment was regarded as a *fait accompli*. Many of his friends and colleagues called to congratulate him, and the only comment from his office was, in substance, "premature."

Mr. Hyde's appointment would not require Senate confirmation since, under the law, the President selects the Chairman from among qualified members of the Commission. Mr. Hyde was appointed last year by President Truman for a new seven-year term.

Whether or not the status of Democratic Chairman Paul A. Walker, Oklahoma Democrat, has any bearing on the delay, could not be ascertained last Friday. Mr. Walker, 71 and the only charter member of the FCC, created in 1934, has not tendered his resignation and is said to have no intention of doing so. But it has been ascertained that President Eisenhower can rescind an order issued by his predecessor extending Mr. Walker's term despite the fact that he has passed the statutory retirement age of 70.

President Eisenhower thus can pick up the unexpired portion of Mr. Walker's term, and also nominate a successor to Eugene H. Merrill, Utah Democrat.

Many names are under consideration for the impending vacancies, In the forefront, from broadcaster ranks, is understood to be Charles H. Garland, general manager of KOOL Phoenix, and a 30-year veteran in radio, both in Illinois and Arizona. A practical broadcaster, he has long been identified with the Gene Autry operations.

The second appointment, it was thought, might readily go to a man, preferably a lawyer with a background in public utility-common carrier regulation. Commissioner Walker is the only present member of the FCC with such a background, having served as chairman of the Oklahoma Corporation Commission prior to his appointment to the FCC.

Rosel H. Hyde
At White House Friday

Mentioned for the two vacancies are:

Lewis Allen Weiss, former chairman of Mutual and of Don Lee, a resident of Los Angeles, who retired last year from public office after having served a year and a half as deputy administrator of NPA and director of the Office of Civilian Requirements of DPA.

Thad Brown, vice president in charge of television affairs of NARTB and the son of the late former Commissioner Thad Brown.

J. Paull Marshall, 42-year-old attorney and member of the Maryland Assembly, active in the Young Republican Club during the campaign.

William Speare, former AT&T attorney in Washington, who for the past several years has been practicing law in Fremont, Neb.

Lyman Smith, 35-year-old district attorney of Penn Yan, N. Y., the upstate wine district represented by Rep. John Tabor, chairman of the powerful Appropriations Committee, and who has Rep. Tabor's support.

Fred Palmer, midwestern radio consultant and former station manager, who has been an active candidate from the start.

Edward J. Scheuffler, Kansas City attorney, active in Republican politics and closely identified with the Eisenhower campaign.

Walter Johnson, of Heathsville, Va., former FCC attorney (1935-39) and now commonwealth's attorney of Northumberland County. He was the unsuccessful 1949 Republican nominee for governor of Virginia.

Earlier Conferences

Prior to his call to the White House, Mr. Hyde had conferred with officials of the Republican National Committee. A fortnight ago, he was in session with Wesley Roberts, chairman of the committee. At that time, it is believed, he advised the chairman that he had in mind reorganization of the FCC to eliminate those holding patronage positions or those who have been regarded as left-wingers or troublemakers. It is believed that at least two dozen key position are involved at the staff level.

The only criticism directed against elevation of Mr. Hyde was premised on the view that, as a career man, he would not be disposed to "clean up" the FCC, long under Congressional fire. There was talk of a "new broom" in the person of an outsider who would not be beholden to the existing organization. There was considerable Congressional pressure in favor of the temporary return of former Commissioner Jones, now in private law practice, or of Norman S. Case, former governor of Rhode Island, who served on the FCC from July 1934 to June 30, 1945.

Mr. Hyde, however, had virtually unanimous endorsement of leaders in radio and television and also had substantial support among influential members of Congress.

New General Mills Products To Get Broadcast Launching

Firm will test Sugar Jets and Sugar Smiles; may promote them on TV network shows.

GENERAL MILLS, Minneapolis, will use radio and television spots and programs to help launch its distribution of two new cereal products in test markets this month.

Samuel Gale, vice president in charge of advertising for the firm, disclosed this in response to a query on plans to introduce Sugar Jets and Sugar Smiles in New York and Ohio.

Mr. Gale said a "standard, balanced campaign" would be utilized, including substantial use of radio and television.

At least two TV shows are reportedly in preparation by William Esty Co., New York, new agency for Sugar Jets. A second agency, Tatham-Laird Inc., Chicago, was mapping similar plans for Sugar Smiles. T-L also handles GM's Kix account.

An unconfirmed report is that the two new cereals may be inserted into the company's video programs, *The Lone Ranger* and *Stu Erwin Show,* replacing Cheerios and Kix. Cheerios is handled by Dancer-Fitzgerald-Sample.

General Mills announced it has delayed entering the sweet cereal field until a series of extensive consumer tests proved successful. The campaign, still in the test stage, may expand radio and TV usage.

The new product campaign is not tied in with General Mills' contemplated spot saturation drive, scheduled to kick off this month. The company is expected to concentrate the bulk of the spot blitz on other products. The spot project for Wheaties will probably be as intense as in 1952.

Executives of Knox-Reeves Adv., Minneapolis, met in Chicago Thursday and Friday for a round of discussions with Lowry Crites, GM's radio-TV media director. Meeting with him were "Chuck" Anderson, assistant media director, Dr. A. R. Root, vice president and director of media and research, and Paul Phillips, account executive on Wheaties account.

The cereal campaign is expected to continue through the summer months. Last year, GM used 90 announcements at an average of more than 10 per day over a 17-week period. The firm sold stations on the formula of providing Class A time for four-fifths of radio-TV commitments, but with the overall rate based on one-half the individual station's daytime one-time rate. This gave General Mills a discount of 60%, according to estimates made at the time. Dr. Crites has declined to say what formula, if any, would be offered to stations this year.

Gardner Agency Realigns

MEDIA and research departments of Gardner Advertising Co. have been split into separate units, and several key appointments have been made. Warren J. Kratky, with Gardner five years, was named media director. Other appointments: Champ C. Humphrey, vice president and director, becomes account executive on Pet Milk, and John C. Naylor Jr., formerly in charge of radio-TV media, shifts to the account management staff. No replacement for Mr. Naylor was announced.

Mr. Humphrey succeeds Henry O. Whiteside, who leaves the firm after 10 years' service. Mr. Humphrey has been vice president in charge of media and research since 1950. Kenneth E. Runyon is the new research director. Appointments were announced Monday by Elmer G. Marshutz, agency president.

Ad Council Blood Pleas

"GIVING blood is the easiest thing in the world to do!"

That slogan is the theme of special balops and flip cards on the National Blood Program sent by the Advertising Council to the broadcasters, advertisers, and agencies who teamed up the week of Feb. 22-28 to persuade their audiences to join the ranks of blood donors.

Cunningham & Walsh, volunteer agency for radio-TV on the blood program, prepared the visual materials and the accompanying announcements, scheduled by the Council as part of its TV allocation plan.

LONG-TERM contract between WBBM Chicago and Morris B. Sachs Inc. for 18 quarter-hours a week is signed. L to r (seated): Mr. Sachs and E. H. Shomo, WBBM sales manager; standing, Norman Heyne, account executive, Ruthrauff & Ryan agency; Pat Wright, Sachs Inc.; Don Mann and Bill Miller, WBBM account executive and assistant sales manager, respectively; Betty Wentzel, Ruthrauff & Ryan, and Al Bland, WBBM program director.

HOUSEWARMING at Bozell & Jacobs agency's new Chicago office was hosted by Nathan E. Jacobs (l), president, who headquarters in Chicago, and Morris E. Jacobs, board chairman, who works in the Omaha office. Advertising and public relations firm, which has 11 offices, opened new quarters at 205 N. La Salle St.

Hahn Notes Ad Contributions To American Tobacco's Sales

CONTRIBUTIONS of advertising to the dollar and unit sales record achieved by the American Tobacco Co. in 1952 are spotlighted in the company's annual report mailed to stockholders.

In a letter accompanying financial statements, Paul M. Hahn, president of the company, said advertising was a "principal factor" in accomplishing "great volume," and thereby keeping prices lower. He paid tribute to the company's TV and radio programs and personalities that won some 25 national and local awards, citing *Your Hit Parade, Robert Montgomery Presents,* and *The Jack Benny Program.*

He said extensive promotion of cigarettes through radio, TV, newspapers, magazines and other media is necessary because they are sold in a highly competitive market.

"Considerable misinformation exists as to the cost of cigarette advertising. In spite of its comprehensive nature, your company's cigarette advertising costs only about one-third of a cent per package of 20 cigarettes."

The company's annual report showed that net income for the year was $34,068,963 as compared with $33,109,669 for 1951. Dollar sales were listed at $1,065,738,534, as compared with $942,552,034 in 1951.

Kobak Stresses ARF Goal Of Sound Research Methods

ADVERTISING Research Foundation is striving to eliminate guesswork in advertising and to substitute facts substantiated by research based on sound standards, Edgar Kobak, ARF president, told the Pittsburgh Advertising Club at a luncheon meeting last Tuesday.

Mr. Kobak acknowledged progress in advertising research in recent years, but added, "There is still a lack of research standards and uniform methods which are needed in any field for scientific study."

"This isn't any overnight job," Mr. Kobak said, and "no magic will bring it about. And we most certainly don't expect any miracles—and don't you expect any. It's a long-range job and it will require a lot of hard work and industry support."

ARF already has committees actively working on three major projects, including a study of radio-TV rating methods, Mr. Kobak said.

TEN CAMPAIGNS SET IN BRISK WEEK

Spot and network campaigns on radio, TV, bought by Conoco, Columbia Records and Instant Chase & Sanborn Coffee; other advertisers formulating plans.

IN A WEEK of spirited business action in which the pattern was diverse, at least 10 advertisers were found by BROADCASTING • TELECASTING last week to be developing new moves affecting spot and network campaigns in radio and TV.

Among the spot proponents, Continental Oil Co., Ponca City, Okla., for Conoco, will break a radio spot announcement schedule in 50 markets effective March 18. Length of contract is fairly short, and varies in different markets. Benton & Bowles, New York, is the agency.

Columbia Records, through McCann-Erickson, New York, following a more diverse policy, will spend $100,000 in an advertising campaign using TV and radio spots, as well as other media. The TV spot campaign which started last week as a test in 22 markets, continuing for two weeks, may be expanded later.

Coffee Campaign

Instant Chase and Sanborn Coffee will take on a radio spot campaign effective April 1 in 25 markets. Contract is for at least 13 weeks with possible expansion through the summer. Compton Adv., New York, is the agency.

Pream, through Ralph H. Jones, Cincinnati, is starting a national radio spot campaign March 30 for 13 weeks.

Shulton Toiletries, through Wesley Assoc., is known to be preparing an addition of several markets to its already formidable list, effective April 1.

Curtis Pub. Co. will relinquish its sponsorship of *Keep Posted* on DuMont (Tues., 8:30-9 p.m. EST), effective March 31. The advertiser is re-evaluating its entire radio and television budget, and the money saved by cancellation of the program "will probably go into spot activity," a spokesman from BBDO, New York, agency for Curtis, told BROADCASTING • TELECASTING. Curtis is using a radio and a TV spot schedule.

The Nestle Co., White Plains, N. Y., for Nescafe, under CBS Radio's "power plan," effective April 8 will become a co-sponsor of three radio programs: *FBI in Peace and War, Meet Millie,* and *Mr. Keen, Tracer of Lost Persons.* Nescafe sponsors the trio of programs along with Procter & Gamble and Brylcreem. Thus the "power plan" assumes a sell-out status. Agency for Nescafe is Sherman & Marquette, N. Y.

Drew Pearson Dropped

In another shuffle of plans, Carter Products will drop sponsorship of *Drew Pearson* on ABC radio and DuMont TV network, with the money, it was understood, going into another television network show. Negotiations are under way for a new property on possibly another network, with details expected to be revealed within 10 days. Ted Bates & Co., New York, is the agency

Meanwhile, DuMont is considering carrying Mr. Pearson on a sustaining basis. ABC late last week had not decided on the program which will succeed Mr. Pearson in the vacated time segment.

General Mills, it was understood, was considering cancelling its *Silver Eagle* ABC radio network show with the object of funnelling the saving into a projected spot summer schedule for several of its cereal products [B•T, Feb. 16]. Knox-Reeves, Minneapolis, is the agency. (See separate story.)

In another and fully-crystallized budgetary move, Pearson Pharmacal Co. (Ennds) will take over the 7:30-8 p.m. Saturday time being vacated by Dunhill's *My Hero* show on NBC-TV, which will go on a half-hour later, 8-8:30 p.m. This action is in addition to Ennds' alternate-week sponsorship of *Eye Witness* (Mon., 9-9:30 p.m.) also on NBC-TV. Harry B. Cohen, New York, is the agency.

General Foods for its Jell-O, through Young & Rubicam, New York, is understood to be contemplating a new property for a half-hour network television show.

Johnson & Johnson Eyes Show

Johnson & Johnson, one of the advertisers on the ill-starred *All Star Revue* on NBC-TV, is understood to be interested in a nine-week fall network program of its own devising.

Pet Milk, the other sponsor on *All Star Revue,* is being courted by three networks, NBC, CBS-TV and ABC, in an attempt to engage the client's interest in a network property and time.

Renewals played their part in the week's activity, too:

Scott Paper Co. has agreed to carry on with its *Patti Page Show* on CBS-TV, but with a new format.

General Foods (Swansdown Flour and Sanka) has renewed its *Our Miss Brooks* on CBS-TV Friday, 9:30-10 p.m. Young & Rubicam, N. Y., is the agency.

General Electric renewed *I Married Joan* on NBC-TV, Wednesday, 8-8:30 p.m., through Young & Rubicam.

'New Drew' Pearson

DREW PEARSON goes local for the first time next Saturday with a quarter-hour "behind-the-scenes" informal feature on WTOP-TV (CBS) Washington, signed for a firm 13 weeks by Emerson Radio of Washington, Inc., local distributor. Mr. Pearson becomes the "new Drew" with adoption of an informal living room set, an adlib format and chats on topical matters with two assistants, Jack Anderson and Fred Blumenthal, and a secretary. His network news shows on ABC radio and DuMont will be dropped later this month, with the makers of Carter's liver pills allocating more money to television and adopting a non-news format. Local agency is Robert M. Gamble Jr.

'Life Is Worth Living' on MBS

IN A move to reach areas out of range of its present TV coverage, Admiral Corp. last week announced a new series starring Bishop Fulton J. Sheen on the full MBS radio network.

Bishop Sheen will bring his *Life Is Worth Living* to over 560 Mutual affiliates starting this Thursday, 8-8:30 p.m. CST. He currently is on over 70 DuMont TV Network stations each Tuesday. Negotiations were handled by Erwin, Wasey & Co., New York.

Firm had announced last month that it would spend $20 million for all advertising this year—largest in its history.

Bates Heads L&F AM-TV

JOHN BATES, radio-TV account executive on the Hudnut Sales Co. account for Kenyon & Eckhardt, N. Y., has joined Lambert & Feasley, same city, as director of the radio and television department.

PARTY for about 40 agency timebuyers staged by KMPC Los Angeles last Tuesday in New York was attended by (l to r): Kneeling, Al Kerr and Paul Weeks, H-R Representatives, national representatives for KMPC; Robert Reynolds and Charles Cowling, KMPC; standing, Frank Coulter, Young & Rubicam; Frank Headley, H-R Representatives; James Luce, J. Walter Thompson Co.; Gene Autry, KMPC and KOOL Phoenix and KOPO Tucson; Frank Silvernail, BBDO, and Frank Pellegrin, H-R Representatives.

Old Gold Executive Critical Of Hypoed Ad Claims in Media

P. Lorillard's Alden James criticizes tobacco industry for medical claims; alleges they hurt all advertising.

EXTRAVAGANT advertising claims can hurt the cigarette industry as well as the advertising profession, Alden James, advertising director and a member of the board and executive committee of P. Lorillard Co., makers of Old Gold cigarettes, said in an address to Philadelphia's Poor Richard Club.

"I think one thing some of the people in our industry can be criticized for is the way they have made a football of the medical profession," Mr. James said. When cigarette manufacturers claim medical specialists checked a group of smokers and found no irritation of eye, ear, nose and throat from smoking their brand of cigarettes, "that is when we say medical claims in cigarette advertising reach the point of absurdity," Mr. James said.

"We feel psuedo-scientific claims and psuedo-scientific advertising have no place in our business or in any business. Extravagant advertising claims are not only wholly unnecessary, but there is a better way to get and keep business in the long run," he said.

"Television presents a challenge to honesty and believability of advertising," Mr. James stated. "Most people really believe in advertising. What they take exception to is some of the advertising practices and the lack of principle which inspires them."

Mr. James said advertising cost is approximately 2/5th of one cent on a package of cigarettes, and this is 60% less than 40 years ago. "Because advertising creates valuable turnover (as high as 50 times a year), you can be sure of getting the brand you want. And through volume, created by advertising, all cigarettes have improved," said Mr. James.

GOEBEL Brewing Co. President Edwin J. Anderson (seated, l), okays sponsorship of Detroit Tigers' exhibition, home and road games on WJBK-AM-TV Detroit starting March 7. Discussing details with him are C. E. Carey (standing), vice president in charge of sales for Goebel, and Gayle V. Grubb, vice president and managing director of the stations. WJBK will be key station in the Goebel baseball network, and its TV affiliate will carry 35 home games on the Tiger schedule.

Standard for 'Midgets'

PROPOSAL that standards be adopted for midget radio announcements was made last week by Station Representatives Assn. [CLOSED CIRCUIT, Feb. 23], which submitted the following for industry approval:

Name: Radio Shorts.

Mechanical: These shorts may be live or E.T.

Duration: The shorts shall not be more than 8 seconds or 16 words.

While shorts may be of lesser duration or contain fewer words, SRA recommends that no smaller time unit than 8 seconds be set up.

Picard Agency Changes Name; Adds Redfield as Partner

PICARD Adv. Co., New York, became Picard, Marvin & Redfield March 2 with addition of L. L. Redfield as a partner. Mr. Redfield resigned as chairman of Dowd, Redfield & Johnstone to become executive vice president of the new agency. The other partner, William S. Marvin, joined Richard A. Picard in 1934, 10 years after the founding of the agency. Mr. Marvin is a vice president.

Mr. Redfield has brought nine new accounts to the agency which will increase its billing about 40%, he told B•T. New accounts brought in are Edward Petry Co., United Television Programs, Meseck Steamboat Co., M. Ewing Fox Co., Godell's, William H. Nicholls Co., Woolfoam Co. and Standard Remedy Co. Picard accounts include several auto dealers and divisions of Borden Co. and International Paper Co. Mr. Picard continues as president.

Senators Baseball Network

WASHINGTON Senators' league and exhibition baseball games will be fed by WWDC Washington to a 17-station network in a three-state area under sponsorship of National Brewing Co., Baltimore. Total of 168 games will be aired.

Network, which may be expanded, now includes WCHV Charlottesville, WREL Lexington, WLVA Lynchburg, WANT Richmond, WTON Staunton, WNNT Warsaw, WINC and WRFL Winchester, WSTK Woodstock, WFVA Fredericksburg, all Virginia; WCFM Cambridge, WCUM Cumberland, WFMD Frederick, WARK Hagerstown, WASL Annapolis, WLIK Leonardtown, all Maryland, and WHVR Hanover, Pa.

BBDO Names McCarthy

W. BARRY McCARTHY has been named director of the office of public relations and publicity of BBDO, New York, effective immediately, Ben Duffy, agency president, announced Wednesday. He succeeds William Maloney, who has resigned. Mr. Maloney's future plans were not announced. Mr. McCarthy was West Coast director of public relations for Ford Motor Co., and before that on the creative and client contact staff of Foote, Cone & Belding, San Francisco.

Challenges FTC Charge

ALLEGATIONS of a Federal Trade Commission hearing examiner in an initial decision involving advertising claims of Marlene's Inc. for its Mynex Tablets were refuted last week by Edward H. Larson, partner in O'Neil, Larson & McMahon, Chicago, which handles the account.

He challenged findings generally of FTC Examiner Abner E. Lipscomb, but refused to say whether Marlene's would appeal.

The FTC initial decision identified R. J. Smasal and James O. Webb as officers of Marlene's and mentioned Mr. Larson and Nelson J. McMahon as co-respondents in the complaint. Mr. Larson said the firm had used TV spot announcements but no radio.

The decision challenged claims that the tablets possess weight-reducing properties. Defendants were ordered to discontinue four representations. Decision becomes final in 30 days from Feb. 27 unless appealed.

NEW BUSINESS

Spot

Masland Rugs planning to place three-day radio spot announcement schedule in 30 cities effective mid or late March. Agency: Anderson & Cairns, N. Y.

Dale Dance Studios (nationwide dance school chain), adds WLOL Minneapolis, WOL Washington, WWIN Baltimore, WABC New York, WPAT Paterson, N. J., WAAT Newark and WJBK Detroit to group of stations already carrying 10-minute programs. Agency: William Warren, Jackson & Delaney, N. Y.

Network

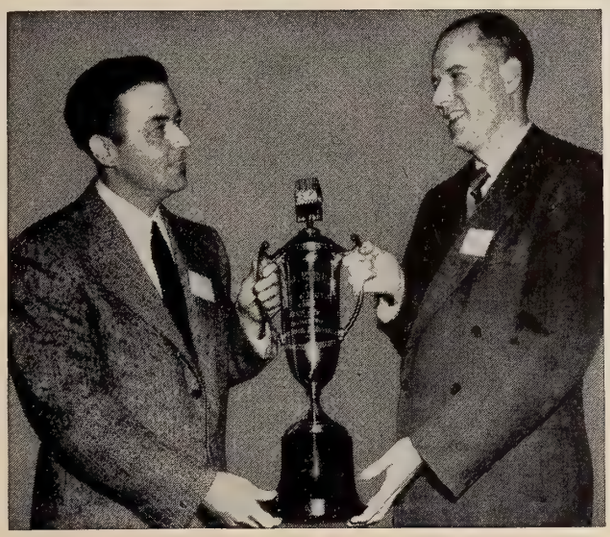
Scholl Mfg. Co., Chicago (foot comfort remedies and appliances) buys five-minute newscast, 4:55-5 p.m., Sun., on MBS network starting March 29. Agency: Donahue & Coe, N. Y.

American Home Products, N. Y. (Anacin & Bi So Dol products), sponsoring Gabriel Heatter news commentaries on Mutual, Mon. and Wed., 7:30-7:45 p.m., effective last Monday. Agency: Sullivan, Stauffer, Colwell & Bayles, N. Y.

American Tobacco Co. (Lucky Strike cigarettes) has renewed alternate-week sponsorship of *Robert Montgomery Presents* for 52 weeks on NBC-TV, Mon., 9:30-10:30 p.m. EST.

Scholl Mfg. Co., buying Mon. 3:30-3:40 p.m. portion of Paul Dixon show, Mon.-Fri., 3-4 p.m. on DuMont TV network, effective March 16. **Vitamin Corp. of America** buying 3:40-3:50 p.m. segment, Wed., effective March 18. Both contracts are for 13 weeks. Agency for Scholl: Donahue & Co., N. Y. Agency for Vitamin Corp.: Kastor, Farrell, Chesley & Clifford, N. Y.

Agency Appointments



Jaguar Cars Ltd., Coventry, England, appoints West-Marquis Inc., L. A., to direct national advertising in U. S. **T. L. Stromberger** is account executive. **H. B. Humphrey, Alley & Richards Inc.,** N. Y., will handle public relations and dealer advertising east of Mississippi.

Bee-lyte Fiberglass Co., Chicago, appoints

WHO ACCLAIMED NATION'S BEST RADIO NEWS OPERATION, FOR SECOND CONSECUTIVE YEAR

BY NATIONAL ASSOCIATION OF RADIO NEWS DIRECTORS

At recent convention of National Association of Radio News Directors, Baskett Mosse, chairman of committee judges, said: "The Medill School of Journalism of Northwestern University is happy to announce tonight that radio station WHO, Des Moines, Iowa, was selected as the outstanding radio news operation in the United States for 1952".

In presenting the award Mosse said: **"This is the first time in the history of the National Association of Radio News Directors that the awards committee has selected a radio station as the outstanding radio news operation in the country for the *second consecutive year*. I think this is an unusual honor and I know that you are proud of it and we are really proud to give it to you. Not to take anything away from the other entries in this contest, but I would like to say that your particular entry won this award by unanimous vote. Every judge on our awards committee voted for WHO as the outstanding radio news operation — 1952".**

BEST EQUIPMENT, VETERAN STAFF, BIG BUDGET

The WHO News Bureau has an impressive physical plant: six leased-wire machines; a portable battery-operated tape recorder; a telephone recorder; three short-wave monitors for state and city police and fire department broadcasts; a number of subscription services; and a library which includes several specialized news encyclopedias.

The six leased-wire machines include two Associated Press, two United Press and two International News Service machines. WHO's leased-wire service exceeds the facilities used by many of the country's leading daily newspapers; and is unsurpassed by any radio station in this section of the country. Only two of the six machines are "radio" wires — the other four bring in detailed stories known as "press" wire service. Press wire service gives lengthy accounts and the three news services bring in three different versions of the big stories around the world. This necessitates constant boiling down, rewriting and sifting of details, playing up news of local interest — all tailored to fit a split-second time period.

NINE VETERAN REPORTERS EDIT AND BROADCAST NEWS

Proud as we are of this award, we are more proud of the people on our staff who helped us win it. The WHO News Bureau is headed by veteran Jack Shelley, and includes eight other full-time men and a secretary. Eight of the men are college-trained reporters, rewriters and broadcasters, *all of whom are heard regularly on the air.* The ninth man is a specialist in political reporting. The ten people on the staff represent a total of 100 years' experience in news work. Five of the News Bureau staff have been with WHO ten or more years.

In addition to the regular full-time staff, the WHO News Bureau maintains a staff of 70 correspondents — or part-time reporters — throughout Iowa and in Southern Minnesota and Northern Missouri, heavy WHO listening areas.

TELEPHONE USED EXTENSIVELY

The WHO News Bureau uses the local and long-distance telephone extensively to supplement and verify the regular news services' coverage. Staff members check directly with peace officers and hospitals each morning to get accident reports and accident victims' conditions which may have changed since the late night news reports. In many instances, the leased-wire services do not clear this type of information until too late for a 7:30 a.m. — or even an 8:45 a.m. — newscast. Telephone checks also minimize the possibility of loss of news when events take place in remote areas, distant from a news service reporter.

STAFF WORKS TWO SHIFTS

The WHO News Bureau maintains a morning and a night shift. There is a certain amount of specialization within each shift in that one man may be assigned Washington and foreign news, another Iowa news, and a third miscellaneous human-interest stories. Whatever the assignment, the reporter stays on it for an indefinite period, building up a background for that specific job, and becoming a specialized reporter on that shift. Each shift writes its news copy especially for the men who will be airing it.

$100,000 ANNUAL BUDGET

To operate its award-winning News Bureau and to provide Iowa-Plus listeners with unexcelled news coverage, WHO spends more than $100,000 annually. This figure is believed to be one of the highest figures in the Nation.

PUBLIC SERVICE EXTRAS

In addition to its regular news services, the WHO News Bureau provides its listeners with a variety of public-service extras. These include free announcements regarding public and private meetings during periods of extreme weather conditions, up-to-the-minute reports on road and weather conditions and emergency calls on newscasts to locate families or members of families who are traveling or are visiting away from home, etc. The News Bureau has also developed a system whereby a copy of each newscast mentioning an Iowa serviceman is sent to the next of kin. This service has required the cooperation of local postmasters in many cases because of the lack of a street address or the name of the next of kin. **Management at WHO considers the public service aspect . . . the many extra "little things" that WHO does for its listening public . . . to be the difference between a routine news operation and one that is contributing to the welfare of the community. This — then — is the difference between a good news operation and the "Best Radio News Operation in the United States".**

BETTER NEWS — BETTER AUDIENCES

The leadership of WHO's News Service is only one of many reasons why WHO is *Iowa's greatest advertising values.* The 1952 Iowa Radio Audience Survey, accepted by leading advertisers and agencies as a completely authoritative analysis of listening habits in this state, shows that WHO is by far the "most-listened-to" station in Iowa. Write for your copy, or ask Free & Peters.

Hall of Fame

NOMINATIONS for the Advertising Hall of Fame will be received until April 15 by the Advertising Federation of America. Selection will be announced at AFA's 49th annual convention at Cleveland June 16.

Frederick Asher Inc., same city. All media is contemplated.

California Strawberry Council, S. F. (frozen berry packers), appoints Alport & O'Rourke, that city.

Washington State Dairy Products Commission, Seattle, appoints The Burke Co., same city. Radio-TV will be used. Account executive is **Floyd O. Flint.**

Wilkinson Co., Santa Monica, Calif. (dental metallurgists), appoints Western Adv., Agency Inc., L. A. **Kenneth J. Slee** is account executive.

Columbia Tobacco Co. appoints Doyle Dane Bernbach Inc., N. Y., for Du Maurier cigarettes.

Personalized Foods Inc., L. A. (Twang cheese spread), appoints Irvin Rose Agency, Hollywood. Radio-TV will be used.

Harry Glemby Inc., N. Y. (Lorraine hair nets), appoints Herschel Z. Deutsch & Co., same city.

Moss Stores Inc., S. F. (chain of 52 women's apparel stores), appoints H. Jack Wyman Adv., that city.

International Restaurant, Oakland, Calif. (airport), appoints Robert L. Pickering Adv. Agency, that city. TV will be used.

HELPFUL salesmen offer pens to Arnold Perlman (c), president of Helene Pessl Inc., (Little Lady Toiletries), which is sponsoring Irene Wicker in *Little Lady Story Time* on WABC-TV New York. At the left is Paul Mowrey, station manager, with Ed Bleier (r), station account executive. Keystone Adv. handles the account.

P&G TOPS '52 NETWORK TIME BUYERS

Over $30 million was used by the soap company last year in outbuying all other networks sponsors; food firms, as a class, however, lead the list in both AM and TV.

PROCTER & GAMBLE Co. was the top client of the nationwide radio and TV networks during 1952, according to a compilation by BROADCASTING • TELECASTING of advertising expenditures for network time as recorded by Publishers Information Bureau, which shows P&G to have bought $30,439,822 worth of network time throughout the year, $16,235,025 going for radio network time and $14,204,797 for TV.

The Cincinnati soap manufacturer ranks first in gross time purchases from both radio and TV networks, as well as from the combination. This consistency is unmatched by other leading users of network time. General Foods Corp., ranking second with total time purchases, stands fifth on the 1952 radio network list and fourth on the TV network list. Colgate-Palmolive-Peet Co., third in point of total network expenditures, ranks second among TV network time users and eighth radiowise. Tables I, II, and III list the top 10 spenders for radio, TV and combined network time.

Comparison of Tables

Comparison of these three tables reveals that during 1952 six companies were included in the top 10 spenders for both radio and TV network time: The three already listed, P&G, General Foods and C-P-P, plus Lever Bros., General Mills and Liggett & Myers. All these companies naturally are included in the combined list, but not in the first six positions. R. J. Reynolds Tobacco Co., not among the radio top 10, was strong enough in TV time purchases (third) to make fifth position on the combined list, ahead of General Mills and Liggett & Myers. Incidentally, it is perhaps worthy of note that of the six on both radio and TV lists, only two, Procter & Gamble and General Mills, spent more for radio network time than for TV network time, the other four putting most network money into television.

Similar variations show up in time purchases of the different kinds of network advertisers. Foods rank first in purchases of both radio and TV network time, but tobacco products stand second on the TV list and fifty for radio. Toiletries, second in radio, ranks third in TV. Soaps are fourth in both lists, but automotive advertising ranks fifth in TV, tenth in radio. Drugs are third radiowise, seventh among TV network clients.

TV Advertising Pattern

Conclusion is inescapable that as TV matures it is developing its own advertising pattern which is somewhat similar but far from identical with that of radio, at least so far as network advertising goes.

When the number of advertisers using each kind of network during each quarter of 1952 are counted from the PIB tables, results somewhat surprisingly show fewer TV network clients during the fourth quarter than during the opening quarter of the year, while the reverse is true for radio. There were 177 TV network advertisers in the January-March period, 168 in April-June, 146 in July-September and 166 in October-December. Radio network clients numbered 171 in January-March, 177 in April-June, 175 in July-September, and 189 in October-December.

Dollarwise the picture is more encouraging for the TV networks. Their combined gross time sales for the opening quarter of 1952 totaled $45,674,388; second quarter total was $42,941,826; third quarter, $40,226,517, and final quarter, $51,952,149. Radio networks combined gross time sales were: $42,600,798 the first fourth of the year, $40,889,961 the second quarter, $35,118,237 the third, and $44,844,466 the final quarter.

Class-by-class comparisons of 1952 and 1951 TV network time sales were reported in the Feb. 23 B•T, for AM networks, March 2.

Gleason Enters ARB's Top Ten; 'Lucy' Seen by 45 Million in Feb.

FOR THE eighth month, *I Love Lucy* headed the American Research Bureau's ratings with a 73.2 and an audience of nearly 45 million in 66 markets, where three in four TV sets are tuned to the Philip Morris show on CBS Television.

Moving up to No. 10 spot from No. 23 is the *Jackie Gleason Show,* new to the top 10 ranks. Milton Berle's *Texaco Star Theatre,* rated fifth among the top 10 last month, goes to third place, the same which it held last November. It has consistently reached at least one-half of the sets in its 55-market area, and in February the show's total audience was more than 25½ million persons, ARB reports.

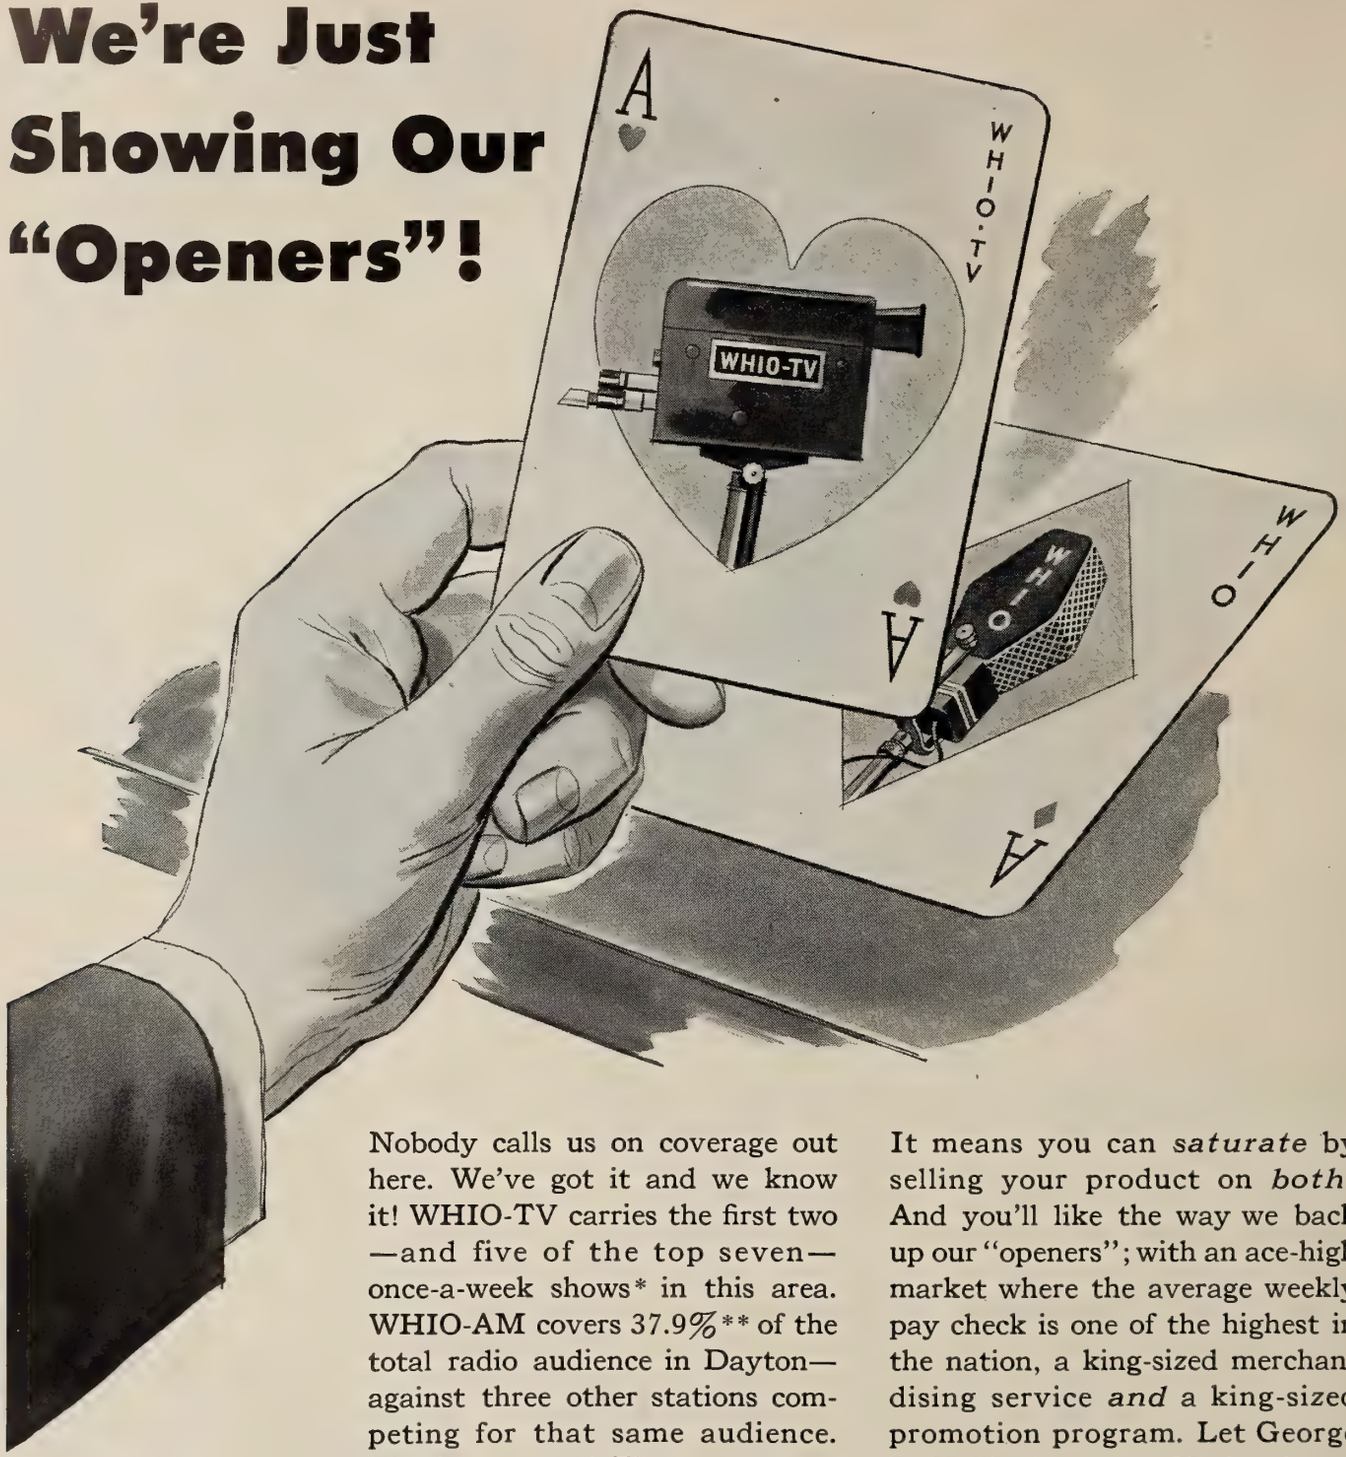
Top 10 shows, based on the week of Feb. 1-7, are as follows:

	Program	Rating
1	I Love Lucy (CBS)	73.2
2	Talent Scouts (CBS)	63.2
3	Godfrey and Friends (CBS)	53.4
4	Star Theatre (NBC)	51.5
5	You Bet Your Life (NBC)	50.6
6	Comedy Hour—Hope (NBC)	50.2
7	Dragnet (NBC)	48.1
8	What's My Line? (CBS)	43.0
9	Television Playhouse (NBC)	41.9
10	Jackie Gleason (CBS)	41.5

	Program	(Persons) (Add 000)
1	I Love Lucy (CBS)	44,660
2	Comedy Hour—Hope (NBC)	35,200
3	Godfrey & Friends (CBS)	32,230
4	You Bet Your Life (NBC)	29,210
5	Star Theatre (NBC)	25,540
6	Dragnet (NBC)	25,450
7	Show of Shows (NBC)	24,300
8	Talent Scouts (CBS)	23,530
9	Television Playhouse (NBC)	22,310
10	Jackie Gleason	20,340

Like ham goes with eggs

Low-cost results and W-I-T-H go together just like ham and eggs. And how the local merchants do know it! *W-I-T-H regularly carries the advertising of twice as many of them as any other station in town.*



Here's why: W-I-T-H delivers more listeners-per-dollar than any other radio or TV station in Baltimore. And this BIG audience, at such LOW rates, produces *low-cost results!*

W-I-T-H can do it for you too. Get in on this *natural* combination—low-cost, resultful advertising and W-I-T-H. Your Forjoe man will give you all the details.

IN BALTIMORE **WITH**

NETWORK SALES UP 5.8% OVER JAN. '52

Radio network volume is down 5%, TV network up nearly 16%, reports Publishers Information Bureau.

COMBINED gross time sales of the major radio and TV networks in January totaled $31,321,267, according to data compiled by Publishers Information Bureau. Figure represents a gain of 5.8% over the combined gross of $29,591,070 for January 1952.

The radio networks' combined total was $13,873,362 in January, a drop of 5.1% from the $14,519,511 gross for that month the year before. TV networks gross was up 15.8%, compared with the first month of 1952, and was $17,447,905 this year, $15,071,559 last.

Network-by-network breakdown, by PIB, follows:

	NETWORK RADIO	
	January, 1953	January, 1952
ABC	$ 2,669,327	$ 3,301,479
CBS	5,157,346	5,161,397
MBS	1,786,134	1,699,282
NBC	4,260,555	4,357,353
Total	$13,873,362	$14,519,511

	NETWORK TELEVISION	
ABC	$ 1,604,892	$ 2,020,461
CBS	7,321,386	5,074,643
DuMont	1,000,074	717,148
NBC	7,521,553	7,259,307
Total	$17,447,905	$15,071,559

WHDH Boston Area Study

NEW AREA study, made by Pulse for WHDH Boston in 25 counties in four neighboring states —Massachusetts, Maine, New Hampshire and Rhode Island—is claimed by the station as the first area study ever to measure both in-home and out-of-home listening, and to give individual program ratings projectable to total radio families in the area.

Comprising 8,200 personal interviews made in direct proportion to county population, the survey covered listening for each quarter-hour from 6 a.m. to midnight, both at home and away from home.

Stressing the value of the report's projectability, its quantitative data on individual programs and its inclusion of out-of-home listening to give total audience, William McGrath, WHDH manager, said with this study "for the first time, a buyer of advertising can determine accurately the cost-per-thousand in a station's area. The survey brings into true focus the real value of radio in a heavily-saturated TV area."

'Profile Display' Machine Patent Granted to Schwerin

PAUL SCHWERIN of Schwerin Research Corp., New York, last week was granted a patent on a device which the company has been using for some time in its testing and pre-testing of the effectiveness of radio-TV commercials and programs.

Called the "Profile Display Machine," Mr. Schwerin said, the device enables a test audience's reactions to be shown in synchronization with a re-run of the program involved, so that a sponsor can see exactly how each portion was received by the test audience.

Each member of the test audience has a switch which he can throw to "yes," "no," or "no opinion," signifying his own reaction to each segment of the program or commercial being studied. A large graph is made from information thus compiled, showing the response of the audience as a whole, and a moving rod passes across the graph at a rate synchronized with that of a repeat showing or playing of the program. Thus it is possible to watch or listen to the repeat and, by following the graph, to see the test audience's reaction to each portion as the program progresses.

TV-Electronics Fund Report

ALMOST seven million TV receivers may be sold this year, according to Chester D. Tripp, president, Television-Electronics Fund, Chicago. He anticipates a volume within one-half million of the 1950 production record of 7,463,800 sets.

Mr. Tripp, in a quarterly report to shareholders, described the state of the industry as "most optimistic" because inventories are "healthy" despite high production, and factory inventories are equal to only three days' production at the present rate. He reported that the fund, on Jan. 31, held net assets of $26,301,767, an increase of $14,008,842 in the previous 12 months.

Films for Citrus Group

FLORIDA Citrus Commission begins filming twenty 20-minute shows late this month, with an additional 20 sequences planned for subsequent video usage. Agency, J. Walter Thompson, New York, has signed Miss America (Neva Jane Langley of Lakeland, Fla.) to appear in the series, which will be sponsored by the commission on a spot basis beginning in New York and Chicago.

Films will kick off an initial 26-week television promotion in a proposed $600,000 campaign, and may be followed by two additional 26-week film series.

Film Sales

Guild Films, New York, has sold the *Liberace Show,* a half-hour musical film series, in 23 major markets.

* * *

Two negotiations, both in excess of $90,000, have been concluded by **George Bagnall & Assoc.,** Beverly Hills, with **WPIX (TV)** New York and **KRON-TV** San Francisco, giving these stations limited run rights to a block of 26 feature films new to TV. Negotiations were handled by **Jack O'Loughlin,** Bagnall's vice president in charge of sales, **G. Bennett Larson,** WPIX (TV) vice president and general manager, and **Norman Louvau,** KRON-TV commercial manager and film buyer.

* * *

NBC-TV's Naval history film series, *Victory at Sea,* was to start on **CMQ-TV** Havana last week and continue for 26 weeks. The network claims it is first TV program to run simultaneously in four countries. Series also is shown in U. S., Great Britain and Canada.

* * *

Allied Television Ltd., Honolulu (DuMont and Motorola TV sets dealer), started seven feature films weekly, *Allied TV Theater,* on **KONA (TV)** that city, for 52 weeks from Feb. 16. The purchase, involving $40,000 and negotiated directly, was handled by **Bun Clapperton,** station director of sales, with **Harry Louis,** head of Allied.

KHJ-TV Hollywood has leased a weekly half-hour TV film series, *Craig Kennedy, Criminologist,* from **Louis Weiss & Co.,** that city. Adventure programs, produced by **Adrian Weiss,** start April 4, for 26 weeks.

Distribution

Screen Gems, television subsidiary of Columbia Pictures Corp., has acquired national distribution rights to *Tales of the Texas Rangers,* half-hour TV film programs based on files of the Texas Dept. of Safety. Series is being produced in Hollywood by Screen Gems and **Stacy Keach.**

Syndication

NBC's Film Div. has announced it has concluded arrangements with **Procter & Gamble,** sponsor of *The Doctor* film series on NBC-TV, to syndicate the series—as first run in new markets, second run in old markets—under the new title of *The Visitor.* Benton & Bowles handled the arrangements for syndication.

Availabilities

George Bagnall & Assoc., Beverly Hills, has acquired TV sales and distribution rights to *Theatre U.S.A.,* a series of hour-long programs filmed especially for video by **Normandy Productions Inc.,** Hollywood. Films, nine of which are completed, are of collegiate dramatic productions.

* * *

Western Tales Productions, Hollywood, has completed two half-hour pilot films, "Wild Pinto" and "Stagecoach Days." **J. Donald Wilson,** producer on ABC-TV *Mystery Theatre,* produced the films. **Alfred E. Green** is director.

Production

Revue Productions, North Hollywood, is completing the second half-hour pilot film for **ABC-TV.** Starring **Barry Sullivan** and titled *Crackdown,* the series is built around police activities and has a suspense-adventure format.

Production starts in late May on *Meet Mr. McNutley,* budgeted at $750,000 and starring **Ray Milland** as a college professor, which **General Electric** starts in late September on a network to be announced. Situation comedy

INTENSIVE merchandising accompanies sponsorship of *Favorite Story* on WPTZ (TV) Philadelphia by Land O' Lakes Products and the William Montgomery Co. (Full Flavor coffee). Promotion and publicity details were worked out by (seated, l to r), J. J. McCarthy, district manager of Land O' Lakes; Alexander W. Dannenbaum Jr., WPTZ commercial manager, and Robert L. Montgomery Jr., president, Full Flavor; standing, Lee A. Terrill, vice president, Campbell-Mithun, Minneapolis, agency for Land O' Lakes, and Martin E. Goldman, partner, Aitkin-Kynett Co., Philadelphia, the Montgomery agency.

AP NEWS = Increased Business

"Turnover more than doubled!"

"Since we've been sponsoring AP newscasts on KGAF, our business has jumped more than 100% and our auction has become the livestock headquarters of North Texas."

Jim Perdue and Cecil Ward,
Gainesville Livestock Auction,
Gainesville, Texas.

Reports Joe M. Leonard, Jr., General Manager of KGAF, Gainesville: "AP news is our biggest revenue producer . . . gives us our biggest listening audience . . . is easy to sell. All 43 AP newscasts a week are sponsored . . . and we have a long waiting list. Every sponsor reports excellent results."

Says W. A. Wilson, President and General Manager of WOPI and WOPI-FM, Bristol: "We carry 30 sponsored AP newscasts each week—all on 52 week contracts. AP News helps us keep sponsors."

"Volume up 200%."

"We've sponsored AP newscasts over WOPI Plus FM across the board for the past five years. They've paid off handsomely — more business . . . and more profits."

Ward and Ed Morton,
Morton's Grocery,
Bristol, Tenn.-Va.

format, co-written by **Bob Mosher** and **Joe Connolly**, features **Phyllis Avery, Gordon Jones** and **Minerva Urecal.**

Revue resumes production in April on 35 half-hour films in *Chevron Theatre* **(Standard Oil Co.),** with a budget of $500,000. Summer production is scheduled for 26 films of *Kit Carson* **(Coca-Cola),** budgeted at $500,000.

* * *

Gross-Krasne Inc., Hollywood, goes into production today (Monday) on the first half-hour TV film in CBS-TV *Lux Video Theatre* series for **Lever Bros.** Four experimental programs will determine whether series goes film or remains live out of New York. **Laraine Day** stars in the initial film, "Women Who Wait," directed by **Charles Haas.**

* * *

Normandie Television Pictures Inc., Hollywood, headquartered at Motion Picture Center, starts production today (Monday) on "Breach of Promise," half-hour pilot film in *Damon Runyon Playhouse* TV series. Producer **Howard Welsch** has signed **Sheldon Leonard** as director.

* * *

Screen Gems Inc., Hollywood, is completing 30th half-hour film in NBC-TV *Ford Theatre* series, "Life of the Party." Written by **Mary C. McCall Jr.,** former Screen Writers Guild president, and **Jerome Gruskin,** film co-stars **Sally Forrest** and **Marshall Thompson. Lewis Allen** is director.

* * *

Revue Productions, Hollywood, is completing the pilot film in a proposed ABC-TV half-hour series, *Pride of the Family*. It stars comedian-dance satirist **Paul Hartman.** Film was directed by **Robert Finkel** and produced by **Alan Miller,** vice president, Music Corp. of America.

* * *

George A. Hormel & Co., Austin, Minn. (canned meats), started a test run of TV film version of *Hormel All-Girl Orchestra and Chorus,* long-standing radio program, **on KTTV (TV)** Hollywood March 2 through Saturday on a half-hour basis. Produced on 35 mm sound-on-film by **Kling Studios,** Chicago, the test run will be tied in with a strong merchandising program. Agency is **BBDO,** Hollywood.

* * *

Frank Tashlin Co., Hollywood, has signed **Mary Costa,** under contract to Walt Disney Productions. She will portray the leading role in *Oops, It's Daisy,* a new half-hour film series Tashlin will produce in partnership with **NBC-TV.** Shooting starts this month on the situation comedy program. **Frank Tashlin** is writer-director, **Lester Linsk,** producer.

Film People

James W. Taylor has been appointed business manager and chief accountant at **Herbert S. Laufman & Co.,** TV program producer, Chicago. He formerly was with **William Hart Adler Inc.,** Chicago advertising agency.

* * *

Jack Baur, casting director, Stanley Kramer Productions, Hollywood, to **Frank Wisbar Productions,** that city, in same capacity on NBC-TV *Fireside Theatre.*

* * *

Funeral services were held last Monday (March 2) in Hollywood for **Mort Glickman,** free lance musical TV film director, who died Feb. 27.

* * *

Wynn Nathan, Western sales manager, **United Television Programs,** L. A., father of girl, Laury, Feb. 24.

ASCAP-TV NETWORKS BEGIN TALKS

Negotiators last week were in an exploratory mood; problem being what to carry over from old contracts to new. Argument ahead: Should present scale of music license fees (on TV) be reduced radically?

NEGOTIATIONS between TV networks and ASCAP for new blanket licenses on telecasting of ASCAP music by networks and their owned and operated stations got under way Thursday at ASCAP headquarters in New York. New licenses would become effective Jan. 1, 1954, replacing the current agreements which expire the end of this year.

Initial meeting was described as "exploratory" and limited to presentation by both sides of the terms of the present licenses they are willing to have carry over into the new forms, and of points they feel should be changed. It is understood that the meeting did not get into serious argument, but that is certain to follow, particularly over the position of the networks that the present scale of license fees should be radically reduced.

Among those at the meeting were Joseph A. McDonald, NBC treasurer; W. Spencer Harrison, vice president in charge of business affairs for CBS-TV; Louis Stone, business manager of the CBS-TV program department; Omar Elder, ABC attorney; Herman Finkelstein, ASCAP general attorney. Donald H. McGannon, administrative assistant to the director of the DuMont TV Network, was an observer. (DuMont agreement with ASCAP differs from the standard form of license taken by the other networks.)

Money will be the main issue of negotiations, although far from the only one. NBC in 1951 and both NBC and CBS last year had bigger gross revenue from their TV networks than from their radio network time sales. That means that if the ASCAP blanket licenses for television were on the same scale as for radio, CBS and NBC would be paying more for TV rights to use ASCAP-licensed tunes. With present licenses calling for approximately 10% more for TV than for radio, these networks are presently paying considerably more to ASCAP for TV than for radio.

That, the network spokesmen affirm, is all wrong. Music is much less important to telecast programs than to programs that are heard but not seen, they argue. Accordingly, appreciably less music is used on TV. Furthermore, TV's larger gross is accompanied by larger expenses, so that the sum left to pay for ASCAP licenses and other items is less than in radio.

NEW SALESMEN are welcomed to World Broadcasting System by Dick Lawrence (r), sales manager, who outlines general expansion programs. Salesmen are Kenneth Joseph (l), former program director, WNYC New York, and Steve Fischer, former manager, KRES St. Joseph, Mo.

What the networks are going to fight for is a reduction in TV license fees, and there are more than a few indications that, like General Grant, they may have become reconciled to fighting out on that line all summer. One prediction made last week was that, with current TV licenses expiring at midnight of Dec. 31, the new terms won't be set before 11:30 p.m. of that date.

One reason that ASCAP negotiators will take a lot of convincing before they agree to any reduction in TV license fees is that the society's agreements with its writer members, giving ASCAP the right to license their music for TV, also expire at midnight of New Year's Eve. Whatever terms the negotiations produce will have to be subject to the writers' approval, and ASCAP officials will have a much easier job getting that if they can promise larger, rather than smaller, royalty checks from TV.

Per Program Licenses

While officially the discussions which started Thursday are concerned only with terms for blanket licenses to succeed those now in effect, it is considered inevitable that the question of per program licenses will also be raised. This question has remained unanswered in all the time the blanket licenses have been in effect.

An all-industry per program committee headed by Dwight Martin, formerly of WLWT (TV) Cincinnati and now with General Teleradio (WOR-TV New York, WNAC-TV Boston, KHJ-TC Los Angeles), met with ASCAP officials for about 18 months until negotiations broke down over ASCAP's insistence that fees be paid for commercial programs or announcements adjacent to programs containing ASCAP music as well as for the musical programs themselves.

Refusing to accept this condition, which many broadcasters felt would inevitably be applied to radio as well as TV, resulting in the virtual nullification of the hard-won terms laid down by the ASCAP consent decree, the 55 TV station operators comprising the committee in July 1951 went into the Federal Court in New York, petitioning it to set fair and reasonable fees for TV per program licenses. ASCAP in August 1951 countered with an appeal to the court to free it of the requirement of the consent decree for offering per program licenses to any station, TV or radio, which also holds a license from BMI. Since BMI is owned by the broadcasters, ASCAP argued, it constitutes unfair competition to other organizations holding broadcast performance rights.

Since then, counsel for both sides have been occupied with pre-trial maneuverings.

Early this year, the committee's counsel obtained authority to make oral examinations of ASCAP officials to reveal details of the society's activities. Most recently [B•T, March 2], the committee has been served with new ASCAP papers, supplementary to its petition of August 1951 to relieve the society of the

necessity of issuing per program licenses to BMI licensees.

Argument on this issue is the next order of business, but no date for it has been set. After that, the committee counsel will proceed with their questioning of ASCAP executives. After that, probably some time in the fall, the court may begin hearing argument on the primary question of establishing a fair and reasonable fee for per program TV licenses, provided no further delaying moves are made.

Meanwhile, the TV station operators who have not taken out ASCAP blanket licenses have been paying interim fees, which, with those paid by the stations with blanket licenses, have added to ASCAP's income by an appreciable sum. Informed sources estimate that $4 million is a fair appraisal of ASCAP's 1952 revenue from TV stations and networks. This sum, while not in the same class with the nearly $10 million paid to ASCAP by radio broadcasters, is still far larger than fees paid by any other group of ASCAP licensees. Together, the video and audio broadcasters are believed to account for approximately seven-eighths of ASCAP's total revenue. For 1952, that meant about $14 million of the $16 million total.

Both the TV broadcasters and ASCAP would like to settle the per program license problem, and it is certain to come up during the blanket license discussions, but neither side has any illusions that a satisfactory settlement will be easily reached. In addition to the matter of payment for adjacencies, there is the question of film clearance at the source, which is considered a much more difficult matter than in the case of transcriptions for radio use.

Lawyers disagree over their interpretations of court cases refusing ASCAP the right to collect performance fees from motion picture theatres for pictures whose producers have paid ASCAP film rights and whether these rulings are limited to theatre exhibition or cover broadcast use as well.

Another factor which will always be in the background of this year's discussions is that if another five-year TV pact is negotiated, its expiration date, Dec. 31, 1958, would coincide with the end of the nine-year radio license agreements, second set of licenses drafted under the conditions of the government consent decree accepted by ASCAP in 1940.

New UTP Programs

UNITED TELEVISION PROGRAMS, N. Y., has acquired two new half-hour TV shows, *Hank McCune Show*, situation comedy, and *Enchanted Music*, program of classical music including selections from ballet, light opera and symphony. Both series have 13 weekly programs already filmed.

'Doggie' in Manger

MERCURY RECORD Corp., New York, is promoting a "Doggie in the Window" contest that led John J. Broderick, general manager of WREB Holyoke, Mass., to cancel the playing of all Mercury records.

"The enclosed publicity release," Mr. Broderick said in explaining the action, "was sufficient for WREB to immediately cancel the playing of all Mercury records. By tieing a dog food (Ideal) as part of the giveaway, the record house has invaded advertising. This medium will vigorously fight every attempt to chisel 'free commercial' time on the air."

WOPI TV BID 'NOT FILED IN GOOD FAITH', WCYB TELLS FCC IN PLEA FOR GRANT

WOPI's application was filed "for the purpose of delaying and hindering the grant" of WCYB's bid for Ch. 5, WCYB charges in petition presented FCC. WCYB asks the Commission to issue it a conditional grant pending outcome of the comparative hearing.

WCYB Bristol, Va., petitioned FCC last week for conditional grant of its application for a new TV station on vhf Ch. 5, charging that the competitive bid of WOPI Bristol, Tenn., also for Ch. 5, "was not filed in good faith but was filed for the purpose of delaying and hindering the grant of petitioner's application."

Robert H. Smith, president and general manager of WCYB, further charges in the petition that "WOPI deliberately misrepresented the facts as to its financial ability to construct the proposed station," as well as the facts "as to the technical suitability and availability of its proposed transmitter site."

His allegations also are supported through an affidavit by Russell V. Robinson, chief engineer of WCYB and former chief engineer of WOPI.

The WCYB petition was prepared by James Lawrence Fly, onetime FCC chairman and now partner in the radio law firm of Fly, Shuebruk & Blume, New York and Washington.

Mr. Smith bases his request for a conditional grant—which would remain in effect pending outcome of the eventual comparative hearing between WCYB and WOPI—upon Sec. 1.385 (e) of FCC's rules and regulations. Sec. 1.385 (e) gives the Commission authority to issue a conditional permit under certain circumstances, including possible "strike application" situations.

Meanwhile, FCC last week received two more petitions respecting competitive TV applications in other cities. They were:

- Petition by WMAM Marinette, Wis., applicant for vhf Ch. 11, which seeks dismissal of the competitive bid of WDUZ Green Bay, Wis.-WMAW Menominee, Mich. on the grounds that the WDUZ-WMAW application is "fatally defective." WMAM further contends the WDUZ-WMAW bid was "apparently designed only to delay and block."
- Request by Tri-State Telecasting Corp., Chattanooga, Tenn., for conditional grant of its vhf Ch. 12 application pending completion of eventual comparative hearing with the competitive bids of Southern Television Inc. and WDEF Chattanooga. Tri-State bases its petition upon the provisions of Sec. 1.385 (e) relating to the public interest of prompt service and possible defective condition of its competing bids.

Filed February 1952

In the Bristol case, WCYB President Smith relates in his petition that the station first filed for Ch. 5 on Feb. 15, 1952, amending it pursuant to the Sixth Report on June 13, 1952. The petition notes WOPI filed its application on July 2, 1952.

Explaining his allegation that WOPI "deliberately" misrepresented its financial ability in its TV bid, Mr. Smith asserts that the WOPI application, "when compared to other data filed by WOPI with the Commission, conclusively indicates that WOPI does not have adequate funds on hand or available to meet its estimated construction costs."

The WCYB petition contends the transmitter site "has not been approved by the CAA and WOPI's previous attempts to use the same site for AM and FM purposes were abandoned because of the improbability of CAA approval, and the proposed transmitter location is in a residential section of the city which has been officially zoned as such . . . and could not be used as a transmitter location."

WCYB charges WOPI was "concerned primarily with getting an application on file instead of proposing a station that actually could be built."

WOPI "deliberately misrepresented the facts regarding whether or not any party to the application had been involved in bankruptcy proceedings," WCYB alleges, stating "in fact, W. A. Wilson, the president of WOPI, filed a voluntary petition in bankruptcy on July 19, 1933, in the U. S. District Court for the Eastern Division of Tennessee, Case No. 2137."

Continuing its attack upon the competing application, WCYB alleges "WOPI has, by its own public behavior, unequivocally indicated that it regards its own application as merely a stopgap to prevent petitioner's application from being granted. This purpose is manifest in and confirmed by the substantial and leading participation by WOPI in the organization on Sept. 24, 1952, of a new Tennessee corporation named Tri-Cities Television Corp. and in WOPI's subsequent promotional activity on behalf of that corporation."

The petition states "WOPI's president has made extensive efforts to sell stock of this new corporation to third persons" and notes "these promotional efforts have apparently failed" since the "new corporation lies dormant."

The petition charges the WOPI president in 1946 "sought to get on file an application to improve WOPI's radio facilities which would be technically deficient so that it could not be granted but which, by being on file, would

SCALE MODEL of the TV station proposed by Orange Television Broadcasting Co. on vhf Ch. 13 at Tampa, Fla., is explained by Vice President-General Manager Herbert Stewart (center) to principal stockholder and President David A. Falk (r) and Director Frank E. Mandel. Mr. Stewart showed model last week during FCC's comparative hearing on Ch. 13. Other competing applicants are WDAE Tampa and Tampa Television Co.

ward off any other from applying for a station in Bristol." And in the fall of 1952, after the WOPI television application had been filed, but before the recent relaxation of the Commission's rules on the matter, he sought Commission permission to use third-class radio operators (instead of first class) by falsely representing that first-class operators were not available, despite the fact that the said TV application . . . stated that 'at this writing we have almost sufficient applications on file to take care of our [TV] requirements.' "

Concerning his allegation that Mr. Wilson abused Commission procedures by a WOPI application in 1946, Mr. Smith relates in an affidavit what he claims to be a personal experience in the matter.

Mr. Smith states that in February 1946, when he was chief engineer of WOPI, he visited the Washington radio law office of Spearman, Sykes & Roberson, and Frank Roberson, "as soon as he saw affiant, angrily told affiant that the firm no longer was representing WOPI and that affiant should get out. On affiant's surprised inquiry as to what was the matter, Mr. Roberson allowed affiant to read a letter he had received from W. A. Wilson. This letter requested the law firm to dismiss the pending 550 kc application and to prepare another application to change WOPI's frequency to a frequency in the 1500-1600 kc range. However, the letter requested that the application be incomplete because a grant was not wanted and the real purpose was to scare off any competition from developing."

Willing to Take Risk

WCYB informs the Commission it is financially and otherwise qualified to construct the proposed TV station and could be on the air within 90-120 days after the conditional grant. The station states it "realizes that it will still have to go through a hearing with WOPI and realizes that a conditional grant would be a very substantial and expensive undertaking; nevertheless, it expressly avows its willingness to run the risks involved."

The petition of WMAM Marinette points out that its application has been on file and uncontested since July 1, 1952, noting that according to present Commission processing, a grant would be in order within the next few weeks.

"However," WMAM contends, on Feb. 16 owner of WDUZ and WMAW, Green Bay Broadcasting Corp. filed for the same channel "thereby ostensibly preventing the grant" of the WMAM bid and "creating a conflict which can only be resolved by a comparative hearing at some distant future date."

WMAM notes Green Bay "had an absolute right to file . . . assuming, of course, that its application was filed in good faith."

The petition contends, however, that the Green Bay TV application is defective since it does not include information relating to sale of majority interest to newcomers, submitted to FCC for approval in another application four days before the Green Bay TV bid was filed. WMAM also charges the Green Bay TV bid is defective for not answering relevant questions regarding proposed financing, hence should be dismissed.

Howrey Named to FTC

EDWARD P. HOWREY, Washington attorney well-known in the broadcast field, was nominated Federal Trade Commissioner last Wednesday by President Eisenhower. He maintains offices in the Shoreham Bldg., and succeeds John Carson, an independent. Mr. Howrey is a Republican and lives in Burke, Va. His nomination is subject to Senate confirmation.

NEW TV PERMITS GRANTED TO SEVEN

M. B. Rudman, oil operator, is believed the first to receive his fourth post-thaw TV grant.

BELIEVED to be the first individual to receive his fourth post-thaw TV grant, independent oil operator M. B. Rudman last week received a construction permit for vhf Ch. 12 at Bismarck, N. D., one of seven new TV permits issued by FCC last week.

Mr. Rudman earlier received construction permits for uhf Ch. 35 at Galveston, Tex.; vhf Ch. 10 at Minot, N. D., and vhf Ch. 8 at Billings, Mont. The new Billings grantee, Rudman-Hayutin Co., is owned 50% by Mr. Rudman and 50% by oilman Albert Hayutin. Mr. Rudman has oil interests in Texas, Oklahoma, Louisiana, Arkansas, North and South Dakota, Illinois, Georgia, Alabama and Florida. He headquarters in Dallas.

All of last week's new TV grants were in the Group A city priority list (cities without service) and extended processing to city No. 310, Medford, Ore., where Southern Oregon Broadcasting Co. received vhf Ch. 5. Processing in the Group B list (cities with service) has extended to No. 199, Charlotte, N. C., where WAYS a fortnight ago was awarded uhf Ch. 36 [B•T, March 2].

Post-thaw grants now stand at 281, raising the outstanding U. S. TV authorizations to a total of 389.

Last week's new TV grants were as follows:

Bloomington, Ill. (City priority status Group A-2, No. 137)—Cecil W. Roberts (KREI Farmington, Mo.), granted construction permit for uhf Ch. 15, effective radiated power 18 kw visual and 9.8 kw aural, antenna height above average terrain 320 ft.

Clovis, N. M. (Group A-2, No. 309)—Telepolitan Bcstg. Co., granted vhf Ch. 12, ERP 10.2 kw visual and 5.1 kw aural, antenna 500 ft.

Bismarck, N. D. (Group A-2, No. 287)—Meyer Bcstg. Co. (KFYR), granted vhf Ch. 5, ERP 100 kw visual and 50 kw aural, antenna 520 ft.

Bismarck, N. D. (Group A-2, No. 287)—Rudman TV Co., granted vhf Ch. 12, ERP 60 kw visual and 32 kw aural, antenna 300 ft.

Medford, Ore. (Group A-2, No. 310)—Southern Oregon Bcstg. Co. (50% owned by KIEM Eureka, Calif.), granted vhf Ch. 5, ERP 19 kw visual and 9.8 kw aural, antenna 460 ft.

Sherman, Tex. (Group A-2, No. 260)—Sherman TV Co., granted uhf Ch. 46, ERP 20.5 kw visual and 11 kw aural, antenna 310 ft.

Charleston, W. Va. (Group A-2, No. 48)—Joe L. Smith Jr. Inc. (WKNA), granted uhf Ch. 49, ERP 228 kw visual and 120 kw aural, antenna 390 ft.

In other actions, FCC scheduled two new TV hearings, one for vhf Ch. 2 at Spokane, Wash., involving Louis Wasmer (KREM) and Television Spokane Inc., and the other for uhf Ch. 69 at Fort Wayne, Ind., involving Radio Fort Wayne Inc. (WANE) and Anthony Wayne Broadcasting. Both cases are set for April 6 in Washington.

Designation of these hearings is the first such action since revision of the hearing rules effective Feb. 4 [B•T, Feb. 9] and first since the end of the temporary speed-up processing plan which began last Oct. 15 and called for passing-over of contested applications in order to expedite grants to non-contested applicants in areas without service.

Fortnight ago the Commission issued 19 new TV permits, a larger group than the 18 initial grants of July 11, 1952, following lifting of the 3½-year freeze.

Among the 19 permits was a grant to Midwest Television Inc. for vhf Ch. 3 at Champaign, Ill. Midwest represents a merger of two formerly competing bids for that facility.

Illinois Broadcasting Co., licensee of WSOY Decatur, Ill., and previously competitor for Ch. 3, acquired 20% interest in the new Midwest Television, whose other principal stockholders include President Arthur C. Meyer (24.9%) and Clara R. Meyer (26.1%); Helen M. Stevick (10%), who is 60% owner of WDWS Champaign, and Marajen S. Dyess (10%), who is 40% owner of WDWS.

Mr. and Mrs. Meyer held 50.2% control in the earlier Midwest Television bid and the Misses Stevick and Dyess held 40%, half of which holding was given the WSOY licensee in the newer bid. It was incorrectly reported earlier that the WDWS principals, rather than Mr. and Mrs. Meyer, controlled Midwest [B•T, March 2].

FCC Action on Conelrad

FCC took action last week toward inclusion of the Conelrad radio-alerting plan in its rules governing broadcast operation. The plan would keep a group of cooperating AM stations on the air in case of danger of an enemy attack and at the same time keep the public informed of civil defense instructions. FM and TV stations would be silenced in case of danger from hostile aircraft.

AM CPs, Ownership Changes

FCC last week made two new AM grants and consented to nine transfers of control and assignment of licenses. Actions taken were as follows:

Warren, Ark.—Pines Bcstg. Co., granted 860 kc, 250 w daytime, engineering condition (BP-8604.)

Fairfield, Iowa—Fairfield Bcstg. and Telecasting Corp., granted 1570 kc, 250 w daytime, engineering condition. (BP-8524.)

WCLC Flint, Mich.—Adelaide Lillian Carrell. Granted consent to assignment of license to WKMH Inc., consideration $42,000. (BAL-1505.)

KBOK Waterloo, Iowa—Waterloo Bcstg. Co. Granted consent to assignment of license to Northwestern Schools Bible College, College of Liberal Arts, Theological Seminary; consideration $56,000. (BAL-1502.)

WMOG Brunswick, Ga.—Coastal Bcstg. Co. Granted consent to assignment of license to Radio Brunswick Inc.; consideration $92,000. (BAL-1501.)

WMSC Columbia, S. C.—Marseco Bcstg. Corp. Granted consent to A. R. Heyward II, et al, to transfer control to C. Wallace Martin, Geddings H. Crawford and J. Wesley Hunt; consideration $41,000 together with all TV assets owned by licensee and obtained in connection with its application for new TV station in Columbia, S. C. (BTC-1453.)

KSID Sidney, Neb.—Sidney Bcstg. Co. Granted consent to voluntary assignment of CP and license to Lewis W. Grove and William C. Grove, doing business as Sidney Bcstg. Co. (Change in partnership interest.) (BAPL-87.)

WBLE Batesville, Miss.—Panola Bcstg. Co. Granted consent to involuntary assignment of CP to Harold B. McCarley, Travis A. Palmer and Miss Ruth Hartness, Executrix of the Estate of James B. Hartness (silent partner), deceased, doing business as Panola Bcstg. Co. (BAP-190.)

WDAD Indiana, Pa.—Indiana Broadcast Inc. Granted consent to voluntary assignment of license and CP to Thompson K. Cassel. (BAL-1504, BAPRE-9.)

KIVY Crockett, Tex.—The Pioneer Bcstg. Co. Granted consent to involuntary assignment of licenses to Mrs. Margaret E. Callen, Executrix of the estate of Hamilton H. Callen, deceased, and James H. Gibbs, doing business as the Pioneer Bcstg. Co. (BAL-1506, BALRE-133.)

WMOD Moundsville, W. Va.—James D. Sinyard. Granted consent to voluntary assignment of CP to Robert W. Munn. (BAP-187.)

17TH. STATE* Sportscaster

FOR all the news in the sports world everyone in the 17th State listens to Bob Bender's two sportscasts each day. Bob is that special personality who has built a loyal following in the six years he's been the WGY sportscaster. The list of his invitations to scholastic sports dinners in the area is a mile long.

On the air from 6:30 to 6:45 p.m., Monday through Friday; 6:15 to 6:30 p.m. on Saturday; and 11:05 to 11:15 p.m. Monday through Saturday, Bob Bender is an ideal vehicle for participating or program sponsors. He appeals to every sports taste, giving news on everything from hunting and fishing to skiing. And with the baseball season practically here, Bob's late sportscast is even more valuable because of the tremendous interest in the night game scores.

Bob Bender has a "Hall of Fame" of his own in his program guest list. Vic Raschi of the New York Yankees was an interviewee on a recent Bob Bender show.

WGY MARKET DATA

22 cities over 10,000 population
458 towns
53 counties
2,846,300 citizens
878,130 radio families
More goods purchased than 32 states

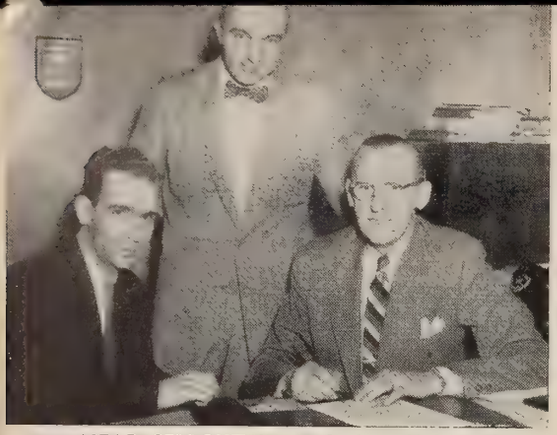
...the climate
is
fine



For reasons as plain as the props on a pair of stilts, Mister PLUS and his clients are having a high old time in radio these days. A special sort of climate seems to prevail up here, with sponsors' sales and network billings thriving exceptionally on Mutual. In fact, we sold 17% more time in '52 than in '51.

One reason for this highly favorable climate is our matchless dominance of Non-TV America, where 60,000,000 cash customers are doing more radio listening than ever—and tuning to our stations in 2-to-1 preference over the next-best network's.

An equally unique cause for the tonic atmosphere around here is the new Mutual rate formula, now in effect for all America. We charge nothing extra for our growing audiences in Non-TV areas. We offer 50% discounts on evening time in TV areas (though ours is the smallest network-listening decline in these centers). And we're geared for the future by agreement to apply this discount to any affiliate within effective range of any new TV tower.

From where we stand today, every prospect pleases—and we're eager to point out how network radio can please you.

MUTUAL . . . the plus network of 560 affiliates

NEAR SELLOUT is reached at WGAR Cleveland as Second Federal Savings buys an evening strip for 26 weeks. Signers (l to r): Jack Dooley, newscaster; Don Hyde, WGAR sales, and Harry Winsor, bank's adv. dir.

FOREMOST Dairies, Jacksonville, Fla., buys *Uncle Walt Sickles and Needles* across the board for a year on WHOO Orlando. Planning milk and ice cream promotion for radio: (seated, l to r), Mr. Sickles and Pete Parrish, gen. mgr., Foremost; (standing) Tom Sawyer, WHOO sales; King Pedler and Bill Patterson, v.p.s, Advertising Inc., Washington, and Carl Hallberg, WHOO gen. mgr.

NEHI Beverage Co., L. A., buys 1,000 30-second spots on KLAC Hollywood for 26-week period, after agreement by (l to r) Ivan A. Nielson, partner-gen. mgr., Nehi; Jack F. Kerr, Raymond R. Morgan agency; Will Higgin, Nehi partner, head of sales, and Jack Strafford, KLAC salesman.

SEVENTH annual contract for hour-long *Florida Special* on WGBS Miami is signed by Jack Somberg (l), owner, Kenny's Dept. Store, with Frank Riordan, comm. mgr. Kenny's has used spots and programs since 1947.

GROUPS CRITICIZE N. Y. TV REPORT

Special state commission's finding of a fortnight ago that 10-station noncommercial educational TV network is "undesirable" has aroused storm of protest.

A STORM of criticism broke last week around the New York State special commission's finding that the proposed state-owned 10-station educational TV network was neither "necessary" nor "desirable" at this time [B•T, March 2].

The chairman of the Democratic State Committee, Richard H. Balch, charged flatly that the commission's report was the "hatchet" work of Gov. Thomas E. Dewey and his Republican administration.

The Public Education Assn. and the New York Board of Rabbis were among others condemning the report.

The commission, known as the Temporary State Commission on the use of Television for Educational Purposes and appointed by Gov. Dewey last October to study the question, held in its report that the possibilities of educational TV need and deserve extensive further exploration, but that, as of now, the 10-station state-owned network proposal is too expensive for the state to undertake and that educators are not using all the free time available to them on commercial stations. The vote was 10 to 5, but it was said that even the dissenters previously had expressed agreement with generally similar recommendations contained in an earlier and considerably longer draft report. Additionally, it was said, none of the five dissenters ever endorsed the network plan as it stood, although they did want a pilot station built and operated.

This was confirmed in large part Friday in dissents issued by the minority, which said it was committed to "ultimate" use of New York's channels but not to "any particular plan"; that another year's study should be made by a "new commission," that Congress should enact legislation to reserve the nation's 242 educational channels for five to ten years more, and that New York State should start with operation of one station and expand "as experience justifies."

Minority member Norman S. Goetz, a trustee of the State University, proposed that $500,000, but no more, be appropriated now for a pilot station to be operated by a corporation representing a group of colleges, libraries and museums, and organized so "there will be no direct ownership nor direct state operation." Another minority member, Chancellor John P. Myers of the Board of Regents favored the original plan, starting with a pilot station operated by "a local board."

A third minority member offered "no special recommendations," while the two others, minority leaders of the state senate and assembly, respectively, added a separate statement charging that "the majority of the Commission has had from the outset the preconceived opinion that educational television should not become a reality in this state."

Meanwhile, Michael R. Hanna of Cornell U.'s WHCU Ithaca, a member of the commission majority, sketched his own views, which, while reaching the conclusions contained in the report, arrived there by different reasoning.

He said he questioned the advisability of establishing the "monopoly" which would result from putting all 10 stations in the hands of the State Board of Regents. It is, he said, a question of the fundamental philosophy of state control of mass communications media. Further, he continued, educational institutions in several of the cities selected in the network plan can afford their own stations. In this report he mentioned New York City, Buffalo, and Rochester specifically.

Mr. Hanna also questioned the coverage which would be provided by the proposed stations—all uhf—due to the rugged terrain in the state, which he said would result in coverage not being provided where it is needed most, under the 10-station location plan. He further raised questions as to the number of set owners who would convert to uhf.

Overall he contended that the state's function in the educational TV field should be concerned with production of good educational programs, not the operation of transmitters. If the state produces good programs, he noted, they will be carried by commercial stations—and, additionally, good ones could be sold to appropriate sponsors and the state would get back its production costs, as in the case of the Ford Foundation TV-Radio Workshop programs.

Meanwhile, in a letter to Gov. Dewey, President William B. Nichols of the Public Education Assn. called the majority report "hastily drawn" and "lacking in evidence," and asked that the legislature hold public hearings on the subject of educational TV and that the legislature remain in session until "the relevant evidence has been made available" and publicly appraised.

He also endorsed the pilot-station plan, and, like the commission majority, favored FCC's continuing to keep the state's educational channels reserved.

Multiple FM Broadcast Asked Of FCC by N. C. Licensee

PETITION was filed last week with FCC to amend its rules governing FM stations to permit licensees to use multiplex transmission of subsidiary "programs," including transit radio, on the regular program signal. The regular FM broadcast would not be affected.

Mount Mitchell Broadcasters Inc., (WMIT-[FM]), Clingman's Peak, N. C., asserted in its petition that this supplementary FM service can be used for transit radio broadcasting, facsimile or teletypewriter services, emergency use by public authorities and in national defense, and in other ways.

Mount Mitchell Broadcasters maintains the use of such equipment would multiply the usefulness of the existing spectrum space assigned to FM broadcasting and would aid in making efficient use of all available frequencies.

Opposes Power Grant

ATTORNEYS for WIBC Indianapolis have petitioned FCC for permission to become a party in the application of WAPI Birmingham, Ala., for a power increase. WIBC's petition alleges increased power for WAPI, which operates on 1270 kc, will interfere with the daytime signal of WIBC, which operates on that frequency. WAPI, operated by The Television Corp., seeks an increase of daytime power from 10 kw to 50 kw nondirectional. It has 5 kw power at night. WIBC operates with 50 kw daytime and 10 kw nighttime. WIBC attorney is Thomas H. Wall of Dow, Lohnes and Albertson, Washington.

NEW OPERATOR RULE SUSPENDED BY FCC

IBEW claims move would injure defense program and hit the technicians' pocketbooks.

FCC last Thursday suspended the effective date of its order relaxing its operator requirements and permitting remote control transmitter operation, at the request of the International Brotherhood of Electrical Workers (AFL).

FCC's action of a month ago [B•T, Feb. 2] revised rules governing type of operating personnel at stations, and opened the way for remote operation of transmitters of 10 kw or less.

IBEW's petition for the stay order, effective March 6, was filed pending petition for reconsideration. Its plea emphasized the national security hazards the order might create, plus the economic impact on technicians. The petition stated:

"The President recently indicated that, in his opinion, civil defense should be one of the primary concerns of the American public. We suggest that the full impact of this statement, from an experienced soldier, deserves very deliberate consideration of the Commission and the broadcasting industry. In this electronic age, almost anything is possible. No stone should be left unturned to insure complete security of electromagnetic radiation."

IBEW's plea referred several times to possible effects of the new FCC rules on operation of the Conelrad plan to warn the nation in case of enemy attack and at the same time prevent enemy planes from using station signals as homing beacons. It contended remote transmitters would be in isolated spots and easily accessible for sabotage purposes.

The union argued that evidence covering remote operation was inadequate to justify elimination of hearings and oral arguments. It claimed the new rules would discourage voluntary participation in the Conelrad program, calling for rapid switching of frequencies and other adjustments.

Referring to FCC's new requirement that all stations have at least one first-class operator in fulltime employment, IBEW claimed that if the Commisison "admits the necessity for one first class operator, it admits that the work to be performed requires trained specialists, first class operators."

McCarthy Probe of VOA Sparked by Pro - Con Charges

AS THE inquiry into the Voice of America continued along an involved route last week, Sen. Joseph McCarthy (R-Wis.) mounted his offensive on behalf of the Senate Permanent Investigations Committee of which he is chairman.

The week ended with a barrage of charges and counter-charges. But the Senator concluded that the department was still the best-run of the five sections in the International Information Service. All are under jurisdiction of the State Dept.

He noted that "indications" are that the "situation is worse" in some of the other four sections, which are the press service, motion picture branch, overseas libraries and the exchange program in which foreign students and others are brought to the U. S. for study.

These branches, along with Voice of America's plan for putting another ship, the *Vagabond,* in operation as a "floating" transmitter site, will be investigated, he said. He commended the work by VOA on its Russian and Hebrew desks, but said the French desk was "doing a job that is foul beyond words."

Events last week were spotlighted on television at a public hearing in Foley Square, New York, Feb. 28. The hearing was fed by NBC to its television network for two hours. Major issue was cancellation of broadcasts to Israel in the Hebrew language last December at a time when Russia stepped up its anti-Semitism program. The cancellation, never carried out, allegedly aided the Communist propaganda theme. The Hebrew broadcasts, along with charges that persons employed by VOA abroad were not cleared for security, were major themes of the hearing.

Reed Harris, deputy administrator for the State Dept.'s overseas information program, took the stand when hearings returned to Washington. He testified Tuesday, Wednesday and Thursday, tossing allegations of his own.

Challenging testimony of witnesses, as well as what he considered to be Sen. McCarthy's method of inquiry, he said the persons named as not having been cleared in security checks were approved after thorough investigation.

Mid-week, Rep. C. Clevenger (R-Ohio), said he favored abolition of the Voice because "you can't reform that outfit." He suggested that private industry could handle Voice projects at a "fraction" of the cost allocated now.

He recommended operation of VOA by private broadcasters, estimating they could do the job at a cost between $10-$15 million yearly, compared to the $86 million "appropriated last year for the Voice."

WORD CHARGES WIS-TV OVERLAP

WORD Spartanburg, S. C., applicant for TV Ch. 7 there, asked FCC last week to reconsider its grant of Ch. 10 at Columbia to WIS-TV Corp. to require Broadcasting Co. of the South to elect whether it wishes to construct on Ch. 10 at Columbia or to prosecute its competitive Ch. 7 bid at Spartanburg.

Broadcasting Co. of the South owns 80.9% of WIS-TV Corp. and is licensee of WSPA Spartanburg and WIST Charlotte, N. C. At Charlotte, it seeks Ch. 9.

WORD charges Sec. 3.636 of the Commission's rules precluding multiple ownership of TV stations covering the same area would be violated by the operation of Ch. 10 at Columbia and Ch. 7 at Spartanburg under common ownership. Engineering charts submitted with the petition also show overlap with these two channels by the proposed Ch. 9 outlet at Charlotte.

WORD asks FCC as additional or alternative relief to grant its Ch. 7 application on a regular basis or conditionally pursuant to the conditional grant provisions of Sec. 1.385(e) of the Commission's rules. Meanwhile, two other applications have asked for conditional grants pursuant to Sec. 1.385(e) (see story page 40).

Pointing out that should Broadcasting Co. of the South choose to drop its Spartanburg bid the WORD application would be free to receive a grant, WORD notes that if the competitive situation should continue "it is clear that an indefinite delay which may well extend for several years will intervene before a television station can be constructed and service commenced in Spartanburg on Ch. 7."

A minority interest is held in WIS-TV Corp. by a group of former principals in WMSC Columbia, previously competitor for Ch. 10.

Young people do want to know the facts of life insurance

Our schools are not only teaching them how to make a living . . . but equally important, *how to live!*

For more than 80% of our children, graduation from high school marks the end of formal education. Today's high schools are putting an increasing emphasis on training that will prepare young graduates for productive jobs and careers.

And in more recent years, there has been a definite trend to "education for living" and the addition of such courses as home and family living, family relations and money management.

As a central source of information about life insurance, the Institute of Life Insurance is continually answering requests of teachers and students for information and educational material on life insurance.

As part of its educational program, the Institute prepares teaching aids for classroom use, consisting of booklets, charts, motion pictures, and other items for which teachers may indicate a need.

In addition, the Institute sponsors a nationwide scholarship program to improve the teaching of money management and financial security. This is done through summer workshops at eight major universities which give intensive training in teaching techniques and subject matter to educators who, in turn, pass on their knowledge to their students and to other teachers.

Through these services, the Institute of Life Insurance is helping to broaden the understanding of a subject that is a major source of financial security for the American family.

The booklets shown above are just two of the many aids prepared by the Institute of Life Insurance. They are useful to radio editors, writers and commentators, as well as educators. Copies are available on request.

CBS Opposes Zenith Bid For Ch. 2 Reconsideration

ZENITH claim to a right in Chicago Ch. 2 has no basis in fact, CBS said last week in filing opposition to the radio-TV manufacturer's petition for reconsideration submitted to the FCC last month [B•T, Feb. 23].

Zenith had asked the Commission to reconsider its February action dismissing Zenith's application for Ch. 2 on the ground Zenith participated neither in the allocations hearing nor the WBKB renewal proceedings [B•T, Feb. 16]. This action was taken in conjunction with the FCC's approval of the ABC-United Paramount Theatres Inc. merger and sale of WBKB facilities on Ch. 4 to CBS. Under the FCC's Sixth Report and Order [B•T, April 14, 1952], Ch. 4 was switched to Milwaukee and the Chicago Ch. 4 station ordered to move to Ch. 2.

Zenith claimed its four-year-old application for Ch. 2 gave it the right to a comparative hearing with what is now the CBS-owned WBBM-TV Chicago.

CBS rebutted the Zenith contention that since the FCC permitted WLAN Lancaster to oppose WGAL-TV Lancaster in the latter's move from Ch. 4 to Ch. 8 it also should allow Zenith to compete with WBBM-TV in its move from Ch. 4 to Ch. 2.

CBS claimed the Commission set the two Lancaster applications for hearing because WGAL-TV was up for license renewal. Under FCC regulations, an application for a new station must be heard at the time the existing station's license comes up for renewal.

CBS said Zenith can refile for Ch. 2 when WBBM-TV's license renewal date approaches.

Joining CBS in opposing the Zenith petition was Balaban & Katz Corp., original license holder for the original WBKB (that call now is used by ABC's Ch. 7 station in Chicago, which had been WENR-TV).

Private Persons Can Testify Before FCC, Justice Dept. Says

Citizens without direct interest in broadcasting can intervene in Commission actions, according to the Justice Dept.

CAN ordinary public citizens who have no direct stake in broadcasting intervene as "parties in interest" in actions of the FCC?

That question was answered affirmatively by the Dept. of Justice two weeks ago. It was contained in an answer by the Justice Dept. to Transit Riders Inc.'s appeal to the U. S. Court of Apeals in Washington from the FCC's dismissal of a protest against the renewal of the license of WWDC-FM Washington.

Also filed two weeks ago was the FCC's brief in the case (No. 11,574) holding that the anti-transit radio group had no legal standing as a "party in interest."

This is believed to be one of the few times that the Dept. of Justice has taken a stand opposite to that of a federal agency.

Oral argument on the Transit Riders Inc. petition is scheduled to be heard March 20. However, a request for postponement has been filed by TRI.

Case stems from TRI protest last August against the FCC's renewal of WWDC-FM's license without a hearing. WWDC-FM originates transit radio broadcasts for the Capital Transit Co., Washington transportation utility. FCC dismissed the TRI protest later in the month on grounds that (1) TRI did not meet the test of a "party in interest," and (2) allegations that transitcasts were injurious to its members' health were not specific enough, as called for by Sec. 309 of the Communications Act. TRI appealed the dismissal to last October, naming the U. S. as respondent.

Both the FCC and WWDC-FM are intervenors in the case. WWDC-FM filed a reply to TRI last December, holding much the same as the FCC.

The Dept. of Justice termed the case "a novel one," concluding, however, that TRI has shown a "legitimate interest."

Regarding jurisdiction, the Justice Dept. implied that TRI had perhaps erred in filing under Sec. 402(a), making the U. S. a respondent, rather than under Sec. 402(b) which would have made the FCC the respondent.

In arguing against the TRI appeal, the Commission said:

Members of the listening public generally, particularly those in one-station communities, may frequently be more substantially affected by orders of the Commission granting or denying broadcast licenses than are petitioners' members by the grant to WWDC-FM. The general interest of members of the public is not sufficient to confer standing to protest or appeal Commission orders. . . .

Stay Order Argued

ORAL ARGUMENT was heard Thursday by the U. S. Court of Appeals for the District of Columbia on the request of WGRD Grand Rapids, Mich., for a stay order to preclude construction of a new TV station on uhf Ch. 35 at Muskegon by Versluis Radio & TV Co. WGRD has appealed to the court to set aside FCC's order dismissing WGRD's plea for reconsideration of the Versluis grant on grounds of economic injury [B•T, March 2]. The court is expected to rule momentarily on the request for stay, possibly this week.

Free Press, Radio-TV Role Discussed by Judge Rifkind

FIVE specific proposals designed to promote the role of the free press, radio and television, and still maintain the constitutional right of fair trial were outlined Feb. 27 by former Federal Judge Simon H. Rifkind at a Conference on Fair Trial and Free Press called by the New York County Lawyers Assn. [B•T, March 2].

Judge Rifkind proposed as an experiment in self-regulation:

1. Let the courts and legislature prohibit, under appropriate penalty, disclosures by police, prosecutors and public officials, of information relating to trials which ought not to be published. . . .

2. Let the bar formulate its own views of a code of conduct for the press which is compatible with the integrity of the judicial process.

3. Thereafter, let the bar meet with representatives of the press in an effort to find high patriotic common ground.

4. Let the bar establish watch-dog committees to police departures from the accepted code by suggestion and moral persuasion.

5. Let the press establish a similar committee . . .

Later, the conference adopted a resolution that a committee be set up to confer with press, radio-TV representatives.

Sally Work has had the confidence of Buffalo women for over 25 years

WBEN's Sally Work knows how to make friends with Buffalo housewives — as her 25 years of success prove. Her companionable early afternoon program features informal conversation . . . anecdotes, fashion news, beauty hints and tips on homemaking and child rearing, delivered in the intimate, friendly terms of one woman to another. Year after year, sponsors like the Ladies Home Journal, Bordens, General Foods —and other equally significant advertisers—count on personable Sally to sell their products in the personal, confidence-building manner that women like—and respond to. Let Sales Gal Sal present YOUR sales message in her sales producing way to one of the most productive markets in productive New York State.

Sally Work 1:30 - 2 P.M., *Monday through Friday*

WBEN NBC IN BUFFALO

TBC Claims XETV (TV) Is Actually U. S. Station

TBC Television Inc., applicant for San Diego's Ch. 10, thinks FCC should not permit XETV Tijuana to originate programs from San Diego or be fed programs by U. S. networks.

OUTSPOKEN charge that Mexican TV station XETV (TV) Tijuana was an "American" station, with its transmitter "only physically" across the border, was made last week by TBC Television Inc., applicant for Ch. 10 in San Diego.

The allegation was made in petitions filed with the FCC vigorously opposing the grant of an application by Alvin George Flanagan for permission to originate programs for XETV from San Diego [B•T, Jan. 26] and against requests by NBC and DuMont to furnish XETV with live and film-recorded TV programs.

Protest against the grant has been filed also by KFSD San Diego, a second applicant for San Diego's Ch. 10.

Both protests claim that the establishment of a studio on U. S. soil would virtually make the station a regular American broadcast outlet—controlled by aliens and not responsive to U. S. regulations.

The TBC opposition made the following points: (1) Bulk of XETV's service area is San Diego and Southern California, including parts of Los Angeles; (2) XETV's Ch. 6 was one of two frequencies deleted from San Diego during the TV "freeze" and given to Mexico specifically to serve the people of that nation; (3) plan seems to be, it is alleged, to make XETV a U. S. station in Mexico, serving U. S. listeners, with the support of U. S. advertisers but with no responsibility under U. S. laws and having an unfair competitive advantage over U. S. stations with respect to taxes, labor costs and performing fees.

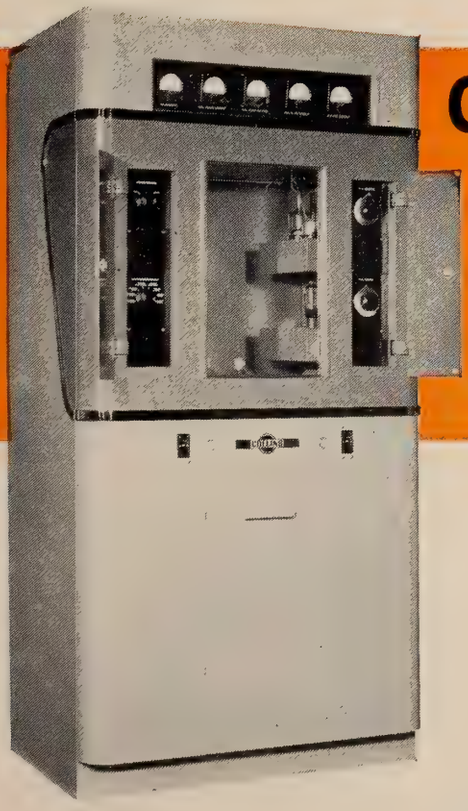
Charges Duopoly, Monopoly

Among other points alleged by TBC were duopoly and monopoly. TBC claimed that Emilio Ascarraga, XETV co-owner with Romulo O'Farril and Jorge I. Rivera, was a 20% stockholder in Los Angeles Ch. 34 applicant Spanish International Television Inc., which if granted would overlap with XETV. Also that Messrs. Ascarraga and O'Farril own all but one of Mexico's TV stations—XEW-TV, XEQ-TV and XHTV Mexico City and XELD-TV Matamoros.

TBC also objected to the operations of Mexican radio station XEAC, owned and operated by Mr. Rivera.

KFSD made generally the same points, including the question of time brokerage which it claimed was implicit in Mr. Flanagan's contract with XETV.

In his application, Mr. Flanagan said that he would be paid $300 weekly for gross sales of up to $30,000 weekly, plus 1% of sales between $30,000 and $60,000 and 1.5% for sales over $60,000.



Former ABC-TV Western Div. program manager, Mr. Flanagan was with KFMB-TV San Diego from 1949 to 1951, and with Don Lee the previous decade.

The Mexican station is licensed to Radio y Television S. A., operates on Ch. 6 with 38 kw visual power, and is represented in the U. S. by Edward Petry & Co.

FIRST AID

For ailing AM signals

COLLINS 300J 250W TRANSMITTER

PREMIUM PERFORMANCE
Guaranteed by advanced engineering research and design.

ASSURED DEPENDABILITY
Simplified circuitry and control system.

MAXIMUM ECONOMY
Lower initial, maintenance and operating cost.

For premium performance at 250 watts, or for standby use, the Collins 300J Broadcast Transmitter offers maximum quality at minimum cost. Lower *initial* cost . . . lower operating and maintenance costs, plus great dependability make the 300J your best buy in a 250 watt transmitter.

Tuning and operating controls are conveniently located on the front. Blower cooled tubes, oversized components, and all terminals are quickly accessible from the rear. All tubes are visible at a glance.

Collins can serve your broadcasting needs best. Write today for complete details and descriptive literature.

For quality in broadcasting equipment, it's . . .

Ike Order Seeks to Open More Jobs for Republicans

PRESIDENT Eisenhower took two steps last week looking to the unfreezing of more government jobs for Republicans.

He directed the drafting of executive orders which would repeal parts of two orders which blanketed under Civil Service Federal jobs that had been exempted up to that time. The orders, issued under President Truman's regime, were issued in 1947 and 1948. They applied to procedures for discharging occupants of exempted positions who have civil service status.

In another move, the President asked the heads of all departments and agencies to survey their organization to determine what additional positions might be exempted. The test in both cases, according to Presidential Press Secretary James C. Hagerty, who made the announcement, is whether the job is of confidential or policy making nature. They will not involve more than "several hundred positions," the White House said.

It is understood one newly appointed agency chief found that his number one man was under Civil Service status and could not be removed.

What effect these orders will have on the FCC is problematical. It is believed that few FCC staff men gained Civil Service status in the 1947 and 1948 orders.

On the other hand, some—but not many—additional jobs might be declared exempt if the Commission, under a new Republican chairman and majority, were to move in line with the President's wishes. Among these, it was understood, might be assistant chiefs of bureaus and secretaries of Commissioners.

These would be in addition to those already exempted by statute (legal and engineering assistants to commissioners and the administrative assistant to the Chairman), and by the Civil Service Commission (Secretary of the Commission, private secretaries or confidential assistants to commissioners, General Counsel and Assistants General Counsel, Chief Engineer and Assistant Chief Engineer, Chief Accountant and Assistants Chief Accountant, chiefs of bureaus).

Only 68 Jobs Exempt

According to October 1952 Civil Service records, only 68 FCC jobs fall in the exempted category—its occupants can be summarily dismissed [B•T, March 2]. Of the Commission's 57 attorney positions, only 17 fall under the mantle of Civil Service. This clarifies the story two weeks ago, which inadvertently indicated that there were only 57 attorneys working in the Commission. Actually there are between 70 and 75 attorneys on the FCC staff, but only 57 of them are in so-called "attorney" positions. The others occupy administrative niches, most of which are considered classified Civil Service positions.

10 TV Renewals Granted

RENEWAL of license was granted by FCC last week to 10 pre-thaw TV stations, but four of the actions were subject to final determination in show cause proceedings for changes in channel assignment pursuant to the Sixth Report and Order. Renewals were granted to:

KSTP-TV St. Paul; WBRC-TV and WAFM-TV Birmingham; WAGA-TV, WLTV (TV) and WSB-TV Atlanta; WCCO-TV Minneapolis; WNAC-TV Boston; WJAR-TV Providence and WNHC-TV New Haven, Conn.

Conditions respecting channel changes were issued by FCC in actions on the renewals of WBRC-TV, WJAR-TV, WNHC-TV and WSB-TV, but the condition on the WSB-TV renewal was in error, a Commission spokesman later acknowledged. WSB-TV, on Ch. 2, was incorrectly identified in FCC's order as presently on Ch. 8 and subject to change to Ch. 11 in accord with the Sixth Report. WLTV, now WLWA (TV) under new Crosley Broadcasting Corp. ownership, is on Ch. 8.

TV Leases Upheld in Wash.

THE Washington State legislature has authorized leasing of sites in Mount Spokane State Park to television stations, thus upholding present leases of this kind. Also of interest to broadcasters, a bill passed at the biennial session last month allows the Washington State Apple Advertising Commission to assess up to 12 cents per 100 pounds of apples to pay for apple advertising.

Survey on TV's 'Morals'

INFORMAL inquiry into the "moral climate" of certain television programming will be held by a special Chicago City Council TV subcommittee March 20. Local industry representatives are slated to testify.

The subcommittee's announcement of hearings came as the Illinois House denounced some TV program fare as "lewd and lascivious," and blamed the medium for the rising crime rate among youth. City Council hearings will be conducted by Ald. Patrick Patrone, who said he will invite network representatives, educators, clergymen and other interested parties to give their views.

SHOWMAN WANTED...

We want a real showman. You like people . . . and meetings. You like to go places and do things. In six months you should know half the people in the state by their first names . . . you may even be Mr. Virginia.

You may be a fresh youngster slugging away on a coffee-pot . . . or you may be big time with a yen for the gracious living of the Old South.

To you we will turn over a daily half hour of choice evening time on WRVA and the services of a bang-up promotion department. In case you don't know, WRVA is a 50,000 watt station in Richmond that serves Virginia and chunks of a few other states.

What kind of show? We haven't decided! That's why we want you. Maybe you sing, play a zither or whistle the Star Spangled Banner standing on your head. One thing for sure —it must be good . . . must attract attention . . . and in short order you must be the most talked about man in the state.

The pay? We don't expect to *pay you.* We expect you to be good enough to *make money* for **both of us!**

Write us, giving your experience and background, and WHY YOU THINK YOU CAN FILL THE BILL. No flossy presentations, no records or tapes . . . and no personal calls. Just a letter.

WRITE—Sam Carey, Program Service Manager, W R V A, Richmond, Virginia.

Govt.'s NFL Antitrust Case Marks Fifth Week in Court

THE effort of the Dept. of Justice to obtain an antitrust conviction against the National Football League because of its radio-TV restrictions has wound up its fifth week in U. S. District Court, Philadelphia, with the defense endeavoring to convince Judge Allan K. Grim the sport will fall apart if the government wins its case.

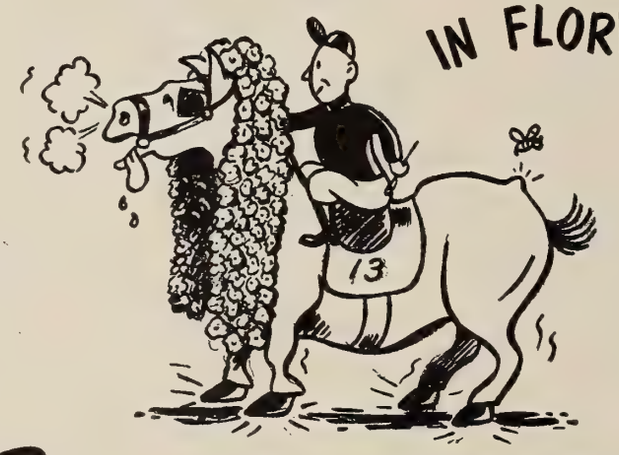
Mistrial Verdict Sought

Already the defense has made two attempts to obtain a mistrial verdict. Last week Bernard I. Nordlinger, chief defense attorney, asked a mistrial ruling after attorneys for Gordon McLendon, former head of the defunct Liberty Network, had sent a letter to Judge Grim.

Mr. Nordlinger argued the letter would prejudice the judge. It was signed by the law firm of Leake, Henry, Golden & Borrow as "friends of the court." Judge Grim said he could give proper evaluation to the letter since there was no jury. The letter discussed effects of monopoly on business and suggested the football restrictions may have been a contributing factor to Liberty's failure.

The defense mistrial motion was denied, as was a similar motion filed a fortnight ago when the defense opened its plea. Judge Grim at that time said he wanted to hear the entire case.

Defense witnesses have included Dr. Albert F. Murray, engineering consultant, who said NFL restrictions are relatively unimportant because of lack of facilities; Herbert R. Bayle, vice president of Brooke, Smith, French & Dorrance, Detroit agency for Goebel Brewing Co., who testified he did not believe NFL's policy would restrict a group of stations in one area because they would not buy the same game; DeBenneville (Bert) Bell, NFL commissioner, who contended unrestricted TV would mean the death of pro football.



DuMont Executive Testifies

Roy Sharpe, DuMont Network, testified as to allocation of interconnecting facilities. John T. McHugh, Joseph Katz Co., Baltimore, testified as to desirability of purchasing exclusive territorial rights to pro football games.

Paul Schissler, special events director of the *Los Angeles Times*, testified the annual Rams-Redskins charity game had its smallest crowd in 1949, only year the game was televised. Paul B. Shetsley, National Opinion Research Center, testified on effect of TV on college football. He asserted college football attendance in 1952 would have been 40% under 1947-48 had not TV been restricted.

Several NFL club owners testified last week. John V. Mary, New York Giants president, said the team would sell live TV of home games only on a "full-house guarantee" basis. The club stopped telecasting home games in 1948, fearing an adverse effect on the gate. Texas E. Schramm Jr., assistant to the president of the Los Angeles Rams, said TV cut heavily into the club's gate. George Preston Marshall, principal owner of the Washington Redskins, conceded that TV and radio kept the team out of the red for probably 10 of 16 years receiving from $7,500 to $60,000 per year from American Oil Co.

a LONG SHOT SOMETIMES PAYS OFF IN FLORIDA

..But... FOR A SURE THING

BUY WHOO AM-FM ORLANDO

Yes, Suh! A long shot sometimes pays off, but why take a chance when you can be *sure*. Local people in the know always buy WHOO—many outstanding success stories are being written by advertisers who use the 10,000 Watts of WHOO-AM and FM. For full details, ask your Avery-Knodel, Inc., man.

Walker on BU Panel

ANNUAL Founders' Day observances by Boston U., scheduled to last five days beginning Tuesday, will open at 8:30 p.m. that date with a discussion panel on "Educational Television in the Greater Boston Area," to be headed by FCC Chairman Paul A. Walker.

Among the panelists will be: Christopher H. Phillips, senator to the general court of the Commonwealth of Massachusetts and chairman of the Commission on Television, and Parker Wheatley, director of Lowell Institute Cooperative Broadcasting Council and general manager of WGBH Boston.

White House Coverage Plans Progress in Discussion Stage

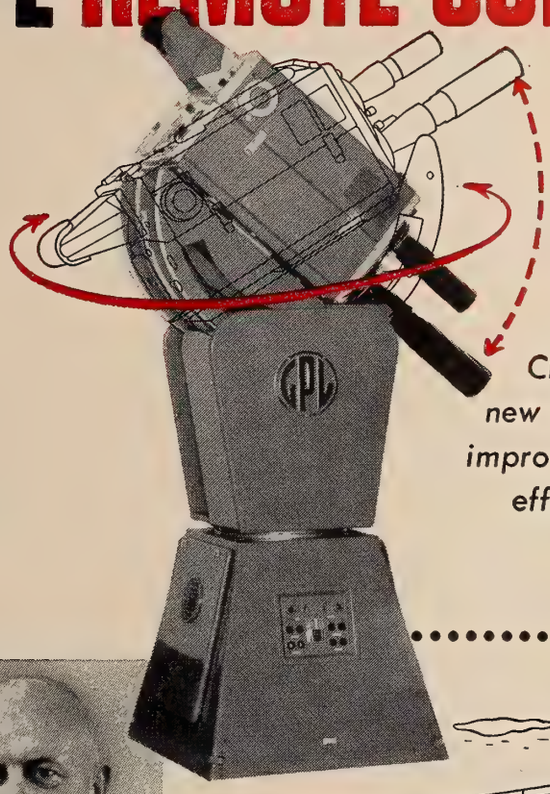
PATTERNS for radio-TV coverage of President Eisenhower's news conferences are taking shape as White House and industry representatives confer on a projected plan instituted shortly after the inauguration [B•T, Jan. 26].

While there still is no assurance that permission will be granted for electronic reporting of the newsy and informal exchanges between the President and newsmen, the White House shows increasing interest as discussions proceed.

Confer With Hagerty

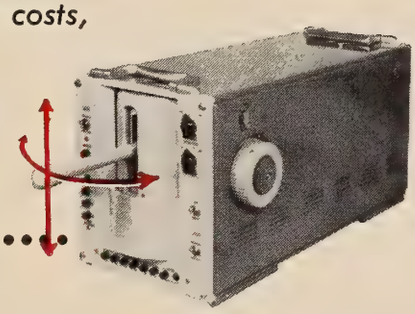
Last Wednesday a group of five radio-TV executives conferred with James C. Hagerty, the President's news secretary. They discussed such problems as placement of cameras and microphones, lighting, Presidential handling of loaded questions, eager-beaver camera hounds among reporters and problems of other media, including newsreels.

One of the serious problems centers around the two-decade ruling which forbids direct quotation of the President unless the specific words are provided in writing or clearly spelled out. This Roosevelt-Truman precedent was based on the realization that a false quote or an inadvertent use of words could cause world-shaking complications.



Camera and microphone facilities would be handled on a pooled basis, with all networks permitted to participate.

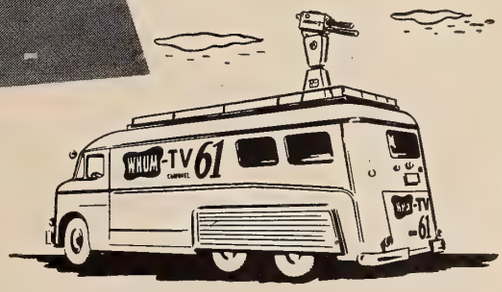
The White House has shown interest in suggestions that the President report to the people by radio and TV every month or six weeks. Several program formats have been proposed.



Attending last Wednesday's White House conference were Ted Koop, CBS; Bryson Rash, ABC; Everett Holles, MBS; Roger Coelos, DuMont, and Julian Goodman, NBC.

GPL REMOTE CONTROL CAMERAS

make debut as WHUM-TV puts UHF in Major Operation



Channel 61 in Reading uses 4 of new GPL chains to cut costs, improve studio-field efficiency

Humboldt Greig, president of WHUM-TV, says: *"We picked GPL cameras to gain a truly major reduction in costs by adding remote control. In fact, we feel these will be self-liquidating cameras due to the savings. We have tested them under the roughest conditions with our mobile unit in the past two months and encountered absolutely no difficulties."*

Marking two major milestones in television, WHUM-TV introduces both high powered UHF and remote control for new techniques in camera operation.

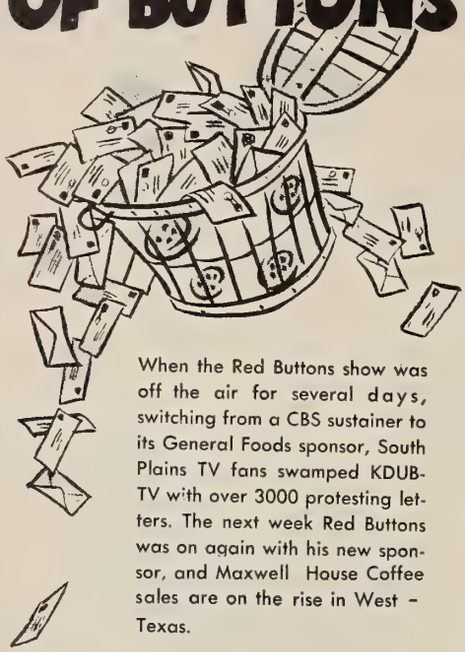
For the opening 30 live-hours per week from this 260,000-watt UHF station, 4 GPL image orthicon chains will be used with remote control pedestals. From as far as 1,000 feet away, all actions of pan and tilt, lens change and focus and iris are easily controlled.

Each camera has a "memory" of 6 pre-set positions. With a four-chain set-up, a director has a choice of 24 camera shots. Pushing a "pre-set" button automatically swings the camera on target . . . with lens, focus and iris in correct adjustment. Speed and ease of operation save time, camera handling, and dollars.

For field operations—covering sports and news—WHUM-TV uses the GPL studio-field interchangeability . . . again cutting costs. Two cameras, complete with remote control pedestals, fit atop the station's mobile unit. Pedestals disassemble in minutes for easy transfer between bus and studio.

WHUM-TV is the first station to equip all its cameras with remote control . . . for tops in quality, for utmost in economy.

STATION OWNERS



Our engineers will be pleased to show you, without obligation, how you can get maximum efficiency and economy in either UHF or VHF operations with GPL studio and field equipment. Write, wire or phone:

NARTB TO HONOR DAVID SARNOFF WITH FIRST KEYNOTER AWARD

RCA chairman to receive industry honor for outstanding contribution to radio and television; will deliver keynote speech at formal opening of Los Angeles convention; annual equipment and service exposition to be largest in history of NARTB.

NEW radio-TV award, created by NARTB to honor outstanding service to the industry, will be presented to Brig. Gen. David Sarnoff, RCA chairman of the board, when NARTB formally opens its convention April 29 in Los Angeles.

Known as First Annual Keynoter Award, the selection was announced by Clair R. McCollough, WGAL-AM-TV Lancaster, Pa., chairman of NARTB's 1953 convention committee.

Gen. Sarnoff will deliver the keynote address to the convention after being introduced by Mr. McCollough. Along with an engrossed plaque honoring him for contributions to the broadcasting arts, Gen. Sarnoff will receive from NARTB President Harold E. Fellows a small gold key specially designed for the association's new award.

The association moved forward last week with plans for its annual convention at the Biltmore Hotel. C. E. Arney Jr., secretary-treasurer and convention manager, and Arthur C. Stringer, managing the displays of equipment and services, announced the 1953 exposition will be the largest in the association's history.

At the weekend, Mr. Stringer had assigned the entire Galeria floor exhibit space for displays of heavy equipment and the second floor sample rooms for light equipment and service displays as well as reception facilities.

In all, 75 exhibit booths and exhibition rooms have been assigned. Besides, a large number of suites and rooms on other floors of the Biltmore have been assigned associate members for entertainment purposes.

Exhibits for Delegates

Exhibits will be open to delegates attending both the Management and Engineering Conferences, which run simultaneously. The management meetings open Tuesday, April 28, with a morning session for TV members. The afternoon will be devoted to a Broadcast Advertising Bureau clinic. The Galeria and second floor displays will be opened Tuesday through Friday, closing convention day.

The new keynoter award offers a dramatic addition to the NARTB convention format. The idea was approved by the McCollough committee some weeks ago. Mr. McCollough and President Fellows made a personal call on Gen. Sarnoff after his name had been selected by the committee with the counsel of the association's boards of directors. Frank M. Russell, NBC Washington vice president, assisted in making arrangements.

An annual feature, the award presentation will bring a leading industry figure as keynote speaker for the convention.

Gen. Sarnoff entered the communications field at age 15 as a messenger. He worked his way up to the RCA presidency when he was only 39. As RCA board chairman, he exercises general supervision over operations of the company, its divisions and services including NBC, RCA Communications, Radiomarine Corp. of America, RCA Institutes, RCA Labs., RCA Victor and RCA International Division. He is chairman of the board of RCA Communications, RCA Institute and NBC.

He drew national attention a few weeks ago as chairman of the Citizens Advisory Committee on Utilization of Manpower, suggesting ways to save armed services manpower.

Gen. Sarnoff will receive the first IRE Founders Award Medal March 25.

Other awards he has received are: First Radio-Television Mfrs. Assn. award for achievement, 1952; One World Prize from American Nobel Center for contributions to international understanding through radio, 1945; Television Broadcasters Assn. "Father of American Television" award, 1944; Medal of Merit, awarded by President Truman, 1946; Cross of Commander of French Legion of Honor, 1947.

Work in Agenda Details

As NARTB began receiving advance resistrations for the convention, Washington headquarters officials were working out agenda details. The list of Galeria equipment exhibitors:

Altec Lansing Corp.; American Telephone & Telegraph Co.; Andrew Corp.; Blaw-Knox, Tower Dept.; Broadcast Music Inc. (service exhibit); Caterpillar Tractor Co.; Century Lighting Inc.; Collins Radio Co.; Continental Electronics Mfg. Co.; Allen B. DuMont Labs.; Federal Telecommunication Labs.; Gates Radio Co.; General Electric Co.; General Precision Lab.; Graybar Electric Co.; Kliegl Bros. Universal Electric Stage Lighting Co.; Machlett Labs.; Raytheon Mfg. Co.; RCA; Standard Electronics.

The list of service and associate members to whom second floor space has been assigned:

Allied Record Mfg. Co.; Ampex Electronic Corp.; Broadcast Advertising Bureau; Blaw-Knox; Cinema Engineering Co.; CBS Television Film Sales; Capitol Records Dist. Corp.; Consolidated Television Sales; Dresser-Stacey Co. (Ideco); Federal Telephone & Radio Corp.; General Communications; Harry S. Goodman Radio & Television Productions; Gray Research & Development Co.; Graybar Electric Co.; Houston Fearless Corp.; Hughey & Phillips; Keystone Broadcasting System; Magnecord Inc.; Motion Pictures for Television; Musicolor; NBC Film Div.; A. C. Nielsen Co.; Philco Corp.; RCA Victor Div.; Rust Industrial Inc.; Screen Gems Inc.; SESAC Inc.; TeeVee Co.; Telenews; United Television Programs; Wincharger Corp.; World Broadcasting System; Frederic W. Ziv Co.

PLANNING work of the Philadelphia Radio-TV Broadcasters Assn. are William C. Caskey (l), general manager, WPEN and Pat Stanton, owner, WJMJ, who are vice president and president, respectively

Initial Favorable Response Meets SRA's 'Spot Crusade'

STATION reaction to Station Representatives Assn. invitation to join in financing a "Crusade for Spot Radio" [B•T, March 2] has been "extremely encouraging," according to T. F. Flanagan, SRA's managing director.

Wire from R. A. Dowling, manager, WOOF Dothan, Ala., said in part: "Thanks a million for spearheading this movement. A check for 10 times the yearly movement is being sent."

Ralph L. Atlass, president, WIND Chicago, pledging his station's participation, wrote: "We are glad to know that there is to be an effective organization exclusively devoted to promoting the use of spot broadcasting. Recent industry trends have confirmed the importance of spot revenue to the stations and success to its users."

Robert D. Swezey, general manager, WDSU New Orleans, expressed interest in the project and "hopes it will achieve signal success."

John M. Rivers, president, WCSC Charleston, echoed this sentiment.

William McGrath, managing director, WHDH Boston, said "any association within the industry which undertakes positive action of this nature deserves support."

M. M. Fleische, general manager, WMCA New York; C. B. Hasbrook, president, WCAX Burlington, Vt., and R. Lee Glasgow, general manager, WACO Waco, Tex., also praised the SRA "Crusade."

Rate-Cutting RTES Topic

RADIO and TV rate cutting will be given a thorough going-over Thursday at a clinic of the Radio and Television Executives Society at 7:30 p.m. in NBC's New York Studio 6B. Answering the question, "How honest can we be?," will be Tom Flanagan, managing director, Station Representatives Assn.; Mary McKenna, timebuyer for Benton & Bowles; Robert Reuschle, national sales representative for WHUM-TV Reading, Pa.; Reggie Schuebel, partner, Wyatt & Schuebel. Don McClure is chairman of the RTES clinic sessions.

Indiana Station Meet

INDIANA Broadcasters Assn. will hold its annual meeting in Indianapolis at the Columbia Club March 20. O. E. Richardson, WASK Lafayette, will preside at IBA sessions as president. Election of officers for 1953 is scheduled, along with other business matters, according to Daniel C. Park, WIRE Indianapolis, secretary-treasurer of the association.

Laugh-Happy

GAGWRITERS will come into their own from April 1-8, designated National Laugh Week. The National Assn. of Gagwriters, which fosters and protects interests of the nation's laugh-makers, is asking radio and TV stations and networks to comb their files for the best comedy sketches of the year and rebroadcast them during this seven-day laugh-happy holiday. The association's motto: Bigger Laughs Mean Better Living.

Hardware Selling

BAB has distributed to members a detailed analysis of the hardware industry, covering such topics as movement of merchandise, seasonal sales trends, types of customers, store operations, advertising expenditures and general industry trends.

Prepared as a "BAB Information Folder" on hardware, the seven-page report is one of the bureau's continuing services designed to acquaint broadcasters with retail businesses.

WBA Hits Tax-Supported, State-Owned Television

RESOLUTION opposing the establishment of tax-supported state-owned TV stations in its state, pending study by an investigating commission, was adopted by the Wisconsin Broadcasters Assn. at a special meeting in Milwaukee last Wednesday.

In other developments, WBA also:

(1) Agreed to ask the state legislature to pass a bill requiring that a commercial broadcaster be appointed by the governor to membership on the State Radio Council.

(2) Voted to submit a bill to the legislature seeking to protect radio-TV stations from "unreasonable actions of defamation and libel."

(3) Elected Haydn R. Evans, WBAY Green Bay, to its board of directors.

The special session was called by Ben Laird, WDUZ Green Bay and WBA president, to consider important present and future legislation before the state government.

The resolution on educational TV explained that dissemination of education "may best be accomplished by the regularly licensed commercial TV stations with the state", and that "it may not be necessary for the state . . . to use funds supplied from any public source for the building and maintenance" of state-owned stations or networks.

The resolution recommended that the governor appoint an investigating group to study the problem and make recommendations "based on full and unbiased information." WBA said it would like an opportunity to delegate one of its members to serve on the commission.

Michigan FM Promotion

JOINT FM radio promotion will be held in Michigan in May under auspices of NARTB and Radio-Television Mfrs. Assn. Broadcaster chairman of drive will be Waldo Abbott, WUOM (FM) Ann Arbor, with Roger Graef, of Radio Distributing Co., Detroit, as chairman of wholesaler activities. Drive will emphasize FM coverage of baseball and the giving of FM sets as graduation gifts. City of Toledo, Ohio, will be included in the Michigan campaign.

CTC to Consider Merger

THE Chicago Television Council has approved a motion to consider a long-standing proposal to merge CTC with the Chicago Radio Management Club.

Howard (Howdee) Meyers, O. L. Taylor Co., is president of the radio group, and George Heinemann, program manager of WMAQ-WNBQ (TV) Chicago, heads the TV council.

WOODland! AM

And now the "Single Rate" applies!*

Nighttime radio schedules on WOOD are now a smarter investment than ever because:

1 You buy nighttime at same price as daytime, and what a cost-per-thousand picture that will give you! Just check your SRDS and your SAMS report . . . you'll see what we mean by a "real sleeper buy" in the rich Grand Rapids market.

2 You get a "bonus", too! The Katz sponsored Pulse Study of 18 TV cities reveals number of radio sets in use at home is about the same at night as in daytime; but — get this — at night there are more people listening to each set. Daytime radio has a peak at 10:00-11:00 AM when 365 people per 1,000 radio homes are listening; at night, the peak is 8:00-9:00 PM with 517 listeners per 1,000 radio homes; the figure never goes below 431 from 6:00-10:00 PM. It's poppa home from work who makes the difference.

**Literally, an exception — Class B is from 11:30 PM to 7:00 AM.*

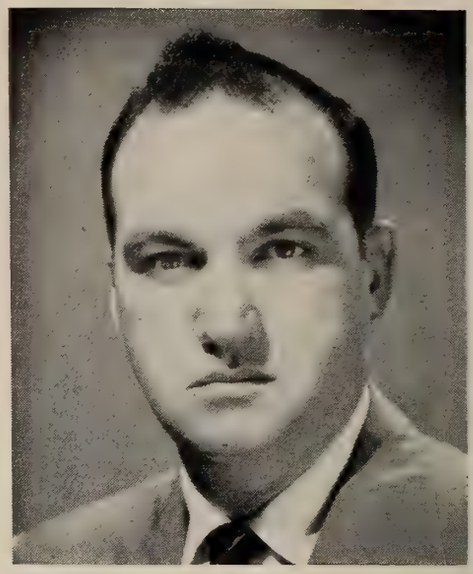
NARTB, Ad Council Win American Heritage Awards



NARTB and the Advertising Council lead a list of 23 national organizations who have won top awards in the 1952 "Register and Vote" competition of the American Heritage Foundation, Charles E. Wilson, former president of General Electric Co. and chairman of the foundation's Committee of Judges, announced last Monday. AHM a fortnight ago had praised the work of these organizations [B•T, Feb. 23].

Among the other organizations receiving major awards were the Advertising Foundation of America and the National Retail Dry Goods Assn.

For outstanding performance in support of the campaign, the awards committee cited the following organizations, among others:

Screen Actors Guild, Advertising Assn. of the West, Assn. of American Railroads, Assn. of National Advertisers, National Assn. of Mfrs., American Newspaper Publishers Assn., American Society of Newspaper Editors, AFL, CIO and National Council of the Churches of Christ in U. S. A.

WILLIAM K. TREYNOR (left), newly appointed manager of NARTB station relations department [B•T, March 2], will assume office March 15. He succeeds William T. Stubblefield (right), who joins Blackburn-Hamilton Co., media brokers. Mr. Treynor has been in charge of NARTB's West Coast office. He went to Washington last weekend for conferences and will be stationed at NARTB headquarters after the Los Angeles convention.

'Chicago Unlimited' Meet

FIRST annual membership meeting of Chicago Unlimited, new organization set up to promote the city as a radio-TV program origination point, has been set for March 23. The agenda will include a progress report and election of new officers, according to Joe Seiferth, organization's executive director.

409 U. S. Cities Have Radio But no Newspaper, BAB Says

SMALL-TOWN merchandising is being "revolutionized" by the growth of radio, BAB reported last week on the basis of a study which showed there are 409 cities which have no daily newspapers but which do have radio stations.

BAB estimated that in these cities—which it predicted will be increased by about 75 before the end of the year—more than a million families (perhaps as many as four million) will have been brought within the "daily merchandising pattern" of advertisers through stations.

"Radio stations are revolutionizing small-town merchandising—particularly for the local retailer," BAB asserted. "They have unshackled him from his once-weekly advertising pattern and provided him with the daily advertising facilities that big-city merchants use for substantially increased volume and more profitable operation."

The estimate of a million families in radio cities having no daily newspapers is much too low, the report said, noting that this figure represents only the families within the corporate limit of the cities involved.

In a cross-section of these cities, the study found that the number of families living in surrounding rural or small communities is at least four times the number of those residing within the cities' corporate limits.

These people, BAB noted, rely on their radio stations for daily coverage of hometown news and hometown advertising because radio is their only "daily" medium.

The study found 42 states which have cities with radio stations but without daily newspapers. Texas had the greatest number, 43, followed by Alabama, 34, North Carolina, 28, and Georgia, 25.

"You Can't Eat *Compliments,*" they said...

Almost from the day we started in business, 27 years ago this January, we've heard the crack, "Compliments are wonderful but you can't eat 'em!"

We've had more than our share of awards, plaques, compliments, etc. It's kind of gratifying when the competition gets real rough to hear the local boys say, "WIOD? SURE—you boys have been doing a good job for a long time!"

Even way up North, quite a few of the boys say the same thing. Ask your Hollingbery Man...

PACKAGED REMOTE CONTROL

for Commercial Broadcast Transmitters

AM — FM

THE RUST INDUSTRIAL COMPANY'S REMOTE CONTROL SYSTEM

The Rust System is the *only* transmitter remote control system *proven* in service in United States Commercial AM Broadcasting installations. *It meets all FCC requirements.*

STUDIO UNIT
(Type RI-1080)

REMOTE CONTROL

of transmitters means more effective station operation. Attending personnel may be utilized more efficiently. More convenient location of studio is made possible. Transmitter may be located where transmitting conditions are ideal and real estate costs low.

THE RUST SYSTEM

consists of a studio unit and transmitter unit connected by two telephone pairs. Up to nine meter readings can be made and up to nine operations can be controlled by simply dialing desired functions. Transmitter adjustment is made remotely while simultaneously observing readings of appropriate meter.

The transmitter unit is connected to any one of a number of tuning motors or contactors used for controlling transmitter tuning or other switching functions. Use of various shunts and multipliers permits the metering of several circuits at the remote control point. Any failure of the system immediately removes all power from the transmitter.

The complete system is sold on an installed basis with all components guaranteed for one year. Price includes any necessary modification of the transmitter. Savings can pay for entire cost in as little as ten weeks.

TRANSMITTER UNIT

608 WILLOW STREET — MANCHESTER, N. H.

NEW TV GRANTEES PLAN STARTS

Plans for more television service in more areas are being unfolded daily. For example: Six of last week's new grantees have set commencement target dates and have preliminary planning underway.

ALL but one of last week's seven new television station permittees, given their construction permits by the FCC last Wednesday, expect to be on the air within a year. And the single exception may actually be on the air in less than 12 months, since the starting date is not known.

Joe L. Smith, president of WKNA-TV Charleston, W. Va., said that he hoped to have the uhf Ch. 49 station, which was granted an effective radiated power of 225 kw visual, on the air by July. RCA equipment throughout has been ordered, he told B•T, and a site has been selected for building. Weed Television will represent the station, he added.

F. E. Fitzsimonds, executive vice president and general manager of KFYR Bismarck, N. D., said he hoped to have vhf Ch. 5 station on the air by late summer or early fall. An RCA transmitter has been ordered. The TV antenna will be atop the 704 ft. KFYR vertical AM antenna, he said. No network affiliation has yet been negotiated. KFYR is represented by John Blair & Co.

M. B. Rudman's Plans

Ross K. Prescott of Dallas, counsel for M. B. Rudman, grantee for vhf Ch. 12 in Bismarck, said the Texas oil man contemplated late summer or early fall operation for all four of his stations. He also holds construction permits for Galveston, Tex., Billings, Mont., and Minot, N. D. The applications specify RCA equipment throughout, Mr. Prescott said.

Mr. Prescott, who also represents the successful uhf Ch. 46 applicant at Sherman, Tex., the Sherman Television Co., said that every effort would be made to give service "probably by late summer."

Cecil W. Roberts, uhf Ch. 15 grantee for Bloomington, Ill., informed B•T that he hopes to start operating in about six months. Mr. Roberts said other details have not been decided.

S. W. Pipkin, one of the principals in Telepolitan Co., permittee for vhf Ch. 12 in Clovis, N. M., said that the starting date at this moment was unknown, and that equipment had not been contracted for as yet.

The Durham, N. C., grant made a fortnight ago to T. E. Allen & Sons Inc., based on a merged application owned 50% by T. E. Allen & Sons Inc. [B•T, March 2], will bring television to the Durham area about Nov. 1, reports John G. Johnson, general manager of WTOB.

The Durham TV station will be constructed by Mr. Johnson and Jim Coan, and for interim operation an RCA 1 kw transmitter will be used. Mr. Johnson said there had been preliminary conversations with NBC and DuMont with regard to network affiliation, and that he expects the Durham outlet will affiliate with both.

At the same time, Mr. Johnson said WTOB-TV Winston-Salem, uhf Ch. 26 grantee, will probably get on the air between July 15 and August 15. There are verbal commitments with NBC and DuMont, he said, but no contracts have been signed.

Central Illinois will get television reception from vhf Ch. 3 by summer, according to August C. Meyer, president of Midwest Television Inc., Champaign, Ill., which was granted a construction permit Feb. 26.

Construction plans will be launched immediately and work will proceed as rapidly as the acquisition of material will permit, Mr. Meyer said. He explained that the firm holds equipment priorities from both RCA and DuMont, and, with the possible exception of the tower, expects to encounter few difficulties.

The permittee's officials revealed that all four networks have expressed an affiliation interest. Mr. Meyer, president of the company, and Mrs. Meyer hold 51% of the stock; WSOY Decatur, Ill., owns 20%, and Merrill Lindsay, executive vice president of WSOY, is on the board of directors of Midwest Television Inc.

The Champaign outlet plans a 750 ft. tower on a site west of Seymour and will eventually operate with 100 kw visual effective radiated power. It will start with 25 kw ERP, however.

Mr. Lindsay said that although operating plans are still tentative, the Champaign station hopes to program more than 100 hours a week.

R. S. Howard, representing the Tribune-Journal Co., licensee of KJRL Pocatello, Ida., said the starting date for the vhf Ch. 6 grantee is unknown as yet. RCA equipment has been specified. Mr. Howard reported that the network affiliation and national representative are unknown, but that since KJRL is a CBS affiliate, TV affiliation will probably be the same.

Phil Jackson, general manager of KWOO Chickasha, Okla., and 50% owner of Oklahoma County Television & Broadcasting Co., Oklahoma City, Okla., uhf Ch. 25 grantee, said "Right now it looks to us as if it will be around the last of August or the first of September before we can be on the air."

LOUISVILLE resident, Mrs. Paul E. Eubank, takes part in WHAS-TV opening ceremonies for the third time, by helping O. W. Towner, engineering director, to bring in a new Ch. 11 picture after the station's increase in power to 316 kw. Mrs. Eubank was chosen from a WHAS radio audience in 1949 to break ground for the new TV tower, and a year later took part in the debut of a telescope through which Louisville pedestrians could see the nation's first 12-bay TV antenna.

T. V. Taft, treasurer of El-Cor Television Inc., uhf Ch. 18 permittee for Elmira, N. Y., asserted that when he said last week [B•T, March 2], there are "no plans for network affiliation," BROADCASTING • TELECASTING misinterpreted his remarks. Actually what Mr. Taft meant was that "While we have no definite arrangement at present, we are seeking network affiliation and are engaged in negotiations."

Jack Harris, program director for KTYL-TV Mesa, Ariz., grantee for vhf Ch. 12, said "with good luck we hope to be in operation by the first or second week in April."

Stanley H. Durwood, general manager of Durwood Theatres, owners of KEDD (TV) Wichita, Kan., uhf Ch. 16 permittee, said equipment will be GE throughout, will be delivered in April, and that KEDD (TV) will go on the air with a test pattern about May 10 and start programming May 15 to June 1 with initial power of 2 kw visual ERP, using a 100 w transmitter.

"GE has promised delivery of the 12 kw transmitter in June," Mr. Durwood said, "so we

From the word "Go" in the "Go Cunard" opening, the universal urge to travel is really stimulated in this 1-minute spot that packs every second with sell. Quick glimpses of famous foreign sights merge into glamor shots of fun and luxury on board . . . convincing proof that Cunard's way of "Getting there is half the fun!" A reprise of the "Go Cunard" opening clinches the sale for a Cunard sailing. Created by Sarra for The Cunard Line through Kelly, Nason, Inc.

SARRA INC.

New York: 200 East 56th Street
Chicago: 16 East Ontario Street

SPECIALISTS IN VISUAL SELLING

should be to full power of over 200 kw visual ERP in July."

Larry H. Israel, partner in WENS (TV), Pittsburgh, Pa., uhf Ch. 16 permittee, said Petry will be national representative.

"We have signed a basic network affiliation with ABC," he said, "and have recently purchased some 5½ acres from WCAE-FM Pittsburgh, on the north side of Pittsburgh, about 7/10 of a mile from WDTV (TV) Pittsburgh's transmitter site. WCAE has sold this site to us inasmuch as it has switched its application from vhf Ch. 11 to vhf Ch. 4. The sale includes the two-story transmitter building and a 250 ft. tower which we will complete with an additional 250 ft.

"The site is 1,331 ft., which makes it the highest in this area. We have ordered a 12 kw GE transmitter," Mr. Israel said, "which will give us an effective radiated power well over 200 kw."

Edwin L. Jay, sales promotion director of WNOW-TV York, Pa., reported that plans for the commencement of TV operations have been changed to mid-summer.

A pre-freeze station, WKRC-TV Cincinnati, became the most powerful television station in Cincinnati Feb. 26 when it signed on with power of 60 kw, according to Fred Thomas, director of promotion and publicity for the station.

The power increase is the first of three major boosts planned by WKRC-TV within a month, Mr. Thomas said, and the station plans to jump its power to 250 kw. He added that soon the station will go to 316 kw.

KFEL-TV Denver on vhf Ch. 2 was to have increased its effective radiated power to 15.9 kw last week, according to Gene O'Fallon Jr.

If winter weather permits, erection of a 100 ft., RCA 6-bay superturnstile antenna on top of the 100 ft. tower on Lookout Mtn. should be completed by April 1, to provide an added power increase to 28.2 kw.

Mr. O'Fallon said plans for third-dimension television are due to be released soon. He also reported that the chief engineer, Rhean Cunningham, is to consult with the station's Washington engineers on its application for experimental color authority.

Construction has started on the Mt. Wilson transmitter building of KPIX (TV) Los Angeles, new uhf Ch. 22 permittee owned by John Poole Broadcasting Co. A two-and-a-half story addition will be made to the existing one-story building, which now houses the firm's experimental TV station KM2XAZ and the KFWB-FM transmitter. (KFWB-TV, however, is not connected with the Poole station; it is owned and operated by Harry Maizlish.)

KPIX (TV), plans to start telecasting on a test basis this summer.

Alan C. Tindal, vice president of WWLP (TV) Springfield, Mass., uhf Ch. 61 outlet soon to begin operations, announced that eight Ziv television shows have been purchased for the station. Program series includes Ziv's *The Living Book, Story Theatre, Sports Album* and *Yesterday's Newsreel.* Other programs purchased by the station, *Boston Blackie, The Cisco Kid, The Unexpected* and *Your TV Theatre,* will be grouped under a plan known as "New England Market Magic Merchandising."

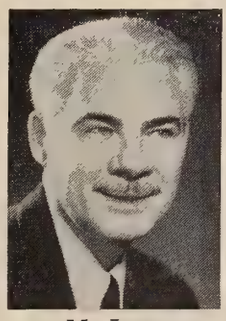
WDEF Gets Power Increase

WDEF CHATTANOOGA, Tenn., has increased to 5 kw day and night on 1370 kc, according to Carter Parham, president and general manager of the station. The nighttime power formerly was 1 kw. Mr. Parham also said the station will join NBC, effective April 7. It is now an ABC affiliate. The Branham Co. is national representative.

ROBINSON SUCCEEDS LANE AT WLTV (TV)

Mr. Robinson, Crosley vice president, takes over as general manager of the newly acquired WLTV, which March 17 becomes WLWA.

ANNOUNCEMENT was made Thursday of the resignation of William T. Lane as president and general manager of WLTV (TV) Atlanta, and appointment of William P. Robinson, Crosley Broadcasting Co. vice president in Cincinnati, as his successor.

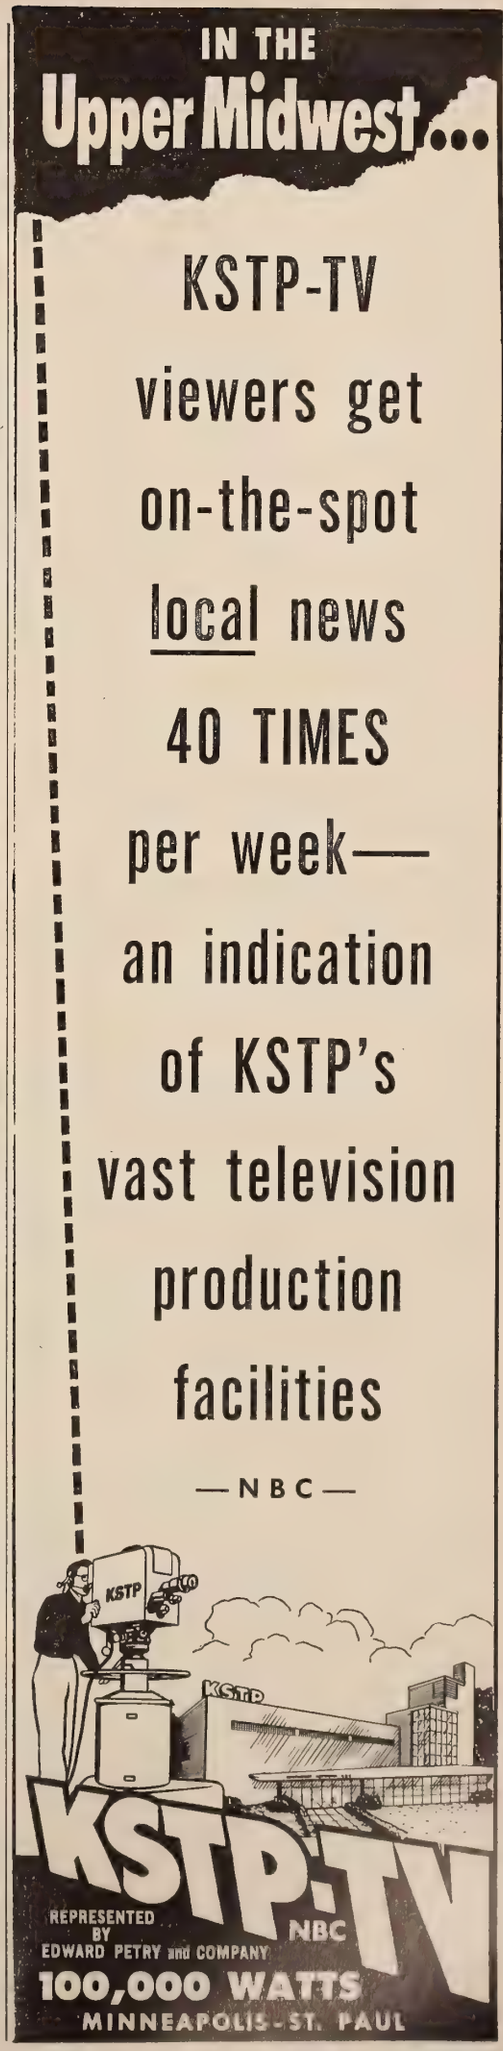


Simultaneously, it was learned call letters of the outlet recently acquired by Crosley for $1.5 million [B•T, Dec. 15] will be changed March 17 from WLTV to WLWA, with the licensee becoming Crosley Broadcasting of Atlanta Inc.

Mr. Robinson

Mr. Robinson, veteran Crosley executive and vice president in charge of programs, was in Atlanta last week. James D. Shouse, Crosley chairman and vice president and senior executive of the parent Avco, becomes chairman of the board of the new Atlanta corporation. Robert E. Dunville, Crosley president, becomes president of the Atlanta subsidiary, with Mr. Robinson as vice president and general manager.

At the time Crosley acquired WLTV last December, Mr. Lane agreed to remain in charge of management until details of transfer were completed and until plans of the new ownership were matured and new management installed. He said he told Messrs. Shouse and Dunville some time ago "I was not available to remain with the company permanently because of my desire to pursue other plans."



Mr. Lane

Mr. Lane's resignation will become effective, he said, as soon as he has fulfilled completely his commitment to the new owners. Meanwhile, "It will be a source of personal pleasure to me to assist them in launching their plans for a large expansion of this property." Crosley has announced plans to increase power to the 316 kw maximum for Channel 8.

The new call letters—WLWA—have been used by Crosley's FM station in Cincinnati, which will change, with FCC approval, to WLWH.

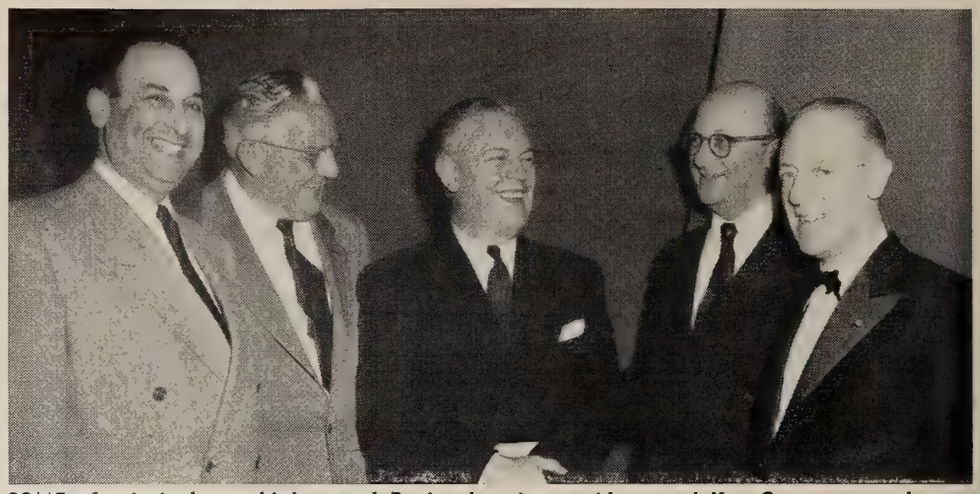
Mr. Lane was vice president, general manager and part owner of WAGE Syracuse before joining Broadcasting Inc., which took over the Channel 8 franchise in Atlanta two years ago. He and his associates in Broadcasting Inc. sold their interests to Crosley. The station is affiliated with ABC.

Mr. Robinson has been vice president in charge of programs for the Crosley Cincinnati operation since 1947, and is a 25-year radio veteran.

N.Y.C. Would Use WNYC As Street 'Lamplighter'

CITY of New York wants to turn on its 180,000 street lights via a signal from its station, WNYC, and has asked FCC to revise power limitations to provide for momentary output increases in specific situations.

New York officials, who have found a new use for the broadcasting medium, estimate $500,000 yearly can be saved if FCC gives its approval. They claim all-electronic control of the lighting system on the city's 5,000-plus streets would be cheaper, more flexible, standard and safer in the event of an emergency.



The plan would provide for periodic jumps in WNYC's power from 2 to 5 w to broadcast a "beep" signal, lasting only one-tenth of a second and indistinguishable to the listening audience, which would be relayed to a small antenna on top of each light post. From the antenna, the turn on or off signal would be transmitted to a one-tube miniature receiver the size of a small tin can inside the lamp proper.

May Opener for KWRT

KWRT, new 1 kw daytimer at Boonville, Mo., is expected to be on the air after the first of May. Station is owned by William R. Tedrick, also vice president and general manager of WOKZ Alton, Ill. Mr. Tedrick said the staff is now being selected, and a modern combination building is to be constructed at a site west of Boonville on Highway 5. Gates equipment has been selected. The station will operate on 1370 kc.

WTHI Resumes After Damages

WTHI Terre Haute, Ind., has assembled a temporary studio at its radio center and resumed broadcasting after a fire gutted its control room a fortnight ago, the station reports. Fire destroyed the heart of the broadcast center Feb. 24. WTHI resumed operation within an hour from its transmitter site north of Terre Haute, largely through the efforts of Program Director Ben Falber Jr. and Chief Engineer Don Petit. Damage was estimated by General Manager Joseph Higgins at $25,000 to $30,000.

SOME of principals at third annual Regional TV Seminar Feb. 27-28, sponsored by WAAM (TV) Baltimore and Johns Hopkins U. [B•T, March 2], included (l to r): Herman Cohen, vice president, and Ken Carter, general manager, WAAM; Harold E. Fellows, president, NARTB; Ben Cohen, president, WAAM, and Detlev W. Bronk, president, Johns Hopkins U.

WTVJ's TV Conference Set for March 27-28

FLORIDA TV applicants have been invited to the state's first television conference to be held in Miami, March 27-28. Plans and details of advancing the medium in that city will be discussed. Called by Mitchell Wolfson, president, WTVJ (TV) Miami, the session will feature speeches by Richard Doherty, director of employer-employe relations, NARTB; Clarence Lott, south Florida manager, Southern Bell Telephone & Telegraph, and H. Preston Peters, president, Free & Peters, station representatives.

Mr. Wolfson and his staff have also invited representatives of the Us. of Miami, Florida and Tampa and the Dade County School Board, television applicants. Arrangements are being handled by Burt Toppan, WTVJ's sales promotion manager.

Kingsley H. Murphy Dies

KINGSLEY H. MURPHY, 66, president, KSO Des Moines, died at his home in Minneapolis last Wednesday. He was a member of the board of the Minneapolis Star and Tribune Co., and formerly was secretary-treasurer of the Minnesota Tribune Co., which published the Minneapolis *Tribune*.

WDTV (TV) Changeover

WDTV (TV) Pittsburgh will change from vhf Ch. 3 to Ch. 2 and boost power to 100 kw in late June, Harold C. Lund, general manager, said last week. Raymond W. Rodgers, chief engineer, said WDTV was delaying the changeover until then for delivery of a new design antenna which will eliminate dead spots in the immediate coverage area.

Mr. Rodgers asserted WDTV's coverage area will be increased "slightly more than 20%." WDTV will not be off the air during the changeover period, he said. The station will have a 25 kw main transmitter and a 5 kw auxiliary transmitter. Its present six-ton, three-bay antenna will be replaced by a six-bay, eight-ton antenna.

WWRL-FM to Start June 1

LONG ISLAND Broadcasting Corp., licensee of WWRL Woodside, L. I., which has an FCC grant for a new 10 kw FM station on Ch. 286 (104.3 mc), plans to start operation about June 1, according to station manager Edith Dick. Station will use the call letter WWRL-FM. A 10 kw RCA FM transmitter is being installed at Woodside and is expected to be completed by May 1. Station will broadcast daily 3 p.m.-1 a.m. and will duplicate programs carried by WWRL, Miss Dick added.

WPIX (TV) Power Increase

INCREASE in power to 100 kw, maximum permitted by FCC regulations, was effected by WPIX (TV) New York last Thursday. Cost of power amplifiers added to WPIX's equipment was estimated at more than $100,000. This is the second power increase granted the station since it moved its transmitter to the Empire State Bldg. tower in 1951. At that time the outlet was transmitting with 3.6 kw, and in August that year, the FCC increased its power to 21 kw. WPIX on vhf Ch. 11 is owned and operated by New York *Daily News*.

W. Randall Harris Dies

W. RANDALL HARRIS, 54, treasurer and assistant general manager of the Asheville Citizen-Times Co., licensee of WWNC Asheville, N. C., died Feb. 20 after a heart attack. He was president of the North Carolina Press Assn. Survivors are his wife, Inez, a son, a brother and two sisters.

Radio-TV's Safety Program Increase Is Noted

INCREASE in the number of programs and in program time devoted to highway safety on radio and television stations was praised last week by Paul Jones, director of public information for the National Safety Council and spokesman for the jury members of the fifth annual Alfred P. Sloan Highway Safety Awards.

Mr. Jones said that increased interest in safety by radio and TV stations is shown in the nominations now being received not only for the Sloan awards but for the public interest awards for general safety conferred by the National Safety Council in all media.

The Sloan awards, which are given to radio and TV stations, networks and advertisers, for outstanding contributions to highway safety, will be presented this year at a dinner at the Hotel Plaza, New York, May 26. Portions will be filmed and presented on *American Inventory* May 31.

WMAQ Tea Merchandising

WMAQ Chicago, NBC o & o outlet, has extended its "chain lightning" merchandising plan to some 310 National Tea Co. stores and now covers 770 food stores with estimated annual gross sales of more than $875 million.

Expansion of the plan, which WMAQ launched a year ago and which was extended recently to WNBC-WNBT (TV) New York [B•T, Jan. 26], was announced Tuesday by Harry C. Kopf, NBC vice president and general manager of WMAQ. Plan is designed as a merchandising aid for special in-store promotion for food and allied products.

The 770 stores covered by the project include super-markets of National Tea Co., Great Atlantic & Pacific Tea Co. and Jewel Tea Co. in a five-state area (Illinois, Indiana, Michigan, Iowa and Wisconsin) within WMAQ's area.

Virginia Community TV Bid

ALMOST on the heels of a uhf TV grant to Charlottesville, Va., the city council appointed a committee to consider an ordinance providing for the city to advertise for bids on a franchise to operate a community TV system in the U. of Virginia area.

WCHV-TV, uhf Ch. 64, was granted to the operators of WCHV (AM) in January.

Council's action came after application was made for permission to operate a community TV system in Charlottesville by Rivanna Electronics Corp., comprising Staunton, Va., and Baltimore principals. Community TV systems already are operating in Harrisonburg, Staunton and Bluefield, Va. Charlottesville law puts a 30-year limitation on franchises.

WNAC-TV Antenna Topples

POWER increase at WNAC-TV Boston has been delayed six to eight weeks because the five-ton, 87-foot antenna crashed 12 feet into the ground as it was being installed Feb. 20. The antenna, valued at $80,000, fell from the top of the station's 350-foot tower in Medford. Programs were not affected, as a temporary antenna was being used during the construction period. WNAC-TV is boosting power from 26 kw to 200 kw.

CONTRACT for 5 kw vhf DuMont TV transmitter and associated equipment for KTYL-TV Mesa, Ariz., which also will serve Phoenix, receives signatures of "Red" Harkins (r), Harkins Broadcasting Co., and Donald A. Stewart, sales representative, DuMont's TV transmitter division. Station expects to be on the air by April 15.

New Building for WSAZ

REMODELING has begun on new headquarters of WSAZ-AM-TV Huntington, W. Va., with the occupancy set for July 1, according to L. H. Rogers, vice president and general manager. Three-story brick structure will house "the very latest" in TV and radio equipment, officials said.

SEN. TOBEY SIGNS FOR WCBS PROGRAM

SEN. CHARLES W. TOBEY (R-N. H.), Bible-quoting star of the 1951-52 Kefauver Crime Committee hearings, is going to have his own radio program beginning March 14. He will appear on Saturdays at 6:45-7 p.m. over CBS' flagship, WCBS New York, for observations and comments on the week's news. His fee will be $200 a week, it was said.

CBS said it had an exclusive on Sen. Tobey's services which precludes his appearance "on any similar radio series."

Sen. Tobey said, "I have been given *carte blanche* by WCBS to discuss anything I like. Uppermost in my mind will be the Senate crime hearings, but I will discuss anything of the day's interest."

When Sen. Tobey is unable to be in New York for his weekly radio series, his talks will be tape recorded. Edward P. Morgan, CBS newsman, will act as "anchor man" for the series, CBS said.

WMGM Signs 'Continental'

WMGM New York announced last week it has signed Renzo Cesana ("The Continental") to a contract under which the performer will receive approximately $500,000 over a four-year period. Pact calls for Mr. Cesana's services on the air, Monday through Friday, 11 a.m.-12 noon EST, effective today (Monday). Program will be offered for sponsorship, station reported, on a participating basis, either in 15-minute segments or participating one-minute spots, where available.

ROBERT SARNOFF HEADS STRENGTHENED NBC FILM DIV. IN MAJOR RESHUFFLE

"Rapid and continuing expansion" of the 1952-formed NBC Film Div. "beyond network operations" brings its establishment as a third major network division. General Attorney Gustav B. Margraf becomes vice president in charge of talent and program administration and is succeeded by Thomas E. Ervin who becomes a vice president in changes at NBC board meeting.

ESTABLISHMENT of the Film Div. as NBC's third principal operating division, headed by Vice President Robert W. Sarnoff, and promotion of Vice President Gustav B. Margraf from general attorney to the new post of vice president in charge of talent and program administration were announced by President Frank White last week.

Mr. Sarnoff

Thomas E. Ervin, assistant general attorney, was named to succeed Mr. Margraf as general attorney and at Thursday's board meeting was elected to a vice presidency, according to Mr. White.

In the film division organization Carl M. Stanton, former manager of network television programs, was named to the new position of division director, while in the program department realignment Fred Shawn, who has been director of production services, was named to the new post of director of program administration under Mr. Margraf, and John Rayel, formerly talent and program coordinator, was promoted to succeed Mr. Stanton as television program manager.

The decision to set up the Film Div. as a separate operating division, alongside the Networks Div. and the Stations Div., was attributed to its "rapid and continuing expansion in areas beyond network operations." The division was formed last June and has been headed by Mr. Sarnoff since its creation. Under the new management, Mr. Sarnoff will report directly to President White, rather than to John K. Herbert, vice president in charge of the radio and TV networks.

$5 Million Film Operation

It was understood that its film operations accounted for around $5 million of NBC's income last year. This figure included not only the operations of the Film Div., but also the film operations of the NBC-TV network, such as *Dragnet,* etc. Authorities estimate the company's annual yield from films may reach as high as $40 million by 1956.

President White said:

"The NBC Film Div., which was established in June 1952, has developed to the point where it is a major operation of the company, and is continuing to expand into new fields of activity. Its volume of film syndication sales has increased very substantially and its activities embrace many varied aspects of film procurement, distribution and servicing. We feel that it has a great and growing potential as a centralized source of film material and services, not only to the NBC television network and to the television stations we operate, but also to other stations and enterprises."

By making the division a separate principal operating unit, he said, "It can most effectively develop its opportunities of providing the television industry and related enterprises with a full scope of film services."

Mr. Sarnoff announced the appointment of Mr. Stanton as director of the division, and also disclosed that the film and kinescope operation unit and its manager, Frank Lepore, are transferring to the division. Technical production of kinescopes remains in the production dept.'s technical operations unit.

Transfer of the film and kinescope unit, Mr. Sarnoff said, gives the division the NBC film library with more than 15 million feet of film covering more than 2,000 subjects.

"We expect to make the film library an important source of film material for operations within and outside of NBC, and to expand the film procurement activity, in addition to developing a full range of services relating to film," he asserted.

The appointment of Mr. Margraf as vice president in charge of talent and program administration, President White explained, consolidates "the important functions of talent negotiation and the business administration of programming under an able executive who has already had broad experience in these fields."

Margraf's Responsibilities

Charles C. Barry, program vice president, to whom he will report, said Mr. Margraf will have full responsibility for conducting and supervising all talent and package program negotiations for both radio and TV networks; will also supervise the conduct of all business and administrative functions within the program department, and will be Mr. Barry's deputy when Mr. Barry is absent. He also will supervise the work of the NBC talent office, which is managed by Hal Kemp.

Program Administration Director Shawn, who also will report to Mr. Margraf, will head an organization composed of Arch Robb, manager of program services; Ludwig Simmel, manager of co-op programs; Leslie Vaughan, business manager for public affairs; Grace Sniffin, office manager for radio programming, and the business offices in the various program units. Mr. Shawn's responsibilities include control of programming and departmental expense, package program pricing, and general departmental administration.

His successor as director of production services will be announced "shortly," NBC said, by Frederic W. Wile Jr., vice president in charge of the production department.

President White noted that with Mr. Margraf in his new assignment Mr. Barry and other key program executives—Thomas McAvity, national program director, and Davidson Taylor, director of public affairs—will be able to concentrate "on the basic tasks of program

planning and development." Messrs. McAvity and Taylor continue to report to Mr. Barry.

Mr. White added:

"It is particularly gratifying to know that as our needs enlarge, we have within our own organization skilled and experienced executives who are able to advance to new and broader responsibilities, creating continuing opportunities for promotion within the company."

In welcoming Mr. Margraf to the program department, Mr. Barry noted that "as NBC's

Mr. Margraf

Mr. Ervin

general attorney he has worked closely with us, and over the past years he has played an important role in negotiations which brought many of the nation's top entertainers and outstanding program properties to NBC.

"He also has demonstrated an unusual ability to deal in an effective and practical manner with complicated business problems relating to our program operations. We have valued his services as a lawyer and we feel fortunate in having him now as one of the key operating executives in our department."

Mr. Sarnoff started his civilian career in late 1945, after service in World War II, as assistant to Gardner Cowles Jr., president of Cowles Broadcasting Co. and publisher of the *Des Moines Register* and *Tribune*, moving to the staff of Cowles' *Look* magazine in New York after a year in the Midwest.

He joined NBC Jan. 1, 1948, as an account executive in the sales department, became assistant to the national program manager for the TV network the following November, was made television production manager in June 1948, and subsequently served as NBC-TV program sales manager. In January 1951 he was named director of NBC unit productions, with responsibilities including the *Comedy Hour, All Star Revue, Your Show of Shows,* and *Kate Smith Hour.* He also supervised the NBC-TV opera theatre and inaugurated and completed the 26 half-hour *Victory at Sea* documentary. He was elected a vice president in June 1951 and was placed in charge of the new Film Div. a year later.

Mr. Sarnoff, son of Brig. Gen. David Sarnoff, board chairman and chief executive officer of RCA, was born July 2, 1918, in New York; attended private schools there and was graduated from Phillips Academy at Andover, Mass., in 1935 and from Harvard with a BA in government and philosophy in 1939. In August 1941, after a year at Columbia Law School, he joined the Washington office of Gen. William Donovan, then Coordinator of Information. From March 1943 until late 1945 he was in the Naval Reserve, emerging as a lieutenant after serving as a communications officer in the Office of Chief of Naval Operations, then for almost two years with Adm. William F. Halsey in the South Pacific, and later as Navy liaison dealing with broadcasting networks.

Mr. Margraf joined NBC in October 1942 when he assumed charge of the Washington, D. C., office of the law firm of Cahill, Gordon, Zachry & Reindel, with which he had been associated in New York since September 1939. As legal representative of NBC in Washington, he acted on behalf of the network in many hearings before the FCC and before various committees of Congress.

In July 1948 at the age of 33, he was elected vice president and general attorney for NBC. In this capacity, Mr. Margraf was said to have played a leading role in the development of television in its formative years, assisting in policy decisions and in such areas as talent and program agreements, station agreements and basic legal and business planning.

Born in Cape Girardeau, Mo., on May 14, 1915, Mr. Margraf was graduated from Southeastern Missouri State Teachers College there in 1936 with an AB degree. He received his LL.B degree from Duke U. School of Law in 1939.

Mr. Margraf is a member of the bars of several states, federal courts and government agencies, and has been active in the American Bar Assn., the Federal Communications Bar Assn., and other bar associations.

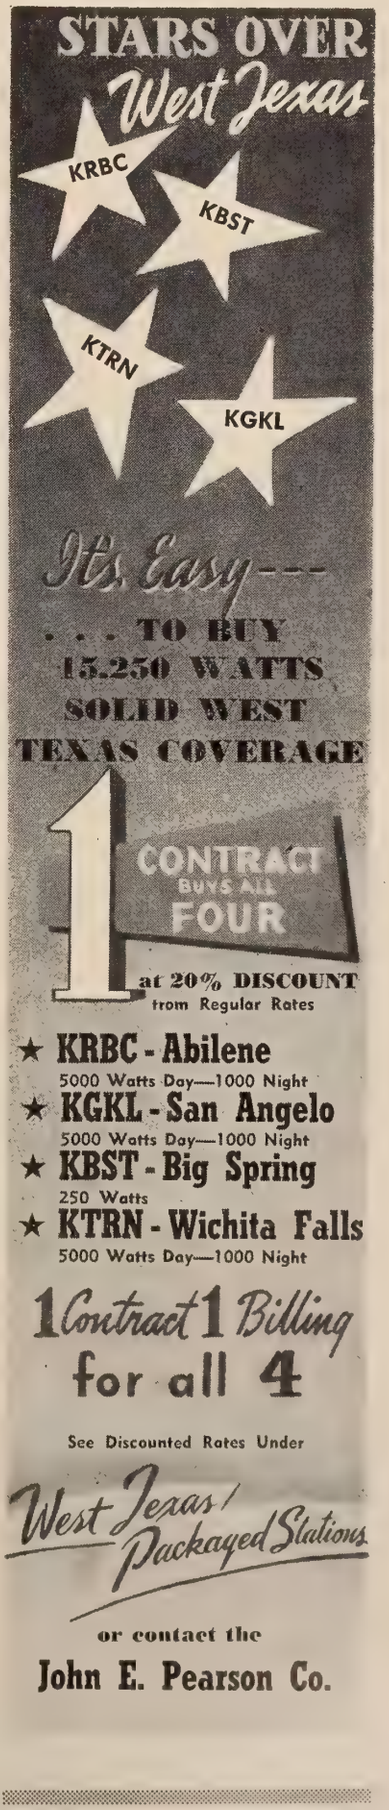
Mr. Ervin, who joined NBC's legal department in March 1948, was named assistant general attorney in July of that year. He has represented NBC in many proceedings before the FCC and the courts as well as handling many major legal matters, particularly in relations with advertisers, agencies and stations.

Before his association with NBC, Mr. Ervin, as a civilian lawyer, served as deputy to Brig. Gen. Telford Taylor, in charge of prosecuting the second series of war crimes trials at Nurenberg, Germany. Mr. Erwin had served in the Army from April 1941 until May 1946, when he was released as a lieutenant colonel.

He was associated with various law firms in New York from 1935 until the time of his Army service. Mr. Ervin received his AB degree from Ohio State U. in 1932 and his LL.B degree from Columbia U. School of Law in 1935. He was born in Middleport, O., on Nov. 28, 1911.

Mr. Stanton, who joined NBC in August 1949 as director of the television talent and new

Mr. Stanton



Mr. Shawn

programs department, was named director of TV commercial program planning in 1951. When NBC's radio and TV networks were integrated in 1952, he was placed in charge of television network programs.

Mr. Shawn is a veteran of 20 years in all facets of the radio and television industry. In his most recent position as director of production services, he was responsible for the supervision of major areas of production, including staging services, special effects, production coordination and production operations.

His first job in broadcasting was as a vocal soloist and announcer at WLW Cincinnati in 1932. The following year he moved to NBC in Washington for a similar position and was soon named assistant station manager. He was appointed assistant to the vice president for network programs in April 1945, and served in a series of executive posts both in New York and Washington until late 1952 when he was named director of production services.

JESSEL GETS TALENT-PRODUCER CONTRACT

Reorganized network moves to implement programming and sales with production of new films. Also announced: William Materne's appointment as AM-TV network sales manager.

IN ITS first major talent acquisition since its merger with United Paramount Theatres, ABC last week announced the signing of George Jessel to a long-term contract covering his exclusive services as a performer and producer for the ABC radio and television networks.

The announcement was made by ABC President Robert E. Kintner on Friday, coincident with the convening of the ABC Television Stations Advisory Committee for its first post-merger meeting with top officials of the network and its new parent company, American Broadcasting-Paramount Theatres Inc. A similar meeting with The Radio Stations Advisory Committee was held the preceding Friday [B•T, March 2].

Negotiated by Weitman

The contract with Mr. Jessel, a long-time star of the entertainment world, was negotiated by Robert M. Weitman, a veteran showman and UPT vice president who, coincident with the UPT-ABC merger, also became ABC vice president in charge of programs and talent.

Terms of the contract were not disclosed, except to say that it was "long term," that Mr. Jessel will represent ABC as a "goodwill ambassador" at public and private functions as well as in performances and productions, and that he will be able to continue his motion picture work. He joins ABC June 1.

"In addition to being featured on his own programs on ABC radio and ABC television," President Kintner said, "Jessel's diversified talents will be available for other strategic program planning now going forward for the fall."

Vice President Weitman said signing of Mr. Jessel, whom he called "the premier showman of the entertainment world," puts ABC radio and TV networks "in a most enviable position. . . . His talents, vision, and leadership bring to ABC a truly incalculable wealth of programming inspiration and know-how."

In other ABC developments, William M. (Bud) Materne, former national spot sales manager for the owned radio stations, was named national sales manager for the network's owned radio and TV stations. It also was disclosed that the second of two "top-flight" TV films recently announced by ABC will star actor Barry Sullivan and that a pilot film already is in production. It will be titled *Crackdown.* The other series, with a pilot film also already in production, is *Pride of the Family,* starring Paul Hartman, comedian and dance satirist. Both pilot films are slated for completion in time for showing to advertisers and agencies by the end of next month.

Programming, operations, and general planning were slated for discussion at the meeting of network officials with the TV Stations Advisory Committee in New York Friday, with the expectation most of the planning would be shown to be, as in the case of radio network plans, more in the nature of long-range blueprinting, not immediate.

Another item on the agenda: Selection of a committee chairman to succeed Mort C. Watters of WCPO-TV Cincinnati, who, it was disclosed, has resigned from the committee because his station, while affiliated with ABC-TV and continuing that affiliation, also originates some shows for the DuMont TV Network.

Two new members of the committee were to be installed at the meeting: Roger W. Clipp of WFIL-TV Philadelphia, and Owen Saddler of KMTV (TV) Omaha. Other committee members: Kenneth Berkely, WMAL-TV Washington; William Lane, WLTV (TV) Atlanta; Frank Snyder, WXEL (TV) Cleveland, and Otto Brandt, KING-TV Seattle. Resignation of Mr. Lane from WLTV was announced Thursday by Crosley Broadcasting Corp. (see story page 67).

Mr. Materne's appointment as national sales manager for ABC's owned radio and TV stations was announced Wednesday by Ted Oberfelder, vice president in charge of owned radio stations, and Slocum Chapin, vice president for owned TV stations, and was effective immediately.

Mr. Materne joined ABC in September 1949 as an account executive, became general manager of ABC's WABC New York (formerly WJZ) in March 1952, and was named national spot sales manager of the owned radio stations last December.

STEEL parts collected by U. S. Steel Co. for use of Don Herbert in his demonstrations on an NBC-TV *Mr. Wizard* telecast on 46 stations are sorted by Edward C. Logelin (c), Chicago district public relations director, U. S. Steel, and his assistants, Messrs. Alfred W. Wilson (l) and Thomas E. Ward.

'Toast of Town' to Get 20th Cent.-Fox Film Clips

FORESHADOWING closer cooperation between television and motion pictures, 20th Century-Fox Corp. announced Tuesday it has signed a two-year contract with the Ed Sullivan *Toast of the Town* CBS-TV show for presentation of a series of "miniature world premieres" of the film company's pictures as a regular monthly feature program.

Transaction was said to represent the first significant move on the part of a major film studio in the direction of an active liaison with television. Though the larger film companies occasionally have used spot announcements to promote their productions, their policy in the years of TV's growth generally has been to prohibit or limit the appearance of their films and personalities on TV.

Almost as precedent-shattering was a decision by Fox to permit actors and actresses connected with the films to make non-performing appearances on *Toast of the Town* for the purpose of receiving awards and honors on special occasions.

Contract was arranged by Charles Einfeld, vice president of 20th Century-Fox, and Mr. Sullivan. It calls for presentation of highlight scenes, running in length to six minutes, from at least 24 Fox releases in next two years.

Advertisers Boost Lineups

SPONSORS of five DuMont TV Network programs have increased their respective station lineups ranging from three markets to 12. Admiral Corp., through Erwin, Wasey & Co., has added 12 stations for Bishop Fulton J. Sheen's *Life Is Worth Living* program (Tues., 8-8:30 p.m. EST), bringing the total to 65. Serutan Co., through Edward Kletter Assoc., has boosted its network for *Life Begins at Eighty* (Fri., 8-8:30 p.m.) to 50 stations by adding nine. American Chicle Co., through Dancer-Fitzgerald-Sample, has added 11 stations, reaching a total of 45 for its co-sponsorship of *Rocky King, Detective* (Sun., 9-9:30 p.m.). Wine Corp. of America, through Weiss & Geller, has placed *Where Was I?* (Tues., 9-9:30 p.m.) on six additional outlets, bringing the total to 33, and Tide Water Assoc. Oil Co., through Lennen & Newell, has added three stations for *Broadway to Hollywood* (Thurs., 8:30-9 p.m.), which puts the total at 10.

NBC-TV Plans to Present 'Dignified' N. Y. Easter

CRITICISMS which descended upon television's coverage of the 1952 Easter parade are not being forgotten this year. Last week NBC, announcing its 1953 Easter TV plans, described the programming as "a dignified full-hour program of spring fashions and family celebration," and stressed that sponsorship will be "under dignified auspices."

Titled *Easter in New York,* the program will be carried at 12:30-1:30 p.m. EST, and will originate from the Palazzo d'Italia roof garden above Fifth Ave. opposite St. Patrick's Cathedral. Jack Mills will be the director.

CBS-TV's *Easter—Then and Now,* (1-2 p.m. EST) will show changes in the observances of Easter in New York during the past three centuries. The program will utilize services of station personalities, some stationed at the Plaza Hotel and others opposite St. Patrick's Cathedral. John Peyser will produce the show and Byron Paul and Lloyd Gross will direct.

WPIX (TV) New York's telecast of the Easter parade will be sponsored for the second straight year by Peerless Camera Stores, New York. Commercials will sell the sponsor's cameras, audio and scientific equipment.

Doug Edwards to Speak

DOUGLAS EDWARDS, newscaster on his own CBS-TV news show, will make the opening address before the 29th annual convention of the Columbia U. Scholastic Press Assn. in New York Thursday. This is said to be the first time the university forum has been opened with a talk by a newsman representing the broadcast industry.

Everett Holles Named MBS Washington Chief

EVERETT HOLLES, Mutual Washington commentator and veteran newsman, last week was appointed director of Mutual Washington operations [CLOSED CIRCUIT, March 2].

Mr. Holles

Effective today (Monday), he succeeds Hollis Seavey, who resigned to become director of the Clear Channel Broadcasting Service [B•T, Feb. 23]. He also will continue to serve as moderator of the MBS *Reporters' Roundup* co-op program (Mon., 9-9:30 p.m. EST).

Mr. Holles has been engaged in news reporting for some 30 years in this country and abroad. He was the "pool" reporter for the networks' coverage of President Eisenhower's pre-inauguration visit to Korea.

He has covered three wars, a number of international conferences, coronations, United Nations and League of Nations meetings, and Hitler's march into the Rhineland, and wrote the book *Unconditional Surrender.* He joined Mutual's Washington news staff as a commentator in August 1950.

TUFT TO HEAD RCA PERSONNEL, LABOR

EDWARD M. TUFT, vice president in charge of organization and development of the RCA Victor Div., has been elected vice president in charge of personnel, including labor relations, President Frank M. Folsom announced Thursday.

His announcement followed a meeting of the RCA board, eight of whose members, headed by Brig. Gen. David Sarnoff, chairman of the board, were slated to leave Friday for the West Coast to inspect RCA and NBC facilities.

Gen. Sarnoff announced, following the Thursday session, that a dividend of 87½ cents per share had been declared on outstanding shares of $3.50 cumulative first preferred stock, for the period Jan. 1 to March 31, payable April 1 to holders of record March 16.

Eight members of the RCA board and four other officers making Coast trip included:

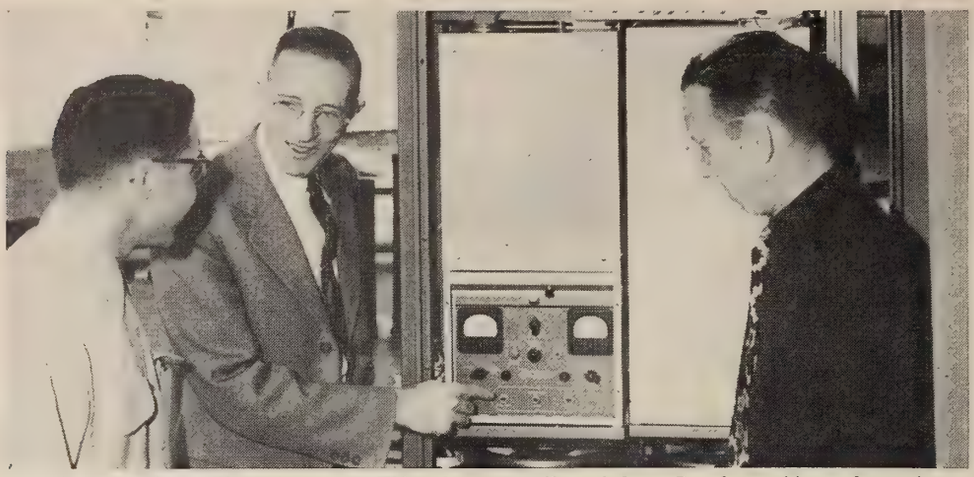
Gen. Sarnoff and President Folsom; Walter A. Buck, John T. Cahill, Gano Dunn, Harry C. Ingles, C. B. Jolliffe, and Edward F. McGrady, all board members, and Orrin E. Dunlap Jr., vice president in charge of advertising and publicity; Ernest B. Gorin, vice president and treasurer; Emanuel Sacks, vice president, and John Q. Cannon, secretary.

Emerson Statement

EMERSON Radio & Phonograph Corp. and subsidiaries, N. Y., reported Feb. 27 a consolidated net profit, before provision for federal taxes, of $1,915,366 for the 13-week period which ended Jan. 31, 1953.

January Set Production Up 60% Over '52 Period

PRODUCTION of radio sets in January exceeded that of one year ago by 60%, according to the monthly production report by Radio-Television Mfrs. Assn. The January output totaled 1,093,142 radio sets compared to 632,-455 a year ago and 1,202,503 in January 1951.

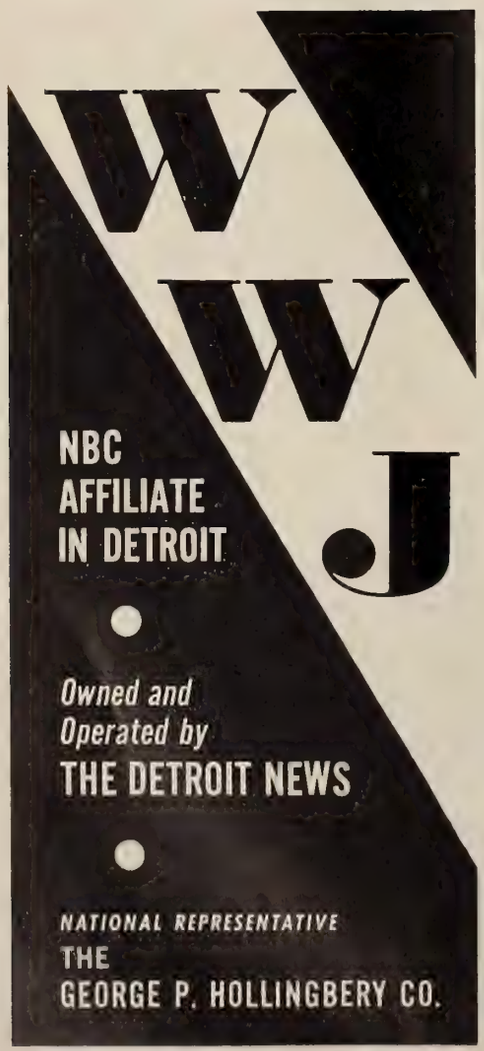


TV output set a new January record, 719,234 receivers being produced by the industry compared to 404, 932 the same month in 1952 and 650,700 in January 1951. Output of TV sets in December 1952 was 921,086 units while radio output totaled 1,325,158 receivers. December was a six-week factory work month compared to four weeks in January.

Of the January 1953 radio production, 361,-921 were home sets, 189,592 clock radios, 93,-962 portables and 447,667 auto radios. Of the radio output, 39,477 sets had FM tuning facilities, with another 7,397 TV sets having FM tuners,

Retail sales of both radio and TV sets declined seasonally in January from December's high level, according to RTMA's dealer survey. An estimated 640,073 TV sets and 414,726 radios (excluding auto sets) were sold at retail in January. December sales were estimated at 1,049,770 TV and 1,514,688 radio sets.

Manufacturers sold 37,343,081 receiving tubes in January compared to 43,220,393 in December. Cathode ray TV tube sales totaled 825,209 units in January compared to 1,011,151 in December.



EXPLAINING Motorola microwave TV relay equipment installed by Mountain States Telephone & Telegraph Co. for KBTV (TV) Denver are (l to r) Jerry Posakony, Motorola engineer, and Hubert Sharp and Donald Miller, radio engineers for the telephone company.

New Microwave TV Relay Announced by Motorola

NEW microwave TV relay designed to transmit television signals to remote points up to 200 miles has been announced as available by Motorola Inc. of Chicago. The system can be used either for stub relay of network broadcasts to remote localities or as "STL" interconnects between centrally located studios and remotely located TV transmitters, a Motorola spokesman said.

The system makes possible the transmission on a single microwave radio frequency channel of the video and audio signals, plus a two-way voice order wire or cue channel, Motorola reports. All the equipment except an amplifying apparatus at the receiving terminal is installed in weatherproof housing.

First of the Motorola relay installations has been completed by Mountain States Telephone & Telegraph Co. for KBTV (TV) Denver between the telephone company's radio relay terminal in Denver and KBTV's TV transmitter on Lookout Mt. 14 miles away.

ATI DEMONSTRATES NEW 3-D DEVICE

AMERICAN Television Inc. last week threw open its doors for public inspection of its new three-dimensional TV device and confirmed it would seek permission to demonstrate it before the FCC [CLOSED CIRCUIT, March 2].

Both public and press were invited to witness a demonstration at the headquarters of American Television School, ATI subsidiary, at 5050 N. Broadway, Chicago.

Ulysses A. Sanabria, ATI president, told B•T his company is preparing a petition, to be filed with the Commission "sometime during March." Mr. Sanabria will ask the Commission to withhold approval on final color TV standards until such time as 3-D TV can be incorporated with colorsets.

RCA's Goldsmith Issued Patent For Tri-Color Television Tube

A PATENT on the invention which led to RCA's first demonstrated direct-view, tricolor television picture tube has been issued to Dr. Alfred N. Goldsmith, consulting engineer and a pioneer in radio, who has assigned the patent to RCA.

The invention was made more than 10 years ago. In it, the face of the kinescope is coated with hundreds of thousands of red, green, and blue phosphors which, when excited by precisely controlled and rapidly scanning electron beams, produce color pictures.

Tubes of this sort were first shown publicly by RCA on March 29, 1950, in Washington, D. C., in demonstrations of its compatible color TV system. A patent on improvements permitting a compact arrangement within a single-neck tube of the electron guns that provide the scanning beams was issued last May to Alfred C. Schroeder, RCA Labs Div. research engineer.

AFTRA Concludes Wage Pacts With Six Indies in Chicago

AMERICAN Federation of Television & Radio Artists last week completed wage agreements with six Chicago independent stations and was negotiating with a seventh—the AFL's WCFL.

The AFTRA agreement covers announcers, actors and singers at WIND WJJD WAIT WAAF WHFC WSBC and WGES. It provides for severance pay clauses (one week's severance for each year of service) and increased minimum pay boosts for freelance talent ranging from $12.50 to $14.50. The pay increases amounted to approximately 10%, according to Raymond Jones, executive secretary of AFTRA.

Creation of a Film Producers Assn. of Chicago, with George Becker, Vogue-Wright Studios as president, also developed in Chicago last week.

The new association, which has applied for a charter, is not concerned with wage or contractual relationships but seeks to promote industry, government and other public relations. It comprises a group of companies which produce motion pictures (some for TV, like Kling Studios Inc.) for commercial, industrial and training uses.

SAG-Film Agreement

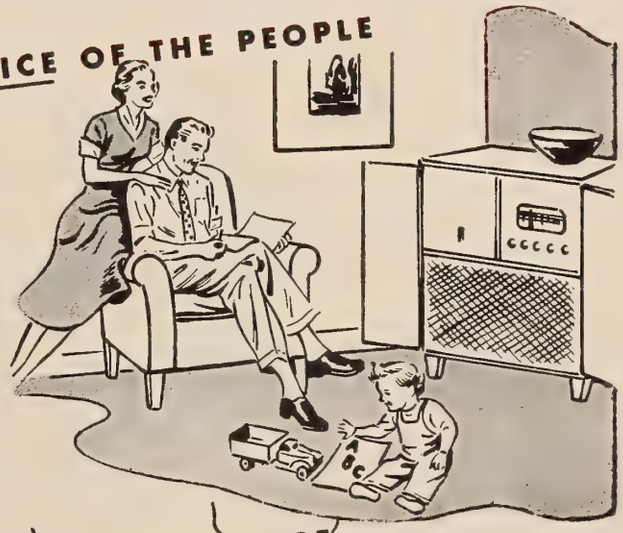
SCREEN ACTORS GUILD three-month old strike against producers of TV filmed commercials ended officially last Monday after units throughout the country had ratified a contract approved by the union's board of directors and the Film Producers Assn. of New York [B•T, Feb. 23].

FPA announced Thursday it is sponsoring a forum discussion in New York on Monday to explain the workings of the new contract.

Rosenbaum Issues Report On Musicians' Trust Fund

THE MUSIC Performance Trust Fund, which annually disburses money to pay musicians for free public performances of music in 654 areas throughout the U. S. and Canada, during 1952 spent $1,827,984 to this end, according to trustee Samuel R. Rosenbaum's eighth semiannual report and statement.

The fund is supported by contributions from phonograph recording and transcription firms and from makers of TV films containing music, through an agreement with the American Federation of Musicians, Mr. Rosenbaum said.



Administration and other costs were $139,670, while $1,689,919 was paid to musicians for the free public performances, Mr. Rosenbaum said. Contributions from record manufacturers for the same period totaled $1,762,140, while electrical transcription firms contributed $49,161, according to the report. With $20,717 contributed by makers of TV films, total receipts by the fund during 1952 were $1,844,276, the report indicated. There was a balance of $1,100,266 at the end of 1951, and $1,116,558 at the end of 1952.

Separate funds are kept on receipts and disbursements of revenue received from phonograph record and transcription manufacturers, and on revenue from makers of TV films which include music, Mr. Rosenbaum explained. Allotments for the first six months of 1953 for the records-transcriptions fund have been set at approximately $800,000 for payment to musicians, the report stated.

Allotment for the TV film fund (Music Performance Trust Fund No. 2) for this half-year is $150,000 for payment to musicians.

OF, FOR AND BY THE PEOPLE

A RADIO station in Tucson, Ariz., has been broadcasting a program which on the surface would seem to violate every code of practices in the book. Five days a week KVOA airs a solid quarter-hour of commercial announcements, without interruption by music or entertainment of any kind.

Naturally, there's a catch in it. That catch is that the commercials are free. They are written by the listeners themselves and are broadcast without retouching as a unique public service. If you have a postcard, you can advertise on the KVOA *People's Exchange,* without charge. Taking advantage of the opportunity, the people of Tucson have written a series of programs as varied as humanity and as filled with genuine human interest as somebody else's mail.

An old prospector with a good patented claim advertised it on the *Exchange* and with the proceeds got a grubstake.

Listeners have offered for sale such varied articles as a live Gila monster ("would make an unusual pet"), an Eskimo kayak and a burro cart. The *Exchange* has sold 500 head of cattle and a swarm of bees. One elderly listener advertised a complete library of books, all of them published before 1865. When last heard from, he had sold all but two of the volumes.

Anybody Got a Stagecoach?

A Tucson grandmother wrote in to appeal for someone to sell her a stagecoach. Her grandson, in the East, was having a birthday. He desperately needed a coach so he could hold it up and rob it in the western manner.

Very little work is entailed in broadcasting the unique program, since it is more-or-less legibly scripted by the listeners. The announcers at KVOA have become unusually adept at reading handwritten copy, some of it peppered with cryptic abbreviations.

Announcers have also grown used to the casual way in which some writers mix their advertisements. A listener will write in to sell the more intimate parts of a high-speed car, mention in the same breath that he is willing to part with a Santa Claus cake mold 14 inches high, and will conclude by offering for sale a five room house and seven acres of land. All this on a postcard.

Listeners generally waste little effort on sales appeal. Frequently a card will begin with the candid request: "Please help me get rid of some things."

People lose things in Tucson about the same as elsewhere, but in the southern Arizona city more people hear about it.

One Tucsonian wrote: "I lost my Deputy Sheriff badge."

Another correspondent confessed that one of his weekends had become mislaid if not totally lost. In the course of the festivities he had left a shotgun with some chance acquaintances in a boarding house, at a location now forgotten. Please, could someone refresh his memory, so he could get the gun back?

Badge and gun were back in their owners' hands the next day.

KVOA Manager R. B. "Bud" Williams points out that any other station in the country is free to develop its own *People's Exchange* as a public service. "We believe it is one of America's unique programs," says Mr. Williams, "but there's no reason for it to stay that way."

The way in which listeners use their radio program reflects the texture of the community. Tucson is a university town and each spring sees a brisk traffic in play-pens and bathinettes for sale or exchange at the village of quonset huts where married students live with their families.

Ten Inches of Plaid

One girl wrote from her quonset to relate that she had bought some plaid material for a dress. Her college math had failed to meet the test, however, and although she had carefully computed the amount of material needed, she had run short by 10 inches. Still worse, the local store where she bought it was now sold out.

So—would KVOA ask Tucson residents for more of that material? Possibly someone had bought 10 inches too *much.* Sure enough, someone had. And although the young lady has given up the study of mathematics, she now wears the plaid dress to several classes in another useful art, Advertising.

Students have found the exchange useful to line up transportation home for the holidays and to get jobs as baby-sitters. So far it hasn't been employed as a date bureau, but the day may not be far off.

Listeners appreciate the free service and usually mention the fact in their correspondence, but their words of praise are usually brief and to the point, as in the case of the unemployed listener who wrote: "You are doing a fine job—please see if you can get *me* one."

uhf uhf u

How do uhf stations make out in vhf-penentrated areas? To get the answers, B•T sent a writer to South Bend, Ind., where there were 35,000 sets oriented on Chicago and Kalamazoo vhf stations before WSBT-TV began operating on Ch. 34.

By John Osbon

IT TAKES two hours and 15 minutes to go from Chicago to South Bend, Ind., on the South Shore line. There are no mileage signs along the way, but you can pretty well gauge how far you are from Chicago by the height of the television antennas and the complexity of their arrays.

By the time you get to South Bend, some of the receiving equipment looks about as intricate as the radar guarding New York harbor. There's no doubt that a lot of people have spent a lot of money to watch Chicago TV. According to an actual antenna count by the Indiana-Michigan Electric Co., there were 35,000 vhf receivers in the South Bend area last fall, oriented to pull in stations in Chicago (69 air miles away) and Kalamazoo (60 air miles).

With so many receivers there, it could be said that South Bend last fall was an established vhf television area, even though reception quality was doubtful. Today it is a combination vhf and uhf area. WSBT-TV South Bend went into operation last Dec. 21 on Ch. 34.

Good Case Study

As one of the first uhf stations to go on the air in a market where there was already significant vhf penetration, WSBT-TV provides as good a case study as exists of the problems that future uhf operators will encounter.

There have been reports that WSBT-TV was finding rough going, that uhf sets and converters were not moving well, that local and national spot advertisers had not been exactly swarming to do business with the station. These reports are less the truth than half-truths which do no credit to the careful, conservative, calculated approach taken by the South Bend Tribune Co., owner of the station.

What the station has set out to do is build up enough circulation to assure a sound buy for both local and national advertisers. It seems to be succeeding. As of Feb. 28, the station claimed a total circulation of 26,499 sets capable of receiving Ch. 34, 21,048 of them converted vhf receivers and 5,451 uhf-vhf combinations. The station's target is 60,000 sets equipped or converted to get uhf by fall.

It is counting on its network programming as well as local originations to build audience. Network programming is, of course, no novelty to a community which owned 35,000 sets before its own station went on the air. But the quality of WSBT-TV reception is more reliable than that of the signals from Chicago and Kalamazoo, and WSBT-TV is banking on that fact as an inducement to uhf receiver and converter sales.

The station now carries a weekly network commercial schedule of 15 NBC-TV shows, 12 from CBS-TV and one from DuMont. As a full-fledged affiliate, WSBT-TV receives regular compensation for carrying these sponsored shows. It also carries some sustaining network programs. It uses locally-produced news, weather and sports news plus cartoons and western films to piece out its schedule of 12 noon to 10 p.m., Sundays; 5-10:15 p.m. Monday-Friday, and 4-10 p.m. Saturday. Last Saturday WSBT-TV had a special event, the finals of the Indiana state basketball tourney, which obliged it to open for business at 12:45 p.m.

Local Business

Though it has refrained from high-pressuring local accounts into buying television time, and indeed has suggested to some that they await an expansion of programming into the afternoon hours, it now has 15 local advertisers: Associated Druggists, Ben Hur food plan, Bimsco Builders Supplies, Colpeart Realty Co., Greenblatt fur store, House of Lamps, National Bank & Trust Co., Place & Co. (builders), Ridge Co. (electric appliances), Tower Federal Savings & Loan, Oerlin Realty Co., Rodin's (radio and television store), Southside Electric Co. (radio-TV store), S & S Clothiers and Coal Heating Service.

Its national spot accounts are Bulova, Kreamo bread, Alliance Mfg. Co. (antenna rotors), Viceroy cigarettes, Sun Oil Co., Alka-Seltzer, Kool cigarettes and Crosley television sets.

At present rates ($200 for a Class A hour, $40 for a Class A minute announcement) the current volume of network, spot and local business is not enough to put WSBT-TV into the black. But that doesn't worry management. Backed by the substantial resources of the South Bend Tribune Co. which publishes a successful newspaper and runs a successful radio station (WSBT), the television station is looking for a sound, long-range investment rather than a quick buck.

In its application to the FCC, the company estimated it would cost $666,000 for buildings and equipment to put the station on the air and that first year operating costs would be $473,120 and first year revenue, $437,600.

Two months of operation have convinced the management that the revenue figures will come out about as estimated but that instead of being still in the red, as originally anticipated, the station may break even by the end of the first year and perhaps before.

Conservative Spending

The reason for the optimistic revision of estimates is that WSBT-TV spent only $450,106.23 to put the station on the air, some $216,000 less than originally allocated. The lower expenditure was achieved by establishing the station in the same building with the AM station and the newspaper rather than in a new structure.

With less capital investment to amortize, WSBT-TV counts on coming out in the black sooner.

Says Neal Welch, general manager of WSBT-TV:

"We're very proud of the progress that has been made in the two months we have been on the air. One of the biggest factors in that progress, we believe, is the reputation and standing that WSBT, our AM station, has held in the industry . . . WSBT's standing has carried over into television and we feel that national advertisers and sponsors of network programs believe that we will duplicate the AM operation."

Robert H. Swintz, who recently resigned as general manager because of health and who now is business manager, puts it this way:

"Things get better every month. It just takes time, that's all."

The planning for WSBT-TV began more than five years ago.

In 1947 WBKB (TV), then Chicago's only TV station (recently acquired by CBS as part of the ABC-United Paramount merger and renamed WBBM-TV), decided to erect relays from Irish Stadium in South Bend to pick up the Notre Dame football games.

This caught the fancy of the Tribune Co.

f uhf uhf uhf

executives, who reasoned that it might be possible later to receive Chicago television by reversing the South Bend-Chicago relay. They signed a contract with WBKB, applied to the FCC for vhf Ch. 1, and placed an equipment order with RCA. When that channel was eliminated for TV use, the Tribune refiled for Ch. 13. A hearing was held in early 1948, but the application had still not been acted on when the FCC pulled the great ice age over television in September, 1948.

When the freeze was finally lifted, the Tribune Co. applied for Ch. 34. It won its CP last August.

WSBT-TV got one of the first four uhf transmitters to come out of RCA. Last December, the station's engineering crew worked around the clock, climbing the ice-coated tower to make adjustments. A crew under Art O'Neil, chief engineer, and Scotty Hagenau, assistant chief engineer, got the first test pattern on the air at 11:50 p.m. last Dec. 21.

At 12:45 a.m. Dec. 22, WSBT-TV carried a 15-minute live news and weather report. An inaugural program launched regular transmission the evening of Dec. 22. Then WSBT-TV and the *South Bend Tribune* went to work in promotional earnest.

Promotional Punch

The newspaper came out with a special TV supplement, tied in with a massive TV display at Notre Dame's Navy Drill Hall. Every manufacturer who bought a page advertisement in the supplement was given a booth at the display. Distributors, dealers and service firms also advertised and showed their wares.

The exhibit played to a full house, with 30,000 people attending. Unquestionably, it did much to get the public's mind on uhf, but more was needed to be done to educate the public on the nature of the new service.

Though people began to buy converters for their vhf sets, some of them began protesting that they weren't getting Chicago "any clearer" despite the expense. Some even said the addition of uhf was "ruining Chicago reception."

Servicemen and dealers were obliged to explain that the addition of converters did nothing whatever to influence the reception of distant stations and that the reason why people were objecting to the Chicago quality was that they were seeing good reception for the first time from WSBT-TV.

The public and customer relations job that had to be done in South Bend will probably be repeated elsewhere. Other uhf stations would do well to imitate WSBT-TV in maintaining cordial associations with dealers and servicemen.

Dealer Cooperation

WSBT-TV has been able to enlist the cooperation of dealers in providing regular figures on their sales of uhf equipped sets and uhf converters. It has also been successful in getting most dealers to push uhf. Some dealers, however, have been inclined to undersell local uhf, at least to the extent of trying to get customers to buy uhf-vhf combinations plus the expensive antenna arrays necessary to pull in the far-away vhf stations.

Is there enough uhf receiving equipment being shipped into South Bend to meet the demands?

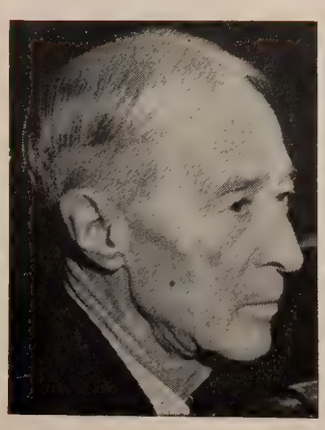
Local dealers agree there is. Indeed, most of them say they can get more than they can sell. Their business in the past two months has been steady but not phenomenal.

One of South Bend's largest radio-TV chains is Chikar's, with stores in four adjoining towns. Here's what Louis Chikar, head of the chain, told B•T:

"Generally speaking, we get sets faster than we can sell them. Business is good but not terrific." He said his inventory was 800-900 receivers and about 500 tuning strips. As deterrents to sales, he said, were the season (income tax time), the fact that TV is no longer a novelty and that "you can get some reception almost every night from Chicago."

Mr. Chikar kicked at a box of tuning strips. "There's $2,200 worth of merchandise," he said, "and it's not moving." He complained that the dealer discount from manufacturers (about $3 on a $14 strip) was not enough to interest dealers in pushing converters.

A more optimistic view came from J. A. Lininger, sales manager of the South Bend Electric Co. He said TV, since the beginning, had been "the fastest selling business I've ever been in. It's like shooting craps with $500 bills." He said he was referring mostly to vhf sets, not to uhf converters. But he thought now that factory-equipped uhf sets were beginning to come into the market in substantial quantities the same would apply to them.



Another dealer told B•T that he thought vhf owners in South Bend would be more eager to convert to receive Ch. 34 if the Wednesday night fights and other sports events were available locally instead of exclusively from Chicago.

Beer Is Banned

The reference here was to the fact that the South Bend Tribune Co. and its radio-TV properties, under the leadership of F. A. Miller, 85-year-old editor and publisher of the paper and owner of the stations, has maintained a strict policy against beer-wine-ale advertising. Pabst-sponsored boxing is denied WSBT-TV.

The station does carry the Friday night fights under Gillette sponsorship, however, and has ambitious plans for local and regional sports coverage.

What WSBT-TV is counting on, and with good reason, is that as more and more people in South Bend see uhf's clearer reception and as WSBT-TV expands its schedule and

Top management of WSBT-TV: F. A. Miller (far left), owner; Neal Welch (second from left), general manager, and Robert H. Swintz (right), business manager.

programming, there will be a steady enlargement of uhf set distribution.

The fringe reception from Kalamazoo is spotty, according to residents of South Bend. As Mr. Welch explained this distant reception, "it's inconsistent in that it's consistently good for days and then consistently poor."

On the night this reporter monitored TV in South Bend, Chicago reception was plagued with wobbles, "snow" and other defects. By contrast, WSBT-TV's signal was excellent. In fairness to the vhf transmissions from Chicago, however, it should be said they are received with different fidelity in different parts of South Bend.

WSBT-TV's own signal has been a source of surprised gratification to its executives and engineers. Using interim power of 17.5 kw and a 479-foot tower, the station sprays its signal as far out as 55 miles.

Early last January the RCA Service Company sent a testing crew into the area, using a calibrated model 630TS vhf receiver, converted to receive Ch. 34 on Ch. 5. It measured signal strength under every possible condition at a number of outlying towns and for the most part reported good to excellent reception.

Mr. Welch says that reliable WSBT-TV signals are received in a somewhat irregular pattern extending out from the transmitter 52 miles east, 47 miles south and 45 miles northeast. The north and west ranges are somewhat shorter.

Power Boost Planned

Late this year the coverage will be extended when the station expects to go to 175 kw power.

The station feels that just about all the bugs have been worked out of its present equipment, but technical problems have at times been cropped up. Since the delivery of the transmitting gear last December, RCA has made 71 modifications in equipment.

WSBT-TV is RCA-equipped, with two studio cameras and two remote cameras. It has one 16mm film camera and two 16mm film projectors, a slide projector for 2 x 2-in. slides, a Gray Telop opaque projector for 3¼ x 4¼-in. cards.

The station uses a telephone company microwave link to get its signals from its studios to its transmitter. From the studios, signals are fed to a microwave transmitter atop the Indiana Bell Telephone Co.'s local office and sent on to a reflector on the antenna of the WSBT-TV transmitter, south of the city. The signal is then bounced to ground level and carried by cable into the transmitter building and up to the antenna on top of the 479-foot tower. Live network feeds are taken off the Chicago-Toledo coaxial cable at an AT&T repeater station and carried by underground cable to the WSBT-TV studios where they are integrated and then put into the transmission system.

It is characteristic of the Tribune Co. operations that WSBT-TV has not splurged on lavish buildings or unnecessary fittings, but has bought the basic equipment it needs for the unspectacular but steady expansion program it intends to carry out.

Management feels that the potential is good. There are 115,000 people in the city of South Bend, 205,000 in the metropolitan area. It is not a big market, but a solid one. WSBT-TV is being built to last.

GETTING A HEAD START ON UHF CONVERSION

THOUGH construction has just begun and its operating starting date is still undetermined, WCAN-TV Milwaukee (Ch. 25) has already launched a program to educate distributors, dealers and servicemen in the intricacies of uhf reception.

WCAN-TV will have a tougher job on its hands than WSBT-TV South Bend has had. Milwaukee has one of the most firmly established vhf stations in the country, WTMJ-TV, and there are 407,830 vhf sets in the area.

Some 400 Milwaukee distributors, dealers and servicemen were guests of WCAN-TV at a luncheon Feb. 19 and were given a complete outline of uhf problems by Benjamin Adler, head of Adler Communications Laboratories, New Rochelle, N. Y. Mr. Adler is particularly qualified on this subject. His company helped KPTV (TV) Portland, Ore., the nation's first uhf station, get on the air.

The Adler firm has a unique contract with WCAN-TV. It will provide a complete package deal of designing and constructing the station, delivering a finished plant to management and supervising every process up to and including the first "on the air" transmission.

Mr. Adler told the Milwaukee TV set dealers and servicemen that there was no vhf set, "no matter how old," which cannot be converted to uhf. But he urged them not to fool the public with talk of cheap conversions. He pointed out that special outside antennas would be needed, and he estimated that the average cost of a conversion job would be $75.

The WCAN-TV educational approach is to convince the TV set trade that there will be an active market for uhf, but at the same time to acquaint them fully with the problems of conversion. As Mr. Adler put it: The incentive to convert to uhf "will be a desire to have the privilege of turning off one program and tuning in another."

"I doubt if there are enough servicemen here today to take care of all the conversions that the customers will want," he said.

He pointed out that uhf in Milwaukee would have advantages over vhf. Once adjusted, uhf receivers would be less sensitive to interference than vhf receivers and uhf pictures would have fewer ghosts.

But he emphasized the importance of proper adjustment. "Charge enough money on the first service call to cover a return trip to adjust the set," he told the dealers. Based on his experience in Portland, he said that it was likely that a second trip would be necessary to adjust antenna positions.

Contract Provisions

The Adler contract with WCAN-TV includes the following: building design, engineering of overall station system, antenna and tower facilities, transmitter and associated controls, film and live studio camera equipment, studio lighting equipment, master and studio switching and control system, monitoring system, wiring of all equipment racks, supervision of installation at station, engineering and operating test and first "on air" transmission.

Mr. Adler has told the owners of WCAN-TV that to his knowledge "this is the first time a station grantee has placed the entire problem of constructing an operating TV station in the hands of one company, including financing of services and equipment."

In its application for a uhf channel, the station estimated construction costs at $475,433.

WCAN-TV is owned by three partners, each with a one-third interest: Lou Poller, owner of WPWA Chester, Pa., president and 51% owner of WARL-AM-FM Arlington, Va., and president and 27.1% owner of WCAN Milwaukee; Cy Blumenthal, 39% owner of WARL and 27.1% owner of WCAN, and Alex Rosenman, 27.1% owner of WCAN.

Mr. Adler addressing Milwaukee TV dealers and servicemen

profit proved in 63 markets!

and now AGAIN available everywhere* at a local price

You could spend a fortune producing your own local program, with no guarantee of results. Now, you can afford to buy "Dangerous Assignment" for exclusive local sponsorship, and KNOW you'll get results because it has been PROFIT-PROVED!

For example, a wholesale grocer in Bloomington, Indiana, advertised his tea on "Dangerous Assignment" over WTTV and sold 3½ tons . . . seven months' normal supply . . . in one week! It has increased sales for 40 other sponsors. It can do the same for you.

"Dangerous Assignment" is NBC Television, which means quality throughout. Plus top advertising, merchandising, publicity, promotion and exploitation to back you up in your local sales areas.

Find out if this PROFIT-PROVED program is still available in your markets. Write, call or wire today.

the HIGH cost of

No doubt about it: Television is expensive. It costs plenty just to go through the necessary preliminaries of getting a construction permit, if a competitive hearing is involved. Contestants are spending $50,000 and more, and many of them, of course, won't get a channel.

By Earl B. Abrams

THERE'S an old adage that experienced world travelers quote to novices who are embarking on their first journey. It goes like this:

"Pack half the clothes you plan to take, but double your cash."

That very well might be the motto for every television applicant who's preparing to go to Washington to participate in a contested hearing for a video channel.

Brotherrr, it costs to go through a hearing in Washington for a TV channel. Plenty!

Best estimates by those who know are that it costs a television aspirant, spending six weeks to three months in Washington, an absolute minimum of $25,000 to prepare an application, work up exhibits for the hearing, arrange for transportation, hotel accommodations, subsistence, buy transcripts, pay legal and engineering fees, engage in a little recreaton for themselves and their witnesses.

That's the low end of costs. At the high end, there are applicants who have spent $50,000. And there are others who plan to spend $75,000 and more—for example Westinghouse, which stated it will put out $137,000 to secure a TV companion to its KEX Portland, Ore.

The higher figures are reached when it's a hotly contested case in a major market, when high-priced legal and engineering counsel are retained, when the hearing spreads out over three or four months, when there are a sizable number of witnesses who must be brought to Washington, housed, fed, entertained and transported back to their home towns.

The toll is not only on the exchequer. There's a toll on human beings. Already, two men have died, three have suffered heart attacks and one had to spend a week in a Washington hospital, the victim of physical exhaustion. All were involved in television hearings.

Of the 24 TV hearings now scheduled, six were completed as of last week.

If each of the 14 applicants who participated in the completed hearings spent the minimum, some $350,000 has already been expended.

And if they spent a higher $50,000 per applicant, the amount of money spent on TV applications which have run through the grueling hearing course totals $700,000.

According to the best information, some 600 TV applicants must go to hearings in contests for the sought-for channels. Naturally all won't spend even the minimum. Some will be lower, particularly as the cities involved become less than major markets. Even now both the FCC and outside counsel are working toward simplifying and making less expensive the costs of going through a television adversary hearing.

(If there's no contest, the amount of money that needs to be invested in applications is infinitesimal compared to hearing expenses. One unopposed claimant for small-town TV got by with $30. Naturally he used no attorneys or engineers.)

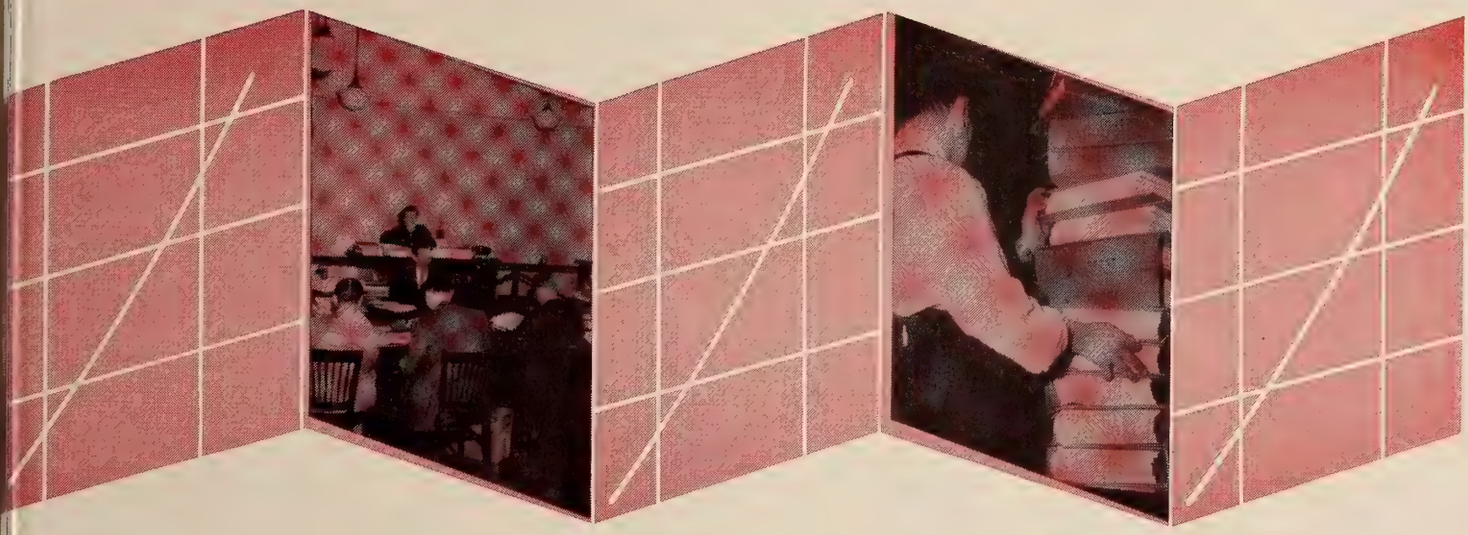
Figures and Sources

The figures that are used in the paragraphs below, by request, are anonymous. They were given to BROADCASTING • TELECASTING on the promise that the identity of each of the informants would be protected. Where ranges of costs are indicated, the figures were gleaned from a score of applicants, attorneys and engineers.

Highest on the tabulation of expenses to see an application through from filing to hearing and to a possible grant are legal fees. Low end of the scale for lawyers runs about $100 per "legal day" (six hours). A "respectable minimum", in the words of one Washington radio lawyer, is $150 per day. For a well-heeled competitor, who spends the maximum days in hearing, a fee of $300 a day is not unusual.

Next on the expenditure list are engineering fees. These run about the same as for attorneys, but—if it is any consolation—engineers are not required to sit in on hearings to the extent that attorneys are. In fact, most hearings so far under way have disposed of engineering testimony through stipulations or in a one to three-day session.

Transportation and housing bulks next highest on the expense account for a TV applicant. Train or plane fare, sleeping quarters, food and miscellaneous loom large, according to those who have dipped into their pockets for these expenses. This is particularly so when there are a dozen stockholders and as many witnesses to put on the stand to "make" the case. In one hearing, involving a city 750-1,000 miles from Washington, an applicant spent $120 per man to transport each of his witnesses and $25 a day for each in Washington. He's had 12 men on the stand already, with an average stay in Washington of two and a half days, and he's not through yet.



In several situations, the hotel housing got so critical the applicant rented apartment suites to quarter his staff and his witnesses while in Washington.

Important in any case are the exhibits that tell the story of why the candidate feels he's superior to the competition.

Most exhibits are one or two volumes, containing bound mimeographed sheets, telling the story of the applicant and ranging from biographies of directors, market studies and background data to proposed program schedules and operating personnel. The ink and paper are the least of the expense of preparing the exhibits. It's the preparation —with fees for market specialists, accountants, program men, management, engineers, attorneys—that runs the cost up.

Many exhibits are elaborate, utilizing printed pages, art and leather bindings. One applicant used a four-color cover in two

hoping for television

volumes, the pages of which were not only printed and including photographs, but with some of them specially cut and folded. This was said to have cost $10,000.

That sum is not for just a single copy of the exhibit. Not only must an applicant's own "team" have individual copies, but so must the opponents—and the FCC examiner and counsel, and, of course, there's always need for extra copies for members of the firm, friends, news reporters, and others.

There's one other tangible expense in a Washington hearing. That's for transcripts of the record. The regulation fee for copies of the transcript is 15 cents per page for 10-day service (rarely used), 35 cents per page for three-day service (sometimes used) and 50 cents per page for overnight service.

If an applicant wants really fast service—by 9 p.m. of the same night as the day of hearing—that charge is 75 cents per page. Many applicants order the fast service and the overnight service—running up a transcript bill of $1.10 per page.

Take the Wichita Ch. 3 hearing, the longest thus far. That ran for 59 days, took 8,583 pages of transcript—almost $9,500 for the record alone.

The Commission counsel does not have to pay for these charges. As part of the contract with the court reporter firm handling the FCC, Commission counsel gets copies of the transcript gratis.

That's the Washington story. Actually, a case starts in earnest as much as six months before the hearing date, with attorneys and engineers counseling with applicants to prepare for hearing. The preparatory climax comes 30 days before hearing day, when the attorneys begin spending the major portion of their time with their clients. And, the week before the hearing, attorneys, engineers, principals and witnesses virtually live together.

In a keenly-contested hearing, principals and attorneys gather together each night to review and prepare for the next day's trials. All such work, and it includes telephone calls, wires, even "private eye" investigations, go on the bill for the application.

It should be understood that legal fees are variable. Many attorneys are on retainer, so that only the actual hearing work is chargeable. Others make special arrangements for each client. And, in some relationships, there are varying fees depending upon whether the applicant is successful or not in getting a grant.

Also, much of the legal fees—and engineering charges too—go for clerical work. That's considerable in a TV hearing case.

Endurance Records

Longest hearing so far was for Wichita's Ch. 3. It began Oct. 20, 1952, and recessed most recently, Feb. 20, four months later. Hearing occupied 59 days and the transcript totals 8,583 pages. Next longest has been Ch. 10 in Sacramento, Calif. That began Nov. 12 and closed Feb. 19, involving three months of which 46 days were spent in hearing. The transcript totals 6,170 pages. Third in the longest hearing stakes was Tampa-St. Petersburg's Ch. 8, which began Oct. 15 and recessed Feb. 21, four months long, of which 32 days were spent in hearings. The Florida transcript totals 3,996 pages.

In the Wichita hearing, Daniel Moyer, secretary of the non-broadcasting Wichita Television Corp., said during his testimony Feb. 9 that his group had already spent $40,692 on the case and that he anticipated the total would be $50,000 before it was over.

O. L. Taylor, principal of the competing KANS Wichita application, declared that his application was going to cost him $34,000. He put in detailed figures for exhibits, legal fees, engineering fees and Washington expenses that add up to that amount.

In the Tampa-St. Petersburg hearing,

Here are actual costs reported to B•T by two television applicants. Applicant A had a three-week hearing, was opposed by one other applicant, put 18 witnesses on the stand. Applicant B's hearing lasted 120 days. B put 12 witnesses on the stand, was opposed by two competitors. A, with a shorter hearing, spent more than B, but these cases illustrate that though costs may not run in proportion to the length of hearing, they are bound to be high.

	Applicant A	Applicant B
Travel, hotels, expenses	$13,099.00	$ 7,380.00
Depositions	700.00	800.00
Transcripts	1,393.14*	861.90*
Pre-hearing preparation	3,840.00†	476.84†
Legal fees	15,000.00	15,000.00
Engineering fees	(incomplete)	5,000.00
Total	$34,032.14	$29,518.74

* A ordered faster and more expensive transcript service. Hence his costs were bigger despite shorter hearing.
† B included in pre-hearing costs only mimeographing and paper for exhibits.

non-broadcasters Tampa Bay Area Telecasting Corp.'s Robert James said his group had spent $14,000 on the application before hearing, and that he estimated $30,000 would be the total cost before the hearing was completed. He emphasized that much of the preparatory work was done by stockholders themselves, since the group includes station and advertising men.

In the Portland, Ore., Ch. 8 hearing which has been going on since Jan. 26, Westinghouse Radio Stations' counsel George Turner said WRS estimated it would spend $137,000 on the KEX application. Mr. Turner is with Cravath, Swaine & Moore, New York. WRS also has a Portland, Ore., counsel and its own attorneys.

Ralph Williams, of non-broadcasting Portland Television Inc., testified in the same case that his group estimated the application would cost in the neighborhood of $44,000 by the time the hearing was over.

The men who make up the principals of applicants are not young. Young men don't have the financial wherewithal to apply for TV. Applicants mostly are men who have made their mark in the business world and who are on the shady side of middle age. The intense preparation and the punishing experience of testifying and being cross examined have not been easy for them.

Casualty List

Just two weeks ago, Norman (Hap) Webster, chief engineer for McClatchy Broadcasting Co., died in a Baltimore hospital after suffering a heart attack. He had been a witness in the Sacramento hearing, and had participated in all the long and arduous preliminaries for the hearing.

Three weeks ago Philip L. Jackson, editor and publisher of the *Portland* (Ore.) *Journal* and president of KPOJ Inc., who was chairman of TV applicant Columbia Empire Telecasters Inc., died of a heart attack at home in Portland. Even while he was testifying in Washington he was taking pills for a heart condition. Mr. Jackson was 59.

During the Denver Ch. 4 hearing, KMYR co-owner A. G. Meyer, 53, suffered a heart seizure that put him in a Washington hospital for four weeks. He is now convalescing at home in Denver.

Physical exhaustion has taken its toll too. There are many instances where it was necessary to take the heat off a man for a week or so to let him get back to normal. In one instance, this took the form of hospitalization. John Hamlyn, general counsel for the McClatchy newspaper and radio properties, was forced to spend a week in a Washington hospital shortly after Jan. 1 in order to recover his strength.

FCC officials and applicants hope that the killing pace of TV hearings will subside as applicants and attorneys realize that their eagerness to explore every minute angle is not going to get them grants. Right now most attorneys have come to realize that there are only three or four major issues which spell the difference between success or failure. The FCC itself has worked out a series of revisions, in conjunction with the Federal Communications Bar Assn., which holds hope for simplifying the issues so that the lengthy and grueling hearings may become more manageable and less murderous.

NEVER KEEP

Harold E. Fellows, president of the NARTB, introduced a new advertising character, Twenty Percentage, in a speech to the Advertising Club of Boston last Tuesday. On the theory that the life and times of Twenty Percentage are of interest to everybody in and around radio-TV, B•T herewith presents the speech in its entirety.

PERHAPS the most remarkable fact about Twenty Percentage was his abhorrence of selling. He wasn't a salesman to begin with, or so he thought. He was a buyer, not a seller. But he found it necessary to sell in order to get funds with which to buy. There was something about this process which he knew was insidious, and as the years rolled by he made several overt efforts to break out of the economic cycle which glued him to sidewalks and chained him to doorbells. Actually, it is only too true that he didn't try very hard.

Possibly he even rationalized a bit. He would dream some days of becoming a farmer. On one such occasion, he subscribed to several different farm journals. The more he studied them, the more he realized that farmers were salesmen, too. The only complication there was that they had to produce the darned stuff as well as sell it.

The Executive

Then, there was that time in Twenty's life when he gave serious consideration to becoming an executive. However, every executive he could think of had one responsibility which Twenty wanted to escape. Every executive had to deal with salesmen, and Twenty was honest enough with himself to look darkly upon such a future.

When Twenty was in his mid-thirties, there was a period—not unique in his circumstances—during which he wasn't selling enough to satisfy his insatiable desire to buy. He gave serious consideration then to a life of religious retreat. He envisioned himself in sackcloth, his balding head fully barren, living the somber life of a student. He finally faced up to it, however, that he wasn't a student. Never had been. He couldn't even content himself with the two-month-old periodicals which he found at hand in doctors' offices as he went around selling medical implements. Furthermore, Twenty didn't believe that his wife would understand such a yearning, so he never even mentioned it to her, let alone to any one else.

No doubt the most unusual manifestation of this dissatisfaction with his lot was the time that Twenty decided he would become an advertising man. At this particular moment in Twenty's travail, he happened to be selling time for a radio station; it was his bounden duty, of course, to call upon agencies and advertisers. It came to him suddenly one evening (while he was sneaking a look at television, as a matter of fact, and wondering idly whether it would last) that he was known as an "advertising salesman" and practically everyone upon whom he was calling was called an "advertising man."

In a cold sweat, Twenty came to the realization that by this distinction he was not considered a man; he was being categorized as something less than that—a carbuncle on civilization that did not even deserve the dignity of such designation as applied to his fellow beings.

After a restless night, worrying about this disturbing idea, he resigned the next day; but reconsidered a few minutes later when it was pointed out to him that he was $372.50 in arrears on his personal account with the station.

Of course, his name really wasn't Twenty at all; his name was Oscar Percentage—but he had been nicknamed "Twenty" by his fellow workers because Twenty (so to speak) was a magic number in his life. Outwardly, at least, it was. He always said that if he could get a straight 20 per cent commission—he didn't care what the product or service—he'd get along. So they called him Twenty (although in truth the highest commission ever paid to him was eight per cent)—and that was when he was 13 years old, selling programs at the county fair.

Twenty frequently was troubled, too, by his failure to become a success. He was not sure, if you were to have asked him, of the exact elements which constituted success, but he had the uncomfortable feeling that he didn't possess them.

The Failure

Now lots of his friends who would pull up to the traffic light in their Chevrolets and see Twenty sitting there in his Cadillac convertible would murmur to themselves, "There is a successful man." But it was never loud enough for Twenty to hear; and what's more, he knew how many payments were due on the Cadillac—and it never occurred to him that there might be payments due on the other fellow's Chevrolet.

Actually, Twenty had a rather confused notion that success constituted a mysterious mixture of being photographed for a Calvert ad, having throngs seek your autograph and perhaps obtaining an honorary college degree from the old alma mater.

It never occurred to him that he could probably accomplish all three of these if he set about it, so keen were the persuasive

A SALESMAN WAITING

powers he had nurtured and developed over the years.

The average person knowing Twenty only casually would not have suspected this Walter Mitty streak in his character. He was always jolly outwardly and had mastered, without half trying, it seems, a complexity of living which would have been (in a clinical sense) fascinating to a psychiatrist. Twenty had become an extrovert by the easy method of refusing to be an introvert, which in truth was what he was supposed to be.

Like the time he had lost a $500,000 account when he was working for the Busybee Advertising Agency. Oh, there was no question about it. Twenty had lost the account and so one else could be held responsible. He had lost it on the golf course playing dollar Nassau with the advertising manager of the Silky-Smooth Soup Company. This advertising manager, hardly an endearing type, fancied himself something of a man with the shinny-sticks.

He was the sort of fellow who always said, just before driving off the first tee, "I haven't played for four months and may be a bit rusty." Of course, he had played 18 holes a day all of the preceding week—and Twenty knew it.

It's Wrong to Win

On that particular day, Twenty couldn't tell a customer's game from an eight iron and he "took" this fellow. Cleaned him, no less. He tried to be sportsmanlike about the whole thing, but it just didn't come off. The soup man was grim about it and from that day forward there was a gradual disintegration of what had been a beautiful and profitable friendship.

The inevitable day arrived and Twenty was called into the office of the president of the Busybee Advertising Agency. This gentleman was living in a suspended state of frustration.

For most of his life he had been pitching to become president of the agency. A few months previously he had made it, and now he was completely done-in by the challenge of his vocation. Not that he didn't carry off being president very well. He did—magnificently. It was only that he had nothing else to pitch for, except chairman of the board (and he had been around long enough to know better than that).

He was kind with Twenty, but firm, and perhaps talked to him overlong in Dutch-uncle fashion. Twenty thought so, anyway, particularly since he edged this particular president by about seven years and the conversation thus seemed a bit ludicrous.

The plain truth was that Silky-Smooth Soup was going to another agency—and the advertising manager of Silky-Smooth, in a "martinied" moment, had told Busybee's president that Twenty was the major cause of it all. Nothing specific. Twenty was just—well, not the man for Silky-Smooth.

So Twenty was no longer an account executive. He took it well although he was dreadfully hurt inside. He simply told his friends, "Well, that's one time in my life I got 'out of the soup'."

So Twenty took to the streets again. Some mothers, he said, dropped their babies on their heads. His mother, he maintained, had dropped him on his feet—and every time he got off them into a nice, rocking-chair type job, he was headed for trouble.

Yes, Twenty hit the road again, this time selling office supplies. There was a touch of irony in this, insofar as he was selling something for which he himself had little use, since he lived in his automobile and a variety of hotels and motor courts. But he could sell, this lad—and within 18 months he had topped all the other field men and won a trip for himself and his family to Miami for a one-week's vacation.

But the uncertainty of life preyed upon Twenty constantly, and it was only natural that he might become slightly jaundiced in viewpoint. As in the case when he was sitting in a bar one evening in Joplin, Missouri.

Two other equally lonely-looking drummers were seated there, and finally one of them said to the other: "I'm in building supplies. What are you in?" This chap said he was in insurance and, as such matters go, turned to Twenty and asked: "What are you in?"

It really wasn't like Twenty, and he regretted it later, but he simply said, "I'm in Joplin"—and paid his tab and left.

Driving across the plains of Nebraska one scorching summer day, Twenty's mind was taking a little excursion back through the years. He was 42 years old and he had covered a lot of territory—very near all of it—in his conscious memory—devoted to his activity in selling.

Everything's a Sale

He had sold his father on letting him wear his first pair of long pants, long before he was of an age to do so. He had sold his wife on marrying him. He had sold a couple of culpable college professors on giving him good enough marks that he would remain eligible for football.

And since then, he had sold a little bit of everything. Not only office supplies, but soup, soap, candy, tires, radio time, newspaper space, ladies lingerie, automobiles, hardware supplies, insurance, oil leases and men's suits, and from this his mind wandered by natural progression to his buying habits; and it came to him forcibly that he, not *un*like others but in truth very *like* others, was just that: both a seller and a buyer. He was, at 42 years of age, approaching the great and significant truth about the economics of living.

You take war, he thought, Somebody sells the idea. Or peace. That has to be sold, too; it's like war, in a way, but a different package—and the price varies. For Twenty, this was getting pretty thoroughly into things and it could be expected, therefore, that he wasn't prepared for the blowout.

The Cadillac turned over three times and the next vague notion Twenty had was a vision of someone in white sticking a needle in his arm.

He didn't know exactly how Trygve Lie had managed to get in the room. He rather had the impression that he had been admitted because he, like Twenty, was out of a job. Twenty merely assumed the loss of his own job because he wasn't selling office supplies; and when you weren't selling, you weren't producing; and when you weren't producing, you weren't working. Very logical indeed.

At all events, Mr. Lie seemed to be asking him a few questions about how he would handle the United Nations problem. He, Twenty, who had sold everything from lingerie to hardware; what if he had the job of selling something like the U. N. How would he go about it?

Twenty reflected for quite a long time before he answered and then he said: "Well, Mr. Lie—do you mind if I call you Trigger?" (Get them on a friendly basis; the essence of the approach.)

Mr. Lie murmured that he would prefer "Trygve."

Peace Is Salable

Well, Trygve, said Twenty, I'll tell you what I'd do. I'd take a long look at what I was trying to sell. I'll admit that peace is about the toughest package in business today. It seems like there's a bigger sales acceptance for war than for peace, but this might be because we haven't worked the market right.

Now you take your former company: The U. N.—you'll have to admit it's not specializing very much. It's expanding pretty fast and there might be too many items in the line. If that's true, you'll find that your salesmen will dissipate their enthusiasm.

Before long, they won't know what they're supposed to be selling. You take all those commissions—on information, on agriculture, on culture, on education. Now the problem here is that your main line is peace and the salesmen might forget about this bellwether item in the confusion of expansion and growth.

A salesman isn't supposed to be very smart, you know. He's just supposed to be a little bit smarter than a buyer. There's another thing, Trygve. You have to know your market. Markets, in a line like this, differ just as much as people do if you're selling office supplies. What you've got to do is fit the item to the people. You're not going to get very far trying to fit the people to the item. And here's something important: Remember that everyone is selling something. I just thought of this a moment ago and it took me 42 long lousy years to learn it: all of us are salesmen. Just like all of us are buyers. Now that's clear enough, isn't it, and

you'd think even a simpleton like me would have thought of it long ago?

Twenty was saying that he would be glad to take on the job for his usual 20 percent commission, with a reasonable draw of course, when he realized that Trygve was holding a stethoscope to his chest.

Then he realized that it wasn't Trygve at all, but a fellow in a white coat who was muttering something about his pelvis being broken. Twenty remembered the sudden whirling of the Cadillac, then, and awoke to the fact that he was in a hospital. If he *had* to break something, it *would* be what he sat on and not what he walked on.

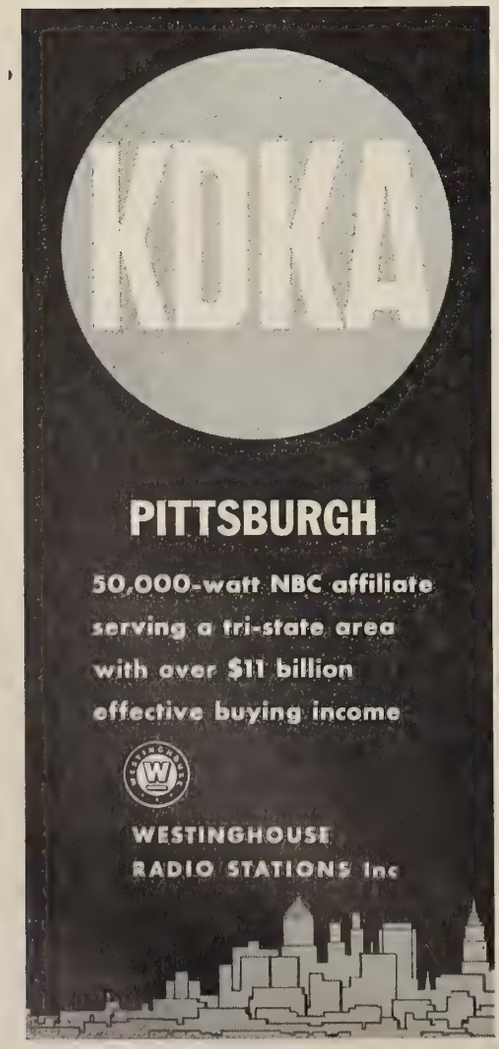
But Twenty had discovered *the secret*, and before he was out of the hospital all of the frustrations of his earlier years had disappeared and he had mapped out the course of his future.

Selling a Fundamental

Twenty discovered that the buyer of time, for example, is a seller of something, too. He discovered that the buyer of space occupied that position by title only; that actually he was selling something for somebody. That the minister was selling a worthy creed; that the politician was selling his ability; that the child, wheedling for an ice cream soda, indeed was selling an idea; and that someone was selling the soda, that the man who sold a suit found it bought by a man who wanted it because he felt it would help him sell himself.

Now to this whole story there should be a moral and, if there were, it might be something like: Never keep a salesman waiting; you might be able to sell him something. I learned this much at least from Twenty: If you search for the good things in life, you will find them; and having found them, you will find a ready market for distribution.

In May of 1952, *Fortune* magazine did a very learned treatise on the decline of the salesman in America. There were bar charts and pi cuts and all manner of illustrations demonstrating the logic of *Fortune's* conclusion that selling had gone to pot.



And just think: Someone sold that learned treatise to *Fortune*; and a printer sold his services for its publication; and then *Fortune* sold the magazine.

Selling is everybody's game. Do it well —do it with your good heart in it—whether you're selling ideas like democracy, products like Silky-Smooth Soup; lingerie; hardware; office supplies; time; space, or yourself.

Twenty Percentage finally solved the problem. Saw him the other day and never met a happier and more contented guy. He's in business now, as you probably know; he operates the Twenty Percentage Sales School. Doubtless you have heard of his slogan: "You Can't Beat the Percentage System."

And you can't either, for as Twenty told me: "In a way," he said, "it's a racket. They're all salesmen when they come to me. I just bone them up a bit."

Incidentally, my friend Percentage owns 20 per cent of the business.

IN THE PUBLIC SERVICE

BLOOD donations to the Portland, Ore., Red Cross Bank tripled during the week ABC's *Breakfast Club* originated there, as KEX that city distributed 500 attendance tickets to volunteers. The Red Cross, which gave out all the tickets in four days, also reported additional "regulars" who signed during the campaign by m.c. Don McNeill, who appeared in the Paramount Theatre before 3,100 persons and interviewed donors on the air.

WATO Aids Crusade

A PARROT and a disc m.c., working a 42-hour broadcast marathon from an Oak Ridge, Tenn., department store, brought in more than $2,000 to the Crusade for Freedom campaign from WATO listeners and fans. Station personnel, working outside the department store, sold Freedomgrams to passersby. Using 15 minutes of each hour during the 42-hour period WATO and Tom Atkins, early morning m.c., broadcast their appeal for funds.

Air Buffalo Benefit

QUIZ SHOW and concert at WBEN-AM-TV Buffalo highlighted a rally for the yearly maintenance fund appeal for $135,000 by the Buffalo Philharmonic Orchestra. Radio quiz show, with station stars, was followed by a telecast of the *Marine Theatre Hour*, sponsored by the Marine Trust Co. Musicians for both programs were donated by the American Federation of Musicians.

QUEEN Juliana of the Netherlands receives pledges of assistance by Massachusetts residents for flood victims from Roderick MacLeish, news director, WLAW Boston, who flew to The Hague for on-the-spot coverage of the disaster. WLAW is conducting a Flood of Dollars campaign among its listeners throughout New England.

TULSA Junior Chamber of Commerce Distinguished Service Award to the city's "outstanding young man of 1952" goes to Sam Schneider (r), farm director of KVOO that city, for his activities on behalf of community, state and nation. Presenting the Jaycee award is Okah Jones, district manager of Oklahoma Natural Gas Co.

WNBK Schedules Telethon

FOURTEEN-HOUR telethon benefiting the Muscular Distrophy Assn. was held by WNBK (TV) Cleveland last Saturday night. Radio and TV film stars entertained a large audience in the Masonic Temple from 11 p.m. until 1 p.m. Sunday. Hamilton Shea, station manager of WNBK-WTAM (NBC), supervised the show. He arranged for 150 telephone operators to handle incoming calls at The May Co. department store. Program details were handled by Norman Cloutier, program director.

Utley Blood Appeals

ONE time plea for blood donors by Clifton Utley on a WNBQ (TV) Chicago newscast brought in more than three times the regular number of volunteers at the blood donor center the following day, according to the American Red Cross.

WTVJ (TV) Palsy Telethon

UNITED Cerebral Palsy telethon conducted 16 hours by WTVJ (TV) Miami raised a pledged total of $198,436, or $1.26 per set in that area, an amount far in excess of last year's $58,000, according to Mitchell Wolfson, station president. He said contributions received thus far indicate a total collection of more than $235,000.

MERCHANDISING RESULTS

TREMENDOUS boost for new and repeat business during 1952 resulted from WGAR Cleveland's "Merchandising in Action" plan according to a report from the station. By contracting for a minimum expenditure of $3,250 for 13 weeks or $5,200 for 26 weeks, advertisers have received week-long displays in 191 A & P and Kroger chain stores. New brochure has been prepared by the station noting specific cases in which advertisers who participated in the plan showed sales increases from 17% to more than 200%.

FOCUS ON GARDENING

TWO weekly garden and landscaping programs designed for the city dweller as well as the suburbanite have been scheduled by KYW Philadelphia. On March 1, *Garden Club,* featuring farm director Bill Givens and landscaping authority, Price Supplee, was introduced. On the second program every Friday morning, Mr. Givens will conduct a "garden gossip" feature as part of the station's *KYW Farm Hour* program.

STUDENTS TURN PRODUCERS

NEWEST educational public service show on WJEL Springfield, Ohio, is *County Line,* program prepared and presented by students from five local county high schools. Quarter-hour weekly program features talent from a different high school in the area in a five-week cycle. Format will vary with each school or group of students in charge of the production. Sponsor of the series is Farm Bureau Cooperative Assn.

NEW NEWS FORMAT

ELMO ELLIS, program director at WSB Atlanta, has inaugurated a new *Operation News* policy each night beginning at 11 p.m. on that station. The first five minutes is devoted to highway news followed by a news broadcast with accent on developments in Georgia. Taped and relayed from NBC, a 15-minute analysis of current events on the national and international level is aired by H. V. Kaltenborn at 11:15 p.m.

RADIO EXPERIMENTS SUMMARY

DEPARTMENT Store Studies has summarized results of its experiments with the use of radio

Buttons & Bows

MORE than $250,000 worth of celebrities' personal belongings were auctioned on KNBH (TV) Hollywood last weekend to raise funds for the Los Angeles County Heart Assn. *The Big Giveaway,* originating from NBC's El Capitan Theatre, lasted from 10:30 p.m. Saturday to 2 p.m. Sunday.

Lines were hooked up to eight motion picture theatres, and only people in the theatres could bid, which put the charity effort on a cash basis. Home viewers were offered chances to compete for a mink stole or coat, two trips to Europe, a 1953 Dodge and 22 U. S. Savings Bonds by mailing their reasons why people should support the Heart Fund and enclosing $1.

professional tape recorder

Specially designed to lighten all your remote work, the Voyager is a professional portable recorder and amplifier all in one case. You'll find that this newest member of the famous Magnecord family is sturdy, rugged, and reliable—always producing perfect recordings.

companion to the magnecorder

The Voyager is the same tape recording unit that radio engineers prefer 3 to 1 for broadcasting, hinged back to back with its own amplifier. Frequency response with tape is ± 2 db from 50 to 15,000 cycles per second. The amplifier has a bridging input and one low impedance mike input; 600-ohm balanced output. Two-speed (7½" and 15") equalization and headphone monitor jack on front. Automatic tape lifter optional.

For demonstration, see your telephone directory under "Recorders," or write

Magnecord INC.

225 West Ohio Street, Dept. B-3
Chicago 10, Illinois

for department stores [B•T, Jan. 12] into a presentation comprising 17 charts and accompanying text for station salesmen to use in selling time to retailers. Copies of the presentation have been sent to all station subscribers of DSS and will go to new subscribers as long as the supply holds out.

WORLD'S SPRING BONUS

WORLD Broadcasting System distributed baseball feature, *Get a Hit,* as "spring bonus" to its radio affiliates last week. Program spotlights baseball's immortal figures as well as colorful incidents in the history of game. Robert W. Friedheim, World vice president, said the series was sold to local sponsors by 580 radio stations last year. He added that 26 quarter-hour shows will begin with the opening of baseball season week of April 12 and continue through World Series. Stations were sent several sales presentation pieces, Mr. Friedheim said, as well as a wide variety of sports sell-sounds for use on local sport shows.

WMGM's 'Baptist Hour'

AS part of the celebration of the 30th anniversary of WMGM New York's *Calvary Baptist Church Hour,* which the station claims is the oldest gospel broadcast series in the world, WMGM's director Bertram Lebhar Jr. presented Dr. John Summerfield Wimbish, Calvary pastor, a specially constructed new microphone with an engraved stand during a Founders' Night broadcast Wednesday. Series, started March 4, 1923, is heard regularly Sundays, 10:30 a.m. to 12:30 p.m. and from 8-8:45 p.m., and is carried over shortwave facilities of HCJB Quito, Ecuador.

AMERICANISM CONTEST

GAS & Electric Sales Co., Elwin, Ill., sponsor of *I Was a Communist for the FBI* on WDZ Decatur, Ill., recently conducted an essay contest for school children on Americanism vs Communism. Students from eight counties participated. A TV set went to the winning contestant, Nancy Roe, and a $50 merchandise certificate was presented to her teacher, Eva Youmans.

ARTISTS ON RECORD SERIES

OUTSTANDING recordings of famous musical artists, past and present, will be featured on new weekly WQXR New York series *Gala Performance,* which began last Wednesday, 10:05-11 p.m. EST. Programs will also be available to stations of the WQXR Network. Among artists featured will be Enrico Caruso, Amelita Galli Curci, Jan Paderewski, Lily Pons, Fritz Kreisler, Jascha Heifetz, Vladimir Horowitz, and others.

TOYNBEE SERIES

SERIES of six weekly lectures featuring noted historian Arnold J. Toynbee and titled *"The World and the West"* was started March 1 by ABC radio in cooperation with the British Broadcasting Corp. Originally broadcast over BBC last fall, series is heard at 10:30-11 p.m. EST and will include lectures on Russia, Islam, India, and the Far East.

WCTC TALKATHON

A THREE-HOUR "talkathon" was conducted over WCTC New Brunswick, N. J., on Feb. 25 by New Jersey State Sen. Malcolm Forbes, who is seeking the Republican nomination for governor in the state. The station reported that on time purchased by his campaign committee, Sen. Forbes replied to scores of questions telephoned in by listeners from 8 to 11 p.m., but nevertheless did not have time to answer all calls.

SCOUTS TAKE OVER

MEMBERS of the York County Cub Packs Scout Troops took over the operation of WIDE Biddeford, Me., a fortnight ago as part of activities of National Boy Scout Week. From sign-on to sign-off on Feb. 11, the scouts carried out announcing duties, read news and commercial copy, and the station relates that even the sponsors applauded their efforts.

RANCH, FARM PROGRAMMING

TWO-WEEK program series titled *The Ranch and Farm Profit Series* is in progress at KMMJ Grand Island, Neb. and KXXX Colby, Kan. The series consists of 14 public service programs stressing better living and greater ranch and farm profits, and features discussions by guest speakers who are authorities in the agricultural field.

MENUS WORTH A PRIZE

CONTEST has started on Columbia Pacific Radio Network's *Second Cup of Coffee Club,* quarter-hour program sponsored five times weekly by S. & W. Fine Foods Co., S. F., whereby listeners send in their favorite breakfast menus, accompanied by the name of their grocer. Weekly prize of $10 is awarded to the winning menu with a prize also going to the grocer. Agency for the account is Foote, Cone & Belding Inc., S. F.

WIP'S NEWSBOY APRONS

WIP Philadelphia mailed newsboy change aprons last week to local and national advertisers to publicize the station's latest promotion tie-in with *Newsweek* magazine. Over 300 newsboys in the area are using the aprons to the advantage of both WIP and the magazine.

'TRAVELING DISPLAY CARDS'

WBBM-TV Chicago is placing some 1,200 "traveling display cards" in the city's streetcars and busses to announce that it is "Chicago's newest television station." Cards feature Pat O'Neil of Boulevard Models Studios and were designed by Lee Salberg, WBBM-TV director of promotion and publicity.

Radio & Revolt

A STATION and its manager have been commended by Pennsylvania leaders for broadcast participation in a "psychological warfare" maneuver at Rockview State Penitentiary.

Mr. Bergstein

Milton J. Bergstein, general manager of WMAJ State College, Pa., aired his personal plea to prisoners who had barricaded themselves in a prison wing holding guards as hostages.

Guards reported later that prisoners followed public reaction to their strike via radio reports. These, along with the work of Mr. Bergstein, were credited with prodding prisoners to come to terms with authorities after a 72-hour revolt.

Sheer magic in stop motion . . . To the bounce of the conga beat in the theme song, "Luckies Taste Better", a line of Lucky packages dances from one conga drum to another. Cigarettes hop out to form letters L.S.M.F.T.; and the tobacco from a cigarette stands alone in Lucky's "tear the paper" test, then falls into a heap of "fine tobacco". The latest of many ingenious stop-motion commercials produced by Sarra for the American Tobacco Company through Batten, Barton, Durstine & Osborn, Inc.

George Gerard, announcer-engineer, KTRC

The subject of this conversation is . . . *cash.*
It's what every BROADCASTING • TELECASTING subscriber pays to get his copies each week.
The difference between paid circulation and free or partially-free is a difference in results for advertisers.

Paid circulation can only be built, and maintained, on people who want the service. Their willingness to pay lays the foundation for high, consistent readership. Non-readers eliminate themselves by non-renewal. 100% paid circulation indicates 100% intent to read.

By surveyed facts, BROADCASTING • TELECASTING is the best read journal in radio and television. Agencies and advertisers vote it (International Public Opinion Research, Inc.) "most read, most dependable, most useful and most effective for station advertising."
Agencies and advertisers pay more money for BROADCASTING • TELECASTING than for any other radio or television journal.
And gentlemen, who can doubt a dollar?

Paid Circulation . . . the measure of readership

Santa Fe, N. M., father of girl, Valerie Wyn.

James Damon, operations supervisor, KNBH (TV) Hollywood, father of girl, Deborah Ann, Feb. 24. Mother is **Tessie Ann,** formerly with NBC Hollywood continuity acceptance department and daughter of **William J. Beaton**, vice president and general manager, KWKW Pasadena.

Al Reh, purchasing agent, KTTV (TV) Hollywood, father of boy, Thomas, Feb. 25.

Networks

George Gould, Rockhill Productions, N. Y., rejoins CBS-TV as staff director assigned to *Rod Brown Rocket Ranger* show.

Lewis R. Tower, engineering and administrative staff, MBS, to NBC New York, as union relations coordinator.

James T. Victory, salesman for 20th Century-Fox Film Corp., to CBS-TV's film sales staff as account executive.

Samuel Goldwyn Jr., recently released from U. S. Army, to CBS-TV as producer in public affairs department.

David H. Hedley, advertising promotion manager, *Cosmopolitan* magazine, named manager of sales presentations in NBC's advertising and promotion department.

Tom Wright, publicist, Young & Rubicam Inc., Hollywood, and **Robert P. Hardin,** reporter, *Honolulu Star-Bulletin*, to ABC Radio Western Div., as publicists.

Tom Paro, Office of Public Information, Dept. of Defense, returns to MBS sales staff.

Dick Jolliffe, account executive, Columbia Pacific Radio Network and KNX Hollywood, promoted to sales service manager.

William K. Baxley, account executive, KHJ Hollywood, returns to ABC radio Western Div. in same capacity.

John Nilson, account executive, CBS Radio Spot Sales Chicago, added to sales staff, CBS-TV, same city.

Representatives

Frank R. Hussey, member of advertising department of *Chicago Tribune* and previously with John W. Cullen Co., newspaper representatives, appointed account executive at O. L. Taylor Co., radio-TV station representative. He succeeds **George Weiss** who transfers to United Television Programs, Chicago, as salesman.

Frank T. Breslin, commercial manager, WLAN Lancaster, to Avery-Knodel as account executive in New York office.

Jerry Moore, associate, Tracy Moore & Assoc., Hollywood, father of girl, Martha Jane, Feb. 2.

Manufacturing

L. Harriss Robinson appointed manager of Washington, D. C., office of Motorola Communications & Electronics Inc. **John Fussell** named manager of Motorola Inc.'s Region 7, succeeding Mr. Robinson.

Verne G. Rydberg appointed assistant manager of application engineering for electronic tube div., Westinghouse Electric Corp., Elmira, N. Y.

Donald W. Tait, advertising manager for Perlite division of Great Lakes Carbon Corp., N. Y., named manager of sales promotion of equipment sales div., Raytheon Mfg. Corp., Waltham, Mass.

George F. Maedel elected president of RCA Institutes Inc., succeeding **Maj. Gen. George Van Deusen** (USA, ret.), who retired March 1.

$28 MILLION SPENT ON CANADA RADIO IN '52

CANADIAN advertisers spent about $28 million for time on Canadian stations in 1952, according to Pat Freeman, advertising director of the Canadian Assn. of Broadcast-
CANADA ers. In addition, almost $5 million was spent on recordings and transcribed programs and talent, Mr. Freeman estimates.

Mr. Freeman, in a first-time survey of national advertising in Canada, found that about 700 national advertisers used Canadian radio last year, spending about $10 million on national selective or spot program time. Also, Canadian Broadcasting Corp. reported network revenue of about $2½ million and about $1½ million was turned over to independent stations for network time sales, bringing the national time sales to about $14 million.

It is estimated that about the same amount is spent for local time sold by Canadian independent stations, with talent and costs of recorded programs extra. Mr. Freeman plans to make a survey of local time sales this year, showing what specific retail categories spend.

CBC TO HEAR TV BIDS MARCH 27

SEVEN applications for independent Canadian TV stations will be heard by the Canadian Broadcasting Corp. board of governors, in Ottawa March 27.

Included in the bids will be the application of CKLW Windsor, Ont., outlet which
CANADA serves the Windsor-Detroit, Mich., area. CKLW is seeking vhf Ch. 9.

Board will also hear the joint application for vhf Ch. 13 of the three Hamilton, Ont., radio outlets (CHML, CJXH and CKOC), as well as bids from CKSO Sudbury, Ont., for vhf Ch. 5; CFPL London, Ont., vhf Ch. 10; CHSJ St. Johns, N. B., vhf Ch. 4; CJCB Sydney, N. S., vhf Ch. 4, and Quebec Television Ltd., vhf Ch. 4. Last named has no radio connections and is a subsidiary of Famous Players Canadian Corp., moving picture and theatre organization.

CBC said that other applications received are not sufficiently complete for hearing at the present time.

CKEY Restricts Communists

CKEY Toronto has decided to ban all between-election broadcasts by Communists or fellow-travelers, according to Don Insley, program director. Adverse publicity on re-
CANADA cent Communist-sponsored broadcasts had some bearing on the decision.

CKEY always has aired broadcasts from all political parties as part of its free speech policy. Henceforth a management committee will go over all political speeches to decide whether they are pro-Communist. At election times, according to Canadian law, time must be given to all political parties.

CAAA Has 45 Members

CANADIAN Assn. of Advertising Agencies, with executive offices at Toronto, now lists 45 members which place 92% of
CANADA all national advertising in Canada. Russell C. Ronalds of Ronalds Adv. Agency, Montreal, is president of the agency group.

Outline Fund-Raising For 'Non-Profit' Chicago Outlet

A LEADING industrialist and a member of the Illinois legislature last week initiated, on separate fronts, fund raising for non-commercial, educational TV in Chicago.

Edward L. Ryerson, chairman of Inland Steel Co. and head of a money-raising Citizens Committee for Educational Television, explained the plan to business and civic leaders at a luncheon last Tuesday. He reportedly was assured of cooperation in a drive for some $500,000 by June 2 to set up a station on vhf Ch. 11 [B•T March 2].

At the same time, Rep. Charles H. Weber (D-Chicago) introduced a bill in the Illinois House which would authorize $1 million each for building and equipping educational stations in Chicago and at the U. of Illinois, at Urbana-Champaign.

Rep. Weber noted the New York state legislature is considering similar legislation which would appropriate $1.6 million for three "pilot" educational TV stations and about $6 million for a 10-station educational video network [B•T March 2].

Under Mr. Weber's measure, which comes up this week for hearing before the legislature's Appropriations Committee, the money would be voted before July under an emergency clause.

Whether the Illinois legislature would go along with Rep. Weber's legislation was a matter of conjecture. On the same day he introduced his measure, however, the House denounced the moral content of some commercial TV program fare.

A feature of the Chicago vhf Ch. 11 plan is to interest large corporations to donate monies not only to put the station on the air but also for so-called "courtesy" announcements covering program blocks. Advocates of the plan deny this would circumvent the "non-commercial" provision set forth by FCC, claiming that their plan would apportion costs among participating firms rather than involve the selling of time.

Ohio Legislature Studies Five-Station TV Network

OHIO state network operated among five state-supported universities at an annual cost of $750,000 was proposed to the state legislature last Monday by the Ohio Program Commission, a state planning group.

Group suggested stations be located at Kent State, Bowling Green State, Ohio State and Miami and Ohio Universities, with Central State College, another state-supported school, working through the Ohio State U. outlet. The commission recommended that all public and private schools coop.

The commission set an installation cost at $2,127,700 for all five stations, and an annual $750,000 operating expense. An inter-connection service among the outlets would cost $345,000 yearly, the group estimated, providing network facilities for any city which operates an educational station of its own.

Tarzian Scholarships

FIRST radio-television scholarship has been given to Indiana U. by Mr. and Mrs. Sarkes Tarzian, owners of WTTS and WWTV (TV) Bloomington, Ind. Two scholarships, valued at $250 each, will be awarded in radio and in TV next fall on the basis of scholastic record and broadcast proficiency, according to Elmer G. Sulzer, director of the school's radio and television services.

DISCUSSING news broadcasts at a U. of Minnesota-Northwest Radio-TV News Assn. session are (l to r), Allen Forbes, NRTNA president and WCCO Minneapolis newsman; Jim Bormann, the station's radio news director; Dr. Ralph Casey, dean, U. of Minnesota journalism school; Sig Mickelson, director, news and public affairs, CBS-TV; Ray Nixon, professor, U. of M. journalism school, and Charles Sarjeant, associate news director, WCCO. At the meeting, WCCO won first place in NRTNA's annual community service competition with its *Call Main 1361*, produced cooperatively with the Minneapolis police department.

WWJ-TV Offers Know-How

MANAGEMENT of WWJ-TV Detroit and its licensee, the *Detroit News,* has offered station and executive services in aiding the Detroit Educational Television Foundation, organized to put an educational video station on the air. The *News* station telecast the first "telecourse" in cooperation with the U. of Michigan, and works regularly with other schools and colleges in telecasting educational programs.

Ford Foundation's Fund for Adult Education has allocated $150,000 to the project, and some $750,000 in assets have been offered by the U. of Detroit, Wayne U. and the Detroit Board of Education. An additional $750,000 is the goal of a popular subscription drive.

St. Louis School TV Office

ST. LOUIS Educational Television Commission has announced the opening of its new headquarters in a downtown office building. Mrs. Conrad Sommer, campaign chairman of the commission, said the offices' location is not connected with any of the cooperating agencies. Vhf Ch. 9 has been reserved by FCC for educational TV in St. Louis.

Churchmen Explore Sponsors To Combat Financial Plight

FEASIBILITY of commercial sponsorship for religious programs as a means of relieving the financial plight of religious broadcasters was examined last Tuesday by a panel of speakers at a session of the two-day annual meeting of the Broadcasting and Film Commission of the National Council of the Churches of Christ in the USA.

The discussion was part of a series held under the auspices of the commission on Tuesday and Wednesday in New York on its activities in the radio, television and film fields [B•T, March 2].

Dr. Ronald Bridges, executive director of the commission, explained that increasing costs compelled his organization to explore all possible methods of raising additional revenue. He noted that at present the various denominations financed approximately one-quarter of the commission's budget and the rest was contributed by listeners and viewers. He stressed that the commission's "traditional position" has been in opposition to commercial sponsorship.

Fellows' Speech

Harold Fellows, NARTB president, urged that the commission consider commercial sponsorship for programs stressing "broad spiritual messages and values." He agreed that programs of the preacher-type and those concerned exclusively with a specific denomination would not lend themselves to commercial sponsorship.

A panel discussion on contents of religious and TV programming reached the conclusion that broadcasters must endeavor to reach the audience that "does not go to church and does not regularly listen to religious programs."

Panel participants were: George Crothers, CBS director of religious broadcasts; Ruth Trexler, ABC director of religious and women's programs; Marilyn Kaemmerle, NBC supervisor of religious programs and educational features; Dorothy Kemble, MBS director of religious programs, and Doris Ann, NBC-TV supervisor of religious programs.

New officers of the commission elected Wednesday were: Dr. Clayton T. Griswold, chairman, replacing Dr. Truman B. Douglass; Rev. John M. Alexander of Atlanta, and George W. T. Renneisen of Philadelphia, vice chairmen; Mrs. Jessie Bader, secretary, and Paul F. Ely, associate treasurer.

TV Is Seen as Aid

IDEAL of a great educational institution —superior teachers and few students for each teacher—may be nearer than is believed with the advent of television. That is the attitude of Dr. Henry Chauncey, president of the Educational Testing Service of Princeton, N. J., a leading exponent of the "master teacher" plan.

How TV might revolutionize educational techniques was discussed by Dr. Chauncey in the 1952 annual report of the Educational Testing Service published recently.

Calling attention to the grave teacher shortage in the U.S.—52,600 below minimum standards and 120,000 short of desirable standards—Dr. Chauncey urged that teaching jobs be reorganized so that specialized skills of the better teachers might be utilized to greater advantage.

Instead of three teachers, Dr. Chauncey believes one "master" teacher with the aid of a clerical assistant and honor students can accomplish the same thing.

Referring to the 242 noncommercial TV channels reserved for educational use, Dr. Chauncey warned that much of the potential value of these frequencies might be lost unless plans for their use "take into account the possibility of fundamental reorganization of the entire structure of elementary education, rather than limiting itself to the question of how best to fit educational television . . . into the existing structure."

Upcoming Events

March 9-12: Canadian Assn. of Broadcasters annual convention, Mount Royal Hotel, Montreal.

March 12: FCC appears before House Interstate & Foreign Commerce Committee, New House Office Bldg., Room 1334, 10 a.m.

Legal counsel Wilkinson, Boyden & Cragun, Washington. Consulting Engineer Vandivere, Cohen & Wearn, Washington. Principals include President **A. W. Schweider** (7.3%) and Vice President **Guy A.**

Husband and wife situations against whimsically sketched backdrops dramatize the theme, "Pour a smile for breakfast", in a new series of 1-minute TV spots for Manor House Coffee. Sell and product identification are cleverly united in a closing in which the can slowly revolves to show its rear panel message, "Behind every can 100 years of experience." Produced by Sarra for W. F. McLaughlin & Company through Earle Ludgin & Company

SARRA INC.

Applications Amended

Missoula, Mont.—Mosby's Inc. Request amendment of application to change ERP from 12.49 kw visual, 6.24 kw aural to 11 kw visual, 5.5 kw aural; antenna height above average terrain from 2317 ft. to minus 687 ft.; change type antenna; transmitter location from On Pattee Peak, 4 mi. S by E of Mossoula, Mont. to 127 E. Main St., Missoula, Mont.; and other equipment changes. (BPCT-829).

Greenville, N. C.—Carolina Bcstg. System Inc. Request amendment of application to change antenna height above average terrain from 856 ft. to 858 ft.; change studio location from N side of U. S. Hwy. 264, 3.9 mi. SW of Greenville, to South Evans St., extended, 2 mi. S of Greenville. (BPCT-898.)

Las Vegas, Nev. — Southwestern Pub. Co. Amends its application to request vhf Ch. 2, Henderson, Nev. (See Applications.)

Milwaukee, Wis—Wisconsin Bcstg. System Inc.

Texas
$50,000.00

A very successful fulltime network facility. The only station covering two rich agricultural counties. Combination operation—consistent profit growth. An ideal property for two partners.

Texas
$150,000.00

A profitable fulltime independent located in one of the great Texas markets. This station has a steady record of solid growth. It is now operating under absentee ownership and continuing to show increases both in gross billing and net profits.

(BAL-1486 and BALRE-131.) Granted Feb. 5.

Routine Roundup . . .

February 26 Decisions

BY COMMISSION EN BANC

Advised of Hearing

WCUE Akron, Ohio, Akron Bcstg. Co.—Is being advised that application (BP-8478) to increase power and hours of operation from 1 kw D to 500 w N, 1 kw-LS DA-2, unl., indicates necessity of hearing in view of objectionable interference involved to proposed operation, and for failure to provide adequate service to city and metropolitan district in accordance with Commission standards.

Andrew B. Letson, Ocala, Fla.—Is being advised that application (BP-8574) for AM on 900 kc 1 kw D indicates necessity of hearing in view of borderline interference involved with station WSWN Belle Glade, Fla., and latter's petition to deny grant.

WRNO Orangeburg, S. C., WRNO Inc.—Is being advised that application (BP-8500) to change facilities from 1450 kc to 1150 kc, increase power from 250 w to 500 w N, 5 kw-LS, install new trans. and DA system, and change trans. location, indicates necessity of hearing in view of objectionable interference both day and night to proposed operation.

KYAK Yakima, Wash., Yakima Bcstg. Corp.—Is being advised that application (BP-8513) to change frequency from 1400 to 1390 kc, increase power from 250 w to 1 kw, install new trans., using same DA-DN, indicates necessity of hearing because of objectionable nighttime interference that would be caused to KGER Long Beach, Calif.

Designated for Hearing

Martin County Bcstg. Co., Stuart, Fla.—Designated for hearing application (BP-8185) for new AM on 1450 kc 250 w unl.; made WWPB Miami, Fla., party to proceeding.

Clinton Radio Advertising Co., Clinton, S. C.—Designated for hearing application (BP-8204) for AM on 600 kc 500 w D; made WSJS Winston-Salem, N. C., party to proceeding.

Madera Bcstg. Co. Inc., Madera, Calif.—Designated for hearing application (BP-8487) for new AM on 1230 kc 100 w unl; made KRDU Dinuba, Calif., KERO Bakersfield, and KWG Stockton, Calif., parties to proceeding.

Petition Denied

WJWL Georgetown, Del., Rollins Bcstg. Inc.—By memorandum opinion and order, denied petition requesting waiver of Sec. 3.25(d) of rules to permit WJWL to increase power from 1 kw to 10 kw D on 900 kc, and dismissed said application.

ACTIONS ON MOTIONS

By Comr. Rosel H. Hyde

Continuance of Hearing

Chief, Broadcast Bureau—Granted petition for continuance of hearing from March 2 to April 22, 1953, in proceeding re application of Diamond H Ranch Bcstrs. (KDIA), Auburn, Calif. (Docket 10405 BR-2544).

Petition Granted

Denver Television Co., Denver, Col.—Granted petition for extension of time to March 10, 1953, to file exceptions to initial decision released in proceeding re application (Docket 10240 BPCT-951) and that of Aladdin Radio & TV Inc., Denver, Col. (Docket 9041, BPCT-426).

Harmco Inc., Sacramento, Calif.—Granted petition for dismissal without prejudice of application for CP for new TV (Docket 10295 BPCT-975).

WTNJ Trenton, N. J., WOAX Inc.—Granted petition requesting acceptance of late filing of notice of intention to appear and participate in proceeding re application of Key Bcstg. System Inc., Bay Shore, N. Y. (Docket 10379 BP-8422).

WJLK Asbury Park, N. J., Asbury Park Press—Granted petition to intervene in proceeding re application of Key Bcstg. System, Inc., Bay Shore, N. Y. (Docket 10379, BP-8422).

William O. Barry, Lebanon, Tenn.—Granted petition for dismissal without prejudice of his application for CP (Docket 10375, BP-8161) (Action 2/24).

By Hearing Examiner Hugh B. Hutchison

Petition Denied

Garden State Bcstg. Co., Atlantic City, N. J.—By memorandum opinion and order denied petition to reopen record for certain purposes in proceeding re application (Docket 10120, BP-8112); on Commission's own motion record of hearing was reopened for limited purpose of affording Mr. Albert Spiro opportunity to give additional testimony regarding personal finances,

February 27 Decisions

BY COMMISSION EN BANC

Petition Denied

KCUL Fort Worth, Tex., East-West Bcstg. Co.—Denied petition for reconsideration and grant of amended application (BML-1474) to specify operation on 1540 kc 50 kw D, 5 kw N, which is in conflict with NARBA. Commissioner Bartley issued the following dissent: "I favor a grant of this application since it complies with the Commission's Rules and Regulations. Indeed, a grant of this application would reduce the interference now experienced to other stations' service areas. Faced with this situation, it is clear to me that the Commission should either (1) grant or (2) take action which would give the applicant recourse to the courts to determine whether the Commission's action is arbitrary."

Request Information

Medford Bcstg. Co., Medford, Ore.—Is being requested to furnish additional information in connection with application (BP-8561) for new AM on 1540 kc 1 kw unl., in view of failure to protect 1-B assignment in Waterloo, Iowa, and excessive population between the normally protected nighttime contour and RSS nighttime limitation contour. Commissioner Bartley stated: "I concur in the Commission's action herein taken since this proposal would violate the Commission's rules and result in excessive nighttime interference."

February 27 Applications

ACCEPTED FOR FILING

FCC's 'Strike' Opportunity

FOR WEEKS the FCC has been saying it will act on the TV "strike application" blight if someone will come forward with a *bona fide* complaint. It has an investigator in the field checking on purported "black-mail" in at least one case.

The FCC now has an opportunity to act. WCYB Bristol Va., last week filed with it a petition alleging that WOPI Bristol Tenn., has pending an application of the "strike" class. It asks for a conditional grant of Ch. 5, to be followed by a comparative hearing. WCYB recognizes that it assumes the risk that the conditional grant may later be withdrawn.

We don't know what the merits are. But we do feel that this is precisely the kind of case the FCC says it has been awaiting. It should call a swift hearing, *en banc*.

Ford, Freedom & Fantasy

SOME DAY an interesting study might be made of what happens to those bureaucrats who are departing Government because of the change in administration.

In the sphere of communications regulations, not much has happened, since the new administration hasn't yet reached the FCC level. But there are a couple of cases worth noting. For instance, the case of Dallas Smythe, former FCC economist who was regarded as the walking delegate for the CIO on the FCC staff. He is now with the U. of Illinois, but has done a number of odd jobs for the Joint Committee on Educational Television, for the predetermined purpose of poking a finger in commercial television's collective eye.

Then there's the case of Earl Minderman, who served for years on the FCC as the ghost writer and hatchet man for sundry New Deal-Fair Deal chairmen. He resigned recently to turn up with the National Citizens Committee for Educational Television, a companion organization to JCET and also underwritten by the Ford Foundation's Fund for Adult Education. JCET is described as a "lobbying outfit" by no less an authority in so-called "liberal" circles than *The Nation*.

'Tis rumored that when FCC Chairman Paul A. (Pappy) Walker retires from the FCC almost any day now, he likewise will find himself a niche with JCET. Actually they couldn't do better, since he sincerely believes in simon pure, non-commercial educational TV.

What mystifies us is the extent to which the Ford Foundation has gone into educational television, evidently prepared to pour many millions into these starry-eyed projects. It has study groups at work on various aspects of non-commercial television. Such notable anti-commercial names as Charles I. Siepmann and Robert K. Hutchins are whispered as being identified with a new TV project, to be heavily endowed by Ford.

It is hard to reconcile this sort of approach with the name of the man in whose memory the foundation was established. Henry Ford was a rugged individualist, a free enterpriser who ran $30,000 into a mul' billion dollar empire. A project geared toward government in th' usiness of broadcasting (how else can it be appraised) certainly oes violence to every thought nurtured by Henry Ford in his life-t' .

Well Done! Second Time

FOR THE second time in a generation, Col. Ed Kirby returns from military service. He hangs out his shingle in Washington as a public relations consultant—a field in which he has specialized since he served as NAB's (now NARTB) first public relations director 15 years ago.

In World War II, Col. Ed—a VMI graduate—was instrumental in setting up policies and procedures as radio went to war for the first time. There was then ominous talk of the military taking over all communications—broadcasting included. It didn't happen. Radio became the fifth military arm. It emerged with the plaudits of all.

In that picture was Col. Ed. He knew radio and he knew the military. He was the catalyst in blending their operations.

Drawn for BROADCASTING • TELECASTING by Sid Hix

". . . in case there is someone among you who doubts one word of the claims I make for this product . . ."

When Korea erupted on June 25, 1950, Col. Ed was immediatel called back into service to reactivate the Army's closed-down radi operations—with TV added. The operation didn't miss a beat. He leaves behind an efficient staff geared to work with the broadcasters, advertisers and their agencies. His successor is Lt. Col. Tom Mathews, who had served as second in command.

Col. Ed returns to private business with the well-earned appreciation of the Army and of broadcasters and telecasters everywhere for a job well done—the second time.

Business Begins at Home

THE PRESENT trend toward more economy in government and the consequent reduction in expenditure for defense and unemployment creates a problem of maintaining an expanding national economy which must be solved during the coming 12 months.

Authorities on this subject see a solution in advertising and aggressive selling of consumer goods. Arno H. Johnson, vice president and director of media and research for J. Walter Thompson Co., New York, argues that there is a lag between *actual* production and what *can* be produced by the nation's factories. If production goals can be set one-third higher, says Mr. Johnson, the country can enjoy a 10% increase in both standard of living and production of goods and, at the same time, meet all defense requirements.

Obviously such a course involves selling the consumer goods so created.

Here is a challenge which the broadcasting media can well take up. For it is at aggressive selling that both media excel.

But the broadcaster can't sit back and wait for his network or his trade association to take the initiative. Creating a market for consumer goods begins at the local level—in the homes of the prospective final purchasers of the refrigerators and television sets, the new furniture and the air conditioners.

A great majority of such advertising is purchased by the local merchant. It is up to the station time salesman to present to him the proof that radio and television can sell his goods.

Then the individual broadcaster must see that his station is presenting this message skillfully and forcefully so that each of these dealers is convinced that radio and television offer the most sales for every advertising dollar.

HEAR THE "BEAT"

OF THE HEART OF AMERICA!

How would you like a locally produced noon-hour program with a stronger "Pulse"-beat than Arthur Godfrey? And that is no reflection on the Red Head. As a matter of fact, Godfrey's hour-and-a-half on KMBC is number six in popularity, according to Kansas City's First Pulse Survey (November-December 1952). *But*, the 12:00 to 12:15 time segment on KMBC, (News with John Farmer and Feed Lot Chats with Phil Evans) is in *THIRD* place among the daytime shows in Kansas City. What's more, the entire noon hour, twelve 'til one, is actually tied with Godfrey for sixth place in the Pulse Survey.

This unbelievable acceptance of KMBC local programming has great significance. It represents listener confidence in KMBC know-how and reliability--a thing that has been a-building in the Heart of America for thirty-one years.

Likewise the top ratings enjoyed hour-after-hour by The KMBC-KFRM Team, in rural as well as in metropolitan areas, is an indication of the success which lies in the combination of good local programming coupled with CBS Radio programming. The KMBC-KFRM Team has the formula that draws and holds listeners. The Team also has the formula for selling these loyal listeners the products and services of KMBC-KFRM advertisers. It's a fact! To sell the whole Heart of America, wholeheartedly, it's The KMBC-KFRM Team!

Write, wire or phone KMBC-KFRM, Kansas City, or your nearest Free & Peters office, for the "Pulse" story and for availabilities!

The **KMBC-KFRM** *Team*

Go where there's GROWTH...

Steel mills grow fast in farm-rich Kentucky!

Yes, Kentucky—the state that leads the nation in farm income gains . . . is booming in *steel production,* too. At Owensboro, Green River Steel Corp. is building a new $14,500,000 plant. Newport Steel Corp. is expanding its Wilder plant by $22,460,000. And Armco Steel is spending $36,000,000 in plant expansions at Ashland. Kentucky's 1939 production of all primary metals totaled $45 million. The 1951 production soared to $218 million!

Go where there's GROWTH...

GO WHAS!

No other station—or group of stations—in this market can match the audience delivered by WHAS seven days a week; morning, afternoon and night.

DESPITE ANOTHER week of silence on FCC chairmanship, elevation of Rosel H. Hyde is still regarded imminent. No word forthcoming since Mr. Hyde had half-hour audience with President Eisenhower March 6. It's thought that administration seeks graceful retirement of Democratic Chairman Paul A. Walker prior to announcement in order to enable it to fill both commissioner vacancies (Chmn. Walker and Eugene H. Merrill, Utah Democrat) coincident with Mr. Hyde's elevation. If Walker move fails, he might be allowed to remain until completion of his term June 30.

★ ★ ★

MEANWHILE speculation persists on FCC vacancies. Those most prominently heard are Charles Garland, KOOL Phoenix, and J. Paull Marshall, attorney and member of Maryland House of Delegates. But there's still thought that one of the two new members will be a common carrier expert and in this regard such names as Wisconsin Public Utility Commission Chairman John C. Doerfer, and Jerome K. Kuykendall, chairman of Washington Public Service Commission, are mentioned.

★ ★ ★

PURCHASE OF KULA Honolulu for $300,000 by group headed by William B. Dolph, executive vice president of American Broadcasting Stations Inc., consummated in Los Angeles last Friday. Dolph group expected to include stockholders in KJBS San Francisco and WEMP Milwaukee. Purchase, subject to usual FCC approval, is from A. L. Glassmann, Utah broadcaster (KALL Salt Lake City, KLO Ogden) 40%; Robert H. Hinckley, AB-PT Washington vice president, 32%; Jack A. Burnett, KULA manager, 16%, and Mayos of Rochester, Minn, 10%. KULA is applicant for Ch. 2 on which there is contest, but outlook is improved in light of KONA (TV)-KGU-KPOA transaction involving Chs. 4 and 11 (see page 63). Mr. Dolph and Herbert L. Pettey, his brother-in-law and formerly of WMGM New York, sail for Honolulu today.

★ ★ ★

TEXAS CO., New York (Texaco), which will drop its three-out-of-four sponsorship of Milton Berle show on NBC-TV (Tues., 8-9 p.m. EST) at end of this season, expected to remain in TV next year but on regional and spot basis. Meanwhile Buick Motor Co. and Kudner Agency (agency for both acounts) are negotiating on possibility of motor firm picking up rest of Berle shows next season. Buick now sponsors one of every four.

★ ★ ★

FCC, *en banc*, had another tooth and toenail session last Thursday on split ownership (time-sharing, marriages, etc., as well as multiple ownership in TV and overlap). Comr. Eugene H. Merrill carried ball for stringent policy changes but FCC proceeded to approve Rochester TV half-time applications of WHEC-WVET on Ch. 10 by 3-2 vote, with Chmn. Walker and Comr. Merrill voting to defer action.

★ ★ ★

MEDIA DEPT. of Ted Bates Inc., New York, understood to be re-evaluating its clients' radio and television budgets on basis of Nielsen Coverage Service.

★ ★ ★

FIRST INVESTIGATION by FCC of alleged "blackmail" in seeking to block unopposed TV grant understood completed with report due to be submitted to FCC within fortnight. Robert D. Leahy, FCC's top field investigator, was assigned task which carried him half-way across country from Arkansas to Nevada. Identity of parties won't be revealed until FCC formally takes action, which may see automatic grant of "blocked" applicant, with Dept. of Justice consulted on possible prosecution.

★ ★ ★

CARTER PRODUCTS, N. Y., through Ted Bates Inc., signs to co-sponsor *The Plainclothesman* on DuMont, Sun., 9:30-10 p.m., with Larus & Bro., effective April 1. Budget came from cancellation of Drew Pearson show on same network [B•T, March 9].

★ ★ ★

DREW PEARSON, since cancellation of ABC network show, considering syndication of weekly commentary for national distribution via tape. He is checking possibilities following reported inquiries that his show be continued. He has previously broadcast live network only.

★ ★ ★

AT LEAST one network—CBS—has come forward to refute charges that it looks with disdain upon uhf TV and is interested only in aligning vhf affiliates. Data presented to FCC last week informally indicates that since lifting of freeze and resumption of licensing last June, that network has aligned 26 vhf affiliates, 18 uhf affiliates and has working arrangements with four additional uhf's.

★ ★ ★

BROADCASTERS may want to take second look at Rep. Cliff Clevenger's (R-Ohio) suggestion that private broadcasters could do better, cheaper job handling Voice of America projects. He would abolish VOA [B•T, March 9]. Significance: Rep. Clevenger is chairman of House subcommittee on State Dept. appropriations, including Voice.

★ ★ ★

FCC SPENT last Thursday afternoon concocting proposed response to Feb. 20 letter from Chmn. Tobey of Senate Interstate Commerce Committee on what goes with color. Surprise was that letter previously hadn't been brought to attention of FCC by chairman's office until release last weekend of letter of Sen. Ed Johnson (D-Colo.), former chairman of committee, charging hinder and delay tactics in color TV (see page 50). Likely there will be more than one response, because of varying views of members.

March 20: Indiana Broadcasters Assn., Columbia Club, Indianapolis.

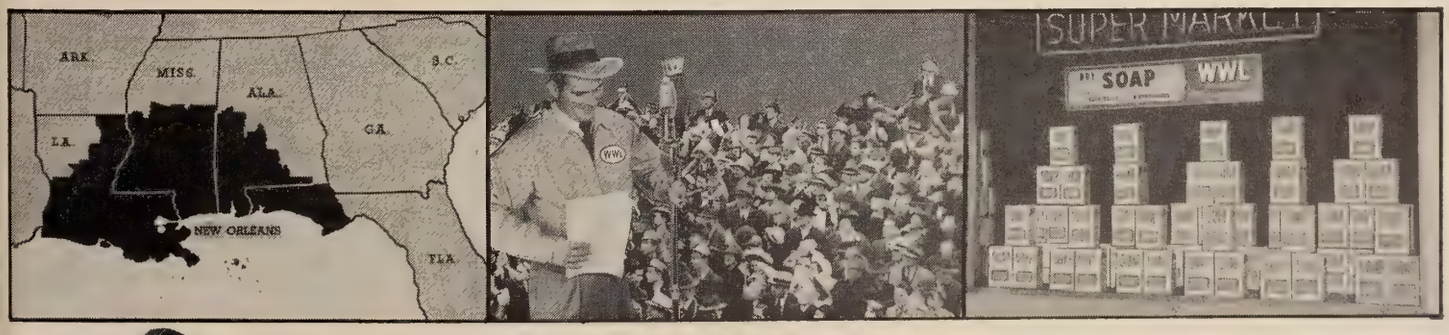
March 21: Michigan Radio-TV Newsmen organizational meeting, Michigan State College, Lansing, Mich.

March 22: Electronic Manufacturers (with government contracts) meet under RTMA Technical Products Div. sponsorship, Roosevelt Hotel, New York.

March 23-26: Institute of Radio Engineers Annual Convention, Waldorf-Astoria Hotel, New York.

(For other Upcomings, see page 104)

For 30 Years
SOAP
WWL



WWL Has Been Selling Soap to More Southerners Than Any Other Advertising Medium!

Look what your advertising dollar buys on WWL:

Coverage unsurpassed in the deep South—intensive coverage over 4 states. More coverage than any other medium South can offer—in an area rich with new industry, and **still unquestionably radio dominated.**

The lion's share of Southern listeners—built up over a period of 30 years through excellent programing, featuring nationally known CBS stars and outstanding personalities of the South. **Verified by highest ratings.**

A liberal bonus of advertising extras—store displays, 24-sheet posters, streetcar and bus dash signs, newspaper ads, personal calls on jobbers and distributors. **No other station South gives advertisers such all-out support.**

LET WWL, *the South's Greatest Salesman,* SELL THE SOUTH FOR YOU!

House Committee Will Probe Color TV

COLOR TV will be subject of hearing by House Commerce Committee, Chairman Charles A. Wolverton (R-N. J.) announced Friday. No date set but hearing will begin "as soon as we can get to it," Mr. Wolverton said. He made announcement during hearing by committee with FCC (see story below). House hearing will be held whether or not Senate Commerce Committee does same, New Jersey congressman said. He declared there was no thought of joint hearing. Senate Committee Chairman Sen. Charles W. Tobey (R-N. H.) said he would conduct color-TV hearing following public letter from Sen. Edwin C. Johnson last week (see story page 50).

Status of color-TV received rapt attention of House members when FCC Chairman Paul A. Walker, in answer to questions, recounted its history. Mr. Wolverton made his statement on calling hearing, following Mr. Walker's recitation. Mr. Wolverton said:

"The House committee feels that the public should be advised as to where we are on color television. Color standards were set by the FCC, but yet there is no color television for the home. What is withholding it from the market?"

Meanwhile, Paul Raibourn, Paramount Pictures executive in charge of television, in response to Johnson charges that advent of color TV was being stymied by manufacturers, said that color video is already here as far as he was concerned. He said NPA order barring mass production of color TV receivers (M-90) was only thing holding up commercial production of Lawrence tri-color tube. Lawrence tube is product of Chromatic Television Labs., half-owned by Paramount. From other sources it was learned NPA has considered revoking M-90, but no decision has been reached.

NEW NARTB DIRECTORS

NINE new faces to appear on NARTB Radio Board starting with Los Angeles convention April 28-May 1 following elections completed late Friday [B•T, March 2, Feb. 16].

Final results of odd-numbered districts and at-large voting showed these directors elected: 1, Herbert L. Kreuger, WTAG Worcester, Mass.; 3, George H. Clinton, WPAR Parkersburg, W. Va.; 5, John Fulton, WGST Atlanta; 7, F. Ernest Lackey, WHOP Hopkinsville, Ky.; 9, Hugh K. Boice Jr., WEMP Milwaukee; 11, John F. Meagher, KYSM Mankato, Minn.; 13, Kenyon Brown, KWFT Wichita Falls, Tex.; 15, William D. Pabst, KFRC San Francisco; 17, R. M. Brown, KPOJ Portland, Ore.; large stations, John H. DeWitt Jr., WSM Nashville; medium, G. Richard Shafto, WIST Charlotte, N. C.; small, Edgar Kobak, WTWA Thomson, Ga.; FM, Ben Strouse, WWDC-FM Washington.

Re-elected were Messrs. Kenyon Brown, DeWitt, Kobak and Strouse. Unopposed were Messrs. Lackey, Boice, Kenyon Brown and R. M. Brown. Messrs. Meagher and Shafto have served on board in past years.

Repurchase of KING Stock

REACQUISITION by Mrs. A. Scott Bullitt of 25% stock ownership of Hearst Radio Inc. in King Broadcasting Co. (KING-AM-FM-TV Seattle) for $450,000 cash consummated last Friday. Hearst Radio Inc., in June 1951, had purchased interest for $375,000. Mrs. Bullitt is president of KING. Otto P. Brandt, vice president-general manager, announced repurchase.

BUSINESS BRIEFLY

BUY RADIO PARTICIPATION • General Foods, for its Minute-Tapioca, preparing 52-week campaign of one-minute spots in participation shows in radio, three times weekly, starting April 1 in 35 markets. Agency: Young & Rubicam, N. Y.

SPOTS FOR ICE CREAM • Good Humor Co., through David Mahoney (see story page 28), will be buying radio-TV spot announcement campaign to start mid-May in eight markets for ten weeks.

SPORTS ADJACENCIES • Melba & John Ruskin Cigars, through Lewis Adv., Newark, planning to use spot announcement radio campaign around baseball broadcasts and sport feature programs, three times weekly.

SCHLITZ DRIVE • Jos. Schlitz Brewing Co. preparing one-minute radio spot announcement campaign for 26 weeks, starting April 1 in 20 markets. Agency: Lennen & Newell, N. Y.

SEEK 'MALARIA MARKETS' • Monticello Drug (666 malaria preparations), through Charles W. Hoyt, N. Y., planning spot radio campaign southern "malaria markets" starting late in May or early June and using 52 spots on each station.

BELTONE ONE TIMER • Beltone Hearing Aid Co., Chicago, sponsoring March 25 broadcast (one-time only) of *Life Begins at 80* over ABC Radio, 8:30-9 p.m. EST. Agency: Olian & Bronner, Chicago.

FLOWER FIRM ON CBS • Jackson & Perkins Co., N. Y. (roses and chrysanthemums), in addition to spot activity in 100 markets (see story page 28), effective April 19 will sponsor Galen Drake program on CBS Radio, Sun., 1-1:15 p.m. Agency: Maxwell Sackheim & Co., N. Y.

COMMON CARRIER QUESTION RAISED

COMMON CARRIER concept of broadcasting broached Friday during resumption of House Commerce Committee hearings with FCC. Subject raised by Rep. Charles A. Wolverton (R-N. J.), chairman of House committee, who stressed he was not advocating it, but was raising questions. Commission first appeared before lower House group last month [B•T, Feb. 23].

Rep. Wolverton appeared to find parallel between such utilities as railroads, transit companies, and other public service firms and broadcasters. He referred to his belief broadcasters received monopoly when they received grant. He wondered if Commission should not be given power to ensure equal opportunity for competing advertisers on same station, also to enforce equality of rates charged by broadcasters to advertisers.

FCC Chairman Paul A. Walker stated that under law broadcasting is not public utility and Commission has no jurisdiction over rates or advertising policies.

Rep. Wolverton said he would submit further questions to FCC in writing. He told reporters they would deal with newspaper ownership, TV allocation plan among other things.

Questions from other Congressmen and answers from Mr. Walker and staff members indicated:

1. Commission has not formulated any plans to extend educational TV reservations.

2. Although Mr. Walker personally believes networks should be licensed, Commission as whole believes network situation should be investigated by Congress or itself, after which some type of network regulation might be recommended.

3. Clear Channel case—and daytime skywave applications—stymied so long because new NARBA has not been ratified by Senate.

4. State Department did not consult with FCC regarding location of West Coast Voice of America transmitter, although it did advise Commission when requesting license.

5. In clarification of inferences drawn from his Feb. 20 questions, Rep. William L. Springer (R-Ill.) enunciated his feelings that Commission should look askance at newspaper and theatre ownership of radio and TV, if combination resulted in monopoly in community [B•T, March 2].

6. Other subjects touched upon were: High prices paid for purchases of TV stations, high costs of TV hearings, subscription TV and transitcasting, and trafficking in licenses.

Pabst to Expand To 100 Television Stations

PABST BREWING CO. expects to extend coverage of *Blue Ribbon Bouts* from present 66 to 100 TV stations by end of year. Forrest L. Fraser, Pabst vice president, announced Friday. He said lifting of freeze by FCC will enable company to "achieve broader saturation of TV areas if all goes according to plan." Pabst anticipates expansion because of popularity of televised Wednesday programs.

Davis Group Buys WELI Control from Wilder

RICHARD W. DAVIS, general manager of WELI New Haven, together with other long-time station personnel and local citizens have purchased some 17,300 shares of WELI stock (controlling interest in station) from Col. Harry Wilder and other New York stockholders at par price of $10 a share, or about $173,000. Col. Wilder, now WELI president, will be retained as consultant, Mr. Davis said. Transfer is subject to FCC approval.

Mr. Davis previously owned 2,479 shares of 25,457 issued and Mr. Wider owned 9,043.

Nunns Relinquish WBIR Control; Other FCC Actions

SALE of controlling interest in WBIR-AM-FM Knoxville, Tenn., by Gilmore N. Nunn and father, J. Lindsay Nunn, disclosed in transfer application reported by FCC Friday. Gilmore Nunn reduces holdings from 52% to 30% while Lindsay Nunn sells entire 23% for total $65,000-plus to Radio Cincinnati Inc. and Mr. and Mrs. Robert Ashe. Taft-family owned Radio Cincinnati, licensee WKRC-AM-FM-TV Cincinnati and sole owner WTVN (TV) Columbus, Ohio, increases holding in WBIR from 20% to 30%. New to radio, Ashes acquired 30%. WBIR seeks vhf TV Ch. 10. Lindsay Nunn, founder WDAG Amarillo, Tex., on May 16, 1922, to retire as chairman of board. Hulbert Taft Jr., Radio Cincinnati executive vice president, to become WBIR president while Gilmore Nunn, president, switches to vice presidency.

Protest Share-Time in Rochester

Protest of share-time grants on Ch. 10 at Rochester to WHEC and WVET wired to FCC by Gordon Brown, owner WSAY there. Mr. Brown contends FCC acted too fast on share-time bids, on file one week, not giving time for filing of his Ch. 10 request. Hearing is asked.

Details on New Permits

Full details reported by FCC Friday on 17 of 29 permits for new TV stations announced earlier in TV actions (see story page 42):

Birney Imes Jr. (WCBI), Columbus, Miss.—Ch. 28; ERP 210 kw visual, 115 kw aural; antenna 470 ft.

Frank E. Hurt & Sons (KFXD), Nampa, Ida.—Ch. 6; ERP 19.5 kw visual, 9.8 kw aural; antenna 2,250 ft.

Peninsula Bcstg. Co. (WBOC), Salisbury, Md.—Ch. 16; ERP 110 kw visual, 60 kw aural; antenna 400 ft.

Forest Capital Bcstg. Co. (KTRE), Lufkin, Tex.—Ch. 9; ERP 11 kw visual, 5.6 kw aural; antenna 670 ft.

Valley Electric Co. (KVEC), San Luis Obispo, Calif.—Ch. 6; ERP 20 kw visual, 10 kw aural; antenna 790 ft.

Fort Myers Bcstg. Co. (WINK), Fort Myers, Fla.—Ch. 11; ERP 9.6 kw visual, 4.8 kw aural; antenna 320 ft.

Golden Empire Bcstg. Co. (KHSL), Chico, Calif.—Ch. 12; ERP 12.3 kw visual, 6.2 kw aural; antenna 400 ft.

Turner-Farrar Assn., Harrisburg, Ill.—Ch. 22; ERP 10.5 kw visual, 5.5 kw aural; antenna 510 ft.

Shenandoah Valley Bcstg. Corp. (WSVA), Harrisonburg, Va.—Ch. 3; ERP 12.5 kw visual, 6.3 kw aural; antenna 1,750 ft.

John Steventon, Yuba City, Calif.—Ch. 52; ERP 91 kw visual, 46 kw aural; antenna 170 ft.

New TV Applications, Amendment

FOUR new TV applications and one amendment to change channel request filed late last week at FCC:

San Jose, Calif.—John A. Vietor, uhf Ch. 48, ERP 110 kw visual, 60 kw aural, antenna height above average terrain 2,557 ft. Estimated construction cost $216,530, first year operating cost $255,000, revenue $275,000. Applicant holds interest in T.B.C. Co., applicant for vhf Ch. 10 San Diego.

Augusta, Ga.—Augusta TV Co., vhf Ch. 12, ERP 62 kw visual, 37 kw aural, antenna 552 ft. Construction $175,000, operating $200,000, revenue $260,000. Owner is J. I. Sims, president and 25% owner WTND Orangeburg, S. C.

Champaign-Urbana, Ill. — Champaign-Urbana TV Inc., uhf Ch. 21, ERP 16 kw visual, 8.69 kw aural; antenna 736 ft. Construction $205,342, operating $150,000, revenue $150,000. Principals include President and Treasurer Norman E. Blankman (39%), realtor, New York; Secretary Duncan M. Findlay (17%), realtor, New York; Vice President Alan A. Blankman (17%), realtor, Baltimore; Vice President Dallas W. Smythe (4%), economics professor, U. of Illinois, and consultant, Lutheran Church-Missouri Synod, grantee for uhf Ch. 30, Clayton, Mo.

Cadillac, Mich.—Sparton Bcstg. Co., vhf Ch. 13, ERP 302 kw visual, 141 kw aural; antenna 1,439 ft. Construction $469,014, operating $265,440, revenue $290,000. Owner is Sparks-Withington Co., Jackson, Mich., manufacturer of TV cabinets and auto parts.

Indianapolis, Ind.—Empire Coil Co. amends application from uhf Ch. 26 to uhf Ch. 67.

Three Changes Granted

Three existing stations granted changes:

WBCK-TV Battle Creek, Mich., uhf Ch. 58, granted change of ERP from 18.5 kw visual, 9.3 kw aural to 20.5 kw visual, 10.5 kw aural; antenna height above average terrain 580 ft.

WDAY-TV Fargo, N. D., vhf Ch. 6, granted change of ERP from 70 kw visual, 35 kw aural to 66 kw visual, 33 kw aural; change transmitter location. Antenna 392 ft.

WNAC-TV Boston, vhf Ch. 7, granted change of ERP from 26.6 kw visual, 13.3 kw aural to 220 kw visual, 110 kw aural; antenna 480 ft.

MT. WASHINGTON TESTS

AUTHORITY for temporary test transmissions from atop 6,288-foot Mount Washington, N. H., using part of vhf TV Ch. 8 (181.25 mc), granted by FCC Friday to Mount Washington TV Inc., applicant for new station which would use Ch. 8 with transmitter on that mountain peak. Tests, to be made with 200 w transmitter, are designed to obtain proof of proposed coverage, which Mount Washington TV Inc. claims would extend over 24,000 square miles with almost 1.5 million persons in three states, plus part of Canada. Test signals will not be capable of regular TV picture reception.

Canadians Vote to Fight For Rights of Independents

AGGRESSIVE BATTLE to obtain more rights for independent radio and TV stations and independent regulatory body will be waged by Canadian Assn. of Broadcasters. Winding up Montreal convention (early story page 92), CAB members recommended all stations treat political broadcasts on same terms and basis as commercial broadcasts, and government business same as other business.

Use of more BMI music on transcriptions and recordings was advocated. Convention backed BMI plan to encourage interest of Canadian composers in writing concert music. Members unanimously defeated, after long debate, motion to keep Communist political speakers off air.

F. H. Elphicke, CKWX Vancouver, elected CAB president. E. F. MacDonald, CJCH Halifax, N. S., elected vice president.

Elected directors were William Rea, CKNW New Westminster, B. C.; F. H. Elphicke, CKWX Vancouver, B. C.; Gerry Gaetz, CKRC Winnipeg, Man.; Hal Crittenden, CKCK Regina, Sask.; John Craig, CKX Brandon, Man.; Ted Campeau, CKLW Windsor-Detroit; Jack Davidson, CKGB Timmins, Ont.; J. Arthur DuPont, CJAD Montreal; Wally Slatter, CJOY Guelph, Ont.; Jean Paul Lemire, CKCH Hull, Que.; Henri LePage, CHRC Quebec; F. Baxter Ricard, CHNO Sudbury, Ont.; Malcolm Neill, CFNB Fredericton, N. B.; Finlay MacDonald, CJCH Halifax, N. S.

PEOPLE

Funeral services were held in Los Angeles yesterday (March 15) for **LOU R. WINSTON,** president of Radio Producers of Hollywood, and Gilwin Productions, Beverly Hills TV film production company. Pioneer Los Angeles transcription producer-distributor, he died in New York Wednesday following heart attack.

KENNETH CRAIG has assumed general charge of all WBBM-TV Chicago operations, H. Leslie Atlass, vice president of CBS and general manager of WBBM-AM-TV, announced. Mr. Craig has been executive assistant to Mr. Atlass. **BEN ORLOFF** named personnel director of stations.

WALTER PIERSON, manager of theatre and stage operations for CBS-TV, named production manager in Operations Dept. succeeding **E. CARLTON WINCKLER,** who becomes Program Dept. production manager (story page 70).

Sarnoff, Folsom Buy RCA Stock Under Option

BRIG. GEN. David Sarnoff, RCA chairman of the board, bought 100,001 shares of RCA common stock last month and Frank Folsom, president, bought 50,000 shares—both paying $17.75 per share, proxy statement sent last week to RCA stockholders reported. Both purchases made under options granted by RCA board Nov. 3, 1950, and $17¾ price was closing price on New York Stock Exchange Nov. 2, 1950. (RCA common closed at $26⅝ last Friday.)

Proxy statement, notifying stockholders of annual meeting May 5 in RCA Bldg., New York, also shows Gen. Sarnoff is highest paid employe, with salary of $200,000, followed by RCA president Frank Folsom, $165,000; Niles Trammell, NBC board chairman until his resignation Dec. 5, $93,011, plus $25,001 incentive compensation; Walter A. Buck, vice president and general manager, RCA Victor division, $75,000 plus $40,000 incentive pay; Charles B. Joliffe, vice president and technical director, $65,000 plus $20,000 incentive pay; Harry C. Ingles, president, RCA Communications, $35,010 plus $10,000 incentive pay. In February, RCA also entered into agreement with Gen. Sarnoff, extending his employment to Feb. 29, 1956, at his present rate of compensation.

KXOK-FM, Last FM Outlet In St. Louis, Going Off Air

ST. LOUIS will be left without commercial FM station when KXOK-FM ceases operating March 31. Spokesman for KXOK said discontinuance of FM is to provide time to study equipment requirements and to re-evaluate FM's economic future.

Long one of FM's stalwart defenders, station now is reviewing TV and other electronic developments. It is applicant for vhf Ch. 4 in St. Louis.

WLEX Asks Damages, Charges WVLK Ads False

DAMAGE SUIT for $55,000 filed in Fayette County Circuit Court by WLEX Lexington, Ky., against WVLK there, charging WVLK with "false" advertising on coverage and Hooper survey. This is believed to be first suit of its kind. WLEX charges WVLK misrepresented coverage and ratings in solicitation of local, regional and national business via sales brochure, posters and local newspaper ads. Restraining order to be argued in court Wednesday. WLEX is expected to file complaint with FCC this week.

of SPOT RADIO

by JONES SCOVERN
V. P. and Eastern Sales Manager

1 "Choice of Markets– One or Many"

List your best markets and you'll find that they're "all over the map" — geographically, population-wise, or by any other standard you choose.

Ditto on your reasonably good markets — and your poor ones.

Different manufacturers have differing strategies for building "more sales this year". Some choose to put on steam where the going's rough. Others, where there's already good momentum. Whatever *your* strategy, it points straight to the use of Spot Radio.

"National Spot" has many basic advantages, but the logical *first* is that it gives you complete and utter flexibility as to WHERE you advertise. With National Spot you spend your money only in the market or markets *you* want. Spot Radio is *beamed* radio, as contrasted with *umbrella* radio.

The best stations for Spot Radio are listed on the left.

our respects

to JOHN SAM FOUTS

ALTHOUGH the connection is less than direct, J. (for John) Sam Fouts' journalism and law degrees help him in his work as advertising manager of Larus & Brother Co., Richmond, Va.

Perspective and a diversity of approach in advertising campaigns, which cost the company more than $1 million yearly, come from editorial and legal training at the U. of Florida.

Mr. Fouts chose Florida for part of his education and radio training after spending most of his earlier years in Indiana. Born at North Manchester on March 14, 1916, he lived on a five-acre "farm" with his grandparents during elementary and high school days. He still returns occasionally to visit a brother, and is planning a three-week vacation there this summer with his entire family.

After graduation from high school, he studied at the International Business College in Fort Wayne, Ind., and then enrolled at the U. of Florida. From there he received a bachelor's degree in journalism in 1944 and a jurisprudence degree in 1947. To help finance his way through law school, he worked at WRUF in nearby Gainesville as program director, learning the intricacies of radio for the first time.

His law degree was postponed somewhat because of four years' service in the Air Force, from which he was released after 14 months in the Pacific.

Radio Start at WRVA

Upon return from the service, Mr. Fouts applied his practical radio experience to programming at WRVA Richmond, where he worked five years as continuity manager. The station job led to his present post, because WRVA was put on the air some 26 years ago by Larus & Brother Co., manufacturer of Holiday and Lords cigarettes, Edgeworth pipe tobacco and Holiday pipe mixture. Mr. Fouts joined the tobacco concern in July 1951 as assistant advertising manager, and more recently was named manager.

All of the Larus products are advertised on DuMont's *The Plainclothes Man,* which is telecast on 23 stations through Warwick & Legler agency, New York. The show has been sponsored continuously for the past two years, and this summer will share weekly sponsorship with Carter Products.

Lords and Holiday cigarettes are known as specialities in the tobacco trade, with Lords' advertising copy stressing the low nicotine content and Holiday plugged as the only cigarette with "mildly aromatic" tobacco, similar to that used in pipe tobacco.

Heavy Spot Schedule

The company uses a heavy spot schedule on its own station, and before buying its network show on television placed sporadic TV spot programming, primarily in the New York area. Mr. Fouts is enthusiastic about the success of Holiday pipe mixture, "America's fastest-growing aromatic pipe tobacco."

Mr. Fouts, who is the type of man who carries the "live and let live" attitude toward life into his job, has made many friends in the advertising field as a result.

Mr. Fouts is a member of Sigma Delta Chi, professional journalism fraternity; Phi Alpha Delta, legal fraternity, and the Sertoma Club of Richmond, a civic and social organization.

He and his wife, Kay, live in Highland Springs, a Richmond suburb. They have a son, John, 14, and two daughters, Sammie, 8, and Stefani, 4.

An enthusiastic gardener on the grounds around his new home, Mr. Fouts has bypassed temporarily another major hobby, writing musical compositions, of which three have been published.

Advertiser Attitude

Because Mr. Fouts' company splits tobacco and broadcasting activities completely, his interest in radio is completely that of a sponsor at this point, although he remembers his earlier microphone experiences with humor-laden nostalgia.

One of his more unusual assignments was to originate a 20-station network feed at WRUF Gainesville, covering the re-opening of Marineland, from which all marine life had been returned to the open sea during the war as a conservation measure.

Solving the reporting problem, he equipped a diver, who was to observe a shark at close-range, with a special microphone inside his helmet.

a New Television Station

...serving a vibrant, prosperous growing market

KTNT-TV

SERVING SEATTLE, TACOMA AND THE PUGET SOUND AREA

THIS IS THE PUGET SOUND MARKET COVERED BY KTNT-TV

- Puget Sound is an important industrial and distributing center for world-wide commerce
- Gateway to Alaska and the Orient
- Rich farm area
- World-wide importance in production of timber and lumber products
- Low-cost hydroelectric power is responsible for huge development in light metals industry
- Airplane manufacturing is big business in the Puget Sound area
- Population six-county area (1952) 1,336,700; families, 418,000
- The population growth is steady. (Seattle: 26.9% increase, 1950 over 1940; Tacoma: 30.7% increase, 1950 over 1940)
- Net Effective Buying Income per family much higher than national average
- Effective Buying Income of entire KTNT-TV area, $2,416,495,000

It takes only ONE to cover more than HALF

MORE THAN HALF of the population of Washington State is concentrated in six counties bordering Puget Sound. And all, or part of these six counties are served by Washington State's newest television station, KTNT-TV . . . Channel 11.

When we say "It Takes Only ONE to Cover More Than HALF", we are saying that in the KTNT-TV area is concentrated More Than Half the State's Population; More Than Half the State's Retail Sales; More Than Half the State's Effective Buying Income . . . and you can sell this prosperous market with only one TV station . . . KTNT-TV. Send today for Market Facts Booklet.

IN REVIEW

THE JOHNS HOPKINS SCIENCE REVIEW

DuMont, Mon., 8:30-9 p.m. EST.
Producer: Lynn Poole.
Assistants to producer: Robert Fenwick, Warren Wightman.
Director: Paul Kane.
Writer: Lynn Poole.

HIGHLIGHTS of past telecasts were reviewed for the 200th showing of *The Johns Hopkins Science Review*, Peabody Award winning series which originates weekly at WAAM (TV) Baltimore and is seen on the DuMont Television Network. The program entered its sixth year on March 9. Like most five-year olds, this one has a long way to go.

Ironically enough, those at the production helm decided on still pictures to recreate the high spots of preceding shows, a technique which hardly challenges the flexibility of the television medium in which this show is regarded as a pioneer. Still photographs were supplemented with abbreviated lectures and demonstrations by guest professors. A thread of narration delivered by Lynn Poole, producer and originator of the series, tied this up into a neat little package labeled *Education*.

Murky Terminology

The birthday telecast, in keeping with the overall tone of those which have gone before it, was short on imagination and long on terminology that the "average viewer" at his intellectual best would have to think twice about.

The show has placed limitations on itself. The fault does not lie primarily in the material but rather in the way that the material is passed on to the viewer. A man who wears a Phi Beta Kappa key is not necessarily a competent TV performer. He is not expected to be, except perhaps by those connected with *The Johns Hopkins Science Review*. To assume that a gentleman with a thick accent can hold the attention of an audience with a folksy demonstration of a cosmic ray something-or-other is assuming too much.

The story of the invention and development of plastics, and the uses which have been found for them, has dramatic possibilities if it is related by someone whose voice commands attention and who speaks meanings and phrases —not just words. Granted the scientist is in possession of all sorts of facts and technical data, but if he is unable to communicate these facts to a lay audience he has no place before a TV camera. If shedding light on scientific discovery is to go much farther than the WAAM (TV) studio, Mr. Poole ought to give this point some thought.

Rocket Trip

But one interesting thing did happen on this anniversary show which backs up the conclusion that there's room and indeed opportunity for improvement. Viewers got a look at the surface of the earth through the eye of a camera installed in a rocket flying 76 miles above the earth's surface. Ten to one the man who handled the narration so effectively on this portion of the show has never seen the inside of a rocket, but he was successful in arresting the attention of the man on the other side of the screen because of an awareness of one important fact: He was in a television studio, not a classroom.

The sooner the show in its entirety makes this adjustment, the better off it will be.

BOOKS

TWENTY-TWO TELEVISION TALKS, as transcribed from BMI TV Program Clinics. By 31 BMI TV Clinic speakers and guest speakers. Broadcast Music Inc., 580 Fifth Ave., N. Y. 260 pp. $6.

PROGRAMMING know-how of 22 of America's leading TV station operators was presented at three BMI TV program clinics held last year in New York, Chicago and Los Angeles. Nine guest speakers added their comments to the whys and hows of television programming at these sessions.

For TV station program directors who did not attend the BMI TV clinics, *Twenty-Two Television Talks* will provide much vital information, probably available nowhere else in such a handy and readable form.

Those TV station operators who did attend the clinics—but who are not too adept at note-taking—will find in this book all the important ideas presented at the clinics.

The book is made up of the transcripts of speeches, as recorded by BMI at the clinics.

The speakers—all well known in the industry—include A. A. Schechter, Don Tatum, Philip G. Lasky, Klaus Landsburg, Ted Cott, Ralph Burgin, Roger Clipp and more than a dozen television programming experts.

Although it would be more fun to actually hear the speeches as they were given, we think this presentation is quite palatable.

This book probably will be eagerly sought after by some of the 255 new television station grantees who have a construction permit and maybe even a transmitter—but who want to get some programming ideas, too.

* * *

UHF CONVERTER, Published by Howard W. Sams & Co., 2201 E. 45th St., Indianapolis, Ind. 44 pp. $1.

DESCRIBED as a "must" for a thorough understanding of uhf converters, this book gives the "know-how" on all popular converters on the market today—how they are designed and how they work.

Included is a detailed description of the operation of new uhf converters and tuners made by these manufacturers: Arvin, Crosley, DuMont, General Electric, Mallory, Motorola, RCA, Raytheon, Regency, Sarkes Tarzian, Standard Coil, Stromberg, Sutco and Sylvania. Publication is set for April 1.

Kicked Downstairs

EDITOR:

Recently a release was sent to you about Dody Sinclair whom I appointed head of merchandising and public relations for WJAR-TV, after his release from the Navy.

In the Feb. 23rd issue of BROADCASTING • TELECASTING, page 92, you published the above information, although my name was erroneously used. I appreciate your mentioning my name. However, I am somewhat embarrassed because this is a demotion! As you know, I am manager of WJAR-TV. . . .

Norman Gittleson, Manager
of Television Operations
WJAR-TV Providence,
Rhode Island

Footnote

EDITOR:

I hope your "Open Mike" is turned on to pick up the following information, which somehow got lost between Minneapolis and Washington. It was data intended for your "Big Push Polio" story . . .

With the cooperation of Harry Calevas, manager of the Hotel Radisson, Larry Haeg and the department heads produced one of the biggest "Dime" drives to raise polio funds for the Northwest. Our last minute effort was on the air Saturday, January 31st from 2-4 p.m., 5-6:30 p.m., and 9 p.m. to 1:30 a.m., direct from the lobby of the Radisson where the hotel people had constructed a gigantic stage.

All WCCO radio personalities (Cedric Adams, Bob DeHaven, Stew MacPherson, Ed Viehman, Allen Gray, Maynard Speece, Harlan Horton,) participated. Visiting celebrities included—the Governor, Twin City Mayors, sports personalities and numerous well-known state officials. Entertainers from Twin City nighteries were also on hand to promote the fund raising drive.

Here's how we collected pledges and contributions: A telephone network was set up in five states, involving more than 1,500 exchanges, to handle pledge calls from folks in 133 Northwest counties. A listener merely picked up the phone and asked for "Polio Party Line." The telephone call was channeled to one of 18 key points where March of Dimes volunteers accepted the pledge—and, after tabulation, the volunteers relayed the information to "Party Line" headquarters at the Radisson where members of the WAF's, stationed at a battery of phones, kept a county-by-county report for broadcast purposes.

We collected more than $33,800 in contributions and pledges . . .

More than $33,800 for eight hours of work isn't bad.

Fred Heywood
Manager
WCCO Minneapolis

First Class Female

EDITOR:

. . . It would be interesting to know how many women in the States hold down an engineering shift with a first class ticket. I work straight "combo" and feel that the field could absorb many more women than are now employed. Do I hear any "Ayes"?

Laura Chapin
WHBO Tampa, Fla.

Voice of Democracy

EDITOR:

Thank you very much for the three pages of valuable BROADCASTING • TELECASTING space which were filled so inimitably by Frank Beatty . . . when he wrote the story of the Voice of Democracy competition. Frank did his usual excellent job of telling what the competition is all about in understandable and down-to-earth language. The job is so good in fact that I am asking . . . if it will be possible for us to purchase some reprints, particularly for use in next year's promotion of the effort.

Robert K. Richards
Administrative Vice President
NARTB, Washington, D. C.

Educational TV

EDITOR:

. . . It seems to me your opposition to educational television is based to a considerable extent on three assumptions which I think you should submit to re-appraisals.

The first is the assumption that commercial and educational broadcasting must be incompatible and mutually harmful. During the 14 years that WNYE has been on the air in New York City I have had repeated occasion to deal with commercial broadcasters, both network and independent. Without exception these relations have been friendly and mutually beneficial. There has always been respect for the other man's problems and the job he was doing.

Your second assumption I disagree with rests upon the implication that because commercial television can give more time to education than can be used in 1953, it must follow that the same will be true when television grows up. The long view here is important.

The third assumption I challenge is that educational television stations would be socialistic or worse. Those who are haunted by the fear of educational television networks lack faith in American democracy. We have had a network of public schools from coast-to-coast for many years, and the products therefrom have been Americans who have done their own thinking and made their own decisions. When you advance the theory that American edu-

cators are bureaucratic puppets and potential mouthpieces of a dictatorial central government, I think you forget that in this country the people are the government. Or do we still proclaim: "The Public Be Damned."?

James F. Macandrew
Director of Broadcasting
Board of Education (WNYE)
New York

Far-Flung Correspondent

EDITOR:

Just received your Jan. 19 issue. Now I no longer read B•T—I absorb it, cover to cover. All work stops in the meantime. Even the family reads it.

Congratulations on a fine job. The expansion of "In Review" has been much appreciated way down here . . .

Cleve Costello
Producer, "This Radio Age"
Wellington, New Zealand

Necessary Number

EDITOR:

On page 68 of the March 2 BROADCASTING • TELECASTING you ran a story on our new KUDL in Kansas City, Mo.

Studio location of KUDL will be the ninth floor of the 1012 Baltimore Building in KC. That 1012 is necessary as there is no such building as the Baltimore Building.

David M. Segal
General Manager
KTFS Texarkana, Tex.

War News

EDITOR:

I saw the other day where an editor in Vancouver ran the same story on the Korean War three consecutive days, and not one of his, I think it said 300,000, readers noticed it, or if they did, didn't bother to mention it. "If," sighs the editor editorially, "I had left out a comic strip, they would have mobbed me. Yet they don't notice as important a thing as the war." . . .

The editor's readers *are* interested in the weightier things, but they don't read about something that was old to them by the time it was put on paper. They had already *heard it.* How? Radio and TV. . . .

Earl Hodges
Chief Engineer
KFFA Helena, Ark.

For the Record

EDITOR:

We have read with indescribably great interest your article in Feb. 2 B•T regarding record companies' fee policies on records to radio stations.

Particularly hilarious was the indirect quotation from Decca that Decca "services all disc jockeys . . . with free records." And that from the record company that consistently, deliberately and irritatingly has refused to cooperate with either deejays or stations, in the Northwest, at least, since time immemorial. What a laugh.

Just for the "record," here's the KBKH story on record availability:

Columbia: Excellent. . . .

MGM: Fine. . . .

Victor: "Handling charges." Yet we find to our amazement that other stations in this and smaller areas, in most cases with consider-

In Which Algy writes to . . .

From where I sit
by Joe Marsh

Wrong "Train" of Thought

Most of us knew the streamliner stopped four miles from town Thursday—but we didn't know *why* . . .

Seems the train was hurrying along, then came the screeching of brakes—some fellow had pulled the Emergency Stop cord.

When the conductor asked him why he did it, he said, "The train was just going too fast—I wanted to get you to slow down."

From where I sit, that streamliner has been going at that speed for the past seven years with a perfect safety record and the passengers have always been pleased. Now—along comes a fellow who wants the train to go at his speed. Some people are like that. Some still would begrudge another person's right to a temperate glass of beer even though that person wouldn't dream of flashing a "Stop" sign on their preference for, say, milk, coffee or tea. Respecting the rights of others is the only way we can keep "on the right track."

Joe Marsh

John R. Puckett
Production Director
KBKH Pullman, Wash.

Piracy

EDITOR:

In your Feb. 9 issue the subject of piracy was aired. There seemed to be a plea for the protection of agencies, sponsors and stations against those who sue for lifting of an idea.

Being a writer and producer who has seen his ideas and format lifted bodily by these same criers for help, I would like to put my two cents worth into the pot.

Ideas, unlike a gadget, story or piece of music, are hard to protect, yet radio and TV shows for the most part should be based upon ideas rather than the finished product. This, due to the fact that it is the idea which is carried on, show after show, across the board or once a week. . . .

It is a simple thing to register an idea. If the agency or station or sponsor has the idea and registers it first, no writer can claim it was presented to them and pirated, because the date of registration disproves the statement.

If agencies, sponsors and stations want to continue with third and fourth rate programs, preventing ideas from being presented unsolicited is certainly the way to accomplish the matter.

Gail Papineau

on all accounts

"TWENTY years ago I thought we were just beginning . . . now as I examine the tremendous growth of the film industry and the trends for the future, I realize we're only stepping out of the pioneer days."

In this way, Gail Papineau alludes to the new medium of television and its effect on the film industry.

As the new executive film producer for Kling Studios' Hollywood film branch, Mr. Papineau has more than 20 years' experience in the motion picture field, much of it with Walt Disney Productions in a number of creative chores. He has been more recently active in TV program production work.

Mr. Papineau strongly believes that Hollywood production has much to offer TV, particularly with respect to industrial film usage. "Interspersements of Hollywood-shot scenes add much to overall film effectiveness," he feels.

Born in Spokane, Wash., Mr. Papineau came to Hollywood when he was 20. He joined Walt Disney Productions about 1932 and, after a short period of basic training as animation camera operator, was appointed supervisor of camera and special effects. In succeeding years, he engaged in experimental work in the development of animation and production techniques represented in such classics as "Snow White," "Pinocchio," and "Fantasia."

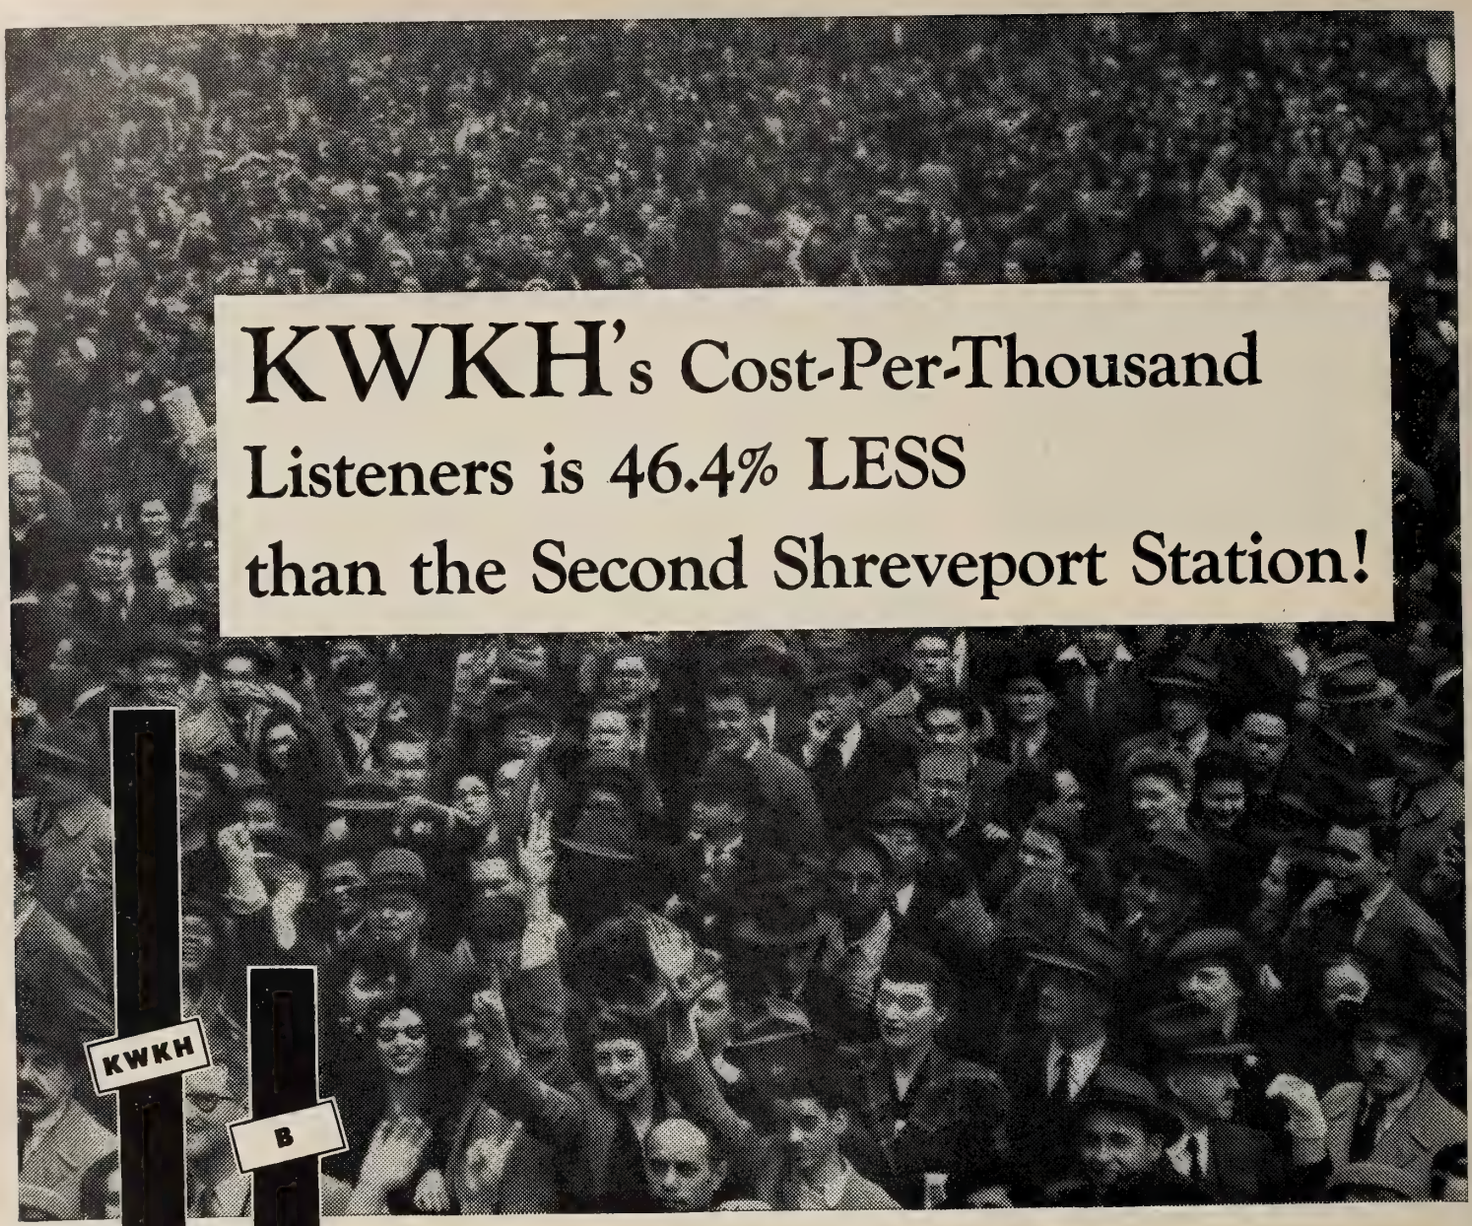
In 1941, he moved from animation direction into live-action techniques. He was coordinator and assistant director for "Saludos Amigos," "The Three Caballeros" and a number of Disney war training films.

During the war, Mr. Papineau was director of 16mm film for the Office of International Affairs, handling film work in South America.

Mr. Papineau joined Raphael G. Wolff Studios, a TV package production firm, as production manager in 1945. He supervised production for many of the nation's leading advertisers, including the American Meat Institute, General Electric, Ford Motor Co. and Armstrong Cork & Linoleum Co.

Mr. Papineau attributes a large measure of his success as a director to careful interpretation of script-scenarios. He feels this can be translated into industrial and other films for television without changing the concept held by the client.

Mr. Papineau married the former Patricia Allison. They have a son, Richard Allen, 22, and live in San Fernando Valley, 25 minutes from Hollywood. In his new capacity, Mr. Papineau will concentrate on industrial film production.



DRAW A BEAD...

You've been following that buck for some time, just catching glimpses of him. He's elusive, but finally stops for a drink of water. As you close the gap, you raise your gun. The buck stiffens, alert to danger. You draw a bead . . . if your shot is true, he's yours; if you're off target, he may be gone forever.

Some customers are like deer in many ways. They're always on the go—wily and elusive. When they stop, it's just for a moment . . . and that's the moment when smart media buyers and advertisers "draw a bead." Radio, of course, is the best "gun" to use on these flighty customers . . . but don't shoot off your sales message into empty air by buying time on popgun radio stations! Blast their sales-resistance with the "Big Bertha" in Oklahoma City . . . KOMA of course, the best cost-per-thousand buy and the only 50 kw CBS RADIO outlet in Oklahoma, serving you from a brand new quarter-million dollar studio.

BROADCASTING TELECASTING

March 16, 1953 Vol. 44, No. 11

TIMEBUYING IN TV DURING '52 REACHED $288.8 MILLION

TV volume has grown more than 1,000% from $27.5 million, the 1949 total, according to an analysis in the current B•T TELECASTING YEARBOOK. Network buying has grown faster and farther than spot or local, unlike the pattern in radio.

U. S. ADVERTISERS spent $288.8 million on television time in 1952, a gain of 38.8% over their TV time purchases of 1951, according to an analysis of television advertising published in the TELECASTING YEARBOOK for 1953.

All figures in the analysis are for time sales only, and do not include costs of talent which are estimated by some informed sources to equal or even exceed time costs.

The analysis is one of hundreds of features contained in the annual source book.

Post-Freeze Outlets Add Little

The increase in TV business volume in 1952 over 1951 was the more significant for having occurred in a year that marked the end of the long FCC freeze on TV stations. Though a few post-freeze stations got into operation just before year's end, virtually all the expenditures were on the 109 pre-freeze stations.

These figures represent receipts from the sale of time after deductions for frequency or promotional discounts but before deductions of commissions to agencies or national station representatives. They do not include the enormous amounts spent for television talent and production which, if added, would probably make the total TV advertising bill more than double the time sales volume.

(Estimated television net time sales for 1952 are based on data gathered in a survey of television stations. The formula for computing the totals is the same that has been used by Broadcasting Publications Inc. for many years in estimating radio and television billings. Statistical information was audited by Sinrod & Tash, Washington, D. C., certified accountants, who delivered to the TELECASTING YEARBOOK *editor only weighted averages in each station and business category, in conformity with the canons of the American Institute of Certified Public Accountants.)*

Four-Year Tabulation

The remarkable growth of TV business volume in the past four years is illustrated by the chart on this page. Total volume has shot from $27.5 million in 1949 to $90.4 million in 1950 to $208 million in 1951 and $288.8 million in 1952. The three categories that make up total volume—network, spot and local—have advanced proportionately.

So far television spending patterns have varied sharply from the coincidental developments in the sister service, radio.

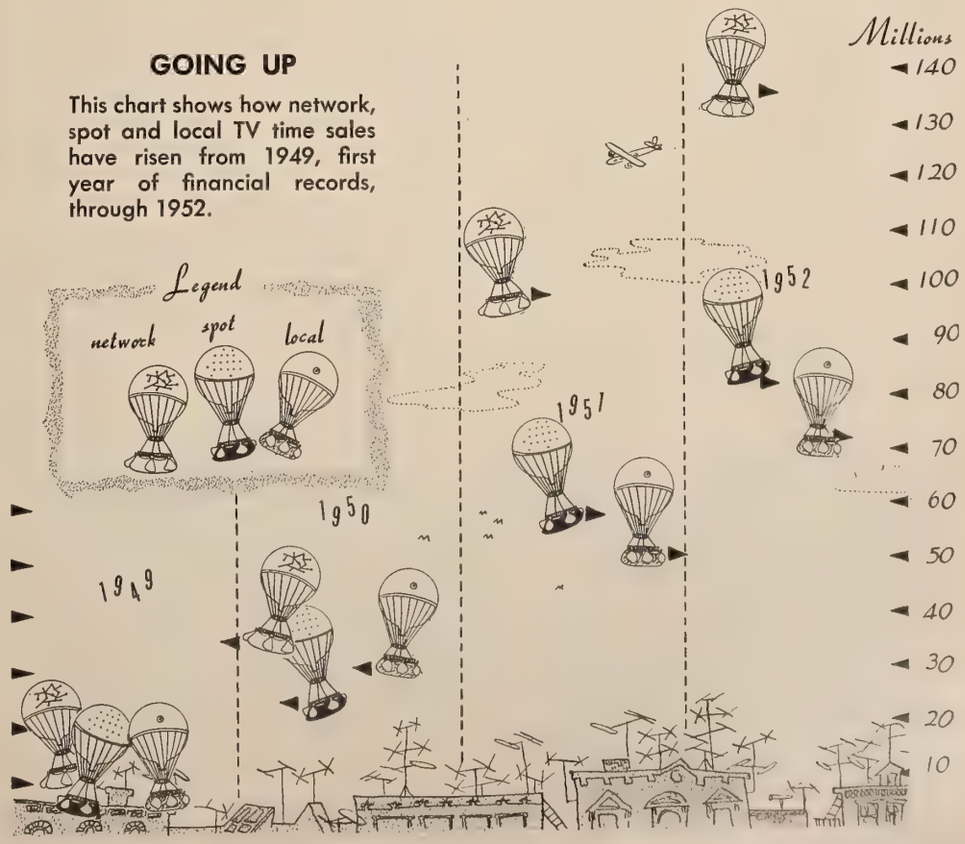
As shown in the 1953 BROADCASTING YEARBOOK, local advertisers are radio's biggest customers, spot users second biggest and network advertisers at the bottom of the list. That trend in radio has become more and more pronounced.

In television, however, network business has expanded more rapidly than spot or local. In 1949, the first year of TV financial records, network business was $10.7 million, spot was $7.2 million and local $9.4 million. In 1950, network advanced to $35 million, spot to $25 million and local to $30.3 million. In 1951, network continued to lead the pack, with $97 million; spot moved ahead more rapidly than local, to $59.7 million compared with local volume of $51.3 million. That trend continued through 1952 when network was $135.6 million, spot $82.7 million and local $70.5 million.

In 1952, network advertising, which was 39% bigger than it was in 1951, accounted for 47% of total volume. Spot, which rose 38% over 1951, provided 28.6% of the total. Local, up 37% over the year before, contributed 24.4%.

Among network television accounts, advertisers in the food and food products category were far ahead of others in their total purchases of TV network time. TELECASTING YEARBOOK estimates of gross network billings by product groups show that food clients bought $33.8 million worth of time, figured at the gross, one-time rate, to account for 18.7% of all network billing.

Comparison With 1951



Food advertisers held the lead in 1951, too, and by a wider margin. In that year their gross billings were $25.8 million, 20.2% of all billing.

Second biggest spending category in 1952 was smoking materials—$28.4 million, or 15.7% of the total. This category was also second in 1951, with $17.9 million, 14.1% of the total.

Toiletries and toilet goods were third in 1952, as they were in 1951. Their 1952 expenditures were $24.8 million, or 13.7% of the total. In

GOING UP

This chart shows how network, spot and local TV time sales have risen from 1949, first year of financial records, through 1952.

1951 the figures were $16.4 million, 12.9% of the total.

In fourth place in 1952 were soaps, cleansers and polishes, a category that spent $21 million, or 11.6% of the total gross. The year before this group of advertisers was in fifth place, with expenditures of $11,037,695.

Fifth place in 1952 was taken by automotive accessories and supplies, which spent $15.4 million, or 8.6% of the total. This category barely nosed out soaps for fourth place the year before with expenditures of $11,050,501.

Over 400 Pages

The 1953 TELECASTING YEARBOOK will contain more than 400 pages of basic information about the television medium.

It will include complete listing of executives, technical descriptions and rate information for every television station on the air and all information available on plans made by firms that have received construction permits. Listings of executives of the national networks and trade associations are included. Full lists of advertisers, agencies, program production firms and distributors and facts on all services pertaining to television have been compiled. Television station representatives and the stations they represent are presented.

One of the most useful departments is a complete listing of all television applicants and the place they hold in the FCC processing line. This department is completely indexed to make it easy to find any applicant as well as his relative position.

Special "Rules" Dept.

FCC rules pertaining to television licensees and information for applicants are included in a special department.

Another improved section in this year's volume lists facts on television in other countries throughout the world, with estimates on the number of sets in circulation in each country, stations on the air or planned. Other departments in the book include: Average costs of station operation, pattern of television viewing, names and addresses of service firms, consultants and other related businesses, community television firms, group ownership, stations with newspaper interests, transfers of stations during 1952, channel allocations, manufacturers of television equipment and many other listings.

Announcement

WINFIELD R. LEVI, Sales Manager of BROADCASTING • TELECASTING, effective today (March 16) becomes business head of the New York Bureau, transferring from Washington headquarters.

Coincident with this shift, announcement is made of the following promotions:

William H. Shaw, Midwest advertising representative, becomes Midwest Sales Manager, continuing in the Chicago Bureau.

Eleanor Manning, heretofore assistant to the advertising director, becomes Sales Service Manager, continuing in the New York Bureau.

Kenneth Cowan, advertising representative, becomes Eastern Sales Manager, continuing in the New York Bureau.

Mr. Levi succeeds S. J. Paul, former advertising director, who has resigned. Mr. Paul has not announced definite plans, but contemplates a new publishing venture or another connection in the industry. Mr. Levi joined B•T in 1946, serving successively as promotion manager, circulation manager, assistant advertising manager and sales manager. A graduate of the U. of Cincinnati, he has had agency experience in Cincinnati, and served as sales promotion manager of WSAI. He entered the Army as a private and now holds a lieutenant colonelcy in the Air Force Reserve.

Mr. Shaw, a native of Waterloo, Ia., joined B•T in 1951, after having served in sales and promotional capacities with WLAC Nashville and WGH Norfolk. He is a U. of Missouri graduate, and served as a combat pilot in the European Theatre in World War II with rank of captain.

Mr. Cowan joined B•T in 1951 after having served two years with the Henry J. Kaufman & Assoc. advertising agency in Washington, D. C. He is a graduate of American U., Washington, and served in the European Theatre during the last war.

Miss Manning has been with B•T since 1949. She was for four years with the Kudner Agency Inc., serving as chief radio timebuyer and later in the new business department. She is a graduate of the Eastman School of Music of the U. of Rochester.

Messrs. Levi and Shaw will continue to report to Maury Long, Business Manager, at Washington headquarters.

Mr. Levi

Mr. Shaw

Miss Manning

Mr. Cowan

DOZEN FIRMS OPEN SEASONAL DRIVES

Spring and summer advertisers start radio and television spot campaigns in varied markets.

SPRING and summer seasonal advertisers have broken out in a contagion of spots, radio and television, with varied market schedules, and more than a dozen sponsors participating.

That was the diagnosis after a B•T check of the industry's complexion last week.

Among seasonal accounts, Jackson & Perkins (nursery stock), through Maxwell Sackheim & Co., New York, is known to be preparing a radio and TV spot schedule in 100 markets to be launched April 15.

Griffin shoe polish, both a year-around and seasonal advertiser, will supplement its portion of *Your Show of Shows* on NBC-TV with a radio schedule in about 50 non-TV markets starting April 25 and moving across the country as the weather warms. The 39-week contracts are placed through Bermingham, Castleman & Pierce, New York.

Tandem Plan Sale

Another shoe polish firm, Knomark Mfg. Co., (Esquire boot polish), has signed the NBC radio Tandem Plan for 10 weeks, effective last Thursday, participating in: *Judy Canova Show*, Thurs., 10-10:30 p.m.; *Barrie Craig, Confidential Investigator*, Sun., 10-10:30 p.m., and *Red Skelton Show*, Tues., 8:30-9 p.m. Agency for Esquire is Emil Mogul Co., New York.

Robert Hall Clothes, long the nation's largest user of retail radio advertising, for spring business will add a TV spot campaign using 20 stations in 11 major markets. The spots, modeled after the firm's radio policy, will run during daytime and early evening, just before the span of network shows, and in late evening when the networks again are quiescent.

While the firm is increasing use of TV this spring, according to Jerry Bess, vice president of Frank B. Sawdon, New York, agency handling the account, "the TV campaign has not decreased Robert Hall's overall radio activity."

The chain stores use spot radio on 180 stations in 80 cities.

Howard Clothes, another chain, through Dowd, Redfield & Johnstone Inc., New York, signed Phil Davis Musical Enterprises to a 13-week contract for a musical commercial to be tested on Philadelphia and Boston radio stations. If successful, Howard will expand the campaign to national scope.

Flex-Let watch bands, another seasonal advertiser, is preparing a TV spot schedule effective April 1 for 13 weeks in a dozen major markets. Ben Sackheim, New York, is the agency.

Spring Campaign

American Cigarette & Cigar Co. (Pall Mall cigarettes) will start its spring campaign—to run in addition to its regular radio and television network shows—in 45 radio markets with a spot schedule in the 7-8 a.m. time. Contracts, effective April 1, will be for 52 weeks and are placed through Sullivan, Stauffer, Colwell & Bayles, New York.

General Electric (TV sets) is following its recent radio spot campaign with a new six-week saturation schedule effective March 30 in 10 markets. Maxon Inc., New York, is the agency.

Good Humor Corp. (frozen desserts) formerly serviced by Grey Adv., has named David J. Mahoney Inc., New York, to handle its ad-

vertising. Agency and advertiser, it was learned, are considering a spring radio and TV campaign.

Meanwhile, American Ice Cream, division of the Doughnut Corp. of America, has appointed Grey Adv., New York, to handle its advertising. Plans call for local campaigns using radio and television. The division holds the Howdy Doody franchise for all frozen ice and ice cream products throughout the U. S.

White Rock Co., through Ellington & Co., New York, has just signed for sponsorship of an undisclosed number of spots and programs on WNBC, New York NBC radio outlet, under the station's Chain Lightning plan. The campaign starts April 1 with approximately $15,000 allotted.

Knickerbocker Beer, through Biow Co., in another local action, has scheduled one of the largest single station program transactions with plans for a live show, 11 p.m. to midnight, five times weekly on ABC's WABC-TV New York (also see ABC story, page 68).

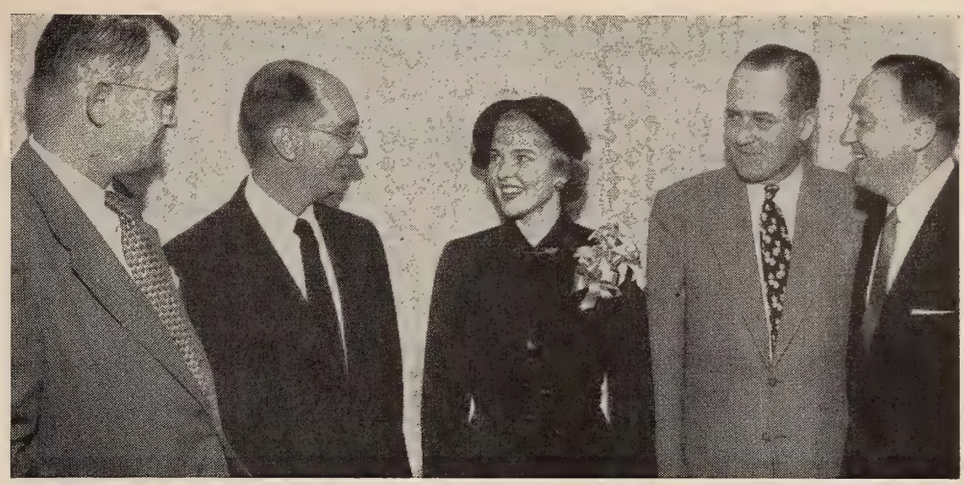
Swan Soap is preparing, through BBDO, New York, an introductory campaign in the New York area starting the first week in April for four weeks, using mostly 10-second television spots on a number of New York stations.

Bond Bread, through BBDO New York, placed a one-week radio spot schedule in 20 markets last week.

Advertisers Re-Sold on Radio, CBS' Murphy Tells Ad Group

Radio still best buy, and will never return to low point of 14 months ago, according to CBS Radio's president.

ADVERTISERS realize again that radio offers the best values in all advertising, both day and night, Adrian Murphy, president of CBS Radio, told members of the New England Radio Executives Club Wednesday in Boston.



Declines in nighttime audiences, he said, have been more than offset by reduction in nighttime cost.

Predicting "Radio will never again have to pass through the psychological doldrums of 14 months ago," the CBS executive listed factors in radio's vitality: Markets remain important radio centers, with increased listening; radio is inherently effective, reaching many people economically with much impact; selling and promotional efforts by industry organizations are highly effective, and the "creative spark" is increasing in the program field.

Pointing to the CBS network commercial program schedule as an example of a revived interest in radio, Mr. Murphy said Mondays through Fridays, daytime, are sold out, with a waiting list despite the February rate increase. Saturdays and Sundays, daytime, are also "well sold," he said, while at night "we again have all our big name programs back. A year ago, we were seriously concerned whether we would have any of these programs on again."

Using CBS Radio figures as evidence of industry strength, he said in 1951 there were 148 daytime quarter-hours sold per week, slightly off from the 1948, pre-TV figure of 154. In 1952, however, the figure had risen to 171, or 23 more programs than in 1951 and 17 more than in 1948. CBS Radio's loss in nighttime quarter-hours sold per week, measured from pre-TV days, has been only 10.4%.

CBS-owned stations had more income in January 1953 than in January 1952, he said, and all are in prime TV markets. In comparison with 1948, their national and local spot business is running 36% ahead.

APPARENTLY approving choice of Nell Owen (c) of Dallas, Tex., as the nation's prettiest school teacher in a contest sponsored by CBS Radio's *Our Miss Brooks* program, are (l to r) D. Robert Parman, partner, Ted Bates & Co., agency; Louis Hausman, administrative vice president, CBS Radio; Irwin W. Hoff, advertising manager, Colgate-Palmolive-Peet Co., sponsor of program, and John Karol, v. p. in charge of network sales, CBS Radio.

REACTIONS MIXED ON GENERAL MILLS PLAN

Though there are reports of some opposition, GM's agency says that a good number of stations seem ready to go along with the plan that represents a departure from the accepted time buying pattern.

THE spot saturation plan devised by General Mills, Minneapolis, for certain key markets was reported to have encountered strong objections last week as station reactions poured in to radio-TV station representatives and Knox-Reeves Adv., the agency for Wheaties.

A number of stations were said to be disenchanted with at least two features of the General Mills project—described as "Wheaties Operation Sparks 1953-'54"—which calls for spot campaigns from April 5 to Oct. 11 and from Oct. 18 to March 27, 1954 [B•T, March 9].

The firm has introduced two new aspects into this year's plan—there is no set formula for individual station rates and the firm is approaching stations in point of its market preferences, through their representatives, rather than in order of its choices of stations.

Some Strong Opposition

In a spot check by B•T, some stations indicated a strong opposition to GM's proposed "floating" or alternating two-weeks schedule under the four plans which it held out to stations in various markets. Others hit out at the company advertiser's insistence that stations carry at least 90% of all spot announcements for which it had contracted.

Under each of the four plans [At Deadline, March 9] which are deemed flexible enough to cover all types of markets, rates would be based on budgets, costs, ratings, coverage, TV or non-TV penetration, common AM-TV ownership, and type of schedule. The spots would be used for Wheaties, with adjacencies in late afternoon or early evening hours.

Despite these objections—and probably because of local competitive factors—a good number of stations seemed prepared to go along with one of the plans. Knox-Reeves Adv. reported "generally satisfactory response," claiming it had heard from perhaps 75% of the stations the agency had sought to reach.

As during last year, General Mills has steadfastly refused to announce the details on its plan in the face of widespread concern over "rate-cutting" practices, and possible organized industry resistance. Station representatives likewise have declined to be quoted on individual station response and their own station lineups. A number of them appear to feel gratified, however, that GM has cast an approximate $1.5 million worth of spot business into spot radio.

One important aspect of the 1953-'54 campaign is that it gives preference to stations which accepted its bids last year. Stations have been advised, in most instances, to quote their lowest rate for the particular plan for that market area and give a sample of their schedules.

Under last year's plan, for which no station schedules ever were revealed—but which contained a number of network o and o stations and regional networks—GM set a flat rate formula, from which it would not deviate. It called for 50% of the individual station's one-time daytime rate, it also specified that 80% of the announcements be aired in the nighttime hours, giving General Mills an appreciable discount in practical effect. This year, it is stressed, the plan is more flexible.

Plan No. 1 is the basic arrangement on which the other three plans hinge. It calls for 14 actual weeks of broadcasting, starting with April 5 and 12, then off two weeks and on two weeks, etc. It calls for 10 announcements per day or 70 per week. From October 18 through March 27, 1954, the plan calls for nine announcements per day for 24 weeks, with spots broken down into one minute and 20 seconds. Maximum number of 20-second announcements is not to exceed 50% of the total spots scheduled.

The second plan calls for a schedule reduced by 50% from April through October, while the third and fourth plans eliminate the October-March or fall-winter commitments.

RR Buys 'Off-Line' Radio

UNION Pacific Railroad, for the first time, is buying radio in "off-line" cities, according to H. B. Northcott, general advertising manager. About one-eighth of the railroad's radio budget this year will be spent in markets not served directly by the company, he said. Stations scheduled, near the railroad's eastern terminus at Omaha, include WISN Milwaukee, KWK St. Louis, KSTP Minneapolis and KRNT Des Moines.

WHAT ABOUT TV CIRCULATION?

Weintraub V. P. William Trenner says "no answer in sight" for TV's "grave" problem of circulation and costs; rotation is possible way out for different buyers to get same value for same cost.

RESPONSIBILITY for determining circulation and how to charge for it are "much graver" TV problems than rising costs and answers "are not in sight" in the opinion of Harry Trenner, vice president of William H. Weintraub agency, New York.

Speaking at the March meeting of the Television Assoc. of Philadelphia at the Poor Richard Club, he posed the query, "How long will an advertiser continue to stand for paying the same amount as another advertiser when he has only half the audience?"

"When a network offers a time spot and a program, it has the entire responsibility for circulation," said Mr. Trenner. "And if two programs costing the same go into two time spots costing the same, with different size audience, there's a problem. Advertisers were willing to sit still for this for many years in radio, but TV is taking a much bigger bite.

Percentage Considerable

"The dollars are much larger, the percentage of the budget used for TV is considerable, and sponsors take a longer, more careful look," he said.

Referring to networking, Mr. Trenner said "the obvious answer" to circulation control is the analogy of the printed medium, where advertisers have no control over the editorial content. "Why should they run the shows on TV? Why don't they just impose their advertising on the matter provided by the medium?," he asked. He posed other questions: "Where's the guaranteed circulation, like a magazine? Where's the rebate, if the guarantee isn't met, like a magazine. Where's the same shake for two advertisers paying the same time and talent bill, like a magazine?

"I don't mean to imply that circulation in the printed medium is the only factor; I believe that position has something to do with it. But positions in a magazine or a newspaper will vary an audience for an advertiser by perhaps 5% to 10%. In TV, cost-per-thousand figures have differences of as high as 200%," Mr. Trenner charged.

TV is a powerful medium, he said, and it can get business for sponsors. "But it has not proven itself as the panacea of all sales evils, and is a vital young stallion which is currently something of a run-away horse."

One circulation plan is a rotation plan, in which each sponsor would be guaranteed so much circulation in a specified period, either a week, a month or a 13-week cycle," the agency executive said. "This, of course, is a far cry from the business as we know it today, and is something like some of the so-called tandem plans that have been a vogue in radio lately. It could mean a real revolution in television," he asserted.

"The time will inevitably come when General Foods and General Mills will want the same thing for the same money," he added.

Mr. Trenner suggested that stations adjust rates first of all. "Don't keep charging 50% of night-time for your day-time periods. Don't encourage the racket of double and triple-spotting at station breaks," he warned. "Who can sell anything that way? What happens to your important programs if you kill the goose that lays the golden egg?"

Local Programming

He recommended that stations keep enough local programming to do justice to local customers and the local audience, "but don't kick network advertisers around because a spot show brings more money. Remember that programs like *I Love Lucy*, *Milton Berle* and the *World Series* sell as many television sets in your market as they do razor blades, gasoline and cigarettes. Be careful not to penalize the guy who is building the audience that you are selling," he said.

RADIO AND TV in the Chicago area are promoting Salerno saltines and Norway sardines during the Lenten season, in a joint campaign planned by the two companies and their agencies. Details of the merchandising and promotional tie-in were completed by, (l to r), George F. Salerno, president, Salerno-Megowen Biscuit Co., Chicago; R. J. Scott, president, Schwimmer & Scott, agency which handles the account; Samuel S. Moody, merchandising representative, McCann-Erickson, which handles the Norwegian Sardine Institute account, and Charles L. Sullivan, vice president, Salerno-Megowen. More than 1,000 supermarkets and chain stores in the area are cooperating with the grocery product manufacturers.

Paper Revenue to Remain High Despite TV, Britt Says

NEWSPAPERS have held their own in percentage of total advertising expenditures for the past 20 years, and probably will maintain their position despite television or any decline in business economy, an agency research expert told newspaper representatives last week.

Steuart H. Britt, vice president and research director of Needham, Louis & Brorby Inc., Chicago, addressing a luncheon session of the Chicago Newspaper Representatives Assn., said newspapers appear to be holding their own in public readership of both advertising and editorial matter, even in cities with heavy TV set ownership. He said many newspaper advertising sales representatives have been worrying "too much" about TV. They entertain "feelings of uneasiness, with every thought permeated with worry about the bugaboo" of TV. The precise effect of TV on newspaper reading has not been definitely established as yet, he noted.

Arizona Advertising Awards

A-1 BREWING Co., Phoenix, won first place in both the radio and TV category for outstanding commercial announcements in the first annual Arizona Advertising Awards competition sponsored by the Phoenix Advertising Club.

Company and its agency, Advertising Counselors of Arizona, Phoenix, were commended. A-1 received the only television award, and first and second place in radio.

Honorable mention in radio went to Charlie Case Tire Co., Phoenix, for a transcribed announcement produced by KOY Phoenix. Citation for the most outstanding overall advertising campaign went to the Arizona State Fair, handled by Jennings & Thompson Adv., followed by A-1 Brewing Co. and Hotel Westward Ho.

Co-chairmen on the awards committee were Frank Mangelsdorf, advertising director, Advance Seed Co., and Dick Goebel, account executive, Advertising Counselors of Arizona. Featured speaker at the banquet was Howard Willoughby, senior vice president, Advertising Assn. of the West. Ceremonies were broadcast on a state-wide network.

Lawler to Geyer Adv.

N. F. LAWLER, central division sales manager for Nash Motors Div. of Nash-Kelvinator Corp., will join Geyer Adv., New York, as a vice president April 1, President B. B. Geyer announced last week. Nash Motors is handled by Geyer.

In addition, Edward J. Corbett, copy chief for the agency's Detroit office, has been elected a vice president and will serve as account executive on Nash.

Mr. Lawler served previously as director of advertising and sales promotion for Nash for eight years. Mr. Corbett has been with Geyer (formerly Geyer, Newell & Ganger) as copy chief since 1946.

Direct Mail Volume Up

DIRECT Mail Advertising Assn., reported last week that the dollar volume of direct mail advertising used by American business during January 1953 was $101,827,775, compared with $99,516,152 during the same period of 1952. The January 1953 figure was said to represent a 2.2% gain over the dollar volume for January 1952.

Like pretty girls go for sweets

Baltimore merchants go for WITH like pretty girls go for sweets! They love the quick, profitable results they get from this low-cost station. At low, *low* rates, WITH delivers a huge, responsive audience—more listeners-per-dollar than any other radio or TV station in town. And that means *low cost results!* And that's why WITH *carries the advertising of twice as many local folks as any other station in town!*

So take a tip from these smart advertisers. Put WITH on *your* schedule. WITH can produce low-cost results for *you*, too! Get the whole story from your Forjoe man today!

IN BALTIMORE **WITH**

TOM TINSLEY, PRESIDENT • REPRESENTED BY FORJOE AND COMPANY

Berman's Buy

BERMAN'S radio-TV appliance store, Chicago, really believes in splurging when it comes to buying radio time for disc shows. The store has signed Dirk Courtenay, local disc personality, to some 100 quarter-hours per week on five independent Chicago stations (WIND WJJD WCFL WAAF WAIT), with periods slotted throughout the day on each outlet. It's also the first time the store has bought a local personality. Agency is Sherwin Robert Rodgers & Assoc., Chicago.

Hewitt Leaves HOB&M; Shelby Page Named V. P.

RESIGNATION of Anderson F. Hewitt as board chairman of Hewitt, Ogilvy, Benson & Mather and election of Shelby Page as vice president and treasurer were announced last week. Mr. Hewitt's resignation was said to be "due to disagreement on policy decisions."

In announcing Mr. Page's election as vice president, David Ogilvy, president, noted Mr. Page has been treasurer of the agency since its early days.

He also announced that James McCaffery, director of media, has been elected a vice president.

Paul E. Gailey Dies

FUNERAL services were held last Tuesday at Glendale, Calif., for Paul E. (Ted) Gailey, 49, vice president of Glasser-Gailey Inc., Los Angeles advertising agency, who died March 7 after a long illness. Surviving are his wife, Grace Glasser, president of the agency, his mother and father, a sister and a brother.

NEW BUSINESS

Paris International Trade Fair (May 9-25) has purchased schedule of spot announcements on 11 stations of Good Music Broadcasters throughout U. S. on three-times-a-week basis for six weeks, starting last Monday. Agency: Hicks & Greist, N. Y.

Gough Industries, L. A. (MG and Morris cars, International Harvester refrigerators and freezers and Sylvania TV sets), started saturation spot announcement campaign on KNX, KFWB, KFI that city, KBIG Avalon, KLAC-TV and KTTV (TV) Hollywood, for six weeks starting March 9. Agency: Noble Adv. Co., L. A.

General Mills, Minneapolis (Wheaties), has signed to sponsor *Wheaties Scoreboard,* weekly five-minute major league baseball summary immediately following Mutual's Sunday *Game of the Day,* starting April 5. Contract is effective for duration of baseball season. Agency: Knox-Reeves Adv., Minneapolis.

Palm Beach Co., Cincinnati (men's suits), will sponsor 5-6 p.m. EST segment of Palm Beach Golf Tournament for one time only on DuMont TV Network, Sun., May 17, 4-6 p.m. Telecast will originate from Meadow Brook Club, Westbury, L. I. Agency: Ruthrauff & Ryan, Chicago.

Pharmaco Inc. (Feen-A-Mint laxative chewing gum and Choos Antacid chewing gum), sponsoring *When a Girl Marries,* Tues. and Thurs., 10:45-11 a.m. and *News With Don Gardiner,* Tues. and Thurs., 12 noon-12:10 p.m., both on ABC. Agency: Doherty, Clifford, Steers & Shenfield, N. Y.

S. C. Johnson & Sons (Johnson's wax) signs for co-sponsorship of ABC-TV's *Saturday Night Fights,* Sat., 9-10 p.m. EST for 26 weeks starting April 25. Agency: Needham, Louis & Brorby, Chicago. Other sponsor: Bayuk cigars.

Wm. Wrigley Jr. Co. started sponsorship of *Yours Truly, Johnny Dollar* on CBS Radio last Tues., 9-9:30 p.m. EST, as replacement for *Life With Luigi. Mr. Chameleon* mystery series goes into Fri., 8:30-9 p.m. spot formerly occupied by *Johnny Dollar,* on sustaining basis. Agency: Arthur Meyerhoff & Co., Chicago.

Pearson Pharmacal Co. (Ennds) planning alternate-week sponsorship of Neptune Productions' *Eye Witness,* 9-9:30 p.m., effective March 30, replacing *Hollywood Opening Night.*

American Federation of Labor, Washington, sponsoring *Both Sides,* discussion-forum program, on ABC-TV, Sun., 1:30-2 p.m. EST, for 52 weeks, starting Sunday. Agency: Furman, Feiner & Co., N. Y.

Agency Appointments

Strietmann Biscuit Co., Cincinnati, appoints Ralph H. Jones Co., same city, effective April 1.

Globe Brewing Co., Baltimore, Md. (Hals and Arrow beer), appoints VanSant, Dugdale & Co., same city. Radio-TV are being used.

Kern Food Products Inc., L. A. (jams, jellies, catsup), appoints Mottl Adv. Agency, that city.

Leslie Salt Co., S. F., appoints Honig-Cooper Co., that city. **Louis Honig** is account executive.

Columbia College, Stokes-Miller & Co. (insurance firm) and **International Insurance Assoc. Inc.,** all L. A., appoint Shore Assoc. Corp., Hollywood.

Bodger Seed Co., El Monte, Calif., appoints Jordan Co., L. A. **R. L. Randall** is account executive.

Printed Cellophane Tape Co., L. A., appoints Byron H. Brown & Staff, that city.

Gas Sales Promotional Committee of Eastern Pennsylvania names John Falkner Arndt & Co., Phila.

Revive Singin' Sam

BARBASOL'S "Singin' Sam" singing commercial of early '20s is being revived by Erwin, Wasey & Co., N. Y., which has handled the Barbasol account for 30 years. Agency did some research, found that almost every person interviewed who was over 25 years of age remembered it —and some were able to sing it correctly all the way through. So, except for a few changes to point up current copy themes, it's being aired on WCBS radio and WNEW New York and WCAU WIP and WPEN Philadelphia.

Riverside Metal Co. names Robert S. Kampmann Jr. Agency, Phila.

Jacques Kreisler Mfg. Corp. (watchbands and men's jewelry), names Foote, Cone & Belding, N. Y.

Dryer Co. of America (electric hand dryers) names Abner J. Gelula & Assoc., Phila.

Willima T. Wiegand Corp., Vineland, N. J. (laboratory glass) names Sydney R. Nemarow, Phila.

Miscellaneous

Ad Associates, L. A., moves to 5050 Wilshire Blvd. Telephone is Webster 3-7501.

Kostka, Bakewell & Fox Inc., Denver, elected to membership in American Assn. of Adv. Agencies.

Al Carmona Adv., Hollywood, has become **Carmona & Allen Inc.,** that city, headquartered at 1213 N. Highland. **Bill Allen,** account executive for former agency, is president of new firm. **Al Carmona** is secretary-treasurer. **Frank Craden,** assistant advertising supervisor, Gulf Oil Corp., N. Y., and **Evelyn Singer** join agency as copy chief and account executive, respectively.

Ross, Gardner & White Adv., L. A., and **C. B. Juneau Inc.,** Beverly Hills, have merged under latter's name. **Raymond B. Gage** continues as president of Juneau and **Edward B. Ross** is account executive.

Mathisson & Assoc., N. Y., relocates at 1065 International Bldg., Rockefeller Center.

BALTIMORE ORIOLES Thursday and Sunday home baseball games will be televised on WMAR-TV that city under sponsorship of Gunther Brewing Co. Signing contract are (l to r): Seated, Arthur Goldman, Gunther advertising manager; Jack Dunn, Orioles owner-president, and E. K. Jett, WMAR-TV vice president and director; standing, Baxter Ward and John MacLean, WMAR-TV announcers; Herb Armstrong, Orioles Baseball Club; H. P. McLaughlin, Gunther, and E. A. Lang, WMAR-TV sales manager.

"I like Ford Hopkins Rexall Drug Stores rat poison because..."

We discarded the idea for a complete-this-sentence-in-twenty-five-words-or-less contest almost before we thought of it. The rat poison market defies analysis; and even though Iowa *has* the highest literacy rate in the nation, rats in some of the outer reaches of WMTland might have had difficulty gnawing into Ford Hopkins drug stores for entry blanks.

Well, we were resigned to the fact that rats would be reticent about expressing a preference for any particular brand of poison. Nevertheless, we went ahead with a two week campaign (eight announcements) on behalf of Ford Hopkins' tidbits. The demand was not only tremendous—we even received 157 orders at the station.

It's true that most of the customers were people, but you can't have everything.

Moral: *Building mouse traps isn't the only way to get paths beat.*

Plot Marks Best TV Drama, Advertest Study Indicates

New York viewers tell Advertest interviewers they choose drama on the basis of a good plot. "Robert Montgomery Presents" named as favorite.

AT LEAST 40% of the respondents in a study of television dramatic programs released by Advertest Research last week chose their favorite drama TV program on the basis of its story material or plot. The study came from 753 personal interviews in the New York metropolitan area.

Advertest's February issue of its continuing service, "The Television Audience of Today," reported *Robert Montgomery Presents* as the favorite drama among respondents. Following were *Studio One, Philco/Goodyear Playhouse, Kraft TV Theatre* and *Lux Video Theatre.* Presentation or production and variety of stories presented were other reasons for preferences in programs.

Respondents, asked to name all dramatic programs they had viewed in the past month, placed them among these, in order: *Robert Montgomery Presents, Kraft TV Theatre, Fireside Theatre, Philco/Goodyear Playhouse* and *Studio One.*

Montgomery Preferred

In excellent-good-fair-poor ratings 61% rated *Robert Montgomery Presents* excellent, 47% *Studio One,* 46% *Kraft TV Theatre,* and *Philco/Goodyear Playhouse* and *Broadway TV Theatre* 42% each.

Viewers who preferred filmed programs said they did so because of film's greater scope of scenery and settings. Live programs were liked, viewers said, because of better picture quality and because viewers said they like to know they are watching an actual performance.

RADIO MAKERS SHIP 7 MILLION-PLUS IN '52

RADIO manufacturers shipped more than seven million radio sets to dealers last year, according to Radio-Television Mfrs. Assn.

RTMA announced last week that 7,066,794 radios went into dealers' hands in 1952, a slight decline from the 7,588,810 sets shipped in 1951. The shipments do not include auto radios.

From 1946 through the end of 1952, manufacturers shipped 21,812,263 television sets to dealers. Last year the industry manufactured 6,096,279 TV sets. The production figures cover actual factory output as distinguished from shipments to dealers.

Total radio production in 1952, according to RTMA [B•T, Feb. 2], amounted to 9,711,236 sets, of which 2,729,070 were auto sets.

Following are radio set shipments to dealers in 1952 (auto sets not included):

State	Total	State	Total

Sponsors Like Drama

DRAMATIC programs in four categories lead all other types of sponsored programs on radio and television networks, according to a summary released by Executives Radio-TV Service, Larchmont, N. Y.

Summary is based on data in firm's FACTuary published last week, showing the total number of sponsored dramatic offerings on TV is 55, with radio networks carrying 49 programs of the same type.

The company's breakdown of the four types of dramatic shows follows: Dramatic plays—19 on TV, 14 on radio; mystery and detection—16, TV, 13, radio; situation comedy—16, TV, 13, radio; juvenile and western—4, TV, 9, radio.

L. A. Originations

LOS ANGELES has returned to second place as an origination point for live network television programs, according to the Monthly Index of Network Program Origination issued today (Mon.) by Ross Reports on Television, New York.

Based on advance information on network schedules for the week of March 15-21, the index shows a total of 17½ hours of live network programs from Los Angeles (including Hollywood) each week, an increase of 4½ hours over February, plus 3½ hours of film. New York leads with 107¾ hours of live programming, plus 26 hours of film transmission, during the base period.

Other cities follow, with film origination in parentheses: Chicago, 15½; Washington, 7¼; Philadelphia, 6¾ (½); Cincinnati, 5¼; Boston, 1; Dallas, ¾; Baltimore, ½, and Pittsburgh, ¼.

Nielsen February Ratings

STANDARD favorites, headed by Jack Benny and *Amos 'n' Andy*, were the most popular network radio shows for February, according to an A. C. Nielsen report made the week of Feb. 1-7. Complete ratings follow:

Schwerin Staff Moves

OPERATIONS of Schwerin Research Corp., radio-TV program and commercial testing company, have been placed under Raymond K. Maneval, with responsibility for test planning and budget and personnel supervision. Mr. Maneval, who has been serving as production manager, will be succeeded by Harold Spielman, project supervisor, now in charge of all production control records. Appointments were announced by Leonard Kudisch, Schwerin executive vice president.

VIDEODEX'S RATINGS FOR FEBRUARY

CBS-TV's *I Love Lucy* and *Godfrey & Friends* headed the Videodex February network top ten list for ratings in both percentage of TV homes and number of TV homes. Ratings follow:

	Program	No. of Cities	% TV Homes
1.	I Love Lucy (CBS)	64	63.9
2.	Godfrey & Friends (CBS)	58	52.9

A. C. Nielsen Reviews Its New Coverage Service to Clients

FINAL reports on radio-TV data obtained last year from more than 100,000 families in a Nielsen Coverage Service survey are being issued to subscribers.

A review of the service, begun by A. C. Nielsen Co. in mid-1952, appears in an annual report to clients titled, "The Increasing Demand for Sound Marketing Facts." Nielsen reported a 16% increase in business volume, an all-time high.

The Nielsen Coverage Service's first survey was launched with the objective of filling in "the gap in the fact tools of networks, stations, agencies and advertisers" not covered in the firm's radio and TV index services. The latter provide continuous analyses of network audiences by national subdivisions but "do not attempt to provide data on the geographical coverage of more than 2,000 radio and television stations throughout the country," it was explained.

Census Figures Released

OFFICIAL radio and TV homes figures for Arkansas, Michigan and Wisconsin, as compiled by the U. S. Census Bureau, show saturation as of April 1950. The TV figures (only percentage saturation is shown) apply to a period when only 5 million sets had been manufactured compared to actual TV circulation of nearly 22 million sets at the present time. [For complete tables, see FOR THE RECORD, page 102]

'Lucy' Rates With 26 Cities

IN 26 of 27 cities covered in the January TV-Hooperatings, CBS-TV's *I Love Lucy* captured first place but finished seventh in the Davenport-Rock Island-Moline area. Breakdown of the ratings showed that, overall, there was a marked contrast in local preferences with many programs placing high in one or two cities only.

FILM PRODUCERS, WRITERS AGREE

SUPPLEMENTARY provisions to the already agreed-upon contract covering writers of filmed television shows have been finalized by the Screen Writers Guild and the Authors League of America with the Alliance of Television Film Producers.

Terms stipulate the writer of both story and teleplay receive $1,330 minimum for a one-hour show in anthology or episodic series, including one-time shows; $700 for half-hour, and $420 for quarter-hour.

The story writer receives a minimum $380 for the same type of one-hour program; $200 half-hour, and $120, quarter-hour. The Teleplay writer earns a minimum $1,045 for the same type one-hour show; $550 for half-hour, and $330 for 15 minutes.

With no distinction made between story and teleplay, the writer of westerns and serials receives $1,140 for one hour, $600, half-hour, $360, quarter-hour.

Basic material will be leased to producers by writers of shows in these categories for their exclusive use for seven years. On payment of additional compensation, the producer may exploit the movie, radio and sequel rights for a maximum of three years. All remaining ownership rights, such as dramatic, book publication, magazine and commercial, remain the writer's property.

For re-run of material, the writer in addition receives 25% of the original payment for each pair of runs, beginning with third and fourth up to the 13th and 14th, or 150% of the original payment on anthology and episodic series. Original payment of 33 1/3% on the third, fifth and seventh runs is paid the writer where westerns and serials are concerned. He also receives 10% each for the ninth through 13th runs, totaling 150% of the original payment.

The teleplay must also pay the writer, if possible, within 48 hours after delivery, and never later than seven days. Time allowed the producer to request revision is limited to 14 days.

Provision also is made for $100 payment for outlines of originals submitted for sponsor approval. This is an advance against the fee for the original. If not approved, the writer retains the $100 and his material.

In instances where the film will be used later for theatrical release, the writer receives 100% repayment of the minimum. The producer also will share 50-50 with the writer on any sale of motion picture rights of material.

The contract sets up a fee for radio use of writer's material, with scripts around which an entire radio series can be built calling for (1) $200 per episode for national network; (2) $150, regional. A single script pulled from a TV series and used in a radio series rates $150 national and $100 regional.

The pact, principles of which were approved last fall, includes credits for screen authorship, bar against speculative writing, right of writer to view rough cut and answer print, plus various improved working conditions.

Outlets Buy Ziv TV Shows

SALES and program officials of 30 new television stations have met with Ziv TV programs account executives for information on programming and sales requirements on the local and regional level, M. J. Rifkin, Ziv TV sales vice president, reported last week. After these meetings, Mr. Rifkin added, the stations bought 177 Ziv TV programs on "firm 52-week contracts."

Court to Hear Claim For Gross-Krasne Studios

PETITION of Theodora and Arylnne Sherman, daughters of the late Harry Sherman, independent motion picture producer, to regain possession of California Studios from Gross-Krasne Inc., TV film producers, is to be heard tomorrow (Tuesday) in Los Angeles Superior Court by Probate Judge Newcomb Condee.

The TV producers acquired the studios from the Sherman estate several months ago for $135,000, but the daughters are contesting the sale. They charge misrepresentation at the time of the sale, diversified interests of the same attorneys in representing both the estate and studio, and that other qualified purchasers were not allowed to bid for the property.

Spring to Head Laws Check

NATIONAL Television Film Council announced last week the appointment of Samuel Spring, New York attorney and author of *Rights and Risks*, as chairman of a legal committee to investigate current laws regarding defamation, privacy and legal protection as they apply to television.

Arche Mayers, NTFC president, said Mr. Spring is empowered to check with counsel of leading producers, networks and stations to gather opinions on advisability of "exploring more uniform legislation." Mr. Mayers said existing laws have caused "confusion to TV film and live show producers, and have already become a source of headaches to networks and local television stations."

CONSOLIDATED SETS 'STARTER' PACKAGE

A PROGRAM package plan designed to assist new television stations with a pre-tested catalogue of nine TV film properties is being announced today (Monday) by Consolidated Television Sales, filmed TV program sales and distribution company.

Details of the plan, as outlined by General Manager Peter M. Robeck, include the offer by Consolidated to new TV stations of a package of nine shows for unlimited exhibition rights at a weekly fee equal to the station's class "A" starting one-hour rate, He noted that if a station contemplates a $200 class A rate, it will pay Consolidated $200 per week for the nine programs during the length of the contract.

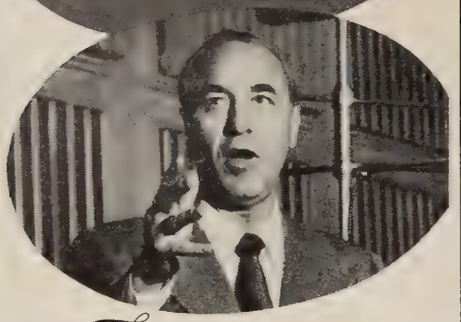
Called the "Station-Starter Plan," it includes such programs as *Front Page Detective, Public Prosecutor, Hollywood Half-Hour, Jackson and Jill, Ringside With the Rasslers, Paradise Island, Crusader Rabbit, TV Closeups,* and *Going Places With Uncle George.*

Mr. Robeck stressed that the plan contains no escalator clause during the contract period "despite the fact that the history of station rate increases indicates that the average station frequently doubles its rate during the first year of operation."

Fifteen new stations which already have contracted for the Station-Starter Plan, according to Mr. Robeck, are as follows:

KXLY-TV Spokane, KGNC-TV Amarillo, WOSH-TV Oshkosh, Wis.; KOLN-TV Lincoln, Neb.; KVOA-TV Tucson, WKAB-TV Mobile; KWFT-TV Wichita Falls; KRTV-TV Little Rock; WTVU (TV) Scranton; KTTS-TV Springfield, Mo.; WPTV (TV) Colorado Springs; KELO-TV Sioux Falls, S. D.; KFAZ (TV) Monroe, La.; WAVE-TV Louisville, and KUTV (TV) Sioux City, Ia.

BIG MIKE... THE BANKER



Big Mike . . . the 50,000 watt KFAB . . . helped Midwesterners bank over three billion dollars last year! Big Mike . . . with his powerful, friendly voice . . . influences the economy of five states. He helps the worker and the farmer sell their products as well as helping them buy more wisely. The farmer, the factory worker, the professional man . . . the banker . . . they're all friends of Big Mike. As listening friends, they are in a receptive mood for the advertiser, too, as he sells his products and services via Big Mike. Advertisers have learned that Big Mike helps keep Midwest Empire dwellers informed and entertained—happy, working, buying—receptive to the sales messages voiced by Big Mike. A Free & Peters Colonel will be glad to tell you more . . . or hear the story from Harry Burke, General Manager.

BIG MIKE is the physical trademark of KFAB, Nebraska's most powerful station.

Film Sales

Brown Shoe Co., St. Louis (Buster Brown shoes), renews *Smilin' Ed's Gang* on CBS-TV, Sat., 11:30 a.m.-12 noon, May 2 for 52 weeks. The series, sponsored by Buster Brown shoes since August 1950, is filmed in Hollywood and India by **Frank Ferrin Productions.** Agency is **Leo Burnett Co.,** Chicago.

* * *

DuMont Film Sales, New York, announces that contracts for the exhibition of 13 units of its *Scotland Yard* half-hour mystery series have been signed with KOLN-TV Lincoln Neb., and KDUB-TV Lubbock, Tex.

A contract for the exhibition of 52 weeks of *Madison Square Garden* has been arranged with WWLP (TV) Springfield, Mass., also by DuMont Film Sales. Producer is **Winik Films Inc.**

* * *

KHJ-TV Hollywood has acquired local rights for $50,000 to *Little Theatre,* quarter-hour film series, from **TeeVee Co.,** Beverly Hills, for two years from today (Monday).

* * *

Alexander Film Co., Colorado Springs, Col., announces recent TV commercial productions for the following organizations:

Mead's Bread, Lubbock, Tex., twelve 10-second announcements through **Craig & Webster. Duffy's Drinks,** Denver, Col., four 20-second films through **Galen E Broyles Co. C. A. Sutton Corp.,** Wichita, Kan., two 45-second and two 20-second films through **Lago & Whitehead. Gas Service Co.,** Kansas City, Mo., four 20-second films. **Budweiser,** St. Louis, Mo., two 8-second films through **Tracy-Locke Co. Mrs. Baird's Bread,** Dallas, Tex., one 8-second and one 20-second films through **Tracy-Locke Co.**

* * *

Boyle Midway Products, Los Angeles (household products), started weekly feature film, *Channel 5 Playhouse,* on KING-TV Seattle, for 26 weeks from March 5. The firm co-sponsors *My Favorite Story,* produced by **Ziv TV Programs,** on KFMB-TV San Diego. Agency is **Geyer Adv. Inc.,** Hollywood.

* * *

General Electric contracts for half-hour situation comedy TV film series, *Meet Mr. McNutley,* with **Revue Productions,** North Hollywood. Scheduled for a late September starting date on a network to be announced, the program possibly will be sponsored on an alternate basis. **Ray Milland** will be starred as a college professor, with **Bob Mosher** and **Joe Connolly** set as co-writers. A radio version reportedly is under discussion with CBS. GE is serviced by **Maxon Inc.** and **Young & Rubicam Inc.**

Distribution

Screencraft Pictures Inc., New York, now is distributing the feature films and westerns formerly distributed by **Olio Video Television Productions,** according to **Harvey Cort** of Olio Video and **Edward Berkson** of Screencraft Pictures.

Olio Video is giving up feature film distribution to produce new TV film programs and package live TV programs.

Screencraft Pictures has appointed **Peter M. Piech** sales manager of its TV film department.

Availabilities

Syndication of *The Ford Theatre* under title of *Your All-Star Theatre* as a first-run in all markets not used by Ford and in new markets as they open was announced last week by **John E. Mitchell,** vice president in charge of sales for **Screen Gems Inc.,** producer and distributor of the program. Thirty-nine half-hour programs in the series are available.

Production

Paramount Television Productions, New York, has announced that production has begun in London on its new series of half-hour dramatic-mystery films for TV. Produced by **Edward J.** and **Harry Lee Danziger,** the series is now being sold nationally.

Random Shots

Alexander Film Co., Colorado Springs, Col., reported $9,351,314 in sales during 1952, a new yearly sales record for the firm, according to **J. Don Alexander,** president.

* * *

William F. Broidy Productions, Hollywood, has combined two pilot films, originally shot for *Trail Blazers* TV film series, and with additional footage will release the package for theatrical distribution through **Allied Artists.** The series' star, **Alan Hale Jr.,** was released by the firm to do CBS-TV's *Biff Baker, U.S.A.* series filmed by **Revue Productions** for **American Tobacco Co.**

* * *

A 20-minute color film, *Highway Safety,* starring automobile racing champion **Wilbur Shaw,** will be presented on NBC-TV's *American Inventory* program on May 31. It will be produced by **Bill Hodapp** and directed by **Bob Wald.**

* * *

Revue Productions, North Hollywood, is accepting scripts for *Chevron Theatre* TV film series **(Standard Oil Co.)** only from professional writers and accredited agents, cutting out freelance submissions.

Film People

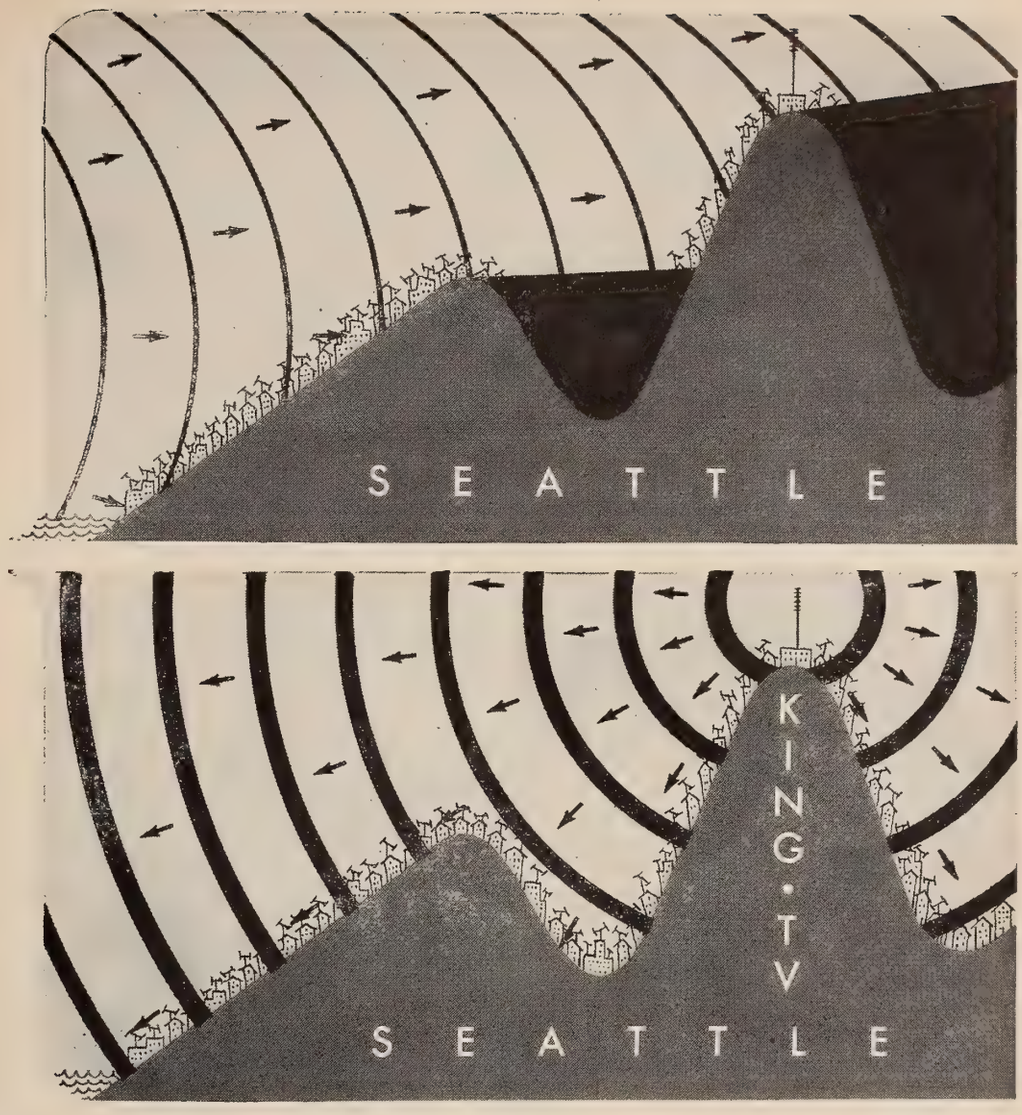
Robert J. Kingsley, production supervisor for PSI-TV, New York, appointed supervisor of film production for parent company, **Prockter Television Enterprises,** New York.

* * *

Gene Mann, Broadway stage and Hollywood film producer, joins **Filmcraft Productions,** Hollywood, as vice president in charge of creative production and sales. He will develop and produce new TV film properties, service firm's clients and supervise its sales division.

* * *

Bernard Donnenfeld has been named vice president and member of the board of directors of the newly-formed **Princess Pictures Inc.,** TV film production and distribution firm, President **Burt Balaban** announced last week. He also reported the opening of executive offices of Princess Pictures at 11 West 42nd St., New York 36.



* * *

Charles Haas and **Harold Stine** have been named director and camera director, respectively, by **Gross-Krasne Inc.,** Hollywood, on four half-hour experimental films the firm is producing for CBS-TV's *Lux Video Theatre* through **Lever Bros.**

* * *

Albert Zugsmith, head of **Albert Zugsmith Corp.,** Hollywood, station-newspaper brokerage firm, and independent motion picture producer, re-elected president of the American Pictures Corp., that city. **Larry Gross,** son of **Jack O. Gross,** former owner-manager, KFMB-AM-TV San Diego, has been elected vice president, with **Peter Miller,** president of WLPO LaSalle, Ill., re-named treasurer and director. **Dr. George Zugsmith** is newly-elected board chairman.

it's as simple as this

ONLY KING-TV can reach ALL of Seattle *and* the surrounding TV Market

Location does it! KING-TV is situated on the highest point in the heart of the important Seattle market. This "Empire State-like" transmitter site produces a double dividend. KING-TV pours a powerful signal into every corner of Seattle's many steep hills . . . . yet *also* beams over them to blanket a broad area beyond.

It's unique one-way coverage, too, because signals from outside Seattle can't curve over Seattle's rugged terrain to reach the real heart of the nation's 19th market. Only KING-TV on low channel 5 has a clean sweep, down into Seattle and out over those hills, on into the surrounding, prosperous communities of Western Washington. KING-TV is made to order for ideal coverage of the 237,000 TV homes throughout this booming Pacific Northwest region.

So why not sell ALL of this vital region with the *one* low-channel TV station that's already an established favorite in so many high-income homes? It's as simple as the illustration shows. KING-TV is the *only* television route straight to ALL of Western Washington's quarter million TV antennas—EVERY ONE of them *locked into* Channel 5!

Today's the day to ask any Blair-TV office for more facts about KING-TV's unique superiority in this market with a billion and a half (or more) to spend in 1953.

there's more, too . . .

KING-TV's signal on reliable Channel 5 will soon be even stronger—thanks to a new tower reaching 1,000 feet above sea level and a 75% power boost to 100,000 watts. These super-improvements will increase KING-TV's total coverage from 3 to 4½ times, depending on area. They'll also make it even harder for "outside" TV signals to gain attention within the richest part of the hilly Seattle market.

And the new ultra-modern KING TELEVISION CENTER, under construction for the past seven months, is about ready for occupancy. 42,000 square feet of the finest available television and office equipment—all part of KING-TV's PLAN to bring almost a million televiewers the best in television.

RECORD 29 NEW TV GRANTS PUTS FCC AT END OF "A" AND "B" PRIORITIES

In its wholesale authorizations last week, the Commission pushed the post-thaw total grants to 310 stations and approved the first share-time operation in a single market. Some 650 bids face 285 hearings in 225 cities.

TELEVISION milestones were rolled one on top of the other by FCC last week as the Commission:

- Approved an all time record of 29 new TV station permits.
- Pushed processing of eligible uncontested applications completely through both the Group A and Group B city priority lists—in general, culminating the "temporary processing procedure."
- Granted the first share-time TV operations in a single market—Rochester, N. Y., Ch. 10, to be shared by WVET and WHEC there.
- Extended the total of post-thaw new-station grants to 310 and total authorized TV stations to 418.

In its eagerness to "clear the decks" of eligible uncontested applications, the Commission announced grants on Thursday of only channel assignments to 17 of the applicants and was expected Friday to fill in specifications as to power and antenna height. The other 12 grantees were informed not only of their channels but also details as to power and antenna height.

Grants in the Group A list extended to No. 790—Hendersonville, N. C. (1950 population 6,103), where WHKP received uhf Ch. 27. Group B grants extended to the very end, San Francisco, city No. 212 in Group B-5, where Lawrence A. Harvey received uhf Ch. 20.

Informed Commission sources indicated that, aside from the pending contested applications, there are only about 40 uncontested bids remaining on the entire temporary processing lists. It was noted, however, that none of these could be included in last week's record-breaking actions because additional information is required as to financing, corporate organization or similar qualifications.

Will Prevent 'Block' Bids

Industry observers pointed out a subsidiary effect of the processing line "mop up" was to prevent potential last-minute competitive—or possible "block"—applications from being filed just before the Commission acted on the eligible bids. It was noted that more than once in past weeks, just before FCC was to act on an eligible application, a mutually-exclusive bid was filed a few days previous to the Commission meeting day.

The completion of processing through the Group A (cities without service) and Group B (cities with service) city priority lists does not mean the temporary processing procedure is completely out of use, one FCC spokesman said, although its chief general purpose of expediting the handling of applications in an orderly manner may be considered virtually terminated. He explained that the priority system will continue in effect for the consideration of those few remaining uncontested bids as well as the bare handful of new bids filed each week.

Similarly, the processing lists will continue as a priority guide in the issuing of McFarland letters to put on notice the mutually exclusive applicants heretofore "passed over" during "temporary speed-up" plan initiated last Oct. 15, the FCC spokesman acknowledged. Again, he said, the lists would determine the order in which contested applicants would be designated for formal hearing following their informal notification according to the McFarland procedure.

New TV applications are being filed at the FCC at a rate of less than a half-dozen a week, although the amendment of applications on file continues at a lively pace. There have been some 1,100 bids filed since April 14, 1952, the date on which the Commission issued its Sixth Report and Order lifting the 3½-year TV freeze and finalizing the TV reallocation plan. This plan allocated channels for more than 2,000 stations in nearly 1,300 communities.

418 TV Stations Authorized

With last week's grants, the post-thaw total of 310 authorizations includes permits for 102 vhf and 194 uhf commercial stations and 2 vhf and 12 uhf noncommercial, educational stations. When the freeze was lifted last April, 108 vhf commercial stations were authorized and operating. Operating stations now total 129 vhf and 18 uhf outlets.

Nearly 650 of the remaining pending applications are slated for some 285 comparative hearings in about 225 cities. All are contested bids. These estimates are based in part upon a special TV hearing-status study compiled by B•T as of Tuesday (see feature story page 86) and the latest list of passed-over contested applications issued by the Commission on Thursday. The new passed-over list contained 60 applications for 25 channels in 23 cities.

Here is the record-breaking roster of last week's 29 grants:

Columbus, Ga. (City priority Group A-2, No. 42)—Television Columbus (Martin Theatres and WDAK), granted construction permit for uhf Ch. 28; effective radiated power and antenna height above average terrain not specified.

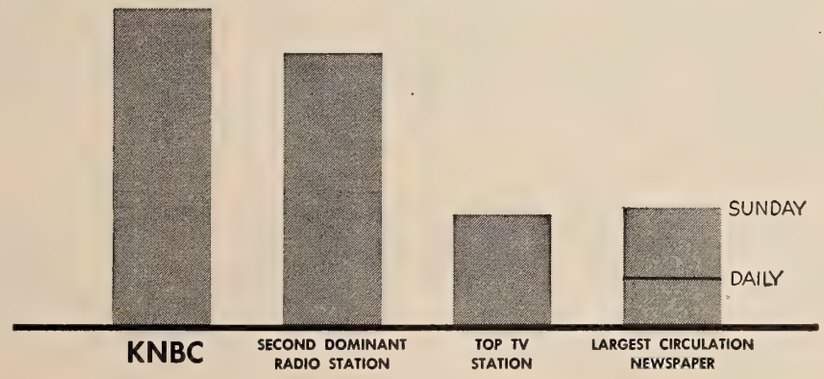
Marion, Ind. (Group A-2, No. 165)—Chronicle Pub. Co. (WMRI-FM), granted uhf Ch. 29, ERP 19 kw visual and 10.2 kw aural, antenna 360 ft.

Panama City, Fla. (Group A-2, No. 198)—J. D. Manly (contractor at Leesburg, Fla.), granted vhf Ch. 7, ERP 10.5 kw visual and 5.4 kw aural, antenna 340 ft.

Missoula, Mont. (Group A-2, No. 229) — Mosby's Inc. (KGVO), granted vhf Ch. 13, ERP 11 kw visual and 5.6 kw aural, antenna minus 690 ft.

Chambersburg, Pa. (Group A-2, No. 313)—

Mrs. Ike's TV Habit



HOW do Presidents' wives spend the evening?

Mrs. Dwight D. Eisenhower, holding her first radio-press conference last Wednesday, said she generally looked at television until 10 or 10:30 p. m. before retiring.

The First Lady said she frequently was interested in progress of legislation in Congress and followed developments by TV. There is a minimum of "shop talk" in the official family during non-working hours, she said.

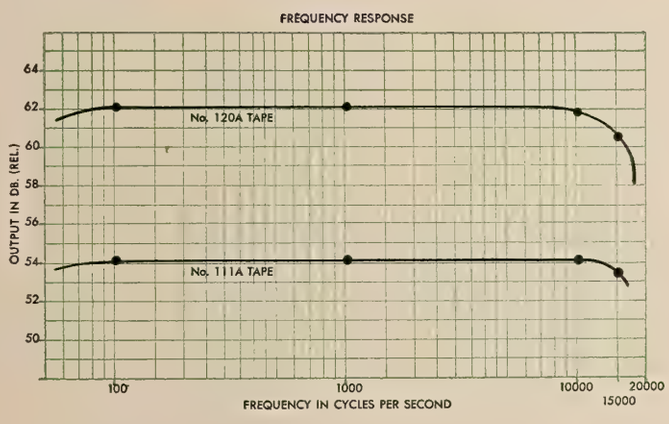
Magnetic Tape

High HO *Output*

TRADE MARK

- **NEW, IMPROVED COATING!**
  "Scotch" Brand *High-Output* Magnetic Tape is coated with a revolutionary new magnetic material that offers unparalleled sensitivity.
- **UNEQUALLED OUTPUT LEVEL!**
  Actually produces 8 db and up to 12 db more output than any conventional magnetic tape with no increase in harmonic distortion.
- **SPECIAL NEW COLOR!**
  This new tape is colored a distinctive grey-green for easy recognition.

"Scotch" Brand No. 120A *High-Output* Magnetic Tape gives the recording engineer a new and potent tool for the production of truly high fidelity recordings. The 8 db minimum added output of *High-Output* Magnetic Tape increases significantly the available signal to noise ratio, making possible for the first time low background noise recordings of orchestral works having wide dynamic range. Besides offering unparalleled output at all audio frequencies (see graphs), this new tape retains all the physical and magnetic properties that have made "Scotch" Brand No. 111A the recognized standard of the recording industry: high tensile strength, freedom from elongation, stable anchorage, low noise level, excellent uniformity, ease of eraseability.



Freedom from squealing, cupping and curling is assured thanks to exclusive "Dry Lubrication" feature. *High-Output* tape is guaranteed 100% splice-free (up to 2400-foot reels)

The term "SCOTCH" and the plaid design are registered trademarks for Sound Recording Tape made in U.S.A. by MINNESOTA MINING & MFG. Albuquerque, N. M. (Group B-4, No. 201)—New Mexico Bcstg. Co. (KGGM), granted vhf Ch. 13, ERP 89 kw visual and 45 kw aural, antenna 4,250 ft.

Fort Worth, Tex. (Group B-5, No. 205)—Tarrant County Television Co., granted uhf Ch. 20; ERP and antenna height not specified.

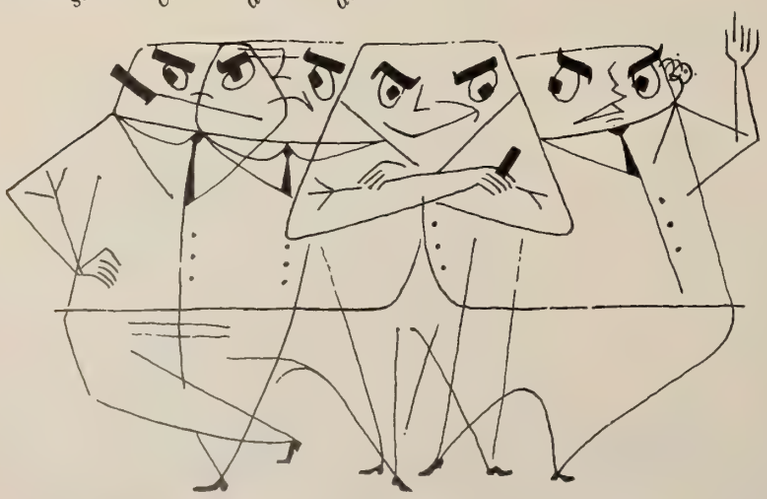
St. Paul, Minn. (Group B-5, No. 208)—WCOW Telecasting Co. (WCOW), granted uhf Ch. 17, ERP 180 kw visual and 96 kw aural, antenna 560 ft.

Cambridge (Boston), Mass. (Group B-5, No. 207)—Middlesex Bcstg. Corp. (WTAO Cambridge), granted uhf Ch. 56, ERP 20 kw visual and 11.5 kw aural, antenna 470 ft.

San Francisco, Calif. (Group B-5, No. 212)—Lawrence A. Harvey, granted uhf Ch. 28; ERP and antenna height to be specified.

The Commission also granted WOC-TV Davenport, Iowa, a construction permit to change from vhf Ch. 5 to Ch. 6, pursuant to provision of the Sixth Report, and to increase ERP from 22.9 kw visual and 12.5 kw aural to 100 kw visual and 50 kw aural. Antenna is 610 ft. above average terrain.

Last week's grants included two vhf channel authorizations to cities presently with operating vhf stations — the Ch. 13 grant to KGGM Albuquerque, where KOB-TV is operating on Ch. 4; and the Ch. 10 share-time



Yields the Screen

ALBEN W. BARKLEY, former U. S. Vice President and Senator, now star of NBC's *Meet the Veep* radio and television shows, agreed last week to "yield" his programs yesterday (Sunday) to the senior Senator from Florida, Democrat Spessard L. Holland, for an answer to Mr. Barkley's broadcast views on the tidelands oil question. After the former Vice President favored federal over state control of the tidelands on his March 1 broadcasts, Sen. Holland and several colleagues asked NBC for equal time in which to reply. NBC and Mr. Barkley granted the request last week. The program is seen Sunday, 5:30-5:45 p.m. EST on NBC-TV, and heard the same day from 6:15-6:30 on NBC radio.

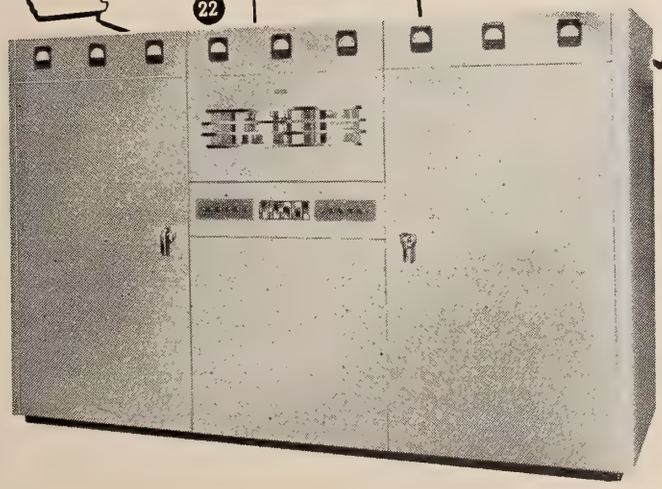
what I want is . . . something new! completely different! a tested show! at low cost!

range rider on radio

(available July 1st, 1953)

Range Rider, TV sales record buster, now packaged in thrilling radio adventures! Priced for your profit . . . 1 to 300 stations.

Comes complete with sales-proved, low-cost endorsement merchandising campaign! From packages to posters to premiums . . . Range Rider's syndicated sell blasts competition for bakers—bottlers—packers—dairies—others! Now yours for exclusive territories. Write, wire, call for audition disc, full information!



why fight it?...give your client what he wants!

It's been about a year and a half since Gates announced its new BC5B and BC10B 5/10 KW transmitters.

The map tells part of the tremendous acceptance story—the half dozen in South Africa, the dozen from Newfoundland to Cape Horn and those Uncle Sam buys are another part.

But the best part is that every single user will agree that in Gates 5 or 10 KW transmitters they VERY DEFINITELY RECEIVED their money's worth in quality-plus and performance.

Reason? Well, Gates makes so many that production line techniques are possible. That always means greater uniformity, time saved and PRICE REDUCED!

We know you, too, will like broadcasting's most used modern 5/10 KW transmitters.

May we tell you more?

GATES

GATES RADIO COMPANY • QUINCY, ILLINOIS, U. S. A.

grants to WHEC and WVET Rochester, where WHAM-TV is operating on Ch. 6. The only other post-thaw vhf grant to an established vhf market was the authorization of Ch. 13 to WHBQ Memphis, where WMCT (TV) is on Ch. 4 and will soon change to Ch. 5.

FCC's previous top record of grants was 19 permits, issued Feb. 25 [B•T, March 2]. The original high mark was set with 18 permits on July 11, 1952, the first post-thaw grants.

Concerning sharing of time by two TV stations on the same channel, FCC has indicated it will consider each request on a case-to-case basis. Several weeks ago, the first share-time authorization was issued by the Commission to KSBW Salinas and KMBY Monterey, Calif., for joint use of vhf Ch. 8, but this was for a dual market [B•T, Feb. 23]. The Rochester share-time grant is the first for a single market.

WHEC and WVET, previously competitors for vhf Ch. 10 at Rochester, decided to join in a time-sharing venture when it became apparent some two years may ensue before comparative hearing could be held. The two stations will maintain separate studios but will share the same transmitter facilities. The AM stations will continue distinctly individual competitive operations, and there is no mingling of ownership.

The program time division differs from the Salinas-Monterey plan in that WHEC and WVET will have the same schedule each week without rotation of days. Both will begin with 50 hours weekly. WVET will operate Monday-Wednesday-Friday 6 p.m. to midnight, Tuesday-Thursday 9:30 a.m. to 7 p.m., and Sunday 10:45 a.m. to 5 p.m. WHEC will operate a comparable schedule the other days of the week. Each station may extend its hours at will, 3 a.m. being considered the beginning of the telecasting day.

The stations offered these reasons in support of their share-time request:

1. The desirability of bringing a second, competitive TV service to Rochester which now has more than 160,000 sets.

2. The time which would be expected to elapse before the Commission could order a hearing on these competitive applications. A rough estimate, based on the priority of the city, would be two years.

3. The expense and delay inherent in contesting, via the hearing procedure, these applications.

4. The necessity and desirability of preserving competition between AM stations WHEC and WVET.

5. The expectation that there would be competition, even on Ch. 10 for business to be scheduled on the respective times occupied by each station.

On a share time basis, there will be no interlocking of ownership interests (except for the sharing of transmission costs); there will be no intermingling of directors, stockholders, or officers; and each station will have full and final control over the programs to be presented to the public during its occupancy of Ch. 10.

"Experience with AM stations, which in some instances has been unfortunate," WVET said, "should be no precedence in this case" for the following reasons:

1. Each licensee will have equality of opportunity for programming, service and revenue.

2. The dollar volume of expected business is such that neither station should suffer in its programs for lack of revenue.

3. The co-extensive TV service area, day and night and absence of different engineering problems day and night (which did not obtain in AM) militates in favor of smooth relationships insofar as time-sharing is concerned.

In other TV actions last week, FCC denied the petition of Sparton Broadcasting Co., Jackson, Mich., which asked waiver of the TV rules so as to allow allocation at this time of vhf Ch. 10 to Parma, Mich.

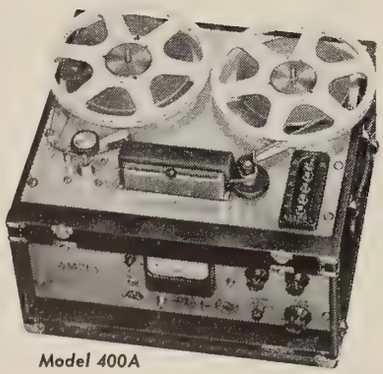
The Commission also advised WGBI-TV Scranton, Pa., new uhf Ch. 22 grantee, that its application for assignment of permit from Scranton Broadcasters Inc. to MCL Telecasting Corp. "involves questions which indicate the necessity of a hearing." Comrs. Walker and Robert T. Bartley voted for a grant. MCL Telecasting is one-third owned by Scranton

AM Grants

FCC last week in three final decisions upheld two initial decisions of its hearing examiners and reversed the recommendation of another. In the latter case, FCC ruled to grant a new AM station on 1400 kc with 250 w full time to Scranton Radio Corp. at Scranton, Pa., reversing the initial decision of Examiner Hugh B. Hutchison.

The Commission upheld Examiner Hutchison's recommended denial of 1540 kw with 1 kw daytime to Chesapeake Broadcasting Co., operator of WBUZ (FM) Bradbury Heights, Md. (near Washington, D. C.). FCC also upheld Examiner Leo Resnick's initial decision to grant Vermillion Broadcasting Corp. 1 kw full time on 980 kc at Danville, Ill.

in this room . . .



there's no room for doubt

There can be no room for doubt in the continuity and fidelity of your broadcast. You demand — and get — the best in transmitting and studio equipment.

Nor should you compromise with quality in the tape recorder you select.

AMPEX Recorders are engineered to the highest *professional* standards of reliability and performance.

AMPEX brings you these cost-saving operating advantages:

Model 400A

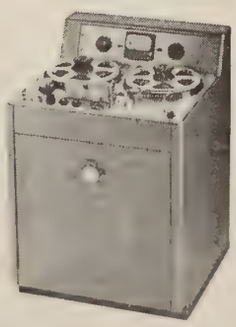
• UNINTERRUPTED SERVICE

Under the demand of heavy-duty programming, AMPEX Recorders deliver thousands of hours of unbroken service. Recently a set of AMPEX heads was returned from Honolulu for routine replacement after 11,000 hours continuous use, 17 hours a day. The heads were still within AMPEX specifications for new heads and had several thousand more hours of use remaining.

• MINIMUM "DOWN TIME"

AMPEX Recorders are designed for thousands of hours of continuous operation with minimum down time, resulting in low maintenance costs and protection from sudden broadcast failures.

• ACCURATE TIMING



AMPEX split-second timing accuracy protects your programs and commercials from embarrassing time overlaps.

• HIGHEST FIDELITY

Even when programs are repeatedly transcribed from one tape to another, there is no noticeable build-up of noise level, "wow" or distortion.

• LONG LIFE

AMPEX Recorders are designed and built for years of service dependability. Its recordings match established NARTB standards. When you have an AMPEX, you have a machine built for years-ahead performance.

Broadcasters (WGBI), the *Scranton Times* (WQAN) and Meco Realty Co. Meco and WQAN are each 50% owner of Electric City Telecasting Co., competitor for uhf Ch. 16 with WARM there. If the transfer were approved, the Ch. 16 bid would be dropped.

In a memorandum opinion and order, FCC concurrently approved a protest by WARM and ordered Meco Realty and WQAN to elect within 15 days which of the two applications—MCL Telecasting or Electric City Telecasting—they wished to prosecute.

FCC also announced it has received several inquiries concerning the specification of ERP for TV stations in cases where the maximum radiation from the antenna is not in the horizontal plane—i.e., titled beam antennas. Questions have arisen as to whether the station authorization will specify the power in the horizontal plane or in the vertical plane in which the maximum radiation occurs and whether such a station would be limited to the maximum authorized powers in the rules in other than the horizontal plane.

FCC noted Sec. 3.685(e) of its TV rules defines a directional antenna and describes the purposes for which such an antenna will be authorized. An antenna designed for changing the position of the major radiation lobe from the horizontal plane to any other vertical plane is considered a directional antenna for the purposes of licensed power and power limitations, FCC advised. Thus, an antenna designed for "beam tilting" would not be considered an omni-directional antenna in respect to these matters even though the horizontal radiation pattern is not directional. As a result, such stations would be licensed for the power in the horizontal plane and would be limited to the maximum powers authorized in Sec. 3.614(b) in any vertical plane, the Commission explained.

FCC finalized its notice of proposed rule-making of Jan. 30 and assigned uhf Ch. 18 to Burnsville, N. C. [B•T, Feb. 2], and finalized its proposals of Feb. 6 [B•T, Feb. 9] to make the following assignment changes in order to remove deficient channel spacings in the uhf band:

JOHNSON LETTER TO TOBEY EVOKES SENTIMENTS FOR QUICK COLOR ACTION

Probe to find out whether or not "powerful interests" are delaying the coming of color TV, the Colorado Senator urges. In turn, interested parties in the controversy affirm their desire for resolution of the question as soon as possible.

CHARGES made by Sen. Edwin C. Johnson (D-Col.) that powerful interests were conspiring to delay color TV brought these developments last week:

1. Brig. Gen. David Sarnoff said that upon completion of field tests of the National Television System Committee's standards, RCA would petition the FCC to establish the compatible system commercially.

2. CBS spokesmen refrained from commenting on the Johnson charges, but referred to the company's year end statement. This called for the industry to settle the color issue this year.

3. Dr. W. R. G. Baker, GE vice president and general manager of its Electronics Division and chairman of NTSC, declined to comment. But Arthur V. Loughran, Hazeltine Electronics engineering executive and vice chairman of NTSC, said NTSC has attained "this highly desirable objective."

4. Sen. Charles W. Tobey (R-N. H.), chairman of the Senate Interstate & Foreign Commerce Committee, was waiting for word from the FCC and from Dr. Baker. He wrote to both late in February and asked for a status report on color TV. This was shortly after the Senate voted $75,000 to the Commerce Committee for an investigation of color TV, educational TV and monopoly in broadcasting, among other things [B•T, Feb. 9].

Johnson's Views

Essence of Sen. Johnson's charges, made public in a letter to Sen. Tobey, was that there was a conspiracy to retard color TV until the market was staturated with black-and-white sets.

Basis for his charges was, he said, the conflicting stories reporting the status of color TV.

He urged Sen. Tobey to press an immediate investigation of whether "powerful interests" were seeking to delay the advent of color TV. To this Sen. Tobey agreed.

Sen. Johnson recounted briefly the history of color TV to the Supreme Court decision in 1951 upholding the FCC's choice of the CBS system. He then referred to the establishment of NTSC to develop a compatible system.

Interspersing his letter with quotations attributed to industry engineers and spokesmen on the readiness of color TV over the last few years, he ended his letter to Sen. Tobey caustically with the following:

It is a little less than three years since the Federal Communications Commission, the arm of Congress mandated to act in the public interest, adopted the standards for color television and stated that it was here and that it should be made available to the public. Why isn't it? Is this delay in manufacturing color television receivers deliberate? Are the standards adopted by the Commission unsound? If so, in what manner? Have new standards been developed? If so, why are they not submitted to the FCC?

He has no preference for any system, Sen. Johnson said, although he repeated he thought a compatible system is most desirable.

Sen. Johnson said he understood a tri-color tube was available at a cost of $60 when put into mass production, compared to the $450 and $500 figures he said he had heard the first black and white tubes cost.

Long sought, color television got its first big impetus shortly after the war, when CBS asked the FCC to establish commercial standards. After hearings in 1946 and 1947, the Commission ruled that polychrome TV was not yet feasible.

The subject was interjected into the allocations proceedings—during which all TV application processing was frozen for three-and-half years—by Comrs. Robert F. Jones and Frieda

B. Hennock. In 1950, after long hearings, the Commission determined that the CBS field sequential system practical enough to authorize. The Commission's decision was appealed to the courts by RCA and in 1951 the Supreme Court upheld the FCC's right to decide the color issue.

Shortly thereafter, the NTSC, comprising Radio-Television Manufacturers Assn. and Institute of Radio Engineers members, was established with the avowed purpose of working out a compatible system. A compatible system is one in which color-casts can be received as black-and-white on existing TV receivers. The CBS field sequential color system requires the addition of an adapter to accomplish this.

CBS commenced limited color broadcasts shortly after the Supreme Court decision. This ceased when Defense Mobilizer Charles E. Wilson suspended the manufacture of color TV sets late in 1951.

NTSC last January announced that it had approved a complete set of compatible color standards, but stated that from three to four months of field testing would be necessary.

Sen. Johnson's charges brought a prompt response from Gen. Sarnoff, RCA board chairman, who noted that RCA has spent almost $20 million on research and development of compatible color and said Sen. Johnson "surely cannot" be referring to RCA—which "has everything to gain" by early color introduction.

In a statement issued at San Francisco, where he and a group of other RCA board members and officers were visiting during an inspection tour of RCA-NBC facilities [B•T, March 9], Gen. Sarnoff also made clear that RCA itself will go to FCC for approval of commercial standards for compatible color after final field tests are completed.

RCA is working with other industry groups in developing such standards through the National Television System Committee—as Gen. Sarnoff pointed out in his statement—and there has been speculation as to whether the application for FCC approval would be submitted by RCA, which has been the foremost exponent of the compatible technique or by the industry-wide NTSC. Although NTSC presumably could also file, Gen. Sarnoff said in his statement that "RCA will file. . . ."

The filing, he said, will follow completion of final field tests which currently are under way and which "should be completed within the next few months."

"As soon as the Commission approves the standard, RCA will proceed with its plans for manufacture and sale of color television receivers, tricolor tubes, and color equipment for broadcasting studios," he asserted.

Gen. Sarnoff disclosed that RCA spent more than $5 million on color TV research and development in 1952 and is continuing "these large expenditures" this year.

CBS Declines Comment

Spokesmen for CBS—which also is a member of NTSC—declined comment on the Johnson charges except to refer to the CBS yearend statement on color, which they said still stands. In that statement CBS reviewed color development since the U. S. Supreme Court in the spring of 1951 upheld FCC's approval of CBS field-sequential color standards, and called upon "all elements in the industry and in the government" to settle the issue "as soon as possible in 1953" for the sake of the public [B•T, Jan. 5].

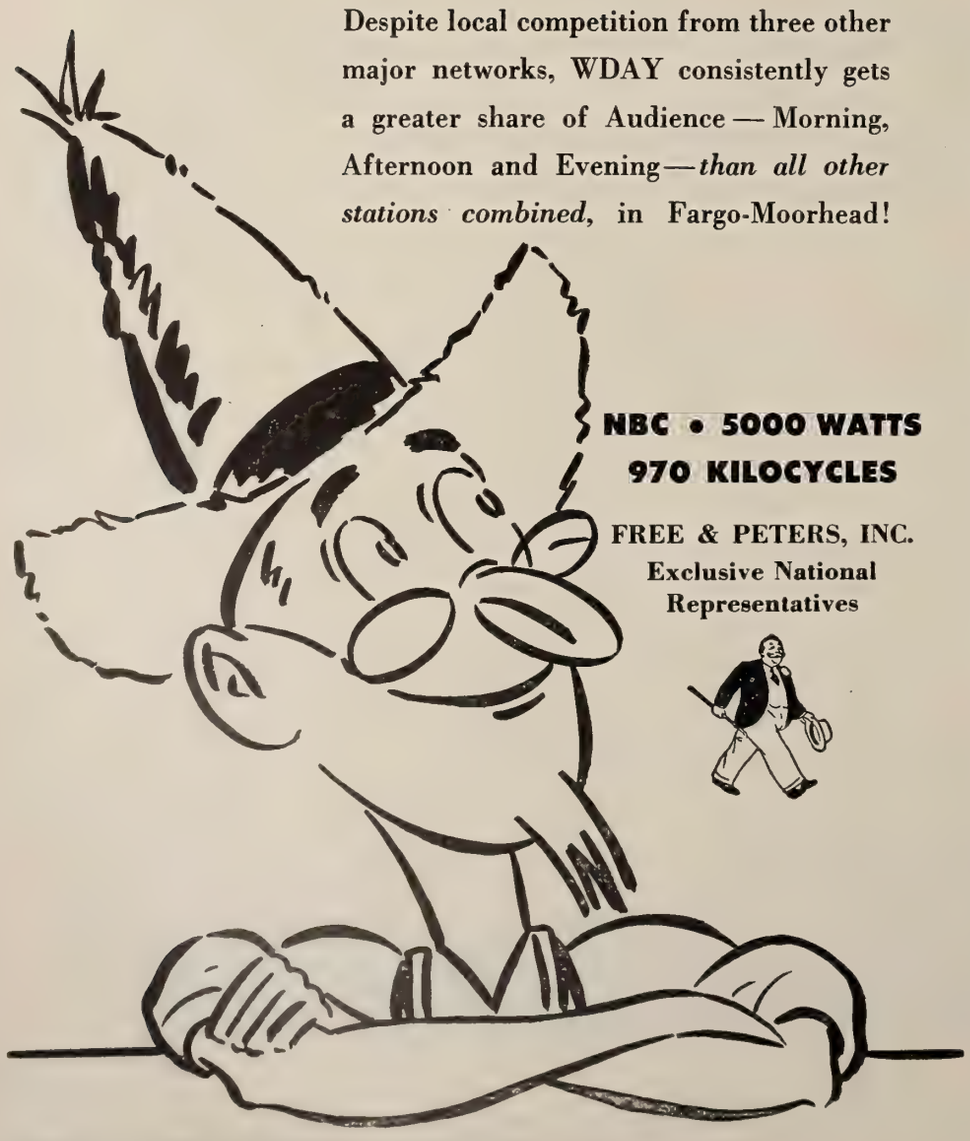
The statement also reported that the CBS Labs and the Hytron Radio & Electronics Co., another CBS division, had made "substantial progress" in the development of a tri-color tube which would replace the disc used with receivers under the CBS system. "Other companies, notably Chromatic Labs. Inc., made important progress in developing tri-color tubes usable with the field sequential system," the statement added. (RCA's tri-color tube also may be used with the CBS system, CBS has contended.)

Mr. Loughren said field tests of the NTSC compatible color system would begin March 18 and would continue for three or four months.

"The committee [NTSC], representing the whole industry, has been working strongly toward the desirble end of not only compatibility but good color, which color television will have to be if it is to become a successful service . . . and endure" he said.

He recalled that the FCC had specified what criteria must be met for a color TV system when it approved the CBS method. NTSC has been "working steadily toward the goal since and we now believe we have it," he said.

Hobby to Cabinet?



CABINET status for the Federal Security Agency was proposed to Congress Friday by President Eisenhower in recommending creation of a new Dept. of Health, Education & Welfare. Under this plan Oveta Culp Hobby (KPRC-AM-TV Houston), Federal Security Administrator, would become a Cabinet member.

DUMONT MAKES PLEA ON CONTROL RULING

PLEA that the FCC change its decision holding that Paramount Pictures controls Allen B. DuMont Labs. was made last week by the New Jersey electronics firm in a petition for reconsideration.

It is believed that DuMont is preparing to take its case to court if the Commission refuses to alter its position.

Last February when the FCC decided the multi-faceted Paramount case, it overruled the examiner's initial decision in only one respect: The Commission held that Paramount controls DuMont by virtue of negative control over some corporate actions and potential affirmative control over all phases [B•T, Feb. 16].

Paramount Pictures owns all of DuMont Class B stock and 2.4% of its Class A stock. Through its Class B ownership, Paramount elects three of the eight directors and appoints the DuMont secretary, treasurer and assistant treasurer.

Basic in DuMont's request for a new ruling is its position that Dr. DuMont dominates the company's policies in practice. It said the Commission was "unreasonable and unwarranted" in finding that Paramount controlled DuMont. The evidence showed, it said, that there have been differences of opinion between Dr. DuMont and his associates and Paramount over (1) issuance of additional Class A stock, (2) the depressed TV set sales market in 1951, and (3) payment of a dividend. DuMont also claimed that Paramount President Barney Balaban's request for a "partnership" relationship was turned down by Dr. DuMont.

Reference was also made by DuMont to the competitive aspects of both its activities and Paramount's (DuMont manufactures cathode ray tubes and Paramount has a 50% interest in color tube maker Chromatic Laboratories Inc.; DuMont Television Network competes with Paramount's syndicated kinescope recordings; DuMont manufactures home TV receivers, while Paramount has a half interest in subscription TV promoter International Telemeter Co.).

DuMont also attacked what it called the Commission's "inferences" regarding (1) Paramount's board representation, reduced from equal membership to three as against Class A representation of five; (2) Paramount's right to elect fiscal officers, which it called purely "ministerial" functions; and (3) the selection of Mr. Balaban and Paramount executive Edward K. Weisl to the DuMont board.

The right of Paramount to veto certain DuMont corporate acts must be judged against the actualities, DuMont said. It also claimed that the Commission's attitude toward DuMont has harmed the development of the DuMont Television Network by prohibiting DuMont from owning more than three stations up to the present.

Newspaper Antitrust Appeal Cites Radio-TV Competition

RADIO-TV situation in New Orleans was cited as one reason newspapers should be permitted to charge combination advertising rates for morning and evening newspapers under the same management in argument before the U. S. Supreme Court last week.

The Court heard an appeal by the New Orleans Times-Picayune Publishing Co. from an antitrust conviction last year. Basis for the conviction was that the firm required classified advertisers to buy space in both the morning *Times-Picayune* and its sister newspaper, the evening *New Orleans States.*

Combination charges are one of the principal means whereby newspapers may combat magazines and radio-TV, John C. Cahill, attorney for a group of newspapers, argued. Intervening as a "friend of the court," Mr. Cahill pointed to New Orleans, with one TV and 16 radio stations. He noted New Orleans was due for six more TV stations.

KSTP, Business Group File For St. Louis Vhf Ch. 4

MUCH sought after vhf Ch. 4 in St. Louis received another applicant late last week as the new Missouri TV Co. filed application with FCC. New TV company is made up of KSTP Inc., St. Paul, and St. Louis businessmen.

Stanley Hubbard, president, KSTP St. Paul, is president, Ethan A. Shapley (2%), vice president, and William T. Jones Jr. (1%), insurance agent, St. Louis, secretary. Directors include Claude Siems, Thomes F. Bragg, Russel E. Gardner Jr. (1.6%), investment banker, and Edmund T. Allen, president, First National Bank, Clayton, Mo. KSTP Inc. owns 50% of Missouri TV Co.

Application makes request for ERP of 100 kw visual, 60 kw aural, antenna 541 ft. above average terrain.

Other applicants for vhf Ch. 4 in St. Louis are KXOK Inc. [B•T, July 7, 1952], KWK Inc. [B•T, July 7, 1952], Meredith Engineering Co. [B•T, Aug. 18, 1952], and CBS Inc. (KMOX) [B•T, Oct. 20, 1952].

WEMP-FM STORECASTING MAKES SALES FOR STORES AND STATION ADVERTISERS

Adds thousands of listeners to audience

ONLY MEDIA EXHIBIT at upcoming 1953 Independent Grocers Association convention in Milwaukee Arena will be WEMP display of progress made by the station in FM Storecasting.

Exhibit will show success of present users, encourage other grocers to install FM units to entertain (and sell) shoppers.

IGA, representing 363 stores in Wisconsin, is currently using fourth consecutive year on WEMP. Three ten-minute daily segments are employed to sell the stores and promote food specials. Show is morning "Coffee Club" program with Bob "Coffeehead" Larsen, M. C. who ties in IGA air schedule with personal appearances at stores throughout the State. Larsen will be feted at the convention by IGA executives.

TYPICAL WEMP-FM Storecasting speaker installed in Milwaukee IGA Food store. Storecasting unit consists of receiver, public address system and speakers. Customers are entertained with regular WEMP music and news programs. Special announcements can be fed over speakers from a microphone input.

WEMP-FM unit in Wiemann's chain 5¢ to $1.00 store. Station has embarked on extensive program of providing Storecasting sets throughout Milwaukee area. Units are installed at cost and are owned by stores, without rental fee. Storecasting offers important low-cost service device for merchants and a bonus "out-of-home" audience for WEMP advertisers.

Broadcast Schedules Hash

LATEST big national spot advertiser to employ saturation schedule on WEMP is Broadcast Corned Beef Hash and Beef Stew. Fifty-two week order, placed by Arthur Meyerhoff agency through Headley-Reed, calls for 50 spots a week—10 a day—promoting both Broadcast Hash and Beef Stew lines.

MILWAUKEE BREWER BASEBALL GAMES ON WEMP FOR 13th YEAR IN A ROW!

WEMP, WEMP-FM will broadcast all Milwaukee Brewers baseball games for the 13th consecutive season beginning April 15. Miller Brewing Company, through Mathisson & Associates, is sponsor of the broadcasts for the sixth year.

Earl Gillespie, who does Green Bay Packers and Marquette University football and Milwaukee Hawks basketball for WEMP, will again handle play-by-play description.

Brewer home game broadcasts will originate for the first time this year from the new multi-million dollar Milwaukee County Stadium.

FANS CHEER WEMP D-J'S IN GAME AGAINST PRO STARS

HIGHLIGHT of "Radio Appreciation Day" staged by Milwaukee Hawks pro-basketball team for WEMP was exhibition game preliminary between WEMP Disc-Jockeys and Wisconsin Pro Athletes. Burlesque contest featured popular D-J's Robb Thomas, Bill Bramhall, Tom Shanahan, Joe Dorsey, Chuck Phillips and Sports Director Earl Gillespie versus stars from Milwaukee Brewers, Green Bay Packers and Chicago Bears. 4,500 turnout for the game was a near all-time record. Silver dollars were awarded players for best performances by Mathisson & Associates, Miller Brewing Co. agency. WEMP carries all Hawks' games for Miller High Life beer.

Supreme Court Decision Does Not Apply to Lea Act

ALTHOUGH the Supreme Court last week decided featherbedding practices by typographical unions and the American Federation of Musicians were not "unfair labor acts," the decision does not affect Lea Act provisions of the Communications Act.

That is the interpretation of both NARTB General Counsel Justin Miller and Employe-Employer Relations Director Richard P. Doherty.

Both cases hinged on the meaning of Section 8 (b) (6) of the National Labor Relations Act, as amended by Taft-Hartley, defining as an unfair labor practice any attempt by a labor union to force an employer to pay for "services which are not performed or not to be performed. . ."

The Supreme Court found in the newspaper case, brought by the American Newspaper Publishers Assn. against the National Labor Relations Board, that printers performed work in setting "bogus" type and that the NLRB was right in finding that this is not an unfair labor practice. "Bogus" type is set by printers in a newspaper printing plant when an advertiser supplies the publisher with a mat of his advertisement. This type is never used.

In the music case, the Court held that the Akron, Ohio, AFM local offered to perform work in an attempt to persuade the Palace Theatre ownership to hire a house orchestra. When theatre owners refused, AFM blacklisted the theatre, thus preventing "name" bands from performing there. Theatre is owned by Gamble Enterprises Inc.

Both decisions were by 6 to 3 majorities. Dissenting in the "bogus" type decision were Chief Justice Vinson and Justices Douglas and Clark; in the music case, Chief Justice Vinson, and Justices Clark and Jackson. Justice Burton wrote both majority opinions.

Supreme Court majority's views were based strictly on the legislative history of this provision in the Taft-Hartley Law.

In the Lea Act, now Sec. 506 of the Communications Act, not only are penalties prescribed for coercion to force broadcasters to pay for work not performed, but also for more employes than considered necessary by the employer.

This latter provision is what was lacking in Sec. 8(b)(6) of the Taft-Hartley Law, the Supreme Court majority held.

WORD Plea Draws WIS-TV Reply on Ch. 10

REPLY to plea of WORD Spartanburg, S. C., for FCC to reconsider grant of Ch. 10 in Columbia, S. C., to WIS-TV Corp. [B•T, March 9] was submitted Thursday to the FCC.

WIS-TV Corp., 80.9% owned by Broadcasting Co. of the South (WIS Columbia; WSPA Spartanburg; WIST Charlotte, N. C.), charged the WORD protest against grant of Ch. 10 in Columbia to WIS-TV Corp. is legally deficient under Sec. 309(c) of the Communications Act. Petition for rehearing should be dismissed or stricken, according to WIS-TV Corp.

Degree of signal overlap between Ch. 10 grant in Columbia to WIS-TV Corp. and facilities proposed by Broadcasting Co. of the South for Spartanburg and Charlotte, is declared not to be "a legal bar to the grant of any one or all of said applications." WIS-TV Corp. said there is no basis to require an election between any of these applications nor any legal basis to conditionally grant the application of WORD for Ch. 7 in Spartanburg.

U. S. Gives Final Brief In Football Trust Suit

INTEREST of football fans and attractiveness of a game have more impact on attendance than telecasting of the event, the U. S. District Court (Philadelphia) was told last week as the government offered its closing argument and testimony in the antitrust suit against the National Football League.

Jerry N. Jordan, research consultant and son of C. L. Jordan, executive vice president of N. W. Ayer & Son, contended the long-range effect on attendance is beneficial. He reviewed results of a survey showing that more than half the persons who had owned a TV set for two years or more had attended at least one football game during the 1949 season.

Judge Allan K. Grim, after rejecting another defense motion to dismiss the case, said he would spend much of the summer studying the testimony. Decision is not expected until autumn, with appeal to the U. S. Supreme Court expected regardless of the outcome.

"HOMETOWN, AMERICA"

comes to WFBR in Baltimore!

BIG, BIG NEWS FOR FOOD ADVERTISERS!

Truly, the most outstanding radio project produced exclusively for the food industry of the nation!

DIRECT TIE-INS WITH 2765 leading Baltimore Food Stores doing 60% of Baltimore Food Business!

Yes—"Hometown, America", the same great radio project which has proved so phenomenally successful for food advertisers comes to WFBR in Baltimore starting Monday, April 6!

"Hometown, America" on WFBR offers the food advertisers unheard of advantages—guarantees immediate, sustained sales increases! Puts tremendous merchandising weight behind every sponsor—sells your product—improves and freshens store positions, erects banners and shelf talkers, builds displays and distributes leaflets to grocers! Also equipped to handle in-store sampling of your product or products!

All this, plus participation in the "Hometown, America" daily hour on WFBR—and *much more*—is yours when you buy "Hometown, America"—the most terrific radio merchandising and promotion project in history!

"Hometown, America" will begin operation on WFBR on Monday, April 6. Be sure you're a part of this tremendous food sales and merchandising effort — reserve your time now! Write, wire or phone any WFBR account executive or your John Blair man—be a part of "Hometown, America" on WFBR in Baltimore!

"Hometown, America" is presented under the auspices of the Retail Grocers and Meat Dealers Association of Baltimore, Inc.

Guarantee

A permanent crew of full-time sales service experts sell your products—increase distribution —handle in-store merchandising!

List of FCC Job 'Plums' Is Released; All in D. C.

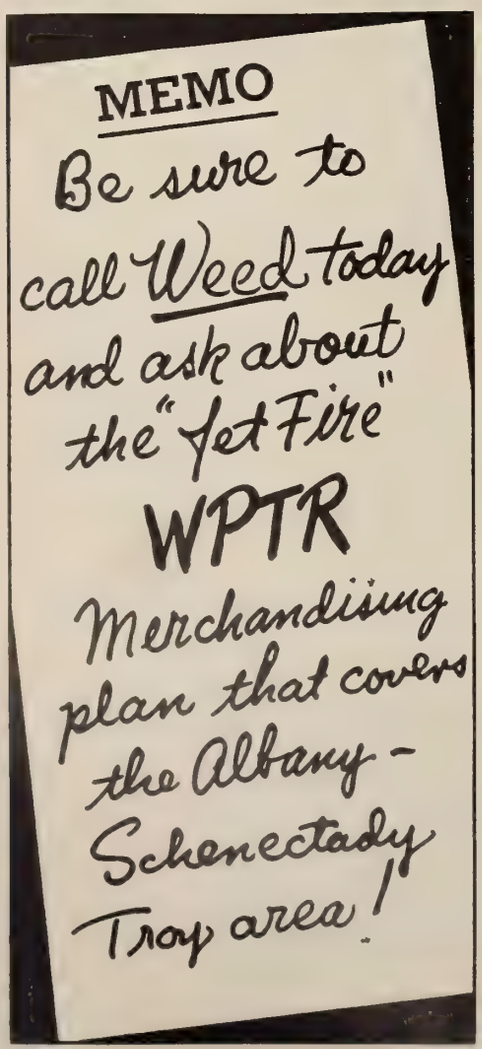
THE WORD on job "plums" for deserving Republicans in the FCC is this:

• There are 89 staff positions classified by statute or the Civil Service Commission as exempted from civil service status. All are in Washington.

• Of the 89 exempt positions, 27 are held by individuals who have civil service status.

• But, "status" does not protect incumbents of exempted positions. They can be removed just as summarily as those without civil service protection. However, if any have veteran's preference, removal must be for cause and the employe has a right to appeal to the Civil Service Commission. There are believed to be 11 vets among these 27.

The above is taken from S Doc. 18, published last week, which is a compilation of all "excepted" jobs in the Federal government. The lists were compiled by individual departments and agencies and collated by the Civil Service Commission in response to a Senate request [B•T, March 2]. Copies of the document, entitled "Positions Not Under Civil Service," may be secured from the Government Printing Office (448 pp., $1.25).



Also listed are the seven commissioners, all of whom are appointed by the President, after confirmation by the Senate. At the present time there is only one vacancy on the Commission—now occupied by Democratic Comr. Eugene H. Merrill on recess appointment by President Truman, filling the term of Former Comr. Robert F. Jones, which runs to June 30, 1954.

A second FCC vacancy is due to occur June 30, when Democratic Chairman Paul A. Walker's term expires. Mr. Walker, who is past the obligatory retirement age of 70, was given a waiver last year by President Truman to complete his term. It is possible for President Eisenhower to revoke the executive waiver and force Mr. Walker to retire before then.

The list of FCC positions not under civil service protection follows:

Position	Salary	No.	(*)
Secretary**	$10,800	1	
Broadcast Bureau			
Chief of Bureau**	12,000	1	(1)
Trial attorney	10,800	1	(1)

WSTV Asks FCC Processing Of Its Ch. 9 Application

APPLICATION of WSTV Inc., Steubenville, Ohio, for a Ch. 9 TV station should be processed at once unless Storer Broadcasting Co. dismisses its Miami TV application, the FCC was told Thursday in a petition filed by WSTV.

The Storer company was notified Jan. 30 by FCC that it, in effect, must decide whether to drop Miami or Wheeling (Steubenville) applications and stay within a maximum limit of five. Storer presently operates four stations (WAGA-TV Atlanta; WJBK-TV Detroit; KEYL (TV) San Antonio and WSPD-TV Toledo.)

The Jan. 30 order [B•T, Feb. 2] provided that an applicant owning four TV stations cannot file for more than one additional outlet. The idea of this ruling was to keep applicants from flooding the Commission with multiple applications.

WSTV asked FCC to deny a Storer petition for reconsideration and stay of the Jan. 30 order. It asked the Commission to strike the Storer "alleged election" of its Wheeling-Steubenville application over Miami, contending it is not a bona fide election since it allegedly contains reservations. Actually, WSTV claims, the Storer election would retain applications in both Wheeling-Steubenville and Miami, thus preventing grant of the WSTV Steubenville applications.

In a reply to the WSTV petition to strike, Storer reiterates that the Commission's Jan. 30 decision was erroneous and should be reversed. It has filed a pleading asking reconsideration and stay, and claims it would be untenable for FCC to require final election between the two applications in view of this request.

VOA PROBE BACK TO BAKER SITES

QUESTIONING into alleged mismanagement and inefficiency of Voice of America operations returned Thursday in Washington to the subject on which the Senate investigation started more than a month ago: Location of two proposed high-powered transmitters called Baker East and Baker West.

Construction on these stations in the states of Washington and North Carolina was halted Feb. 17 after Senate inquiry began under the chairmanship of Sen. Joseph McCarthy (R. Wis.). Testimony Thursday indicated the State Dept. sub-contractor handling the Baker West project near Seattle still was being paid about $1,000 a day because no official cancellation order had been sent him.

House Study of Gleason Damage Claim 'Favorable'

FAVORABLE attitude toward $306,000 compensation to William L. Gleason for damages resulting in the FCC's 1947 deletion of Ch. 1 was indicated last week by Rep. Usher L. Burdick (R-N.D.), sitting as a one-man subcommittee of the House Judiciary Subcommittee on Private Claims.

Hearing was held in Washington on HR 1693, sponsored by Rep. George P. Miller (D-Calif.). The bill would compensate Mr. Gleason for losses he claims in beginning construction of KARO (TV) Riverside, Calif., granted by FCC in 1946. This was halted by FCC order in 1947, when the Commission studied and decided that the share arrangements between other services and TV would not work on Ch. 1.

Rep. Burdick's recommendation was scheduled to be submitted within two weeks to the full private claims subcommittee of the House Judiciary Committee upon additional information from the FCC.

Although the original bill asked for $150,000 to recompense Mr. Gleason for his losses, he submitted an audited statement indicating a loss of $306,000.

At the time Ch. 1 was eliminated, the Commission promised Ch. 6 as a replacement, Mr. Gleason said. In 1948, he filed for Ch. 13 (then assigned to Los Angeles) but he said no action was ever taken on this.

He was the principal owner of Broadcasting Corp. of America, which was adjudged in bankruptcy by Federal Judge William M. Byrne in Los Angeles March 2. A trusteeship appointed 12 months ago was terminated, and the court is expected to appoint a referee in bankruptcy and a receiver to sell the properties in the next couple of weeks. Trustee W. B. Ross, Los Angeles advertising executive, told the court that despite a year's operation in the black under his supervision liabilities were $419,000 and assets $211,000. BCA stations are KPRO Riverside, KREO Indio, KYOR Blythe and KROP Brawley, all California.

WWLP (TV), WHYN-TV BEGIN OPERATION

The Springfield and Holyoke, Mass. outlets join the new starters, along with KSWO-TV Lawton and WFMJ-TV Youngstown.

TWO more post-freeze television permittees—both in Massachusetts— were to have begun commercial programming over last weekend on the heels of WFMJ-TV Youngstown, Ohio, and KSWO-TV Lawton, Okla., which started March 8.

Due to begin March 15 were WWLP (TV) Springfield, Mass., on uhf Ch. 61 and WHYN-TV Holyoke, Mass., on uhf Ch. 55. WHYN-TV, a CBS affiliate, is represented by The Branham Co.

Alan C. Tindal, vice president of WWLP (TV), said last Wednesday that all equipment was on hand, with the antenna scheduled for mounting Thursday and test pattern planned for either Thursday night or Friday. The station is affiliated with CBS and DuMont, and represented by George P. Hollingbery Co.

WMFJ-TV began commercial operations March 8 on uhf Ch. 73—the highest uhf station to begin programming [B•T, Feb. 9].

Len Nasman, sales manager for WFMJ-TV, said the first day's programming went on "without a hitch" because of dry runs of all commercials and local programs for the preceding six weeks. Network affiliation is with NBC and national representative is Headley-Reed.

KSWO-TV Lawton, on vhf Ch. 7, is represented by Everett-McKinney.

Due to begin commercial programming yesterday (Sunday), but with a delay until tomorrow (Tuesday) possible, was WPAG-TV Ann Arbor, Mich., uhf Ch. 20 outlet. Joseph Hershey McGillvra Inc. is its national representative.

Also aiming for a start yesterday, according to its national representative, Joseph Hershey McGillvra Co., was KDZA-TV Pueblo, Col., vhf Ch. 3 outlet.

Due to Start Tomorrow

KGNC-TV Amarillo, Tex., vhf Ch. 4 NBC and DuMont affiliate, is due to start commercial operations tomorrow. Tom Kritser, general manager, said the station will have an effective radiated power of 100 kw visual and an antenna height above average terrain of 834 ft. The O. L. Taylor Co. is the national representative.

WBAY-TV Green Bay, Wis., vhf Ch. 2, also will begin programming tomorrow (Tuesday) according to Peter James of Weed Television, the station's national representative. The station will be a CBS-TV affiliate.

WKST-TV New Castle, Pa., uhf Ch. 45, will begin about March 20 according to Byron Goodell of Robert Meeker Assoc. Inc., national representative.

KGUL-TV Galveston, Tex., vhf Ch. 11, broadcast test patterns March 12 in preparation for commercial programming to begin next Sunday, March 22, Paul E. Taft, president, told BROADCASTING•TELECASTING. The station, which filed for TV last summer [B•T, July 7], was granted its construction permit November 20 [B•T, Nov. 24].

With a test pattern scheduled for March 19, WLOK-TV Lima, Ohio, uhf Ch. 73, expects to begin commercial programming April 1. R. O. Runnerson, general manager, said the original starting date had to be moved back about 10 days because of delays in getting some equipment.

SEATTLE Mayor Allan Pomeroy, (l), congratulates Len Higgins, manager of KTNT-TV, which took the air March 1, during inaugural ceremonies attended by the state's governor and lieutenant governor among others. KTNT-TV is the second station in the Puget Sound area, and operates on Ch. 11 as a CBS-TV and DuMont affiliate.

One of the fastest jobs of building a new TV station is being done in Mesa, Ariz., a few miles from Phoenix, where Harry Nace Jr. and Dwight Harkins, principals of KTYL-TV, vhf Ch. 12 grantee, plan to have a test pattern on the air by March 20. They say continuous programming will start April 5. Their CP was granted Feb. 18 [B•T, Feb. 23].

Showmanship Techniques

Messrs. Nace and Harkins told BROADCASTING • TELECASTING they will apply theatre showmanship techniques to TV programming. Mr. Nace and his father operate 38 theatres in Arizona, and he said that "We'll do everything we've learned how to do in 47 years in theatre experience to give audiences what they like in entertainment."

An unusual feature of KTYL-TV is a planned "drive-in" studio. A large plate glass window along one wall of the station will allow motorists to drive up and watch the station and studio operation without leaving their cars. Mr. Harkins uses the idea with his radio stations, KTYL-AM-FM, and says it creates great public interest and personality identification.

Additional KTYL-TV plans are for a closed-circuit TV network through the 38 theatres in the Harry L. Nace Inc. chain.

Antenna site is atop South Mountains, a high mountain range at the southern end of Phoenix. From this site the station operators expect to cover the Phoenix metropolitan area and surrounding communities which, they say, comprise 60% of Arizona's population.

Other stations which expect to get on the air about April 1 include WKNX-TV Saginaw, Mich., uhf Ch. 57 outlet represented by Gill & Perna; WCOV-TV Montgomery, Ala., uhf Ch. 20, station represented by O. L. Taylor; KELO-TV Sioux Falls, S. D., vhf Ch. 11 outlet represented by O. L. Taylor; KFDX-TV Wichita Falls, Tex., vhf Ch. 3, also represented by O. L. Taylor; KBMT (TV) Beaumont, Tex., uhf Ch. 31; WBUF (TV) Buffalo, N. Y., uhf Ch. 17; WCSC-TV Charleston, S. C., vhf Ch. 5, affiliated with all four networks and represented by Free & Peters; WFTL-TV Fort Lauderdale, Fla., uhf Ch. 23, represented by Weed Television; KFOR-TV Lincoln, Neb., vhf Ch. 10, represented by Paul H. Raymer Co.; WMAC-TV Massillon, Ohio, vhf Ch. 23; KFAZ-TV Monroe, La., uhf Ch. 43; WLBC-TV Muncie, Ind., uhf Ch. 49, to be affiliated with CBS-TV and DuMont and represented by The Walker Representation Co., New York, and Hal Holman Co., Chicago; KCSJ-TV Pueblo, Col., vhf Ch. 5, represented by Avery-Knodel; KEYT (TV) Santa Barbara, Calif., vhf Ch. 3 station to be affiliated with all four networks, represented by George P. Hollingbery Co., and WHIZ-TV Zanesville, Ohio, uhf Ch. 50, represented by John Pearson Co.

NEWEST PERMITTEES START PLANNING

HOW soon will last week's 29 newly-granted TV stations get on the air?

Here is what they told B•T:

A two month starting date for the new vhf Ch. 3 station at Harrisonburg, Va., has been set by Frederick L. Allman, president of Shenandoah Valley Broadcasting Corp., licensee of WSVA there. He said RCA equipment will be used and Devney & Co., WSVA representative, also will act for the TV outlet. WSVA is with NBC, with whom negotiations will be started for TV, Robert B. Harrington, commercial manager, said.

Beverly M. Middleton, president of WHKP-TV Hendersonville, N. C., uhf Ch. 27 grantee, told B•T that she expects the station to be on the air by midsummer. Equipment has been on order from RCA since December, she said, and a 400 ft. Lehigh tower is in storage. National representative is Headley-Reed.

Sam Booth, general manager of WCHA Chambersburg, Pa., said the target date for his new uhf Ch. 46 station is late summer. Equipment is to be RCA and national representation is to be by Forjoe & Co.

A. Hartwell Campbell, manager of Carolina Broadcasting System, for which FCC has assigned WNCT (TV), vhf Ch. 9 grantee in Greenville, N. C., told B•T Friday that the contemplated starting date is estimated at Sept. 1. RCA equipment and a Skyline tower will be used. John E. Pearson will represent the station. Mr. Campbell said network affiliation was not definite right now.

Allen M. Woodall, president and general manager of WDAK Columbus, Ga., one of the three participants in the merged uhf Ch. 28 grant for Columbus, said the station probably would go on the air by Sept. 15 and will be RCA-equipped. Network affiliation and national representative will be decided shortly, he said.

Charles Truitt, manager of WBOC Salisbury, Md., uhf Ch. 16 grantee, said the on-the-air date is set for Oct. 1. Network will be CBS-TV, he said.

Aim For Oct. 1

A. J. Bauer, general manager of WINK-TV Fort Myers, Fla., vhf Ch. 11 permittee, said that the contemplated starting date is Oct. 1. He reported that RCA equipment is specified and that Weed Television will handle representation.

Ralph D. Epperson, general manager of WPAQ-TV Mount Airy, N. C., said the starting date for uhf Ch. 55 will be this fall. Network, representative and equipment are not set.

Richard Lewin, general manager of KTRE Lufkin, Tex., said that the vhf Ch. 9 station would be on the air by Nov. 1. O. L. Taylor represents KTRE. TV network affiliation has not yet been negotiated. Conversations are going forward with several manufacturers on equipment, Mr. Lewin said.

A. R. Hebenstreit, owner of KGGM-TV Albuquerque, N. M., said target date for

operation on vhf Ch. 13 is Nov. 1 but that studio construction would begin immediately. The antenna will be located on Sandria Crest, at a 10,000 ft. elevation, making it one of the highest locations in the country, he reported. Weed Television will be representative. KGGM is a CBS-TV affiliate.

A. L. Tedesco, general manager of WCOW-TV St. Paul, Minn., told B•T that telecasting on uhf Ch. 17 is set for Nov. 15. He plans use of DuMont equipment. John E. Pearson Co. will be national representative.

Sets Year End

Wilton Cobb, general manager of WMAZ Macon, Ga., asserted that he hoped to have the new vhf Ch. 13 station, technically located Warner Robins, Ga., not far from Macon, on the air by the year's end. Equipment negotiation is now underway and a contract will be let shortly, it was stated. WMAZ is affiliated with CBS-TV and the Katz Agency is national representative.

Art Mosby, president of KGVO-TV Missoula, Mont., grantee for vhf Ch. 13, said a target date is set for spring of 1954. National representative will be Gill & Perna Inc.

NCAA TV Group Sets Meet This Week in Kansas City

NATIONAL Collegiate Athletic Assn.'s 1953 television committee will meet at the Hotel Muehlebach in Kansas City Thursday through Saturday to lay the foundation for NCAA's 1953 TV plan.

The group voted at its annual convention in Washington last January for a limited program of college football telecasts as was in effect last year. In 1952 NCAA permitted national television coverage of one college game a week, which was carried over NBC-TV.

NCAA said it has sent invitations to networks, advertising agencies, sponsors and "other interested groups" to meet with the committee on Saturday and offer their advice, suggestions and recommendations.

Network representatives who have notified NCAA that they will attend Saturday's session are Judson Bailey, CBS-TV sports director; Chris Witting, managing director of DuMont TV Network; Tom MacMahon, DuMont director of sports, and Tom Gallery, NBC manager of sports.

Woolley Leaves KDYL

EASTON C. WOOLLEY, executive vice president of KDYL-AM-FM-TV Salt Lake City, has resigned from Intermountain Broadcasting & Television Corp. Mr. Woolley had been with the stations nearly two years. He previously had been station relations director of NBC and had helped set up NBC's television network. He had joined NBC in 1933. He joined WWJ Detroit as general manager in 1935. After 14 months at Detroit he returned to NBC.

WBKB (TV) Schedule Plans

WBKB (TV) Chicago will revamp its daytime programming schedule March 30, John Mitchell, ABC vice president and WBKB general manager, said last Wednesday.

The new schedule will emphasize news, weather and service information and will shift some shows from WBBM-TV, which assumed the old WBKB Ch. 4 as part of the CBS purchase of the Balaban & Katz facilities.

YOU MIGHT COAST A MILE IN 66 SECONDS*—

BUT...

YOU WON'T GET FAR IN WESTERN MICHIGAN WITHOUT THE FETZER STATIONS!

If you want to break sales records in Western Michigan, climb aboard the Fetzer pacemaker—WKZO-WJEF in radio, WKZO-TV in television.

WKZO-WJEF RADIO

WKZO, Kalamazoo, and WJEF, Grand Rapids, are Western Michigan's outstanding radio values. Together, they deliver 57% more Kalamazoo and Grand Rapids listeners than the next-best two-station choice in these two cities—*yet cost 20% less!* Rural audiences are BIG, too. 1949 BMB figures credited WKZO-WJEF with a 52.9% increase over 1946 in unduplicated *nighttime* audience, a 46.7% *daytime* increase, and there is good reason to believe similar gains have been registered since 1949.

WKZO-TV

WKZO-TV, Channel 3, is the Official Basic CBS Television Outlet for Kalamazoo-Grand Rapids. It delivers an excellent picture to more than a quarter-million TV homes in 28 Western Michigan and Northern Indiana counties—a bigger *television* market than Rochester, New Orleans or Seattle! The October 1952 Videodex Report proves that WKZO-TV gets 106.1% more afternoon viewers—*and 213.4% more evening viewers*—than Western Michigan's other TV station! Get all the Fetzer facts, *today*. Write direct or ask Avery-Knodel.

**In 1946, the Republic Miners ran four one-mile heats at Lake Placid in 4:24.3 for an average of 66 seconds per mile.*

WJEF tops IN GRAND RAPIDS AND KENT COUNTY (CBS RADIO)

WKZO-TV tops IN WESTERN MICHIGAN AND NORTHERN INDIANA

WKZO tops IN KALAMAZOO AND GREATER WESTERN MICHIGAN (CBS RADIO)

ALL THREE OWNED AND OPERATED BY

FETZER BROADCASTING COMPANY

AVERY-KNODEL, INC., EXCLUSIVE NATIONAL REPRESENTATIVES

Gaines Joins General Teleradio As V. P. of WOR AM-TV

Vacates NBC post of vice president of owned and operated stations; Charles Denny takes over.

JAMES M. GAINES resigned as NBC vice president for owned and operated stations last week to take over, effective today (Mon.), as vice president and a director of General Teleradio Inc. in charge of its WOR-AM-TV Div.

At NBC, the company's five radio and TV stations and its national spot sales department, which in the past have reported to Mr. Gaines, will now report to Charles R. Denny, vice president for owned and operated stations, public relations and staff engineering, under whom Mr. Gaines served.

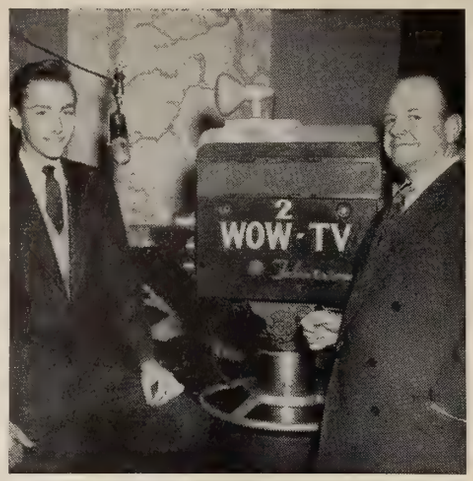
Mr. Gaines

In his new post, Mr. Gaines will be operating head of WOR-AM-TV in a capacity paralleling those of the operating chiefs of General Teleradio's Don Lee and Yankee network divisions.

His election as a vice president and board member of General Teleradio was announced by President Thomas F. O'Neil. General Teleradio, the radio-TV subsidiary of General Tire & Rubber Co., also owns controlling stock interest in Mutual.

During Mr. Gaines' tenure, the NBC O&O division developed into the largest revenue-producing division of the company, and the owned stations became the most profitable group in the country, it was pointed out.

The WOR stations, since the resignation of Theodore R. Streibert as president several months ago, have had separate managers. Warren Wade has been manager of WOR-TV, while William H. Fineshriber Jr. served as executive vice president in charge of WOR as well as executive vice president of Mutual until he resigned to join NBC as vice president and general manager of the radio and TV networks early this month.



Frank White Tours NBC Chicago; Meets Staff

NBC PRESIDENT Frank White last week wound up a series of informal "get acquainted" sessions arranged by the network's stations relations department with affiliates in different cities.

Mr. White met in Chicago with 30 executives representing NBC midwest affiliates at the Drake Hotel last Monday. He also inspected NBC Central Div. radio-TV facilities, and watched a closed circuit demonstration displaying talent on Chicago-originated programs.

Network and affiliate problems were discussed informally, with talk centering around the network's loss of Texaco Co. as sponsor for Milton Berle's *Star Theatre* on NBC-TV and switch of one or two programs to CBS, it was understood.

The meetings have been arranged by Harry Bannister, NBC vice president in charge of stations relations.

STUDIO TOUR is given John J. Gillin III (l), son of the late John J. Gillin Jr., former president of WOW Omaha, by Fred Ebener, sales manager of WOW-TV. Young Mr. Gillin is a student at Creighton preparatory school. Bill and Johnnie Gillin, cousins, were incorrectly identified as sons of the late Mr. Gillin in a recent B•T picture.

Broadcasters to Work On Cancer Fund Drive

PLEDGES of all-out industry support to the 1953 fund raising campaign of the American Cancer Society indicate that the nation's radio and TV broadcasters will do even more than in previous years to enlist the public in the fight against the "Number One Killer."

William B. Lewis, president of Kenyon & Eckhardt, chairman of the volunteer radio and television steering committee, reported last week that response from station and network officials indicates thousands of "Fight Cancer" messages will be broadcast during April, the campaign month.

Advertisers and agencies also are cooperating generously, Mr. Lewis said, by arranging for cancer announcements to be included in their sponsored programs and, in a number of cases, integrating cancer information into the programs as a major or minor dramatic theme. Writers and producers contacted by the committee have been cooperative, he said, in developing techniques and procedures for this integration.

Radio and TV stations already have received special kits prepared by Walter King, director of radio and television for ACS, and his staff.

Crosley Names Moore

GEORGE MOORE, former sales manager, WLTV (TV) Atlanta (now WLWA (TV)), has taken charge of the new Crosley Broadcasting Corp.'s national sales office in Atlanta, R. E. Dunville, president, Crosley Broadcasting, announced last week. Mr. Moore will service national and network business for WLWA. Mr. Moore, a native of Atlanta, was on the sales force of WLWT (TV) Cincinnati in 1951.

Idella Grindlay to WABC-TV

IDELLA S. GRINDLAY, formerly with NBC and Mutual, and more recently with the Eisenhower-Nixon campaign headquarters as executive assistant to the radio-TV head of the campaign for the Kudner Agency, last week was appointed station operations manager of ABC's WABC-TV New York.

KTHS Sets April as Target For Power Boost to 50 kw

KTHS Little Rock, Ark., one of the few radio stations granted an increase to 50 kw in recent years, tentatively has set April as the date for operation on maximum power, according to B. G. Robertson, general manager. Effective June 15 KTHS will become a CBS Radio affiliate [B•T, Feb. 2]. It currently is an ABC outlet.

Mr. Robertson said station coverage will be expanded on a five-to-one basis to include all Arkansas and sections of adjoining states. The station's physical layout is completely new. Studios are in the KTHS Bldg., 313 Main St., Little Rock, with the transmitter at nearby Wrightsville.

KTHS president is W. H. Bronson, and Henry B. Clay is executive vice president. The station is licensed to Radio Broadcasting Inc.

Jack Wolever, assistant manager and program director, plans a diversified schedule. The newsroom staff is headed by Bill Neel, several

Mr. Robertson

Mr. Clay

years assistant news editor at KWKH Shreveport, La. AP and UP wires are supplemented by a direct line to the U.S. Weather Bureau.

Directing the farm department is Marvin Vines, who has been doing similar work in Missouri. The department maintains contact with Agricultural Extension Service, the state university, other agricultural colleges, county agents and farmers.

Current CBS Radio affiliate in Little Rock is KLRA. No plans have been announced for KLRA affiliation when KTHS goes on CBS.

Ford Fund Approves Children's TV Show

FORD FOUNDATION trustees have renewed approval of the foundation's TV-Radio Workshop and approved production of a children's TV show as well as resumption, if the Workshop deems it desirable, of its 90-minute *Omnibus* series next fall.

Robert Saudek, workshop head, said the *Omnibus* outlook is currently under consideration, with indications good that it will be produced again next fall. Possible changes in format also are under study, the workshop's concern being that next season's series, if presented, should not be a "warmed over" version of this year's.

The 36-week run of this year's *Omnibus*, presented Sunday afternoons on CBS-TV, will end May 3. The program for some time has had its full complement of sponsors—five—which means the workshop is getting back its full production costs except for the few weeks before the program was fully sponsored. Production costs run to about $55,000 a week (exclusive of agency commission), and each sponsor pays approximately $11,000 of these, aside from CBS-TV's time charges.

Nature of the workshop's projected children's show has not been determined.

KONA-TV Off Air; To Sell at Loss

KPOA and KGU Honolulu to ask FCC permission to buy four-month-old station, second in Hawaii.

FIRST TV station owner to sell at a loss is Herbert M. Richards, principal owner of KONA-TV Honolulu, which closed down last week for 30 days with FCC approval.

Control of Radio Honolulu Ltd., grantee of KONA-TV, is being jointly bought by KPOA and KGU Honolulu, with the transfer-of-control application due to be filed with the FCC in a few weeks.

KPOA is owned by J. Elroy McCaw and John D. Keating. The *Honolulu Advertiser* owns KGU.

In order to obviate any possible difficulties with FCC on the question of two AMs owning a TV station, Messrs. McCaw and Keating have agreed to sell KPOA within a reasonable time.

The two Honolulu radio station interests are paying Mr. Richards $80,000 for his 10,000 shares of $10 par value voting stock in 10-year debentures. The debentures will bear 5% interest after the first four years. They are also assuming Mr. Richards' stock subscriptions in the amount of about $200,000. Debt of $14,200 owed by KONA-TV to Mr. Richards will be repaid at the rate of $3,000 per month after $150,000 in bank notes are repaid, it was agreed. The new owners also will lend the station $15,000 until the FCC acts on the transfer application.

KONA-TV, the second TV station in Hawaii, went on the air Dec. 15, 1952. It was operating on Ch. 11 with 5 kw visual power from Ala Moana Blvd. and Piikoi St. Last week, KONA-TV requested, and the FCC approved, a 30-day shutdown "for technical adjustments." Station got its CP, which calls for 125 kw, in October 1952.

The following are officers and major stockholders, all holding Class A non-voting common stock, except for Mr. Richards.

Walter H. Dillingham, president, 500 shares.
Herbert M. Richards, executive vice president, 15,000 shares (all of voting stock).
Arthur E. Varner, vice president, 1,000 shares.
Maurice R. Barnes, vice president.
William A. Cottrell, secretary, 1,000 shares.
Albert J. Cantrelle, treasurer, 250 shares.
Jerry Nishiki, 1,250 shares.
King W. Chapman, 1,763 shares.
Lester Irish, 5,000 shares.

The station is managed by George H. Bowles, former owner of KGB San Diego, KDB Santa Barbara, KTAB Oakland (now KSFO San Francisco), all California, and WGHB Clearwater, Fla.

On Jan. 14, Radio Honolulu Ltd. issued a prospectus soliciting subscriptions to 30,000 shares of Class A common non-voting stock at $10 par. The prospectus said $9.25 per share was to go to the company, with the other 75 cents for sales costs and commission.

The prospectus included an estimated balance sheet for Nov. 12, 1953, incorporating proceeds from the prospective $300,000 stock sale, showed total current assets of $335,674.71 (of which $223,054.71 was cash), total fixed assets of $331,866.59 and deferred charges of $72,996.44. Liabilities were listed as $219,615.22, of which $56,367.22 was listed as current.

The prospectus also indicated that the original capitalization of the company was 50,000 of Class A common non-voting stock at $10 par, and 25,000 of regular common voting stock at $10 par. Issued were 7,557 shares of regular common voting stock at $10 par. This was to be converted into non-voting shares, except for 351 to be retained by Mr. Richards.

When KONA-TV was granted its CP, it was conditioned on Mr. Richards disposing of a stock interest in the Honolulu Star-Bulletin Ltd., publisher of *Honolulu Star-Bulletin* and 25% owner of KGMB-AM-TV Honolulu.

In addition to their ownership of KPOA, Messrs. McCaw and Keating also jointly own KILA Hilo, T. H., and KYA San Francisco. Mr. McCaw personally owns KORC Mineral Wells, Tex.; 50% of KELA Centralia, Wash.; 34% of both KYAK Yakima and KALE Richmond, Wash.; and 20% of KLZ Denver, Colo. Mr. Keating is one-third owner of Northwest Television & Broadcasting Co., applicant for Ch. 12 in Portland, Ore.

Both KPOA and KGU are competing applicants for Ch. 4 in Honolulu. It is understood that those applications will be dropped upon FCC approval of the purchase of KONA-TV. It is also believed that the new KONA-TV owners may seek to switch the station from its present Ch. 11 to Ch. 4. Last fall KGU accused KPOA of bad faith in filing for the same Ch. 4 on which the *Advertiser* station had filed [B•T, Oct. 6 and Sept. 1, 1952].

First TV station in the Honolulu market was KGMB-TV. It began operating Dec. 1, 1952 on Ch. 9. Pending are five TV applications, but two of them are those of KPOA and KGU.

Handling transfer are Washington counsel A. Harry Becker for KPOA, Reed Rollo for KGU, and Maurice R. Barnes, for KONA-TV.

SPONSORS LOVE TO BE LURED WITH **SESAC** SALES AIDS!

Colorful *sales brochures,* for you to use with your rates and call letters filled in, describe SESAC's network-quality shows to your prospective sponsor. Sample shows on *audition discs* demonstrate just how his show will sound. Letter after letter from subscribers tells us that the sponsor sees . . . hears . . . and he's *SOLD!* SESAC Transcribed Library Sales Aids will land the big sponsors for you, too!

The Library includes over 4,300 varied musical selections by the finest artists, salable scripts, program notes, and a catalog of bridges, moods and themes. SESAC is a *complete* transcription service—the *lowest-priced* in the field.

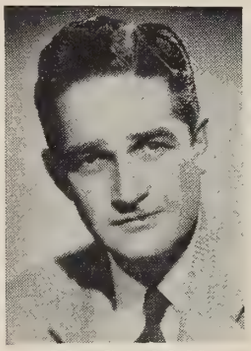
WHEN (TV), WBTV (TV) BOOST POWERS

TWO pre-freeze TV outlets, WHEN (TV) Syracuse and WBTV (TV) Charlotte, N. C., boosted their power in the past 10 days.

WHEN (TV) Syracuse increased its effective radiated power to 190 kw visual, 100 kw aural, March 7, culminating a $300,000 project which began late last summer.



For the last three months the station has been operating with 50 kw visual ERP. A 20 kw amplifier built in GE's Syracuse Electronics Park plant and the first from its production line was installed at WHEN's Sentinel Heights transmitter to make the power increase possible.

Mr. Adanti

Paul Adanti is general manager of the Meredith-owned station, operating on vhf Ch. 8, which now expects its coverage will be expanded beyond a former perimeter that included Rochester, Watertown, Utica and Ithaca—a 70 mile radius.

WBTV (TV) Charlotte's ERP of 16.3 kw visual was increased March 9 to 50 kw visual. Charles H. Crutchfield, executive vice president and general manager of WBT and WBTV, said an investment of $125,000 was necessary for the present power step-up.

Mr. Crutchfield

The vhf Ch. 3 station will go to the maximum allowable power of 100 kw within about 60 days, as soon as the necessary antenna equipment arrives.

M. J. Minor, chief engineer, said the power increase to 50 kw will mean a noticeable improvement in picture quality in the station's fringe reception areas, about 75 to 125 miles from its Spencer Mountain transmitter.

KEYS to St. Petersburg are given Dr. Allen B. DuMont (2d l), by Mayor Samuel G. Johnson. Present are Major George Robinson (l), manager, WSUN St. Petersburg, and E. C. Robinson (r), president of the Chamber of Commerce there. Dr. DuMont was cited for his pioneering work in television. Dr. DuMont spoke at a TV conference in Tampa.

WTAG Names Christal

DAYLONG presentation program Saturday preceded appointment by WTAG-AM-FM Worcester, Mass., of the Henry I. Christal Co. yesterday (Sunday) as national representatives. Henry I. Christal and Irvin Gross headed a group of 15 from the representative firm. WTAG executives included Herbert L. Krueger, vice president-general manager; Robert J. Brown, commercial manager; Richard L. Gravel, local sales manager; Bernard J. LaPlante, research and sales promotion; A. J. Brissette, program manager; Andrew C. Fuller, community service director; Prof. H. H. Newell, consulting engineer and E. A. Browning, chief engineer.

WSDC Remote Studios

THREE-HOUR stage show marked opening of auxiliary studios for WSDC Marine City, Mich., on the mezzanine of the Jewel Theatre in nearby Mount Clemens. Show attracted a paid audience of 1,500 persons, with another theatre nearby opened to handle an overflow crown of 1,000.

KTUL Dramatization

KTUL Tulsa alarmed several listeners during a "Brotherhood Week" contest among radio stations in that city when it redramatized via tape recording a 1947 tornado disaster which took place in the Woodward, Okla., area, and the station's part in covering the disaster, together with the "brotherhood" displayed by religious and other groups in aiding the tornado victims. A realistic bulletin aired by KTUL News Director Jack Morris, describing the extent of deaths, injuries and damages, startled a number of listeners who had tuned in late and did not know the bulletin was simulated.

Mr. Morris

Chattanooga TV Workshop

SOUTHERN Television Inc., applicant for vhf Ch. 12 in Chattanooga, is releasing a brochure on conclusions reached at its TV workshop on "Television Programming in the Public Interest." Presented as a public service for all members of the community, the workshop featured speakers representing all television interests, and officers of Southern Television Inc.

DISCUSSING the newly re-franchised Baltimore Colts in the National Professional Football League at a special meeting of the Baltimore Advertising Club are (l to r) John Surrick, vice president, WFBR Baltimore; Armand Grant, assistant general manager and director of sales for WAAM (TV) Baltimore; Jake Embry, sales manager, WITH Baltimore; Bert Bell, football league commissioner, and William McMillan, attorney for Baltimore football interests.

Spot Rate Estimator

NEW, revised edition of Free & Peters' "TV Spot Rate Estimator," which through dial turnings will show accurate gross cost estimate for almost any TV spot situation, now is being distributed nationally to advertisers and agencies. Lloyd Griffin, F & P vice president in charge of TV, in announcing the new edition of the estimator, pointed out that it shows a 35% rise in TV homes in 62 established markets during the past year, whereas TV spot advertising costs in those markets have risen only 15%.

ARCHITECTS: VOORHEES, WALKER, FOLEY AND SMITH, NEW YORK; CONTRACTORS: BRYANT AND DETWILER, DETROIT; STEEL FABRICATED AND ERECTED BY WHITEHEAD & KALES COMPANY, DETROIT

SPIDER WEB OF STEEL—The picture above would make a good subject for a guessing game. What does it show? . . . Gargantuan umbrella? . . . Ferris wheel? . . . The fact is, those arms you see that radiate like spokes are large Bethlehem steel beams, tied together by smaller Bethlehem beams forming concentric rings. The entire structure is the framework for a 100-foot-diameter dome covering a portion of the Ford Motor Company's new engineering building, under construction at Dearborn, Michigan. This unusual example of steel construction has many elements of interest. Most significant is the way it illustrates the adaptability of steel, how well steel lends itself to the solution of so many problems in construction and design.

BETHLEHEM STEEL

ANA MEET STARTS WEDNESDAY; AGENDA INCLUDES TV SESSION

Television will be a major topic at the three-day session, which will bring together national advertisers and speaker-experts from all advertising branches. Network speakers are Frank Stanton, CBS president, and Frank White, NBC president.

TELEVISION is being given a session all to itself at the 44th spring meeting of the Assn. of National Advertisers to be held Wednesday through Friday at the Homestead, Hot Springs, Va. [AT DEADLINE, March 9].

Friday afternoon TV session will open with two off-the-record talks given by network presidents: Frank Stanton of CBS will talk about television's cost to the advertiser and its contribution to the sponsor; Frank White of NBC will discuss the joint responsibility of the advertiser with the broadcaster for TV programming. This part of the meeting will be open only to ANA members and invited advertiser guests.

Commercials will be discussed in the second and open part of the Friday afternoon session. Arthur Bellaire, head of radio and TV commercial copy for BBDO, will discuss the problem of reducing costs of TV commercials while increasing their impact. He will cite specific successful accomplishments.

George Nelson, Nelson Ideas, Schenectady, N. Y., will concentrate on one type of broadcast commercial—the jingle. He will illustrate his talk with examples of jingles which have sold goods when used on radio and TV. E. W. Ebel, director of advertising, General Foods Corp., and chairman of the ANA radio and TV steering committee, will preside over the session.

Session on Management

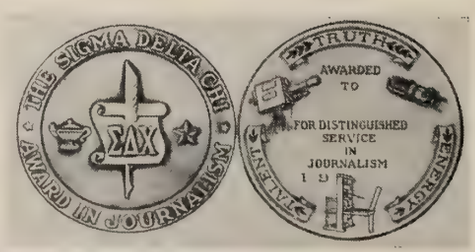
The spring meeting will get under way Wednesday morning with a session on the improvement of advertising management leading to greater company profit.

George B. Park, manager of advertising and sales promotion of General Electric Co.'s marketing services division, will serve as chairman for this session, which will include talks by Dr. Richard G. Gettell, chief economist of Time Inc., on "The Economics Inherent in the 1953 Marketing and Advertising Picture"; Marvin Bower, partner, McKinsey & Co., management consultant, on "Advertising Organization and Approach for Today's Competitive Markets;" Mr. Park on "How the GE Management Has Positioned Advertising to Gain the Greatest Benefit from Its Resources and Skills;" Robert J. Keith, vice president, Pillsbury Mills, on "A Practical Idea to Help Coordinate Advertising and Other Management Functions;" Charles L. Whittier, vice president (retired), Young & Rubicam, on "Organization Alone Won't Do the Trick—Advertising Needs That Creative Spark."

New frontiers for advertising will be discussed at the Wednesday afternoon session, to be chairmanned by George J. Abrams, advertising manager, Block Drug Co.

During this session, Richard D. Crisp, director of marketing research, Tatham-Laird Inc., will describe a new way to screen advertisements to secure the greatest impact; Dr. Joel Dean, Joel Dean Assoc., will discuss right and wrong ways for arriving at an advertising budget; Mrs. Lucille Goold, vice president, Hewitt, Ogilvy, Benson & Mather, will talk about (and from) the woman's point of view; Dr. Ernest Dichter, president, Institute for Research in Mass Motivations, will ask "Is your advertising talking yesterday's language?"

Case histories of successful campaigns will be given Thursday morning: Minute Rice by H. M. Cleaves, marketing manager of associated products for General Foods Corp.; Estate Stoves by L. W. Selmeier, director of advertising and sales promotion, RCA Estate Appliance Co.; Blensol by Jack Dowd, president, Dowd, Redfield & Johnstone; Miller High-Life Beer by Vernon S. Mullen Jr., advertising manager, Miller Brewing Co.; "Order-matic" selling of socks by George Guglielmone, vice president, Esquire Socks; pre-planning industrial advertising by J. Stanford Smith, advertising and sales promotion manager, GE apparatus sales division. George Oliva, director of advertising, National Biscuit Co., and Carl J. Smith, assistant manager, advertising and sales promotion, Shell Oil Co., will be co-chairmen at this session.



Three off-the-record topical sessions are planned for Thursday afternoon, each with a moderator and a panel of ANA members to serve as leaders in the discussions. TV apparently is going to be the major topic discussed, as four of the nine topics suggested by ANA deal with this medium.

A two-part session is scheduled for Friday morning, which will open with a panel on the problem of increasing public confidence in all advertising. Second part will be on public relations advertising. C. E. W. Stevens, advertising manager, Lockheed Aircraft Corp., and T. V. Fetherston, assistant manager, general publicity department, Union Carbide & Carbon Co., will describe the use of advertising in employe relations. Seward T. Salvage, advertising manager, Timken Roller Bearing Co., will report on the use of advertising to present company views on local and national issues.

MBS will provide entertainment for the annual dinner on Thursday.

NARTB Convention Additions

DAGE ELECTRONICS Corp., camera firm, will have an exhibit at NARTB convention in Los Angeles April 28-May 1, according to Arthur C. Stringer, manager of convention exposition [B•T, March 2]. AP also is planning reception facilities at the convention.

SIGMA Delta Chi bronze medallion for Distinguished Service in Journalism, with new reverse design (r) by Victor E. Bluedorn, executive director, shows symbols of television, radio and the press, and the fraternity's watchwords, "Talent, Energy and Truth." Front side (l) is unaltered.

50 STATIONS JOIN SRA SPOT CRUSADE

MORE than 50 radio stations signed as subscribers to the "Crusade for Spot Radio" [B•T, March 9, 2] by Wednesday, less than two weeks after the "Crusade" plan was announced by Station Representatives Assn., SRA reported.

In releasing the list of stations which will help finance the drive, SRA pointed up its plan for promotion of spot radio.

Stations which have joined include: WOOF Dothan, Ala.; WEAV WIRY Plattsburg, N. Y.; WMCA New York; WSPB Sarasota, Fla.; WDSU New Orleans; WCSC Charleston, S. C.; WGCM Gulfport, Miss.; WACO Waco Tex.; WSAV Savannah; WCAX Burlington, Vt.; KOEL Oelwein, Ia.; WDSM Superior, Wis.; WPTF Raleigh; WKLO Louisville; WTRC Elkhart, Ind.; WJNO West Palm Beach; WHIZ Zanesville, O.; WSTV Steubenville, O.; WKLA Ludington, Mich.; KUJ Walla Walla; WSAZ Huntington, W. Va.; WDBJ Roanoke; KMUS Muskogee, Okla; KWPC Muscatine, Ia.; WSYR WFBL Syracuse; WWDC Washington; WRAP Norfolk; WGBF WIKY Evansville, Ind.; WGBI Scranton; WQAM Miami; KIDO Boise; WLET Toccoa, Ga.; WBOW Terre Haute; WNAX Yankton; WKYB Paducah; KXOK St. Louis; WBNS WGBA Columbus, Ga.

KROS Clinton, Ia.; WTOL Toledo; KREM, KXLY Spokane; WFBR Baltimore; KRMG Tulsa; WIND Chicago; WCOA Pensacola; KLIX Twin Falls; WBNS Columbus, O.; KFJZ Fort Worth; WGAC Augusta, Ga.; WCMI Ashland, Ky.; KHMO Hannibal, Mo.

Reporting on station response to the Crusade at the SRA quarterly meeting Wednesday, John Blair, SRA president, told members they should be pleased with the requests from stations for information on how they can help. Many stations have offered to do all they can at the local level to contribute to national spot business, he said.

H. E. Cummings, radio station representative of Jacksonville, was elected to SRA membership. Members also voted to increase the number of directors from seven to eight and elected George E. Brett, vice president of The Katz Agency, as the new director.

N.Y. Forum Calls Rate Cuts 'Bad Business and Ethics'

RATE CUTTING was decried as bad business and bad ethics by a panel speaking Thursday evening at a forum session of the Radio & Television Executives Society, New York.

Panel members agreed that, although under-the-table rate cuts are reprehensible, rate adjustments are inevitable in a changing competitive situation and all right as long as they are published and made available to all clients.

T. F. Flanagan, managing director, Station Representatives Assn., said the rate-cutting situation was created by networks, who gave in to advertiser pressure over protests of affiliates. "The ethics of stations in all matters is far better than that of the networks, which should be setting the standards," he declared.

Mary McKenna, timebuyer, pointed out that when one buyer is given a special deal, exaggerated rumors of it circulate rapidly, making it difficult for the station to sell to other advertisers at any price. Gordon Gray, vice president, Goodwill Stations (WJR Detroit, WGAR Cleveland), blamed rate cutting on inexperienced station owners. "It's hard to sit still and lose business," he said, "and some people just can't do it, but will take business at any price."

The advertiser could stop rate cutting any time he really wants to, according to Robert Reuschle, sales representative of WHUM-TV Reading. Rate cutting, "far more than television, is killing radio by discouraging timebuyers . . ."

What did we do with Miss Hidden's money?

Miss Elizabeth Hidden lives in Redlands, California, and is a Professor of Education at the University of Redlands.

1. In 1949 Miss Hidden bought 100 shares of Union Oil stock. Last year she invested in 30 more shares, bringing her total to 130, which is our shareowner's average. By these purchases, Miss Hidden became one of the millions of American capitalists who own stock in American corporations. What did we do with her money?

2. Like the amounts entrusted to us by our 40,301 other shareowners (half of whom are women), Miss Hidden's money has gone mainly into new "tools" for our business—things like drilling rigs, pipe lines, refinery equipment, and into our research laboratories and the work we do in developing new wells. All these things take money.

3. Because we put Miss Hidden's money to work in these productive ways, we were able, under the American system of free enterprise, to *earn something* with it. That is, we made a profit. Miss Hidden participated in this profit, along with our other shareowners. In 1952 she received dividends amounting to $260. She could sell her stock at any time, but chooses to remain a part owner of our business.

4. This example shows how most American industry is financed today. It also illustrates one of the great and fortunate facts of our economic system. In investing with us, Miss Hidden is of course considering her own personal interests. But at the same time she is helping in the vital development of U. S. oil resources, the expansion of refining facilities, the making of new jobs, the increase of worker income, and the creation of more and better petroleum products for everyone. She is contributing to a higher standard of living and to a stronger America.

UNION OIL COMPANY
OF CALIFORNIA

INCORPORATED IN CALIFORNIA, OCTOBER 17, 1890

This series, sponsored by the people of Union Oil Company, is dedicated to a discussion of how and why American business functions. We hope you'll feel free to send in any suggestions or criticisms you have to offer. Write: The President, Union Oil Company, Union Oil Building, Los Angeles 17, California.

MANUFACTURERS OF ROYAL TRITON, THE AMAZING PURPLE MOTOR OIL

ABC LINES UP NEW BUSINESS; WORKS ON ADDITIONAL PLANS

ABC, showing new business spark because of its merger with UPT, signs Pepperell for Coronation coverage; sells WABC show to Knickerbocker; prepares "ABC Album" series; picks up Hickman show, and continues quest for more talent. Physical plant grows and more affiliates join.

REJUVENATED ABC was bustling last week with both plans and new business:

• Although details remained to be worked out, the network lined up a sponsor for at least its radio coverage of Queen Elizabeth's Coronation June 2—Pepperell Mfg. Co. (sheets and fabrics).

• What was described by ABC spokesmen as the largest amount of local time ever sold to a single TV sponsor was sold by ABC's New York key television outlet, WABC-TV, 11 p.m. to midnight—Monday through Friday —to Knickerbocker beer.

• Even before the Knickerbocker-WABC-TV contract, which was reported unofficially to approximate $750,000 a year, officials announced that during the month since the merger of ABC and United Paramount Theatres, $4.5 million in business had been placed on the network's owned and operated radio and TV stations—high mark for any month in the network's history.

• Details of ABC-TV's ambitious *ABC Album* dramatic series [B•T, March 9] were being set, and plans were afoot for the launching of a comparable radio series, both to start in April.

Construction Underway

• Construction was underway on new ABC executive quarters on the fourth floor at 7 W. 66th St. in New York, with completion slated by the end of this month, while preparations were being made for remodeling the former Eagles Bldg. in San Francisco, in a project expected to cost at least $1 million and tentatively due for completion early in 1954, to house all ABC San Francisco operations.

• Expansion of network facilities continued, with announcement of two new radio affiliates, effective next month, bringing the radio total to 363 stations. ABC-TV affiliates' total, expanded by the addition of 14 stations a fortnight ago [B•T, March 2], stands at 95.

• AB-PT President Leonard H. Goldenson, ABC President Robert E. Kintner, Executive Vice President Robert H. O'Brien, Programs and Talent Vice President Robert M. Weitman, and Engineering and General Services Vice President Frank Marx were set to leave New York on Thursday (March 19) on an "extended" trip to the West Coast in quest of new talent and to inspect ABC facilities, and, for new officials to get acquainted with employes in Chicago, San Francisco, and Los Angeles.

• In the TV network new business line, ABC picked up General Cigar Co.'s *Herman Hickman Show*, currently seen on NBC-TV on Friday nights. Show will move to ABC-TV and be seen Sundays at 6:30-45 p.m. EST, effective March 29.

Details of the contract for Pepperell sponsorship of ABC radio's coverage of the Coronation in London were not complete on the number of hours to be provided, but it was thought that coverage would start about 5:30 a.m. on June 2, day of the Coronation. Benton & Bowles, New York, is the Pepperell agency.

The projected Knickerbocker late-evening show on WABC-TV will be a "star studded" series, officials said. Although the identities of its stars were not officially announced, it was understood they would include Jimmy Blaine, Ray Malone and Betty Anne Grove, plus two guest stars each night. Plans for the program were announced by Slocum Chapin, ABC vice president for owned stations and general manager of WABC-TV, after the contract was signed by President Kintner of ABC, and Trevor Adams, WABC manager; Frederick M. Linder, president of Jacob Ruppert Brewery (Knickerbocker beer), and Milton Biow, chairman of the Biow Co., agency for Knickerbocker.

Of the approximately $4.5 million in sales by ABC's owned radio and TV stations during the month between Feb. 9 and March 9, "the greatest volume . . . can be attributed directly to the strengthened position of the ABC radio and TV networks as a result of" the ABC-UPT merger, Ted Oberfelder, vice president in charge of owned radio stations, and TV Owned Stations Vice President Chapin announced jointly. Merger was effective Feb. 9.

The $4.5 million consisted of around $1,250,000 in national spot business placed on the owned radio stations (WABC New York, WENR Chicago, WXYZ Detroit, KECA Los Angeles, and KGO San Francisco) and $3,250,000 placed on the owned TV outlets (WABC-TV New York, WBKB (TV) Chicago, WXYZ-TV Detroit, KECA-TV Los Angeles, KGO-TV San Francisco), Messrs. Oberfelder and Chapin reported.

The new *ABC Album* TV series is scheduled to be seen Sundays at 7:30-8 p.m. EST, starting April 12.

Each of the half-hour shows, it was said, might be used as the basis of a series in itself.

Authorities said *Album* would offer the viewer "a taste" of all types of drama and other entertainment that the network regards as attractive to the public, without relying on contrived situations or concentrating on one or two themes.

They cited the *Album* plans as being in line with the network's programming objective of developing a variety of program types, to provide a wider scope of appeal for both advertisers and the public. The signing of George Jessel for his exclusive radio and TV services as a producer and a performer [B•T, March 9] was described as another important move in this direction as the network undertakes to achieve competitive status alongside other radio-TV networks.

Stage and screen actor Donald Cook will serve as m.c. for the entire *Album* series, production costs of which were placed at $12,000 to $18,000 per show.

The opening program, on April 12, will feature actor Paul Douglas in *Justice*, based on case histories in the files of the legal aid society, while the second will present child actor Brandon de Wilde in *Jamie*, the story of an orphan. Stars slated for appearance in later productions include Alan Mowbray, Allen Jenkins, Walter Slezak, and others.

The *Album* shows will originate from New York and Hollywood, some live and some specially filmed. Herb Brodkin will be executive producer for the series, while Hollywood production will be under the supervision of Cecil Barker, ABC program production manager for the Western Div.

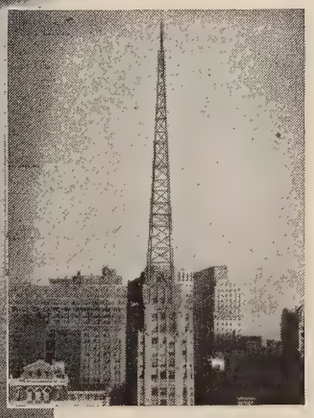
Details of a radio counterpart to *Album*, to be known as *ABC Caravan*, still are being developed. It, too, will be a half-hour show and is scheduled for Friday nights, probably starting April 17.

New Offices

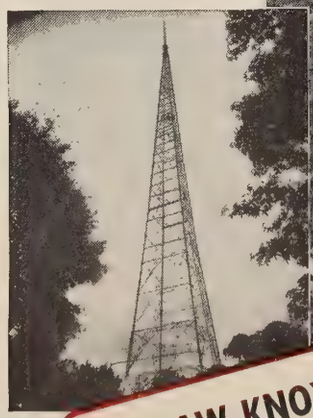
In the construction field, new offices for ABC's top executives—currently in the RCA Bldg.—are slated for completion by March 31. They comprise the fourth floor of the ABC quarters at 7 W. 66th St., New York, which also consists of main, mezzanine, second, third and fifth floors and penthouse.

The Eagles Bldg. in San Francisco, where ABC operations in that area ultimately will be consolidated, is described as excellently designed for radio-TV use, consisting of four stories with mezzanine and having a main-floor auditorium to be used as a TV audience studio.

The new radio affiliates announced by the network last week are WAPO Chattanooga, a 5 kw daytime and 1 kw nighttime outlet on 1150 kc, which effective April 7 will replace WDEF in the ABC lineup, WDEF switching to NBC; and WHKP Hendersonville, N. C., a 250 w station on 1450 kc, which will be added to the ABC network effective April 1.



WAPO is owned by WAPO Broadcasting Service, with R. G. Patterson as general manager. WHKP is owned by Radio Hendersonville Inc., with Kermit Edney as manager.



ABC RADIO Stations Advisory Committee, meeting in New York Feb. 27 for the first time following ABC-United Paramount Theatres merger, included (l to r): Seated, Robert E. Kintner, ABC president; Roger W. Clipp, WFIL Philadelphia; Leonard H. Goldenson, AB-PT president; Harold V. Hough, WBAP Fort Worth; Edward J. Noble, AB-PT finance committee chairman; standing, Robert M. Weitman, programming and talent vice president; Robert H. O'Brien, executive vice president; Robert H. Hinckley, vice president in charge of the Washington office, Frank Carman, KUTA Salt Lake City; T. B. Lanford, KRMD Shreveport; Verl Bratton, WKTY La Crosse, Wis.; A. D. Willard Jr., WGAC Augusta, Ga.; J. P. Williams, WING Dayton, and Charles T. Ayres, ABC radio network vice president.

Designs Unlimited

WHATEVER factors determine the type, height and location of your TV Antenna Tower, you can depend on Blaw-Knox to give you *more for your money*. Does the job call for a self-supporting structure atop a mid-town building or a sky-scraping guyed tower out in the open? Do you prefer a square design or triangular? Blaw-Knox builds them all—and every one is backed by more than four decades of experience in this field. If you are anticipating a TV license, write or phone today for capable engineering assistance with your plans.

NBC RAISES RATES ON TV PRODUCTION

Network's TV rate card revision for production facilities and services, effective March 28, includes separate rates for cameras, studio theatre usage.

A REVISION of its rate card for TV network production facilities and services, establishing a new format for such charges and boosting some of them, was announced by NBC last week, effective March 28.

Officials emphasized that it was the first such increase in 31 months as compared to "periodical" increases by some TV networks; that no increase is being made for certain facilities, and that the charges being raised still will be competitive with those of other networks. Further, they said, the increases largely are in areas over which the sponsor "has control"—and they urged advertisers to take advantage of this "control" by pre-planning with network authorities to cut down production costs.

Increases stemming from recent pay boosts for the National Assn. of Broadcast Engineers & Technicians and certain other price rises will become effective March 28 for all advertisers. Others will be applicable March 28 to new advertisers, with sponsors on the air as of that date getting the customary six months' protection.

Unveiled by William V. Sargent, assistant comptroller for the networks, and Edward Stegemand, program and production financial manager, the new card features separate rates for cameras and studio theatre usage.

Standard and premium rates—the latter applicable for camera usage prior to the eight-hour period before the end of a show—are set up for one, two, three and four-camera usage respectively. These gross hourly rates range from $275 standard or $300 premium for one camera to $425 or $470 for four. These include cameras, booms, technical director, technicians, monitors, and stagehands, the crew size being based on the number of cameras involved.

Changes in Per-Day Basis

Studio-theatre charges are on a per-day basis and range from $300 for Studio 6B to $1,350 for Center Theatre, both in New York. These rates, which are in addition to the regular hourly camera or dry usage charges, include two additional stagehands in four theatres, and for all theatres, as required and available, "normal use of the marquee, two additional monitors, big screen projector, one Dynabeam, page boy service, normal ticket printing and distribution, and public address system technician."

Dry-usage rates for the studio theatres range from $125 to $240 gross per hour, while the rate for all other studios is $100 gross per hour. These rates include use of studio and three stagehands, and, if required, services of floor manager and associate director for the period of usage. Breaktime in camera and dry usage will be charged at the rate of $100 gross per hour.

The NBC films studio rate will be $150 gross per hour, with a $75 minimum.

Among other services and facilities specified in the card, the gross charge for use of a mobile unit will be $1,250 per eight-hour day, portal to portal. This will include a maximum of three cameras, seven microphones, nine technicians, and one hour of camera usage at the point of origination. Additional hours of camera usage will be at $385 gross per hour.

SEQUENCES from new 20th Century-Fox motion pictures, will be telecast on Ed Sullivan's *Toast of the Town* on CBS-TV [B•T, March 9]. Two-year contract for the feature, also providing for guest appearances of the movie studio's star players, is signed by Charles Einfeld, (l), a vice president of 20th Century-Fox and Mr. Sullivan.

'Toast' Signs With MGM For TV Movie Releases

GROWING trend toward cooperation between motion picture and TV industries was apparent last week with announcement that CBS-TV's *Toast of the Town* and MGM have signed an agreement for a series of "miniature world premieres" of the film company's pictures as a regular feature of the Sunday night TV show.

A similar agreement was announced two weeks ago between *Toast of the Town* and 20th Century-Fox Film Corp. [B•T, March 9]. This move was considered a significant breakdown of a policy among larger motion picture companies against showing their films in any form on television.

AT&T to Add 1,200 Miles

NEW television circuits will be provided with the addition of 1,200 miles to present microwave radio relay networks in the Midwest, AT&T's Long Lines Dept. announced last Wednesday.

The projects involve Chicago-St. Louis links, scheduled for completion this fall, a 423-mile radio relay network extension, linking Chicago, Milwaukee and Minneapolis, and completion of a route joining Pittsburgh and St. Louis via Indianapolis and Terre Haute.

Winckler Named at CBS-TV

E. CARLTON WINCKLER, production manager in the CBS-TV operations dept., last week was named production manager of the program dept. of the network, effective immediately.

Savage to NBC Film Post

APPOINTMENT of David Savage, manager of WCBS-TV New York's film department, as manager of film procurement for NBC starting tomorrow (Tuesday), was announced last week by Robert W. Sarnoff, vice president in charge of NBC's film division. In his new post, Mr. Savage will report to Carl Stanton, director of the NBC film division.

NETWORKS READY FOR ATOM TESTS

RADIO and television networks were winding up preparations last week for coverage of the atomic explosion test to be conducted at Yucca Flat, Nev., tomorrow (Tuesday) by the Atomic Energy Commission and the Federal Civil Defense Administration.

Through cooperation of the broadcasting industry and the Advertising Council, radio and TV coverage was arranged to alert citizens to the need for stepping up civil defense activities and to appeal to all Americans to donate blood for civilian emergency stockpiles.

Extensive preparations have been made by ABC-AM-TV, CBS-AM-TV, NBC-AM-TV and Mutual to describe the blast, and the effects of heat and radiation. Coverage will encompass activities preceding and following the explosion, including on-the-spot word and picture description of damages eight hours after the blast.

Time-table for the coverage on radio and TV networks tomorrow includes a description of the actual explosion at about 8:20 a.m., an appraisal of the damage at 4:30 p.m. and reports of the event later that night.

Live TV coverage of the atomic blast will be made by pooled facilities of the networks and stations in cooperation with the Council. NBC master control in Hollywood will be the point where radio and TV reports from Yucca Flat will be disseminated to all networks.

Klaus Landsberg, vice president and general manager of KTLA (TV) Los Angeles, also carrying the telecast, directed installation of technical facilities and set up the relay system, similar to that which he set up for last year's coverage of atomic tests.

The entire project, dubbed "Operation Doorstep," consists of three major phases with coverage by three pool telecasts and one pool radio broadcast. The first telecast on preparations was to be broadcast yesterday (Sunday), 2-2:30 p.m. EST, with Morgan Beatty of NBC and Bob Trout of CBS at the microphone. Phase two will be a report on the actual explosion and will be carried tomorrow at 8-8:30 a.m. EST with Morgan Beatty and Walter Cronkite of CBS providing the description. Mr. Beatty and Mr. Cronkite will report phase three of "Operation Doorstep"—a commentary of after-effects—on Tuesday 4:45-5 p.m. Radio coverage of the blast will be handled by Charles Collingwood of CBS and Bob Garred of ABC. Individual radio networks may use the single land line to Yucca allotted for radio except during the 8-8:30 a.m. pool broadcast.

DuMont plans to use filmed coverage of the blast on various network news programs, starting tomorrow night.

AB-PT Pays First Dividend

FIRST dividend on the new AB-PT stock—14½ cents per share on outstanding preferred and 25 cents per share on outstanding common—was announced last Wednesday by President Leonard H. Goldenson. The dividends are payable April 20 to holders of record March 27.

Mr. Goldenson explained the 14½ cents declared payable on the preferred stock is the pro rata portion of the regular 5% $20 par preferred, because of the consummation of the merger of ABC and United Paramount Theatres into AB-PT on Feb. 9.

The AB-PT president also announced the company has arranged for the Bank of New York to buy and sell scrip certificates for fractional shares as agent for the stockholders. The company will pay the costs of the bank's services, which will be available until June 30 to stockholders wishing to sell their scrip or to round it out into full shares.

CBS ARRANGES FOR MORE LOANS

COLUMBIA Broadcasting System last month arranged for loans of as much as $25 million from two insurance companies—Prudential Insurance Co. of America and Metropolitan Life Insurance Co.—and made first use of this borrowing power by making an immediate loan of $5 million.

CBS also last month revamped its employment agreement with Frank Stanton, to extend his tenure as president for an additional five years, or until Dec. 31, 1963.

Both transactions were revealed last week in a required form filed with the Securities and Exchange Commission by CBS, which had not previously announced the moves.

New loans, when and if fully utilized by CBS, will double the corporation's outstanding indebtedness to the two insurance companies, to whom CBS now owes $25 million. This money was borrowed under three individual loan agreements.

On Jan. 20, 1949, CBS borrowed $5 million from Prudential at 3½% interest, the loan to mature Jan. 15, 1964.

Two years later, April 20, 1951, just prior to the network's entry into the tube and receiver manufacturing business through the acquisition of Hytron Radio & Electronics Corp. and its set-making subsidiary, Air King Products Co. (renamed CBS-Columbia Inc.), CBS borrowed $15 million, $10 million from Prudential and $5 million from Metropolitan, both at 3½%. These loans mature Jan. 15, 1971.

At the end of that year—Dec. 27, 1951—another $5 million was borrowed, $3.5 million from Prudential and $1.5 million from Metropolitan, at 3⅞% interest.

These loans, still outstanding, bring the total CBS indebtedness to these two companies to $25 million. The new agreement, effective Feb. 4, 1953, empowers the network, manufacturing and recording corporation to double this indebtedness with additional loans at 4¼% to mature Jan. 15, 1973. As in the previous loans, CBS will issue promissory notes for the amounts borrowed.

Terms of Agreement

New agreement calls for the $25 million total to be divided between the two lending companies on a 68/32 basis—$17 million from Prudential and $8 million from Metropolitan—with individual loans to be made in the same ratio. First loan under the new contract, $5 million borrowed Feb. 4, was divided $3.4 million from Prudential and $1.6 million from Metropolitan.

Notes issued by CBS under this latest agreement are subject to repayments of $1,650,000 annually, beginning Jan. 15, 1959, and on Jan. 15 each year thereafter until paid.

Employment agreement of Mr. Stanton with CBS, entered into April 18, 1949, called for his full-time services as "a senior executive" until Dec. 31, 1958, with Dec. 31, 1953, the earliest date on which CBS could terminate the employment period, and for part-time services as an advisor and consultant for the next ten years, or until Dec. 31, 1968. Mr. Stanton's base salary during his full-time service period was set at $100,000 a year, plus bonuses. His salary as a consultant was to be $25,000 a year for the ten-year period.

As amended by the modification agreed on Feb. 10, 1953, Mr. Stanton will continue his full-time services for CBS until Dec. 31, 1963. The date on which CBS may terminate the employment period was concurrently postponed for three years, or until Dec. 31, 1956. Mr. Stanton's consultive period, under the modified contract, will run from Jan. 1, 1964, to Dec. 31, 1973.

CBS, in consideration of Mr. Stanton's acceptance of the increased term of service as a top executive, has granted him an option to purchase 33,000 shares of class A stock, $2.50 par value, for $38.25 a share. This is 95.6% of $40, closing price of the stock on Feb. 10.

New agreement also changes Mr. Stanton's compensation during his period as advisor and consultant to CBS from the $25,000 a year originally stipulated to "50% of his basic compensation (exclusive of bonus) during the last year of the term of employment, adjusted for changes in the 'consumers' price index for moderate income families in large cities, published by the Bureau of Labor Statistics, Dept. of Labor." Unless his base pay is changed, this would mean a fee of $50,000, more or less according to the price index, per year.

These changes in compensation, the agreement states, "Columbia is willing to make" in order to "obtain the additional services of Mr. Stanton and in order to provide additional incentives for him . . . affording him an opportunity to acquire a substantial proprietary interest in Columbia."

ABC-TV Promotes Smith

PROMOTION of Stanley Smith, account executive at ABC-TV since May 1950, to eastern sales manager of the television network was announced last week by Charles Abry, national sales manager of ABC-TV.

Mr. Abry held that post until he was appointed to his present position.

Godfrey Surgery to Interrupt Heavy Radio-TV Schedule

CBS President Frank Stanton announced Thursday that Arthur Godfrey—currently on CBS Radio for some nine hours a week and on CBS-TV for five and a half, and who, it has been estimated, represents some $15 million in annual billings to CBS—decided to undergo surgery which will keep him off his programs for some time.

Surgery is designed to rectify a hip injury which Mr. Godfrey received in a near-fatal automobile accident some 20 years ago and which left him with a slightly discernible limp.

Starting about May 4, the announcement said, Mr. Godfrey will be absent from his 90-minute Monday-through-Friday daytime shows for around six weeks. He will be away from the evening shows—*Arthur Godfrey and His Talent Scouts*, a half-hour simulcast on Monday, and *Arthur Godfrey and His Friends*, an hour-long telecast on Wednesdays—for the months of May through August. His two half-hour Sunday afternoon shows, both of which consist of taped excerpts from his other programs, will continue.

Robert Q. Lewis will substitute on the morning shows, Garry Moore on *Talent Scouts*, and guest stars on *Godfrey and Friends*.

Heads N.Y. ARC Radio-TV

ABC President Robert E. Kintner will head the radio-TV committee of the 1953 American Red Cross fund raising campaign in New York, Sigurd S. Larmon, president, Young & Rubicam, and campaign chairman for advertising, publishing, and entertainment fields, announced.

NOW!
a big league name!
a big league show!

New Products Feature Electronics Parts Show

A MULTI-MILLION dollar exhibition of electronic component parts and equipment is expected to draw a record attendance of parts distributors at the 1953 Electronic Parts Show at the Conrad Hilton in Chicago May 18-21.

Show is co-sponsored by Radio-Television Mfrs. Assn., Assn. of Electronic Parts and Equipment Mfrs., the National Electronic Distributors Assn., West Coast Electronic Mfrs. Assn. and the Eastern Division of the Sales Managers Club.

Sessions will be held at Exhibition Hall, with fifth and sixth floors devoted to displays. New products associated with uhf, transistors, new techniques in tape recording and converters will be shown.

Plans are being made for seminar programs to supplement the displays and exhibits. According to Kenneth C. Prince, manager of the show, some 203 booths and 177 display rooms have been set aside for the show. Programs for management and sales personnel are planned the morning of May 20.

ATI Advertises 3-D TV

VIRTUES of a three-dimensional television system devised by American Television Inc. were advertised in Chicago newspapers last week. Public was invited to attend demonstrations.

The manufacturing firm, of which U. A. Sanabria is president, plans to petition FCC for permission to demonstrate its 3-D system this month and withhold further decisions on color TV standards pending development of the third-dimensional device [B•T, March 9].

M. L. Gunzberg, president of Natural Vision Corp., Los Angeles, which produced "Bwana Devil" as the first feature movie film using 3-D, predicted a TV set attachment could bring another dimension to home viewers at a cost between $15 and $25. He said televiewers could either use polaroid glasses, with which "Bwana Devil" moviegoers are now equipped, or install a special screen on the face of the TV screen.

Raytheon Dividends

RAYTHEON MFG. Co., Waltham, Mass., has declared a quarterly dividend of 60 cents per share on the $2.40 cumulative preferred stock, payable April 1 to stockholders of record at the close of business March 15.

AT&T Asks New Radio Relay

PLANS for construction of a new radio-relay route, filed with the FCC by AT&T, cover a microwave system between Atlanta and Jacksonville, paralleling existing coaxial cable and open-wire connections between the two cities. Original use of the microwave system would be to furnish 300 additional telephone circuits, but when fully-developed it would be able to carry several TV programs and many more phone conversations, AT&T said.

Manufacturers Meeting

ELECTRONIC manufacturers holding government contracts will meet Sunday, March 22, at the Roosevelt Hotel, New York, under sponsorship of the Technical Products Div. of Radio-Television Mfrs. Assn. The session is expected to draw engineers and executives who will be attending the March 23-26 convention of Institute of Radio Engineers. C. W. Miller, Westinghouse Electric Corp., is chairman of the division, and James D. McLean, Philco Corp., is chairman of the arrangements committee.

Equipment Employment Rise

UNBROKEN upward trend in communication equipment industry employment is shown in a summary released by the Bureau of Employment Security, Dept. of Labor. In December 1952, 338 communication equipment establishments reported aggregate employment of 471,700 individuals, an alltime peak for the industry and a gain of 21.2% in a year. The radio-TV segment of the industry led the employment advance.

DuMont Opens Tube Plant

NEW PLANT for the manufacture of cathode ray instruments for industrial and defense use was to be opened by Allen B. DuMont Labs. the middle of this month, Stanley F. Patten, vice president, announced last Monday.

45 rpm Record Holder

RECORD-GARD, a wooden rack which will hold 150 45 rpm phonograph records, now is available for $2.50 postpaid by Gardner Lab., 4723 Elm St., Bethesda 14, Md., Paul N. Gardner, president, said last week.

UFH SEMINAR sponsored by WNAO-AM-TV Raleigh, N. C., March 4 was attended by (l to r): E. C. Toms, Graybar Electric Co.; FCC Comr. George E. Sterling, speaker; Tom White, Avery-Knodel; Dwight Doty (seated), attorney; Charles Stone, assistant to WNAO-AM-FM-TV President John W. English (not shown), and Sam Dodd, WNAO general manager.

WJBK-AFTRA Locked; Staff Replaces Freelancers in Work

WJBK-AM-FM-TV Detroit operated last week with staff personnel handling a number of assignments usually taken by freelancers as the result of an AFTRA boycott that went into effect March 9.

The stations and AFTRA both have filed unfair labor practice charges. The station contends AFTRA tried to force use of union personnel as regular employes. WJBK's staff employes are not represented by AFTRA. The boycott affects only freelancers, who are not station employes.

AFTRA claims WJBK failed to negotiate in good faith. Ernest Winstanley, president of the Detroit local, said, in announcing the strike, "The union regrets that it has been forced to take the above final action, but the station's obstinate refusal to accord the union a contractual clause, which every other employer of AFTRA members in this community has found non-objectionable and proper, leaves the union with no alternative."

WKBW Battles NABET

In another labor controversy, WKBW Buffalo has been engaged in a running battle with NABET over use of combination men. Recently NABET sent notices to top federal agencies, including FCC, and to Congress and White House, making strike-breaking charges against FCC and the station, it is understood.

Though NABET went on strike at WKBW Feb. 3, the station says it has had no difficulty operating and lost only two hours air time at the time of the strike. The WKBW-NABET contract expired Jan. 31 and has not been renewed. FCC's field office granted WKBW a 15-day permit to use lower grade operators, starting Feb. 16, and renewed the order for 60 days. After NABET charged that FCC was serving as a strike-breaker, the field office cancelled the grant March 5, giving 24 hours notice. WKBW issued this statement:

Due to the walkout of WKBW engineers Feb. 3, without notice, no contract exists between WKBW and NABET engineers. WKBW sought and received permission from the FCC for the use of third class operators during the period of hiring replacement engineers. Now that the emergency is over, WKBW will continue to operate in the public interest without cessation in broadcasting and the regular broadcasing schedule will be followed using first class operators.

Resuming Service

WKBW announced last week that it is resuming its 24-hour program service starting today (Monday). Programming will be built around Frank Ward, all-night disc jockey. The 24-hour schedule had been dropped two years ago.

Nelson Heads AFTRA in West

FRANK NELSON, national vice president of American Federation of Television-Radio Artists, has been elected president of AFTRA's West Coast Chapter.

Tyler McVey, Don Wilson, Lee Hogan and Harry Stanton are West Coast first, second, third and fourth vice presidents, respectively. Stanley Farrar was elected treasurer, and Robert Stevens, recording secretary.

IN PUBLIC SERVICE

WWRL Gives 7,000 Spots

TOTAL of 7,000 public service announcements have been broadcast by WWRL Woodside, L. I., during the past six months on behalf of more than 100 national service organizations, Program Manager Fred Barr reported last week. Groups sharing in the campaign included the March of Dimes, Veterans Administration, American Red Cross, Treasury Dept., Heart Fund and the Armed Forces.

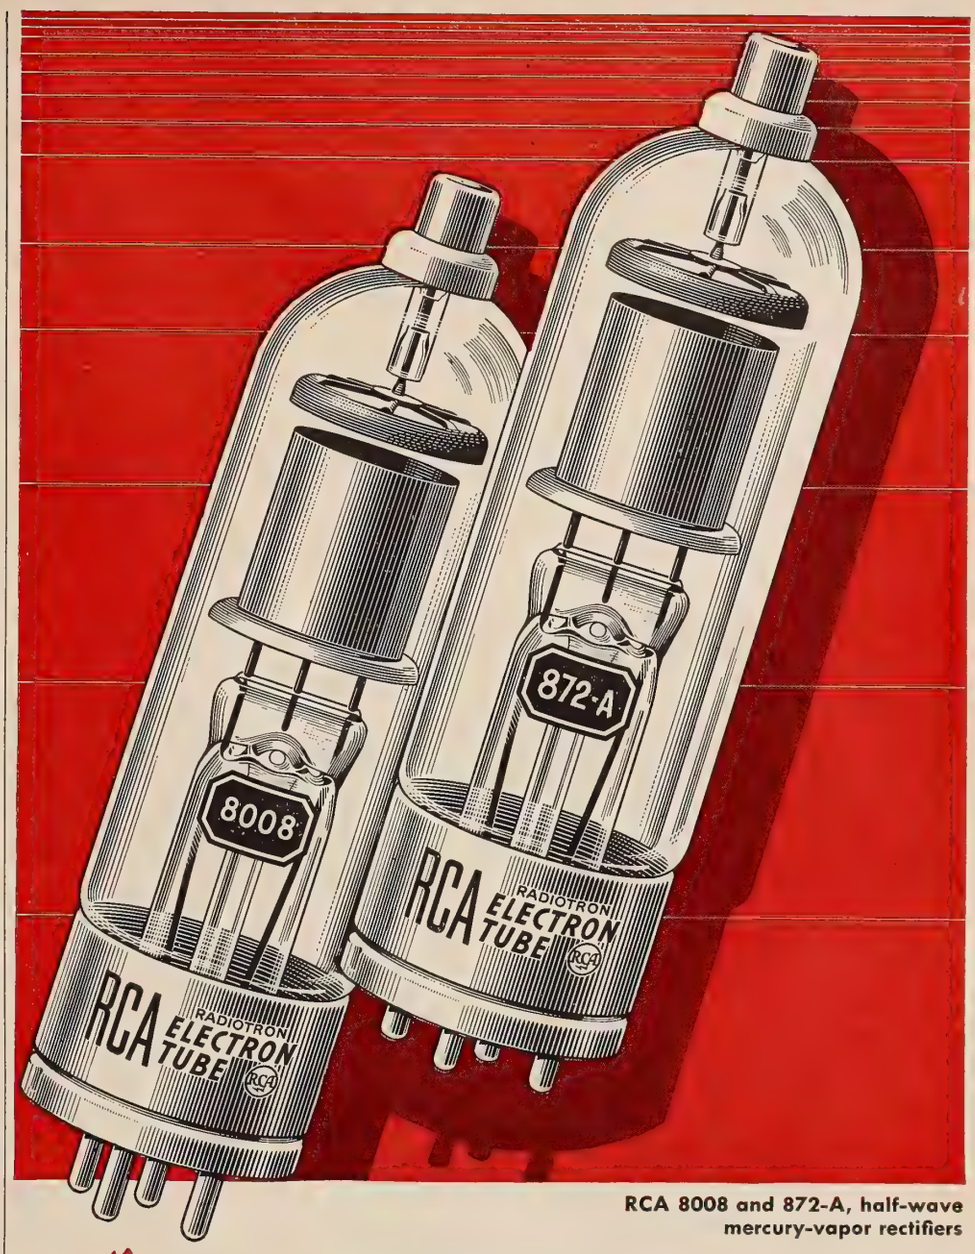
WSTV Appeals Aid Youth

WSTV Steubenville, Ohio, sparked a drive for funds to defray medical expenses for a grade school student who had been suffering from a rare disease for 10 months and whose parents had run out of funds for treatments. WSTV news reporter Scott MacMurray aired the appeal exclusively on his news broadcasts and in a few hours, a collection brigade, assisted by the station's broadcasts, received pledges of $800 to $1,000.

Saturation Appeals

SATURATION appeals in behalf of flood victims in Holland and Belgium from early morning throughout the night on WBPZ Lock Haven, Pa., brought in five tons of clothing, bedding, shoes and other much-needed items from the town of 11,000. Only radio—the 30-second spot saturation on WBPZ—was used to publicize the appeal.

WBYS Aids Police



BAD CHECK artist suspect was apprehended in Canton, Ill., when a local grocer heard on WBYS that city a warning from police that a man was cashing fraudulent checks in the area. The grocer, who heard the WBYS broadcast just after he had cashed a check for a stranger, instructed a clerk to follow the man. Police who arrested the stranger found on his person blank checks from banks in other Illinois cities, according to Dale S. Phares, WBYS vice president and general manager.

Scouts Take Over at KGO

MAIN EVENT at KGO-AM-TV San Francisco during its observance of Boy Scout Week was "management" of the outlets by four Eagle Scouts. The station gave the scouts an opportunity to handle problems of Vincent Francis, KGO-TV manager; Paul Scheinder, KGO station manager; Vic Reed, manager of news and special events for the stations, and Bloyce Wright, KGO-TV program manager. After a tour and a luncheon with broadcast officials, the youths spent the afternoon in their various executive capacities, and appeared on shows telling of their experiences.

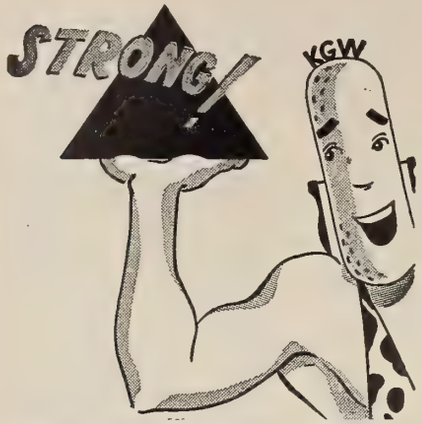
Mayor Sweeps in WLAW Drive

MAYOR'S Marathon, benefiting Dutch flood relief, was aired by WLAW Boston. The chief city executive in the listening area who collected the most money in a broadcast appeal was given the janitor services for one day of the mayor of Everett, Mass. The mayor, Philip J. Crowley, swept out the offices of the mayor of nearby Lawrence, who collected $9 more than the mayor of Cambridge. Gifts to the political leaders appearing on the show were given by the station and its local sales manager, David M. Kimel.

RCA 8008 and 872-A, half-wave mercury-vapor rectifiers

Speaking of dollars and sense...

DID you ever stop to figure out just how little it costs you to operate RCA mercury-vapor rectifiers?



Based on average life expectancy, the RCA-8008 or the 872-A cost you only *one-tenth of a cent per hour of tube life.* Yet, day in and day out, these tubes perform on a round-the-clock basis with such steady dependability that failures of broadcast transmitters due to the rectifier tubes are almost unheard of today.

Dollar for dollar, you can't beat the economical, trouble-free service that these tubes provide. Whenever you need replacements, insist on RCA mercury-vapor rectifiers.

For fast efficient service on the complete line of RCA broadcast tubes, get in touch with your local RCA Tube Distributor. Keep his phone number handy for those unexpected emergencies.

RCA RADIO CORPORATION of AMERICA

IATSE Plans to Organize All Television Crafts

INTERNATIONAL Alliance of Theatrical Stage Employes & Moving Picture Operators (IATSE), to retain its "traditional position in the field of motion picture projection," will immediately launch an all-out campaign to fully organize all live and film crafts in video.

Decision was made at the conclusion of the union's week-long general executive board session in Las Vegas March 7, with president Richard F. Walsh authorized to take whatever steps he believes necessary to get the campaign under way.

Union officials pointed out that the recent NLRB ruling in four major cities (New York, St. Louis, Detroit and Los Angeles), denied right of projectionists employed in TV stations to be represented by their craft unions, and that they could have representation only with electronic engineers and as a unit. If this decision stands, IATSE will have to organize the entire engineering unit of such stations too, in order to protect its long-standing jurisdiction over projectionists, it was said. The intensified campaign will include organizing new TV stations.

AFTRA to Expel Members Mum Before House Group

FAILURE of subpoenaed AFTRA Hollywood members to tell the House Un-American Activities sub-committee of past or present Communist party affiliation will result in expulsion from the union if a resolution being voted upon by mail referendum and returnable by tomorrow (Tuesday), is adopted. Under AFTRA's constitutional provisions, Communists are not eligible for membership.

Los Angeles chapter board unanimously recommended adoption of this new ruling. If passed by the membership, it will become effective Friday. The House Un-American Activities hearings reopen in Los Angeles March 23, and several AFTRA members have been subpoenaed.

If the AFTRA member continues to refuse to answer whether he "knowingly promotes the special interests of, and makes financial contributions to or renders aid and assistance by lending his name or talents to the Communist party or any organization known to him to be a portion, branch or subdivision thereof," he will be considered in violation of the resolution and therefore liable for prosecution pursuant to the union's constitution and bylaws. Expulsion from AFTRA would be automatic.

Election on Bargaining

NLRB election was held last week among 14 set decorators employed at CBS New York to determine whether International Alliance of Theatrical and Stage Employes (AFL) or Local 829, United Scenic Artists (AFL) will represent them as bargaining agents. The set decorators are represented by IATSE's radio and TV department. United Scenic Artists petitioned for the election.

RADIO ENGINEERS JOIN IN NEW FIRM

THREE Washington radio engineering firms have joined forces to form Page, Creutz, Garrison & Waldschmitt, consulting engineers. Participants include Esterly C. Page, Joseph A. Waldschmitt and Virginia Erwin of E. C. Page Consulting Radio Engineers, and Millard M. Garrison and John Creutz, consulting radio engineers.

Also associated with the firm is James L. Hollis, who recently joined the Page organization after six years with Collins Radio Co., Cedar Rapids, Iowa.

The Page suite in the Bond Bldg. is being expanded to accommodate the new organization, which includes 77 persons besides the principals. Telephone numbers remain Executive 3-5670, Republic 7-2151 and Adams 2-2261.

Mr. Creutz has been a consulting engineer since 1934, and during World War II had charge of radio equipment regulations as assistant director of radio and radar for the War Production Board, afterward establishing his own practice. Mr. Garrison, a consulting engineer with Jansky & Bailey from 1932 to 1941, served during the war with the Bureau of Aeronautics. He then went into partnership with Joseph A. Chambers, continuing as owner when Mr. Chambers retired in 1950.

Mr. Waldschmitt, a partner of Mr. Page since 1947, worked as a television engineer at WOR New York until the war, when he was loaned to the National Defense Research Council on projects in India, Burma, China and Greenland.

Virginia Erwin, one of the first women in the U. S. to be licensed as a professional engineer, has worked in engineering since 1942. After assignment in the FCC's hearing division, she joined the Page firm in 1948.

Mr. Page has been a consulting engineer since 1932, and worked as assistant to General Eisenhower during the Mediterranean campaign. After working as vice president in charge of engineering for MBS, he formed his own company in 1947 and returned to consultant work. His company handles standard broadcast and television clients.

Miller Sets Up Own Practice; MacClain Joins Cohn & Marks

SAM MILLER, former FCC chief of the FM Branch, Law Dept., has resigned from the Washington law firm of Cohn & Marks to enter private practice with offices in the Arlington Bldg.

At the same time, George MacClain, former FCC general attorney on the Conelrad project, has resigned as assistant general counsel of the National Security Resources Board, to join Cohn & Marks.

HIGHEST POWER UHF TV STATION GOES ON THE AIR

G-E field engineers Stone, Bias and Duncan (l. to r.) work on the installation of the first 12 kw transmitter built by G.E. for WHUM-TV.

WHUM-TV studio building is shown above. From here signals are beamed via microwave to their transmitter site 22 miles north of Reading, Pa.

WHUM-TV, Reading, Pa., Starts Commercial Operation With First G-E 12 KW Transmitter

Commercial operation at WHUM-TV, Reading, introduces eastern Pennsylvania televiewers to the nation's highest power UHF TV station. The station, using General Electric's first production model 12,000-watt UHF transmitter and a UHF Helical antenna made its commercial debut on February 22. G-E transmitter-antenna combination provides over 250,000 watts of effective power from WHUM's antenna site atop Blue Mountain, 1783 feet above average eastern Pennsylvania terrain.

The station was on-the-air with test patterns early in February, and regular commercial telecasts started soon thereafter. A CBS primary affiliate, WHUM-TV presented CBS network programs from the beginning. In addition, programs of local interest are being presented from the station's own studios.

Harrisburg, Allentown, Bethlehem, Easton, Lancaster, Reading and other eastern Pennsylvania cities have reported receiving WHUM-TV programs. Operators of the Williamsport community antenna system, providing subscribers with WHUM-TV programming, also report that an excellent picture is being received. Reception reports have come in from over 400 Pennsylvania towns.

Greig Commends G-E Engineers

Humbolt J. Greig, general manager and president of WHUM-TV, reports he is "greatly pleased" with the installation and operation of the new General Electric equipment.

"G-E engineers worked with us around the clock installing and checking-out our transmitter, antenna, and all the equipment necessary to get us on the air" Greig writes. "Plaudits to General Electric and their most competent engineers for a job well done."

Before the equipment was ordered, WHUM-TV officials inspected a 12 kw transmitter in operation at Electronics Park —at that time the only installation of its power in existence. This high power equipment was a natural for WHUM-TV's market area. From the General Electric UHF Transmitter Program, providing a transmitter-antenna combination for markets large or small, these officials selected the 12 kw transmitter and 5-bay helical antenna Necessary film room, control and associated equipments were also selected.

A TV success story:

FROM THIRD TO FIRST IN SALES IN THREE MONTHS

IN Indiana a firm which makes potato chips has found that a vender called video can make people reach for its products as though they were blue chips.

George Johnson, president of Chesty Foods Inc., Terre Haute, which makes Chesty potato chips, doesn't know if it's because Hoosiers just like their basketball or if they're overly excited about this season's runaway Indiana U. basketball team. Right now, he's too busy reflecting happily upon what has happened since Chesty began to sponsor Indiana U. basketball games on WTTV (TV) Bloomington a little less than 90 days ago.

His Chesty chips, says Mr. Johnson, have gone from third to first place in sale in the area during this brief time. And Chesty leads in sales over its nearest competitor by more than three-to-one.

First Home Game

Last fall Mr. Johnson signed with Paul Lennon, WTTV local and regional sales manager who doubles as sports director and play-by-play announcer, for all 10 of Indiana U.'s home games. The first home game was televised Dec. 20, 1952 to basketball fans in the 36 Indiana and Illinois counties that make up the WTTV coverage area.

From here on out Chesty's success story and that of Indiana's basketball team parallel each other. The Hoosiers, with little expected of them, clinched the Big Ten championship with three games left to play. And at last reports they were ranked first in the nation by the Associated Press, United Press and most other polls.

Obviously, Mr. Johnson and Chesty were quick to recognize a good thing. Parlaying his coverage through the season, he next bought the nine Indiana state basketball tournament semifinal and final games. Then when the Hoosiers played Illinois' defending Big Ten champions Feb. 28 at Champaign, Ill., he agreed to foot the bill for a complicated remote TV "feed."

In sponsoring the remote telecast, Chesty reacted to tremendous pressure from basketball fans in an area, which, according to NBC Research, comprises a million and a half people and $2 billion in retail sales annually. These fans of the "Hoosier Heartland" watched Indiana win its first undisputed conference championship.

Chesty sponsorship of the game was secured within an hour from Mr. Johnson after telephone contacts with his agency, Mr. Lennon and WTTV's general sales manager, Norman Cissna. WTTV General Manager Robert Lemon already had secured approval from station owner Sarkes Tarzian.

Illinois Bell Buys In

Mr. Lemon arranged with General Manager Frank Schreiber of WGN-TV Chicago for sponsorship of the game on that station by Illinois Bell Telephone Co., whose agency, N. W. Ayer & Son, approved the telecast. Mr. Lemon bought telecasting rights from Illinois U.

He next bought AT&T cable from Chicago-to-Toledo-to-Dayton-to-Cincinnati, where WTTV, using its own microwave relay, picked up network feeds from WKRC-TV, which carried the game after WKRC-TV General Manager Jake Latham reshuffled his Saturday night program, clearing 60 minutes of Class A time and pre-empting *This Is Show Business* and *Meet Millie*.

WTTV itself cancelled most of NBC's *Show of Shows* to accommodate the telecast.

Results are showing up in the WTTV mailbag as well as in the Chesty sales record, according to Mr. Lennon. He estimates that the season's mail toll will exceed 10,000 pieces.

Manager Lemon estimates a total TV audience of five million for the Illinois game among WGN-TV, WKRC-TV and WTTV (TV), with the Bloomington station's share more than million.

THE ONE-MAN SHOW

By Richard Pack

THE TV freeze has been lifted for many months now, but there's another kind of freeze that has numbed the thinking of quite a few station operators around the country. And that's the frozen philosophy which has been immobilized solidly in the defeatist notion that a station can be really successful without a substantial amount of local live programming. Unless they warm up to the idea that a station in a tough competitive, multi-station market can't rely only on riding a network, kines, feature films, and a couple of weather reports, these ice-age operators may find themselves outclassed.

Successful live local programs that combine sales appeal with viewer appeal can be developed by virtually any station, big-league or minor-league. It doesn't require big budgets, vast facilities, fancy studios. It takes ingenuity, imagination—and a concept.

Basic Formula

The concept is this: One good performer is worth a thousand gimmicks. The basic recipe for local programming is the one-man show.

The one-man show can be a little show; given the proper talent and resourceful production, it can be a big show. Actually, it's not a restricting format. The one-man (or one-woman) idea can be adapted to a wide range of programs, not only the obvious ones like news, weather, and sports, but also for quizzes, education, drama. Even one-man variety shows are possible.

For evidence of the success of the solo show, you have only to look at two top network features—NBC's *Ding Dong School* and DuMont's series with Bishop Fulton J. Sheen. The single performer idea, of course, is also used in different versions by scores of stations, large and small, from coast to coast. Chicago's WNBQ (TV) (which originates *Ding Dong School*) is one of the pioneers in this field of simplified production. At WNBT (TV), key station of the NBC video network, we have rooted our lineup of live local programming in the one-man show.

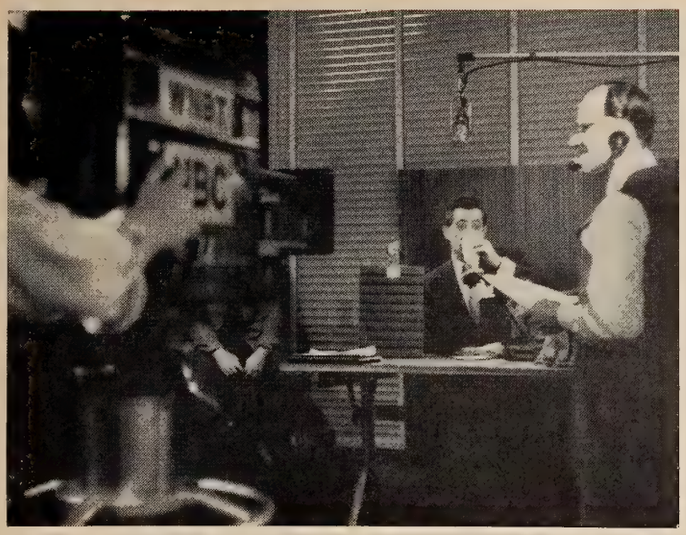
What about the station in a city which doesn't have the talent resources of New York, Chicago, Hollywood, and other major cities? You don't always have to have a great performer for this kind of show—not if your program is pegged on a sound idea, slotted at the right time, skillfully produced, and if your performer is a genuinely warm and appealing personality.

Besides, there's one great asset the local performer always has. That's the simple, compelling fact that he is just that: *Local.* Here's where certain TV operators can learn from their newspaper brethren, who know so well the potency of hometown appeal. Local boy makes good—good programming.

The live show is a particularly effective vehicle for the local TV sponsor—and for the national advertiser who's buying locally—because it offers great flexibility, especially for retailers. Copy can be changed quickly, re-tailored to fit seasonal changes, merchandising problems, and other special occasions. And more important is the fact that a commercial delivered by a popular local personality very often gains added impact and acceptability. It's personalized selling, personalized programming at its local best.

During the last year at WNBT, we've developed the concept of the one-man show even further. We've found that once you've got the right personality and the right idea, you can even build successful shows using only one camera. Obviously, the use of one camera on a show isn't anything revolutionary, since there are a flock of stations around the country doing programs with one camera. But this is news: That in New York City, the bigtime of television, here in the roughest toughest TV market in the U.S.A., one of the most important stations in the nation can create some of the highest-rated local shows in town with one performer and one camera!

Take this little case history:



A very versatile showman, Herb Sheldon, does a one-hour program five days a week, from 12 to 1 p.m. (See pictures on this and opposite page.) Local ARB February report rates Herb's show number eight among all daytime local strip shows in New York. Pulling power? Herb asked listeners to make and mail in homemade Valentines, which he'd turn over to shut-ins. He received more than 85,000 of 'em.

One of Each

Off the air, Herb Sheldon calls his production, which was developed by Steve Krantz, WNBT's director of special features, "one man—one camera—one hour." Until six months ago, Herb's show was staged from a large studio with three cameras, audience, and elaborate production. Naturally, the show had to be altered somewhat when the change was made. But after a bit of experimentation, improvisation, and creative hard work, there developed a new and novel show.

Herb uses film, of course—mostly short cartoons—but not as much film as you might think; he has interviews, quizzes, record visualizations, and with the special Sheldon brand of magic and slick but simple production it adds up to a lively one-man variety show.

Did the show suffer by cutting down to one camera and a small studio? Not at all. Its ratings went up. Its sponsors increased.

Perhaps because it became a warmer, more intimate program. In fact, one of the basic reasons for the success of the one-man, one-camera format may be the very restrictions it puts on the performer: It forces him to project more intimately, without relying on the bigness of big production. Television is, after all, an intimate, personalized medium.

Then there's the story of *Ask The Camera*, another five-a-week series, slotted from 6:30 to 6:45 p.m. against rugged opposition, a program that started as summer filler, and has earned a regular slot by demonstrating amazing audience appeal. February ARB lists it as the *third* highest-rated local daytime strip show in New York.

It's a simple show, built around one good performer—Sandy Becker—one camera, one good idea, and lots of good film clips from the NBC film library, which had been lying unused on the storage shelves. Mr. Becker answers, with film, questions sent in by viewers. (*Ask The Camera* has turned out to be such a hit that the NBC film division may soon syndicate it.)

The Special Studio

For its one-camera productions, WNBT maintains a special studio, which was put into operation early last year by Pete Affe, the station's program manager. It's not a large studio—16 by 21 ft., with about 8-ft. clearance—and not fancy, either. It was converted from a former office. It has one unique feature: A window looking out on the elevated tracks of the New York Central Railroad in upper Manhattan. When a train roars by, the sound is occasionally picked up and broadcast during a program. Puzzles the devil out of viewers sometimes.

When the station first started to increase its schedule of one-camera shows, some of the directors, producers, and talent didn't realize at first just how much could be achieved with one camera. Directors in particular had been used to the luxurious flexibility of three cameras. But out of the necessity of this limited studio and its limited facilities was mothered a great deal of inventive production by these same directors and producers.

As Mr. Krantz puts it, "There's practically nothing two cameras can do that one camera can't do. And one camera can even stack up quite well against three. The difference is usually slight, and unnoticed by viewers."

Single-Camera Tricks

This WNBT studio uses one RCA pedestal camera (a wheeled tripod camera would also do). By integrating balop slides or film clips during the program, it's easy to switch lenses without interrupting the flow of the show.

Directors accustomed to three cameras have learned that ingenious use of the film chain, with either film or balops, can often take the place of a second camera. Titles and other material, for instance, can be "supered" over live camera action by putting the titles on balops rather than picking them up on a camera. With stylized line drawings or photographs, non-representational backgrounds even can be suggested behind performers by "supering" these from balops. For quick closeups, particularly in commercials, a tele-zoom lens is useful standard equipment for such a studio.

The WNBT producers usually avoid extreme closeups; in general a medium close shot has been the most effective. The shooting problem of traveling from a shot of the performer to an object, when it has not been logical to use a balop slide as a transition device, has been solved simply by not being afraid of logical panning. Panning, though, has to be carefully planned, and usually is most effective against a neutral background. For variation, panning on some shows is occasionally done across a simple decorative background which aids transitional effects. Although the studio is very small, whenever the directors need to give the illusion of largeness and space, they've found a way to accomplish that too: The performer fakes it by skillfully "tread-milling" in place on a waist-high shot.

Lighting in the one-camera studios is fairly simple: Seven semi-fixed 42-inch fluorescent pans, 13 six-inch 500 watt fresnels, and a portable switch board. Settings, too, are simple, versatile, adaptable. The most useful furniture, WNBT production men have found, is simple modern, not too extreme. They use armless sectional seats which, when used in combination, can be built into sofas in various groupings. A low, round coffee table is also very adaptable for use with these pieces. Instead of the formal desk, which has become the cliche of so many TV programs, whenever there's a need for a desk, a simple drafting table is used instead; it's novel, it has more space for display, it's easier to store and move, and when tilted slightly can even hide a script.

Background Pieces

For background, the main piece is a simple gray "sike" (cyclorama). For variations, light colored vertically-straited rattan bamboo screens are used; one is set in kind of a three-fold arrangement and the other is used as a pleasant curved background for other programs. Still another simple and effective backdrop is an ordinary Venetian blind. Also available is a specially built "TV window shade"—a set of six stylized scenes which are pulled up and down like window shades for special background effects. They are designed for use in waist-high medium shots behind performers, and include a section of a super market, a country scene, an element of a gas station, and

WITH ONE PERFORMER, ONE CAMERA

a few commercial backgrounds. No attempt is ever made at realistic, representational backdrops; stylized, impressionistic backgrounds are more effective under these conditions.

In general, movement of the cameras must be as purposeful and planned as in multi-camera shows. On Mr. Sheldon's show, which uses many interviews, they've found that interviews with as many as three or four participants can be done successfully with one camera if well planned in advance. The most effective shot they've discovered is profile of interviewer and full-face medium view of the guest, which can be covered in one medium shot. Too much dollying in and out is bad.

Certainly at WNBT we wouldn't want to be confined exclusively to one-camera operations. The great majority of our shows are still multi-camera. An across-the-board variety series like *The Morey Amsterdam Show* and important educational features like our *Through the Enchanted Gate* naturally call for full-scale production. But in the face of television's continuing problem of production cost control, it's vital to continue developing simple and effective program techniques and attitudes that can be duplicated, with local variations, by stations everywhere. Eventually it should be possible to do even bigger and better one-man, one-camera shows when inexpensive visual programs aids, especially on film, become available in greater quantity.

And there are other values for the television industry in emphasizing simple production; too many television shows now are over-produced and over-gimmicked. Simplicity in local shows can—as it already has in some instances—encourage greater simplicity in network production. What's more, if local live television programming can be stimulated, then out of local video, just as it so often did in local radio, will come the fresh talent, the new ideas that television so urgently needs.

ABOUT THE AUTHOR

Richard Pack is director of programs and operations for WNBT (TV) and WNBC New York, key stations of NBC. He formerly was program director of WNEW and also has been associated with WOR and WNYC, all New York. Now 37, he has been in broadcasting since he was 16, as publicist, writer and program executive. He is co-author of two textbooks, *Opportunities in Television* and *Opportunities in Radio,* and has served on the faculty of New York U.'s Radio-Television Workshop.

RADIO MOVES FURNITURE IN IOWA

IN Cedar Rapids, Iowa, a father and his two sons have been "moving" furniture since 1945, and have parlayed their annual gross volume to more than $500,000 —much to the envy of over 20 other dealers in this town with an estimated population of 70,000.

They increased their gross earnings five-fold alone from 1945 to 1951. Precisely just how much "upward of half a million dollars" their volume has risen, they won't say. The competition would like to know, too.

But what is a matter of public record is the use of radio by the A. W. Peterson Co., comprising young Allan Peterson; his brother, Gayln, and his father, A. W. Under their guiding hands, the furniture store has shown phenomonal growth in the past 12 years.

Allan Peterson, himself, is a man of few words—but he credits radio with a large share of responsibility for the store's success. In response to the question whether radio was a major factor, he replies: "Definitely." And he will add that it is not only radio "but radio properly utilized."

Radio has been, in fact, Peterson's No. 1 furniture mover, he acknowledges.

A vice president of Peterson's, Allan is also his own timebuyer (his store does not use an advertising agency but deals direct) and one with a keen sense of what an advertising dollar should do. He also directs all promotion activities.

Modest Beginning

A. W. Peterson had modest beginnings in 1940, and it was not until 1945, when Allan was discharged from the Navy Air Corps, that the enterprise really got rolling. Young Allan had heard about other stores using radio profitably. He promptly began to ferment his own ideas of the medium.

On Sept. 9, 1946, the Petersons put their theories to work with a series of participating announcements on WMT Cedar Rapids. They started with 15 one-minute spots scattered throughout each week. They spent $182.25 to determine which announcements were the most productive.

Peterson's gradually expanded its radio budget. Today it has earmarked over $1,000 each month to three stations (KCRG and KWCR plus WMT). A breakdown of Peterson's January 1953 budget showed a total advertising outlay of $1,648, with radio receiving $1,398 and newspapers $250. WMT derived $1,166.20 and the other two stations $231.80 between them.

As a minimum schedule on WMT, which carries perhaps 80% of all the store's broadcast commitments, Peterson's sponsors a Monday-Wednesday-Friday 8 a.m. newscast; three half-minute news adjacencies each week; and a chain-break announcement between the Arthur Godfrey radio segments.

Ken Hastie, WMT salesman, who persuaded Peterson's to try radio 12 years ago—but with nothing like the present success—services the account, advising on schedules, special promotions, copy preparation and co-op arrangements. Since the store features a number of national lines—Zenith, Hamilton, Duo Therm and Nash Kelvinator, to name a few—Peterson's is able to enjoy the benefits of shared costs on its morning newscast program under co-op tie-ins.

But Allan Peterson is the man behind the advertising gun at the store. Here is how a typical campaign evolves:

Allan approaches each selling problem separately, devising specific objectives. If the drive calls for a bold approach, young Allan will experiment. The nature of the product determines whether the copy should be high or low pressure.

Copy Checking

Once having evolved the campaign, Allan turns the practical details over to the station. When copy is completed, Allan checks it, though he never interferes with preparation or delivery. He is, however, insistent on the requirements that the message be "crystal clear" and that it contain no "fancy stuff" unless it's directly to the point.

As an example of this specialized selling, Peterson's once launched a three-week campaign to publicize its new carpet department. When it moved the department downstairs in the store, Allan Peterson negotiated for 16 extra spots on WMT to publicize the shift. This chain-break is typical:

(Sound): Sawing and hammering.

(Announcer): "Peterson Furniture Co. is expanding its store to serve you better! Workmen need room so the floor must be cleared. Terrific expansion and remodeling values! Duncan Phyfe drop-leaf tables reduced from $59.50 to$38.67 at Peterson's in Cedar Rapids."

The "sawing and hammering" doubtless made an "impression" on listeners, Allan concedes, bringing 6,500 people into the new department within the first three days of the grand opening. Business has been fine since, he adds.

Peterson's doesn't go in for "ambiguous" copy or the "visit our friendly store" approach. But Allan Peterson does speak out for management by transcribing a series of spots plugging "the item of the month." He reads them himself. Says Allan: "I've had people come into the store just to see what I look like." He feels the store becomes more real to listeners through this series of spots which he transcribes the first week of each month.

Does Peterson's intend to use TV extensively when it comes to Cedar Rapids?

"Definitely."

PROMOTION COMPETITION — THE BILLBOARD — FEBRUARY 21, 1953

MERCHANDISING

WLW-T, WTVJ and WNBQ Place 1-2-3 in New TV Station Division

Boston's WCOP combines with a Catholic youth movement and two radio advertisers to present a selling show with promotional value on a neighborhood and community level . . .

friday night is CYO caravan night

THE TREND toward commercial sponsorship of broadcast programs backed or endorsed by religious groups has met a solid response in Boston, where the Catholic Youth Organization's *CYO Caravan* on WCOP is sponsored jointly by RCA Victor and the Charles E. Hire's Root Beer Co.

CYO Caravan features broadcasts of a Friday evening (10:05-11) dance staged by one of the 500 parish and school CYO chapters in the Boston area. The *Caravan* features dancing with brief interviews of school celebrities, cheering sections, athletes and welcoming messages from the priest in charge of each function.

Mr. Gilmore

Conducting the interviews is WCOP's Jim Brokaw, longtime Boston teen-agers' radio favorite, who intersperses the talks with spinning of RCA Victor 45 RPM records for the dancers.

CYO Caravan began last October not long after the arrival at WCOP of John C. Gilmore, station account executive, who modestly calls it "the easiest program I ever sold."

Mr. Gilmore read an article in Boston's Catholic newspaper, *The Pilot,* in which Archbishop Richard Cushing called on parish and school CYO chairmen to lend every effort to the drive looking toward boosting membership in the Boston archdiocese from 100,000 to 125,000.

After conferring with the Rev. Fr. John P. Carroll several times and receiving approval for joint sponsorship of *CYO Caravan,* Mr. Gilmore armed himself with a sales brochure which carefully outlined the tie-in possibilities offered the advertiser by means of window display and school and parish tie-ins.

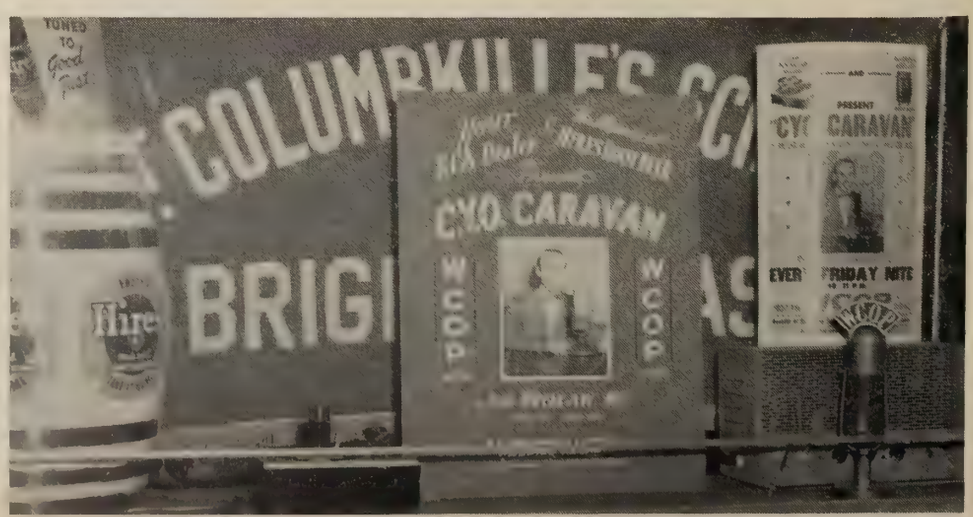
Then he headed for the offices of the Hire's Root Beer Co. and those of the Eastern Co., Boston RCA distributor.

"The only thing that remained was to inform both companies that they had been approved by the CYO to buy a program they had never heard of from a man they'd never met," says Mr. Gilmore. "It made for a one-call-close in each case."

The program's success lies in a formula designed to satisfy the intents of the three participating organizations: For the CYO, to promote and foster membership by illustrating "Youth at Play in a Decent Way" in presenting the organization's recreational and spiritual advantages to the teen-ager; for Hire's, to break down the acceptance of other beverages at parish and school social events and replace them with Hire's Root Beer, and for RCA Victor, to sell the "swing to 45," a somewhat more institutional problem."

Preparation for a chapter presentation of the *CYO Caravan* works like this: First, all bookings for the *Caravan* are made by WCOP, usually at the telephoned request of the priest, brother or nun in charge of CYO activity at a parish or school. The booking then is checked and confirmed with CYO headquarters.

Then come the tie-ins: Hire's, notified well in advance, provides the well-known root beer barrel for the function, with profits going to the CYO chapter. RCA Victor selects a local RCA dealer in the parish or neighborhood, who devotes a window to promotion of the dance, using signs provided by WCOP, a WCOP display mike, a Hire's root beer barrel, RCA Victor 45 record players and records, the school banner, papers and trophies.



Tickets used at the function bear the names and trademarks of the sponsors, and stubs are used to award the door prize—an RCA 45 record player.

WCOP, to further tie in the triple aims, takes a display ad each week in *The Pilot* (paid circulation 87,000) with sponsor identification and pictures of products. CYO distributes three-color window cards to each of its 500 chapters to promote each *Caravan* dance, with all cards bearing pictures of the RCA Victor 45 player and the Hire's root beer barrel. Window streamers in two colors are placed in 1,500 candy and drug stores and supermarkets where Hire's is sold and in RCA Victor dealers' stores.

At each of the *CYO Caravan* functions Hire's paper soda-jerk hats are placed near the root beer barrel, and, according to Mr. Gilmore, every CYO member ends the evening wearing one of the paper favors.

The result, according to Mr. Gilmore, is that *CYO Caravan* is booked through to June and requests for bookings are coming in faster than WCOP can handle them. "A Hire's salesman told me," he says, "that never in his 15 years with the company had he received so warm a welcome when he called on schools and parishes."

Mr. Gilmore believes *CYO Caravan* is "proof positive that a solid sales-producing radio idea, properly geared to point-of-sale display, gets sponsors, results and sales." This "creative salesmanship at the local level is the answer of aggressive radio to TV," he adds.

Typical window display was that of the Supreme Music Shop in Brighton, Mass.

the BIGGEST FISH...

Two big problems the about-to-be telecaster faces are selection of an antenna site and designing his station's housing. The first problem would be easier to solve if aircraft interests did not have to be consulted. On this page an authority suggests ways to simplify antenna clearance. An imaginative solution to the second problem appears on the opposite page. It's a $125,000 studio-office building plan for KEYT (TV) Santa Barbara.

THE THREAT TO TALL TOWERS

By George E. Sterling

Member, Federal Communications Commission

PROCEDURES that broadcasters are obliged to use to obtain clearance for antenna tower sites ought to be completely revised.

In what admittedly is often a struggle between the broadcaster and aviation interests, the aviation interests have the odds on their side. The Air Space Groups that act in these cases are loaded in favor of aviation. The broadcaster deserves a better break.

Under the Commission's rules all proposals for towers over 500 feet are referred to the Air Space Subcommitte of the Air Coordinating Committee. The prime objective of the Air Coordinating Committee's Air Space Subcommittee is, of course, to protect the aviation interests above all else.

To obtain a tower site clearance, an applicant must first take up his case with the Regional Air Space Subcommittee and, if he is turned down, he may appeal to the Washington Air Space Subcommittee. If the applicant is turned down by the Washington Air Space Subcommittee, he may request and eventually obtain a hearing before the FCC.

Why Aviation Is Favored

The representation in the Regional Air Space Subcommittee and the Washington Air Space Subcommitte indicates why the deliberations of these groups naturally weigh in favor of aviation.

The composition of the Washington Air Space Subcommittee is as follows: Voting members—representatives of Navy, Air Force (Air Force and Army), Commerce (CAA), Treasury, FCC and Civil Aeronautics Board; liaison or associated members (non-voting)—representatives of Air Transport Assn., Air Lines Pilots Assn., Airport Operators Council, National Assn. of State Aviation Officials and Airport Owners & Pilots Assn. Regional Air Space Subcommittees are composed of regional representatives of the same organizations listed above.

The FCC representative on the Air Space Subcommittee may vote but does not exercise that right in order not to prejudice any possible action in the event the case goes to hearing before the Commission. Other than this, the FCC has no participation in the Air Coordinating Committee—with the exception of the Chief of the Aviation Division, Safety & Special Services Bureau, who serves in the Technical Division of the Air Coordinating Committee. The Air Space Subcommittees sometime call on the Technical Division of the Air Coordinating Committee for expert technical advice.

The Doolittle Commission, which was set up by the President to investigate air crashes, recommended that consideration be given to moving airways and airports away from the thickly populated areas, thus reducing the hazard to life and property. If the aviation industry and the authorized officials of communities would move affirmatively in this direction, it would ease the problem of securing suitable antenna sites and do much to help the community to derive better service from its broadcasting and television stations. It would also serve to establish antenna tower heights consistent with the FCC standards, thereby permitting stations to provide service not only to the community but to adjacent smaller communities and the rural areas as well.

Recently, the government agencies concerned have taken some positive action in line with the Doolittle recommendations. However, because of the admonition of the Director of the Bureau of the Budget in his letter of Feb. 3, 1953, to government agencies, it appears that construction projects as they relate to relocating airways and airports will be restricted. In cases where this is done, the broadcast applicant's problem will be aggravated since the Air Space Subcommittees no doubt will be restricted in its freedom of action. So the problem becomes acute.

A recent report of the Air Space Subcommittee for the past year indicates that only 19 of the applications for towers were rejected, but it does not reflect the compromises that the broadcasters accepted and are still accepting in order to obtain site approval.

Compromise Odious

Compromises, resulting in reduction of TV antenna tower heights, mean loss of TV service to the public not only in the principal community to be served but also to nearby communities and people in the rural areas. Compromises in tower heights also prevent elimination of shadowed areas and interference and serve to deny the public pictures of fine quality.

Since the membership in the Air Space Subcommittees is directly associated with and has responsibilities to aviation, it follows that the deliberations of the groups weigh in favor of protecting the aeronautical services. I think too often they consider broadcasting and television only an entertainment service and fail to consider the relation of broadcasting to the great number of the public in a community compared to the small number who are concerned with commercial aviation.

What is needed, in my opinion, is a group composed of experts both in aviation and communications, who would take testimony under oath from witnesses on a hearing record complete with cross examination. Experience has shown that government agencies do not participate in FCC hearings but merely indicate their views by letter. Hence, the industry is precluded from testimony from these witnesses under oath and subjecting them to cross examination.

Parties receiving adverse decisions from a group such as proposed would appeal their case directly to the Commission and receive a hearing as now provided when they are turned down by the Washington Air Space Subcommittee. One step in the informal procedure now in force (review by the Washington Air Space Subcommittee) would be eliminated in this manner and the interest of the broadcaster and aviation industry as well as the local community would be assured of fair and impartial deliberations and decisions. Such a procedure would eliminate the compromises broadcasters are required to accept during their appearances before Air Space Subcommittees in order to get their stations on the air, and would eliminate undue delay and costs which increase with the passage of time from the date the applicant receives a grant from the FCC.

Revision Now

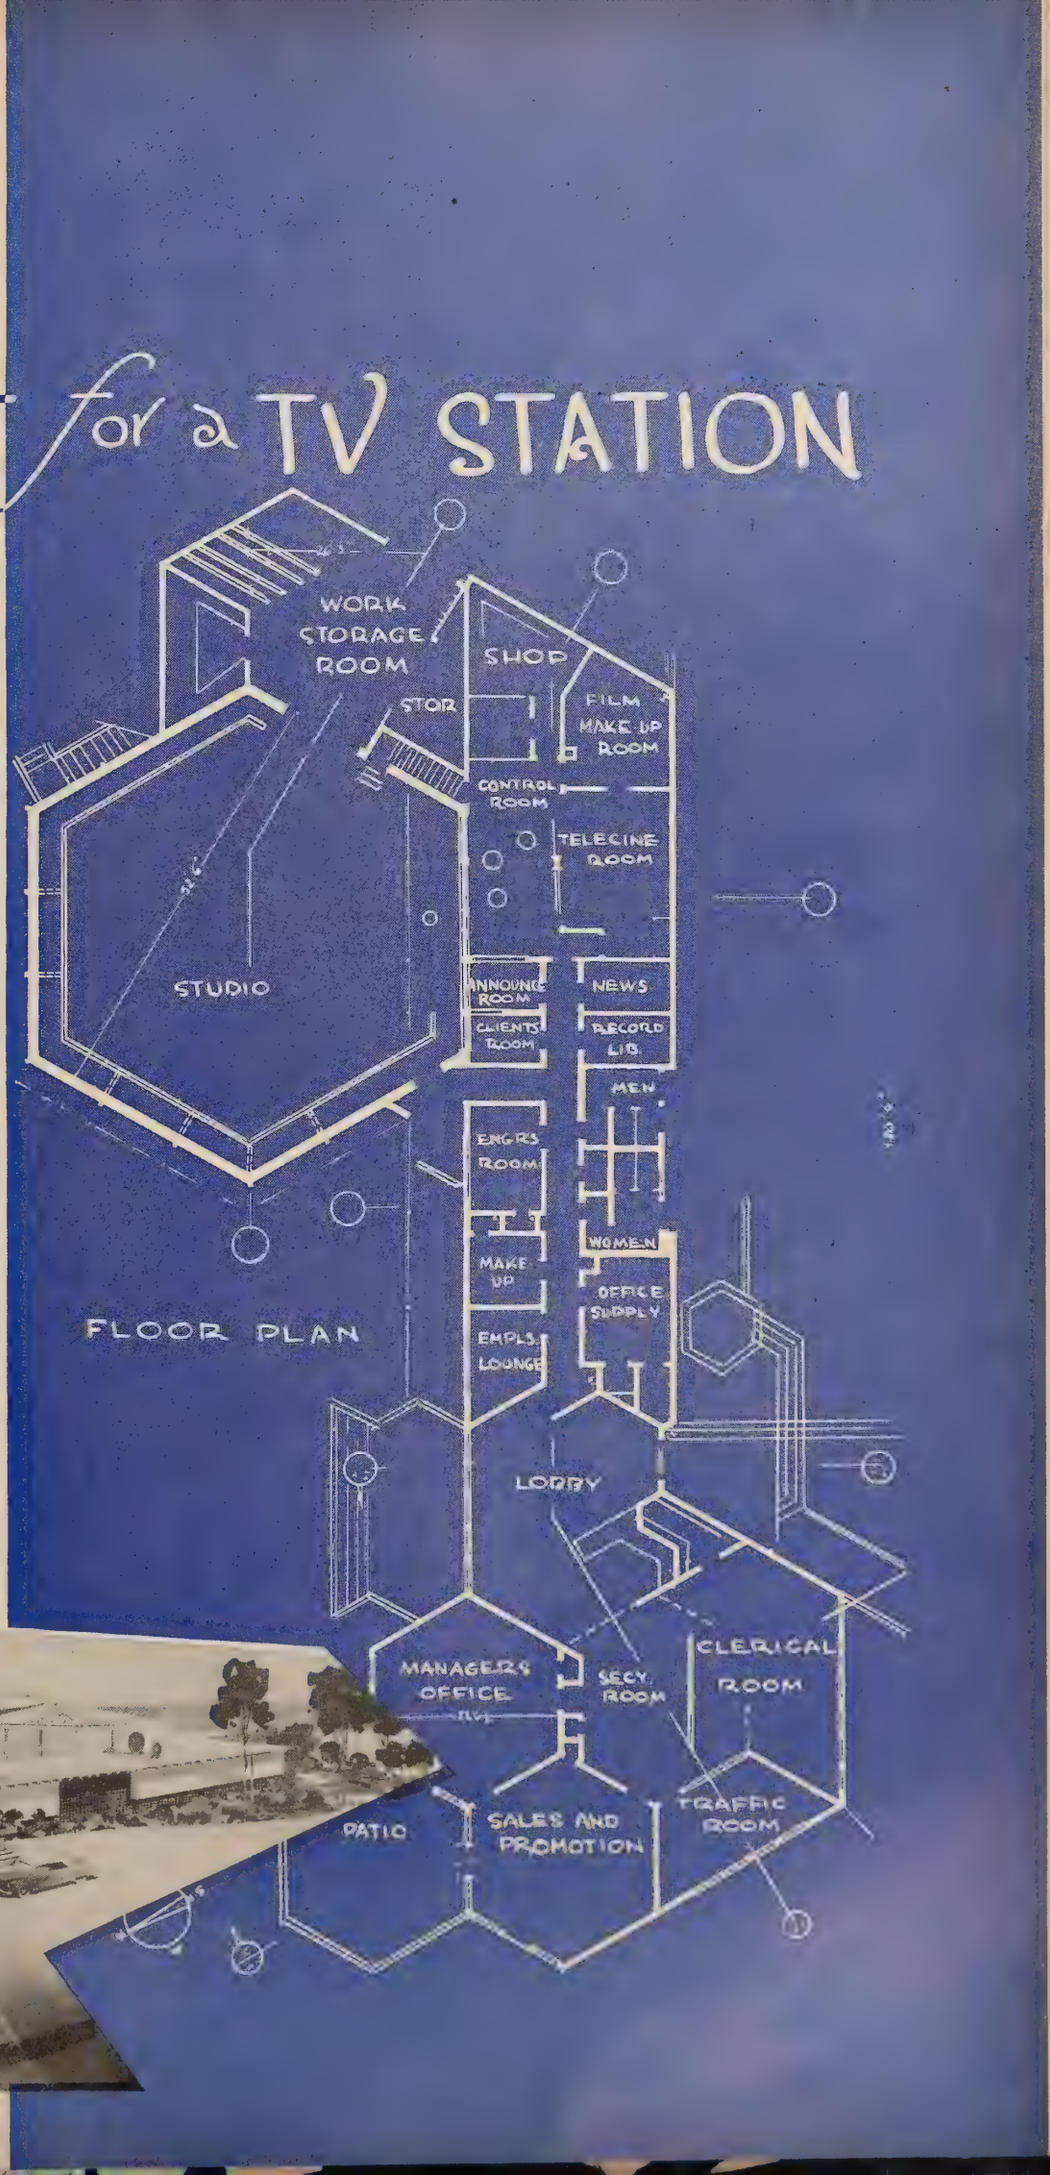
Someone may suggest a better way of accomplishing the objective, but the time has come for a revision of the present procedure.

The Commission's TV allocations make possible the establishment of more than 2,000 television stations in the United States. So the difficulties are likely to grow. Accordingly, a group comprising both aviation and broadcasting representatives should be created to study this problem at the earliest possible time. This could be accomplished by the President appointing a temporary Commission similar to General Doolittle's Airport Commission. The recommendations of this Commission could be passed on to the Air Coordinating Committee and the FCC for implementation.

The procedures now in force discourage broadcasters who desire to take full advantage of the Commission's standards. Compromise results. The public is denied service. Unless remedial action is taken there is imminent danger of destroying one of the basic elements of the Commission's television allocations philosophy—high towers which insure service to the greatest number of people.

BLUEPRINT for a TV STATION

The Los Angeles architect-engineer firm of Pereira & Luckman (the Luckman is Charles Luckman, former president of Lever Bros.) has designed this unique TV studio and office building for KEYT (TV) Santa Barbara, Calif. In housing TV economically and efficiently, this may well become a model for future stations of similar size. This one will be built for $125,000.



The hexagon is the geometric principle involved. With six walls in the studio instead of the traditional four, more working space is provided. Sets may be placed against all six walls and centrally-placed cameras can cover all six. The set-up would be ideal for single-camera production (see "The One-Man Show," page 78).

Working units—control room, telecine room, craft shops, announcers' room and dressing rooms — are clustered around studio for ease and convenience of traffic in the production area. Not shown on blueprint at right is an outdoor studio adjacent to the indoor hexagon. Santa Barbara weather will permit much TV production to be done out of doors. Expansion of this plan is possible. A second indoor studio, with its own cluster of shops and technical facilities, can later be built next to the original.

The building site is Mesa Hill, 400 feet above the center of the city. Construction begins in a week. (Transmitter is being built on a 4,100-foot peak in the Santa Ynez mountains, 16 miles west of Santa Barbara.)

KEYT (TV) will operate on Ch. 3. Principals include Harry C. Butcher, owner of KIST Santa Barbara; Colin M. Selph, former vice president and general manager of KDB Santa Barbara; Arthur F. Marquette, partner in Sherman & Marquette agency, and Ronald Colman, actor.

As shown in sketch below, exterior of the building is blend of contemporary design and early California architecture.

In last week's issue, B•T published a special article, "The High Cost of Hoping for Television," that described the severe drain on money and manpower in FCC TV hearings. Here, as a sequel, is a status report showing how the competitive applications stand in the struggle for TV stations.

By Larry Christopher

TV HEARINGS: ENDLESS GRIND?

SOME 47,000 pages of transcript and more than 340 days of testimony have been compiled thus far before FCC hearing examiners in the first handful of post-thaw television hearings—a mere 6% of the 260-odd contested channels presently designated for hearing or acknowledged in conflict by the Commission.

In many parts of the land, there are mergers and rumors of mergers among competitive applicants who hope to avoid the exhausting and expensive proceedings still to come in the future for most of them. Even requests for conditional grants and "interim stations" pending full hearing are being put to the FCC [B•T, March 9, 2].

But in Washington—on virtually the eve of the first anniversary of the lifting of the 3½-year TV freeze on April 14, 1952—the initial hearings grind slowly on, taking their toll of man, time and money. Of all three, they have taken much [B•T, March 9].

During the past year, the processing of uncontested applications has been in striking contrast to the progress on contested bids.

On July 11, 1952, FCC issued its first post-thaw group of 18 new-station construction permits. All were uncontested bids.

Since that date, up until last Tuesday, the Commission has issued 263 more permits to swell the post-thaw TV grant total to 281, including 14 noncommercial, educational outlets.

There now are 143 TV stations on the air, including the 108 pre-freeze outlets and 35 of the post-thaw stations.

Not one of the new stations, however, represents the fruit of a comparative hearing. In fact, no final decision has been issued in any case although an initial decision has been recommended by the examiner in the Denver Ch. 7 competition [B•T, Feb. 9]. Nevertheless, eight grants have resulted from seven hearings which dissolved chiefly through the withdrawal of competing applicants. In one case, an allocation change allowed two grants.

There have been some 1,090 new TV station applications filed with the Commission since the lifting of the freeze last April. Besides the 281 which have been granted, some 590 are scheduled for comparative hearings involving approximately 260 channels in more than 200 cities.

Few will guess the months—or years—it will take to clear this hearing backlog. Some may venture a speculation after it is better known how the newly revised hearing procedures will speed up the cases [B•T, Feb. 9]. But the revised hearing rules only took effect Feb. 4 and only two cases have been scheduled thus far under their terms.

The 47,000 pages of transcript and more than 340 days of testimony to date have been produced by only 15 of the 27 competitive hearings originally ordered by FCC on July 11, 1952. On that date, hearing notices were sent to 63 applicants seeking 27 channels in 14 different cities. Each channel contest represents a separate hearing.

Of these 27 initial hearings, seven have been completed and the records closed as of Tuesday. Five of the cases have been partially heard while the records in three other cases are virtually completed. Five of these original hearings are yet to begin. The seven remaining cases are those which dissolved as competing applicants withdrew or amended their bids for another channel. These withdrawals resulted in eight grants to the remaining applicants.

Since the original schedule of hearings last July, the Commission has set only four other channels for hearing, but more are now forthcoming under the new streamlined hearing rules. The Sacramento Chs. 40 and 46 hearings were ordered last fall. A fortnight ago, pursuant to the new rules, hearings were designated for Ch. 2 at Spokane, Wash., and Ch. 69 at Fort Wayne, Ind. [B•T, March 9].

Ironically, the Spokane and Fort Wayne cases are to commence April 6 while the Sacramento Chs. 40 and 46 proceedings have been continued without date although officially "opened" Nov. 17, 1952. The examiner in the Sacramento cases has been busy hearing two channels designated earlier in that city, hence the delay.

As of Tuesday, taking into account withdrawals and additions to the roster of TV applicants in hearing status, the Commission has 61 applications in hearing, seeking a total of 26 channels in 15 cities.

McFarland Letters

Besides these bids officially tabbed for hearing, a total of 188 applicants have been informed through "McFarland letters" that they are mutually-exclusive with other applicants, thus face comparative hearing, while another 394 applicants for contested channels have been "passed over."

The McFarland Act, which became effective July 16, 1952, and amended the Communications Act, provides that FCC first must inform an applicant by letter that his bid cannot be granted since it is mutually exclusive with the bid of another for a given channel. The McFarland letter also is used to inform an applicant that his bid is defective in certain respects, hence a hearing is necessary, even though it is uncontested. After a period of 30 days, in which the applicant may reply, FCC may schedule formal hearing.

McFarland letters have been sent to nine uncontested applicants informing them of defects or other questions which prevented grants. Of these nine, seven subsequently have been granted after additional information was supplied to FCC.

The McFarland letter procedure continues under the revised hearing rules.

On Oct. 15, 1952, until mid-February, the Commission effected a temporary speed-up plan in order to expedite new TV grants to those cities presently without service. During that time, FCC "passed over" any

Too secret to photograph...
Too big to believe!

America's newest atomic project is being rushed to completion in Pike County, Ohio.

Details are secret, of course. But this much is known: the A-bomb project will be the biggest single electric power customer in history.

Two of the largest electric power plants in the world will supply the needed power. Together they will generate more electricity than New York City uses . . . nearly as much as all the people and industries in Ohio now use.

To speed America's defense, they are being built fast. From the construction workers to the equipment manufacturers, everyone is geared to record-breaking performance.

These are impressive facts, but so is this fact . . .

The two big coal-burning electric plants were conceived, designed and are being built by a group of neighboring electric light and power companies. Fifteen* of them have joined together to form the $400 million Ohio Valley Electric Corporation to finance and operate this huge power project.

This means quick action for the Atomic Energy Commission. For the companies will supply urgently needed power for construction from their own systems—even before the new electric plants are completed. It also means that a large reserve of electric power will always be available.

Here's further proof that the very biggest electric power jobs can be handled quickly and efficiently by America's Electric Light and Power Companies. For if one company alone can't do it, several together can—and will!

**The 15 companies which have formed the Ohio Valley Electric Corporation headed by Philip Sporn, president of American Gas and Electric Company:*

Appalachian Electric Power Company, The Cincinnati Gas & Electric Company, Columbus and Southern Ohio Electric Company, The Dayton Power and Light Company, Indiana & Michigan Electric Company, Kentucky Utilities Company, Louisville Gas and Electric Company, Monongahela Power Company, Ohio Edison Company, The Ohio Power Company, Pennsylvania Power Company, The Potomac Edison Company, Southern Indiana Gas and Electric Company, The Toledo Edison Company, West Penn Power Company.

application which was in conflict with another for a given channel and a public notice of the passed-over bids was periodically released.

Some 394 applications, seeking a total of 176 channels in 145 cities, have been on the passed-over lists. Subsequent withdrawals and mergers, resulting in six grants, has reduced the list now to about 384 bids, 170 channels and 142 cities.

There are a number of methods being employed and under consideration in the industry to help break the hearing log-jam. Some involve outright merger of the competing applicants while others propose share-time operations or conditional grants pending completion of the hearings.

Paul R. Bartlett, president and manager of KFRE Fresno, Calif., competitor there with KARM for Ch. 12, has proposed that FCC grant an "interim" permit to a community trustee corporation composed of the competing applicants plus a community representative [B•T, March 2]. No formal action has been taken.

Share-Time on Ch. 8

At Salinas-Monterey, Calif., the Commission issued two permits for Ch. 8 there, to be employed on a share-time basis by the two former competitors for the channel, KSBW Salinas and KMBY Monterey [B•T, Feb. 23].

There have been several "marriage" applications approved, some involving AM stations in the same or nearby markets which previously were competitors for the TV assignment.

A unique twist to the merger was successfully used at Columbia, S. C. Ch. 10 was granted to WIS-TV Corp. there, chiefly owned by the licensee of WIS Columbia, Broadcasting Co. of the South, and 15% owned by former principals in WMSC Columbia. The latter withdrew from WMSC in favor of a joint TV venture, WMSC dropping its competitive application [B•T, Feb. 16].

Among the grants which have been made to applicants comprising mergers of former TV channel competitors are the following:

● Elmira, N. Y.—Ch. 18, El-Cor Television Inc., representing a merger of the competitive bids of the *Corning Leader* (WCLI Corning) and the *Elmira Star-Gazette* (WENY Elmira). Principals in the *Corning Leader* gave up minor holdings in WELM Elmira [B•T, March 2].

● Durham, N. C.—Ch. 46, T. E. Allen & Sons Inc., composed of Ambassador to Yugoslavia George V. Allen and his wife, and WTOB Winston-Salem, N. C. The Allen group and WTOB, previously individual applicants at Durham, now hold 50% each. [B•T, March 2].

● Champaign, Ill. — Ch. 3, Midwest Television, composed of Mr. and Mrs. August C. Meyer, 51% owners, and Helen M. Stevick and Marajen S. Dyess, owners of WDWS Champaign. The latter two transferred half of their former 40% holding to the previous Ch. 3 competitor, WSOY Decatur [B•T, March 9, 2].

● Macon, Ga.—Ch. 47, Macon Television Co., owned 45% each by WBML and WNEX there, with 10% balance of control owned by a local businessman not identified with either AM outlet, which continue competitive operations [B•T, Feb. 16].

Two applicants, now slated for comparative hearings, have asked the Commission for conditional grant of their bids pending outcome of the hearings. These are WCYB Bristol, Va., and Tri-State Telecasting Corp., Chattanooga [B•T, March 9]. WCYB is in contest with the Ch. 5 application of WOPI Bristol, Tenn. WCYB charges the WOPI application is a strike bid, filed to prevent a grant of its application.

Here is a summary of the 31 TV cases scheduled for hearing since the lifting of the freeze last April.

Seven Complete

The seven cases in which the records have been completed are:

Denver, Col.—Ch. 4. Contestants: KMYR Bcstg. Co. (KMYR) and Metropolitan TV Co. (KOA). Record opened Oct. 1, 1952; closed Feb. 10, 1953. Heard 22 days. Transcript 2,637 pages. Proposed findings due March 30.

Denver, Col.—Ch. 7. Contestants: Aladdin Radio & TV Inc. (KLZ) and Denver TV Co. Record opened Oct. 1, 1952; closed Oct. 17, 1952. Heard 13 days. Transcript 2,104 pages. Initial decision, recommending grant to Aladdin, issued Feb. 2, 1953 [B•T, Feb. 9].

Flint, Mich.—Ch. 12. Contestants: WJR The Goodwill Station Inc. (WJR Detroit), Trebit Corp. (WFDF) and W. S. Butterfield Theatres Inc. Record opened Nov. 17, 1952; closed Feb. 27, 1953. Heard 18 days. Transcript 2,017 pages. Proposed findings due March 30.

Fort Wayne, Ind.—Ch. 33. Contestants: News-Sentinel Bcstg. Co. (WGL) and Northeastern Indiana Bcstg. Co. (WKJG). Fort Wayne TV Corp., originally designated, withdrew. Record opened Nov. 17, 1952; closed Dec. 12, 1952. Record reopened briefly Feb. 4, 1953, to show amendment by WGL, then closed again. Heard 14 days. Transcript 2,136 pages. Proposed findings due March 12.

Harrisburg, Pa. — Ch. 27. Contestants: Kendrick Bcstg. Co. (WHGB) and Rossmoyne Corp. (WCMB Lemoyne, Pa.) Record opened Jan. 5, 1953; closed March 3, 1953. Heard 17 days. Transcript about 1,820 pages. Proposed findings due April 17.

Portland, Ore.—Ch. 21. Contestants: Mt. Scott Telecasters (KGON Portland) for Portland and Vancouver Radio Corp. (KVAN Vancouver, Wash.) for Vancouver. Record opened Oct. 1, 1952; closed Feb. 9, 1953. Heard 11 days. Transcript 1,156 pages. Proposed findings due March 23. This is shortest hearing to date in volume of testimony and number of days in which testimony was heard.

Tampa-St. Petersburg, Fla.—Ch. 8. Contestants: Pinellas Bcstg. Co. (WTSP St. Petersburg), Tribune Co. (WFLA Tampa) and Tampa Bay Area Telecasting Corp. Record opened Oct. 15, 1953; closed Jan. 21, 1953. Heard 32 days. Transcript 3,996 pages. Proposed findings due April 17.

Three Near End

The three cases in which the hearings virtually are completed are as follows:

Portland, Ore. — Ch. 12. Contestants: Oregon TV Inc., Columbia Empire Telecasters Inc. (KPOJ is 40% owner) and

TV STATION OWNERS:

SEEKING AS THEIR MANAGER ONE OF THE *OUTSTANDING MEN IN THE INDUSTRY.*

Network executive who came up through the ranks covering all phases of broadcasting-telecasting interested in acquiring equity in present or future TV station.

Northwest TV & Bcstg. Co. Northwest was added to the hearing by order of Sept. 8, 1952. Record opened Oct. 1, 1952; last heard Nov. 20, 1952, and scheduled to resume April 27, 1953. Heard thus far 27 days. Transcript 3,715 pages.

Sacramento, Calif.—Ch. 10. Contestants: McClatchy Bcstg. Co. (KFBK) and Sacramento Telecasters Inc. Record opened Nov. 17, 1952; last heard Feb. 19, 1953, and continued without date. Heard thus far 46 days. Transcript 6,170 pages.

Wichita, Kan.—Ch. 3. Contestants: Radio KFH Co. (KFH), Taylor Radio & TV Corp. (KANS) and Wichita TV Corp. Record opened Oct. 20, 1952; last heard Feb. 20, 1953, and continued without date. Heard thus far 59 days. Transcript 8,583 pages. This is the largest hearing to date.

Cases Partially Heard

The five hearings partially heard are:

Beaumont-Port Arthur, Tex.—Ch. 6. Contestants: Enterprise Co. (KRIC Beaumont), KTRM Inc. (KTRM Beaumont) and Beaumont Bcstg. Corp. (KFDM Beaumont). Record opened Nov. 17, 1952; recessed Dec. 15, 1952. Session was held March 4, 1953, and case resumed again last Wednesday. Heard 16 days as of March 4. Transcript 2,313 pages.

Duluth, Minn.-Superior, Wis. — Ch. 6. Contestants: Ridson Inc. (WDSM Superior) and Lakehead Telecasters Inc. (WREX Duluth). Record opened Nov. 17, 1952, and recessed Nov. 21, 1952. Resumes March 30, 1953. Heard five days thus far. Transcript 632 pages. Delay has been because of procedural litigation. Possible merger has been reported considered.

Portland, Ore.—Ch. 8. Contestants: Westinghouse Radio Stations Inc. (KEX), Portland TV Inc., Cascade TV Co. and North Pacific TV Inc. Cascade was added by FCC order of Sept. 29, 1952; North Pacific by order of Sept. 22, 1952. Record opened Oct. 1, 1952; hearing proper began Jan. 26, 1953, is now in session. As of March 9, heard 29 days. Transcript 4,334 pages. Case may be completed within three weeks.

Sacramento, Calif.—Ch. 3. Contestants: KCRA Inc. (KCRA) and Sacramento Bcstrs. Inc. (KXOA). Sacramento Bcstrs. previously was in the Sacramento Ch. 40 hearing, but after amending its bid was added to the Ch. 3 contest by FCC order of Nov. 3, 1952. Harmco Inc. (KROY), an original Ch. 3 contestant, withdrew Feb. 25, 1953. Record was opened and hearing began Feb. 26, 1953. Case is now in session. Heard nine days as of March 6. Transcript 1,013 pages.

Tampa-St. Petersburg, Fla.—Ch. 13. Contestants: Tampa Times Co. (WDAE Tampa), Orange TV Bcstg. Co. and Tampa TV Co. (20% owned by Walter Tison, operator of WALT Tampa). Tampa TV Co., successor to Mr. Tison's Tampa Bcstg. Co., was added by FCC order of Oct. 8, 1952. Record opened Oct. 15 but recessed without date. Resumed Jan. 7, 1953, and again recessed March 10 until April 7, 1953. Heard 24 days as of March 10. Transcript about 4,000 pages.

Remaining To Be Heard

The five cases of the initial July 11, 1952, group which remain to be heard include:

Beaumont-Port Arthur, Tex.—Ch. 4. Contestants: Port Arthur College (KPAC Port Arthur) and Smith Radio Co., Port Arthur. Smith Radio was added by FCC order of Nov. 26, 1952. Original contestant Lufkin Amusement Co. was dismissed Dec. 16, 1952. Seeking to be added to proceeding and successor to Lufkin Amusement Co. is Jefferson Amusement Co., Beaumont. Jefferson's application was accepted Nov. 24, date has been set for this case. Procedural litigation has delayed.

Canton, Ohio — Ch. 29. Contestants: Brush-Moore Newspapers Inc. (WHBC) and Stark Bcstg. Co. (WCMW). Scheduled April 15. Delay in proceeding has been due in part to illness of a principal witness.

Duluth, Minn.-Superior, Wis. — Ch. 3. Contestants: Head of the Lakes Bcstg. Co. (WEBC Duluth) and Red River Bcstg. Co. (KDAL Duluth). Scheduled March 23. Procedural litigation has delayed. Possible merger has been reported considered.

Portland, Ore.—Ch. 6. Contestants: Mt. Hood Radio & TV Bcstg. Corp. (KOIN) and Pioneer Bcstrs. Inc. (KGW). Record opened Oct. 1 but procedural delays ensued and case is now set May 11. Mt. Hood replaced KOIN Inc. while KXL Bcstrs. withdrew.

Wichita, Kan.—Ch. 10. Contestants: WKY Oklahoma City, KAKE Wichita and Mid-Continent TV Inc. Record opened Oct. 20 and recessed; now set March 16. Sunflower TV Inc. has withdrawn.

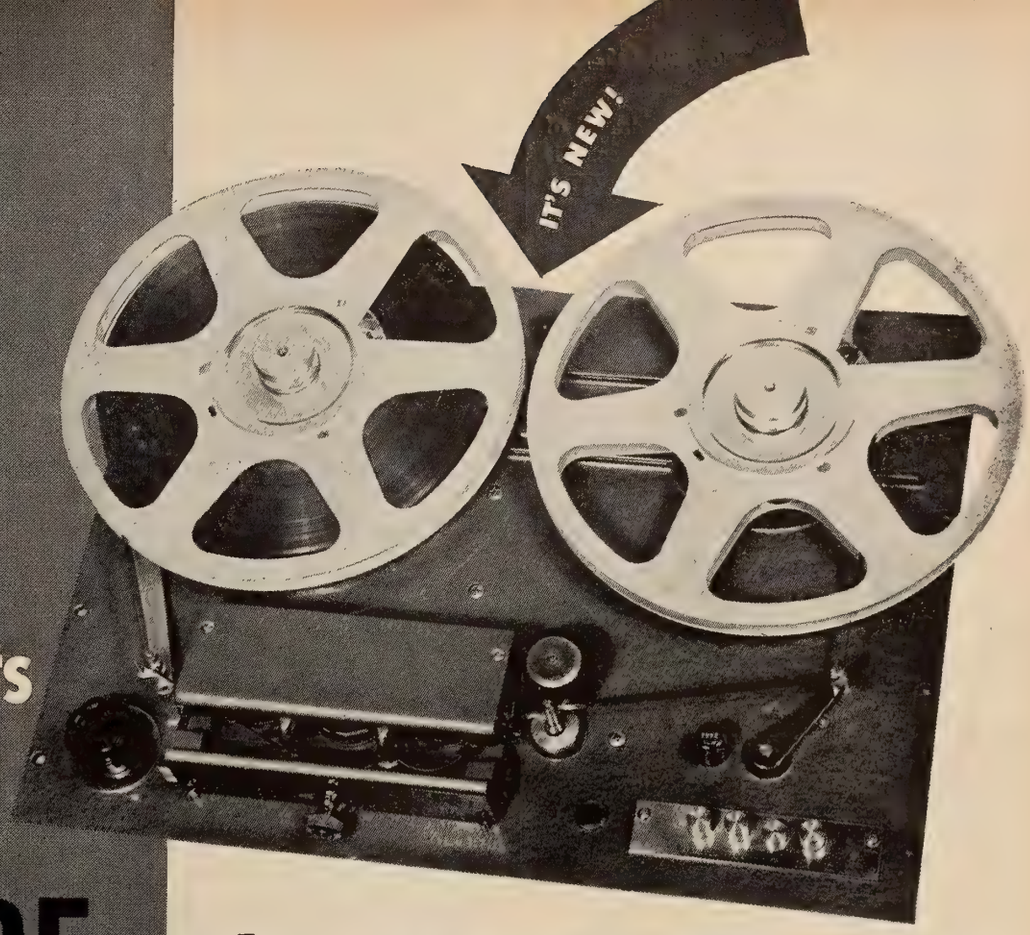
New TV Hearings

Hearings scheduled since July 11, 1952:

Fort Wayne, Ind.—Ch. 69. Contestants: Radio Fort Wayne Inc. (WANE) and Anthony Wayne Bcstg. Set April 6, 1953.

Sacramento, Calif.—Ch. 40. Contestants: Ashley L. Robinson and Frank E. Hurd d/b as Cal Tel Co. and Maria Helen Alvarez. Hearing was officially opened Nov. 17, 1952, but no testimony was taken and no date is set for start of the proceeding. Delay has been due to length of Sacramento hearings designated prior to this channel.

Sacramento, Calif.—Ch. 46. Contestants: John Poole Bcstg. Co. and Jack O. Gross. Hearing was officially opened Nov. 17, 1952, but no testimony was taken and no date is set for start of the proceeding.



Spokane, Wash.—Ch. 2. Contestants: Louis Wasmer (KREM) and TV Spokane Inc. Set April 6.

Dissolved and Granted

The seven hearings which dissolved, resulting in grants, are:

Flint, Mich.—Ch. 16. W. S. Butterfield Theatres Inc. amended to Ch. 12 allowing

puts other tape recorders in the SHADE...the PRESTO RC-11

PRESTO introduces a precision-engineered tape recorder with a radical new type of construction!

Featuring a self-contained capstan drive unit, the PRESTO RC-11 provides durability, flexibility and rapid maintenance heretofore unheard of in tape equipment. Motor, fly wheel, capstan shaft, pressure pulley and solenoid are all pre-mounted on a cast aluminum sub-assembly . . . a complete working unit quickly removable for service or replacement.

A heavy, ribbed, cast aluminum panel designed for rack or case mounting supports all other components. Overall durable construction gives additional reinforcement and protection during shipping and adds years to the life of the machine.

In terms of performance and operational ease, the RC-11 also steps out front. This new recorder, with complete push button operation, automatic microswitch in case of tape breakage and a reel capacity of 10½ inches, is an engineer's delight.

The combination of advanced design and engineering in the RC-11 puts ordinary tape recorders in the shade . . . makes this instrument an *investment*, not an expenditure. Ask your PRESTO distributor for full information on this important development in tape recorder design . . . the *all new* RC-11.

The "unitized" construction of the Presto RC-11

. . . allows a complete flexibility in the manufacture of various types of instruments. By the simple rearrangement of components the RC-11 becomes a high fidelity recorder, a dual track, bi-directional recorder or reproducer or a long-playing reproducer with automatic tape reversal.

NEW CAB CONSTITUTION DISPUTED AT ANNUAL MONTREAL CONVENTION

Newly-created vice presidency's power to hire and fire paid CAB employes, proposed in Canadian Broadcasters' new constitution, brings dissent among members, causing the document to be submitted for two-thirds mail vote. CAB proposes name-change to include TV. Station representatives object to upped associate fees.

A BITTERLY fought new constitution, plans for industry promotion, station editorializing and plans for Canadian concert music promotion were the main issues at the annual convention of the Canadian Assn. of Broadcasters at the Mount Royal Hotel in Montreal last Monday through Thursday.

Attending in record numbers, CAB members in closed sessions Wednesday and Thursday discussed the new constitution clause-by-clause, with constant legal skirmishing on the power of the newly-created post of executive vice president to hire and fire all paid CAB employes, including secretary-treasurer and sales director.

A majority of the members, in a standing vote, backed the stand of the CAB board and constitution committee that the executive vice president be enabled to control all paid employes. As a result of heated convention action, however, the full new constitution is being submitted for a two-thirds majority mail vote by members.

A proposal for a change of the organization's name to Canadian Assn. of Radio and Television Broadcasters is being submitted to the Canadian Secretary of State for approval, according to law.

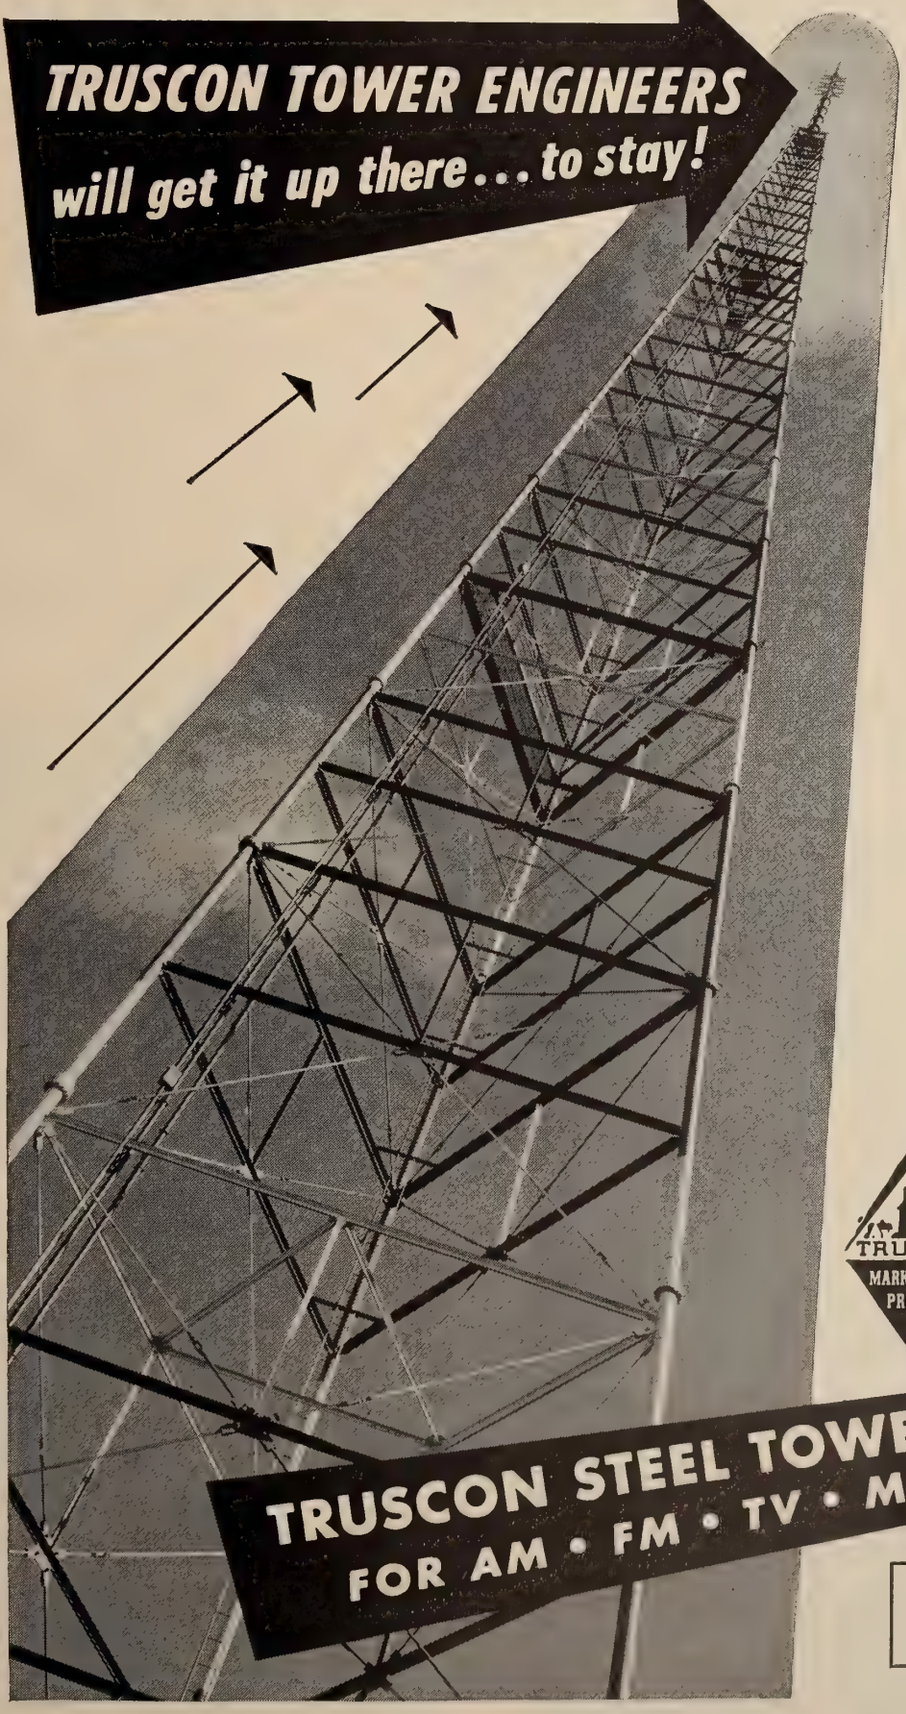
A proposal to increase associate membership fees is being contested by station representatives, some of whom intimated they would have to drop unprofitable stations under the associate membership increases. The final rates of the increased fees are being decided by a joint committee of the CAB board and representation firms.

More Canadian broadcasters belong to the CAB than at any time before, General Manager Jim Allard reported to the convention. Membership now stands at 116 independent stations, compared to 102 a year ago. Nearly all the stations are privately owned. Associate members number 39 compared to 33 a year ago. Finances showed a small profit, a little over $200 compared to anticipated deficit of $12,000. No special assessment will be required for the copyright legal battle, which is now in its final stage with an appearance before the Canadian Supreme Court sometime later this year, he said.

Mr. Allard reported on the year's operations, including agency franchise arrangements, public relations work, liaison with NARTB and other broadcasting organizations, granting of scholarships to various educational organizations, establishment of a CAB central reference library at Ottawa, addition of economic trends service for members, establishment of an employment service within the industry, setting up industry-wide pension plan for employees, and continuation of centralized public service programs from Ottawa.

He dealt at length with the copyright problem and the civil suit between CHML Hamilton, and Composers, Authors, Publishers Association of Canada (CAPAC). By bringing suit against only one station instead of all stations by arrangement with CAPAC, the CAB was able to save about $30,000 in legal fees and related expenses. He reported on the hearings before the Canadian Copyright Appeal earlier this year, and its ruling that the 1952 rates of 1¾% on gross station revenue prevail this year, pending settlement of the civil suit.

He also summarized the proposed new CBC regulations of Canadian program content and the reception accorded the CAB's brief opposing the new regulations.



Mr. Allard pointed out that "perhaps our efforts have been helped by the fact that the CBC has been forced to drop its hypocritical mask of public service and guardianship of Canadian culture. Its attempted monopoly of television, its weird juggling of uhf and vhf television channels to protect its position, its policy of holding down our rates while it tries

CAB conventioneers discuss Coronation Year agenda, (l to r) Hal Crittenden, CKCK Regina; Helen Thomas, Street & Finney, New York; Gerry Gaetz, CJCA Edmonton; Mary Dunlavey, Harry B. Cohen Adv. Inc., New York, and Ted Campeau, CKLW Windsor-Detroit.

FRENCH - CANADIAN sportscasting is explained to Canadian agency timebuyers and radio directors by Michel Normandin (l), freelance sportscaster, to (l to r) Ralph Hart, Spitzer & Mills Ltd., Toronto; Ev Palmer, McCann-Erickson Inc., Toronto; Mary Moran, MacLaren Adv. Ltd., Toronto; and Bill Harwood, Cockfield Brown & Co., Montreal.

to make us use program material that could not attract audiences, its position in relation to copyright, its continued network monopoly, its deals with U. S. TV networks, and its open admission that it could not exist without importing U. S. programs, have done more to make more people realize the true situation than anything we could have done. The policy of the last four years has made great gains for us."

Keynote speaker Richard Gettell, chief economist of Time Inc., New York, at a Monday session told Canadian broadcasters that business ingenuity is required to increase marketing efficiency, to cut costs of physical distribution and pass on the savings in lower prices. He said it was necessary to improve techniques of selling, advertising and promotion, to create new and larger demands, and to revive the arts of competitive selling.

Pitfalls to guard against in programming for the mass market were explained by Mrs. Harriett Bruce Moore, director of psychological services, Social Research Inc., Chicago, in another Monday session. She outlined various types of programs and commercials which surveys show are most successful with the 65% of the U. S. audience who are in the lower-middle and upper-lower income brackets.

At the annual dinner Tuesday Bill Rea Jr., CKNW New Westminster, was presented with the John J. Gillin Jr. Memorial Award for the most public service in Canada in 1952. This included presentation of scholarships by CKNW for TV development on Canada's West Coast. Glen Robitaille, technical director, CFPL London, was given the Canadian General Electric Co. award for his outstanding contribution in organizing the 1952 technical meeting of Central Canadian broadcast engineers at Toronto.

Welcoming more than 300 members of the broadcasting industry to the largest meeting in its 28 years, Malcolm Neill, CFNB Fredericton, chairman of the CAB board, stated Monday morning in government circles at Ottawa "there is a growing realization that the broadcasting setup is not a happy one, and that something must be done to correct the situation. We are closer than ever to having injustices of the present broadcasting act corrected and to obtaining for free enterprise broadcasting the same freedom as granted all other forms of communication."

Reviewing events of the year, Mr. Neill dealt in detail with hearings before the CBC board on proposed new broadcasting regulations, telling the meeting that proposed regulations have now been withdrawn for further study and redrafting by a CAB-CBC committee. He reported on television meetings with cabinet ministers and said the present CBC and Canadian government plan for single coverage television "is completely impractical and unrealistic, and most unsatisfactory to broadcasters and the public. They have made it as difficult as their imaginations could conceive for private companies to establish an effective free enterprise service."

Praises Rate Values

Rates charged by Canadian radio stations represent, in terms of values given, the greatest advertising buy of the 20th century," Pat Freeman, CAB sales director, told broadcasters and agency representatives. He emphasized (1) broadcasters over a period of years failed to charge rates commensurate with circulation; (2) there was a 100% increase in the number of national advertisers on Canadian radio since 1945; (3) there is a definite swing toward spot radio in Canada; (4) today almost 95% of all Canadian homes have at least one radio. He urged development of better measurement tools, less emphasis on individual program ratings, greater participation in education and civic affairs, development of an "editorial" voice and clearer understanding that radio sells by "talking to people."

Harold Fellows, NARTB president, talked Monday of current problems of American colleagues, especially AM stations' decisions to enter television. He encouraged Canadians, saying "after five years of continuous television, radio broadcasting is growing in terms of the number of outlets." He pointed out that evidence shows television is already a good investment, despite its many complications. He closed asserting the conviction that Canadian and American broadcasters have a mutual obligation to fight for systems of communication which will enable citizens of the two countries to know each other better.

At a closed meeting Monday evening, broadcasters learned costs and difficulties of entering television and discussed at length and without

"TO MAKE CAMERAS WHICH WILL TAKE THE WORLD'S FINEST FILMS"

WORK on the first MITCHELL CAMERA was dedicated with these words over thirty years ago.

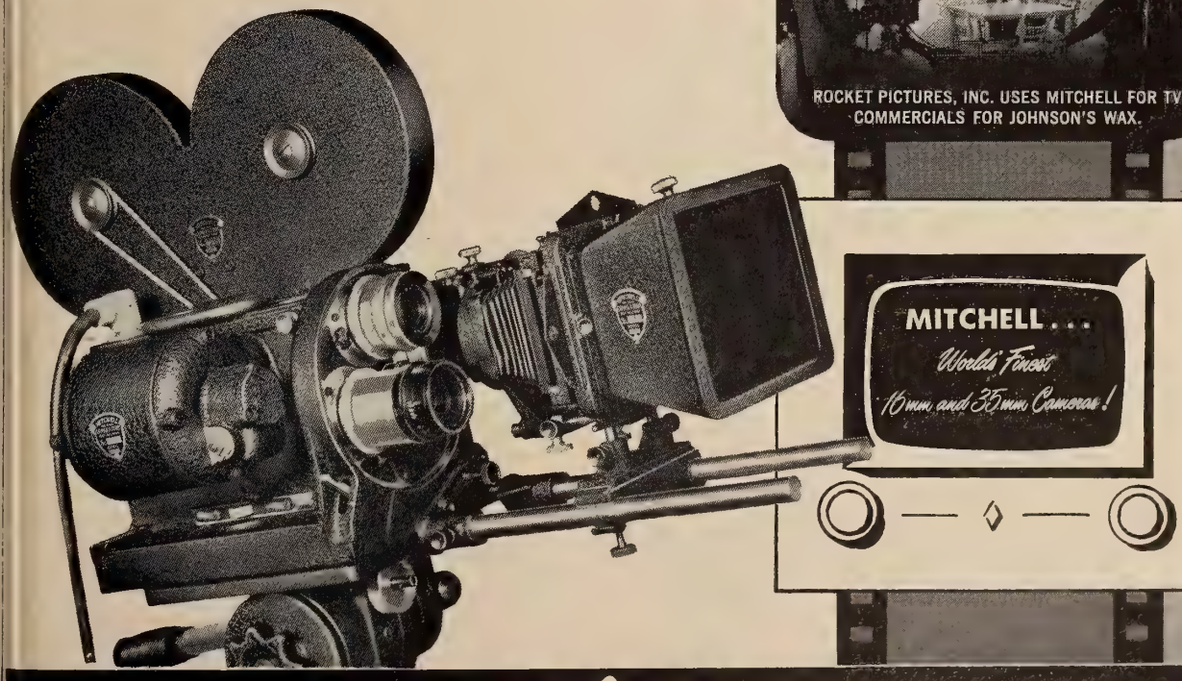
Today Mitchell 16mm and 35mm Cameras are used throughout the world in every field of motion picture photography.

In Television, Mitchell Cameras have pioneered new and superior techniques and standards. Mitchell, alone, brings you years-ahead professional motion picture equipment. Commercials, shorts, and features filmed with this camera are *sharper, clearer,* and *steadier* on home television screens because of the internationally famous smooth, positive operation and perfect control which the Mitchell Camera brings to each film.

The Mitchell 16mm Professional has the same proven Mitchell 35mm features which have made this camera the standard equipment of major studios in every part of the world.

Be sure of professional results—use the Mitchell Camera.

TOM KELLEY STUDIOS USES 35MM MITCHELL NC FOR DESCO-WARE COOKING UTENSILS' TV FILMS.



JERRY FAIRBANKS, INC. USES MULTIPLE MITCHELL 16's TO FILM "BIGELOW THEATRE."

ROCKET PICTURES, INC. USES MITCHELL FOR TV COMMERCIALS FOR JOHNSON'S WAX.

formal resolutions policies which could be pursued to obtain freer television conditions. Groups agreed that until private stations, supported by sponsored programs, could operate in major markets, stations in small cities did not have a chance for economic survival.

Tuesday morning, broadcasters heard a report on the success of the CAB-sponsored teenage book parade program and promotion used by cooperating stations. A report of the press privileges committee by Vern Dallin, CFQC Saskatoon, urged broadcasters to give more and faster news service, attend meetings of weekly newspapers and develop more Sunday news.

Wallace H. Wulfeck, vice president, William Esty Co., New York, stated "in giving men security, we have at times killed their incentive or drive," in discussing "Behavior Dynamics in Business." He showed how business could obtain assistance from professional psychologists.

Individual station contributions to public service were discussed in a panel session under the chairmanship of Vic George, CFCF Montreal. Participating were Fred Lynds, CKCW Moncton; Fred Pemberton, CKSF Cornwall; Vern Dallin, CFQC Saskatoon; Lyman Potts, CKOC Hamilton, and Al Hammond, CFCF Montreal.

Decision to increase membership fees for the Bureau of Broadcast Measurement, Toronto, by 100% for broadcasters and 50% for other members was passed at the ninth annual BBM meeting Tuesday afternoon, under the chairmanship of Charles R. Vint, president, Colgate-Palmolive-Peet of Canada. Increase becomes effective if research operations are expanded under CAB proposals. Current BBM report cost $110,000 to prepare, showing 137 Canadian station members, (88% of all stations), plus 40 advertisers, 70 agencies and 12 radio station representatives.

Ted Cott, NBC vice president, told Canadian broadcasters Tuesday afternoon to "get out of the groove," develop station personalities to attract audiences and tell people what they are doing. He dealt in detail with methods used to build the audiences of WNBC and WNBT New York; how station breaks are given "personality," how famous people are used and how the audience is promoted. He emphasized that "nothing is going to hurt radio" and the audience will respond to programs which consider that audience.

At the annual meeting of BMI Canada Ltd. Tuesday afternoon, Bob Burton, BMI New York, unfolded plans for bringing Canadian music in a large way to American stations and the American public. Canadian messages will be used to develop audiences for Canadian

HAND-CLASPED, Canadian-U. S. friendship at CAB convention, (l to r) Ted Cott, WNBC-WNBT New York; Walter Powell, commercial manager, CBC Toronto; Bill Rea Jr., CKNW New Westminster; and Joe Weed, New York.

music. Carl Haverlin, BMI, presided, followed with an outline of a plan to put Canadian concert music on records as an industry undertaking.

At the Wednesday morning session Mr. Allard announced plans for a series of five minute talks on the activities of independent broadcasters for immediate use on all member stations. Increased public interest in broadcasting and television problems makes the promotion series timely, Mr. Allard said. He reported on the increasing unionizing activities by NABET among Canadian major market stations.

Mr. Freeman reported on a recent survey on national advertising and outlined plans for a similar survey on local advertising by categories of merchants as a sales tool for next year.

A new constitution was adopted sectionally. CAB becomes CARTB, Canadian Association Radio and Television Broadcasters, with membership classes including future facsimile broadcasters. Fourteen directors from five regional areas are to be elected for two year terms, and seven new directors for each year. The board elects its own president and vice president. A new CARTB position of executive vice president was set up to replace the general managership, with Mr. Allard as first occupant.

The membership decided to recommend that BBM appoint a research director to study and recommend standards for audience survey organizations.

Editorializing by member stations was discussed at a closed meeting.

More Money for CBC Chief

SALARY of A. D. Dunton, chairman of the board of governors of the Canadian Broadcasting Corp., has been raised to $17,500 annually from $15,000, according to an official tabulation in the Canadian Parliament by Prime Minister Louis St. Laurent March 6.

CANADA

Winnipeg TV Prepared

FIRST TV station for Winnipeg will have 100 kw ERP, and is expected to be operating early next year. A 10 kw RCA transmitter has been ordered, along with a six bay antenna, by the Canadian Broadcasting Corp. The transmitter will be located on Portage Ave. in an office building at Winnipeg purchased by CBC for studios.

CANADA

Predict Japan TV Set Sales To Increase Tenfold in '53

Radio Tokyo officials tour U. S.; study video techniques and buy station equipment.

INTEREST in television is so keen in Japan that its present 2,000 TV receivers should increase to about 20,000 by the end of the year.

This observation was voiced by three officials of Radio Tokyo in an interview with B•T in New York last week. They were visiting the U. S. to purchase television equipment and to learn American TV techniques in engineering, programming and production in preparation for the opening of JOKR-TV in January 1954. The station will operate with a 10 kw RCA transmitter.

JAPAN

Men were Kokichi Endo, chief engineer of JOKR Tokyo, only 50 kw commercial station in Japan, Shozo Kanagai, managing director of the program department, and Paul Y. Ishihara, assistant manager.

Mr. Ishihara, spokesman, noted the only telecasting operation in Japan at present is NHK-TV, a public corporation supported by license fees which prohibit commercials.

He believes the growth of television will parallel that of radio, in which 80% of the 19 commercial stations "are operating in the black." JOKR-TV therefore will apply to television the programming formula that has proved successful in radio, he says.

"We plan to operate about seven hours a day with 50% devoted to entertainment and 50% to educational and cultural shows. Sports and news shows will be stressed," he said.

Broadcasters are scrutinizing the progress at NHK-TV "with considerable interest," he said, although that station is supported by public subscription. Radio listeners pay 50 yen a month and TV viewers 200 (360 yen is equivalent to one U. S. dollar).

Mr. Ishihara prophesies JOKR-TV will operate profitably "within a few years." He notes that advertisers have shown interest in television and are conscious of its sales impact.

Oppose Religious Sponsors

CANADIAN churchmen are opposed to sponsored religious telecasts. At the meeting of the United Church of Canada's board of evangelism and social service late in February in Toronto, it was recommended that sponsored religious programs for television be discouraged. The board suggested the Canadian Broadcasting Corp. provide religious television without cost and that Canadian talent be used wherever possible. One board member commended commercial firms sponsoring TV programs with a religious "flavor."

Canada Can Profit From U. S. TV Mistakes, Karol Says

CANADA

ADVERTISING men of Canada, where TV is just getting under way, were advised last week by John J. Karol, CBS Radio network sales vice president, to profit by U. S. advertising's mistakes and, in the growth of TV, achieve "an effective balance among all media."

Addressing the Advertising and Sales Executives Club of Montreal, Mr. Karol said Wednesday "I am certain that television will grow and develop in your country as it has in mine. This is fortunate. . . . We must be alert to the fact, however, that the addition of a medium does not imply the death of an established one. What it does imply—what it states emphatically—is the need for greater skill in achieving an effective balance between all media.

"It's a fact in American broadcasting that we have never been able to measure our audience with anything like complete accuracy. Our overall costs and our cost-per-thousands were so low compared with other media that we just never bothered. But when TV had been growing a while, we found our radio audience shrinking. Finally, we started to look at ourselves more carefully."

Among the findings cited by Mr. Karol: More than 100 million radio sets sold since the end of World War II; ownership of more radios by TV families than by non-TV families; more listening being done outside the living room, which means it "is relatively unmeasured"; auto radios numbering 25 million; number of radio homes grown to almost 45 million and of sets-in-use to 105 million," and as TV grows older, "important increases" in radio listening within TV homes.

"If we were able to measure our listenership more expertly," Mr. Karol continued, "we are certain we would find still larger audiences at even lower costs. We made the mistake of starting late in looking more carefully."

H. N. Stovin Sponsors Station-Agency Clinic

CANADA

BROADCAST station executives and agency officials attended the two-day sales clinic at the Royal York Hotel, Toronto, March 6-7, sponsored by H. N. Stovin & Co., Toronto station representative firm. Industry leaders addressed managers, owners and executives of stations represented by Stovin who attended the meeting en route to Canadian Association of Broadcasters annual convention at Montreal.

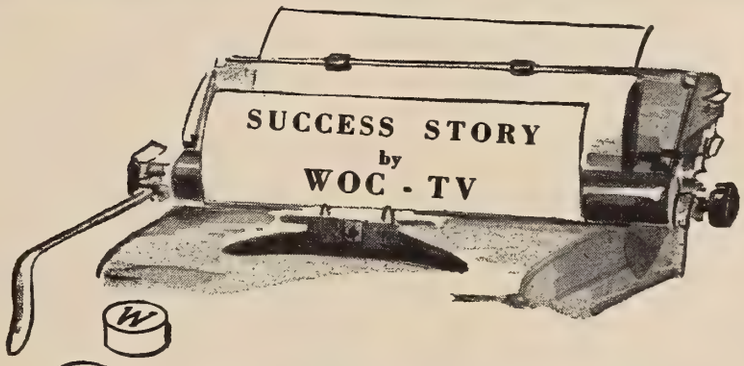
Speakers included Bill Westwood, assistant manager, CJOR Vancouver, who talked on station business administration and selling; Al Mackenzie, manager, CKY Winnipeg, who told station executives how CKY sells in a multi-station market where it is the newest; Ted Kober, research executive, Vickers & Benson Ltd., Toronto agency, who discussed market research.

Maurice B. Mitchell, Associated Programs Inc., New York, showed how ratings could be best used by stations. From the Stovin organization, Lee Reeburn and R. C. Armstrong discussed station promotion and national sales plans. W. A. Lindsay, Baker Adv. Ltd., Toronto, told broadcasters how he spends his clients' radio budgets, and W. Holroyde, Canadian General Electric Ltd., Toronto, spoke on pitfalls in setting up a television station.

Expect N. Y. Legislators to Continue TV Study

BATTLE over the proposal that New York State build and operate a 10-station educational TV network [B•T, March 2, 9] continued last week, with both sides apparently agreed on one point: The legislature probably will adopt a pending resolution to continue studies of the subject by a special commission.

There appeared no change in the belief that the legislature, heading toward adjournment, would accept the current commission's finding that, for the present, the 10-station proposal is not desirable or necessary as a state project.



Protests against the commission's report continued to be heard, with Democrats especially condemning it as having been dictated by Gov. Dewey's Republican administration. Proposals for the establishment of one or more "pilot" stations by the state also are pending. Setting up of a $500,000 pilot station also was proposed for inclusion in the commission's recent recommendations to the legislature, but was voted down by the commission majority 10 to 5.

Among others condemning the majority report was the Metropolitan New York Coordinating Council for Educational Television, which called it a "public disservice."

Meanwhile, representatives of some 50 educational institutions in the metropolitan New York area formed a new organization, the Metropolitan New York Educational Agencies Committee on Television, to fight for at least one TV station in the event the 10-station plans are defeated. Committee is headed by Dr. David D. Henry, executive chancellor of New York U.

California TV Study

A SIXTY-DAY study of the costs of installing and operating educational television channels has been ordered by the California State Assembly in Sacramento. The order preceded an agreement that the study would not affect other bills on educational channels. The House passed unanimously a resolution directing the Ways and Means committee to investigate costs.

WOCTV

Speaking of Responsive Viewers . . .

One of products made by Albert Lea Manufacturing Company is a kiddie toy-house construction set. During first three weeks of December, 1952, firm spent $840.00 for participation announcements on WOC-TV, offering these sets at $3.00 each. *Result:* 1,770 ORDERS . . . $5,310.00 IN DIRECT SALES . . . ALL FROM AN $840-ADVERTISING-INVESTMENT.

Beck's Salad Dressing Company, on December 4, 1952, began 13-week schedule of one participation weekly on "Today's Cooking"—WOC-TV's popular homemakers' program. During 13-week schedule, this 35-year-old Davenport food processing firm forced distribution on all their products—INCREASED SALES BY 30% ABOVE SALES TARGET THEY HAD SET FOR PERIOD. Beck's has renewed for another 13 weeks.

MSC Radio-TV Conference Features UNESCO's Hull

INTERNATIONAL mass communications which will give a true picture of the world was advocated by Richard B. Hull, a member of the U.S. Commission of United Nations Educational, Social & Cultural Organization and radio-TV director of Iowa State College, in a talk March 6 to 100 men and women attending the eighth annual Radio-Television Conference at Michigan State College at East Lansing.

The full day's program on "Safeguarding Freedoms Through Radio and Television" included a morning panel, "The Function of Radio and Television in Developing Active Citizenship." Speakers were Don DeGroot, assistant general manager, WWJ-AM-FM-TV Detroit; R. A. Peters, president, Michigan Junior Chamber of Commerce; Dr. Howard McCluskey of the U. of Michigan and former national president of the Adult Education Assn., and Robert J. Coleman, general manager, WKAR East Lansing, MSC outlet.

The afternoon panel, "The Function of Radio and Television in Preserving Our Freedom of Speech," included Prof. Robert Scott, police administration department, MSC; William Ray, manager of news and special events, NBC Central Div.; Frank G. Millard, Michigan attorney general; W. A. Pomeroy, WILS Lansing, manager and president of the Michigan Assn. of Broadcasters, and Prof. Armand L. Hunter, director of television development, MSC.

General chairman was Prof. Robert Crawford of MSC's department of speech, dramatics and radio education. Dale B. McIntyre, public service director, WJR Detroit, was chairman of the afternoon session.

WEMP Gives Scholarship

RADIO-TV scholarship worth $4,000 and extending over a full four-year term at Marquette U. has been donated by WEMP-AM-FM Milwaukee, effective this fall. Designed to encourage competent young persons to enter the broadcast field, the scholarship will be based on writing and speaking ability, scholastic achievement, character and financial need, according to Hugh Boice, general manager of the stations. Applicants must take a scholarship test as well as explain in 1,000 words "Why I intend to make a career in radio or television." WEMP will work with university counselors in advising the winner on a curriculum leading to a degree in journalism.

TFI's Mahin Attacks Bill For Illinois TV Outlets

PROPOSAL that the Illinois legislature appropriate funds for two educational TV outlets was attacked in Springfield last Tuesday as a means of "putting a vehicle of propaganda in the hands of a government agency."

George A. Mahin, executive secretary of the Taxpayers Foundation of Illinois, made the charge in a statement prepared for delivery to two House committees considering the proposal. He also warned against "endless spending" for educational video.

Hearings on a bill to appropriate $1 million each for non-commercial stations in Chicago and Champaign-Urbana were postponed, however, by request of Rep. Charles Weber (D., Chicago), the bill's sponsor, who asked two weeks to get more data on building and operating costs.

The money would come from a reserve set aside for a Chicago fair project, but never used. A citizens group also is soliciting funds from citizens and corporations for a Chicago educational TV outlet on vhf Ch. 11, which would be operated in Chicago by the Educational TV Council, comprising more than 10 institutions, and in Urbana by the U. of Illinois [B•T, March 9, 2].

Kent Chandler, A. B. Dick Co., was named vice chairman of the Chicago fund-raising group last week, and will assist Chairman Edward L. Ryerson. The group hopes to raise $500,000 before June 2, deadline set by the FCC on educational, non-commercial reservations.

'WBT-WBTV Scholarships'

ANNUAL scholarship fund of $5,000 has been established by a foundation sponsored by the Jefferson Standard Broadcasting Co. for study of radio, television or allied fields at the U. of North Carolina or North Carolina State College.

Joseph M. Bryan, president of Jefferson Standard, license of WBT-AM-FM and WBTV (TV) Charlotte, said the "WBT-WBTV Scholarships" are valued at $1,250 each and will be awarded annually with a four-year tenure.

Cleveland AFTRA Local Chooses AM-TV Winners

WINNERS in all radio and television program classes have been selected for the second time in Cleveland by the local of the American Federation of Television and Radio Artists (AFTRA).

WTAM and WGAR received five radio "bests" each and WXEL (TV) five "bests" in TV. In radio, WDOK took two "bests"; WERE two, and WSRS one, while in television WNBK (TV) received four and WEWS (TV) one,

Performances cited: Johnny Andrews, WTAM-WNBK (TV), "best radio program," "best radio musical performance" and "best TV performer"; Wayne Mack, WDOK, "best radio performer," "best disc jockey, classical music, radio"; Sanford Markey, WTAM-WNBK (TV) news editor, special services; Lee Sullivan, WERE, "best popular disc jockey."

WSRS news reporting, and Bob Engel, news director, were cited as the best in local radio, with the local TV award going to WEWS (TV) and Dorothy Fuldheim. Public service award in radio went to WGAR and Reg Merridew, program director, and in television to Barclay Leathern for the programming produced by Western Reserve U.

Julius Glass, WGAR promotion director, and Charles Hutaff, WNBK (TV) promotion merchandising manager, were commended for "promotion of the medium." Best radio commercials were those on the WXEL (TV) show, *Television Sohio Reporter*, prepared by McCann-Erickson, while the best radio spots were aired on WGAR's *Ten O'Clock Tunes*, prepared by D'Arcy Adv.

"Dean of the Year" was Eddie Leonard, chief engineer at WTAM-WNBK (TV), who put the AM outlet on the air in 1923.

Heritage Group Cites Role Of Networks in Vote Drive

AMERICAN Heritage Foundation last week announced that special "Bill of Rights Awards" in its 1952 Register-and-Vote competition have been issued to ABC, CBS, DuMont TV network, NBC and MBS, among others, for their "outstanding" contributions to the campaign.

Specific mention was made by the committee of judges, headed by Charles E. Wilson, former president of General Electric Co., of Mutual's "Lights On, Votes Out" drive as "the most effective plan of community action," and of NBC for "the most effective use of personal messages by eminent Americans."

Winners of duPont Awards To Be Announced March 27

WINNERS of the 1952 Alfred I. duPont Radio and Television Awards will be announced at a dinner March 27 at the Mayflower Hotel in Washington, D. C., according to O. W. Riegel, curator of the Alfred I. duPont Awards Foundation.

Murrow's Second Polk Award

CBS commentator Edward R. Murrow and Jack Gould, radio-TV editor of the *New York Times*, were among winners of the annual George Polk Memorial Awards announced last week by Long Island U.'s Dept. of Journalism. They will receive their citations at a luncheon at the Hotel Roosevelt, New York, April 30. Mr. Murrow, cited for his CBS-TV *See It Now*, and particularly for his Christmas Day TV show filmed in Korea, received a Polk award last year. Mr. Gould was selected for his radio and television reporting.

Buy where you get the most —

It's not enough to just put a program on the air. When you select a station, you should expect to get the best service and station cooperation to insure your program's success.

As one agency recently wrote: "The efforts that your station has put behind our programming have been by far the outstanding highlight of station cooperation in our many television markets."

This is another reason why more local retail and national spot advertisers sponsor programs on WGN-TV.

PROGRAMS & PROMOTIONS

WOR CASE HISTORIES

"IT WORks," theme used by WOR New York in recent advertising campaign, has been incorporated into a promotion booklet, thumb-indexed with colored tabs, which has been sent out to advertisers and agencies. It presents case histories of WOR's successful advertisers in 12 categories, giving sales figures, results, and advertiser testimonials.

MATCHLESS ADVERTISING

GIANT matchbooks have been mailed to 1,500 advertisers and agency men by KBIG Avalon, Calif., reading "For a BIG MATCH . . . look inside. For a BIG BUY that's matchless, check KBIG, giant economy package of Southern Calif. radio." Back book cover contains a schedule of the station's daily, weekly and monthly special spot announcement packages.

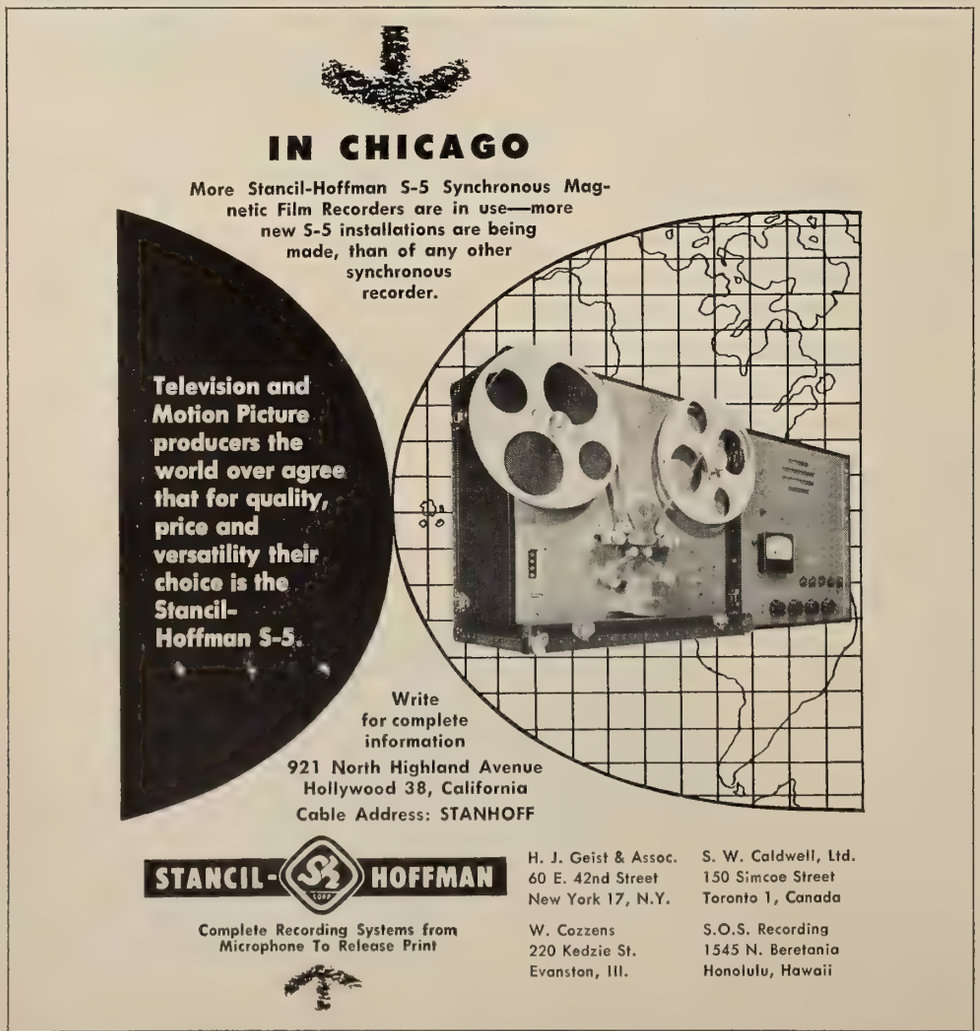
AP FARM SERIES

NEW 10-minute farm news program, *Around the Farm Around the Country,* is being distributed by AP Radio on a 13-week basis. AP said the weekly script will highlight "farm news from here and there." It was conceived by Fred Wackernagel, AP Radio farm and markets editor.

'ANIMAL FUN' FOR KIDS

NEW program for pre-school age children in tradition of NBC-TV's *Ding Dong School,* which it follows, has been started by WNBQ (TV) Chicago Monday through Friday. Titled *Animal Fun,* program features Win Stracke, actor and balladeer, with assorted live animal guests. Program is designed as a complement to *Ding Dong* and to provide entertainment of a sort "that will offer a hidden and painless kind of education as well," according to WNBQ (TV). Series is directed by Len Salvo Jr.

RADIO AND AIR TRAVEL



RADIO's contribution to rapid growth of California Central Airlines is outlined in a 4-page presentation distributed by BAB to members last week. Titled "These Planes 'Got Off the Ground' Fast—They're Pushed by Radio," the BAB pamphlet notes that the company spends as much in radio as in all other media combined. The new presentation is a follow-up to BAB's recently released "CAVU for Airlines with Radio Advertising," which describes the sales advantages of radio to airline buyers of advertising.

CUT ADVERTISING COSTS

PROMOTION piece in the form of a blotter with scissors attached tells advertisers how "To Cut Advertising Costs" on KYW Philadelphia. "Chances are," the copy points out, "that you can trim ad expenses by using KYW."

SHOPPING SERVICE RESULTS

WAAM (TV) Baltimore reported that on a single day 1,779 callers bought 2,855 items through their twice-daily program, *Shopping for You.* Penny Chase demonstrates the articles selected from retail stores throughout Baltimore from a permanent "home" set, consisting of a living room and completely-equipped kitchen. The shopping service, a WAAM feature since September, 1949 appears from 1-1:45 p.m. and from 6-6:45 p.m., Monday through Friday. Directors are Ed Sarrow and Harvey Jerome.

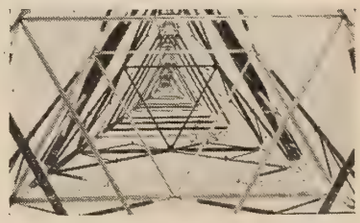
Tall or short . . .
for TV, Microwave,
AM, FM . . .
IDECO has
the tower
know-how.

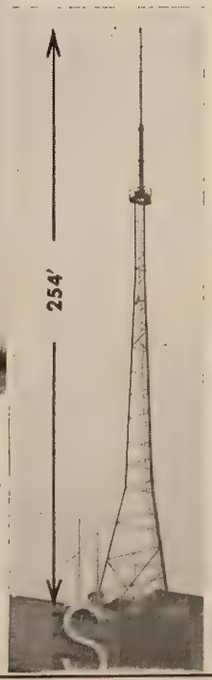
BUY A TOWER IN A PACKAGE?

Certainly you can! Ideco's Tower Package includes complete planning and design, foundations, fabrication, erection, final inspection, with complete insurance coverage.

Ideco's engineers are ready to begin solving your tower problems . . . from foundation to top beacon . . . the day your Construction Permit is issued. And Ideco engineers are on the job until you sign on the air.

You'll find important items like these in your Ideco Tower Package . . . all of them are features that help your tower go up faster and keep your station on the air day in, day out . . . year in, year out.





SCIENTIFIC TRIANGULAR DESIGN PREVENTS DISTORTION

The triangular cross-section pioneered by Ideco is your guarantee of a "true" tower with fewer structural members. A 3-sided tower offers the least wind resistance . . . much lower painting and maintenance costs. Rigid triangular design means your Ideco tower has greater resistance against distortion by wind pressure.

NO UNDUE STRESS OR STRAIN IN IDECO TOWERS

Ideco towers are shop-fabricated to a minimum predetermined tolerance . . . this guarantees a true structure from the ground up. Tower diagonal members are shop-fabricated to exact length and predetermined tension, completely eliminating the possibility of variable and inaccurate field adjustments. An Ideco tower *must* be true.

COMPLETE RUST AND WEATHER PROTECTION BY GALVANIZING

Rust, the great enemy of towers, is stopped before it can possibly start . . . every inch of tower and every tower part is hot-dip galvanized in Ideco's modern plant. Welded towers are dipped in sections (as pictured) while bolted towers are treated as members . . . this gives protection at joints that paint alone can never give.

IDECO

IDECO DIVISION, *Dresser-Stacey Company*

1953 Broadcasting Yearbook Addenda

CHANGES and additions received after the 1953 BROADCASTING YEARBOOK went to press are included in the following list which will also serve to correct some errors made in compiling the vast volume. For convenience, the information is arranged numerically by YEARBOOK page number. Personnel abbreviations may be found on page 6 of the 1953 BROADCASTING YEARBOOK.

Page 61—Under Newspaper Ownership, Mississippi, add: WCOC Meridian—Licensed to Mississippi Broadcasting Co., owned by D. W. Gavin, publisher of weekly *Meridian Record* and *Clarke County Tribune* (Quitman, Miss.).

Page 62—Under Newspaper Ownership, Pennsylvania, add: WRAK, WRAK-FM Williamsport—Licensed to WRAK Inc., two-thirds owned by Sun-Gazette Co., publisher of *Williamsport Gazette & Bulletin* and *Sun.*

Page 63—Add under Newspaper Ownership: PUERTO RICO, WKAQ San Juan—Licensed to El Mundo Broadcasting Corp., same ownership as *San Juan El Mundo.*

Page 253—Under Station Directory, Pennsylvania, WERC Erie, substitute Weed as representative for Avery-Knodel.

Page 255—Under Station Directory, Pennsylvania, WCRO Johnstown, add opposite name Jane Smith, "asst. to mgr."

Page 258—Under Station Directory, Pennsylvania WFLN (TV) Philadelphia, Harry W. Dallison is ce instead of John K. Thomas.

Page 292—Add under Station Directory: XEOR McAllen, Tex. (located in Reynosa, Tam., Mex.), 1 kw, 1390 kc (licensee, Mrs. Candelaria S. Vda. de Gonzales); Mail: Radio Station XEOR, P.O. Box 1708, Brownsville, Tex.; Tel.: 6-6620; Office: Nassar Bldg., McAllen, Tex.; Tel.: 6-8112. Nat'l Time Sales is representative. Robert N. Pinkerton, gm. (Delete XEOR from listing under Brownsville, Tex., page 282).

Page 319—Under Station Directory, Wisconsin, WOKY Milwaukee, add the following information: 710 N. Plankinton Ave.; Tel.: Broadway 1-8428; Gerald A. Bartell, p; Joseph Wolfman, cm; Ralph E. Evans, ce. News service, UP.

Page 401—Under Advertising Agencies Handling Radio Accounts, add: WALTER F. BENNETT & CO. ADV., Civic Opera Bldg., Chicago 6; Tel.: Franklin 2-1131. Jane Gunther, media director. Branch offices: Philadelphia 2—1405 Locust St.; Tel.: Kingsley 5-6799; Fred Dienert, manager. Miami, Fla.—446 Seybold Bldg.; Tel.: 9-0143; Buddy Starcher, manager.

Page 401—Under Advertising Agencies Handling Radio Accounts, BOZELL & JACOBS INC., change address and telephone to 205 N. LaSalle St., Chicago; Tel.: Central 6-6870. Instead of 1812 N. Meridian St.; Tel.: Wabash 4524. Add following: (home office, Omaha).

Page 403—Under Advertising Agencies Handling Radio Accounts, EVANS & ASSOC. ADV., add: Tel.: Edison 9521.

Page 404—Under Advertising Agencies Handling Radio Accounts, add: H. M. GARDNER ASSOC., 3450 Wilshire Blvd., Hollywood 28; Tel.: Dunkirk 5-1474.

Page 404—Under Advertising Agencies Handling Radio Accounts, GEARE-MARSTON INC., add branch office: New York 17—420 Lexington Ave.; Tel.: Lexington 2-0880.

Page 404—Under Advertising Agencies Handling Radio Accounts, GOODKIND, JOICE & MORGAN INC., add: (See Raymond R. Morgan Co.).

Page 408—Under Advertising Agencies Handling Radio Accounts, add: OLIAN & BRONNER, 35 E. Wacker Dr., Chicago; Tel.: State 2-3381. Radio Dept.: Kay Kennelly, media director.

Page 411—Under Advertising Agencies Handling Radio Accounts, change HUGH WAGENSEIL & ASSOC. to read HUGO WAGENSEIL & ASSOC.

Page 455—Under Directory of AM Broadcasting Stations by Call Letters, KBYZ Grand Rapids, Minn., should be KBZY Grand Rapids, Minn.

Page 457—Under Directory of AM Broadcasting Stations by Call Letters KWRB Oakland, Calif., should be KWBR Oakland, Calif.

Page 460—Under Directory of AM Broadcasting Stations by Call Letters, WMAW Menominee, Wis., should be WMAW Menominee, Mich.

Page 467—Under Consulting Radio Engineers, David & Barbeau, add address: P.O. Box 996, Schenectady, N. Y.

Page 468—Under Consulting Radio Engineers, add: W. DAWKINS ESPY. P. O. Box 48, Grand Rapids, Mich.; Tel.: Cherry 1-7981.

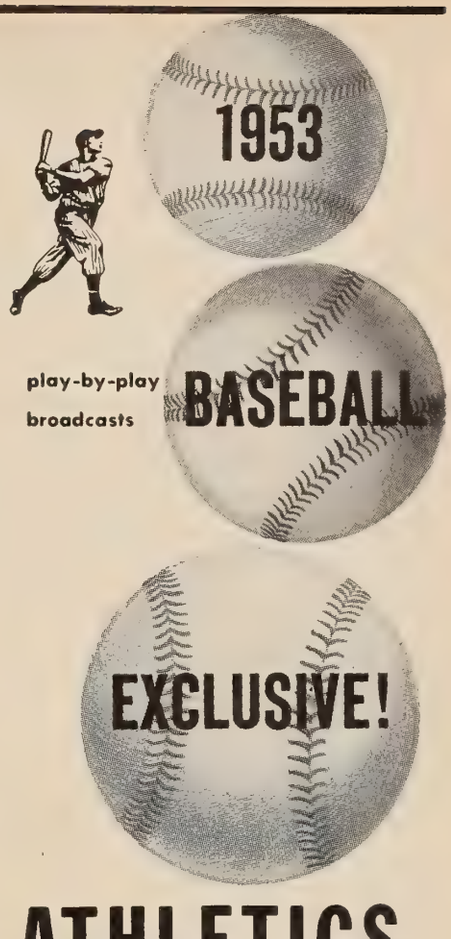
Page 468—Under Consulting Radio Engineers, add: GLENN D. GILLETT & ASSOC., 982 National Press Bldg., Washington 4, D. C.: Tel.: National 8-3373. Glenn D. Gillett. Associate: Richard J. Graim. Delete GILLETT & BERGQUIST, same page and insert names of GLENN D. GILLETT and RICHARD J. GRAIM, with "See Glenn D. Gillett & Assoc." opposite each name.

Page 468—Under Consulting Radio Engineers, VANDIVERE, COHEN & WEARN, correct telephone number to National 8-2698. Add: Partners, Edgar F. Vandivere, Jules Cohen, Wilson C. Wearn. Engineer: Paul Wimmer. Insert names of Messrs. Vandivere, Cohen and Wearn in appropriate alphabetical listings, with this notation opposite each: "See Vandivere, Cohen & Wearn." Delete name, Paul Wimmer, from listing of WELDON & CARR.

Page 486—Under Frequency Measuring Services, add: STRAIN ENGINEERING SERVICE, 1261 Niles Ave., N.W., Atlanta, Ga.; Tel.: Belmont 5164. C. E. Strain.

Milestones

►FULL-SCALE local promotion and completion of new studios mark the 30th anniversary of KUOA Siloam Springs, Ark. Now a Mutual affiliate, KUOA took the air with 1 kw on the U. of Arkansas campus with the call letters KFMQ in December 1923. Since June 1935, the commercial station has been owned and operated by John Brown U., which moved the outlet from Fayetteville and now has 5 kw output. New space, which will be occupied soon, comprises 7,500 square feet of space, 20 studios and offices and recording and transcription facilities on the third floor of the Cathedral of the Ozarks.



► JOHN DePROSPO, executive officer of the Municipal Bcstg. System, which operates WNYC-AM-FM New York, has completed 35 years of service with the City of New York. He was transferred to WNYC in 1937, after serving in a city clerk post.

► THIRTIETH anniversary of the first Canadian broadcast from a church was marked Feb. 11 by CKCK Regina. Thirty years ago the first broadcast originated from Carmichael United Church at Regina.

►ROSTER of musical directors and singers who have appeared on the ABC *Don McNeill Breakfast Club* is included in a 48-page booklet observing the program's 20th anniversary June 23.

► THIRTIETH anniversary of the *Calvary Baptist Church Hour* on WMGM New York was celebrated Wednesday. Station describes it as "the oldest gospel program on radio."

► WTIC Hartford, Conn., operating with 50 kw on 1080 mc, was congratulated on its 28th anniversary by Connecticut's House of Representatives. A resolution noted the station has received citations and awards each year from national organizations for outstanding performance and that it completed, in cooperation with the *Hartford Courant,* its 13th March of Dimes campaign with a record of more than $100,000 raised.

New Grantees' Commencement Target Dates

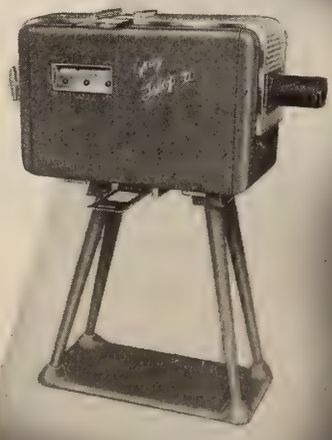
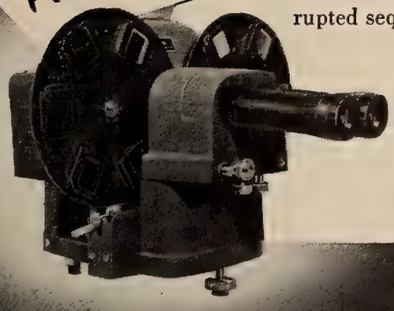
Used by more TV stations



than any other 4 x 5 commercial slide projector

The famous GRAY TELOP I



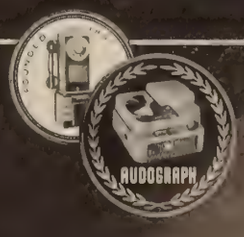
Makes profits grow — projects low-cost, easily produced commercials. Four optical openings for projection of opaque and transparent photos, rolling titles, slides, small objects, etc., with superimposition, lap dissolve, or fade-out effects. America's best-known, most-used television optical projector!

GRAY TELOP II

Another TV profit maker—with two channels accommodating slide holders, light boxes and accessories for special effects. Gives professional results—and one operator does it all!

AND NOW...

GRAY 3A TELOJECTOR



New, compact unit for automatic remote control projection of standard 2 x 2 slides . . . in uninterrupted sequence . . . with fading, lapping and superimposition. Solves many problems for both large and small stations. Get all the facts, now!

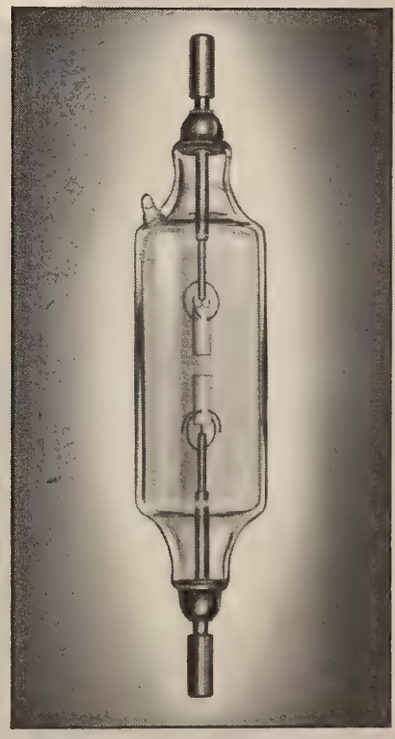
Compare G-E Synchro-Lite Projector Performance

Slave Operation
Instant Stop and Start
Preview Any Frame
No Phasing Bars
Super-Positions



• You get higher quality results from any film used—even high density film. Iconoscope tubes respond more favorably to a Synchro-Lite source than to standard incandescent sources.

• Forget annoying phase bars and "travel ghosts" and concentrate on the versatile effects you can get from the G-E Synchro-Lite Projector.

SYNCHRO-LITE FLASH TUBE, FT-231

• Money-maker and money-saver! G-E Synchro-Lite Projector gives you long lamp life, no instantaneous lamp failure, and requires low power input.

Now your commercial possibilities become unlimited—with a G-E Synchro-Lite Projector. For the first time you can superpose local film on remote presentations. Here's the only TV projector that can be slaved to a network or a remote source assuring smooth, continuous programming of a quality never before attainable! A touch of a button brings the film to a standstill within a second. Preview on the monitor any single frame of the film—from start to finish—without scorching or burning. Another touch and film starts. These days, when so much of your money-making commercial and regular programming depends on film, get the utmost in projector performance—insist on a G-E Synchro-Lite Projector. Write for complete information: *General Electric Company, Section 223-9, Electronics Park, Syracuse, N. Y.*

Southwest Operation

$25,000.00

This independent station is returning in excess of $10,000.00 a year to owner and business is continuing to increase. Located in a rich and growing southwest agricultural and oil market. Land and air conditioned building is on a long term lease. Equipment in excellent condition and will inventory at approximately $25,000.00. This price is set for quick action and the first qualified buyer will get one of the year's outstanding buys.

CAN YOU FILL THIS JOB AS RADIO SALESMAN?

There's a radio time salesman in upstate New York or one of the smaller cities in Pennsylvania who has a successful record whom we want to hire. He may feel his future earnings, prospects and opportunities are limited. He knows how to plan calls, present radio's advantages in comparison with other media and is capable of selling a spot campaign or long term program to retailers, wholesalers, manufacturers or agencies. He is imaginative, forceful and able to adapt ideas. He will be backed up with steady local promotion, success stories, area-wide surveys and full staff cooperation. Substantial salary will be paid to right man. Give some interesting facts about your experience, why you think you can fill this job with a radio station with national prestige.

JACK KNABB
Radio Broadcast Management Council

WANTED **GOOD-COOKER / GOOD-LOOKER**

To take full charge of successful TV kitchen. Ability, experience and vitality essential. Send picture, all personal data, nature of present employment. Wonderful spot in eastern market. Box 53W, B•T.

Situations Wanted

* * * FIND OF THE YEAR * * *

Crack radio news man with voice that "sells." Experienced writer, director and producer. Trained in TV writing and production. Want permanent position with go-getter enterprise. Box 99W, B•T.

Announcers

Here's an early morning man with 12 years experience waking up the good burghers of:

(a) a quarter million market
(b) a two million market
(c) presently in New York Metropolitan area.

HAVE ALL THE EXPERIENCE IN THE WORLD IN EVERY SINGLE ASPECT OF THE GAME (2 YEARS WITH A 4A AGENCY FOR INSTANCE) BUT DO SPECIALIZE IN EARLY MORNING STUFF. LOADED WITH APLOMB AND CAN SELL ANYTHING FROM AARDVARKS TO ZYXOMMAS (ANYONE FOR ZYXOMMAS?)

This has got to be my last peregrination so there's no rush. Prefer good sized city. (I'm 35 and as photogenic as Marilyn Monroe in case of TV.)

Dough and et ceteras can be discussed later.

You can begin negotiating your place into a top drawer early morning spot by contacting Box 40W, B•T.

SALES PROMOTION
PUBLIC RELATIONS

Here is a promotion man whose widely-varied newspaper experience is an asset that can be used profitably in radio-television promotion. Thoroughly grounded in sales promotion and public relations techniques on major metropolitan newspapers, he is now manager of a big, hard-hitting department. His acute understanding of merchandising problems and his skill in writing sales presentations was instrumental in his rapid advancement. An excellent copywriter, he has produced result-getting, prize-winning copy for use in all media. Handling of special events and publicity are part of his outstanding record of achievement. He is familiar with radio and television promotion problems, having worked closely with newspaper owned stations. He has had management experience in all phases of advertising. This is a young man with an unusual amount of talent to offer. That's why he is seeking a greater opportunity in a newer, rapidly expanding field. Box 87W, B•T.

New Petitions . . .

February 25

John H. Poole, tr/as John Poole Bcstg. Co. (KBIG), Avalon, Calif. License for CP for new AM station, 740 kc, 10 kw DA (BL-4897).—Opposition to petitions filed by KMPC Los Angeles and KCBS San Francisco which seek to set for hearing KBIG's application for license to cover CP. KBIG claims that it was built in full compliance with every provision of its CP and that KMPC and KCBS have presented no contrary reliable evidence.

Wyoming Valley Bcstg. Co. (WILK), Wilkes-Barre, Pa. Change to non-directional daytime operation on 980 kc, 5 kw LS, 1 kw N, DA-N (BML-1483).—Protest by National Bcstg. Co. (licensee WRC Washington) to grant to WILK, claiming operation will cause objectionable interference within present interference-free service area of WRC.

February 26

Benton Bcstg. Service (KBBA), Benton, Ark. Motion to strike petition to reconsider the mod. CP granted KBBA (BMP-6073) which was filed by WMPS Inc. (WMPS), Memphis, Tenn.—KBBA asserts WMPS petition does not comply with requirements of law, does not set forth facts with particularity on which FCC could act, recites information in vague and general terms and that in order to complete the petition it is necessary to seek information not contained within the petition, that the WMPS petition presents no fact with clarity on which FCC could act, that petition is based on erroneous information not in accordance with Standards of Practice, and that WMPS does not make out a case in its petition.

February 27

Allocation of TV vhf Ch. 4 to Fayetteville, W. Va.—Statement in response to notice of proposed rule making filed by WCAE Inc. (WCAE), Pittsburgh, Pa., in which WCAE recommends that FCC defer action on proposal to allocate vhf Ch. 4 to Fayetteville until proper investigation has been made with aeronautical authorities to determine whether aeronautical procedures in the area which would remain available for use by Irwin applicants would in any way preclude use and approval of antenna structures in area designed to make full utilization of vhf Ch. 4 at Irwin in accordance with FCC rules; also, that hearing be held on this matter.

Allocation of vhf Ch. 4 to Fayetteville, W. Va.—Opposition to proposed rule making filed by Daily Telegraph Printing Co., Bluefield, W. Va., claiming allocation to Fayetteville unfair, and that the Commission should rescind its notice which looks toward allocation of vhf Ch. 4 to Fayetteville, that FCC hold the one-year rule invalid or that if it finds one-year rule valid it assign vhf Ch. 6 to Bluefield, that if Commission decides channel should be assigned to Fayetteville, that a uhf channel be assigned there, that FCC issue declaratory ruling determining rights of Daily Telegraph Printing Co. to request assignment of vhf channel to Bluefield, that Commission hold full hearing to determine what solution to problem is in public interest, but that if FCC will not rescind proposed rule making allocating vhf Ch. 4 to Fayetteville, hold entire matter in abeyance until June 2, 1953.

Marinette-Menominee, Wis. New TV vhf Ch. 11.—Petition filed by M & M Bcstg. Co. to dismiss application for same channel filed by Green Bay Bcstg. Co. because Green Bay's only apparent purpose, alleges M & M, could be to block processing of M & M's application since Green Bay's application, filed just before FCC reached Marinette-Menominee on city-by-city priority line, was fatally defective.

March 2

The W. H. Greenhow Co. (WWHG) and Hornell Bcstg. Corp. (WLEA), Hornell, N. Y. Initial decision favoring fulltime operation for WWHG (Docket 10060 et al, RP-8024, BMP-5636).—Exceptions to initial decision filed by WLEA.

The Television Corp. (WAPI), Birmingham, Ala. Application for increase in daytime power from 10 kw to 50 kw on 1070 kc (BP-8679).—Petition filed by WIBC to designate WAPI application for hearing because of objectionable interference which would be caused within WIBC's normally-protected contour.

Spartanburg, S. C. New TV vhf Ch. 7—Petition filed by Spartan Bcstg. Co. (WORD), Spartanburg, S. C., for rehearing of grant of CP to WIS-TV Columbia, S. C., to require election with respect to construction under such permit and prosecution of the application of Bcstg. Co. of The South for CP for new TV station in Spartanburg, S. C., and for grant or conditional grant of CP to WORD for new TV station in Spartanburg. WORD asserts that grant to Bcstg. Co. of The South cannot be made without violating duopoly rules.

Sec. 3.57 of FCC Rules.—Petition filed by Municipal Bcstg. System (WNYC), New York, to revise FCC rules to permit municipalities control their street lighting systems through momentary increase of power and momentary interruptions of signal of AM stations.

Alaska Bcstg. Co. (KTKN), Ketchikan, Alaska. CP for power increase to 5 kw daytime on 930 kc (BP-8463).—Opposition to petition to grant application without a hearing filed by Aurora Bcstrs. Inc. (KABI), Ketchikan, which asserts population within proposed KTKN blanket contours is far in excess of 1% prescribed by FCC rules and that application for power increase be set for hearing.

March 3

Wichita, Kan. New TV vhf Ch. 10 (Docket 10258, 10262 and 10263).—Petition to dismiss application for new TV station filed by Sunflower Television Co. (Application from Mid-Continent Television Inc. and KAKE Bcstg. Co. are still pending and are set for hearing beginning March 16.)

Edwin J. Shuffman, Kingston, N. C. New AM grantee, 1230 kc, 100 w (BP-8438).—Reply of Edwin Shuffman to petition of Wilmington Bcstg. Service for reconsideration of Jan. 23 grant to Mr. Shuffman which sought to include condition that Mr. Shuffman's station would be subject to such interference as may be caused by grant of Wilmington's application (BP-7930) for 1230 kc, 250 w, Wilmington, N. C. Mr. Shuffman requests that any condition which FCC might impose on grant of Mr. Shuffman read that interference will be accepted by Mr. Shuffman from Wilmington provided Wilmington's antenna height not to exceed 175 ft. and 96.5 mv/m at one mile, respectively.

Chattanooga, Tenn. New TV vhf Ch. 12.—Petition by Tri-State Telecasting Corp. for conditional CP under rule 1.385 because two other competing applicants for same channel may not be financially qualified while FCC found Tri-State's application met all FCC requirements. Grant should be contingent upon outcome of hearing between all three applicants, Tri-State points out.

March 4

Mid State Bcstg. Co. and LeRoy E. Parsons, Chehalis, Wash. New AM, 1420 kc (Docket 10126,

light the way...

. . . to extraordinary lighting effects . . . at extraordinary savings! Rent whatever you need in specialized display, theatrical, studio and motion picture equipment from Jack Frost! For finer lighting . . . at fewer dollars . . . for complete lighting service that includes installation and removal wherever *you are . . . you're headed the* right *way . . .*

the frost way! JACK

For Full Information On Rental Equipment Write:

JACK A. FROST, DEPT. B, 234 PIQUETTE AVE.
Detroit 2, Michigan • TRinity 3-8030

10127; BP-8187, 8354).—Petition by LeRoy E. Parsons to dismiss without prejudice his application.

March 5

Storer Bcstg. Co.—Petition by WSTV Inc. requesting FCC to strike and declare of no effect "election" of Storer Bcstg. Co. to process its Wheeling-Steubenville TV application rather than its Miami application because Storer did not file final election "but only present expression of choice having no binding or lawful effect." WSTV also requests that FCC deny Storer's petition for reconsideration and grant WSTV's application.

Wichita, Kan. New TV vhf Ch. 3 (Docket 10259, 10260 and 10261).—Petition by Taylor Radio & Television Co. for leave to amend application to substitute GE equipment for RCA equipment.

Bristol, Va. New TV vhf Ch. 5 (BPCT-850).—Petition by Appalachian Bcstg. Corp. for conditional CP under rule 1,385 because competing application for same facilities filed by Radiophone Bcstg. Station WOPI Inc. "was not filed in good faith but was filed for purpose of delaying and hindering the grant of Petitioner's application."

Denver, Col. New TV Ch. (Dockets 9043, 10238, et al)—KMYR Bcstg. Co., Metropolitan Television Co. and Chief, FCC Broadcast Bureau, request that time for filing proposed findings and conclusions be extended from March 10 to March 30 because 22-volume record with 200 exhibits is so lengthy and complicated as to require more time.

March 6

Wyoming Valley Bcstg. Co. (WILK), Wilkes-Barre, Pa. Change to non-directional daytime operation on 980 kc, 5 kw LS, 1 kw N, DA-N (BML-1483).—Answer to protest filed by National Bcstg. Co. (WRC Washington) to grant to WILK, which claimed WILK will cause objectionable interference within presently interference-free area of WRC. WILK answers NBC protest by stating that NBC protest was not against WILK but against FCC rule, and also that the protest is premature.

March 9

Old Hickory, Tenn. New TV vhf Ch. 5—Motion for reconsideration of Commission action in passing over applications of Life & Casulty Insurance Co. of Tennessee and Capitol Bcstg. Co. filed by Capitol Bcstg. Motion states that vhf Ch. 5 in Nashville area is assigned not to Nashville but to Old Hickory, that Life & Casualty Insurance nevertheless has main studio location listed as Nashville which either is illicit under Sec. 3.613 of rules or else makes rule making proceedings in Docket 10318 stand at naught. Capitol requests FCC to grant it vhf Ch. 5 at Old Hickory, dismissing Life & Casulty application under Temporary Processing Procedure.

Killeen, Tex. New AM, 1050 kc, 250 w (Docket 10122, 10123 and 10124; BP-8173, 8288 and 8746).—Petition filed by John Blake and Charles R. Wolfe, applicants in proceeding with Highlite Bcstg. Co. and KFHT Bcstg. Co., to dismiss Blake-Wolfe application.

Wichita, Kan. New TV vhf Ch. 3 (Docket 10259, 10260 and 10261).—Opposition to petition of Taylor Radio Co. for leave to amend application to substitute GE equipment in lieu of RCA equipment filed by Radio Station KFH Co. KFH requests that petition for leave to amend Taylor application be denied because all parties to proceeding previously agreed upon RCA equipment and that to accept amendment would entail additional testimony to be adduced to "extraordinary" length of record and proceeding.

Albuquerque Bcstg. Co. (KOB) for extension of Special Service Authorization (Docket 10336, BSSA-275).—Proposed findings of fact and conclusions filed by AB-PT which assert FCC should return KOB to 1030 kc pending overall decision in Clear Channel proceeding, or assignment of other facilities to KOB pending outcome of Clear Channel proceeding. Proposed findings of fact and conclusions also filed by KOB which asserts operation on 770 with 50 kw D and 25 kw N would tend to be more fair, efficient and equitable distribution of radio service than on 1030 kc with 10 kw.

Marinette-Menominee, Wis. New TV vhf Ch. 11.—Opposition to petition filed by M & M Bcstg. Co. which sought to dismiss application of Green Bay Bcstg. Co. filed by Green Bay Bcstg. Co. Green Bay asserts contentions of M & M are without merit.

March 10

AB-PT merger (Docket 10031 et al., 10046 et al. and 10110).—Petition for reconsideration filed by Allen B. DuMont Labs. requesting FCC to reconsider portion of decision which held that Paramount Pictures controls DuMont.

The W. L. Greenshaw Co. (WWHG) and Hornell Bcstg. Corp. (WLEA), Hornell N. Y. Initial decision favoring fulltime operation for WWHG (Docket 10060 et al., BP-8024, BMP-5636).—Reply to exceptions and request for oral argument of WLEA filed by WWHG, which also seeks oral argument as well as affirmation of hearing examiner's initial decision without delay.

March 11

Sec. 1.342 of FCC Rules.—Comments filed by Westinghouse Radio Stations Inc. urges adoption of rules as proposed (filing of contracts).

Routine Roundup . . .

March 5 Applications

TENDERED FOR FILING

Change Transmitter Location

WKBS Oyster Bay, N. Y., Key Bcstg. System Inc.—CP to change trans. and studio location from Oyster Bay, N. Y., to Mineola, N. Y.

March 6 Applications

ACCEPTED FOR FILING

License for CP

WKNK Muskegon, Mich., Nicholas William Kuris—License for CP (BP-7903), as mod., which authorized increase in N power and changes in DA. AMENDED to change name of applicant to Nicholas William Kuris and Gladys Kuris d/b as NK Bcstg. Co. (BL-4854 AMENDED).

Modification of CP

KUDL Kansas City, Mo., David M. Segal—Mod. CP (BP-8394), which authorized new AM for approval of ant., trans. locations and change type trans. AMENDED to specify studio location (BMP-6122 AMENDED).

License Renewals

Following stations request renewal of license:

March 11 Decisions

BY COMMISSION EN BANC

Modification of License

WJEL Springfield, Ohio, Champion City Bcstg. Co.—Granted mod. license to increase power from 500 w to 1 kw D on 1600 kc; engineering conditions (BML-1522).

Granted CP

Newcastle Bcstg. Co., Newcastle, Wyo.—Granted CP for new AM on 1240 kc with 250 w unl (BP-8605).

A. R. Blossman Inc., Covington, La.—Granted CP for new AM on 730 kc 250 w D, engineering condition including condition that program tests will not be authorized until WIHL Hammond, La., has ceased operation on 730 kc and station license will not be granted until after WIHL license for operation on another frequency has been granted (BP-8323).

WSTR Inc., Sturgis, Mich.—Granted CP for new Class A FM; Ch. 276; ERP 670; 195 ft. ant.; engineering conditions (BPH-1825).

WATS Sayre, Pa., Thompson K. Cassel—Granted CP (BP-8331) to change frequency from 1470 to 960 kc, using present power of 1 kw; engineering condition including acceptance of any interference which may be received as a result of the authorization of the facilities presently proposed in application of either Hilltop Management Corp. (BP-8577) or Northern Allegheny Bcstg. Co. (BP-8671) for new facilities in Kane, Pa.

Prosperity Land Bcstg. Co., Lubbock, Tex.—Granted CP for new AM on 580 kc 500 w D, DA; engineering conditions (BP-8221).

WOC Davenport, Iowa, Tri-City Bcstg. Co.—Granted CP to increase height of one element of directional array and changed DA patterns; engineering conditions. (BP-8636).

Granted Waiver

WHYN Holyoke, Mass., Hampden-Hampshire Corp.—Granted waiver of Sec. 3.30 of rules and granted application (BML-1538) for modification of license to change location of station's main studio to site outside city limits which is not transmitter location.

Designated for Hearing

Latrobe Bcstrs., Latrobe, Pa.—Designated for hearing application (BP-8073) for new AM on 1480 kc 500 w D.

Darrel E. Yates, Jacksonville, Tex.—Designated for hearing application (BP-8285) for new AM on 1260 kc 500 w unl. DA.

Application Granted

Edwin J. Schuffman, Kinston, N. C.; Wilmington Bcstg. Service, Wilmington, N.C.—By order, (1) modified action of Jan. 23, 1953, granting application of Schuffman for CP (BP-8438) for new AM on 1230 kc 100 w unl.; engineering conditions, so as to include, in grant, condition that it is subject to acceptance of any interference that may result from proposed operation of Wilmington Bcstg. Service at Wilmington, N. C., on 1230 kc, with ant. height and efficiency not to exceed 175 ft. and 96.5 mv/m at one mile, respectively, if such application (BP-7930) should be subsequently granted; (2) dismissed protest filed by Wilmington seeking such condition to be added to Schuffman grant.

Protest Dismissed

WMPS Benton, Ark., WMPS Inc.—By memorandum opinion and order, dismissed protest filed by WMPS on Feb. 9, 1953, directed against Commission's action of Jan. 16, 1953, granting application (BMP-6073) of Benton Bcstg. Service (KBBA), Benton, Ark., for mod. CP for approval of ant., trans. and studio location.

Advised of Hearing

WMAW Menominee, Mich., Green Bay Bcstg. Co.—Is being advised that application (BMP-6064) to increase power from 100 w to 250 w operating unl. on 1340 kc, indicates necessity of hearing because of objectionable interference and excessive number of people in blanket area.

License Renewals

Following stations granted renewal of licenses for regular period:

KFTM Fort Morgan, Col.; KRAI Craig, Col.; KRDO Colorado Springs, Col.; KROX Crookston, Minn.; KSJB Jamestown, N. D.; KTLN Denver, Col.; KWNO Winona, Minn.; KXRA Alexandria, Minn.; WKLK Cloquet, Minn.; KFBB Great Falls, Mont.; KLZ and KLZ-FM Denver, Col.; KVOR Colorado Springs, Col.; WNAX Yankton, S. D.; WGBA-FM Columbus, Ga.

ACTION ON MOTIONS

By Comr. George E. Sterling

Chief, Broadcast Bureau—Granted petition for extension of time from March 10 to March 17, 1953, to file exceptions to the initial decision issued re applications of Aladdin Radio & Television Inc. (Docket 9041, BPCT-426) and that of Denver Television Co., (Docket 10240, BPCT-951) both of Denver, Col.

Leroy E. Parsons, Chahalis, Wash., Mid-State Bcstg. Co.—Granted petition of Leroy E. Parsons for dismissal without prejudice of application (Docket 10127, BP-8354); removed from hearing docket application of Mid-State Bcstg. Co. (Docket 10126, BP-8187).

Sunflower TV Co., Wichita, Kan.—Granted petition for dismissal without prejudice of application (Docket 10258, BPCT-677).

By Hearing Examiner Elizabeth C. Smith

Pioneer Bcstrs. Inc., Mount Hood Radio & Television Bcstg. Corp., Portland, Ore.—Ordered that further hearing in proceeding for CP's for new television stations on Ch. 6 be continued from March 16 to May 11, 1953, at Washington, D. C. (Dockets 10246, et al).

Oregon Television Inc., Columbia Empire Telecasters Inc., Northwest Television & Bcstg. Co., Portland, Ore.—Ordered that further hearing in this proceeding for CP's for new television stations on Ch. 12 be continued from April 15 to April 27, 1953, at Washington, D. C. (Dockets 10246, et al).

By Hearing Examiner H. Gifford Irion

Highlite Bcstg. Co., Killeen, Tex. — Granted petition to amend application (Docket 10123, BP-8288) to correct erroneous population count, to bring financial data up-to-date, etc.

By Hearing Examiner James D. Cunningham

KOB Albuquerque, N. M., Albuquerque Bcstg. Co., and WABC New York, American Bcstg. Co.—Granted motions for corrections in various respects in transcript of record of proceeding in matter of KOB's application for extension of SSA (Docket 10336; BSSA-275).

Chief, Broadcast Bureau, KMYR Bcstg. Co., Metropolitan Television Co., Denver, Col. — Granted joint motion for extension of time from March 10 to March 30, 1953, for filing proposed findings re applications of KMYR Bcstg. Co. (Docket 9043; BPCT-488) and Metropolitan Television Co. (Docket 10238; BPCT-941).

By Hearing Examiner Fanney N. Litvin

KRSD Rapid City, S. D., Heart of the Black Hills Station—Granted petition to amend application (Docket 10193; BMP 5661) to show changes in height of radiator above base; in type of tower to be used and of studio address, etc., and application, as amended, was removed from hearing docket.

By Hearing Examiner Thomas H. Donahue

Harmco Inc., Sacramento, Calif.—Dismissed as moot request to associate additional engineering information with amendment filed Dec. 12, 1952 (Docket 10295; BPCT-975).

By Hearing Examiner J. D. Bond

KFDM Beaumont, Tex., Beaumont Bcstg. Corp.—Upon motion of respondent KFDM ordered that time within which it or any party to proceeding re applications of Ozarks Bcstg. Co. (KWTO), Springfield, Mo (Docket 8380, BP-5259, BMP-5650, BMP-5930) may submit alternative ant. proposal in accordance with Feb. 13, 1953, memorandum opinion and order be extended to March 25, 1953.

March 11 Applications

ACCEPTED FOR FILING

Modification of CP

KSCY Searcy, Ark., Mrs. Edith Wood Sweezy—Mod. CP (BP-8471), as reinstated which authorized new AM, for approval of ant., trans. and studio location (BMP-6149).

KCLB Warrensburg, Mo., Clinton Bcstg. Co.—Mod. CP (BP-8454), which authorized new AM, for approval of ant., trans. and studio location (BMP-6145).

Change Location

KCOW Alliance, Neb., Sandhills Bcstg. Corp.—CP to change trans. and studio location (BP-8750).

Install New Antenna

KELO Sioux Falls, S. D., Midcontinent Bcstg. Co.—CP to install new ant. for non-directional operation and mount TV ant. above and change trans. location (BP-8767).

Renewal of License

WARC Rochester, N. Y., WARC Inc.—Requests renewal of license (BR-1906).

ANA Prologue

THIS WEEK the Assn. of National advertisers holds its traditional spring meeting at Hot Springs, Va.

These are the men who spend the national advertising dollar. They are interested principally in two targets: (1) preservation of the integrity of their advertising; (2) buying the most advertising for the least expenditure.

Three years ago, at this spring gathering of the men who are responsible for a stubstantial hunk of the $6.5 billion annual advertising bill, the opening gun in the fight for reduction of radio rates was fired. That which has happened in the ensuing months is now lurid history.

On the official agenda, we find no items directed toward the cost of radio. Apparently everyone recognizes that radio is the biggest bargain in advertising—that it reaches most of the people all of the time.

But there are questions on TV which appear on the agenda for the first time. Such as:

Are TV costs getting too high for effective use by advertisers? If so, is there anything that can be done about it?

Are TV stations selling so many spots and hitchhikes that the advertisers' value as well as the public interest is severely strained?

Then there's a full session on "Looking Ahead in Television". Frank Stanton, CBS president, and Frank White, NBC president, are key speakers.

The significant aspect here is that Messrs. Stanton and White are on the program. In some past conventions—notably that momentous one three years ago—there were no spokesmen for the broadcast media. But the newspapers and magazines consistently have been on the agenda.

We have no doubt that during the closed sessions this week all media will get a going-over on rates. But we feel better about the picture for both radio and TV. The other side of the story will be heard. And that story is that TV is a full-blown advertising medium and that radio has suffered far, far less from the incursions of its sister medium than the ANA gloomily assumed three years ago.

Home Town TV

THE 1952 record of television time sales, reported in this issue, marks the end of an era. It was the last year of the artificial pattern into which the TV system was frozen by the FCC, a pattern of limited competition which naturally was more favorable to the development of national advertising volume than to the expansion of local buying.

Now that new stations are going into operation in quantity, there will be a need for the aggressive exploitation of local possibilities. The figures for 1953 probably will show a better balance among network, spot and local volume than has obtained in the past.

The network and the spot account will, of course, always be basic in television economy, but if the U. S. television structure is to grow to anything like the proportions of radio or the press it must invent the means of providing sound and affordable advertising for the merchants in its own home towns. So far only the first steps have been taken in that direction, since national advertising has been available in comfortable volume for most stations. More and bolder steps will be required in 1953.

Against Enemy Attack

TOO little attention has been paid to a radio project that will be the very heart of the U. S. communications system if this country is unlucky enough to come under enemy attack.

About 1,000 stations are now cooperating in the Conelrad plan, which, to oversimplify it, is intended to turn the American radio system into a nation-wide civil defense warning and instruction device at time of war. Quite obviously radio will be the only means of reaching the mass of citizens if the U. S. is attacked. Contemporary military tactics are not geared to newspaper deadlines.

Broadcasters have spent an estimated $2 million for equipment conversion necessary to participate in the Conelrad plan.

About a score of high-powered stations now are broadcasting 24 hours a day, only because the Conelrad plan requires a central core of warning stations to be in continuous operation. These and the nearly 1,000 other stations involved in the plan have converted their facilities so that they may first broadcast a warning on their customary frequencies and then may quickly change frequencies to either 1240 or 640 kc, the only two channels on which broadcasting would be done during attack.

Drawn for BROADCASTING • TELECASTING by Sid Hix

"If I'd known she was such a ham, I'd have given her ether instead of a local."

To minimize the danger of enemy planes or guided missiles homing on radio waves, stations will go on and off the air irregularly and some will change back and forth from the two attack period frequencies. Additional automatic equipment is needed for this purpose.

The most important point to be made is that this system is ready to operate *now*, which apparently is more than can be said of other elements of the civil defense structure. We venture that if the misfortune of enemy attack does occur, Conelrad will suddenly receive considerably more attention than has been paid it so far.

From Pillory to Post

AN understandably exercised broadcaster called our attention last week to an editorial in the *Denver Post*. Here's an excerpt:

". . . Look in on any family audience, gathered before the radio receiver or TV screen, of an evening. You are sure to find the evening newspaper as an indispensable adjunct of this family hour. It is the guide to selection—a guide, presumably, to the best, and a guardian against the worst. Without the free service it provides by printing the program logs to vocal and visual entertainment, information, horror or whatever, devotees of those phenomena would have to swivel tuning knobs gropingly, and with considerable exasperation, to escape some peculiarly untasty bit of stuff, in order to find something acceptable in the air-borne jargon of funny or furious performers. . . ."

The *Post* has resurrected what we had supposed was a dead issue. Most progressive newspapers now recognize that it is sound business practice and not philanthropy to publish radio and TV schedules, for they are among the best read features in the paper.

The *Post* ignores the complementary functions of radio-TV and the daily press. The newspaper gains readership and does radio-TV a service by publishing program logs. Radio and television gain audience and in turn help out the newspaper by reminding listeners and viewers to consult their papers for program schedules.

It does not become the *Post* to revive old grudges which have been proved groundless and to suggest that the airwaves are loaded with trivia. Radio, television and the press all perform useful services, each in its unique way. The cause of none of them will be advanced by such carping as the *Post* rather witlessly indulged in.

Now Available! Early-Morning

'MUSICAL CLOCK' SPOTS

You can reach the "family audience" with Kansas City's original "Musical Clock" program, broadcast Mondays through Saturdays from 6:30 until 9 a.m. Two-and-a-half hours of tuneful, wake-up music . . . the correct time and temperature announcement every five minutes . . . and a five-state and local weather forecast. This helpful "service" program, which has been a daily feature on WHB since July 12, 1951, features Bruce Grant as "Timekeeper" and salesman extraordinary! At 7 a.m. Charles Gray presents a 15-minute news report, and at 8 a.m. a 10-minute news summary. The "Weatherman-in-Person" (another Radio feature originated by WHB) is heard at 8:10 a.m., direct from the weather bureau at Kansas City's Municipal Airport. At 8:15 a.m., Reuben Corbin of the U.S. Department of Agriculture tells housewives what fresh fruits and vegetables are available *that day* in their neighborhood markets. Participating sponsors may use "live" or transcribed minute announcements. Ask your John Blair Man for availabilities and details of new "Rotating Schedule Plan."

TWO-EDGED SWORD

IT WORKS!

You need a sword—and a mighty powerful one—to cut yourself a piece of the biggest market in the country.

WOR gives you a two-edged advantage over your competitors by delivering New York's most powerful radio signal . . . and the most sales-responsive audience in its 14-state, 26,000,000 listener area.

Evidence of the up-to-the-hilt impact of WOR is the fact that more advertisers sell more products via WOR than via any other station in America.

Let us show you how to wield the sword to sales success. Call LOngacre 4-8000 today.

The New York station where listeners listen and sponsors sell
key station of the MUTUAL Broadcasting System

WLS personalities build LISTENER LOYALTY

WLS has long been noted for its station personality—and for the personalities on the station. One of those who has helped build that reputation is

Mr. ARTHUR C. PAGE

Mr. Page is Associate Editor of Prairie Farmer. He has been an Illinois Farm Paper Editor for 41 years. For 23 years he has conducted the WLS DINNERBELL program—a half-hour sustaining service to Midwest farm families, broadcast daily at 12:30 noon.

In his position as Associate Editor of Prairie Farmer—as Farm Program Director of WLS—and as conductor of the WLS DINNERBELL program, Mr. Page has been prominent in National and Midwest farm councils for almost half a century and is probably better known in more Midwest farm homes and to more Midwest farm people than any other one man.

His job is that of service to these people. Certainly nothing could better build listener loyalty than such service over so many years . . . and that listener loyalty is among the greatest values WLS can offer its advertisers.

LISTENER LOYALTY PREDICATES ADVERTISING RESULTS

closed circuit

WILL JOHN C. DOERFER, nominated Friday by President Eisenhower for FCC, become new GOP chairman? That's hottest Washington topic, although Vice Chairman Rosel H. Hyde, "career" official, is still very much running. President doesn't need to nominate chairman; he's picked from among qualified members (see story page 50).

★ ★ ★

CLOSER RELATIONSHIPS with official Washington, particularly White House, to be sought Tuesday when officials of Advertising Council hold 10 a.m. conference with President Eisenhower. Before leaving New York tonight, Council Board is expected to elect Philip L. Graham, *Washington Post*-WTOP-AM-TV and WMBR-AM-TV Jacksonville, as board chairman.

★ ★ ★

REPERCUSSIONS in Congress on TV allocation situation, notably delays in providing additional service in larger markets, will result in new moves to investigate FCC procedures. One Senator known to have in rough draft resolution calling for inquiry. There's also talk about resolution expressing it as sense of Senate that educational channel reservations be extended at least one year beyond June 2 "deadline."

★ ★ ★

NEAR CLOSING is sale of WPWA Chester, Pa., by Lou Poller to Sherwood Gordon, New York businessman and former radio announcer, for about $260,000. Deal includes transfer of application for uhf Ch. 23 in Philadelphia, where Mr. Poller's opponent is *Daily News*. Mr. Gordon is applicant for Ch. 33 in Miami on which there is a two-way contest. Blackburn-Hamilton handling sale. Mr. Poller will move to Milwaukee to direct local activities of WCAN and its upcoming Ch. 25 TV sister, WCAN-TV of which he is president. Alex Rosenman, executive vice president, will continue to direct national activities.

★ ★ ★

CBS BOARD CHAIRMAN William S. Paley visited last Thursday with President Eisenhower (an old friend and comrade in arms, Mr. Paley served as a Colonel on General Eisenhower's psychological warfare staff in ETO last war). Visit was described as purely personal. It was intimated that there was discussion of White House plans to broadcast news conferences, now under contemplation, with likelihood that simulcast will occur next month.

★ ★ ★

DRUM BEATING on color TV could have depressing effect on black-and-white set sales according to informed manufacturing sources. This, coupled with sharp drop in sales occasioned by March 15 income tax deadline, could result in serious, but probably temporary, cutback in sales and subsequently, in production.

★ ★ ★

REVOCATION of no-color-TV manufacture due any day now. NPA officials working on papers to rescind color ban (M-90). Order issued 1951 obstensibly to conserve precious materials and engineers [B•T, Oct. 22, 1951]. Actually, order forbade mass production of color TV receivers unless permission granted by NPA. In 15 months of ban, no manufacturer has asked for authority. Last week, Chairman Wolverton (R-N.J.) of House Commerce Committee, asked NPA to kill order.

★ ★ ★

WHITEHALL Pharmacal Co. (Anacin) last week gave station operators jitters by offering non-cancellable April-September contracts for spot campaigns but asking extra 10% discount for guaranteeing to stay on all summer. First station reaction said to be chiefly negative, but with some broadcasters accepting on basis that special summertime discounts, long offered by networks, might well help stations combat warm weather business letdown. John F. Murray, N. Y., is Anacin agency.

★ ★ ★

ADVERTISERS and Federal Trade Commission working out method by which advertising campaign can be scanned in general way at regular conferences, it was learned at FTC. Media and agencies expected to join cooperative project.

★ ★ ★

NEXT PIONEERING TV effort of Ford Foundation, following successful season that has brought much satisfaction to viewers—and some of sponsors, too—may be experimental children's program in fall.

★ ★ ★

JOHNSON'S WAX, long active in TV, expected to make test film of *Fibber McGee & Molly*, major radio act that hasn't been seen on visual medium. Previous test sometime ago was disappointing.

★ ★ ★

THERE'S good chance proposed Senate inquiry into juvenile delinquency will get go ahead sign from Senate and sure as shootin' some witnesses will accuse radio and TV programs of contributing to youthful law breaking. Senators Estes Kefauver (D-Tenn.) and Robert C. Hendrickson (R-N.J.) introduced bills to make study, asked $50,000 expenses (S Res 88 and 89). Bills expected to be reported favorably by Senate Judiciary Committee this week, then have to clear Senate Rules Committee and upper house itself.

★ ★ ★

ICE CREAM firms, seasonal advertisers, are showing increased activity this year. Ice Cream Novelties (Donald Duck confections), for one, is placing six-week radio campaign starting May 16 in number of markets, using weekly quarter-hour transcribed show, through Blaine-Thompson, N. Y. Meadow Gold Ice Cream Co., effective April 1, picks up Wednesday segment of Gabby Hayes TV show, on WNBW (TV) Washington and WTVR (TV) Richmond.

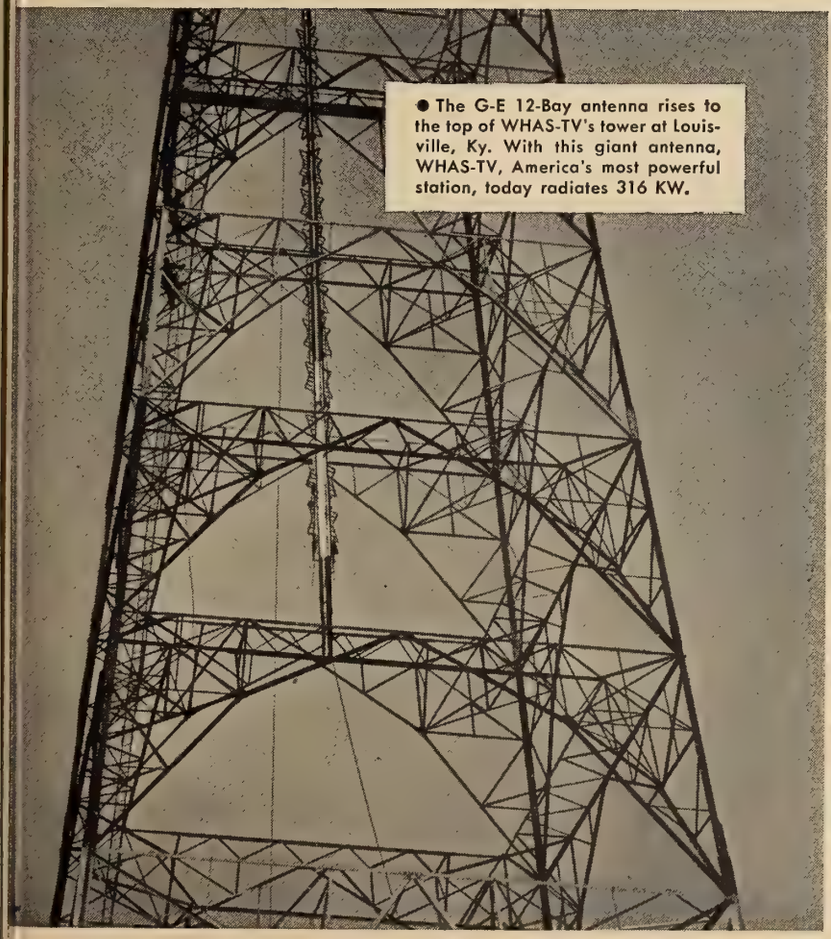
G-E VHF ANTENNAS GIVE—

ALL-AREA COVERAGE-POWER

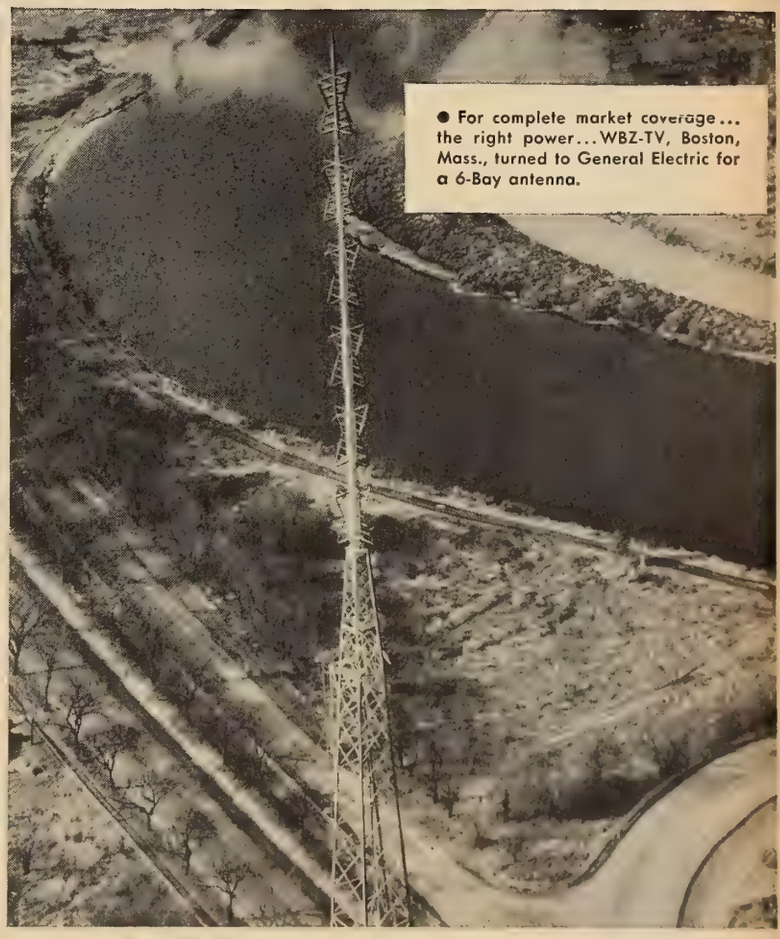
General Electric 12-Bay High-Channel Antennas Proved Completely Successful Throughout Nation!

Before you invest large sums of money in an amplifier for high gain, investigate any of the television stations now using a G-E 12-Bay Antenna. Ask them about uniform market coverage...reception in fringe areas as well as close to the tower...absence of null spots. You'll get a first-hand report of *complete customer satisfaction!*



G-E's wide antenna line offers TV stations of every market size maximum coverage. Long-term G-E experience in antenna design and construction results in features that mean both outstanding performance and economy in initial cost...installation...and maintenance—for your TV station operation.

For complete information write: *General Electric Company, Section 233-23, Electronics Park, Syracuse, New York.*



● M. H. Hammer (left) of KHQ checks their 5-Bay antenna at Electronics Park, Syracuse, N. Y. KHQ-TV started operations at 100 KW ERP.

-ECONOMY!

● The G-E 12-Bay antenna rises to the top of WHAS-TV's tower at Louisville, Ky. With this giant antenna, WHAS-TV, America's most powerful station, today radiates 316 KW.

● For complete market coverage... the right power... WBZ-TV, Boston, Mass., turned to General Electric for a 6-Bay antenna.

BEFORE YOU BUY—LOOK AT ALL THESE ADVANTAGES!

● **POWER**—G-E antennas are available in the *right sizes for both large and small markets.* From single-bay all the way up to 12-bay your TV signal gets the needed boost for maximum power!

● **ALL-AREA COVERAGE**—In close or out in the hinterlands that all-important beam reaches your complete market *effectively.* Special pre-analysis at the factory to customer satisfaction is a plus benefit from General Electric and *it doesn't cost you a cent extra!*

● **ECONOMY**—You achieve higher gain from either a new amplifier or a bigger antenna but *compare costs!* A G-E antenna can, in many cases, offer you substantial savings.

● **SUPERIOR MECHANICAL FEATURES**—G-E VHF antennas are built to withstand at least 50 lb./sq. ft. wind loading... water tight junction boxes are solid machined brass.

● **HIGH STABILITY**—Special care in design and construction assures you of a sturdy, rigid antenna that will withstand the elements for years.

MBS Executives Made General Teleradio VPs

ELECTION of three Mutual executives to vice presidencies of parent General Teleradio Inc. and other major executive appointments within MBS-General Teleradio organization being announced by President Thomas F. O'Neil today (Monday).

James E. Wallen, MBS treasurer since March 1944, resigns to become vice president, board member and treasurer of General Teleradio, which is radio-TV subsidiary of General Tire & Rubber Co. and owns Don Lee and Yankee networks, WOR-AM-FM-TV New York and controlling stock interest in Mutual. Earl M. Johnson, MBS vice president in charge of engineering and station relations, and Robert A. Schmid, MBS vice president in charge of advertising, public relations and research, vice presidents and board members of General Teleradio in addition to present MBS posts.

George Ruppel, MBS controller for past three years, succeeds Mr. Wallen as network treasurer, and Patrick Winkler, controller of Yankee division, becomes general auditor of General Teleradio.

Creation of program development department for Mutual and WOR radio also being announced, with Herbert Rice, MBS executive producer, named to head it as director, concentrating on new program ideas and talent development, and Mutual co-operative department being set up as separate network division under Director Bert J. Hauser, who has been manager of MBS co-op programming.

All appointments effective immediately.

COMPETITOR REPORTS

TWO advertising agencies asking station representatives for data to prepare competitive advertisers' reports for clients. Cecil & Presbrey preparing spot announcement report for drug clients on competitive drug advertisers' use of radio. Object: To induce clients to buy more radio time. Fuller & Smith & Ross, for General Electric, similarly preparing report on network (TV) and spot (radio and TV) as well as newspaper and magazine activity of rival radio and TV set manufacturers and light bulb and electronic tube firms. GE will take report under consideration for next month or so and probably will base next year's ad budget on it.

WHITE, STANTON DEFEND TV COST

TELEVISION will serve over nine-tenths of American populace at reasonable cost and be priced within reach of most business firms, members of Assn. of National Advertisers were told late Friday as they wound up annual spring meeting at Hot Springs, Va. (early stories, pages 27 and 28). Answers to fears of major media buyers that visual radio would be available only to major commercial empires were supplied by two network presidents—Frank Stanton, CBS, and Frank White, NBC. They promised more flexibility in television and said many present problems will be solved as artificial effects of FCC freeze disappear.

Though ANA as association, and individual members, sounded alarms all week about soaring costs, television's story was kept behind locked doors. This procedure permitted only one side of controversy to be made available to public.

TV spokesmen indicated hookups of perhaps 100 stations would become available, in time, at low cost when figured on per-thousand basis. Present difficulties centering around inequities in coverage and station rates will be solved by arrival of hundreds of new stations and effect of normal competition among stations and networks.

Advertisers were informed by network executives that new technique of time-selling, programming and advertising will develop as television grows. These will make medium attractive to all types of firms and bring in clients that have never before used TV or radio, or perhaps any advertising medium.

Final-day speakers included Philip L. Graham, *Washington Post*-WTOP, and Richard Wilson, Washington bureau chief of Cowles Magazines. They reviewed developments since advent of new administration.

George R. Nelson, president of Nelson Ideas Inc., described musical jingles as "Madison Avenue nonsense." He played series of musical commercials and said such spots "should never sound like jingles."

Advertisers have no inherent right to become obnoxious in nation's living rooms, he said, adding that music in musical commercials should make listeners think of production.

Johnson Would Legalize Radio TV Blackout Rule

LEGISLATION to legalize baseball's ban on radio and TV broadcasts unless approved by "home" team proposed by Sen. Edwin C. Johnson (D-Colo.) Friday. Bill (S 1396), permitting major or minor league "home" team to impose radio-TV "blackout" to protect its own box office, declares that organized baseball's old Rule 1(d) is not illegal.

Rule was revoked in 1949 after Justice Dept. complained it violated anti-trust laws.

Sen. Johnson, president of Class A Western League and former chairman of Senate Commerce Committee, said legislation necessary to "protect the weak and helpless elements of America's national game of baseball from a cruel and ruthless monopoly which strangely enough was forced upon organized baseball by the anti-trust division of our own Justice Department." He also said legislation was necessary to save minor leagues from extinction.

FBI has been checking major leagues on sales of rights to radio and TV, Sen. Johnson said he had been told.

In 1951, Sen. Johnson introduced a bill (S 1526) to exempt organized baseball from anti-trust laws. This was never reported out of committee.

• BUSINESS BRIEFLY

CAMELS CONSIDER LOCAL RADIO • R. J. Reynolds Tobacco Co. (Camel cigarettes), which for years has followed pattern of appeal to college students on theory that early habit will endure, currently investigating local radio shows with musical appeal beamed to college students. Agency: William Esty Co., N. Y.

BLOCK RE-EVALUATES • Block Drug Co., through Cecil & Presbrey, New York, currently is re-evaluating latter half of its 1953 radio-TV budget with final decisions expected about mid-May.

Three Mergers; Wilson Seeks Miami Ch. 10

THREE NEW mergers of competing TV applicants reported by FCC Friday, plus filing by L. B. Wilson Inc., operator WCKY Cincinnati, for vhf Ch. 10 at Miami, Fla., presently in contest.

At Knoxville, Tenn., W. R. Tuley and TV Services of Knoxville, both seeking uhf Ch. 26, join forces as uncontested bidder for facility. Mr. Tuley dismissed his application, got 80% in amended TV services bid. Harold H. Thoms and J. Horton Doughton, former 50% owners, now have 10% each in TV Services. Mr. Thoms is 99% owner WISE Asheville, 75% owner WEAM Arlington, Va., 13.5% WSSB Durham and 25% WAYS Charlotte and WCOG Greensboro, N. C. Mr. Doughton owns 25% of WAYS and WCOG. Mr. Tuley seeks uhf Ch. 50 at Evansville, Ind.

At Salt Lake City, Tribune Pub. Co.'s TV Corp. of Utah dismisses and acquires 50% of KUTA, latter becoming sole applicant for vhf Ch. 2. Upon grant, Tribune Pub. Co. will sever part interest in KALL there. Frank Carman and Grant Wrathall, previously co-owners of KUTA, now hold 25% each. They are associated in other TV grants (see page 64).

At Austin, Minn., South Central Minnesota TV Co. dismisses and joins vhf Ch. 6 competitor KAUS Austin in new uncontested applicant, Iowa-Minnesota TV Corp. KAUS retains control.

L. B. Wilson Inc. seeks ERP of 316 kw visual with antenna height above average terrain of 628 ft. on Ch. 10 at Miami, entering into competition with already pending bids of WGBS Miami, WFEC Miami and WKAT Miami Beach. Proposed Wilson station would cost nearly $780,000 to build.

Noncommercial, educational bid for reserved Ch. 13 at Oklahoma City filed by Independent School District I-89, going into contest for facility with Oklahoma U. Regents.

FCC Asks More time on Protests; Other Actions

EXTENSION of time limit in which to act on protests of broadcast actions is asked of Congress by FCC in letter made public Friday. FCC, asking amendment of Sec. 309(c) of Communications Act, says 15 days isn't time enough to handle protests, hence asks 30-day limit.

Grants to existing TV stations:

KPRC-TV Houston granted special temporary authority for interim operation on Ch. 2 with effective radiated visual power of 20 kw pending construction of new transmitter site for newly authorized boost to 100 kw ERP.

WKST-TV New Castle, Pa., granted STA commercial operation, March 19 to May 4, on Ch. 45.

WKJF-TV Pittsburgh granted STA to begin commercial operation on Ch. 53 with ERP of 1 kw visual and 0.6 kw aural, antenna 240 ft. Effective March 21 to Sept. 7.

WABC-TV New York granted STA to use new ERP of 26.2 kw visual and 13.5 kw aural. Was 16.3 kw visual, 8.5 kw aural. Ch. 7.

KTYL-TV Mesa, Ariz., granted change in ERP from 27 kw visual and 13.5 kw aural to 33 kw visual and 16.5 kw aural; antenna 1,550 ft. Ch. 12.

WHYN-TV Holyoke, Mass., granted change in studio location from 180 High St., Holyoke, to 65 Main St., Springfield, Mass. Granted March 19.

Urge FCC Admit Error

JUSTICE Dept. staff recommended FCC admit error in stand on case of WGRD Grand Rapids vs. Muskegon TV grant to Versluis Radio & Television Co., it was understood, at meeting between Attorney General Herbert Brownell Jr. and FCC Chairman Paul A. Walker and staff Thursday. Justice staffers felt WGRD has standing as party in interest. Appeal of WGRD from FCC dismissal of its protest against grant to Versluis in Muskegon due to be argued in U. S. Court of Appeals in Washington March 30 (see earlier story on page 53). Final determination of Justice Dept.'s stand, however, still up to Mr. Brownell.

BINAURAL TEST

PLANS for demonstration of binaural system of broadcasting on March 30 over seven upstate New York radio stations, described as first test on "mass" scale, announced Friday by Rensselaer Polytechnic Institute, Troy, N. Y. Half-hour musical program will be broadcast from RPI's gymnasium, using microphones of WGY Schenectady, WXKW Albany and WHAZ Troy on left side of room and microphones of WTRY Troy and WPTR, WROW and WOKO, all of Albany, on right side. This test staged in connection with 30th anniversary of WHAZ, RPI's station.

NCAA Limited TV Football Program Discussed

GENERAL criticism leveled at NCAA limited football TV program by industry representatives in discussions with association's TV committee Friday in Kansas City. Representatives offered suggestions and proposals, not disclosed, which group promised to take under study at next meeting in New York April 7-8. Committee also reviewed various aspects of controlled schedule, including possible provision for regional telecasts where interest wants exceptions, before meeting with industry executives. Offering views were Tom MacMahon, DuMont TV network sports director, Judson Bailey, CBS-TV sports director, Tom Gallery, NBC manager of sports, representatives of Kudner Inc. and WDAF-TV Kansas City, and others.

Awards Audience

ESTIMATED television audience of 34 million witnessed two-hour annual awards ceremony of Academy of Motion Picture Arts & Sciences from New York and Hollywood Thursday over NBC's 61-station TV network, NBC said Friday. Program, sponsored by RCA Victor Division of RCA, also was carried over NBC's 191 affiliated radio stations. Trendex 10-city measurements gave first half-hour of show rating of 35.7, with 50.9 of sets in use and 70.2 share of audience.

Newspaper Guild Awards

NEWSPAPER GUILD of New York announces Page One awards in radio-TV to Jacob L. Holtzmann, member of New York State Board of Regents, for "spearheading plan for a 10-station network of educational television in New York state," and to Elmer Davis, ABC commentator, for "his courageous, independent interpretation of the news in the spirit of Heywood Broun."

Edward Everett Hale

FUNERAL services for Edward Everett Hale 3rd, assistant executive secretary of Radio and Television Directors Guild (AFL) and former actor and business representative of Actors Equity Assn. (AFL), were to be held Saturday at Unitarian Church of All Souls, New York. Mr. Hale, grandson of author of *The Man Without a Country*, died Thursday. He was 46.

PEOPLE

GEORGE KAPEL, commercial manager of WAAB Worcester, Mass., appointed station manager of KOMU-TV Columbia, Mo., U. of Missouri's commercial TV outlet, and **DUANE M. WEISS,** engineer for GE in Syracuse, N. Y., named chief engineer of vhf Ch. 8 station, due to begin commercial programming in July.

SHEPARD CHARTOC, formerly head of own advertising agency and earlier with Chartoc & Coleman radio-TV production firm, to Olian & Bronner in executive capacity.

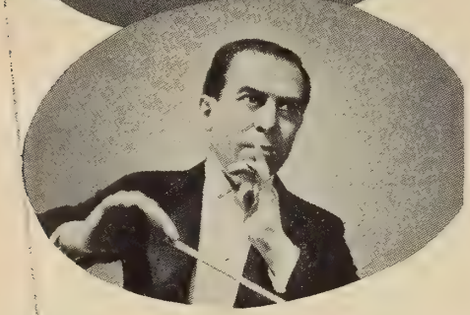
McConkey Artists Corp., theatrical booking agency, adds TV film distribution department to its New York offices and names **LEE KRAFT** to head up this unit. Offices are at 1780 Broadway, New York, 19, N. Y., and telephone number is Columbus 5-7720.

H. E. LIPPERT, district supervisor of training for Cleveland office of Graybar Electric Co., appointed district operating manager of branch, effective April 1, succeeding **A. E. KOSTULSKI,** who is retiring.

New ABC-TV Affiliates

AFFILIATION of three television stations with ABC-TV, bringing total number to 98, announced Friday by Alfred R. Beckman, national director of station relations for ABC. New affiliates are: WEEK-TV Peoria, owned by West Central Bcstg. Co., operating on uhf Ch. 43; WBAY-TV Green Bay, owned by WBAY Inc., vhf Ch. 2, and KEYT (TV) Santa Barbara, owned by Santa Barbara Broadcasting & Television Corp., vhf Ch. 3.

D. C. Educational Group



GREATER Washington Educational Television Assn. was incorporated Friday in District of Columbia, will meet April 2 to elect officers and plan financing of educational TV station on reserved Ch. 26 there (see early story page 76). Bid for Ch. 26 by D. C. Board of Education is on file at FCC, but GWETA is expected to file rival application. GWETA incorporators are Huntington Cairns, secretary of National Gallery of Art; Dr. Martin A. Mason, dean of School of Engineering, George Washington U., and Mrs. Louis S. Walker, supervisor of audio-visual education, Montgomery County Schools.

TV Shipments Reported

JANUARY TV set shipments by manufacturers, broken down by states, was one-third less than previous month, but almost three times January 1952, RTMA announced Friday. Manufacturers shipped 695,087 TV sets to 48 states and District of Columbia in January, compared with 965,891 in December 1952 and 371,689 in January 1952. Following is breakdown of shipments by states:

State	Total	State	Total
Ala.	14,591	Neb.	5,377
Ariz.	4,342	Nev.	9
Ark.	4,407	N. C.	19,494

When a station is so programmed that the listener is assured of high type, diverting and diversified programming, suitable for the listening of every age and interest, the listener acquires confidence in, and respect for the station.

This confidence is carried over into a confidence in the products and services advertised on the station.

That this confidence rings cash registers is verified by the increasing number of advertisers turning to Radio Station W R E C.

Your Katz man will be happy to show you latest Standard Audit & Measurement Reports and Hooper Ratings as proof that WREC delivers the "better half" of both the Rural and Metropolitan listeners in the Memphis Market.

IN REVIEW

ATOMIC BOMB TELECASTS

Commentators: Chet Huntley (ABC), Walter Cronkite (CBS) and Morgan Beatty (NBC).
Producer: Frank LaTourette (ABC).
Assistant Producer: Bill Whitley (CBS).
Director: Klaus Landsberg, KTLA (TV) Los Angeles.
Film Producer: Roy Neal (NBC).
Operational Director: Bill Bennington (NBC).
Presented by television stations and networks in cooperation with the Advertising Council Inc.

A VIVID drama exploring the power of atomic energy and the means of survival in our atomic age was presented to the radio and television audience last Tuesday when the 33rd "nuclear device" was exploded at Yucca Flat, Nev. "Operation Doorstep," the title of this production, may be roughly described as a play in two acts—each of a half-hour duration—the first, beginning at 8 a.m. EST and the second, at 4:30 p.m. Allowing for security and safety regulations, network personnel met the challenge of producing the event for radio and TV consumption with a skill that merits many a bouquet.

On the first telecast, background material on the test and what it would involve preceded the blast. Walter Cronkite of CBS and Morgan

Reprinted from *The Washington Post*

Beatty of NBC alternated on the commentary from a spot seven miles away from a tower which cradled the bomb.

Soldiers participating in the experiment were within 3,500 yards of the tower. With them was ABC's Chet Huntley, who gave brief reports both before and after the explosion.

There were two houses in the target area proper literally patterned and built for destruction by the Civil Defense Administration, whose intention it was to emphasize that one of the houses belonged to *you* and that *your* family was inside. Driving this point home was a major assignment on this telecast, and in terms of commentary was well done. But just hearing in this case was a poor substitute for seeing as well. The point would have had greater impact had the viewer looked at these homes, inspected the experimental bomb shelters and looked again after the damage had been done.

At 4:30 p.m. cameras once again turned on Yucca Flat for a report on the aftermath. This phase was not as impressive as it might have been if execution of original plans had been possible. The networks had hoped to move

into the target area for some graphic illustrations of the horror of atomic warfare, but radiation prohibited such coverage. Interviews were substituted for a first-hand look.

The decision to pool telecast the happenings at Yucca Flat made it possible for on-camera personalities from the networks and those involved in production to combine reportorial talent and technical know-how. The outcome was all the more polished for this concentration of effort. TV engineers have come a long way from a similar but much more primitive attempt a year ago which, like Tuesday's operation, was directed by Klaus Landsberg, head of KTLA (TV) Los Angeles. The lessons Mr. Landsberg learned a year ago, when almost single-handed he set up the remote system for the first show, made for steady pictures which came in clear on a TV set. There was one blackout, however, which occurred at the moment of the explosion. The filter placed over the lens picking up the blast was not heavy enough for a brilliant flash which accompanied it.

Both telecasts were "sponsored" by the Advertising Council Inc. at the request of CDA and the Atomic Energy Commission. The "sales message" was preparedness. It is a vast understatment to say that a more effective means could not have been found to "move" this particular product.

ACTION IN THE AFTERNOON

CBS-TV, Mon.-Fri., 3:30-4 p.m. EST.
Producer: Charles Vanda.
Executive Director: Leslie Urbach.
Directors: William Bode, John Ullrish.
Writers: Don Pringle, Dick Strome, Don Lenox.
Cast: Jack Valentine, Blake Ritter, Mary Elaine Watts, Harrise Forrest and Harry Cassell.

CBS-TV's attempt to entice the small-fry viewing audience with an afternoon "live" western dramatic series, *Action in the Afternoon,* appears to lack the one major ingredient that is the *sine qua non* of such programming. Despite its title, *Action in the Afternoon* lacks action.

The episode of the serial under consideration here was action-embellished to the extent that it highlighted a 10-second fist fight in a saloon, five or six gun shots, and a horse race in which one of the "good men" was wounded.

The "cliff hanging" note on which the program ended was a daring pronouncement by Jack Valentine, the hero, challenging the villain to another horse race. To youthful TV addicts exposed to spine-tingling flights into space and to seemingly never-ending "chases" in western films, this move by Mr. Valentine must have come as a decided letdown.

The sequence of the horse race, incidentally, underscores one of the shortcomings of producing the serial "live." Because of this limitation, the horse race lasted scarcely a minute over fairly even terrain in dismal contrast with long, rough, riding jaunts that films can offer. And an action-packed race and one of its offshoots—"The Chase"—have long been staple products of western films.

For viewers uninterested in action, *Action in the Afternoon* presents a warm, neighborly portrait of life in the mythical frontier town of Huberle, Mont., in the 1890s. The acting is uniformly good and the settings attractive. It is originated by WCAU-TV Philadelphia.

It is unfortunate that CBS-TV, which apparently went to considerable expense to give authenticity to the serial, chose to present the story line at such an uneventful pace. This is not to suggest that *Action in the Afternoon* would improve by grade C Hollywood treatment. But, a little action, please.

public service builds public acceptance!

Not one, but *four* great universities and colleges broadcast regularly over the Cherry & Webb Broadcasting Company stations—WPRO and WPRO-FM. Brown University, the University of Rhode Island, Bryant College, and Providence College play an integral role in the Cherry & Webb Broadcasting Company's public service program planning . . . offering programs on world affairs, business and household management, agriculture, and student activities.

For over 21 years the Cherry & Webb Broadcasting Company has been mindful of its public trust . . . has maintained its pledge to continued public service.

one of the reasons why . . .

more New Englanders listen to

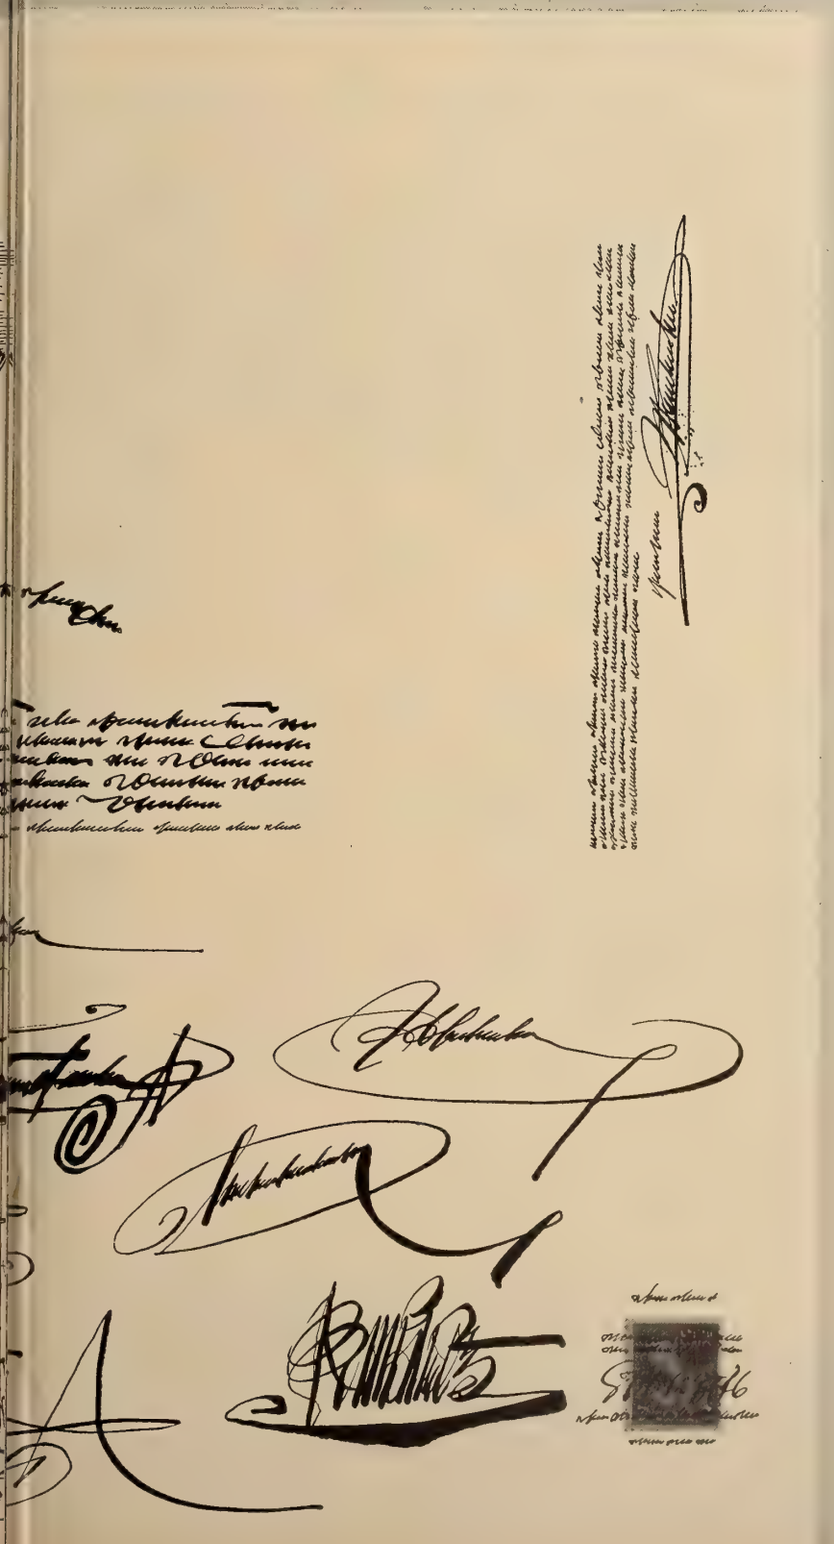
Represented by RAYMER



AWARD WITH A

STEINBERG

DOUBLE MEANING...

Maybe you feel awards are getting out of hand—and meaningless, except to jewelers and calligraphers.

But television is so many different things—drama, comedy, music, news, public affairs, sports—there's room for lots of awards.

CBS Television shows and showmen received 87 this past year—as well as the most meaningful award of all: *top program popularity.* This is the one the audience gives—week after week—in the nation's leading markets.

For advertisers it's an award with specific sales meaning: bigger customer traffic for all their shows on the network... larger average nighttime audiences... the lowest cost per thousand.

So consider, in this season of laurels, our 88th award. It's one we can share with all our advertisers.

our respects

to DWIGHT SPENCER REED

THREE YEARS ago almost to the day, two long-time partners and minority stockholders in a top station representative firm pulled up stakes and set up their own company in a move of far-reaching interest and import to the industry.

The partners and minority stockholders were Frank M. Headley and Dwight Spencer Reed—and the new company was H-R Representatives Inc., a designation which promptly stirred up confusion and, it must be admitted, still does among some station clients who remembered them as Headley-Reed Co.

There is no confusion, however, in Mr. Reed's mind about the philosophy of H-R Representatives Inc. and what it has accomplished in three short years since the split. Anyone who knows Mr. Reed, executive vice president of H-R with headquarters in Chicago, knows well the indelible imprint of his aggressiveness in station contracts.

A man who believes strongly in results, he has gained a reputation for concentrating on sales, and servicing clients to a high degree. In fact, it's sales, not ratings, that count, he tells you without hesitation.

Perhaps this credo stems from his early experience with Kelly-Smith, a newspaper representative firm, during the late '30s, but more probably it is ingrained in his makeup and personality. In any event, it is a noteworthy commentary on his beliefs at a time when radio-TV are competing with printed media for the advertisers' dollar and when advertisers are eyeing television with a jaundiced, financial eye.

Varied Ad Background

With his keen appreciation of sales results, it follows that he compiled a backlog of experience touching on various phases of advertising, culminating in his present position.

A native of Chicago, where he was born on Aug. 26, 1908, youthful Mr. Reed attended Carleton College in Northfield, Minn., and later majored in advertising at Northwestern U., in Evanston.

His first professional experience was with George Troop's firm, an advertising agency specializing exclusively in outdoor advertising. He joined the company in 1928. Four years later he became associated with Critchfield & Co., working on the Ford automobile (*Lum and Abner* on radio) account.

Mr. Reed's next association was with BBDO —he thinks this was about 1933—where he handled Westclox clocks for General Time Corp., utilizing his outdoor advertising knowledge on the account. Then he worked into radio.

With that experience back of him, Mr. Reed became friendly with William G. Rambeau, of the station representative firm. In late 1934 he joined Mr. Rambeau. Then after 11 months he joined Kelly-Smith.

Mr. Reed helped set up the company's radio division in October 1936. Frank Headley also joined the firm and they became fast friends. Then, together, they launched Headley-Reed Co., essentially to take over the radio station representative functions of Kelly-Smith, which had adopted a policy of also representing radio properties of newspapers.

On February 20, 1950, Mr. Reed, along with Mr. Headley and Paul R. Weeks, resigned from Headley-Reed Co. in disagreement over policy. They opened offices in New York and Chicago and, later, in Los Angeles and San Francisco. Today, they represent some 27 radio and 7 TV outlets among clientele. A split in radio-TV properties (like H-R TV Reps Inc.) is a possibility but not in the immediate future.

Man of Ideas

Dwight Reed has some very definite ideas about radio-TV spot penetration, advertising budgets, sales results, the future of radio, the single rate card for daytime-nighttime operations of stations, and, perhaps above all, individual station rate cards based on "dollar volume."

He capsules his convictions this way:

"I think that TV is going to become increasingly harder to sell and will take a tremendous amount of work by TV stations in medium-sized markets . . . I think spot [announcements and packages] will have a good year . . . Radio will be better this year . . . I think there's a good excuse for the single daytime-nighttime rate, particularly in big markets. With the leadership already provided, there doubtless will be a trend in that direction. It's inevitable . . . I go along with the 'dollar discount' plan put into effect by Bill O'Neil [president of WJW Cleveland]. It's simpler and is a better gauge of actual sales returns accruing to advertisers. It's sales that count . . . not ratings."

The plan gives advertisers a better break as they enter each new dollar volume category—as they spend more money with the station. Time-usage is limited merely to announcements.

Mr. Reed is married, has four children and lives in suburban Glen Ellyn. He married the former Emily Stafford, of Oak Park. The children are Nancy 18, Dwight 16, Mary 9, and John, an infant.

He is a member of the University Club of Chicago and the Glen Oak County Club and is a 32d degree Mason. His hobbies include golf and reading.

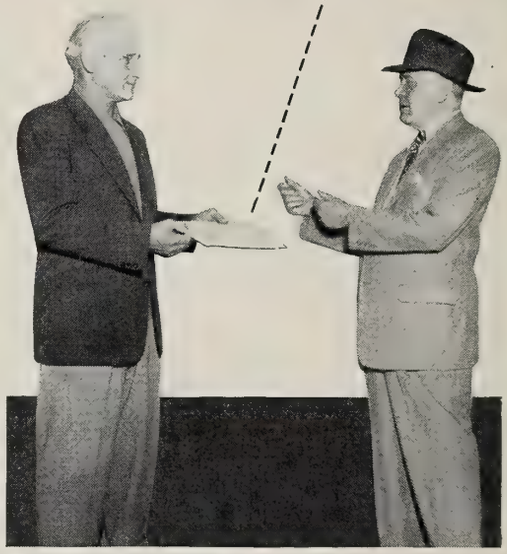
RADIO CORPORATION of AMERICA

ENGINEERING PRODUCTS DEPARTMENT CAMDEN, N.J.

OUR RIBBONS *are* SHOWING

Yes, the KVOO FARM SERVICE DEPARTMENT ribbons *are* showing! As a matter of fact, they keep on *growing!* During 1952 the KVOO Farm Department and its Director, Sam Schneider won four top awards:



1 The American Farm Bureau Federation named Schneider as the "radio farm director who has done the best job of interpreting agriculture to the public of the world" in 1952.

2 The National Safety Council's top award went to KVOO for "outstanding contributions to safety on the farm" with a special citation, in addition, for foreign agriculture.

3 The United States Junior Chamber of Commerce awarded Sam Schneider its Distinguished Service Award as the "outstanding young man of Tulsa during 1952" because he was "ever conscious of his obligation to mankind, and our nation, faithfully promoting our civic and social advancement."

4 The Ralston Purina Company gave KVOO its award for outstanding promotion in connection with the "bowl game contest", and called the KVOO Farm Department, "the cream of the crop of America's farm radio merchandisers."

We are grateful for these impressive expressions of appreciation for the job we are trying to do. We shall continue to make every intelligent effort to serve our nation in new and better ways, on the farm and in the city! While we highly value plaques and ribbons, we realize that the greatest award of all is that of listener preference, and we shall always try to merit it in increasing measure in the years ahead.

John I. Taylor, Mountain View, President of the Oklahoma Farm Bureau, presents William B. Way, Vice President and General Manager of Radio Station KVOO, with the American Farm Bureau Federation plaque, awarded to the KVOO Farm Service Department for its "outstanding job of interpreting agriculture to the general public."

Fifty-Two Weeks

EDITOR:

Because your magazine is probably read by every station manager and program director in America we thought you might like to tell them what we are doing about the promotion of brotherhood.

We didn't stop our spot announcement and station break tags at the conclusion of Brotherhood Week. Instead, we are making it a year-round promotion and reminding our listeners to make the practice of brotherhood a 365 day event—and not just one week in the year.

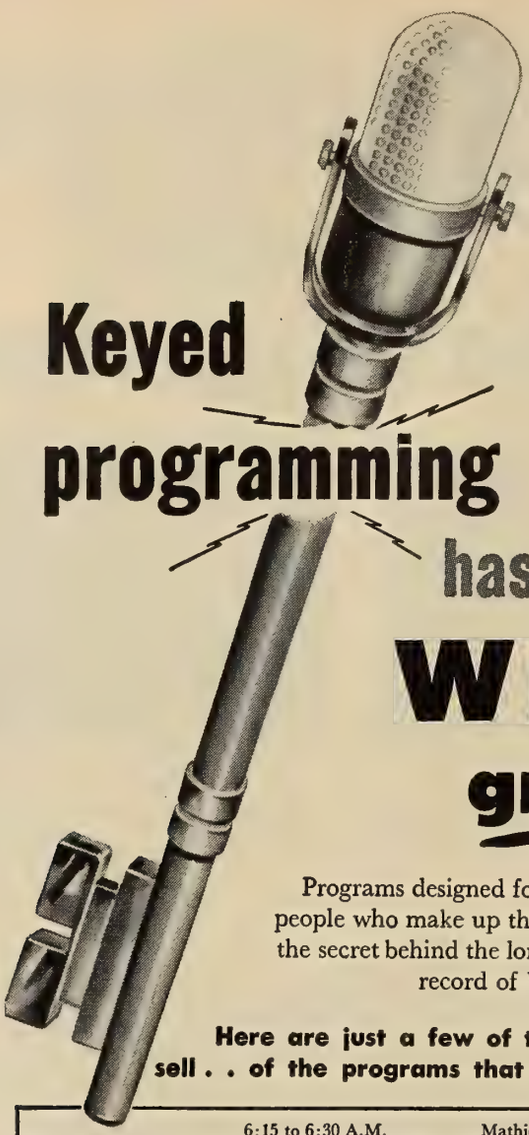
GM DIESEL
Stand-by
GENERATOR SETS

WJR—Detroit, Michigan, uses 200 kw. GM Diesel generator set as stand-by power for 50,000-watt transmitter. Compactness of unit permitted installation in garage adjoining transmitter building—eliminating cost of a specially designed building.

WKTV—UTICA, N. Y., uses a 100 kw. General Motors Diesel generator set for stand-by power. Set can be started remotely from the control room. Low vibration characteristic of engine permitted installation in room adjacent to transmitter and within 30 feet of studio.

If you are planning stand-by power, be sure to check the advantages of General Motors Diesel generator sets, listed briefly below. GM Diesel generators are meeting the exacting requirements of military service in all parts of the world. They supply emergency power for more than 1100 telephone and telegraph exchanges—for microwave relay stations, for hospitals, government buildings, banks, airports. There is a GM Diesel distributor near you who will analyze your power requirements and make his recommendations without obligation. Look in the yellow pages of your phone book for his listing, or write direct to us.



- Wide range of models—12½ to 200 kw., 220 or 440 volts, single or three-phase current.
- Excellent frequency and voltage regulation for the most exacting requirements.
- Powered by General Motors Diesel engines—dependable, smooth 2-cycle operation—low cost maintenance—easy to service.
- Built by one manufacturer—one warranty, one responsibility for both engine and power generator.
- Instant push-button power starting on safe Diesel fuel—or fully automatic starting. Immediate power, no "warm-up" period.
- Dependable starting—no spark-ignition system to fail because of dampness or corrosion—always ready to start.
- Easy to install—compact—lightweight—requires no special building, no special base. Complete instrumentation provided.
- Distributors and Dealers throughout the country.

EDITOR:

I am very much distressed by reaction to BROADCASTING • TELECASTING's report of the FCC action on WCUE's request for full-time authorization (see page 100, March 9).

One of the Pittsburgh agencies interpreted your report to mean that WCUE was denied full-time authorization "for failure to provide adequate service to Akron and the metropolitan district" on the basis of past daytime operation.

The Commission's objection to granting us full-time authorization is entirely an engineering problem. Our application was designated for hearing in view of objectionable interference to WCUE's proposed nighttime operation from other stations and for alleged failure to provide adequate engineering service to Akron and the metropolitan district in accordance with the Commission's standards during our proposed pattern for nighttime broadcasting.

In other words, the Commission apparently has no quarrel with what WCUE has done in the past. It is our proposed nighttime operation that raises the question. . . .

Tim Elliot

Acid Test

EDITOR:

A real test of the reporting job a magazine or newspaper does occurs when one has a chance to read a report of something with which he is well acquainted. Years ago, I quit reading a well-known news magazine when I found that its interesting, but fanciful, reporting strayed so far from facts with which I was familiar.

In your issue of March 9, you presented "Our Respects" to H. Earl Rettig. It happens that Earl is my first cousin and that we lived next door to each other for a great many years of our youth in Chicago. He is still one of my best friends, and I am very well acquainted with his whole business career.

Because I know him so well, I am in an excellent position to judge the article you wrote about him. You did a wonderful job. Congratulations.

Edward E. Lethen Jr.

Mr. Harvey Struthers,
General Manager, WEEI
Boston, Mass.

Dear Harvey:

You will be pleased to know that we are finding the F. H. Snow Canning Company's participation in the Priscilla Fortescue show, the Food Fair, and the Housewives' Protective League a very important factor in the steadily increasing sales of Snow's products.

Not only is this radio advertising on WEEI highly effective, but it is excellently supported by the comprehensive merchandising program of the Housewives' Protective League and the WEEI Supermarketing Plan. This is an integrated program which really pays off.

Sincerely yours,

Daniel Mordecai

Dear Harvey:

We have been participants in the Housewives' Protective League on WEEI for well over a year now, and have been greatly pleased with the results. These results have brought you, as you know, several renewals on this program.

I want also to tell you that we are well satisfied with the effectiveness of the Supermarketing operation. The displays in a large number of A&P and Stop and Shop stores have been very helpful in moving an increasing volume of Snow's products, particularly when they are backed up by our expanded schedule of air time. This combination of good air time plus good point-of-sale promotion ranks high as a producer of rapid turnover.

Very truly yours,
THE F. H. SNOW CANNING CO., INC.

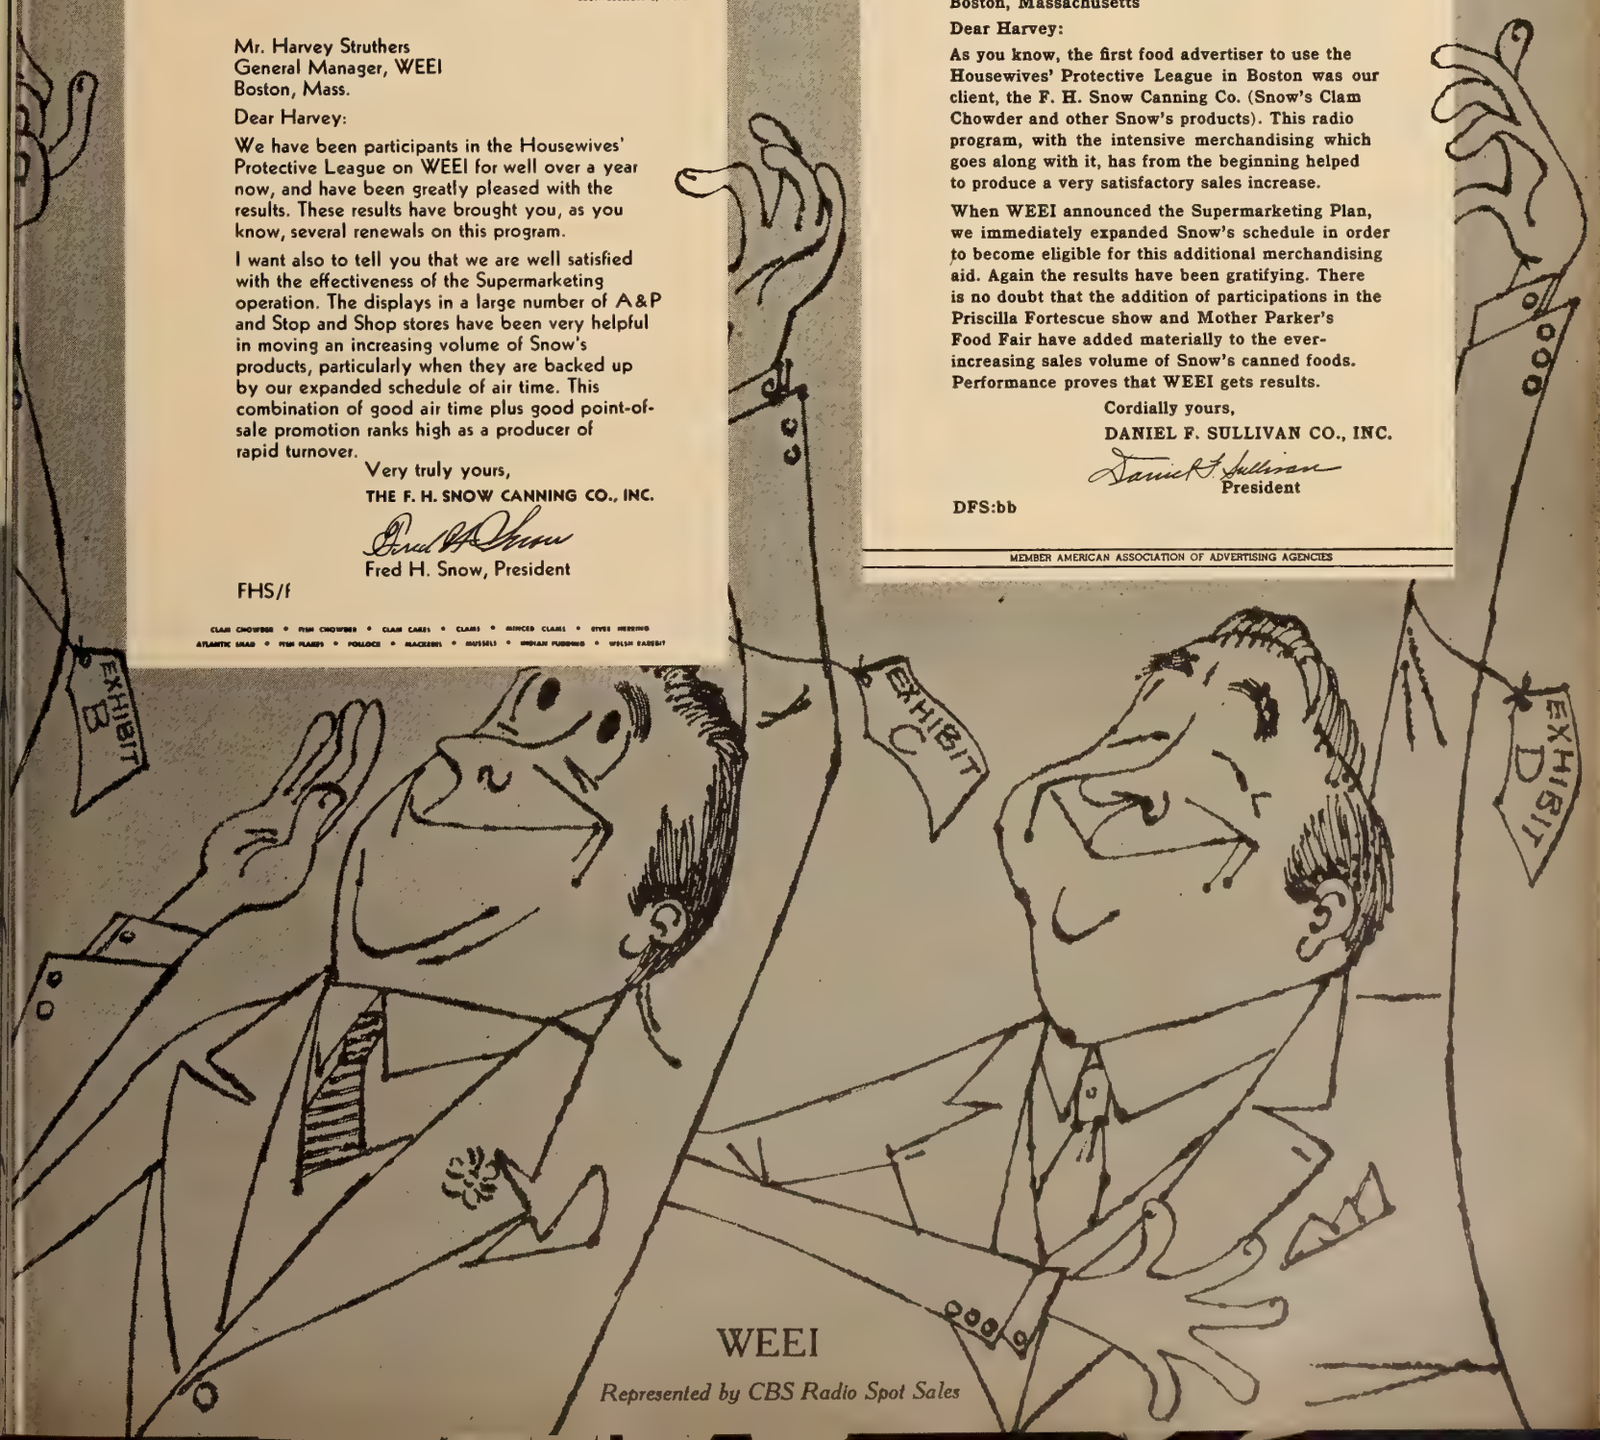
Boston, Massachusetts

Dear Harvey:

As you know, the first food advertiser to use the Housewives' Protective League in Boston was our client, the F. H. Snow Canning Co. (Snow's Clam Chowder and other Snow's products). This radio program, with the intensive merchandising which goes along with it, has from the beginning helped to produce a very satisfactory sales increase.



When WEEI announced the Supermarketing Plan, we immediately expanded Snow's schedule in order to become eligible for this additional merchandising aid. Again the results have been gratifying. There is no doubt that the addition of participations in the Priscilla Fortescue show and Mother Parker's Food Fair have added materially to the ever-increasing sales volume of Snow's canned foods. Performance proves that WEEI gets results.

Cordially yours,
DANIEL F. SULLIVAN CO., INC.

In bringing up a comparative analysis of listenership and coverage of KGNC and, like they say, Stations A, B, and C, we feel a little bit like the girl who said, "I always make it a point never to talk about my friends unless I can say something good . . . and brother, is this good!"

The new SAM Report (Baker Study) gives KGNC about five times as many primary daytime counties, and eight times as many nighttime counties, as the other three stations combined. In comparison with 1949, Stations A, B, and C have lost primary counties; not KGNC. We held our own, daytime, and jumped from 27 to 32 counties, nighttime. And our audience is up 17.7% daytime and 25.9% nighttime.

This brings us to television. KGNC-TV's test pattern went on the air March 11. Regular programming started Wednesday, March 18. Sets in the area: 12,653. Amarillo, with the Number One per-family income and retail sales figure in the U.S., won't take long to buy TV.

What club *you* use?

REPRESENTED NATIONALLY BY THE O. L. TAYLOR COMPANY

Jane Leider

on all accounts

JANE LEIDER looks at advertising from the woman's point of view. A believer in and buyer of saturation daytime radio, she uses appeals to the housewife with emphasis on the product, particularly on week-end purchases.

She believes that local or regional daytime radio is the best buy for the small advertiser—a policy which has paid off for her as media director of Mogge-Privett Inc., Los Angeles.

Miss Leider, who has spent all her 33 years in Los Angeles, grew up with the advertising atmosphere which is now her career. Her father was in newspaper display advertising for 27 years. She naturally turned to the field, and upon graduation from UCLA with majors in business administration and sociology, joined the advertising department of Challenge Cream & Butter Assn.

Three years later, in 1944, she joined the Davis & Beaven agency (since dissolved), which serviced the Challenge account, in a secretarial capacity. Learning more about media, she soon advanced to the position of space and time buyer, purchasing heavy radio schedules for Scudder Food Products and Wilson & Co. (meat products), among other clients. Moving in 1948 to Harrington, Whitney & Hurst (now Harrington-Richards) as media director and office manager, she handled national spot radio for Squirt Co. (soft drink) and local radio for Gallo Wines.

Through her home ad training, Miss Leider had been led to believe that the newspaper was the "great" medium. Admitting she was hard to convince of radio's staying power, she changed her way of thinking after the first successful placement of radio spots. Now she believes "all media are important to obtain the best results."

After a year out of advertising and in an allied field, Miss Leider last year moved into her present job at Mogge-Privett. As has been true in her 12 years in advertising, she works primarily with food and beverage accounts. Among the current ones are Seven-Up Bottling Co., Ben Hur Products, Ocoma Foods Co. (frozen and canned chicken), California Lima Bean Growers Assn., Von's Grocery Co. (supermarket chain), Karseal Corp. (Wax Seal) and American Fruit Growers Inc. (Blue Goose products).

Miss Leider loves her work, admitting enthusiasm also for the outdoor life. Interested in sports, she is a baseball fan, currently engrossed in the Hollywood Stars 1953 season. Those games, incidentally, are sponsored on KFWB Los Angeles by Seven-Up Bottling Co.

TV'S BIGGEST CUSTOMERS OUT TO KEEP DOWN COSTS

Leaders of nation's advertising industry warn ANA members that high costs of video are outpacing even the biggest advertisers. TV production costs come in for special attention, while delegates show less outward concern over radio expenditures.

NATIONAL ADVERTISERS spending a billion dollars annually for time and space, openly angered by the soaring cost of television, now face media decisions that will have a profound effect on the future of radio and television.

Meeting last week at Hot Springs, Va., members of the Assn. of National Advertisers held a series of closed meetings at which they sought answers to media problems brought about by TV's spectacular growth, its relatively high costs, and its development into a completely nationwide advertising medium.

These major advertisers, comprising 95% of the companies budgeting more than a million dollars a year in media facilities, are starting to squirm under the mounting expense of television advertising. They propose to do something about it.

They are worried about the cost of nationwide TV time once the entire nation is dotted with video outlets. They get violently agitated over increasing production expenditures for their programs and spots.

Celanese Drops Major Schedule

Some of these advertisers—Celanese Corp., for example—already indicate privately that television is getting too rich for their blood if purchased on a regular program schedule and on a nationwide basis. Celanese has dropped a major TV schedule.

Contrary to the ANA meetings held in 1951 and 1952, national advertisers are outwardly showing little concern over the cost of radio time. Instead they focused their financial eyes on television. This would not be regarded in any sense as a belief that ANA members are content with radio costs or that they have dropped all hope of adjusting aural costs downward in line with their ideas of television's impact on the older medium.

The extent of advertisers' fretting over TV costs was indicated by the way the ANA meeting was conducted. At three Thursday afternoon meetings the members held off-the-record discussions that had TV as an important, if not dominant theme. The agenda itself put it this way, "Is TV Worth the Cost—or Are You Running Out of Aspirin?"

Durable, non-durable and industrial advertisers exchanged views on their television experiences. As professional buyers of space and time, ANA members are historically aggressive in taking pot shots at media costs. While newsmen were barred from the Thursday discussions, it was obvious that ANA members are just as excited about video costs as they were about radio costs two years ago. At that time a slashing attack on radio costs was waged but fears of antitrust action finally entered the scene.

Much of the emphasis was placed on TV production costs at Thursday discussions rather than on the cost of time and facilities. ANA has closely followed negotiations with Screen Actors Guild.

Top Network Executives Speak

Eager to get an inside peek into the future of television, ANA had two top network executives as speakers Friday afternoon. Here, again, the doors were barred to newsmen as Frank White, NBC president, and Frank Stanton, CBS president, discussed questions on future TV prospects.

Mr. White's subject was, "Is Television Pricing Itself out of the Market?" Mr. Stanton spoke on the topic, "Getting More out of Television."

After three days of speeches and locked-door discussions, advertiser reaction in general was that TV networks and stations must make some major changes if they are to capture the business they want from national media buyers.

Perhaps the classic case of a TV network being priced out of the market is that of the Texas Co., which pioneered in the high-budget TV network production. The Texas Co. was sponsoring Milton Berle several years ago when the some $50,000 it cost per week was an almost unheard-of figure. At that time Mr. Berle had things virtually his own way in what passed for big-time television.

Since then other stars have risen as high (some indeed higher). Prices have risen too. Mr. Berle's *Texaco Star Theatre* now costs the Texas Co. about $110,000 a week, and this veteran sponsor of big-budget television has notified the network it is cancelling Mr. Berle after June 9.

The problem here is not alone that the *Texaco Star Theatre* in itself is expensive but also that continued sponsorship of it into a future that promises even higher costs throws the whole Texas Co. advertising budget out of balance.

The prevailing view at Hot Springs was that if present policies of big TV advertising continue, not many advertisers, even the biggest, can afford to go it alone in sponsoring major network shows.

Actually only one positive step was taken by the association—adoption of a strong policy statement demanding that both radio and TV stations accept commercials for related products of separate manufacturers under joint sponsorship (see separate box story).

This action, while considered highly important by these national advertisers representing 325 companies (half of them have million-dollar media budgets), really is only one phase of the overall radio-TV program. It reflects the feeling among advertisers that TV, particularly, must develop new techniques that will make the medium more accessible. This, of course, involves the cost factor.

In the corridor discussions, some of the ANA members conceded that TV networks and sta-

IMPORTANCE OF advertising in the sale of goods is explained at the ANA convention by Robert J. Keith (r), Pillsbury Mills vice president. With him on speaker's platform are (l to r): George B. Park, General Electric Co.; George J. Abrams, Block Drug Co. and program committee chairman, and Paul B. West, ANA president.

tions have made some progress in making it easy to buy portions of programs or to share sponsorship. They recalled that radio networks often require 39- and 52-week annual contracts. Since many advertisers buy space in weekly magazines, for example, on a 13-time annual basis, they feel TV must get away from radio timebuying traditions and make it easy for them to enjoy television's conceded sales stimulating potency.

Many ANA members believe they will be able to reach four-fifths of the TV audience when the medium acquires true nationwide penetration, by perhaps a 125-station network. Cost of such a network would be too high even for many of the largest advertisers, they contend, creating need for new time-bracketing techniques.

See Radio's Decline in Evening

As time purchasers, they generally agree the radio audience will decline as TV spreads, particularly in the prime evening hours. If pressed, some will concede radio's daytime and late-night audience is holding up better than they had anticipated two or three years ago and they will admit that TV hasn't cut deeply into auto and other "extra" listening.

One difficult problem to advertising buyers is this: Assuming that the radio audience is declining and the TV audience is increasing, how is an advertiser going to know how to spend his electronic budget most effectively? The first argument usually advanced by an advertiser is that surveys show the radio audience is declining as TV expands. They show interest in substantiated evidence that radio can provide the lowest-cost method of reaching the public but at the same time cling rather generally to the expressed belief that radios aren't used much when TV enters the home.

A year ago ANA members were enthused over a series of new Advertising Research Foundation projects that included a study of radio-TV rating methods. This study was barely mentioned at last week's meeting. The cooperative foundation, with joint advertiser-agency-media sponsorship, has working committees dealing with the radio-TV study but no action is expected before autumn. NARTB was invited to participate in the foundation but thus far its board hasn't voted any funds. On the other hand, NARTB is working on a TV rating project of its own and frequent committee and conference sessions are being held on the subject. There is a possibility that some sort of a BMB-TV project may emerge.

ANA Group Favors Joint Commercials on Stations For Related Products Made By Separate Manufacturers

A STATEMENT calling on radio and television to accept commercials on behalf of related goods, made by separate manufacturers, on a joint-sponsorship basis was issued Friday by Assn. of National Advertisers, winding up a three-day convention at Hot Springs, Va. (see main story page 31).

ANA called it "a strong and constructive statement." The policy declaration came from the ANA's Radio and TV Steering Committee headed by Edwin W. Ebel, director of advertising, General Foods Corp.

Noting that some radio and TV stations refuse joint advertising of a pie crust mix and pie filling ingredient, for example, Mr. Ebel said.

"This type of advertising is an important current trend of merchandising and refusals on the part of some stations are against the best interests of consumers, dealers and station owners, as well as sponsors. We have every reason to hope that stations will see the reason and equity in this statement and respond favorably to its recommendations."

Before issuing the policy statement ANA's radio-TV group conducted a survey of its members. This study showed that some progress is being made in joint commercials. It revealed also a fear among radio and TV stations that permitting joint commercials covering related products might lead to demand for similar privileges for non-related items and thus deprive stations and networks of customers. The group considers this position short-sighted.

The group's policy statement on joint sponsorship by advertisers of related products laid down these seven points:

1—Joining of products offers the consumers "the obvious benefit of a finished dish or service," representing greater station service to the audience.

2—Spread of such product advertising shows its fundamental value.

3—Joint promotions give distributors a chance to obtain multiple sales results in retail outlets, including more effective displays.

4—Efficiency of sponsors' sales and advertising effort is increased.

5—Other media have no such restrictions so the user of radio and television time is unfairly handicapped. The committee believes advertisers will be forced to turn to other media.

6—The joint technique actually extends purchase of radio and television time by increasing effectiveness and promotional efforts based on advertising.

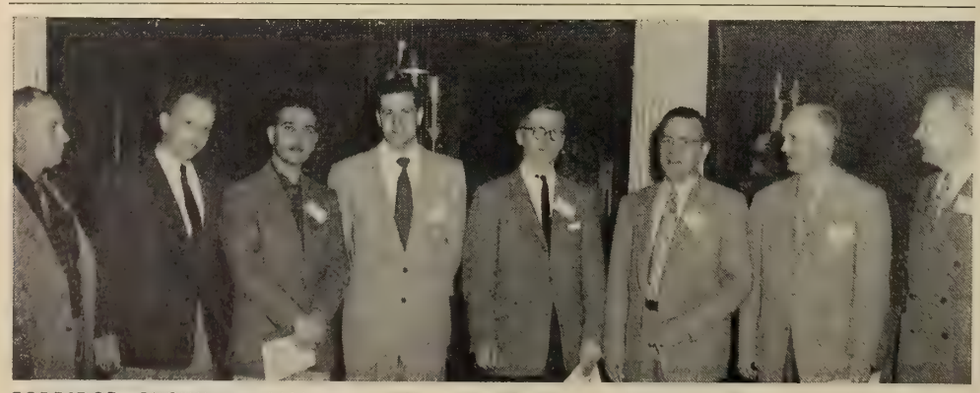
7—Stations refusing jointly sponsored commercials for related products "are acting not only against their listeners' best interests, and those of sponsors and distributors, but against their own best interest as well."

Defense by Dyke

While it is normal for ANA members to chew at media as they discuss their common problems, the advertisers heard a defense by a high agency executive—Ken R. Dyke, vice president of Young & Rubicam. Mr. Dyke has served on all three sides of the advertising spectrum, having held high executive posts at NBC (vice president) and Colgate-Palmolive-Peet Co. (advertsing manager).

He praised the efforts of media to keep up advertising standards through copy and continuity acceptance departments. He spoke critically of the practices of some advertising leaders who make extravagant, repetitive, foolish and even vulgar claims for their goods and services. His subject was, "Is Public Confidence in Advertising on the Downgrade? The Forecast Is Fair and Warmer."

Much of the criticism against advertising comes from friendly sources, Mr. Dyke said, though specific abuses are relatively small in number when balanced against the whole advertising picture.



Mr. Dyke spoke at a closed session on the subject: "Is Public Confidence in Advertising on the Downgrade? The Forecast Is Fair and Warmer." Though his remarks were not released, it was learned that Mr. Dyke praised efforts of media to keep up advertising standards through copy and continuity acceptance departments.

John C. Dowd, president of Dowd, Redfield & Johnstone, New York agency, outlined the development of Blensol Color Shampoo from a $5,000 budget into a nationally distributed product. Following initial newspaper space, the campaign included TV film commercials designed to break down resistance to the idea of a home-supplied color shampoo and show how easily and economically the product may be used as well as the results obtained. Mr. Dowd described co-op advertising as "subsidized retail advertising." Blensol's 1953 advertising budget will run a quarter-million dollars, he said.

Talent Costs Explained

The plague of higher talent costs for TV film commercials was explained by Arthur Bellaire, in charge of BBDO TV and radio copy. Suggesting that the basic aim of TV commercials is "to create the damnedest, hardest-selling commercials possible at the lowest price possible," he listed figures citing the increase in cost of film commercials under the new Screen Actors Guild agreement.

The obvious answer, he said, is to study carefully all ways of keeping down the cost of film commercials. First, he explained, people "really don't tire of seeing your commercials

CORRIDOR GROUP at ANA convention included (l to r): Dick Hooper, RCA; Herbert F. Osterheld, Borden Co.; Len Colson, Mennen Co.; Vincent P. Brunelli, Personal Products Corp.; Wallace T. Drew, Bristol-Myers Co.; Robert J. Piggott, Grove Labs.; Stanley H. Manson, Stromberg-Carlson Co.; Morden R. Buck, Mohawk Carpet Mills.

repeated as rapidly as your next door neighbor may lead you to believe."

This theory permits rotation of two commercials instead of three or four when new production is started. Mr. Bellaire reviewed animation techniques, including low-cost types. He said rear screen projection offers chance for savings and advocated use of stock footage for inserts. Legal releases should be obtained with stock footage, he reminded.

Still photographs, enlivened by moving cameras, can help cut costs, according to Mr. Bellaire, as well as re-editing of old commercials without the need of repaying talent. He suggested old film footage be retained for incorporation in new commercials.

Advertising Aids Salesmen

Pillsbury Mills, major user of electronic media, looks on advertising investment as an aid to the sales force just as plant and equipment aid the production force, according to Robert J. Keith, vice president. Besides helping to keep the production wheels turning, he said, advertising gives expression to and provides an outlet for the work of our scientific research people.

Pillsbury uses research extensively in making advertising plans, according to Mr. Keith, as well as to show the comparative monthly position of its brands against those of competitors. This research points up what radio programs are most popular and what TV programs have the most viewers.

He recalled an impromptu comment by Arthur Godfrey that Pillsbury cake mix looked like paste when a liquid was stirred into it. This informal touch proved pleasing to many housewives, it was found. Mr. Keith added, "We have found out through research that the American housewife is pretty smart and understands humor like Godfrey displays both on his programs and in his commercials. We have also found that Godfrey is one of the world's greatest salesmen of all time."

'Shutter Mind' Readers

Richard D. Crisp, marketing research director of Tatham-Laird, in a discussion of printed media declared the firm's research program has found "that consumers read ads today with a 'shutter mind'," a form of defense mechanism by which they "can skim ads at truly astonishing speed."

A dramatic story of Minute Rice and its rise to top position in the branded rice field was narrated by H. M. Cleaves, marketing manager, General Foods Corp. This record was attained in a few years with the aid of extensive advertising, including radio and TV. The product was first in the field of pre-cooked rice.

Citing increase in sales and advertising, Mr. Cleaves said, "We can now afford television. Incidentally, here is a product that is a 'natural' for TV advertising." He said the product is white and easily demonstrated along with the simplicity of preparing it for the table.

Franco Leaves Weintraub; Plans to Be Announced

CARLOS FRANCO, general manager of radio-TV department, William H. Weintraub Co., New York, is resigning effective April 10. He has been with the agency for the past two years and prior to that was with Young & Rubicam. His future plans will be announced shortly. Meanwhile, Les Blumenthal, account executive with Weintraub agency, probably will take over as business manager of the radio-TV department.

MARBLES are used in a promotion campaign to symbolize the 500 spots (100 a week for five weeks) being used by Rinso on WRNL Richmond. Station salesmen presented leading Richmond food retailers with 500 marbles each. Above, Lou Kroeck (l), of Edward Petry & Co., representing WRNL, presents 500 marbles to Watler Bowe, head Rinso timebuyer at Hewitt, Ogilvy, Benson & Mather, New York.

Berghoff and Hamm's Beer Buy Broadcast Schedule

TWO midwest breweries last week announced advertising campaigns which include increased use of broadcast media: One in television, the other in radio.

Berghoff Brewing Corp., Fort Wayne, Ind., on March 2 started a 13-week radio schedule set up for a total of 5,861 announcements over 25 key Midwest radio stations, according to K. L. Braun, executive vice president and general manager, who said it was the largest spot radio drive in the firm's history. He said the campaign will be expanded later this year. The campaign coincides with the introduction of Berghoff Dark beer.

Theo. Hamm Brewing Co., St. Paul, will use more television "as more TV outlets become available," according to Albert R. Whitman, executive vice president of Campbell-Mithun Inc., Hamm agency, Minneapolis. He said Hamm's enthusiasm for television comes from its successful sponsorship of Chicago major league baseball telecasts. The firm again will sponsor Edward R. Murrow's radio news show on CBS, according to Mr. Whitman, who said interviews indicate the show's listeners drink more Hamm beer than non-listeners.

GM's Spot Drive Plans

GENERAL MILLS, Minneapolis, is tieing up loose ends of three individual spot campaigns which are slated to begin in two weeks in selected markets of the nation.

The campaigns involve Wheaties, handled by Knox-Reeves Agency, and Cheerios and Gold Medal flour, with Dancer-Fitzgerald-Sample as the agency.

Lowry Crites, GM radio-TV-media director, said Thursday that "hundreds of stations" have agreed to accept one of four alternative plans offered by the company for different markets. He said no stations nor station representative firms had posed serious opposition to the special rate project [B•T, March 16].

CLOTHIERS PLAN SPRING CAMPAIGN

Howard Clothes tailors experimental advertising program to test media results.

AT LEAST a half-dozen apparel campaigns will greet the spring and pre-Easter season with a parade of spot campaigns and local radio expenditures.

One of the largest current spenders among the clothing firms, Howard Clothes, is appropriating $300,000 for a 13-week campaign using a combination of newspapers and radio, radio alone, and newspapers exclusively in several selected markets to determine the relative potency of each medium and each combination of media. At least $86,100 of the test budget is going into a radio saturation campaign.

The firm will use newspapers and four Philadelphia radio stations for 35 to 100 spots running daytime, Monday through Friday, on a weekly span. Radio alone will be used in Boston, Detroit and Minneapolis, while New York and Chicago will feature only newspaper ads. Results of the test will be revealed about June 21. Howard places its own advertising in newspapers, but the radio spots are placed through Dowd, Redfield & Johnstone, New York.

Howard also plans to use a TV spot schedule starting in September, but details have not been worked out.

Ripley Stores—27 located in the eastern section of the U. S.—will spend approximately $140,000 this year, a $40,000 increase over its expenditures in radio and TV last year. The company is using Martin Block on WNEW New York until August, a 52-week spot saturation schedule on WMCA New York, and a TV spot announcement campaign on WFIL-TV Philadelphia. Bobley & Co., New York, is the agency.

Spends $250,000 Annually

Barney's Clothes, one of the largest local clothing firms in New York, spends about a quarter of a million dollars in radio annually. This year the organization added a small TV spot schedule without decreasing its radio activity. Barney's currently is using spot announcements on a 52-week basis on the following stations: WNEW WMCA WINS and WNBC, all New York. In addition, spots are being used on WNBT (TV) New York.

Canadian Furs is another 52-week spot announcement advertiser, using New York stations WNEW WHOM WOV and WOR, and WAAT Newark. The agency is Emil Mogul Co., New York.

Hollanderizing Corp. of America will go on the air the day after Easter with a campaign theme featuring three leading New York radio personalities. Each will tell the "Hollanderizing Story" on a daily schedule for eight weeks. They are John Gambling on WOR, Jerry Marshall on WNEW, and Jack Lacy on WINS. The account is handled by Lester Leber Co., New York.

Robert Hall Clothes, New York, long the nation's largest user of retail radio advertising for spring business, will add a TV spot campaign employing 20 stations in 11 major markets through Frank B. Sawdon Agency, New York [B•T, March 16].

Mellville Shoe Corp., New York (Thom McAn shoes), through Anderson & Cairns, New York, is placing a one-week pre-Easter campaign starting March 25 using 24 stations in eight southern markets, plus one TV station.

BBDO Drive for CARE

BBDO will serve as volunteer agency of the Advertising Council's campaign in behalf of CARE. Donald Gillespie, BBDO account executive, will supervise preparation of campaign materials.

Cohen Promotes Dunlavey

MARY DUNLAVEY, chief timebuyer, Harry B. Cohen Adv., New York, has been promoted to radio-television media director, effective immediately. Miss Dunlavey has been with the agency for the past three years. Prior to that she was with Pedlar & Ryan, and before that was timebuyer for Erwin, Wasey & Co., which she joined in 1939 as a secretary.

Miss Dunlavey

Kobak Urges Educators' Aid in ARF Studies

COOPERATION of universities in future projects of the Advertising Research Foundation was suggested Friday in a talk by ARF President Edgar Kobak on accomplishments and objectives of the organization.

Addressing the research session of the fourth annual Advertising Institute, sponsored by Emory U. and the Atlanta Advertising Club, Mr. Kobak said assistance of universities and schools "interested in advertising and marketing might well be helpful."

Noting that ARF now is a tripartite organization of advertisers, media and agencies, he declared it must accept its "share of the responsibility for what happens to advertising in the years to come." To meet this challenge, Mr. Kobak said, ARF currently is sponsoring projects on radio-TV rating methods, printed advertising rating methods, and on marketing and advertising research. The latter study will be incorporated into a booklet, "Criteria for Appraising Marketing and Advertising Research," which will be sent soon to all ARF subscribers.

Mr. Kobak said that ARF is considering a project to determine who buys certain types of so-called men's products and the relative influence of men and women on the act of purchasing and another on development of an economic and marketing data study.

Esty Appointments

APPOINTMENT of three new executives to service organization of William Esty Co., New York, was announced by agency president James J. Houlahan last week.

George MacGovern, director of sales development in network sales department of NBC, was named director of research. George E. Humbert and William E. John were appointed account executives. Mr. Humbert was with Kenyon & Eckhardt as account executive on the Kellogg account, and Mr. John formerly handled the Dodge account at Ruthrauff & Ryan. He will handle the Colgate-Palmolive-Peet account with Esty.

'52 NETWORK TV UP $53 MILLION

Network TV leads four media in gains over 1951 with 42 advertisers spending more than $1 million apiece, Publishers Information Bureau report shows. Combined billings for all four media gain 9.4%, but network radio drops $11 million.

DURING 1952, 42 advertisers spent more than $1 million apiece for network TV time and 37 advertisers spent more than that for time on nationwide radio networks, according to the fifth annual edition of "National Advertising Investments," based on data compiled by Publishers Information Bureau.

The volume reports combined expenditures of national advertisers for time on radio and TV networks and for space in magazines and Sunday newspaper supplements during the year totaled $958,347,692, a gain of 9.4% over the 1951 total of $876,104,727. All figures are for time and space only, not including talent or art work, and all are figured at the one-time rate.

Network TV billings were up $53 million over 1951; magazines rose $39 million; Sunday supplements gained $2 million and network radio dropped $11 million. The book also lists individual product advertising expenditures in each of the four media for all advertisers spending $25,000 a year or more—a total of 2,318 companies.

Radio and TV network advertisers using $1 million worth of time in 1952, listed in Tables I and II, include 21 companies who spent that sum with both types of networks. It is noteworthy that the top 12 users of video network time also appear on the radio list, whereas neither Miles Labs., ranking second among the radio network clients, nor Sterling Drug, third on this list, are included among the $1 million or more clients of the TV networks.

Gross time expenditures of the top 10 radio network advertisers in 1952, with their expenditures for the three preceding years, are shown in Table III, which reveals that the majority had greater time costs in 1949 than in 1952.

The reverse is shown in Table IV, reporting on TV network time expenditures of 1952's top advertisers in this medium for the past four years. Paralleling the growth of network TV as an advertising medium, this table shows the time purchases of each advertiser increased manyfold from 1949 to 1952.

Millions of nickels in juke boxes tell the story of the Italian Influence on modern American life. They go to pay for repeated playings of American hits based on Italian originals.

More and more American hit tunes, such as those pictured above, are adaptations from Italian popular songs. In their original form, WOV was first to bring them to American airwaves. What is today a nationwide hit may have been familiar, a year and more ago, to over two million Italian-Americans to whom WOV directs its Italian-language broadcasting.

In every phase of American life, Italian creativeness makes its daily contribution. From music to motor cars, from fashions to films to food, Americans have eagerly accepted the good things the Italian Influence brings us.

In New York, with the greatest Italian population of any city in the world, the Italian Influence makes its first and most penetrating impact. WOV will show you the way to turn this Influence to the profit of the product you advertise.

Mogen David Sales Up 1,000% Under W&G Plan

NEW approach to TV programming and commercials is credited by Weiss & Geller agency with jumping sales of Wine Corp. of America's Mogen David wine 1,000% within a year.

This was reported by Edward H. Weiss, agency president, in an address scheduled for delivery last Saturday before the fourth annual Advertising Institute at Emory U., Ga., co-sponsored by the university and the Atlanta Advertising Club.

Radio, TV Crime Effects

Referring to W&G's study of "the possible negative effects of radio and television crime programs" [B•T, Jan. 26], Mr. Weiss said his agency found it had been using "the wrong type of commercials as well as the wrong type of television show" for Mogen David. The firm later replaced a mystery program with a panel show.

Mr. Weiss asserted:

". . . Since the use of our new show and copy theme (placing the viewer in a relaxed mood), Mogen David sales have hit an all-time high. . . ."

Mr. Weiss has been an exponent of applying the social sciences and human motivation studies to the advertising field.

Rybutal Denies FTC Charges

VITAMIN Corp. of America, Newark, has filed a formal denial with the Federal Trade Commission, Washington, to FTC charges that false advertising claims have been made for the vitamin product, Rybutal. Parties answering included VCA Labs., Vitamin Corp. of America and its officers.

Vitamin Corp., in addition to denying six allegations on advertising made by the Commission, challenged FTC's use of the word "free" in describing the company's offer of a $1.98 bottle of Rybutal to persons buying a 100-capsule size at the regular price.

Thor Buys TV; Plans AM

THOR Corp., Chicago, has committed $500,000, one-fourth of its 1953 advertising budget, to its new alternate-week sponsorship of *Quick as a Flash* on ABC-TV. Robert J. Runge, Thor advertising manager, revealed the company will spend a total of $2 million this year. Thor's sponsorship of *Flash* debuted March 12 on ABC-TV, and will continue on an alternate basis for 44 weeks. Additional stations will be added to the present 27 as availabilities open up. Television will receive the largest single portion of the budget, with radio announcements scheduled at the dealer level.

Miller Considers Braves

RADIO-TV rights for the new Milwaukee Braves baseball schedule were being considered by Miller Brewing Co. last week. Officials of the brewery, its agency, Mathisson & Assoc., and the ball club were to confer Friday.

A Miller radio-TV official said coverage rights are "in the process of negotiation." Mentioned in talk of televising or broadcasting road games were WTMJ-TV and WEMP, both Milwaukee.

Bradley, Glenn Elected

RONALD C. BRADLEY, account executive, and Norman W. Glenn, director of broadcast planning, have been elected vice president of Doherty, Clifford, Steers & Shenfield, New York.

Crosley, Speidel Losing Paul Winchell to P&G

YOUNG & RUBICAM, New York, for Procter & Gamble, Cincinnati (Cheer and Camay), has lured Paul Winchell and his dummy, Jerry Mahoney—now featured on the *What's My Name?* show under alternate sponsorship of Speidel watch bands and Crosley TV sets—for a new P&G program next fall.

Contract negotiations are still underway, with the advertiser expecting to sign Mr. Winchell to a five-to-seven year agreement.

P&G is expecting to put the new Winchell-Mahoney show in the Sunday 7-7:30 p.m. period on NBC-TV, now occupied by its Red Skelton show. That program would be pushed back to the 10-10:30 p.m. Sunday period now filled by *The Doctor*, sponsored by Camay.

Meanwhile, Speidel and Crosley probably will continue to sponsor the Louis G. Cowan package, *What's My Name?* with a new star. Mr. Cowan's three-year contract with Mr. Winchell expires at the end of this season.

Cecil & Presbrey Promotions

APPOINTMENT of three vice presidents was announced last week by Cecil & Presbrey, New York. They are: Harry Parnas, vice president in charge of media; Franklin E. Brill, vice president and director of public relations, and John P. Beresford, vice president and account executive.

NEW BUSINESS

Spot

Shaller-Rubin Adv., N. Y., is preparing radio spot announcement campaign to start about April 15 in 30 cities for undisclosed client. Television spot campaign is expected to follow.

Sturdy Dog Foods, Burbank, Calif., starts spot announcement campaign on alternating schedule on KLAC-TV, KNBH (TV) Hollywood, KFMB-TV San Diego and station in San Francisco to be announced, for 52 weeks from April 1. Agency: Jimmy Fritz & Assoc., Hollywood.

Network

Hall Bros., Kansas City (Hallmark greeting cards), has purchased two-hour period on full NBC-TV network for one-time presentation of "Hamlet" April 26. Agency: Foote, Cone & Belding, N. Y.

Scholl Mfg. Co. Inc., Chicago (Dr. Scholl's Zino Pads and other foot aids), sponsoring *Dr. Scholl's News with Ed Pettitt* over MBS, Sun., 4:55-5 p.m. EST, starting March 29. Agency: Donahue & Coe, N. Y.

Fram Corp., Providence (oil filters), to sponsor *Vacationland America* starring John Cameron Swayze and his family on NBC-TV, Sun., 5:30-5:45 p.m. EST, effective April 5. Film program will also be seen weekly in Montreal on CBFT (TV), Wednesday, April 8, and on CBLT (TV) Toronto starting Thursday, April 2. Show is being produced by Robert Lawrence Productions Inc. Agency: VanSant, Dugdale & Co., Baltimore.

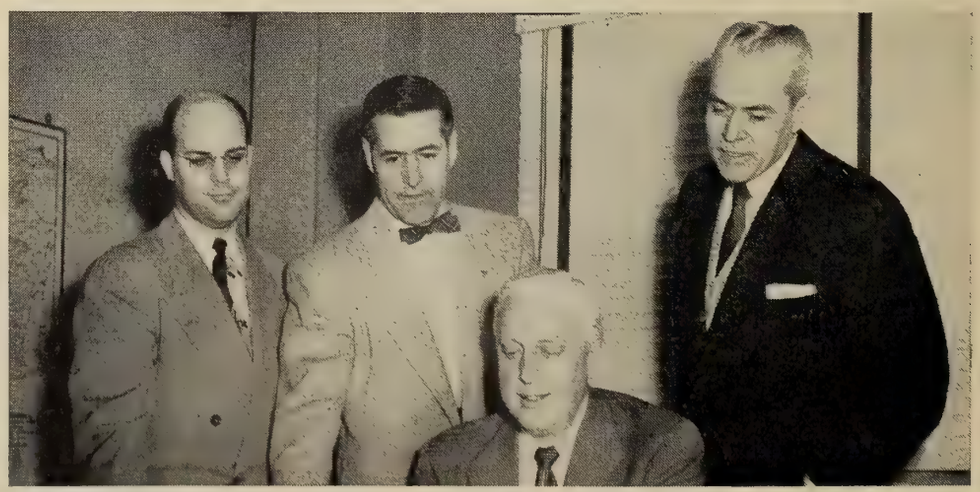
Agency Appointments

Flako Products Corp. names Charles W. Hoyt Co., N. Y. Company uses radio-TV.

Gateway Mercantile Co., Phoenix (clothing, uniforms), appoints Irvin Rose Agency, Hollywood. Radio-TV will be used.

Ace Radio & Television Co., Portland, appoints Alport & O'Rourke, that city.

Security Industrial Insurance Co., Donaldsonville, La., appoints Philip J. Meany Co., L. A.



California State Fair, Sacramento, and **Vitafreze Equipment Inc.,** that city (frozen stick confections), appoints Clark & Elkus, that city.

West Disinfecting Co., Consumer Products Div., Long Island City, appoints Paris & Peart Adv., N. Y. **William F. Byrne** is account executive.

Doyle Packing Co. of Calif., L. A. (Strongheart dog food), appoints Ruthrauff & Ryan Inc., Hollywood.

National Drug Co. appoints Gray & Rogers, Phila.

Casler-Hempstead & Hanford, Chicago, has changed name to **Henry M. Hempstead & Co.**

WINSTON & NEWELL Co., Des Moines chain of 23 Super Valu stores, buys the Harlan Miller show on KRNT, aired Monday through Friday, 6:30 to 6:45 p.m. Russell W. Byerly, (seated), checks contract as (l to r) Carter Reynolds, station salesman; T. E. Barrowman, W & N departments manager, and Paul Elliott, KRNT, commercial manager, stand by. This is Mr. Miller's first work in radio. He has been columnist for the *Des Moines Register* the past 28 years and editor, "There's a Man in the House," in the *Ladies' Home Journal*.

TV Continuity Plots Leave Children Cold—SRI Study

SPONSORS who try to build continuing types of plots and strict continuity in children's TV shows are doing so to no avail, according to a study released by Dr. Burleigh B. Gardner, executive director of Social Research Inc., Chicago psychological research and marketing consultant firm.

The report, "Now for the Kiddies," indicated children cannot carry too long a plot in their heads and that continuity is a minor detail with them. "On the other hand, lengthy commercials, the bane of adult TV shows, are not poison on children's shows," Dr. Gardner said. He said younger children especially like entertaining commercials as well as they like the show. The study recorded children's preferences in various age groups.

Benny Tops Nielsen AM

JACK BENNY topped the A. C. Nielsen rating report made the week of Feb. 8-14, while *Lux Radio Theatre* moved up from fifth place the week before to nudge *Amos 'n' Andy* from the No. 2 spot. Complete radio ratings follow:

NARTB Code & TV Public

THE NARTB's television code on commercials is known to a significant portion of the TV public, according to a survey of the Columbus, Ohio, area by Dr. Kenneth Dameron of Ohio State U.'s business organization faculty.

Dr. Dameron said some 23% of viewers questioned were familiar with the code and believed it the best device to regulate the content of commercials. He called the finding "significant in view of certain public criticism of advertising and recent citations against false and misleading advertising by the Federal Trade Commission."

About 5% of viewers thought the government should exercise more control over TV commercials. In general, Dr. Dameron said, "the public felt that television advertising is fairly satisfactory."

'Lucy', Fights, Godfrey Lead Nielsen TV Report

A. C. NIELSEN Co.'s second report for February, covering top TV programs for the two weeks ending Feb. 21, shows *I Love Lucy*, Pabst Blue Ribbon fights and Arthur Godfrey as the top three programs in number of homes reached and in the percentage of homes reached in each station area. Listings follow:

NIELSEN RATING
NUMBER OF HOMES REACHED

Rank	Program	Homes (000)
1	I Love Lucy (CBS)	15,177
2	Pabst Blue Ribbon Bouts (CBS)	12,004
3	Arthur Godfrey & Friends (CBS) (Liggett & Myers Tobacco)	11,150

Trendex Finds 'Lucy', Godfrey, Tops in March

TOP 10 Trendex ratings for sponsored evening network TV programs for week of March 1-7 were released last week. They are:

Rank	Program	%
1	I Love Lucy (CBS)	62.9
2	Talent Scouts (CBS)	49.9
3	Dragnet (NBC)	43.8
4	Godfrey's Friends (CBS)	42.9
5	Star Theatre (Berle) (NBC)	37.4
6	Our Miss Brooks (CBS)	34.5
7	You Bet Your Life (NBC)	34.0
8	Strike It Rich (CBS)	33.8
9	What's My Line (CBS)	32.5
10	Toast of the Town (CBS)	31.2

(NOTE: Figures are based on the one live broadcast during the week, March 1-7, 1953.)

MOVIE MAKERS SEEK TV ENTRE; MPAA SAYS NETWORKS 'INTERESTED'

Hollywood adopts "If you can't lick 'em, join 'em" attitude, or so it would seem as MPAA makes opening overtures to put picture excerpts on video.

THE MAJOR motion picture producers, heretofore antagonistic toward television, now want to get in.

But, at least one skeptic added hastily, they want it on their own terms if their current collaborative approach is any criterion.

Through the Motion Picture Assn. of America, they have broached the TV networks on a proposed series which would present excerpts from new feature movies and would include personal appearances of member companies' top stars, whose TV appearances in the past generally have been strictly limited. The chosen network would be free to sell the series to advertisers.

MPAA spokesmen last week described the plan as "still in the formative stage," and said that, although the networks had been contacted, none of them had yet submitted formal detailed proposals for a format. They described the networks as "very much interested," and said they hoped that within two weeks a network could be selected to produce a pilot film.

Network authorities had little to say, although it was reported that at least NBC-TV and ABC-TV had advanced some program plans to the MPAA group, while CBS-TV had decided not to do so.

The plan as described by MPAA spokesmen called for a series of weekly half-hour shows. Each would contain integrated excerpts from two or three new feature pictures, plus appearances by one or two motion picture stars. Eric Johnston, head of MPAA, might appear on each show, perhaps in the role of host. The programs probably, but not necessarily, would be film or a combination of film and live production.

MPAA Has Cooperation

MPAA emphasized that, although programs of this type have been contemplated by others, MPAA is the only organization which can "deliver" the cooperation, facilities and stars of all of the major companies.

MPAA membership includes such companies as MGM, Paramount, 20th Century-Fox, Columbia, RKO, Universal, Warner Bros., Monogram, United Artists and Allied Artists, and officials said all would cooperate in the proposed series.

Chief objections voiced to the proposal were charges that MPAA wanted to retain too rigid control over the series, that the programs would be the equivalent of almost 30 minutes of "plugs" for the motion picutre industry, and that sponsorship would be hard to find. "Who would want to buy two minutes of commercials and 27 minutes of plugs for Hollywood?", one observer asked. It also was contended that the major producers no longer control the contracts of any large number of real "name" stars.

The motion picture industry's move in any event was seen as another step in a Hollywood trend away from its anti-TV position of the past.

Another example cited was the sale of rights for TV-radio coverage, via NBC under RCA sponsorship, of the famed "Oscar" awards dinner last Thursday night.

Other examples, and closely similar in format of the MPAA proposal, were the CBS-TV *Toast of the Town's* signing of agreements with 20th Century-Fox and MGM whereby five or six-minute "Miniature World Premieres" of new movies of those companies would be presented on *Toast* [B•T, March 16, 9].

In connection with the *Toast* agreement with MGM and 20th Century, regulations of American Federation of Musicians with respect to the use of music on sound tracks of film clips has prompted the movie companies to limit the "Miniature World Premiere" selections to a considerable extent to non-musical productions.

Spokesmen for both companies acknowledged they were following this policy but said they have received "clearance" from AFM for some motion pictures with music, as in the case of "Call Me Madam."

Meanwhile, the value of cooperation between television and the motion picture industry was stressed by Ed Sullivan, producer and m.c. of *Toast*, in a talk in New York Thursday before the Assn. of Motion Picture Advertisers.

Referring to the agreements with MGM and 20th Century-Fox, he noted that his program had used a movie sketch as far back as 1949, at which time "the exploitation values of TV became self-evident."

AMPA made Mr. Sullivan an honorary life member at the Thursday session in recognition of "his cooperation in helping to publicize movies through the medium of television."

AFL Council Continues Bar on Foreign TV Films

CONTINUING its drive to halt foreign TV film production, the AFL Hollywood Film Council will meet this week with Peerless Television Productions to discuss proposed distribution of English financed and filmed *Secrets of Scotland Yard* series, and producer-director Raoul Walsh, on *Long John Silver* and *Capt. Blackbeard* series to be filmed in the Caribbean area.

Action by the council last week approved Bernard Proctors distribution set up for *Orient Express*, series of 26 half hour programs filmed in major European cities by John Nash, as Proctor contracted for the series before formulation of union's policy. Also given the go signal was Harlan Thompson, whose Dorset Productions advanced considerable money toward filming a quarter hour musical series in Italy prior to the councils production curb campaign [B•T, Feb. 9].

Dodgers' Film Package

BASEBALL television quiz show, produced by Guild Films Inc., New York, will be released next month with the opening of the major league baseball season. Titled *Call the Play*, the program will be available on a weekly or multi-weekly basis. It will feature action highlights of major league games played by the Brooklyn Dodgers last year. Format includes a quiz and a jackpot.

Antitrust Objections Deadline Set April 15

DEFENDANTS in the Dept. of Justice's antitrust suit to force release of 16mm feature motion pictures to television and other outlets last week were given until April 15 to file objections to interrogatories sent them a fortnight ago.

Under ordinary conditions the motion picture studios and distributing companies would have only 10 days to file objections, but with the 29 detailed questions covering activities back to 1936, time extension was granted after a conference between government and defense attorneys.

The suit, filed last July [B•T, July 28, 1952] lists defendants as Columbia Pictures Corp. and its subsidiary, Screen Gems Inc.; Universal Pictures Corp. and its subsidiary, United World Films Inc.; Warner Bros. Pictures Inc.; Warner Bros. Pictures Distributing Corp.; RKO Radio Pictures Inc.; 20th Century-Fox Film Corp.; Republic Pictures Corp.; Republic Productions Inc.; Films Inc., and Pictorial Films Inc. Theatre Owners of America (TOA) is named as a co-conspirator, but not as a defendant.

NBC Program Films in Canada

RCA Victor Co. Ltd. of Canada now is sole distributor of NBC film productions in Canada, Robert W. Sarnoff, vice president in charge of the NBC film division, announced last week.

Mr. Sarnoff said RCA's Canadian subsidiary will provide complete production services, advertising and merchandising campaigns and publicity, promotion and merchandising services to local sponsors and stations. Film properties to be offered include *The Lilli Palmer Show, Douglas Fairbanks Presents, Dangerous Assignment* and *The Visitor.*

Film Sales

Falstaff Brewing Corp., St. Louis, will start *City Detective,* weekly half-hour TV film series, in 10 southern markets during June. To be produced by **Revue Productions,** North Hollywood, mystery series goes into production in early April with **Rod Cameron** starred. Agency is Dancer-Fitzgerald-Sample Inc., Chicago.

* * *

Ohio Oil Co., Findlay, Ohio, starts *Crown Theatre,* weekly half-hour TV series filmed by **Bing Crosby Enterprises,** Culver City, in eight markets the week of April 6 for 26 weeks. The new series, featuring **Gloria Swanson** as hostess-m.c., will be shown in Columbus, Dayton, Toledo, Grand Rapids, Louisville, Indianapolis, Kalamazoo and Bloomington, Ind. Agency is **Stockton-West-Burkhart,** Cincinnati. The sale was handled by **Charles B. Brown,** BCE vice-president in charge of sales, and **Dick Dunn,** agency radio-TV director.

* * *

Five new markets for **United Television Programs'** *Heart of the City* (originally presented as the *Big Town* network series sponsored by Lever Bros.) were announced last week, bringing total sales to 37. The package has been purchased in Buffalo by **Iroquois Beer,** by **WABI-TV** Bangor, **WXYZ-TV** Detroit, and by the **Streitman Biscuit Co.** for showing in Charleston and Roanoke.

* * *

Sarra Inc., New York and Chicago, has produced a series of 20-second animated weather forecasts now being shown in the Cleveland area for **Leisy Beer.** Series is produced through the Cleveland office of **McCann-Erickson. Stuart Buchanan,** account executive at the agency, supervised the series.

* * *

California Willys Co., Los Angeles, starts a 75-minute weekly feature film, *Film Playhouse,* on KLAC-TV Hollywood, for 13 weeks from March 19. Agency is **Edwards Agency,** L. A.

Availabilities

Louis Weiss & Co., Los Angeles, has acquired U. S. TV distribution rights to the feature musical film, "That's My Boy," starring NBC-TV's **Jimmy Durante.** Written by **Oscar Strauss,** the film is a satirical operetta.

* * *

Broadcasting & Film Commission of the National Council of Churches of Christ in the USA is releasing free of charge as a public service program a special Easter film, "I Behold His Glory." The 55-minute color film was produced by **Cathedral Films,** Burbank, Calif.

* * *

Screen Gems, New York, is offering *Meet The Family,* a new half-hour filmed TV program, for national and regional sponsorship. A pilot program has been produced.

Production

Screen Gems Inc., Hollywood, is preparing two new half-hour TV film series for production. Being completed is "The Last 30 Minutes," the pilot film in *The Law Strikes Back,* a series of unrelated dramatic episodes produced by **Michael Kraike.** The pilot film goes into production April 14.

* * *

Flying-A Television Co., Hollywood, has started a third half-hour TV film in its *Annie Oakley* series, starring **Gail Davis, George Archainbaud** is the director and **Lou Gray,** producer.

Random Shots

Kling Studios Inc., Chicago, has opened an office at 818 Olive St., St. Louis, with **William Wright** placed in direction.

* * *

Ankers-Loeb Productions has been named Washington, D. C., representative for **Stanley Neal Productions,** New York and Hollywood firm which films special documentaries for TV distribution, it was announced last week by **Leon Loeb** of the Washington firm. Ankers-Loeb will produce training and other special features which require a Washington setting, Mr. Loeb said.

Film People

Walter A. Klinger, in charge of sales for Scandinavian-American Television Co., Beverly Hills, joins **United Television Programs Inc.,** Hollywood, as district manager with headquarters at California Studios.

* * *

Charles M. Amory, vice president in charge of sales for Pathe Laboratories Inc., also has been elected vice president in charge of all business relations with independent film producers for Eagle Lion Studios, Hollywood. **Arthur B. Johnson,** studio manager, has been promoted to vice president in charge of administration of EL. **William C. MacMillen Jr.,** president, Chesapeake Industries, parent company, announced changes.

* * *

Bob McKee, radio-TV announcer, joins **Filmack Studios,** Chicago, in production and sales of TV film spots.

UTP Adds to Sales Force; Moves to West Coast

TO KEEP PACE with increased business, United Television Programs last week announced addition of three men to its sales staff and plans to improve sales and administrative operations.

Vice President Ben Frye said that UTP, which has placed a million dollars in contracts since the first of the year, will move main offices from Chicago to Hollywood April 1. Offices will be located at California Studios, with office management supervised by Walter Klinger, who recently joined UTP. The firm also has taken physical distribution of its prints from Modern Talking Pictures and is establishing its own shipping exchange on the West Coast, he added.

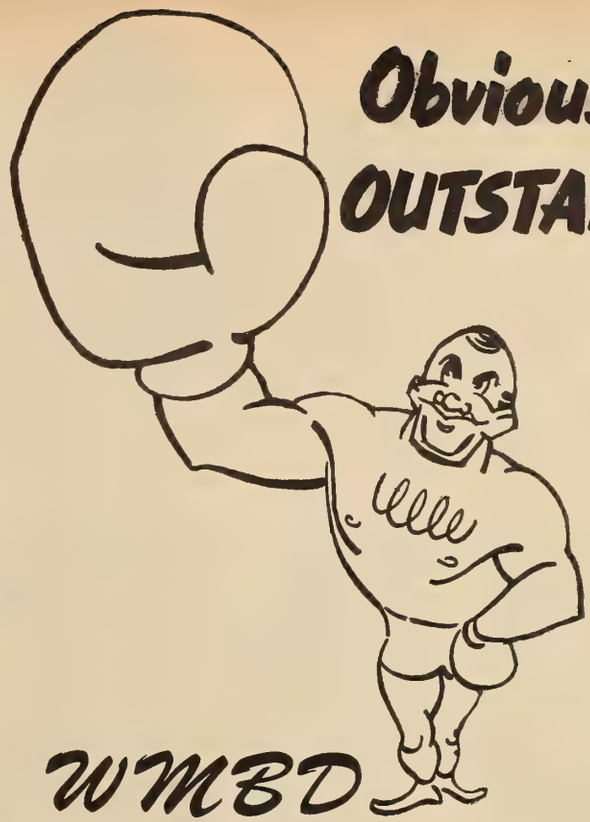
Other developments announced by Mr. Frye are a planned sales and promotion budget "five times as large" as last year's and a decision to hold an annual series of sales conferences on the West Coast. New UTP salesmen are George Weiss and Herbert Miller, who have been assigned to the Midwest, and Charles McNamee, who will work the southern territory.

Telethons Raise $2,287,612 In Cerebral Palsy Campaign

CONTRIBUTIONS totaling $2,287,612 were raised by 12 telethons conducted for United Cerebral Palsy in 12 cities in 1952, Leonard H. Goldenson, UCP president and also president of AB-PT, reported Thursday.

Actual collections from the 12 television marathons, according to Mr. Goldenson, averaged 98% of the amounts pledged when the shows went off the air.

Top fund raiser of all the UCP telethons was the 18-hour program over WABC-TV New York on Dec. 7-8, which brought in $642,824, 116% of the amount pledged.



Other cities and stations which held telethons were KECA-TV Los Angeles, WOAI-TV San Antonio, WHAS-TV Louisville, WTVJ (TV) Miami, WDSU-TV New Orleans, KPRC-TV Houston, WDTV (TV) Pittsburgh, WBKB (TV) Chicago, KGO-TV San Francisco, WFIL-TV Philadelphia and WKRC-TV Cincinnati.

'Main Street, Europe'

WTAG-AM-FM Worcester, Mass., is showcasing a 26-week radio series, *Main Street, Europe,* produced by Louis Fontaine, who recorded interviews in English with persons in Western European countries.

Mr. Fontaine, who two years ago produced *Accent on Paris,* a series on that city, for WTAG, traveled 30,000 miles and spent seven months recording the *Main Street* series, according to the station. The programs depict the customs, backgrounds and everyday life of contemporary Europeans. The show is being aired by WTAG Sundays at 1:30 p.m.

To gather the tape-recorded material, Mr. Fontaine visited Scandinavia, Great Britain, Ireland, France, Italy, Austria, Switzerland, Belgium, Holland, Lichtenstein and Luxembourg.

IRE MEET OPENS; TV HIGH ON AGENDA

The latest in electronics will be exhibited and explained at the annual sessions starting today

REGISTRATION for the 41st annual convention of the Institute of Radio Engineers, opening today (Monday) at New York's Waldorf-Astoria, is expected to top 30,000. Engineers and scientists from almost every country outside the Iron Curtain will congregate to listen to technical papers and to view the $10 million worth of electronic apparatus at the Grand Central Palace.

Television again will be a major field of discussion, with technical sessions on various phases of the subject scheduled Monday afternoon and Tuesday morning and symposia on TV broadcasting for Wednesday morning and afternoon. A two-part seminar on acoustics for the radio engineer also will be held on Wednesday. Other technical sessions will cover all angles of electronic science, ranging from transistors and nucleonics and the use of electronics in medicine and military communications to new radio and TV receivers.

Brig. Gen. David Sarnoff, board chairman of RCA, will make the major address of the four-day meeting, speaking on "Electronics and the Engineers" at the banquet Wednesday evening, when he will be presented with the first 'Founders' award of IRE. The award will be given to Gen. Sarnoff "for outstanding contributions to the radio engineering profession through wise and courageous leadership in the planning and administration of technical developments which have greatly increased the impact of electronics on the public welfare."

The Institute's Medal of Honor award will go to John M. Muller, Naval Research Laboratory, for his pioneering in scientific and engineering contributions.

The nine surviving radio pioneers who founded IRE in 1912 will be honored at the convention's opening session at 10:30 this morning (Monday), with IRE president James W. McRae, Bell Telephone Labs. vice president, presiding. Featured speaker at this session will be William R. Hewlett, vice president of Hewlett Packard Co.

Arkansas Broadcasters Elect Officers at Meet

WILLIAM V. HUTT, KLRA Little Rock, was elected president of the Arkansas Broadcasters Assn. at its fifth annual meeting in Little Rock March 15-16. W. N. McKinney, KELD El Dorado, is the new vice president, and Ted Wood, KOSE Osceola, secretary-treasurer.

Board members include Storm Whaley, retiring president, KUOA Siloam Springs; Messrs. Hutt, McKinney and Wood; Sam Anderson, KFFA Helena; Ted Rand, KDRS Paragould; Julian Hass, KAGH Crossett; Bill Fogg, KXJK Forrest City, and Harold Sudbury, KLCN Blytheville.

The group passed resolutions (1) petitioning FCC reinstatement of the operator rule, contested by International Brotherhood of Electrical Workers (AFL) [B•T March 16]; (2) requesting FCC to extend its June 2 deadline for claiming assigned educational television channels, and (3) questioning "the trend" toward monthly fees for records on the part of record distributors, urging them to "consider policy formation" in the light of broadcasters' objections.

NARTB Denies IBEW Operator Rule Claims

NARTB fought back last week at the attempt of IBEW to halt the FCC's revised rules covering use of restricted operators and remote operation of transmitters.

The association was set back on its heels a fortnight ago [B•T, March 9] when FCC heeded IBEW's request to hold up the revised rules. The union asked that the rules be rescinded or that a hearing be held.

Two key arguments were cited by NARTB in a petition filed Monday with FCC: (1) the association claims IBEW violated FCC rules by failing to serve it with notice of the petition; (2) NARTB says IBEW failed to support its claims.

Much of the IBEW petition was based on the contention that the Conelrad civil defense plan (using two broadcast frequencies for information in case of enemy attack) would be crippled by the rule allowing remote operation of transmitters of 10 kw or less.

Remote Control

NARTB pointed out the government is making extensive use of remote control devices for civil defense communication. Answering the charge that subversives could be more effective at unattended transmitters, NARTB claims the opposite would be the case because such transmitters could be shut off from a remote point.

The FCC has found "operating" does not require a skilled engineer, according to NARTB, and the simple duties in standing watch can be performed with a restricted operation. The association denies revised rules will reduce the supply of skilled technicians, but concedes there may be some displacement of personnel from remote operation.

Do Postmen Send in Box Tops?

Betty Alfson, in charge of the mail room at WCCO-TV, says they *must* . . . if her desk each morning is any criterion.

Even tho thousands of televiewers in the Twin City Zone can and do 'phone . . . the box top fans, including letter carriers, find the mailman necessary in their contest or other aspirations.

Best explanation for our large mail response is this fact: With 100,000 watts—maximum power allowed on Channel 4—WCCO-TV has enlarged its regular Service area to include more towns with more buying power.

AWARDS which were given by American Public Relations Assn. honored radio-TV organizations and related interests. Among those at presentation ceremonies in Washington were (l to r): Ken Carter, WAAM (TV) Baltimore, originating station of *Johns Hopkins Science Review* on DuMont; A. W. Halverson, manager of community relations, General Electric Co., Appliance Div.; William Eiman, Smith, Kline & French Labs., which sponsored medical convention telecasts to 75,000 doctors and the public via TV; Lynn Poole, Johns Hopkins U. public relations director and creator-producer of *Science Review*, silver anvil trophy; Arthur H. Schroeder, attorney, accepting for WHAS-AM-TV Louisville, for audience participation.

NTFC to Meet Thursday

SIGNIFICANT facets of television engineering as they apply to films on television will be discussed by a panel of engineers and scientists in the film field at a luncheon meeting of the National Television Film Council in New York Thursday.

The meeting is the third in a series scheduled for 1953 by the council on the overall subject of "Engineers, Electronics and Techniques." Speakers will be scheduled from 11 a.m. through 2 p.m.

Among the participants will be Dr. Alfred N. Goldsmith, RCA consultant; E. M. Stifle, Eastman Kodak Co.; E. Schmidt Reeves, Reeves Sound Studios; John Stott, Tri-Art Color Corp.; Dr. Peter C. Goldmark, CBS Labs.; C. Graydon Lloyd, General Electric Co., and Frank Marx, ABC.

Coast AAAA Chapter Meet

MONTHLY forum meeting of the Northern California Chapter of American Assn. of Adv. Agencies, to be held Wednesday at the St. Francis Hotel, San Francisco, is a panel devoted to advertisers. Representing advertisers are Robert Hill, advertising manager, Columbia-Geneva Div., U. S. Steel Corp., and Stanley E. Plumb, advertising-merchandising manager, Cling Peach Advisory Board. Franklin C. Wheeler, president, Brisacher, Wheeler & Staff Inc., and Clarence Hestorff, vice president, McCann-Erickson Inc., both San Francisco, represent AAAA.

New 4A Office in L. A.

PERMANENT offices have been established by the Southern California chapter of the American Assn. of Advertising Agencies in the Los Angeles Advertising Club headquarters at Statler Center, 900 Wilshire Blvd., L. A., telephone, Madison 9-1028. It is the first such office for any AAAA chapter outside of the New York headquarters.

FM Campaign in S. C.

FM AUDIENCE and sales promotion campaign will be staged in South Carolina by NARTB and Radio-Television Mfrs. Assn. during the six-week period starting April 6. It will be the eighth FM drive conducted jointly by the two associations in cooperation with dealers, distributors and stations. The campaign grew out of a resolution adopted at a recent meeting of the South Carolina Radio & Television Broadcasters Assn., of which Walter Brown, WORD WDXY-FM Spartanburg, is president.

Addressing a planning session last week at Greenwood, S. C., John H. Smith Jr., NARTB FM and promotion director, described the formula used successfully in earlier FM promotions. Ken Beachboard, WMRC Greenville, is broadcaster chairman of the campaign. Co-chairmen of the distributors committee are Joe L. Pleasants, Allison-Erwin Co., Charlotte, N. C., and Olyn Crouch, Southern Radio Co., Columbia. Separate FM programming, particularly baseball, will be emphasized. A similar FM promotion campaign will open in Michigan in May.

Charles Wright to Head Mississippi Broadcasters

CHARLES J. WRIGHT JR., WFOR Hattiesburg, was elected president of the Mississippi Broadcasters Assn. at the group's annual convention in Biloxi March 14-15. L. M. Sepaugh, WSLI Jackson, retiring president presided at the meeting.

Other officers: Bob Evans, WELO Tupelo, vice president; Granville Walters, WAML Laurel, secretary-treasurer, and these members of the executive committee: Mr. Sepaugh, R. A. Butterfield, WLOX Biloxi; Monroe Looney, WNAG Grenada; Tech Jones, WLAU Laurel; Lourin Miller, WQBC Vicksburg, and John E. Bell, WCMA Corinth.

Speakers included Richard Doherty, NARTB vice president in charge of employer-employe relations, who spoke on television costs and problems and requirements of wage and hour laws, estimating the minimum expense of operating a video station at $65 per hour.

Epperson's Address

ADDRESS of J. B. Epperson, an associate member of the Assn. of Federal Communications Consulting Engineers, should be changed on page 468 of the 1953 BROADCASTING YEARBOOK, under the heading, "Associate Members of AFCCE," to 1816 East 13th St., Cleveland, Ohio, instead of 1816 East 16th St. Mr. Epperson is chief engineer, Scripps-Howard Radio Inc.

Texas Broadcasters Meet

ANNUAL meeting of the Texas Assn. of Broadcasters was held last Monday in Austin. Featured was an address by Jack Williams, program director of KOY Phoenix, Ariz., on "Radio Programming in a TV Market."

TELEVISION Assn. of Philadelphia meeting attracted this group for its advertising shoptalk: L to r, Paul Phillips, Aitkin-Kynett agency; Harry Trenner, vice president, William Weintraub agency, New York, who discussed the problem of television circulation and costs; Max Solomon, sales executive WFIL-TV Philadelphia, and Arthur Borowsky, TAP head.

Mr. R. E. Chapman
Radio Station WKY
Box 8668
Oklahoma City 14, Oklahoma

Dear Bob:

It is gratifying to see WKY climbing higher and higher on our list of 60 or 70 stations used for Tidy House premium offers. You are now in the upper half of the list and it's a blue chip list of stations.

We are especially pleased because your progress reflects a steady growth in our distribution and sales in Oklahoma.

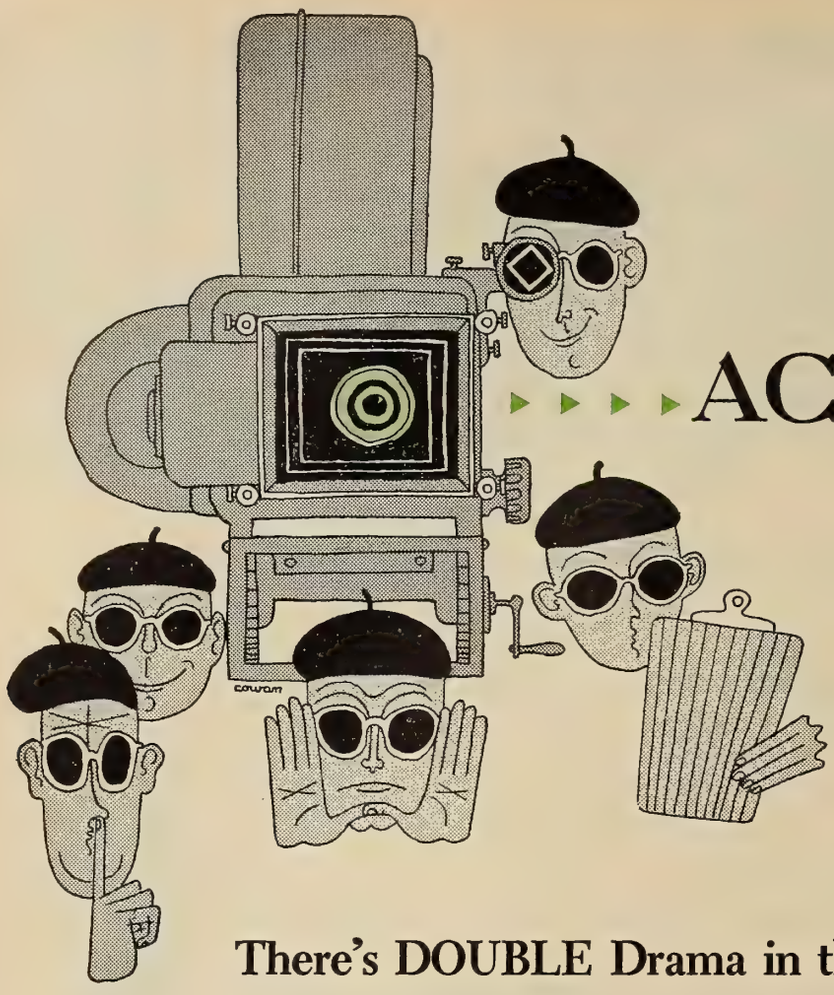
here's why!

A couple of years ago, after unsuccessfully trying various ways of cracking the Oklahoma market, it was often said at our conferences that Oklahoma was impossible.

Then we put the Kitchen Club show on WKY and today everybody is happy. Either we have a wonderful show or WKY is a wonderful station. Let's assume both are true.

Incidentally, we are delighted with the excellent cooperation you have given us in merchandising our schedule and in working with our salesmen. WKY is one of our favorite stations.

Cordially yours,



BUCHANAN-THOMAS ADVERTISING CO.

IKE NAMES DOERFER TO FCC TO COMPLETE MERRILL TERM

Wisconsin Public Service Commission head nominated in first step toward GOP reorganization. He could become new Chairman after his Senate confirmation, but Hyde is running strong. Doerfer, 48, is lawyer, accountant, economist and is labelled a free enterpriser. He originally was slated for the Federal Power Commission.

PRESIDENT EISENHOWER last Friday broke his official silence on the FCC and moved a notch closer to GOP reorganization of that regulatory agency with the naming of John C. Doerfer, 48, chairman of the Wisconsin Public Service Commission to succeed Eugene H. Merrill, Utah Democrat. Under the appointment, Mr. Doerfer would serve until July 1, 1954. He is mentioned as a possibility for new Chairman.

Mr. Doerfer's appointment came two days after he had conferred at the White House in an unlisted appointment with President Eisenhower and chief presidential assistant, Sherman Adams. He previously had conferred with Wesley Roberts, Republican National Committee Chairman. Mr. Doerfer told B•T that he was pleased with the appointment.

"I am willing to serve and I hope I shall be a credit to the country and to my state of Wisconsin," he said.

Whether Mr. Doerfer will be named Chairman is conjectural. In his telephone conversation from Madison with B•T Mr. Doerfer said he would "just as well not discuss that."

The fact that Mr. Eisenhower did not simultaneously announce the elevation of Rosel H. Hyde to the chairmanship is regarded as possibly significant. Presumably, also, the White House did not consult Mr. Hyde on the Doerfer appointment. It is known, however, that Mr. Hyde recommended the appointment of an attorney to at least one of the posts.

Walker's Tenure

That the White House is having trouble on the termination of the tenure of Democratic Chairman Paul A. Walker, also is apparent. Mr. Walker's present term expires next June 30. But the President can end it by rescinding the executive order issued by President Truman permitting Mr. Walker to serve beyond the retirement age of 70. Mr. Walker conferred with Mr. Adams on March 13, and reportedly was asked to submit his resignation, which he has not done. Replying to reports last Friday that he had already resigned, Mr. Walker said emphatically: "I have not resigned and I have no intention of doing so."

The Doerfer appointment does not necessarily mean that the GOP advocates of a "clean sweep" have won out, although that interpretation is possible. The only opposition to Mr. Hyde's promotion has come from those who have urged a "new broom" to clean out hangover New Dealers and Fair Dealers from the non-technical ranks.

Talk about "drafting" of former Comr. Robert F. Jones to do a quick reorganization job has subsided.

Mr. Doerfer was described by those who have worked with him in the public utility field as a firm believer in free enterprise. He is a student of economic affairs and has an excellent reputation for character and integrity. Mr. Doerfer said he was fully aware of the problems which confronted the FCC. He was instrumental in reorganizing the Wisconsin Commission following his appointment to the chairmanship. That Commission is regarded as one of the strongest state regulatory bodies in the country.

His appointment restores mid-western representation to the FCC. While Mr. Doerfer was named to fill the unexpired portion of the original Jones term, it was expected that he reached an agreement at the White House on appointment for a full seven-year term from 1954.

Under the President's action, Mr. Merrill's term automatically expired with the withdrawal of his nomination. He is a recess appointee, qualified to hold office only until the President declared his intentions.

Mr. Doerfer's nomination was submitted to the Senate and promptly referred to the Interstate & Foreign Commerce Committee. Under customary procedure, the nominee will be called to testify before the committee. His confirmation by the Senate is expected. He would not be eligible for appointment to the chairmanship until he had qualified as a Commissioner. At the Senate committee it was stated that probably a week or 10 days would elapse before a hearing is set.

Mr. Doerfer is a native of Wisconsin. While he said his political status is that of an Independent, he was appointed as a Republican and has actively supported the Republican ticket. He was endorsed for the FCC post by Gov. Kohler of Wisconsin and by Sen. Wiley.

Mr. Doerfer originally was considered for appointment to the Federal Power Commission and until a couple of weeks ago that appointment was believed imminent. There was no official explanation for the sudden switch.

A graduate of the U. of Wisconsin, with a B.A. degree in commerce, and of the U. of Marquette with a J. D. (law degree), Mr. Doerfer engaged in private practice in Milwaukee from 1934 until 1940 when he was elected city attorney of West Allis, a suburb of Milwaukee. He specialized in public utility cases before the Wisconsin Commission and was appointed to that commission as chairman in 1949 by Governor Rennebohm for a six-year term. Between 1928 and 1934 he engaged in accounting practice in West Allis for a number of industrial firms.

Mrs. Doerfer, the former Ida M. Page, was born in Vermont but was raised in Wisconsin. They have two sons, 13 and 15.

Reports had been current that the Administration desired at least one new Commissioner with a public utility background to provide the FCC with experience in that sphere upon the anticipated retirement of Mr. Walker.

With the Doerfer appointment, the political balance of the FCC will be three Republicans (Hyde, Sterling, Doerfer); three Democrats (Walker, Hennock, Bartley) and Webster, Independent. It is believed that on reorganization matters, Mr. Webster would vote with the Republican majority.

Screening Goes Forward

Meanwhile, customary screening of candidates for the one remaining vacancy is going forward. It is known that Mr. Hyde has been investigated recently by the FBI, presumably for the chairmanship. Charles Garland, KOOL Phoenix, general manager, also has been thoroughly investigated, it is reported.

In addition to Mr. Doerfer, among those with a public utility background who have been endorsed are Jerome K. Kuykendall, chairman of the Washington (state) Public Service Commission and William Speare, former AT&T attorney, who has been practicing law in Fremont, Neb.

Many other persons—some well known, others hardly at all—have received some political and industry endorsements for FCC posts. Among these are Lewis Allen Weiss, former chairman of Mutual and of Don Lee, who has native California backing; J. Paull Marshall, 42-year-old attorney and a member of the Maryland Assembly; Lyman Smith, 35-year-old district attorney of Penn Yan, N. Y.; Fred Palmer, midwest radio consultant; Edward J. Scheuffler, Kansas City attorney, and Walter Johnson of Virginia, former FCC attorney now commonwealth's attorney in Northumberland County.

'DELAYING' CHARGE DENIED BY WOPI

POINTING out that its application for Bristol, Tenn., vhf Ch. 5 had been filed five months before the FCC reached that city in its processing line, WOPI last week denied charges of rival WCYB Bristol, Va., that the WOPI application was filed for delaying purposes.

The "not in good faith" charges had been made in a petition filed a fortnight ago by Appalachian Broadcasting Corp. (WCYB) requesting a conditional grant pending the outcome of the comparative hearing [B•T, March 9].

W. A. Wilson, president, general manager and 100% stockholder of WOPI, filed an opposition to the WCYB petition containing affidavits which, he said, would "conclusively

Text of Friday's White House Announcement

March 20, 1953

THE WHITE HOUSE
THE PRESIDENT TODAY SENT TO THE SENATE FOR CONFIRMATION THE NOMINATION OF:

John C. Doerfer, of West Allis, Wisconsin, as member of the Federal Communications Commission, to fill the unexpired portion of the term of Eugene H. Merrill, of Utah, whose nomination was withdrawn today. Mr. Doerfer's term runs until July 1, 1954.

Mr. Merrill holds a recess Commission. His nomination was submitted to the Senate on January 9, 1953.

Mr. Doerfer has been Chairman of the Wisconsin Public Service Commission since July 1949. Mr. Doerfer is 48 years old. He is a graduate of the University of Wisconsin and Marquette University Law School. He was admitted to the Bar of Wisconsin in 1934.

In 1940 he was elected City Attorney of West Allis and was subsequently elected for two additional terms. While City Attorney he handled Public Utility rate cases before the Wisconsin Commission and was appointed to the Commission in 1949 by Governor Rennebohm. He was subsequently elected Chairman by the members.

The Early Birds—circa 1933

Over 7000 Consecutive Performances

The EARLY BIRDS

WFAA-TEXAS

7:15 to 8 AM DAILY

S.R.O.

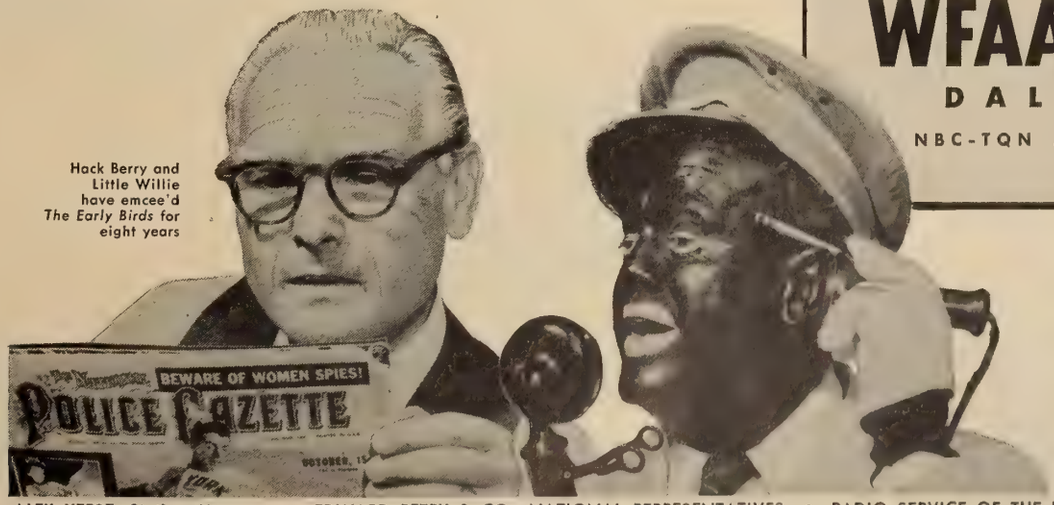
WITH 2327 performances *Abie's Irish Rose* set a record continuous run on Broadway.

March 24th *The Early Birds* of WFAA will begin their 24th year — their 7,305th consecutive broadcast of this comedy-variety breakfast show, 45 minutes a day, six days a week until last September when Sunday was added.

Project *The Birds'* performances into audience, multiplied by the immensity of this station's coverage and the high rating of this program (7.1 Pulse Dec.-Jan. '52, only exceeded in this market by WFAA's 8 A.M. newscast) . . . and you've an immense figure.

But no digits reveal *The Birds'* hold upon this large segment of life, nor the inbred morning ritual of clicking on *The Early Birds* and the breakfast coffee pot — except perhaps the sales figures of *The Birds'* sponsors — so convincingly as these advertisers' fixed hold upon their time . . . or the hopeful line in waiting.

SPONSORS SAY . . .



"We are beginning our 4th year with *The Early Birds*. A lot of credit is due them for the increase in our grocery products each year."
MORTON FOODS: O. C. Turner, *Vice Pres.*

"We will soon enter our 5th year on this venerable show. That we've grown to be the Southwest's leading Chevrolet Truck dealer is assuredly due in part to this fine group."
EARL HAYES CHEVROLET CO.: Earl F. Hayes

"While we had to wait three years to get on *The Early Birds* to advertise Aunt Jemima Flour, we have been well pleased with the results."

DALLAS

NBC-TQN AFFILIATE

ALEX KEESE, Station Manager • EDWARD PETRY & CO., NATIONAL REPRESENTATIVES • RADIO SERVICE OF THE DALLAS MORNING NEWS

show that the allegations are unwarranted, misleading, unfair and false." Mr. Wilson is also executive vice president of Tri-Cities Television Corp., now applicant for the disputed channel (See "Amended Application," Actions of the FCC, FOR THE RECORD).

Mr. Wilson said that the "strike" charges of Mr. Smith are "completely at variance with my record of pioneering AM, FM and television in Bristol."

In deferring the filing of his application until four and one-half months after the WCYB bid, Mr. Wilson said he "did so in response to the Commission's oft-repeated request that the filing of applications be postponed pending a final determination of the rule, standards and assignments. My application was on file more than five months prior to the time the Commission reached Bristol in its processing line."

To the charge that WOPI deliberately misrepresented the facts as to its financial ability to construct the proposed station, he pointed to the WOPI application, which "showed an estimated cost of construction of $318,756, to be financed by $200,000 in new capital, deferred credit of $200,000 and $36,361.79 in existing capital. The sum of $36,361.79 was the difference between WOPI's net worth of $116,361.79 and the sum of $80,000 by which the current assets would be reduced upon acquisition by the corporation of 95½ shares of stock then owned by C. J. Harkrader." The $200,000 new capital, he stated, "was to be supplied by C. P. Edwards Jr.," and the $200,000 in deferred payments was "an estimate of the balance due on the usual equipment contracts for installment purchases calling for one-third down payment."

Three Hours With Ike

COMPLETE silence was maintained by the usually ebullient Earl H. Gammons, CBS Washington vice president, after he had played 18 holes with fellow club member Dwight D. Eisenhower at Burning Tree in suburban Washington, March 14. Mr. Gammons did reveal that he shot an 86 but could not recall the President's score. He did mumble something about "collecting" after the match. Others in the foursome were James Black, Washington representative of Republic Steel, General Ike's partner, and Charles Murchison, attorney. The president suffered from a cold and was described as off his usual game.

The WOPI president stated that "the omission of reference to the bankruptcy proceeding was an unintended inadvertence." He said that the Commission has long since been fully informed of the bankruptcy proceedings.

Mr. Wilson defended his activities connected with Tri-Cities Television Corporation, which the WCYB petition claimed proved that the WOPI application was kept on file for the "sole purpose of preventing a grant to WCYB." The WOPI application stated that in the event of a grant, "there would be two stockholders in WOPI-TV, C. P. Edwards Jr. of Kingsport, Tenn. and myself," each of whom would own 50% of the stock.

Concerning the allegation by Mr. Smith that Mr. Wilson "abused Commission procedures" on two different occasions, the affidavit filed in reply last week stated that "I have never sought to misuse the Commission's procedures in pursuit of my own interest in any manner or form." He replied categorically to the two instances cited: (1) Regarding the request "for emergency authorization to utilize operators with restricted licenses for a period of 90 days, my engineering staff was about to be reduced to two persons through a notice of resignation given me by an employe and substitute first-call operators were not available to my knowledge."

In the second instance, Mr. Wilson stated that he does "not recall the alleged circumstances described by Smith with relation to dismissal of the WOPI application for 550 kc in 1946. I have examined my files and have not found a copy of the alleged letter to which reference is made. I affirm that I have never filed an application with the FCC other than in good faith with the purpose of having the application granted."

Theatre TV Rebuts AT&T Opposition to Carrier Request

THEATRE TV interests rebutted AT&T opposition to their request for permission to establish a limited common carrier for theatre TV transmissions [B•T, March 2] in a reply filed with the FCC last week.

In answer, theatre TV proponents claimed their proposals would not be preferential, and that they were prepared to go ahead on the original request for exclusive theatre TV frequencies. They emphasized that it was essential for FCC to declare officially that AT&T must interconnect with any common carrier set up to furnish theatre TV service.

Wingspread: 235,000 watts

'PARTY IN INTEREST' QUESTION MAY CHALLENGE PROTEST RIGHTS

FCC and Justice Dept. apparently do not agree as to what constitutes an interested party. Question comes up in case involving WGRD and Versluis. Attorney General wants more time for study.

FATEFUL interpretation of what constitutes a "party in interest"—which might open wide the right of protesting FCC broadcast station grants—appeared in the making last week.

Oral argument in the U. S. Court of Appeals in Washington on the case of WGRD Grand Rapids vs. Versluis Radio & Television Co. was postponed to March 30 after the Dept. of Justice said the Attorney General wanted to consider more carefully what its position should be. The case originally was scheduled to be argued March 19.

Intimations were that the FCC and the Justice Dept. did not see eye-to-eye on what constitutes an interested party.

WGRD Protest Dismissed

The Commission had already turned down WGRD, when it protested a uhf Ch. 35 grant to the Versluis applicant in Muskegon, Mich. The dismissal of the protest was based on the ground that WGRD had no standing as a "party in interest."

WGRD appealed the dismissal to the Court of Appeals, averring that the economic hurt it might suffer from the Muskegon TV grantee was sufficient to give it standing. One of its allegations was that the Versluis TV operation covers both Muskegon and Grand Rapids. WGRD also alleged that Versluis, which also owns WLAV-AM-FM in Grand Rapids, would offer combination AM-FM-TV rates, to the financial detriment of WGRD. According to the historic Sanders case this gives it standing, WGRD claimed.

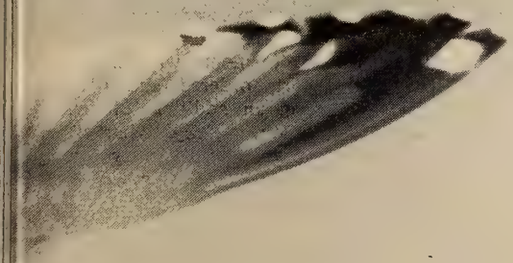
A plea for a stay order was turned down earlier this month by the Court of Appeals, although it asked that the status quo be maintained [B•T, March 9].

Liberal Attitude Seen

Uncertainty regarding the Justice Dept.'s position was pronounced at the FCC after the postponement request. A more liberal attitude toward interpreting the "parties in interest" clause of the Communications Act was seen in the making. To some observers, this seemed to follow the Justice Dept.'s position in the Transit Riders Inc. case, now before the same Court of Appeals. In that case—in which a group of citizens opposed to transitcasting on Washington buses and streetcars are appealing the dismissal of their protest to the FCC against the license renewal of local transit station WWDC-FM—the Justice Dept. approved the contention that Transit Riders was entitled to be considered a "party in interest." The FCC argued the opposite.

Music Broadcasting Co., licensee of WGRD, first opposed the TV grant to Versluis on the ground that Leonard A. Versluis, president and owner of the company bearing his name, (1) was trafficking in licenses, (2) showed financial discrepancies, and (3) proposed a transmitter site too near Grand Rapids to make the station a Muskegon station. This request for a hearing on the Versluis application was denied by the FCC [B•T, Dec. 29, Sept. 22, 1952].

The reference to trafficking in licenses was based, WGRD said, on the fact that Mr. Versluis sold WLAV-TV Grand Rapids to WOOD there and made a $1 million "profit."



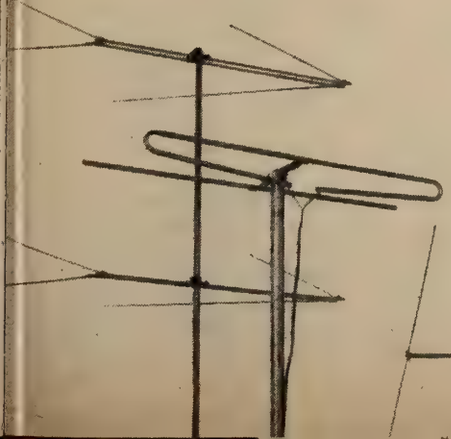
Uses Same Objections

Following the grant to Mr. Versluis of his Muskegon application, WGRD protested, using the same objections. The Commission dismissed this early last month, on the ground that the Grand Rapids station had no standing [B•T, Feb. 9]. Comr. Frieda B. Hennock dissented.

WGRD then appealed to the Court of Appeals against the dismissal of its protest, citing the possible economic injury which it might suffer [B•T, March 2].

Music Broadcasting Co. is an applicant for uhf Ch. 23 in Grand Rapids. It is opposed by W. S. Butterfield Theatres Inc.

WLAV-TV was sold to the Harry Bitner interests in 1951 for $1,382,086. Station began operating in 1949.



You'll be seeing a lot of this soaring gull. *And so will more than a million Texans.* For it is the symbol of KGUL-TV, which takes to the air today to cover the new Texas Gold Coast.

First high-power TV station in the Southwest, KGUL-TV wings across a great area of six cities (Galveston, Houston, Baytown, Texas City, Freeport, Alvin) and six dozen smaller communities—*combined, the 15th-largest metropolitan area in the U.S.*

Its powerful picture brings into range 1,176,900 people who are among the nation's richest (earning almost $2,000,000,000 a year) and fastest-growing (with 50,000 newcomers in '52).

And when you add KGUL-TV's high-flying showmanship—both CBS Television and Texas-style—it's a sales-powerful picture, too. CBS Television Spot Sales will be happy to fill in the details for you.

WLEX CHARGES WVLK WITH FALSE CLAIMS

COMPLAINT charging WVLK Lexington, Ky., with "improper conduct" making its operation other than in the public interest, convenience and necessity was filed with FCC Tuesday by WLEX Lexington, which also began court hearings Wednesday charging the competitive outlet with "fraudulent and false" advertising.

Both actions are believed unprecedented. FCC, according to Frank Fletcher, Washington attorney representing WLEX and Central Kentucky Broadcasting Co., licensee, is empowered to revoke a license or call for the station's petition for license renewal, before the normal expiration date. Latter action would permit complaining arguments by WLEX.

The civil action, which continued Friday in Fayette County Circuit Court, was brought a fortnight ago when WLEX gained a temporary restraining order forbidding further use of the advertising material it claims is "fraudulent and false." Court hearings last week involved a plea for a permanent injunction to be followed by introduction of a $55,000 damage suit against WVLK, the amount allegedly lost by WLEX as a result of the advertising and "unfair competition," WLEX said.

Controversy centers on a series of maps, used in local newspaper advertisements, a mailing piece and sales brochures, which the plaintiff charges were "calculated" misstatements of fact, and promotion based on a Hooperating report sold to WVLK by C. E. Hooper Inc. Complaint alleges different "yardsticks" were used to compare coverage maps of WVLK and those of the competition, with the comparison "loaded" in favor of WVLK.

Hooperating 'Misused'

The Hooper report was misused, according to testimony Thursday. The standard average rating for 8 a.m. to noon was amplified in a special report, ordered and paid for by WVLK, covering an additional hour, from 7 a.m. until noon, WLEX charges. The WVLK combined average rating for the five hours surveyed, the plaintiff charges, was weighted against combined ratings of the competition for only a four-hour period. This was backed in testimony Thursday afternoon by J. D. Horton, WVLK general manager, called as an "adverse" witness by WLEX lawyers.

Mr. Horton acknowledged correspondence with Hooper officials, who reportedly had cautioned the station management to use the extra data only in local and not in national promotion. The Hooper report involved the October-November 1952 period, and the exchange of letters began in January.

Gilmore Nunn, president of WLAP Lexington, who has no direct interest in the case, substantiated testimony of J. D. Gay Jr., president of the WLEX licensee, adding that the maps were "misleading and apparently calculatingly so."

Mr. Gay's charge that WVLK's coverage maps deliberately "cut down" coverage of other stations in the area was supported by a radio engineer. In a sworn deposition, another engineer reported he had made the coverage maps on a "theoretical" basis, and had told WVLK management not to release or use them in promotion, since they misrepresented the facts.

Understood to be standing by for WVLK testimony was Howard Head, partner in A. D. Ring and Co., Washington consulting engineering firm. Local attorneys are James Park and Frank Trimble for WVLK and William E. Gess for WLEX.

TY-FOUR HOURS A DAY • SEVEN DAYS A WEEK

HOUSE GROUP SETS COLOR TV PROBE

Rep. Wolverton's House Commerce Committee will hear witnesses beginning Tuesday on color TV status. Senate Commerce group, headed by Sen. Tobey, intends to continue its own color probe.

IS color TV ready, or isn't it? If it is, why is no one making sets?

Answers to these questions are the primary concern of the House Interstate & Foreign Commerce Committee which tomorrow (Tuesday) begins hearings in Washington on the status of color television.

Hearings are scheduled March 24-27, Rep. Charles A. Wolverton (R-N. J.), chairman, said Thursday.

Dates and a list of witnesses quickly followed Rep. Wolverton's announcement March 13 that the committee will investigate the color situation [AT DEADLINE, March 16].

Lead-off witness is to be E. W. Engstrom, RCA Labs. vice president. The next day is reserved for Frank Stanton, CBS president. Scheduled March 26: Richard Hodgson, president, Chromatic Television Labs. (half-owned by Paramount Pictures Corp.); Dr. E. O. Lawrence, U. of California Radiation Lab. director and inventor of the Lawrence tri-color tube which Chromatic Television Labs. is licensed to manufacture; Dr. Allen B. DuMont, president of Allen B. DuMont Labs. On March 27: Dr. W. R. G. Baker, vice president in charge of GE's Electronics Division and chairman National Television System Committee.

After the sessions, the committee on March 30-31 is scheduled to attend color television demonstrations in New York by RCA, CBS and Chromatic Television Labs.

Subsequently, the House committee will ask FCC and National Production Authority officials to appear.

Rep. Wolverton, who represents the 1st Congressional District in New Jersey (Camden), also announced he has asked NPA to rescind its ban (M-90) on mass production of color receivers. This has been under consideration the last few weeks, an NPA spokesman said.

Tobey Investigation

Capitol Hill heat on color TV began two weeks ago when Sen. Edwin C. Johnson (D-Colo.) asked Sen. Charles W. Tobey (R-N. H.) to hold a Senate Commerce Committee hearing on whether a conspiracy exists to hold back manufacture of color receivers until the market is saturated with black-and-white sets [B•T, March 16]. Sen. Tobey agreed to do so.

Sen. Johnson is former chairman and Sen. Tobey present chairman of that Senate committee.

Earlier the Senate group had begun investigating the color question, with inquiries going to FCC and NTSC.

Sen. Johnson last week said he was "pleased" with the House committee's move setting hearings. He added: "All I want is information, and if the House committee gets it, that's all right with me. I think they'll strike pay dirt."

The Colorado senator, who took an active interest in the FCC color hearings in 1949 and 1950, expressed a "strong conviction" polychrome television is "right around the corner." He said his suspicions were aroused at a statement attributed to Dr. Baker saying color TV was not imminent, and another by Dr. Alfred N. Goldsmith, consultant to RCA, and others that RCA and NBC planned to saturate the market first with black and white sets, then color and finally tri-dimensional receivers. Last week, in a letter to the trade publication which carried the original story, Dr. Goldsmith denied the statement.

Sen. Johnson said he has "other evidence" he did "not care to talk about."

The Senate committee will continue its study of color TV no matter what the House does, Sen. Tobey told B•T last week. He said he had heard from Dr. Baker, but not from FCC. "They're a little late aren't they?" he said.

Sen. Tobey said he was not satisfied with Dr. Baker's answer to his letter Feb. 20. He said he intended to write another letter to the NTSC chairman. "I have some more questions to ask him," he said.

Dr. Baker answered Sen. Tobey's inquiries on color TV March 6. Sen. Tobey had asked whether manufacturers were going to make color receivers for the CBS system or the NTSC system and, if not, why.

NTSC has made "great strides," Dr. Baker replied, but said he would defer a definite answer until results of field tests (which began last week) were studied.

Dr. Baker said he was referring copies of the Senator's letter and his reply to manufacturing members of NTSC, suggesting they give answers.

As far as could be learned, none other than Dr. Baker (for GE) had informed the Senator of plans for manufacture of color receivers.

It was understood Dr. Baker said GE could produce field sequential receivers almost immediately upon demand for them. However, no work has been done in setting up production lines for NTSC sets, he said.

NTSC was established by manufacturers after the 1950 FCC color decision authorizing the CBS-sponsored field sequential method to develop a compatible color system—one that could be received on existing black and white sets in monochrome without an adapter. The CBS system requires an adapter to receive colorcasts in monochrome.

Only direct reply to Sen. Johnson's accusation that a conspiracy exists to retard color TV was from Brig. Gen. David Sarnoff, RCA board chairman. He said RCA would, after the current field tests of the NTSC standards, petition the FCC to substitute the compatible system for the field-sequential method.

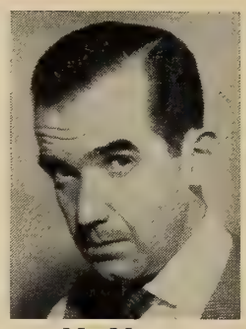
Jackson Scores Critics

RADIO and television commentators were not spared last week when Rep. Donald L. Jackson (R-Calif.) lashed out at detractors of Rep. Harold H. Velde (R-Ill.), chairman of the House Un-American Activities Committee.

In his address to the House, Rep. Jackson said in part:

It has become the smart thing for certain newspapers and reporters, radio commentators and television performers to seize upon every opportunity to deride the Congress, to fulminate and fuss over its conduct, to attack personally the motives and methods of its members, and to generally hold up to public ridicule the elected representatives of 150 million Americans.

Rep. Velde most recently has been under attack for allegedly saying that the House Un-American Activities Committee would investigate clergymen. Rep. Jackson read a transcript of the MBS *Reporters Roundup* program on which the alleged statement was made.



Voice Set-Up Needed, Senate Group Is Told

Dr. Compton, NARTB's Miller, May of Yale and NBC's Montgomery agree that VOA is essential.

CONTINUE the Voice of America, the only means the U. S. has to get behind the Iron Curtain, but revise overseas information policy.

This was the recommendation of Dr. Wilson Compton, former administrator of the International Information Administration; Justin Miller, NARTB chairman and general counsel and member of the U. S. Advisory Commission on Information; Mark A. May, Yale U. professor and chairman of the Advisory Commission, and Robert Montgomery, actor and TV drama producer. They appeared during the last two weeks before a Senate Foreign Relations subcommittee, headed by Sen. Bourke B. Hickenlooper (R-Iowa), which is investigating the overseas information service.

Scheduled to be heard next week are CBS news commentator Edward R. Murrow, former Assistant Secretary of State for Public Affairs Edward W. Barrett, *Saturday Evening Post* editor Ben Hibbs, and U. of Chicago Professor George Probst.

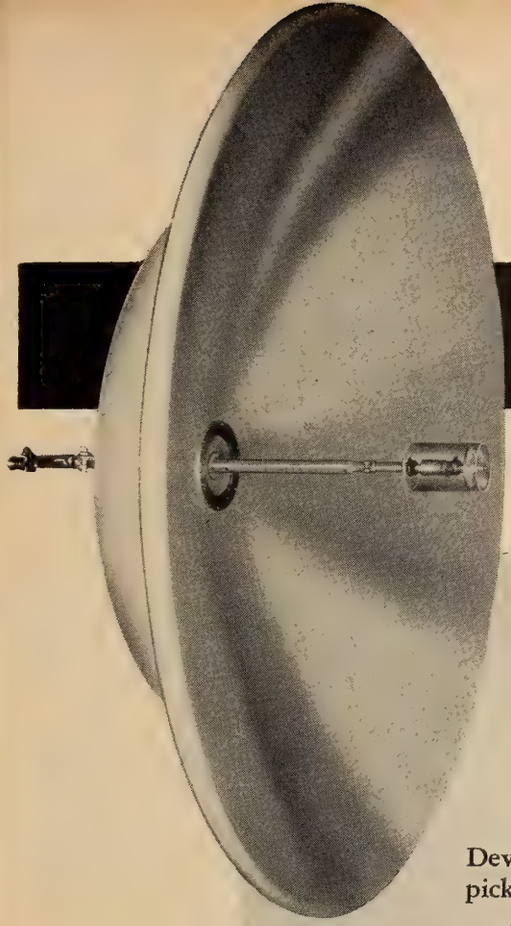
Mr. Murrow

Mr. Miller, appearing Wednesday in Washington, made five recommendations to the group:

(1) The information service should be a permanent operation. (2) It must be set up independent of the State Dept. (3) Liaison with Congress should be accomplished by establishment of a continuing joint Congressional committee. (4) The operation should be an independent agency, with a cabinet-level chief. (5) Operation of the service in foreign countries must be headed by a single person, responsible to the ambassador.

Essential weakness of the Voice, Mr. Miller said, is that it is headquartered in New York, with programs "hatched in the brains of a group of intellectuals . . . trained for service in the State Dept., translated into 40 languages by a group of dispossessed people, and broadcast indiscriminately to all nations."

Seeks Local Emphasis



Mr. Miller urged "closest possible collaboration with local people," and use of local facilities (including radio, television, newspapers, magazines, etc.).

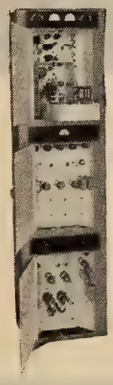
Because the Voice is the "only means" for getting behind the Iron Curtain, Mr. Miller suggested transmissions be made from bases in countries near Russia and not by short wave.

Dr. Compton said siting of the Baker West short wave transmitter near Seattle, Wash., was justified.

Abolition of the Voice as it is now organized, with complete replacement of personnel, policies and structure, was advocated by Sen. Robert A. Taft of Ohio, who appeared on CBS-TV's *Man of the Week* March 15.

He asserted it would be his personal recommendation to "fire the whole Voice set up" and start "from scratch." Although he had not made up his mind finally on VOA matters, Mr. Taft said he believed the agency should confine itself to straight presentation of news rather than dissemination of propaganda.

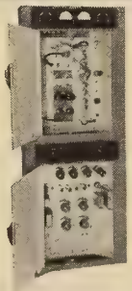
the TOP choice for TV . . .



Federal's FTL-27C

MICROWAVE RELAY LINK

. . . the most widely accepted system for the relaying of video signals



Developed specifically for studio-transmitter links, inter-city relays and remote pick-up service, Federal's FTL-27C provides design features of the highest order.

Among these outstanding features are: Automatic unattended operation . . . immediate on-air operation . . . self-contained test circuits . . . and numerous other facilities for *dependable* operation and *simplified* maintenance.

TRANSMITTER

- Direct frequency modulated
- Reflex klystron power oscillator
- 5 watts *minimum* power output
- Crystal controlled
- Built-in wavemeter, r-f power measuring devices and local monitoring facilities
- Internal receiver for off-air monitoring

RECEIVER

- Single superheterodyne type
- Crystal controlled
- Double tuned preselector
- Wide frequency response
- High signal to noise ratio
- Constant video level over wide range of input signals

INSTALLATION

- Circular parabolic antenna for both receiver and transmitter
- Antenna may be ground-mounted for use with tower-mounted reflectors
- Provides stable klystron operation and simplifies maintenance
- Reduces transmission line costs

SOUND CHANNEL

- Exclusive FTL development
- Allows simultaneous transmission of audio and video over TV link
- Eliminates need for leasing high-quality telephone lines
- Fully self-contained

Wiley Backs Commercial TV Allocation for Milwaukee

SEN. Alexander Wiley (R-Wis.) has entered a fight for the allocation of more commercial TV channels in Milwaukee by pledging his full support.

Sen. Wiley promised the Mayor's Advisory Council of that city he would do everything he could toward that end and lauded it for its "clear and unequivocal record regarding educational television." The council has gone on record in opposition to the grant of reserved vhf Ch. 10 to the Milwaukee Board of Vocational and Adult Education for educational use.

Enclosing recent correspondence between himself and FCC Chairman Paul A. Walker, Sen. Wiley wrote the council:

"I share your desire for educational and cultural programs, but I believe that they can be provided by commercial stations. Regardless of the ultimate decision by the FCC, one thing is clear and that is that Milwaukee is entitled to get more commercial television immediately."

WISN Milwaukee has asked the Commission to remove Ch. 10 from the educational category and assign it to WISN for commercial purposes. Oral argument was held on the Hearst Corp. station's petition last month [B•T, Feb. 23]. A second commercial TV outlet, WCAN-TV, has been assigned uhf Ch. 25 and hopes to begin operation this summer.

Jarman Submits Measure To Permit Radio-TV on Hill

MOVE to permit radio and television coverage of Congress received another supporter last week when Rep. John Jarman (D-Okla.) introduced H Res 177 to amend Rule 34 of the Rules of the House of Representatives to permit radio and TV reporters to broadcast debates and proceedings of Congress.

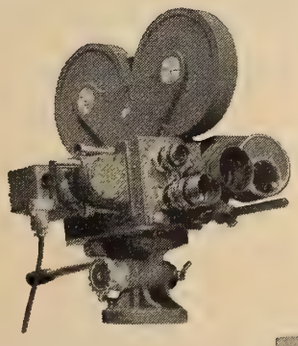
The recommendation would specifically set aside necessary portions of the gallery for that purpose. Supervision would continue to be exercised by the House Radio-TV Gallery.

The bill, which was referred to the Rules Committee, would authorize the admittance of one representative each of NBC, ABC, CBS, MBS and DuMont as well as representatives of other broadcasters.

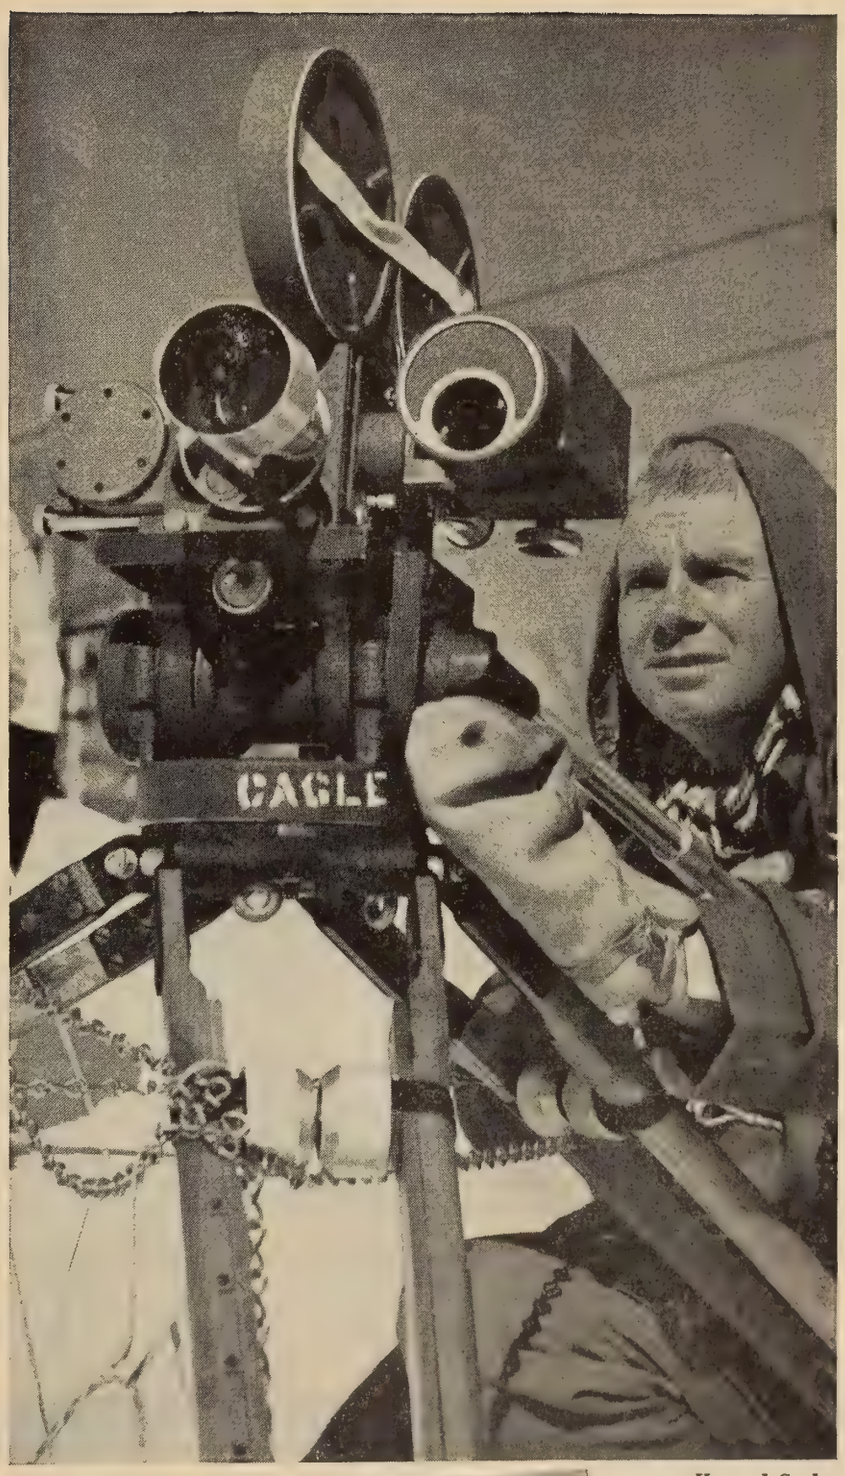
Rep. Jarman's bill is virtually a duplicate of that presented in the 82d Congress by Rep. Jacob K. Javits (R-N. Y.). That was H Res 62, submitted during the first session of the last Congress, also submitted to the Rules Committee where no action was taken. In this Congress, Rep. Javits is the author of HR 2109 to permit radio and television coverage of House committee hearings, and also providing rules of conduct for the protection of witnesses whose appearances are to be broadcast [B•T, Feb. 2].

FCC Approves KOIL Sale

FCC last week granted consent for transfer of control of KOIL Omaha, licensed to Central States Broadcasting Co., in a sale of all 1,000 shares of stock for $189,275 from Stuart Investment Co. to Nebraska Rural Radio Assn. Principals of the transferee, which is licensee of KRVN Lexington, Neb., are Jay A. Person, president; Carl Kjar, vice president, and Max Brown, secretary-treasurer and KRVN manager. The request was filed Dec. 12, 1952 [B•T, Dec. 22, 1952].



from STIFLING CUBAN HEAT



to FRIGID VERMONT COLD.... *all in one week*

"Hot or cold, it's all the same to my Maurer," says Howard Cagle, well-known cinematographer. "From the stifling heat of a Cuban cane field 'burn-off' to a frigid Vermont mountain top one week later — up in the clouds with snow twelve feet deep! Despite the extreme temperatures, my *Maurer* functioned perfectly!"

Top performance under all conditions of light, temperature and humidity — that's what you get with the Maurer "16," choice of the world's top professionals.

MERGED SAN DIEGO, LAS VEGAS BIDS ARE APPROVED BY FCC

Granting bids in major markets, FCC authorized four more CPs. Two of them are merger bids by applicants who chose this procedure rather than face comparative hearings.

RATHER than face lengthy and expensive comparative hearings, competing applicants in two more channel disputes worked out merger plans last week and won prompt construction permits from FCC on Thursday. They were for vhf Ch. 10 at San Diego and vhf Ch. 8 at Las Vegas.

Ch. 10 at San Diego was awarded to Airfan Radio Corp., licensee of KFSD there and owned 99%-plus by Thomas E. Sharp. The competing applications of Charles E. Salik, KCBQ San Diego owner, and of T.B.C. Television Co. were dropped less than a fortnight ago. Mr. Sharp, according to an option plan, will sell one-third of his holdings to Mr. Salik, who plans to dispose of KCBQ, and another one-third to T.B.C. Television.

Mr. Sharp would retain a one-third interest in KFSD-AM-TV and continue as president and chief executive officer of the company. It was estimated that the two-thirds interest, including dollar-for-dollar on net quick assets, would amount to between $900,000 and $1 million, or a total evaluation of about $1.5 million on the properties.

At Las Vegas, Ch. 8 was assigned to Las Vegas Television Inc., controlled by principals in KLAS there. A 5% interest in the new grantee has been transferred to Herman M. Greenspun, publisher of the *Las Vegas Sun* and former competing applicant for Ch. 8.

WIND Uhf Channel

Besides the San Diego and Las Vegas grants, FCC also granted uhf Ch. 20 to WIND Chicago, the second uhf authorization this year to the vhf-filled market, and awarded vhf Ch. 11 to KLIX Twin Falls, Ida. Chairman Paul A. Walker and Comr. Frieda B. Hennock dissented in the KLIX action because of a question of interrelated ownership of other AM, FM and TV stations in Southern Idaho.

Last week's four new permits raises the total of post-thaw TV grants to 314 and the total TV authorizations outstanding to 422.

Synopsis of the grants follows:

Las Vegas, Nev. (City priority Group A-2, No. 209)—Las Vegas Television Inc. (KLAS), granted vhf Ch. 8, effective radiated power 31 kw visual and 16.5 kw aural, antenna height above average terrain 810 ft.

Twin Falls, Ida. (Group A-2, No. 303) — Southern Idaho Broadcasting and Television Co. (KLIX), granted vhf Ch. 11, ERP 32 kw visual and 16 kw aural, antenna 520 ft. Chairman Walker and Comr. Hennock dissenting.

Chicago (Group B-2, No. 167) — Johnson-Kennedy Radio Corp. (WIND), granted uhf Ch. 20, ERP 1,000 kw visual and 500 kw aural, antenna 570 ft. Subject to condition that H. Leslie Atlass give up his 20% interest and sever all connections with grantee. He is vice president - general manager of CBS - owned WBBM-AM-FM-TV there, and heads CBS Central Division.

San Diego, Calif. (Group B-4, No. 190)—Airfan Radio Corp. (KFSD), granted vhf Ch. 10, ERP 316 kw visual and 180 kw aural, antenna 420 ft.

In other TV actions last week, FCC designated for hearing in Washington on April 20 the following TV applications:

San Juan, P. R.—Seeking Ch. 4, Jose Ramon Quinones (WAPA) and American Colonial Broadcasting Corp. (WKVM).

Chattanooga, Tenn.—Seeking Ch. 3, WDOD Broadcasting Corp. (WDOD) and Mountain City Television Inc. (WAPO).

Portsmouth, Ohio—Seeking Ch. 30, Woodruff Inc. (Edward Lamb) and Brush-Moore Newspapers Inc. (WPAY).

The Commission also granted the application of Allen B. DuMont Labs. for authority to deliver teletranscriptions or kinescope recordings of programs telecast in the U. S. on DuMont-owned stations to XELD-TV Matamoros, Mexico-Brownsville, Tex.

FCC dismissed as moot a petition filed in mid-January by WLAN Lancaster, Pa., requesting reconsideration of the Commission's power-boost grants to NBC-owned WNBT (TV) New York and WNBW (TV) Washington, both on Ch. 4. FCC noted it already has made the grants conditional upon the outcome of an appeal by WLAN to the courts respecting the Commission's switch of WGAL-TV Lancaster from Ch. 4 to Ch. 8. FCC has ordered a comparative hearing between WLAN and WGAL-TV respecting Ch. 8, but the proceeding has been continued without date.

In the San Diego Ch. 10 case, all three applicants involved in the merger proposal have been seeking a TV outlet there for more than five years. Mr. Sharp's KFSD, Mr. Salik's KCBQ and T.B.C. Television all were parties to a comparative hearing virtually completed in 1948 but caught by the freeze imposed by the Commission on Sept. 30 of that year. In lifting the freeze on April 14, 1952, FCC dissolved all pre-freeze hearings and required new applications to be filed by everyone.

Mr. Sharp, in Washington last Thursday when the Ch. 10 grant was announced, said the agreement to merge the applications had been reached only 10 days before. He pointed out that the consolidation is designed to give San Diego its second "domestic" television service as expeditiously as possible. It rendered unnecessary the holding of a protracted hearing, he noted, which might have delayed a new service on Ch. 10 for several years.

Now operating in San Diego is KFMB-TV on vhf Ch. 8. Just across the Southern California border at Tiajuana, Mexico, is XETV (TV), newly commenced operating on vhf Ch. 6 and claiming coverage of San Diego and the lower California market.

XETV (TV)'s proposal to program parttime from San Diego has met with formal protest to FCC from KFSD and T.B.C. Television [B•T, March 9]. Alvin George Flanagan, one-time KFMB-TV employe, proposes to package programs in San Diego for XETV and has solicited FCC consent [B•T, Jan. 26].

KFMB-AM-TV has been sold by John A. Kennedy for $3.15 million to Wrather-Alvarez Broadcasting Co., owned equally by Mrs. Helen Alvarez and J. D. Wrather Jr., owners of KOTV (TV) Tulsa and applicants for vhf Ch. 11 at Little Rock [B•T, March 2, Feb. 2]. KFMB is San Diego's CBS outlet.

KFSD Ownership

At present, KFSD-AM-TV is owned 99.55% by Mr. Sharp. Amy Dickson, with KFSD since 1929, is secretary-treasurer and 0.25% owner. A. C. Blecksmith, vice president and assistant secretary, is 0.1% owner. John C. Merino, chief engineer since 1946 and station manager since 1948, is also 0.1% owner.

KFSD is an NBC outlet, assigned 5 kw directional on 600 kc. Paul A. Raymer Co. is national representative. Raymer also is expected to represent KFSD-TV.

Airfan Radio Corp. has issued an outstanding 4,004 shares of common stock, of which 3,990 shares are owned by Mr. Sharp. Following consummation of the merger plan, Mr. Sharp will sell 1,330 shares to Mr. Salik and 1,330 shares to T.B.C. Television. Latter is comprised of some 30 stockholders.

Price for the stock will be $162.18 per share, according to the amended KFSD-TV application, plus an amount per share equal to liquid assets divided by 4,004.

Prior to exercising his option, Mr. Salik plans to dispose of KCBQ, which he individually owns. KCBQ, and ABC affiliate, is assigned 1170 kc with 5 kw day and 1 kw night, directional night.

Following the transfer of 5% interest to competitor Greenspun, Las Vegas Television is now owned as follows: R. G. Jolley, president and 16-2/3%; Frederick G. Stoye, treasurer and 8-1/3%; Las Vegas Broadcasters (KLAS), 25%, and Mr. Greenspun, 5%. Remaining 45% interest is divided among 15 local dealers. Mr. Jolley is president and two-

Of course he's using Soundcraft Recording Tape

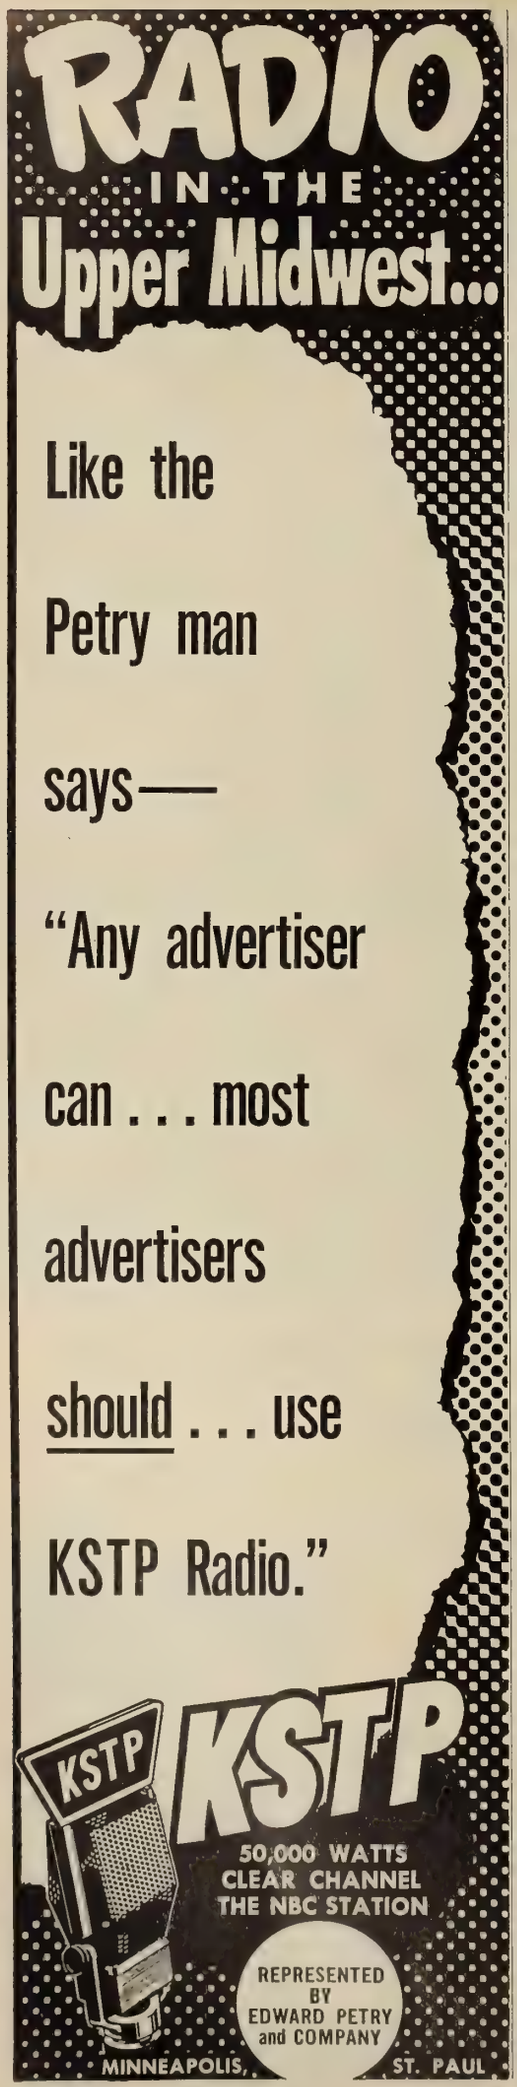
...it's micro-polished*

Perfect reproduction — that's the reason why more and more engineers today demand Soundcraft Professional Recording Tape.

Soundcraft is the only professional tape that is Micro-Polished. The only tape that is polished, buffed and re-polished by a special process to produce a surface that is mirror-smooth, completely free of even the most minute irregularity. The results of Micro-Polishing are apparent to any sound engineer:

Lower distortion
Uniformity of output
Improved high frequency response
Better head contact
Less friction, longer head life

Soundcraft Professional Recording Tape incorporates all the features developed by Soundcraft research engineers during the last two years: **pre-coating** to insure better adhesion, prevent curling and cupping — **dry lubrication** to eliminate squeals. The 7″ reel has the 2¾″ hub, eliminating torque problems and resulting in better timing. All this, plus a splice-free guarantee on all 1200′ and 2500′ reels.



Why settle for less than the best? Next time, insist on Soundcraft Professional Recording Tape. It's Micro-Polished!

thirds owner of KLAS while Mr. Stoye is general manager and one-third owner of KLAS.

FCC conditioned the grant of uhf Ch. 20 to WIND upon H. Leslie Atlass giving up all connection with the station, as proposed in the application. His brother, Ralph Atlass, is president, treasurer and general manager of WIND, but holds no stock interest. H. Leslie Atlass Jr. is WIND program director.

Besides H. Leslie Atlass Sr.'s 20% holding, WIND is owned 39% by Commercial Manager John T. Carey and chewing gum manufacturer P. K. Wrigley and 42% by the *Chicago Daily News*, a Knight newspaper interest.

The earlier uhf grant to Chicago was the assignment of Ch. 26 to WHFC there, owned chiefly by Rep. Richard W. Hoffman (R-Ill.) [B•T, Jan. 12].

Southern Idaho Broadcasting, licensee of KLIX and new permittee for Ch. 11 at Twin Falls, is identified with the ownership of new TV stations KGEM-TV Boise (Ch. 9), KIFI-TV Idaho Falls (Ch. 11) and KWIK-TV Pocatello (Ch. 10) as well as their affiliated AM stations and other AM outlets in Idaho and other areas.

Principals in Southern Idaho Broadcasting include: President Frank C. Carman, (12.5%), 25% owner KUTA Salt Lake City and KGEM-AM-TV, 12.5% owner of KIFI and KWIK-AM-TV, and 16.75% owner KOPR Butte, Mont.; Vice President Frank C. McIntyre, KLIX manager; Treasurer James M. Brady, president-general manager of KIFI-AM-TV and 20% owner of J. Robb Brady Trust Co., which is 50% owner of Southern Idaho Broadcasting; David G. Smith (12.5%), 25% owner of KUTA and KGEM-AM-TV; and Grant R. Wrathall (12.5%), consulting engineer, 25% owner of KUTA and KGEM-AM-TV, owner of KPOO San Francisco, 12.5% owner of KLIX-AM-TV, KIFI-AM and KWIK-AM-TV, 16.5% owner of KOPR and 29.8% owner of KULE Ephrata, Wash J. Robb Brady Trust Co., in addition to its 50% holding in KLIX-AM-TV, owns 83% of KIFI-TV and 43% of KWIK-AM-TV and KIFI-AM.

FCC Grants Five AM CPs, Four Facilities Changes

FCC last Thursday granted construction permits for five new AM stations and four facilities changes to four existing stations.

New AM grants were:

Denver, Colo.—Denver Bcstg. Co. Granted 990 kc, 1 kw daytime; condition.

Tallahassee, Fla.—WASP Inc. Granted 1330 kc, 1 kw daytime; condition.

Monroe, Ga.—Walton Bcstg. Co. Granted 1490 kc, 250 w unlimited; condition program tests not to be authorized until WMOC Covington, Ga., begins program tests on another frequency, and will not be licensed until WMOC is licensed on another frequency. (BP-8625).

Columbia, Miss.—Southwestern Bcstg. Co. of Mississippi. Granted 980 kc, 500 w daytime; engineering conditions.

Charleston, Mo.—South Missouri Bcstg. Co. Granted 1350 kc, 500 w daytime; condition that program tests not begin until KREI Farmington, Mo., has ceased operation on 1350 kc and will not be licensed until KREI is licensed on another frequency.

Facilities changes granted last Thursday were:

WSBB New Smyrna Beach, Fla.—Beach Bcstg. Co. Granted modification of license to increase power (1230 kc) from 100 w to 250 w, unlimited time. Engineering conditions.

WAPF McComb, Miss.—Southwestern Bcstg. Co. of Miss. Granted CP to change transmitter, increase power (1010 kc) from 250 w to 1 kw daytime, and make change in antenna system. Engineering condition.

WHYL Carlisle, Pa.—Richard Field Lewis Jr. Granted CP to change frequency from 1380 kc to 960 kc (1 kw daytime). Enginering condition.

WNEL San Juan, P. R.—Station WNEL Corp. Granted CP to change from 860 kc, 5 kw, DA-1 unlimited, to 850 kc, 10 kw, DA-1 unlimited. Engineering conditions include responsibility for installing filter circuits or other equipment as may be necessary in antenna systems of WNEL and WIPR San Juan and WIAC Santurce and any other nearby stations to minimize spurious radiation as well as to prevent cross-modulation due to excessive radiation from WNEL.

HOUSE GETS NEW BROADCAST BILL

Michigan's Rep. Clardy backs measure to make broadcast licenses permanent and eliminate periodic renewal proceedings.

A FRESHMAN Congressman, who flies his own plane and has had dealings with the FCC to operate his plane's radio for the last 20 years, thinks broadcasters ought to have permanent licenses. Rep. Kit Clardy (R-Mich.), 61, who hails from Lansing, is the man with the idea. Last week he introduced HR 3977 to accomplish that end.

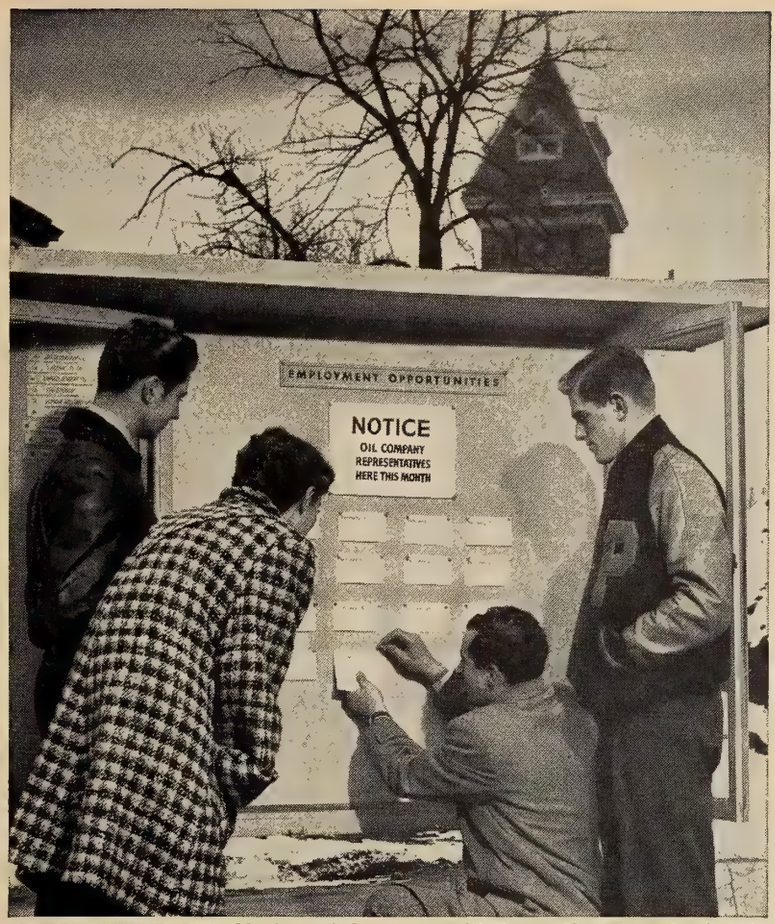
Rep. Clardy's bill would amend Sec. 307 (d) of the Communications Act to place no limitation on the period during which station licenses remain in effect. However, he also recommended amending Sec. 401 of the act to permit the FCC or any "interested person" to seek revocation of a license through civil action in the U. S. District Court for the District of Columbia (Washington).

The amended Sec. 401 would give the Court authority to revoke a license if the licensee: (1) Made false statements, (2) failed to operate in conformance with his license, (3) violated any provision of the Communications Act or any international treaty, or (4) failed to observe any cease and desist order issued by the FCC.

Other portions of Rep. Clardy's bill would amend various provisions of the Act to bring it into conformity with the permanent licensing provisions and the civil suit revocations proceedings recommended.

The bill was referred to the House Commerce Committee.

Aside from Rep. Clardy's experience with the FCC as a holder of an aviation radio license, it is understood that the Michigan Congressman campaigned on a platform to cut down "government bigness." He used the FCC as an example of too much interference with private business, it is understood, and pointed to the short terms of radio licenses as an example of government harassment. He also feels that since railroads and motor carriers get permanent licenses from the Interstate Commerce Commission, there is no reason why broadcasters should not have this stability.



A successful attorney, Rep. Clardy has practiced before the Interstate Commerce Commission on behalf of motor carrier clients.

'Judge, Jury, Executioner'

He believes the FCC should not be "investigator, witness, persecutor, judge, jury and executioner." He was referring, it was obvious, to the Richards case, the protracted renewal proceedings for the three Goodwill Stations.

In the broadcasting field, AM and FM licenses run three years. In TV they run for one year. In other radio fields, licenses run longer—aviation, amateur, ship operators, for example, for five years. All must, however, be renewed by the FCC at the end of that time.

Rep. Clardy noted the law now "gives the Commission the power of life and death over these stations. The case of WJR and its sister stations [Richards case] illustrates how that power can be misused at the behest of groups having an ax to grind. The prohibitive cost in the WJR case illustrates what I mean."

PURDUE UNIVERSITY. Members of the class of '53 look over list of oil company interviewers who'll visit campus during a single month. Oil company representatives search the nation's colleges for seniors who can qualify for a wide variety of technical and non-technical jobs. To get topflight men and women, each oil company must compete successfully with rival oil companies as well as other industries.

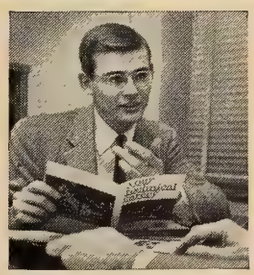
MAN HUNT

Oil Companies Compete for the Class of '53

This month, college students throughout the United States are witnessing a fine example of oil company competition at work—right on the college campus.

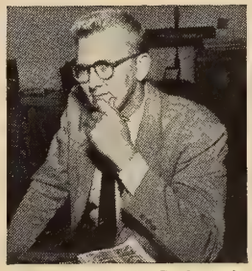
Representatives of many oil companies, large and small, are now competing for thousands of qualified college seniors to fill a wide variety of jobs ranging from research, production and transportation through refining, sales, accounting and office work.

To the Class of '53, this oil company competition for their services means the opportunity to choose a career in a young and progressive industry. And to America's oil companies, in turn, these young people will bring a fresh supply of topflight talent — talent every oil company is looking for to help keep ahead in the tough competitive struggle for your business.



Today, Americans get the world's finest oil products at the world's lowest prices. This is only possible under a system of free competition where privately-managed oil companies have a chance to earn a profit while serving you.

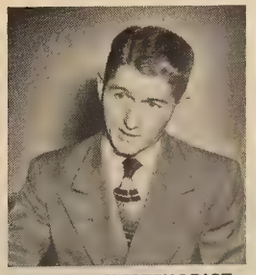
For a free booklet for college and high school students, "Careers in Petroleum," write to Oil Industry Information Committee, American Petroleum Institute, Box 79, 50 West 50th Street, New York 20, N. Y.



HERE ARE A FEW OF THE HUNDREDS OF COLLEGES WHERE OILMEN SEEK NEW TALENT:

SOUTHERN CALIF. Business major Jim Halverson, son of an oilman, has always wanted a career as an oil company salesman.

CORNELL. Civil engineering major Ron Gebhardt is considering pipeline transport and construction — a vital oil industry branch.



MINNESOTA. Geological engineer Ernest Maki chose job after 7 oil company interviews—sees great opportunities for oil geologists.

M. I. T. Bob Oliver with Doctor of Science, has accepted promising job in research and development for a West Coast Oil Company.

OHIO STATE. Commerce major Mary Uehling is looking for personnel job—will join thousands of young women now in oil industry.

SOUTHERN METHODIST. Korean vet Len Donohoe, electrical engineer, wants to work on electronic gear used in oil exploration.

NOTRE DAME. Interested in labor relations, law senior Bill Roche wants oil company career because he feels industry is stable.

GEORGIA TECH. Basketball captain Pete Silas, a chemical engineer, is talking to 18 oil companies about sales engineering job.

Proposed Grant for Ch. 7 Contested by Denver TV Co.

EXCEPTIONS to Examiner James D. Cunningham's initial decision favoring the grant of TV Ch. 7 to KLZ Denver [B•T, Feb. 9] were filed last week by Denver Television Co., the unsuccessful applicant.

FCC counsel also filed exceptions to two findings in the examiner's report, but stated that there was no objection to the conclusions regarding who deserved the grant.

Denver Television's exceptions were based on two major premises: (1) That KLZ is not legally qualified because it violated the Chain Broadcasting Rules, and (2) even if KLZ were qualified, Denver Television would better serve the public interest.

KLZ's violation of the Chain Broadcasting Rules was alleged to have occurred when the Denver station accepted a CBS affiliation contract containing first refusal rights regarding TV affiliation and programs. This provision, Denver Television asserted, forces KLZ to secure CBS permission before it could use programs of any other network for its prospective TV station. Denver Television also claimed that this clause in the affiliation contract, and a revised agreement, violated the two-year limitation on affiliations.

In arguing that it was better qualified than KLZ to receive the Ch. 7 grant, Denver Television took exception to the examiner's findings regarding KLZ principals Messrs. Harry Huffman, Frank H. Ricketson, Theodore R. Gamble and J. Elroy McCaw. The TV firm referred to motion picture theatre practices engaged in by the first three and what it called "lack of candor" on the part of Mr. McCaw.

Among other points, Denver Television claimed that it was in the interest of diversification that it, not KLZ, receive a TV grant. It asked for oral argument. It is believed the Commission will act expeditiously.

The FCC counsel's objections to the examiner's initial decision concerned the Examiner's conclusions that (1) anti-trust violations occurring in the distant past were not significant, and (2) FCC's policy on diversification of the media of communications applied only to newspapers. FCC Counsel Robert J. Rawson argued that all violations must be considered in a comparative hearing, whether they are recent or past. He also claimed that the Commission's diversification policy covered all media, not only newspapers.

The Denver Ch. 7 TV hearing was the first post-freeze comparative bid scheduled by the FCC. Hearing ran Oct. 1 to 17 in Washington.

KMYR Claims New Evidence

NEW evidence regarding the program practices of KOA Denver was the basis on which KMYR Denver last week asked the FCC to reopen the record in the Denver Ch. 4 TV hearing, which closed Feb. 10.

KMYR claimed that a new 45-minute commercial program on KOA, weekdays and Saturdays, offered mail order products "of questionable value," with commercial continuity "generally 10 minutes in length and of a persistent and irritating nature." KMYR said these facts do not jibe with KOA's testimony regarding its program and commercial standards.

Zenith Protests Renewal Of WBBM-TV's License

ZENITH Radio Corp. took another tack in its fight to retain its TV application for Ch. 2 in Chicago [B•T, March 9, Feb. 23] when last week it filed a formal protest at the renewal of the license of WBKB (TV) Chicago (now WBBM-TV). Zenith claimed it was deprived of due process because the renewal was made without a hearing. Protest was opposed by Balaban & Katz, subsidiary of United Paramount Theatres Inc. (now American Broadcasting-Paramount Theatres Inc.), which moved to dismiss on the ground the license renewal was for Ch. 4 and Zenith's interest is for Ch. 2.

Zenith already has asked the Commission to reconsider its decision dismissing its Ch. 2 application and last week's move was toward the same end under a different regulation. Zenith claims it should be given a hearing on its application for Chicago's Ch. 2, pending since 1948. WBKB, which received its renewal on Ch. 4 as part of the Paramount case [B•T, Feb. 14], is scheduled to change to Ch. 2 under the new TV allocations plan. The Commission also granted the transfer of WBKB to CBS for $6 million in the same decision.

Dolph-Pettey Group Adds KGIL, Will Buy KULA

AGREEMENT to purchase control of KGIL San Fernando, Calif., was reported signed last week in Los Angeles by William B. Dolph and Herbert L. Pettey prior to sailing for Honolulu to work out details in their purchase of KULA Honolulu [Closed Circuit, March 16]. The price for KGIL is said to be "under $50,000;" for KULA, around $300,000.

Mr. Dolph is executive vice president of WMT Cedar Rapids. Mr. Pettey, his brother-in-law, as former executive director of WMGM New York. Their associates in the purchase of control in KGIL were not disclosed but it is understood they will be joined by stockholders in KJBS San Francisco and WEMP Milwaukee in the KULA transaction. KGIL is on 1260 kc with 1 kw directional. KULA, an ABC affiliate, is on 690 kc with 10 kw.

The KGIL sale involves the disposition by Faye J. Smalley Jr., president-general manager, of his entire holding of 1,325 shares common voting stock (2,500 shares total issued) and one-half of the 1,450 shares preferred non-voting (11,400 issued) held by Howard P. Gray, vice president-commercial manager. Mr. Smalley is to continue with KGIL as consultant and Mr. Gray is to become general manager.

In the KULA transaction, Jack A. Burnett is expected to continue as general manager under contract with the Dolph-Pettey group. He is 16.26% owner. KULA sellers are reported to include: Alice P. Mayo, Rochester, Minn., 9%; Interstate Broadcasting Corp. (KLO Ogden, Utah), 40.9%; Robert H. Hinckley, AB-PT Washington vice president, 32%. Interstate is owned 62% by A. L. Glassman, KLO general manager, who is president and 12.5% owner of KALL Salt Lake City.

Transit Riders' Appeal

ORAL ARGUMENT before the U. S. Court of Appeals on the appeal of Transit Riders Inc. against FCC's decision that it was not a "party in interest," was postponed indefinitely last week at TRI's request. TRI objected to the license renewal of WWDC-FM Washington, transitcasting station, and lodged its protest after the Commission denied its petition for a hearing [B•T, March 9].

WKJG CHALLENGES WGL 'MONOPOLY'

QUESTIONS of concentration of the media of mass communication on the part of WGL Fort Wayne, Ind., are raised by both WKJG Fort Wayne and the chief of FCC's Broadcast Bureau in proposed findings filed with the Commission in the TV Ch. 33 hearing for that city. The Ch. 33 case was concluded before an examiner in February.

The Broadcast Bureau chief charges that the News Pub. Co., 100% owner of WGL and the morning *News Sentinel* and in control of the business operation of the evening *Journal-Gazette*, "has engaged in flagrantly monopolistic practices in the newspaper field which seriously reflect on its qualifications to hold a broadcast license." "Forced combination" ads and discontinuance of trade promotion arrangements with WOWO and WKJG are cited.

WKJG asserts it is better qualified to receive the TV permit because of greater diversity of ownership and greater integration of ownership, operation and management. WKJG also charges WGL has failed to keep certain local program promises.

WGL defends the merger as a proper economic practice which has occurred in 176 other U. S. cities, with no inter-control or relation of editorial policies or practices.

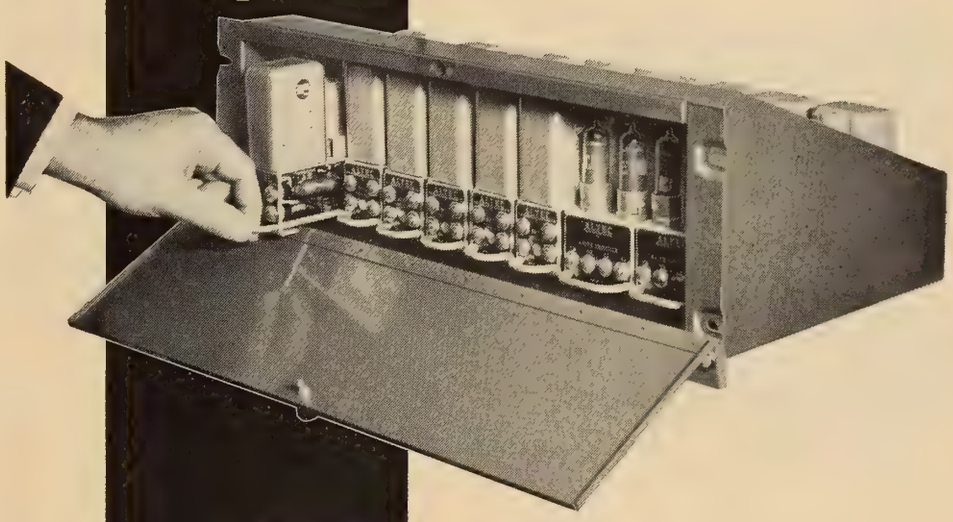
WGL states that its owners have taken notice of court cases in the field of newspaper control, citing *U.S. vs. The Times Picayune Pub. Co.* (New Orleans), and "will be guided in the reformation of any contracts or changes which may be necessary when they determine what the Supreme Court decides to be the final law."

WGL further argued that on the basis of past performance, integration and experience of ownership, preparation for TV, financial qualification and facilities plans, it is better qualified than competitor WKJG.

WSAZ-TV Asks FCC Removal Of Limit on Zone 1 Antennas

REMOVAL of the 1,000-foot limit on antennas in Zone I (eastern U. S.) is asked of FCC in a petition filed last week by WSAZ-TV Huntington, W. Va., operating on vhf Ch. 3 with 100 kw visual ERP from an antenna 350 ft. above ground and 600 ft. above average terrain.

Asking amendment of Sec. 3.614(b) of FCC's TV rules, WSAZ-TV contends the 1,000 ft. (above average terrain) limitation is an "artificial barrier" and prevents maximum service which the vhf channels could provide.



The TV rule presently limits only vhf stations in Zone I to 1,000 ft. antennas. Uhf stations can use towers up to 2,000 ft. above average terrain in Zone I, the maximum height allowed by the Sixth Report and Order (April 14, 1952) to uhf and vhf alike in Zones II and III.

WSAZ-TV notes that the Sixth Report comments on the Zone I, where cities are closer, indicated the vhf tower limitation is temporary until additional technical information can be obtained. Since the Sixth Report data on this point is now more than two years old, WSAZ-TV feels it is time to review newer information that is available, including that from the six vhf stations operating from atop the Empire State Bldg., 1,445 ft. above average terrain.

The petition observes that throughout the Sixth Report the Commission found it was in the public interest to assign TV stations and permit their operation "to utilize most effectively each television channel in the U. S."

Rack 'em up!

The 11338 mounting assembly occupies only 7 inches of rack space, is fully guttered for wiring and will hold as many as nine preamplifiers.

ALTEC CUSTOM SPEECH INPUT SYSTEMS

Rack mount the miniature Altec plug-in preamplifiers, line amplifiers, monitor amplifiers and power supplies to meet your individual speech input needs. These units are extremely small and exceed all broadcast requirements. Of open chassis design for easy servicing, they are supplied with a cover tray and receptacle that permanently mounts in the 11338 mounting assembly. The units slide into the tray, automatically making all connections. Push buttons are provided for tube checking during operation. Frequency response of the A-428B preamplifiers and A-429B line and monitor amplifier is within 1 db from 20—20,000 cycles.

ONLY ONE TV TO BEGIN THIS WEEK

Six new TV stations hope to begin operating by April 1 and another half-dozen plan to be on the air soon afterward, check reveals.

BARRING last-minute developments, only one new television station—KVTV (TV) Sioux City—expects to begin commercial operating within the next week.

Six stations are aiming for April 1, however, and another eight or nine hope to make it soon after.

In addition to those stations reported in B•T which went on the air last week [B•T, March 16], KTTS-TV Springfield, Mo., started commercial operation March 14, G. Pearson Ward, general manager, told B•T. The station is represented by Weed Television and is a CBS-TV and DuMont affiliate. It is on vhf Ch. 10.

KVTV (TV) Sioux City, represented by the Katz Agency, is on the air with a test pattern. It is a CBS-TV affiliate on vhf Ch. 9.

Here are the stations aiming for April 1:

WLEV (TV) Bethlehem, Pa., uhf Ch. 51, a Steinman Station, represented by Robert Meeker Assoc.. and an NBC-TV interconnected affiliate.

KCJB-TV Minot, N. D., vhf Ch. 13, represented by Weed Television.

KFDA-TV Amarillo, Tex., vhf Ch. 10, represented by The Branham Co.

WKNX-TV Saginaw, Mich., uhf Ch. 57, represented by Gill-Perna Inc.

KFDX-TV Wichita Falls, Tex., vhf Ch. 3, represented by the O. L. Taylor Co.

KELO-TV Sioux Falls, S. D., vhf Ch. 11, represented by O. L. Taylor Co.

Here are the grantees who expect to get on the air with commercial programming early in April:

WICC-TV Bridgeport, uhf Ch. 43, represented by Adam Young and an ABC-TV affiliate. Target date: April 1 to 15.

WAFB-TV Baton Rouge, La., uhf Ch. 28, represented by Adam Young and affiliated with all four networks. Target date: April 5.

WCOV-TV Montgomery, Ala., uhf Ch. 20, represented by the O. L. Taylor Co. and affiliated with ABC-TV, CBS-TV and DuMont. Target date: April 6.

WHP-TV Harrisburg, Pa., uhf Ch. 55, is represented by The Bolling Co. Target date: April 10.

WTVO (TV) Rockford, Ill., uhf Ch. 39, represented by Weed Television, and an NBC-TV affiliate. Target date: April 12.

WLBC-TV Muncie, Ind., uhf Ch. 49, represented by the Walker Representation Co. in New York and a CBS-TV and DuMont affiliate. Target date: April 15.

WLOK-TV Lima, Ohio, uhf Ch. 73, represented by H-R Reps. Target date: April 15.

WEEU-TV Reading, Pa., uhf Ch. 33, represented by the Headley-Reed Co. and an ABC-TV and NBC-TV affiliate. Target date: April 15.

KCBD-TV Lubbock, Tex., vhf Ch. 11, represented by John E. Pearson TV Inc. and an ABC-TV and NBC-TV affiliate. Target date: April 19 to 26.

Five stations which have received new RCA transmitters within the last week expect to go on the air in April and May:

WFTL-TV Fort Lauderdale, Fla., uhf Ch. 23, represented by Weed Television. Target date: Early April.

WCOS-TV Columbia, S. C., uhf Ch. 25, represented by Headley-Reed and an ABC-TV and NBC-TV affiliate. Target date: April.

WDAY-TV Fargo, N. D., vhf Ch. 6, represented by Free & Peters. Target date: April.

WFAM-TV Lafayette, Ind., uhf Ch. 59, represented by William G. Rambeau Co. Target date: May 1.

WBKZ-TV Battle Creek, Mich., uhf Ch. 64, an ABC-TV and DuMont affiliate. Target date: May 15.

Transit FM Loss

ABANDONMENT of transit radio in St. Louis as the result of the announcement that KXOK-FM St. Louis will leave the air March 31 [B•T, March 16] brought an enthusiastic reaction from Washington (D. C.) Transit Riders Assn., which has waged a long fight against what it calls "captive audience" service.

Claude N. Palmer, president of the group, said dropping of KXOK-FM's service "shows that a better class of advertisers in St. Louis, as in Washington, is unwilling to browbeat its customers and prospective customers into listening to programs over which they have no control." The association has pending in U. S. Court of Appeals, D. C., a plea for hearing by FCC on merits of transit service.

Frank M. King Dies; Former WMBR President

FRANK M. KING, 63, former president and general and commercial manager of WMBR-AM-FM-TV Jacksonville, Fla., until its sale last December to *The Washington Post,* died Thursday at Jacksonville. He had been in failing health several months.

Born in Houston County, Ga., and a graduate of Mercer U., Macon, in 1934, he organized Florida Broadcasting Co., WMBR licensee, with associates Ed Norton and Glenn Marshall Jr., and served as president until its sale [B•T, Dec. 22, 1952]. The same three associates bought, operated and sold WFOY St. Augustine.

Mr. King was one of the organizers of the Florida Assn. of Broadcasters and a member of its first board of directors, serving as FAB's second president for two terms. He was elected NAB (now NARTB) District 5 director for one term (1941-43), and was named director-at-large for two terms (1943-45). At his death he was president of Distributors Inc., Jacksonville, and was active in several civic projects.

Survivors are his wife, two daughters and four grandchildren.

WPTZ (TV) February Sales

WPTZ (TV) Philadelphia during February set a new sales record with more than $570,000 in new business, Alexander W. Dannenbaum Jr., commercial manager, announced last week. Largest single sale was signing of *Esso Reporter* from 7-7:15 p.m. Mon.-Fri. for Standard Oil Co. of New Jersey through Marschalk & Pratt, New York, starting the first week in April.

WCBS-TV, WNBT RAISE RATE STRUCTURES

UPWARD revisions in the rate structures of the New York key television stations of CBS-TV and NBC-TV were reported by the stations last week.

Craig Lawrence, general manager of WCBS-TV New York, said the station will raise its basic hour Class A rate from $4,000 to $4,500 April 1 when the station's rate card No. 12 becomes effective. He added that most other rates will be increased similarly, with present advertisers protected for six months under rate card No. 11 on schedules started before April 1.

A letter that George R. Dunham, WCBS-TV's general sales manager, is sending notes to advertising agencies and sponsors that the advance in Class A hourly rates represents an increase of 12%. But it points out that since June 1, 1952, when current rates were established, New York's TV set circulation has risen 15%, WCBS-TV's average nighttime audience has increased by 18%, and the station's average daytime audience has gone up 206%.

Participations Only

Increase at NBC's WNBT (TV) New York will apply only to participation programs, according to a spokesman, and will go into effect April 1. The usual six months protection will apply to current advertisers.

On participations, which previously were priced variously, a $275 rate has been set for the following programs: *Morey Amsterdam, Josephine McCarthy, Herb Sheldon, Jinx Falkenburg, Richard Willis, Hollywood Playhouse, Channel 4 Theatre, Bar 4 Ranch,* and *Saturday Stagecoach.* On *11th Hour Theatre,* it will be $350, and on *Ask the Camera,* $400.

The prices are subject to a discount of 2½% for 26 to 51 weeks; 5%, 52 to 155 weeks; 7½%, 156 to 259 weeks, and 10%, 260 weeks or more.

McClelland Named

LEFFERTS A. McCLELLAND, technical director of several NBC-TV programs, has been appointed operations director of WRC-WNBW (TV) Washington, NBC owned stations, by Carleton D. Smith, general manager. Departments reporting to Mr. McClelland include continuity acceptance, staging services, film operations, announcers, traffic, radio recording and all program operations. John McCollom succeeds Mr. McClelland as technical director. Two new salesmen joined WRC-WNBW last week. They are Jack Neff, formerly of WMAL Washington, to the radio sales staff, and William C. Grayson, formerly operations director, to the TV sales staff.

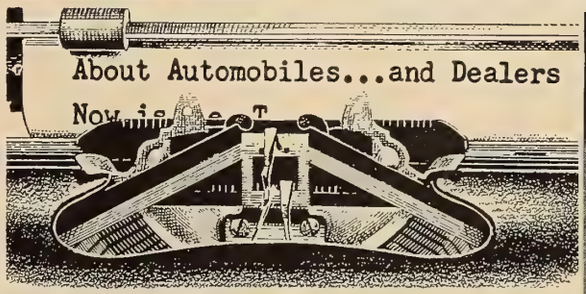
WKRC-TV Power Boost

WKRC-TV Cincinnati, a pre-freeze station, boosted its effective radiated power to 250 kw visual March 14. The station has had its equipment installed since last October, but channel changes by other stations in the area, required under provisions of the FCC's Sixth Report & Order [B•T, April 14], held up the change-over, it was said.

WKRC-TV claims it is now 10 times more powerful. General manager of the vhf Ch. 12 outlet is U. A. Latham.

Schwin Joins WBBM-AM-TV

APPOINTMENT of Newell T. Schwin as executive assistant to H. Leslie Atlass, vice president of CBS and general manager of WBBM-AM-TV Chicago, was announced last Monday.



Mr. Schwin, former advertising director of Household Finance Corp., steps into the position vacated by Kenneth Craig, who has assumed general charge of all WBBM-TV operations [AT DEADLINE, March 16]. Mr. Schwin will handle similar responsibilities with the exception of personnel direction, now under Ben Orloff. Stuart Riordan assumes charge of publicity for WBBM-AM-TV with Lee Salberg, former publicist at WBKB, moving into promotion.

'Salemaker' Name Given Northwest Stations Group

SALEMAKER STATIONS is the name selected for the group of Pacific Northwest stations owned by Jessica Longston of Bellingham, Wash., and others. Newest addition to the chain is KRSC Seattle, purchased from J. Elroy McCaw, owner of KELA Centralia. Other radio members of the Salemaker group are KPUG Bellingham, KSEM Moses Lake, both Washington, and KBIO Burley, Idaho.

Under the name of Washington Telecasters Inc., the firm has an application before FCC for TV uhf Ch. 55 in Wenatchee, Wash.

Robert E. Pollock is vice president and general manager of KRSC; Ted Bell is assistant manager.

Governor Warren Presents Special Recommendation from the American Heritage Foundation

The American Heritage Foundation, citing the program of the National Automobile Dealers Association as the most outstanding effort among all Trade Associations in getting out the popular vote, recognizes the importance of the new car dealer to the nation and to his community.

Here was a most effective program of action, offering all who wanted it, free transportation on a non-partisan basis, to vote. National only in its broad organization, here was a purely local program, effective in nearly every American community through the local efforts of individual new car dealers.

New car dealers have long been identified as "local, independent merchants and business men" and "community leaders". Here is recognition for unselfish contribution in support of Democracy. Here is a true picture of "Mr. Mobility" at work at home.

Representative of 35,000 new car dealers, the National Automobile Dealers Association is proud to receive, for them, the award of the American Heritage Foundation.

One of a series from the National Automobile Dealers Association—Any material contained herein may be reproduced without permission.

DIRECTOR OF PUBLIC RELATIONS, NADA

1026 17TH STREET, N.W. WASHINGTON 6, D. C. REPUBLIC 7-6946

Church to Head WTVN (TV); McGough Keeps Manager Post

KENNETH CHURCH, commercial manager of WKRC-AM-FM Cincinnati and national sales manager of WKRC-TV, will be executive vice president of WTVN (TV) Columbus and will make top policy decisions for the station, purchased from Edward Lamb for $1.5 million by the Taft family interests [B•T, March 2].

This announcement was made last week with final consummation of the WTVN (TV) sale from Picture Waves Inc., owned by Edward Lamb and family, to WTVN Inc., recently incorporated company wholly owned by Radio Cincinnati Inc., Taft family corporation which operates WKRC-AM-FM-TV Cincinnati. Mr. Lamb, who retains two TV stations, three AM stations and a newspaper, had operated WTVN since 1949.

J. W. McGough, WTVN general manager, will continue in his present capacity, according to a release from the Taft corporation, which confirmed an earlier report the new management will retain the existing staff.

Transaction Principals

FCC had approved the WTVN sale Feb. 25. Principals handling the transaction included Hulbert Taft Jr., executive vice president of Radio Cincinnati Inc. and president of WTVN Inc., and Robert Taft Jr., attorney for the Taft interests, with Mr. Lamb and Frank C. Oswald representing the selling interests.

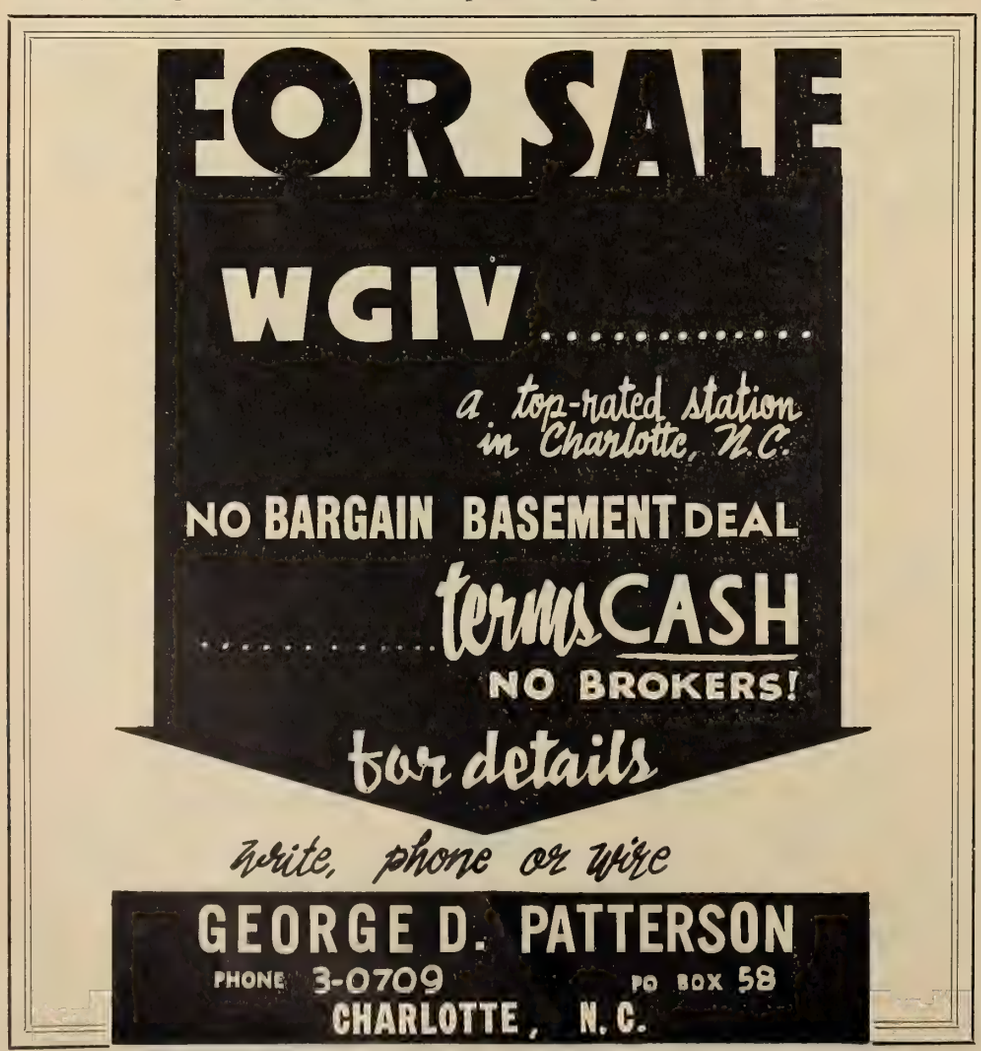
The new WTVN ownership said it intends to institute immediately plans to increase the outlet's effective radiated power to 100 kw pursuant to authority previously given by FCC for the boost. Only the physical assets of WTVN, including transmitter and antenna atop the LeVeque Lincoln Tower Bldg. and the recently completed TV center at 753 Harmon Ave., were purchased, the announcement said.

WTVN (TV) Columbus General Manager J. W. McGough (l) welcomes Kenneth Church, new executive vice president and chief policy-maker of the station, bought by the Taft family interests for $1.5 million from Edward Lamb.

* * *

The new management said it intends to make WTVN "an integral part" of Columbus life and activities, expand the programming day to include "all normal waking hours," increase use of network programs, build high calibre local programs and program staff and make them available to affiliated stations, expand public service activities, make WTVN "the outstanding sports station of the region" and develop "fullest possible" news coverage.

Sholis Offers Checklist To Advertiser Buying Time



CHECKLIST of factors an advertiser should consider in buying time on radio and TV stations was recommended by Victor A. Sholis, vice president and director of WHAS-AM-TV Louisville in an address to the Advertisers Club of Cincinnati March 11.

Mr. Sholis attacked "fantastically expensive research" on ratings of programs, which he said has warped perspective about radio, and on radio coverage, which he declared has been "misrepresented" and "misused."

Mr. Sholis' checklist of factors an advertiser should look into thoroughly before buying time on a station are: (1) buying potential of its market or coverage area; (2) its physical and personnel facilities; (3) quality of its local and network programming and its activities in the public interest; (4) its stature in the community; (5) its standards of business practice, including its rate card ethics; (6) its records of sales results, and (7) integrity of its management.

Describing a study on radio presently being conducted by Alfred Politz and being underwritten by WHAS and six other stations, Mr. Sholis said the study will measure radio "in a new dimension." Other stations backing the study are WBEN Buffalo, WGAR Cleveland, WJR Detroit, WDAF Kansas City, WTMJ Milwaukee and WGY Schenectady.

The study, he said, will have equal value for all stations, advertisers and agencies, and will develop practical evidence of how radio reaches its audience and how people react to radio. It will not compete with existing measurement, nor compare one broadcasting facility or program with another, he said, adding that it is designed to improve both advertisers' and broadcasters' understanding of the medium.

Milestones

► G. W. (JOHNNY) JOHNSTONE, radio and television director of the National Assn. of Mfrs., celebrates his 30th anniversary in the broadcasting industry today (Monday). He began as an engineer with WEAF (now WNBC) New York in 1923. He became WEAF publicity manager in 1924 and NBC publicity director in 1926. Between 1926 and 1946, when he assumed his NAM post, Mr. Johnstone served NBC, ABC, and Mutual in various news, special events, and publicity capacities.

Mr. Johnstone

► CANADIAN Assn. of Radio & Television Broadcasters honored Edwin Ross MacIntyre, chief engineer and news commentator of CHUB Nanaimo, B. C., with membership in the group's Quarter-Century Club in observance of his 25 years in the broadcast industry.

► R. SANFORD (SANDY) GUYER, partner and general manager of WMOA Marietta, Ohio, completed his 29th year in radio March 20.

►JOHN B. GAMBLING, WOR New York personality, completed his 25th year on the station this month. Mr. Gambling's *Musical Clock* program, heard over WOR since 1925, is described by the station as "the oldest continuous program on the air."

CBS INC. '52 GROSS $251 MILLION

Last year's gross exceeds that for 1951 by nearly $60 million, CBS Inc. reports to stockholders. Net income for 1952 was $6,445,506, slightly higher than 1951, but stock earned less per share.

CBS and its subsidiaries had gross revenues of $251,594,490 for the 53 weeks ending Jan. 3, 1953, compared to $192,384,608 for the 52 weeks ending Dec. 29, 1951, according to the company's annual statement to stockholders, sent out last week.

Net CBS income for 1952 was $6,445,506, equal to $2.75 per share on the 2,340,896 shares outstanding. This compares with $6,360,097 and $3.10 per share on the average of 2,051,491 shares outstanding for 1951. Cash dividends of $1.60 per share were paid.

The "rapid development of new electronic products, such as the transistor," and the lifting of the freeze on new TV station construction were cited in the opening letter to stockholders, signed by CBS Board Chairman William S. Paley and President Frank Stanton, as two important developments of 1952 which "should influence favorably" the future growth of CBS.

Number of advertisers using the CBS Radio Network increased last year from 81 to 90, Adrian Murphy, president of the CBS Radio Division, reported. He said in the final quarter of 1952 "appreciably more time was sold" than during the like period of 1951, with the network's daytime hours sold out and an increase in evening advertisers. He listed sponsorship of the political conventions, the "unprecedented" number of programs sponsored by "hard-goods" advertisers, the number of automobile sponsors, Willys-Overland's sponsorship of the 90-minute Sunday afternoon New York Philharmonic Symphony concerts and the successful launching of the "Power Plan" (enabling three nighttime advertisers to share sponsorship of three programs on successive evenings) as "noteworthy sales developments."

102 1952 Advertisers

J. L. Van Volkenburg, president, CBS-TV Division, reported that 102 advertisers used CBS-TV in 1952 (including 40 newcomers to the network) whose gross billings were more than 50% ahead of those for 1951. All but one of the regular CBS-TV advertisers stayed on the air throughout the summer, "a record unmatched in the history of broadcasting," he stated. The year ended with 33 CBS-TV package programs sponsored and six more due to start early in 1953.

The average nighttime audience rating of CBS-TV increased more than 12% during 1952, while the average daytime audience rating was up 35%, the report noted. CBS-TV had 74 affiliates at the end of 1952, up from 62 a year earlier, with the interconnected group rising from 51 to 66. In addition, CBS-TV has affiliation agreements with 30 stations expected to start broadcasting by the middle of 1953.

Columbia Records Inc. sales were 14.5% ahead of 1951, James B. Conkling, president of CRI, reported.

CBS-Hytron, tube manufacturing subsidiary, in May opened a new miniature receiving tube plant at Danvers, Mass., with a manufacturing capacity of 25 million tubes a year, Bruce A. Coffin, president, said. Manufacture of germanium diode and transistors, begun last year, is fast outgrowing the space available in the Danvers plant, Mr. Coffin said.

An addition is being built for the picture tube plant at Newburyport, Mass., to provide 150,010 more square feet of space to make and store tubes, chiefly the 24-inch and 27-inch picture tubes to be made in quantity this year. Additional facilities for receiver production is being provided by a new Long Island City plant, according to David H. Cogan, president of CBS-Columbia Inc.

Dr. Goldmark Cites Work

Dr. Peter C. Goldmark, vice president, CBS Labs., reported the perfection of a device called a "crispener" for clarifying picture signals in black-and-white telecasting. In color, Dr. Goldmark stated that "intensive research was devoted to the tri-color tube in cooperation with CBS-Hytron. At the same time, a continuing study has been made of the National Television Systems Committee color system and the detailed evaluation of this and other systems will provide useful information in assessing the future course of color television and assuring CBS' ability to capitalize upon the knowledge and experience gained in this field."

Improved medical color TV units are being manufacturing by the CBS Labs., which are also producing a number of projection receivers using a six-foot screen, to be demonstrated for the first time at the 1953 American Medical Assn. convention in New York.

Bourgholtzer to NBC Paris; Mueller Replaces Fleming

SHIFTS in assignments for several NBC newsmen were announced Thursday, with Frank Bourgholtzer, White House correspondent since 1947, named chief correspondent in Paris and Merrill Mueller set to replace James Fleming as news editor and commentator on the network's *Today* TV show (Mon-Fri., 7-9 a.m. EST and CST).

It was understood that Ray Scherer of the NBC Washington news staff, who has substituted at the White House at times when Mr. Bourgholtzer was absent, would get the White House assignment fulltime. Meanwhile, Paul Archinard, veteran NBC correspondent in France, was named to the new post of NBC manager in Paris. William Frye, who has been chief Paris correspondent, is returning to the U. S.

In his new post, effective April 1, Mr. Bourgholtzer will be responsible for coverage of France as well as NATO and SHAPE. With NBC since 1946, he won widespread public plaudits when he persuaded then-President Truman to play the piano during a telecast tour of the White House.

Mr. Mueller takes over the *Today* news editorship today (Monday). He is a veteran war and foreign correspondent, and has been engaged in news reporting for 21 years. He covered World War II for NBC, serving in Europe, Africa, and the Pacific, and after the war was named manager of the London bureau. More recently he has operated from New York headquarters.

Future plans or assignment of Mr. Fleming, who had been with *Today* since its first broadcast on Jan. 14, 1952, were not revealed.

MORE BIG SHOWS JOIN ABC ROSTER

Martin Block signing highlights network's plan to build bigger shows, draw bigger business. New fight card, other programs are in sight.

ABC last week unveiled more plans for building programs that will attract larger audiences and still more business.

Officials reported that new sales and renewals representing $7.5 million in network gross billings were signed between Jan. 1 and last Wednesday—$3 million in radio, $4.5 million in TV.

The signing of Martin Block, a pioneer and probably New York's best known disc jockey, to a long-term exclusive contract for both network and WABC New York programs, effective next Jan. 1, was announced along with plans for the new *ABC Album* for ABC-TV, *ABC Caravan* on the radio network, and the new *Motor City Fights* on ABC-TV [B•T, March 16, 9].

$3 Million Expected

Length of the contract with Mr. Block was not disclosed but it was understood that it was for a five-year period. It was announced he would move his locally-famed *Make Believe Ballroom* to ABC-WABC "intact," and that when the show is completely sponsored on WABC, Mr. Block "can earn over $3 million in the course of the contract."

ABC the preceding week had announced that during the first month following the merger of ABC and United Paramount Theatres into the new AB-PT the volume of business signed for ABC owned stations totaled $4.5 million, a record in ABC history [B•T, March 16].

Charles T. Ayres, vice president in charge of the ABC radio network, saw the new and renewed radio network business as evidence that "radio advertisers are establishing a pattern of renewed faith and confidence in network sponsorship, which will be more fully reflected in the fall of 1953."

'Heavy' Fall Business

Alexander Stronach Jr., vice president of the TV network, referring to the TV sales and renewals, said "television advertisers are carefully evaluating strategic programming with sponsorship in select time periods," and forecast "a heavy influx of new video business" in the fall.

The *ABC Album* television show, to be seen Sundays at 7:30-8 p.m. EST starting April 12, will consist of dramatic presentations—originals as well as adaptations of drama, novels, short stories, and light classics. *Album's* radio counterpart, *ABC Cavalcade,* is set to start April 16 and will be presented at 9-9:30 p.m. EST Thursdays.

'Motor City Fights'

Like the *TV Album, Cavalcade* will be a showcase. Raymond Diaz, national program director for the radio network, noted that "it is our intention to consider each program in the series as eligible for a new and separate radio series of its own. . . ."

The new *Motor City Fights,* originating in Detroit and giving ABC-TV three fight nights a week, got under way last Thursday and will be seen weekly at 9 p.m.

Pointing out that the network now presents bouts on Tuesday, Thursday, and Saturday evenings, Mr. Stronach said ABC-TV "is completely altering the complexion of its programming with the specific idea of capturing the eyes and interest of that broad segment of Americans which is sports minded."

Effective next New Year's Day, *Martin Block's Make Believe Ballroom* will be presented on WABC Mon.-Fri., 3:30-7 p.m. The program will be presented on the ABC radio network each weekday, 2:30-4 p.m. EST, starting next Jan. 4. The network show will start about June 1 of this year with "a national star" as m.c. until Mr. Block joins the network.

Additionally, WABC plans to carry *Make Believe Ballroom* for three and a half hours "every Saturday in 1954."

ABC quoted Mr. Block as estimating that in the 18 years the program has been carried in New York, advertisers have spent more than $10 million to participate in it and that the program has sold about $751 million worth of sponsors' products.

Sign New Accounts

Meanwhile, new business signed for ABC radio network shows since the first of the year included the following accounts: Beltone Hearing Aid Co., Brown Shoe Co., Chesterfield Cigarettes, Wine Corp. of America, Skinner Mfg. Co. and Pharmaco Inc., plus Willys-Overland Motor's sponsorship of the Presidential inauguration.

New business signed for the ABC TV network came from Walter H. Johnson Candy Co., American Chicle Co., Bayuk Cigars, Thor Corp., American Federation of Labor, and S. C. Johnson & Son, plus Willys-Overland (Presidential inauguration).

Kind Regards

CONSIDERATION for clients reached a new high in Washington, D. C., last week when NBC sent a plant to its customers with the enclosed sympathy card: "In anticipation of your loss." The date, of course, was March 15.

TV's Public Obligation Underscored by Madden

TO INSURE good public relations, television networks have a responsibility to maintain good taste and eliminate over-commercialism in programs, to keep costs low and to provide programming in the public interest, Edward D. Madden, vice president and assistant to the president of NBC, declared Wednesday.

In a luncheon talk in New York before the New York chapter of the Public Relations Society of America, Mr. Madden described TV as a medium "whose impact on people and influence in our society is unequalled in the history of communications."

He outlined in detail how NBC attempts to reduce costs by the use of illusions created by technicians, and in this connection presented a film, "Illusions Unlimited," which described various techniques developed by the network.

Touching upon TV's responsibility to maintain good taste in programming, Mr. Madden cited NBC's own program code and that of the NARTB to which the network adheres.

As examples of NBC's policy of programming material in the area of public service, Mr. Madden referred to the network's *Face of the Age* plan, which he described as "a procedure to present on television the faces and voices of the men and women who are influential in the world today."

Brief talks were presented by Herbert Bayard Swope Jr., NBC-TV's director of the *Robert Montgomery Presents* show, and Albert McCleery, NBC-TV producer of *Hallmark Theatre,* on the contributions of dramatic programs to public service projects.

Three Add to Daytime Schedule on NBC-TV

EXPANSION of sponsorship of NBC-TV programs by three national advertisers highlighted a report issued by the network last week on new and renewed business.

Continental Baking Co., New York, will pick up 15 minutes on Wednesday of its weekly sponsorship of *Howdy Doody* (Mon.-Fri., 5:30-6 p.m. EST), effective May 6, in its 5:30-6 p.m. time period. Standard Brands, New York, will add another quarter-hour of the same show on Monday, 5:45-6 p.m. EST, starting today (Monday), to its Thursday 5:45-6 p.m. segment. Ted Bates & Co., New York, is the agency for both.

Procter & Gamble Co., Cincinnati. which currently sponsors the 4-4:15 p.m. EST Tuesday, Wednesday and Thursday portions of the *Kate Smith Hour* (Mon.-Fri., 4-5 p.m.) purchased the 4-4:15 p.m. segment on Monday, effective March 19, through Compton Adv., New York. P&G, starting May 1, also will add the Friday 3:45-4 p.m. period of *Welcome Travelers* (Mon.-Fri., 3:30-4 p.m.) to its current sponsorship of the same time slot Mondays through Thursdays. The agency is Biow Co., New York.

Other business activity announced by NBC-TV includes sponsorship by the Kelvinator Div. of Nash-Kelvinator Corp., Detroit, of the Wednesday 3:15-3:30 p.m. EST portion of *Break the Bank* (Mon.-Fri., 3:30 p.m.), starting April 1 through Geyer Adv., New York; renewal by Crosley Div. of Avco Mfg. Corp., New York, of alternate-week sponsorship of *What's My Name?* (Mon., 8-8:30 p.m. EST), starting last Monday, through Benton & Bowles, New York, and renewal by P. Lorillard Co., New York, of *Club Embassy* (Tues., 10:30-10:45 p.m. EST), effective March 31, through Lennen & Newell, New York.

Negro Artists on NBC

A 200% increase in the use of Negro artists by NBC on network programs during 1952 over 1951 was reported last week by Edward D. Madden, vice president and assistant to the president of NBC, at a meeting in New York of press and civic leaders.

NBC President Frank White told the meeting that NBC's philosophy embraces "an area of operation that you have to do with your heart as well as your brain." He assured civic leaders that NBC intends to solicit their cooperation in an attempt to achieve added progress.

100th Affiliate Joins CBS-TV Network

CBS-TV signed its 100th TV affiliate, its 36th since lifting of the freeze, last week. It is KWFT-TV Wichita Falls, Tex.

The station, on Ch. 6, is owned by Wichita Falls Television Inc. Kenyon Brown is president and general manager. The signing followed the affiliation of three other new stations earlier in the week—WABI-TV Bangor, KRTV (TV) Little Rock, and KFDA-TV Amarillo, Tex.

WABI-TV, on Ch. 5, joins the network as a primary, non-interconnected affiliate. It is owned and operated by Community Telecasting Service. Murray Carpenter is general manager.

KRTV (TV), Ch. 17, becomes a primary, supplementary non-interconnected affiliate. Mr. Brown, in addition to heading KWFT-TV, also is general manager of KRTV (TV), which is owned and operated by Little Rock Telecasters.

KFDA-TV, Ch. 10, joins CBS-TV as a supplementary, non-interconnected affiliate. It is owned and operated by the Amarillo Broadcasting Co. John Hopkins is general manager.

Pearson Decries Networks For 'Similar' Viewpoints

NEWS commentator Drew Pearson charged in his ABC radio broadcast March 15 that the four radio and television networks are failing to present a diversity of viewpoint and opinions on news programs, and added they are controlled, in effect, by "four men" who constitute "a chorus of similar voices."

A rebuttal by Thomas Velotta, vice president in charge of news and special events for ABC radio, was read on the program with Mr. Pearson's permission. The reply said ABC and other radio and TV networks "believe in and operate under a policy of freedom of speech" and present "a variety of opinions and viewpoints."

Mr. Pearson's criticism came three days before he ended his Wednesday night program on DuMont TV Network and two weeks before his final show on ABC radio March 31. His programs were sponsored by Carter Products and were not renewed beyond those dates. Both networks have indicated they will not continue the shows on a sustaining basis, though DuMont had considered it.

RCA-NBC Officials Address Architects on Electronics

ALL homes and offices of the future may need electronic installations, Sylvester L. Weaver Jr., vice chairman of the NBC board, declared a fortnight ago.

He was one of four RCA and NBC authorities who addressed a special luncheon, arranged by NBC, of the New York chapter of the American Institute of Architects on Wednesday. The luncheon was designed to acquaint the architects with the impact of electronic developments on building design.

Mr. Weaver foresaw communications machines in the home that will provide "television in color, plus radio, phonograph, time, news, and musical services."

Suggests Factory Techniques

O. B. Hanson, vice president in charge of NBC's engineering department, called for a multiple studio plant laid out to follow "factory assembly line techniques."

Sol Cornberg, NBC supervisor of plant facilities and development, urged architects to make allowance for television equipment in designing auditoriums, theatres, stadia, hospitals, law courts, and other public places.

H. T. Sawyer, manager of the industrial equipment section of RCA Victor Div.'s engineering products department, forecast "unlimited" use of industrial television.

Multiplex System Allows 2-Program FM Broadcasting

FM inventor, Dr. Edwin H. Armstrong, sees system as a boon to broadcasters because it would double potential revenue.

MULTIPLEX radio transmission system enabling FM stations to broadcast two or more programs simultaneously has been perfected by Dr. Edwin H. Armstrong, professor of electrical engineering at Columbia U., and John H. Bose of Columbia U.'s Marcellus Hartley Research Labs., Dr. Armstrong reported Monday.

Inventor of FM broadcasting, which he presented in 1935, Dr. Armstrong said the new system, based on his original FM principles, employs a number of improvements developed since World War II.

Under the new system, which Dr. Armstrong said had been fully tested at his experimental FM station (KE2XCC Alpine, N. J.), an FM station can transmit music on one "channel" and speech on another, or it can broadcast a single program stereophonically on both channels so as to give a listener with two FM receivers binaural reception. Both program "channels" are multiplexed on the station's normal single frequency channel, it was indicated.

Present FM Sets Unaffected

New receivers will be needed to receive two-channel FM broadcasts, Dr. Armstrong said, but the number of additional parts will not add unduly to the cost of the sets. Present FM sets will receive only one channel from a station, he said, and will not be affected by the second channel.

Cost of equipping a station for multiplex operation is not high, the inventor stated. He said the new method, which is "completely impossible" for AM broadcasting, will be a boon for broadcasters adopting it because "A station operator who can sell time on two channels obviously will outsell the station operator with only one."

A fortnight ago, Mount Mitchell Broadcasters Inc., operator of WMIT-FM Clingman's Peak, N. C., petitioned FCC to amend its FM rules so as to allow multiplexing of two or more programs on the same frequency channel in order to provide additional specialized services, such as transitcasting in addition to regular broadcasts [B•T, March 9].

FCC's rules at the present time allow only the multiplexing of facsimile service on the regular program channel under certain technical conditions. The facsimile signal may not impair the FM program below 15,000 cycles.

CO-DEVELOPERS of a system for simultaneous transmission of two FM programs on the same frequency are Dr. Edwin H. Armstrong (r), Columbia U. professor of electrical engineering and inventor of FM broadcasting, and John H. Bose of Columbia U.'s Marcellus Hartley Research Labs.

* * *

'But We Did It First'

MULTIPLEXING of FM signals was demonstrated two and a half years ago [B•T, Sept. 25, 1950] by Multiplex Development Corp., its president, William S. Halstead, reminded last week after Dr. E. H. Armstrong announced a similar system [see story above].

"We have had a petition on file before the FCC since September 1950, requesting that FM stations be allowed to transmit multiplex programs," Mr. Halstead said, noting that this petition has been supported by Rural Radio Network and, as recently as March 4, by Mount Mitchell Broadcasters of Charlotte.

Work of his company and Crosby Labs on FM multiplexing has taken five years and more than $100,000, Mr. Halstead reported. "The system has been developed to the point where equipment will shortly be available to broadcasters for such services as three-dimensional radio program transmission, subscription radio, storecasting and other specialized services that may provide much needed revenue to FM station owners," he stated.

DuMont Labs to Expand Transmitter Production

LARGE-SCALE expansion of the Television Transmitter Div., Allen B. DuMont Labs, starting late this month will "more than double" production, Div. Vice President Stanley F. Patten reported last week.

The Transmitter Div., which shares occupancy of two manufacturing buildings in Clifton, N. J., with the Instrument Div., will take over both buildings. The Instrument Div. will move to new headquarters in Clifton.

Enlarged production capacity, Mr. Patten said, will enable the division to meet increased demands for high-power TV amplifiers. New facilities also will speed up production of uhf and vhf transmitters and associated equipment, he said. Current production has attained a record level, he added, reporting transmitter shipments in 1952 had increased above the 1951 mark by 200%. Sales of equipment rose accordingly, he said.

New Audio Devices Release

AUDIO DEVICES Inc., New York, is marketing a self-timing leader tape and a magnetic tape recorder head "demagnetizer." The timing tape is made of white plastic, and when used with a standard ¼-inch magnetic recording tape serves as a threading leader. The "demagnetizer" is an AC magnet assembly designed to permit removal of residual permanent magnetism from the sound recording heads of magnetic tape recorders, company reports.

Pay-See TV Could Double Stations, Faught Believes

ENVISIONING an annual revenue of $10 billion for the television industry, Millard C. Faught, public policy consultant from New York, maintained last week subscription television could maintain twice the number of stations capable of being supported by traditional advertising revenue.

Speaking Tuesday before members of the Washington Advertising Club, he said pay-as-you-see television, used as a complementary system to the present form of commercial television, would enable many more stations to take the air profitably, and remain in operation. Subscription TV would operate as a "delivery service" without losing any of its usefulness as a "communications service" or advertising medium, he claimed.

Programs for which home viewers would be willing to pay, however, would have to be (1) worth their price and (2) better than "or appealingly different from" what is offered now on sponsored television. During the meeting, a Phonevision film was shown by Zenith Radio Corp., Chicago, which developed the pay-as-you-see system. Mr. Faught is a consultant for Zenith.

S-E Will Furnish Equipment For WOR-TV and WAFM-TV

AGREEMENTS to furnish television equipment to WOR-TV New York and WAFM-TV Birmingham were announced last week by William Zillger, vice president of Standard Electronics Corp., Newark, a subsidiary of Claude Neon Inc.

WOR-TV equipment for its new studio in the Empire State Bldg. will include a 20 kw transmitter (later to be converted to 50 kw), a standby TV transmitter, a 3 kw FM transmitter and all audio and video equipment. Layout for the new studio will be designed around Standard Electronics equipment and will enable two men to handle complete transmitting, including live shows, Mr. Zillger said.

WAFM-TV will add a 20 kw Standard Electronics amplifier to its existing 5 kw TT-5A transmitter to increase its effective radiated power to approximately 100 kw, Thad Holt, WAFM-TV president, was quoted as saying.

CONTRACT for Standard Electronics transmitting equipment for new WOR-TV New York studio in the Empire State Bldg. is signed by E. M. Johnson (l) station vice president in charge of station relations and engineering; William Zillger (c), S-E vice president, and Charles Singer, WOR-AM-FM-TV chief engr.

Don't Turn That Knob!

NEWS commentator Quincy Howe last Monday squeezed six minutes of comment into five minutes of actual broadcast time, using the "time compressor" developed at the U. of Illinois and announced a fortnight ago. The program was aired by WILL Urbana-Champaign, the university's non-commercial outlet. Inventors are Prof. Grant Fairbanks, speech research lab. director; Dean W. L. Everitt, College of Engineering, and R. P. Jaeger, formerly at the university.

DuMont Unit Sales Meet

THE SEMI-ANNUAL sales conference of Cathode-Ray Instrument Div., Allen B. Dumont Labs., was held last Wednesday through Friday at the division's national headquarters in Clifton, N. J. The sessions included discussions of production, advertising, and sales plans for the next six months. Division salesmen were shown a preview of equipment to be exhibited at the Institute of Radio Engineers convention beginning today (Monday) in New York.

Shorts

Connecticut Telephone & Electric Corp., Meriden, Conn., announces production of single generator covering vhf and uhf frequency range of 54 mc to 330 mc in first band and 300 mc to 950 mc in second band.

Hewlett-Packard Co., Palo Alto, Calif., announces production of all-purpose precision counter providing frequency, period and time interval measurements over broad range. Instrument designated Model 522B, measures rate of occurrences from .00001 to 100,000 per second.

Chemical Div., General Electric Co., Pittsfield, Mass., has issued 24-page bulletin containing information on industrial applications for polyester resins.

Federal Telephone & Radio Corp., Clifton. N. J., announces production of new "build-your-own" selenium rectifier kit that enables assembly of wide range of selenium rectifier stacks at reduced costs.

Telrex Inc., Asbury Park, N. J., announces production of Ultra "Bow Tie" series of uhf antennas featuring high gain, directivity and impedance characteristics over entire uhf band.

Shallcross Mfg. Co., Collingdale, Pa., announces manufacture of compact fault location wheatstone bridge for general laboratory use or field servicing of communications systems termed Model 6100. Unit measures resistance between 1 and 1,011,000 ohms to accuracy of +0.1% and +0.01%.

Roll-a-Talk Co., Detroit, announces production of Roll-a-Talk, new speech making aid which brings speaker's manuscript into view as he needs it. Speaker controls operation by means of push button which he holds in his hand.

Berkeley Scientific Div., Beckman Instruments Inc., Richmond, Calif., announces production of time interval meter, Model 5120, providing direct reading of elapsed time between any two events.

Rust Industrial Co., Manchester, N. H., announces production of new remote control system for both AM and FM transmitters consisting of studio unit and transmitter unit connected by two telephone lines. Up to nine meter readings can be made and up to nine operations controlled by dialing desired functions.

Graybar Electric Co. appointed distributor of TV sets by Hoffman Radio Corp., L. A., in Des Moines, Davenport and Minneapolis. **Lone Star Wholesalers,** Dallas, named distributor for Hoffman in that city.

General Radio Co., Cambridge, Mass., has published new bulletin describing complete line of firm's equipment for measurements of uhf.

Kahle Engineering Co., North Bergen, N. J., announces production of automatic lead wire welding machine and automatic filament making and tabbing machine for mass production of precision components for transistors.

Clarostat Mfg. Co., Dover, N. H., announces publication of second edition of Clarostat TV control replacement manual listing replacement controls by set model and chassis designation, set manufacturer's part number, Clarostat catalog number, function and description.

Magnetic Products Div., Reeves Soundcraft Corp., N. Y., relocates at new plant in Springdale, Conn.

Electro-Voice Inc., Buchanan, Mich., announces production of new Model 3300 continuously tuned uhf TV converter which adds all uhf channels to vhf sets.

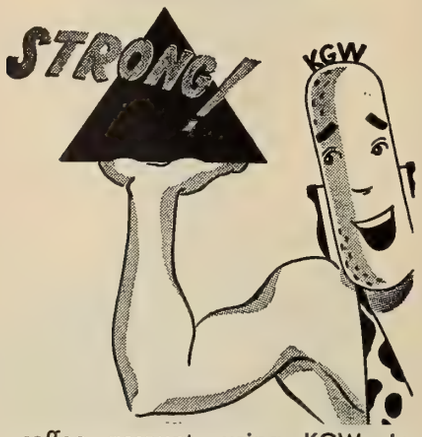
AFTRA Rules Members Must Answer Probers

SEVERE DISCIPLINARY action may be taken by AFTRA against its members who refuse to testify of past or present Communist party affiliation before the House Un-American Activities sub-committee hearings which reopen in Los Angeles today (Monday).

Authority for the penalties comes by virtue of a mail referendum vote by the membership.



IATSE Wins Jurisdiction

JURISDICTION over special effect projectionists at WNBT (TV) New York has been given to the Theatrical Protective Union, IATSE, (AFL) in an action by the National Labor Relations Board, Washington, D. C. Dispute was between IATSE and National Assn. of Broadcast Engineers and Technicians (CIO). Board ruled that the work handled by special effects projectors is more closely allied with jobs certified as bargaining units of IATSE rather than with NABET. Dispute originated last April, when the question of jurisdiction came up at an NBC television studio where a cast was rehearsing for the *Hallmark Playhouse*.

AFTRA San Francisco Pact

AFTRA has negotiated a contract in San Francisco covering free lance talent with KGO-TV KRON-TV and KPIX (TV) that city. The rates are the same as those for Los Angeles [B•T, Dec. 15], less 12%. New rates also negotiated for staff announcers at all San Francisco TV and network AM stations are $120 weekly for the first year and $135 thereafter.

EDUCATION

CBS-TV, SCHOOLS MAP BROAD SERIES

Leading American universities and CBS-TV disclose plans for a cooperative report on the schools' advances. Series will get under way in early fall.

PLANS for an ambitious educational program series, to be produced in cooperation with leading American universities, were unveiled by CBS-TV and participating educators last week after more than two years of planning and preparation. Some 22 universities and schools already are set to participate.

As described by CBS-TV President J. L. Van Volkenburg, Programming Vice President Hubbell Robinson Jr., other network executives, and presidents and other officials of participating colleges at a news conference in New York Wednesday, the series will dramatize scientific and cultural projects being conducted by educational institutions, showing their contributions to, and impact on, individual and national welfare.

The series will be presented weekly under the title *The Search,* and is to begin in late September or early October. Each program, a half-hour in length, will be filmed at the site of—and will feature those participating in—the project being presented.

Mr. Robinson estimated production costs for each film would approximate $20,000.

The series, it was said, will be offered for commercial sponsorship.

Among the subjects slated for presentation:

"Patients Are People," a project of the U. of Pennsylvania Medical Dept.; "Linguistics at The English Language Institute," U. of Michigan; "The Old Folks," a U. of Chicago study currently under way in Kansas City; "Last Man's Club," a study of cardio-vascular disorders, U. of Minnesota; "A Farm Boy Looks at Art," featuring the fine arts program of the U. of Iowa; "Neighborhood University," adult education project of the U. of Louisville; "Aristophanes Visits Old Smoky," a project in which a U. of North Carolina drama group visits neighboring states; "Great Issues" course of Dartmouth College; "The Weaver," on the School of Textiles at N. C. State College; "Leadership Training for Air Combat Teams," Ohio State U.; "Labor-Management Institute," Massachusetts Institute of Technology; "Aeronautics," Cornel U.: "Oceanography," Columbia U.; "Methods of Navigation," Brown U.

Mr. Robinson voiced the hope the series "will be the most ambitious and productive effort yet undertaken in the field of educational television."

26 Programs Planned

Sig Mickelson, CBS-TV director of news and public affairs, said the series might run to as many as 26 programs. Outlining the history of the series, he noted that it is "easy to put on dreary, dull, highly intellectual programs which repel anything but the top intellectual strata and thus serve no purpose other than to interest those who need no interesting." In the university series, he continued, "we wanted to reach the people who need it most . . . make our show significant, understandable, attractive and educationally sound."

"It is our conviction that *The Search* meets the strictest tests of good educational television," he declared.

Plans for the series drew high praise from the educators at the meeting, who described plans for their respective schools' participation in it.

Milton S. Eisenhower, president of Pennsylvania State College and honorary co-chairman of the National Citizens Committee on Educational Television, sent a statement that "the remarkable versatility and educational impact of television encourage the hope that it will help all of us gain enough knowledge fast enough to preserve the traditional American reliance on free individuals."

J. W. Harrelson, chancellor of N. C. State College, cited the series as "an outstanding example of close cooperation among educational institutions and private business for the public's benefit . . . Educational institutions and commercial television can become full-fledged partners in a nationwide program for the advancement of education and for broadening intellectual horizons."

TV Important Interpretive Medium

T. P. Wright, vice president of Cornell, said his school "looks to television as an important medium for interpreting its hundreds of projects, its dozens of educational programs, its ventures in public service."

Philip Davidson, president of the U. of Louisville, noted that in recent years his institution's service to the community "has been much more effective and widespread through radio and television"—that "our own experience shows conclusively that television is of major importance to universities and colleges, both as a means of formal education and of public service."

Schools set to participate in the series, in addition to those whose program subjects already have been decided, include the U. of California at Berkeley, U. of Southern California, California Institute of Technology, Colorado School of Mines, U. of Utah, U. of Washington, Northwestern U. and Pennsylvania State College.

Roy Lockwood, formerly of the March of Time, has joined the staff of CBS-TV, and will produce the series. He said he hoped to get two "pilot" projects under way within a month, and "then put the whole machinery in motion toward the end of May." He estimated that production work on each show, from start to finish, will require about eight weeks.

Second D. C. Group Proposes Filing for Reserved Ch. 26

OUTLOOK for assignment of noncommercial educational uhf TV Ch. 26 at Washington, D. C., was clouded further last week when a group apart from the Board of Education announced plans to incorporate with a view toward eventually seeking the channel. FCC earlier advised the school board that legal and financial questions prevented action at this time on its pending bid for Ch. 26 [B•T, March 2].

To comprise representatives of schools and cultural institutions in the nation's capital, the new group is expected to incorporate this week as the Greater Washington Educational Television Assn. Inc. A formal organizational meeting is scheduled April 2 to plan financing the proposed station. The group has invited 25 area schools and organizations, including the Board of Education, to join in the venture.

GWTEA's formation is being "encouraged" by Earl Minderman, former assistant to FCC Chairman Paul A. Walker and now field liaison officer of the National Citizens Committee for Educational Television, a project of the Ford Foundation's Fund for Adult Education. The latter has offered $100,000 to the Washington group under certain conditions.

N. J. STUDY FAVORS TEST CHANNEL

State Commission would set up New Brunswick station, with state-wide coverage planned.

RECOMMENDATION for the construction and operation of a television station at New Brunswick for expansion of research and experimental work in education television was made March 13 in the first report by the New Jersey Commission on Educational Television to Gov. Alfred E. Driscoll.

The report pays tribute to the potentialities of TV as an educational tool and projects a course for the state that may result in statewide coverage with six educational, non-commerical stations. For the present the commission recommends that the legislature appropriate $190,000 to continue research already under way at New Brunswick and $425,350 for construction of the station and other facilities. These funds would be for the 1953-54 fiscal year.

The report is based on findings of a 10-man commission which was appointed by education commissioner Frederick M. Raubinger. Members of the commission included Dr. Elmer W. Engstrom vice president in charge of RCA Labs. Div. of RCA, chairman; Dr. Allen B. DuMont, president of Allen B. DuMont Labs. and Robert B. MacDougall, director of educational activities for WATV (TV) Newark.

The proposals of the New Jersey commission follow on the heels of the controversial report of the New York temporary state commission on the use of television for educational purposes, which rejected a plan for the establishment of a 10-station network [B•T, March 2]. The New Jersey group took cognizance of the conclusions of the New York commission, and added:

"This report by the New Jersey commission . . . clearly states that there are problems to solve, but here the commission is convinced that the state of New Jersey has an obligation to conduct work and to take an active part in the establishment of the best practice for utilizing television in education."

Advocates Rutgers Location

The major recommendation in the report advocates the building of a station with a studio on the campus of Rutgers U. at New Brunswick where experimental in-school programming via rented microwave facilities has been in progress since January, and the erection of a 5 kw transmitter and antenna at Washington Rock State Park, Watchung. The report claims that the proposed station would reach approximately one-half of New Jersey's population.

With the experience gained at the New Brunswick station, the report continued, plans could be formulated with respect to additional educational TV stations in the state. Tentative sites for these stations as suggested by the report, are Montclair, Camden, Freehold, Hammonton and Andover.

Other recommendations included a proposal that local boards of education be responsible for providing television receiver facilities in the schools and an appeal to Gov. Driscoll and the Commissioner of Education to petition the FCC to extend for two years the period within which the state can apply for channels now reserved for non-commercial educational projects. The present deadline is June 2, 1953.

The commission held that decisions regarding programming for the proposed station and subsequent stations should be subject to checks by an advisory board of citizens, and added that it plans to submit recommendations on this phase in a later report.

In a supplementary statement, J. Lindsay de Valliere, state director of budget and accounting who was the only dissenter to the report declared:

"I am unable to sign the first report . . . because as chief fiscal officer of the state, I know that the state's finances are such at this time that the legislature would be unable to appropriate a sum in excess of $600,000 in the next fiscal year without the imposition of new taxes. This statement applies not only to the educational project but also to any other project.

"It is my belief that the commission should continue its study for the next fiscal year so that they will be in a position to make a final report to the legislature in 1954 at which time it may be possible that funds may be available not only for the initial proposal but also for an expanded program."

'Captive' Students

MANY SCHOOLS and colleges throughout the country are requiring students to listen to NBC radio's *End of an Era*, one-hour documentary program on life in the U. S. for the past 20 years, the network reports. The documentary is a "must" for the school systems of Flint, Mich.; Michigan City, Ind.; Cornell U.; Miami U.; Berea College; Kansas State College, and a number of junior colleges, according to NBC.

Holm's View on Educational TV

THE ILLINOIS Broadcasters Assn. is not against the principle of educational television but is "unalterably opposed to the creation of a giant coast-to-coast educational network of 500 to 600 stations, operated and controlled by educators, either immediately or ultimately subsidized by our state and federal governments."

These convictions were stated by IBA President William Holm, WLPO La Salle, in a talk March 14 before the Fifth Annual School Public Relations Conference at Normal, Ill. Sessions were co-sponsored by Illinois State Normal U. and the Illinois Education Assn. (Also see IBA story in Trade Assns.)

Plan Religious Workshop

EIGHTH annual religious broadcasting workshop, sponsored by the Broadcasting and Film Commission of the National Council of the Churches of Christ in the USA, will be held Aug. 10-28 at Butler U.'s School of Religion and at WFBM-TV Indianapolis. Tuition is $50 for a limit of 50 persons. Information may be obtained from the Commission at 220 Fifth Ave., New York.

Illinois School Berates Educational TV Financing

"EDUCATORS can ill afford to devote their time to raising funds for television when special efforts are required to raise funds for their own institutions' operating needs."

This was acknowledged last Thursday by the Illinois Institute of Technology in a statement on the status of educational television.

IIT is one of 15 member groups in quest of vhf Ch. 11 in Chicago. Its president, Dr. John T. Rettaliata, is temporary chairman of the Chicago Educational Television Council, a non-profit corporation set up to raise funds for the construction and operation of the Chicago TV outlet. The council also would be licensee of the station if and when approved by the FCC. It hopes to file an application shortly.

Chicago educators are seeking between $300,000 and $500,000 to establish and equip the station, with an additional $250,000 required to sustain each year's operation.

The activities of the newly-formed citizen's group to raise money for an educational TV outlet in Chicago were criticized by Rep. Charles H. Weber (D-Chicago), author of legislation which would allocate $1 million each to educational stations in Chicago and at the U. of Illinois.

He scolded the fund-raising committee for not supporting his bills, on which hearings have been postponed [B•T, March 16, 9]. He offered a resolution asking that a legislative commission be set up to investigate the Chicago educational TV venture.

DR. BAKER LAUDS EDUCATIONAL TV

Medium could advance knowledge and keep "economy strong," GE vice president tells Poor Richard Club.

PRAISE for the potential of educational television, and a warning that failure to make use of the medium "would be a mistake that would affect our civilization for centuries to come," were voiced last week by Dr. W. R. G. Baker, General Electric Co. vice president and general manager of its electronics division.

At a luncheon meeting of the Poor Richard Club in Philadelphia Monday, Dr. Baker claimed that to keep America's economy strong, "we must take the utmost advantage of our increasing technology to increase productivity and to make the best use of our national resources." He cited current shortages of engineers and scientists as a condition that reduces the nation's productivity.

"Educational television can provide the inspiration necessary to lead many of our young people to extend their schooling. Educational television can have a tremendous effect upon our adult population and can raise their educational age, not only through actual training but through inspiring adults to take extension or correspondence training."

Referring to a report by a New York state temporary commission on educational television, which rejected a state Board of Regents' proposal for establishment of a 10-station educational TV network [B•T, March 9, 2], Dr. Baker cited criticism which described the report as "an incredibly clumsy and shocking document."

On the question of competition with commercial channels, Dr. Baker declared: "Owning a commercial station obviously is not a license to chain people in front of their television sets and to hypnotize them from turning to any other channel."

"If education can be made interesting enough to compete with entertainment," he said, "we can take new pride in American people and at the same time look forward to improvement in entertainment."

North Carolina TV Study

NORTH CAROLINA state commission studying the problem of getting its eight assigned educational TV channels on the air plans to ask FCC to extend the June 2, 1953, deadline to June 30, 1955. The group also will ask the state legislature to approve $12,000 to finance its continuing survey, which has used up $5,000 already allocated.

Gordon Gray, president, U. of North Carolina, reported plans for university stations at Chapel Hill, North Carolina State College and Woman's College. He said the school will finance operations with private funds, and that the Ford Foundation has offered $100,000 if the school matches the sum.

Joint TV Farm Clinic

JOINT TV farm clinic was held last Monday by WOC-TV Davenport and WHBF-TV Rock Island in cooperation with Iowa State College and the U. of Illinois. The clinic for vocational agriculture teachers, home advisors, home economics instructors, college officials and others interested in farm work was held at Davenport.

NEW DIRECTORS of renamed Canadian Assn. of Radio and Television Broadcasters, photographed at annual convention in Montreal are (l to r): Seated, John Craig, CKX Brandon; J. A. Dumont, CJAD Montreal; F. H. Elphicke, CKWX Vancouver (president); Malcolm Neill, CFNB Fredericton (past president), and William Rea Jr., CKNW New Westminster; standing, F. B. Ricard, CHNO Sudbury; Gerry Gaetz, CJCA Edmonton; Ted Campeau, CKLW Windsor-Detroit; Hal Crittenden, CKCK Regina; Wally Slatter, CJOY Guelph; Jack Davidson, CKGB Timmins; Jean Paul Lemire, CKCH Hull. Absent, E. F. MacDonald, CJCH Halifax (vice president), and Henri LePage, CHRC Quebec. Convention was held March 9-12.

Survey Minimizes Effect Of TV on Radio Listening

LITTLE change in radio listening habits in Canada's television areas is reported in a survey made by Elliott-Haynes Ltd., Toronto. The survey, based on 1948 and 1952 in the Toronto - Hamilton - Niagara area, shows sets-in-use during evening hours averaged 35.7 in 1948, when TV reception was negligible.

CANADA

In 1952, when there were about 130,000 TV sets in the area (representing close to 20% of the total homes), radio sets-in-use averaged 34.6 during evening hours. The total radio audience has not suffered to any marked degree with the advent of TV, the report shows. It recorded 248,000 TV sets in Canada Jan. 1.

Families, before buying TV sets, had not been enthusiastic radio listeners, preferring movies, social activities and reading, according to the survey. The TV audience came mostly from the 63.5% of the public which did not have sets turned on when surveyors called in 1948, showing, according to the report, that TV has built a new audience without disturbing the radio audience. Most TV families interviewed said newspaper and magazine reading has decreased, they see fewer movies, go out less socially, entertain more at home and sleep less.

The survey shows there are an average of 4.2 viewers for each TV set, compared with 2.75 listeners per radio.

More Commercials in Erin, According to Visitor in U. S.

GROWING trend toward commercial sponsorship of radio programs in the Republic of Ireland was reported in an interview with B•T Wednesday by Padraic O'Reilly, former chief announcer and station supervisor of Radio Eireann, Dublin.

IRELAND

Mr. O'Reilly, in New York for a week, was flown there by ABC to report the St. Patrick's Day parade on television.

He said three of the daily total of nine hours of broadcast time is sponsored on Radio Eireann, and industry leaders believe the government will make more time available to advertisers. In January, he said, the government appointed a five-man commission to formulate policy and supervise activities of Radio Eireann.

Mr. O'Reilly recently was appointed radio director for O'Kennedy-Brindley advertising agency in Dublin. He said this is the first time that an Irish agency has set up a radio department.

Radio Eireann, the sole radio station in Ireland, uses three transmitters to reach three million people there.

Bergen Tops in Canada Among Nighttime Shows

SIX of the leading 10 evening network shows in Canada for February were fed from the U. S., according to the national rating report of Elliott-Haynes Ltd., Toronto. Leading were the *Edgar Bergen Show*, with a rating of 32.4; *Amos 'n' Andy*, 31.2; *Radio Theatre*, 29.1; *Our Miss Brooks*, 29.1; *Great Gildersleeve*, 21.5; *Your Host*, 20.9 (Canadian), *Wayne & Shuster*, 18.6 (Canadian); *Ford Theatre*, 18.4 (Canadian); *Suspense*, 18.1, and *Don Wright Chorus*, 18 (Canadian.)

CANADA

In the daytime, *Ma Perkins* with a 17.4 led the parade in February, followed by *Pepper Young's Family*, 16.9; *Right to Happiness*, 15.3; *Happy Gang*, 14.7 (Canadian), and *Road of Life*, 14.5.

The leading five French-language evening shows were *Un Homme et Son Peche*, 41.8; *Radio Carabin*, 35.6; *Chanson de l'Escadrille*, 27.9; *Metropole*, 27.7, and *Cure de Village*, 26.7.

BBM Elects Officers

CHARLES R. VINT, president, Colgate-Palmolive-Peet Co. Ltd., Toronto, was re-elected president of the Bureau of Broadcast Measurement at the annual board meeting in Montreal March 12. Horace N. Stovin of the station representative firm of same name, Toronto, was elected vice-president. Athol McQuarrie, Assn. of Canadian Advertisers, Toronto, was re-elected treasurer, and C. J. Follett, ACA Toronto, is executive secretary. Three new directors were elected for three-year terms: William Cranston, CKOC Hamilton; Mr. Vint, and G. F. Mills, Spitzer & Mills Ltd., Toronto.

"RANCH HOUSE"

"Pardner— I roped 5,396 letters with only two announcements!"

"I've been a trick rider and roper in rodeos, but never had a stunt equal what happened when I asked our WPTZ television audience to see how many four-letter words they could make out of the name of our show, 'Ranch House'.

"I asked them only twice, and I didn't offer the Grand Canyon for the most words—just a wrist watch from a local jeweler, but—

"We were swamped . . . with 5,396 letters, packed tight with words our fans took time to figure out.

"Maybe they like our show because it's not high-brow or high-pressure. Just a friendly get-together for some guitar, singing, and square dancing, three times a week—Tuesday, Thursday, and Saturday. But whatever it is, we've made real friends, of youngsters and grown-ups, too.

"You still have time to get in on 'Ranch House'—we have a few participations open,* and we'll make you at home. Can't promise 5,396 letters every time, but **we'll sure try!**"

A radio-television success story:

HOW HOSPITALIZATION PLAN WAS SOLD IN INDIANA

BLUE CROSS-BLUE SHIELD has advertised in Indiana with success.

In this instance, it meant that the hospitalization insurance firm enlisted $100,000 of radio, TV, and newspaper space in an all-out campaign to stimulate individual and group enrollments. It was the first time Blue Cross had carried a paid advertising campaign in Indiana—and advertising people in Indianapolis are still talking about it.

Two TV and 20 radio stations put the message on the air. Thirty-six daily and 67 weekly newspapers printed it. Fifty thousand people heard and saw it—and took advantage of the medical plan.

Warren G. Davis, Blue Cross associate who generaled the campaign, describes it this way:

It didn't just happen—it was planned that way to acquaint the general public with the objectives of the Blue Cross-Blue Shield plan and to stimulate group and individual enrollments.

Radio and TV stations collaborated in an intensive educational or orientation drive, joining hands with newspapers in 34 central Indiana counties to put across the project Feb. 1-14.

Results Are Due To Broadcasting

"We feel that the results are very satisfactory and we attribute the success of the campaign primarily to the cooperation of broadcasting stations," Mr. Davis told B•T. Stations also donated time to the cause.

The story is one of participation by two television (WFBM-TV Indianapolis and WTTV (TV) Bloomington) and 20 radio stations (three FM) in the immediate area. The specific goal of Blue Cross-Blue Shield was to familiarize the public with the reasons for high costs of necessary hospital-surgical-medical care and the plan to pay for this care.

Of course, the job wasn't done overnight or even in a month. Last summer, Mr. Davis and Richard Miller, public relations director of Blue Cross-Blue Shield, spent two days at WLWT (TV) and WKRC-TV Cincinnati watching the plan in action.

"We came back with only an idea or a desire . . . not a plan of action," Mr. Davis explained, "for there are many differences between the Cincinnati and the Indiana Blue Cross-Blue Shield plans. One of the most important of these is the fact that the Cincinnati plan covers only a few counties right around Cincinnati while the Indiana plan is statewide."

That posed a question: Should the Indiana campaign be put on a statewide basis? Do we have enough manpower to handle a statewide campaign at this time? In the end, Mr. Davis and his associates decided it would be wiser to make a test on a smaller scale.

What better way to accomplish its purpose, Mr. Davis reasoned, than by word of mouth? The campaign was "built around TV, though nobody had the idea that TV would, or could, do the job alone," he explained. The campaign itself resolved into a thorough integration of all media, but with radio and television playing the predominant role.

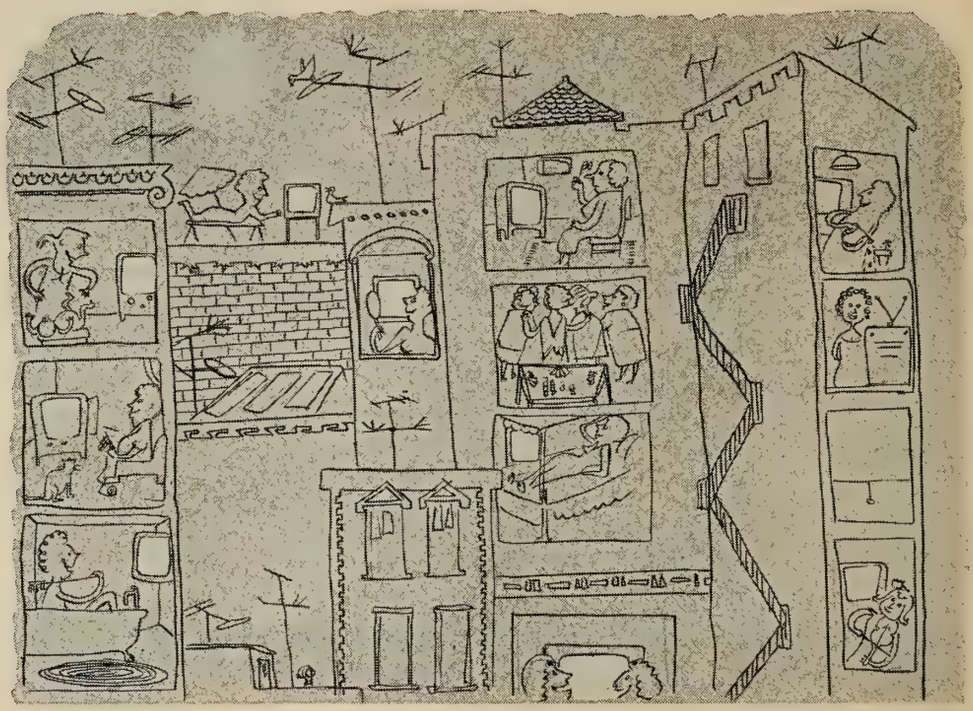
As a result, Blue Cross-Blue Shield accomplished in two weeks, thanks to a concerted advertising drive, what it originally felt would take a year—handling 60 community re-enrollments in some 240 communities.

Buying Is A Job In Itself

Mr. Davis and his associates went to work in earnest. They scheduled two 15-minute shows, 33 five-minute programs, 72 one-minute announcements and 138 eight-second announcements (time signals or IDs) on WTTV and WFBM-TV, seeking out availabilities months ago. Says Mr. Davis: "It is quite a job even to *buy* that much TV time in a 14-day period."

Blue Cross also had its other problems. It bought time on WFBM-TV at the start of the campaign and, not prepared to fill it, turned to a professional cast of talent from WIRE and other stations. It put on a 15-minute show titled *Without Warning*. Messrs. Davis and Miller liked it so well they took the cast to WTTV (TV) and repeated the performance.

On radio, Blue Cross-Blue Shield bought time on 20 stations from early morning to late at night, with programs ranging from hillbilly shows to sponsorship of two complete opera broadcasts. Over 2,000 spot announcements were carried by area stations.



In addition to one-minute TV spots, Blue Cross also had two filmed spots in color—one for motion picture houses on 35mm and another for use on TV in 16 mm black and white.

"Thousands of applications for membership were received from people who have no group connection and have never been able to join Blue Cross-Blue Shield in the normal way," Mr. Davis recalled. He also cited gratifying response by telephone and mail from firms that wanted to enroll their employes in the plan. No final results will be obtained before the end of March.

In point of informing the public, Mr. Davis feels that the results were "terrific."

DAY TIME CAN BE

It wasn't long ago that a lot of broadcasters said that women couldn't spare the time from household chores to watch daytime television. How wrong they were is explained here by a manager whose station's daytime sales have risen 300% in a year.

By Craig Lawrence*

SOME years back, before the TV race had really begun, one of the frequently heard predictions was that women would be too busy to watch television in the daytime.

At that time I made myself fairly unpopular with wives of friends and acquaintances by sticking to the opposite viewpoint. I maintained then, as I do now, that women are never too busy to do what they want to do. Whether it's bridge, movies, gossiping—or television—they'll find time for it if the urge and attraction is there. Walk up and down Third Avenue in New York some sunny day and count the overworked housewives resting their elbows on window-sill pillows, just looking.

Experience has proved that women do have the time, and the inclination, to watch television in the daytime in ever-increasing numbers. The New York market is a good one to use as a gauge of the daytime potential, because it is one of the "oldest" TV markets, has about 77% set ownership and has had seven stations operating for a considerable length of time. Hence, the story of the growth of daytime TV here can be of interest to operators and prospective operators in other markets, as well as to advertisers and agencies.

Last spring it seemed obvious to us at WCBS-TV and CBS-TV Spot Sales that the acceptance of daytime television by spot advertisers had not kept pace with its acceptance by viewers. At that time we started a continuing study and sales campaign which has brought new advertisers into the medium and encouraged others who had used it only in the evening to try the daylight version too.

One of the most significant studies we used was made by Advertest in May, 1952, in which there was a direct comparison of daytime viewing by women with the same month of 1951. It showed that there were about 24% more women viewing each day and that the gain in sets-in-use per daytime hour had increased about 38%.

Advertest also reported that these women watched daytime television for an average of 13 *hours* per week. The most awe-inspiring figure that could be drawn from this study was the 14,936,064 hours per week which Greater New York women were putting into the watching of television during the daytime. That was a gain of about 61% over the previous year and is a mighty significant figure for marketers and merchandisers to keep in mind. Nearly 15 million hours per week with one medium, in one part of the day, is something more than a sociological phenomenon.

Armed with this ammunition, we went to work. Our first effort was a modest-appearing, but well-documented, brochure which we called "In the Daytime, Too, It's Channel 2." In it we compared May, 1951, with May, 1952, showing:

a) The growth of general daytime viewing in the New York market.

* Mr. Lawrence has been general manager of WCBS-TV New York for the past year, joining that station after long executive service with various Cowles Broadcasting Co. stations, including WMT Cedar Rapids, Iowa, KRNT Des Moines, WNAX Yankton, S. D., and WHOM Jersey City. His latest pre-CBS post was vice president of WCOP Boston. In 1951-'52 he was First District director of NARTB.

A HOT TIME ON VIDEO

b) The increased number of women viewers;

c) The large increase in hours women watched TV;

d) The above-average gains in daytime audience made by WCBS-TV (the station's quarter-hour rating had risen 100%, from a 2.4 to a 4.8).

At the same time we introduced a new sales plan for daytime announcement users which we titled the "12 Plan." It was devised to encourage advertisers to use enough announcements each week to provide maximum unduplicated circulation, plus the sales power of repetition through adequate frequency. Under the "12 Plan," any advertiser using 12 or more daytime announcements per week receives a 45% discount from earned rate.

The next step was up to our salesmen.

They, too, knew that the daytime TV audience presented a great untapped market. Employing the personal approach, they visited agencies and clients, told them the facts and figures and sold them on the idea of getting into daytime TV in a big way. Many of the first to sign with WCBS-TV were the largest and most insistent advertisers. Included were such accounts as General Foods, Flako Products, Vicks, Lever Brothers, Best Foods, Pond's, Hudson Pulp and Paper, Bab-O, Philip Morris and many others. Today 28 advertisers are using the "12 Plan." In order to accommodate these "12 Plan" users, WCBS-TV a few weeks ago went on the air 90 minutes earlier every Monday-thru-Friday morning. Only recently, it added an additional 75 minutes to its Sunday morning schedule.

To bring advertisers up-to-date on our daytime progress, we issued a second brochure, titled "Daytime Is Better Than Ever," in the fall of 1952, which showed the strong advertising acceptance of daytime television, WBCS-TV style. It pointed out how one advertiser, using shared station identification announcements, was making 4,222,750 viewer impressions a week—using only Class C time—at a cost of only 9½ cents a thousand! And it showed the healthy rating climb of daytime TV, with programs on WCBS-TV holding eight of the top 10 positions.

On the programming side also we found that the elimination of juvenile shows in the late afternoon was a profitable move. The young-fry audience in New York was being split too thinly, with almost every station aiming its programming at children during those hours. Since the housewife is still the chief buyer in the American home, we program exclusively for her and other adult members of the family now. As a result, our *Late Matinee,* from 5-6 p.m. Monday-thru-Saturday, is completely sold out. And this series has 48 participations a week!

In many other time periods the daytime schedule is much stronger than it was a year ago. The CBS-TV network now has Arthur Godfrey on the air for a full hour four days a week in the morning, from 10 to 11 a.m. Our local programming begins at 7:50 a.m. with *News and Prevues,* followed by *Telecomics* and *Time for Beany,* at 8 a.m. and 8:15 a.m., respectively, for the children before they go to school, and by *Kovacs Unlimited* for a full hour beginning at 8:30 a.m. The latter show did an excellent job at 12:45-1:30 p.m. and needed the expansion to accommodate increased daytime announcement business.

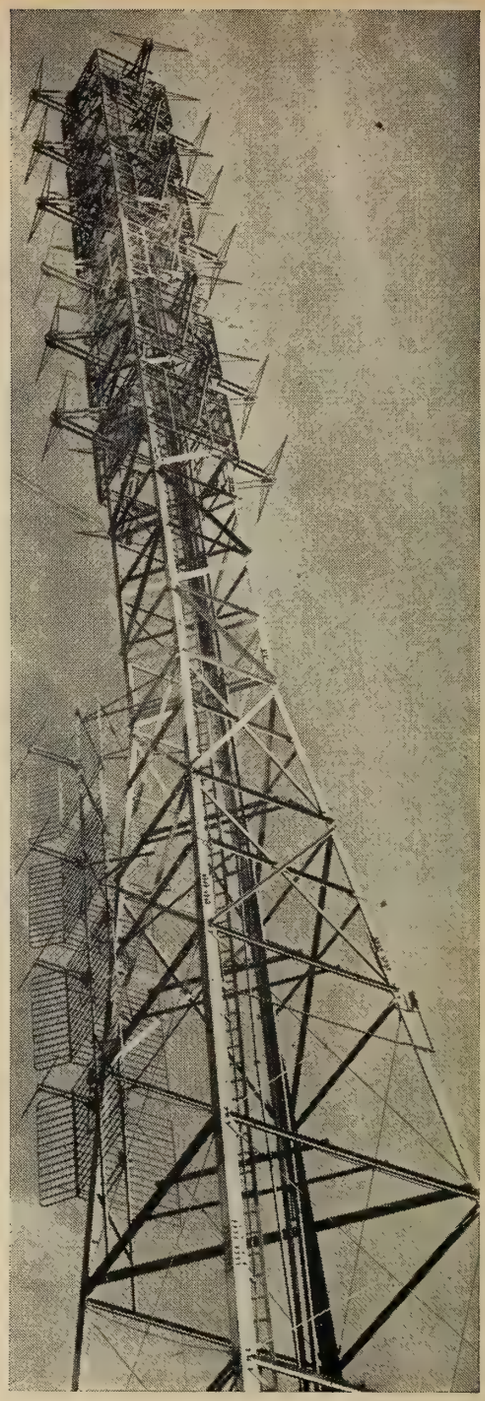
In the afternoon, such network shows as *Art Linkletter's House Party* have attracted new viewers. These were recently augmented by *Freedom Rings* and *The Eddie Albert Show,* with *The Big Payoff* set to join the schedule early in April. Network-wise the daytime business has been developing too, and in both areas, local and network, there has been a constant effort to maintain the upward trend of daytime viewing and to keep more New York eyes on Channel 2.

All of this activity has been coupled with heavy promotional and publicity campaigns, at both the local and network levels. The portion of WCBS-TV's promotion budget devoted to daytime was increased from 10% to nearly 40%. We used considerable space for daytime TV advertising in the local edition of *Quick* magazine, in *TV Guide, Parkeast* and in the major daily newspapers. Of course, we also pushed our daytime program schedules with heavy on-the-air promotion.

Today WCBS-TV has twice as many daytime spot advertisers using three times as many announcements as it had last year at this time. Some of these advertisers have never used the medium previously. Others were using daytime TV on a small scale and increased their schedules to take advantage of the combination of greater net circulation and repetition through frequency. Others added to nighttime schedules to reach women more times each week at a low net cost.

As we move into 1953, everything points to a continuing upward trend in daytime viewing an advertising. It is a good safe bet that there will be:

a) More TV homes in the market;
b) More sets-in-use per quarter hour;
c) More women watching TV;
d) More hours of viewing per week.



It is that combination which any advertiser who sells to women must weigh carefully in completing his 1953 advertising.

A year made a big difference in daytime audience. From May, 1951 to May, 1952, New York TV sets-in use gained 38%; about 24% more women were watching for an average of 13 hours per week. Total viewing in May, 1952, was nearly 15 million hours per week, up 61% over viewing the year before.

1951 1952

TWO ARE BETTER THAN ONE

TWIN antenna systems constructed at a total cost of $60,000 are being used by KRON-TV San Francisco, which believes it is the first single TV outlet to make use of this type of equipment.

The San Francisco NBC affiliate's double antenna systems thus protect its TV signal against interruption arising from storm or wind damage. The twin systems can be used interchangeably, with both picture and sound being fed to either antenna.

In operation since Jan. 3, the RCA TFS-6B4 double antenna group is believed by KRON-TV to be the first of its kind with a split feed. It is a variation of the so-called super-gain type, according to Chief Engineer Lee Berryhill, and transmits an omnidirectional pattern.

Located in an exposed site atop San Bruno Mountain, the KRON-TV tower is 1,480 ft. above sea level with a 1,441-ft. effective transmitting height for the double system. The station believes this is the highest origination point for any TV signal in Northern California.

Since the San Francisco Ch. 4 station's increase from 14.5 to 100 kw effective radiated power on Feb. 14, the KRON-TV signal normally has gone out simultaneously over both systems, Mr. Berryhill said.

The station's tower, as now modified, supports both antenna systems, each system consisting of three layers of vertically stacked dipoles covering all four sides of the tower. Immediately below the top three layers of the first antenna is the second antenna system of three layers of dipoles. Each layer is backed by reflecting screens placed on all four sides of the tower. Each antenna system includes 12 dipoles, or a total of 24 for both systems.

Separate coaxial lines feed the two antennas, with power divided equally between them by a dividing T in the KRON-TV transmitter building.

The double antenna power gain of 4.5 enables the station's new RCA 25-kw transmitter to operate at its maximum 100 kw.

RUN ON STOCKINGS

BOOM in sales at Shepard's shoe store in Lansing, Mich., was attributable to a 3:15-3:30 p.m. disc jockey show on WILS that city, aired for three days directly from the store. The five-a-week, participating *Club 1320* is conducted by Dave Froh, who admittedly beams his talk to a feminine audience. Shepard's sold 47 pairs of $1.35 nylons for 79 cents each 25 minutes after they were offered on one of the three broadcasts, according to Homer Shepard, proprietor of Shepard's, a regular sponsor of *Club 1320*. Some 1,000 autographed photos of Mr. Froh were given away during the three broadcasts, and other requests for photos have come from all over central Michigan, the station reports.

To sell Garden Supplies to inland Californians
(AND WESTERN NEVADANS)

Be on the Beeline

This season, as usual, there will be a bumper crop of back fence gardening conversation. But at the same time, *inland* Californians will be buying yards and yards of garden implements and supplies.

To tell them about *your* product, tell them on the BEELINE — a 5-station radio combination that gives you: —

THE MOST LISTENERS More than any competitive combination of local stations . . . more than the 2 leading San Francisco and 3 leading Los Angeles stations *combined.* (BMB State Area Report)

LOWEST COST PER THOUSAND More audience, more favorable Beeline combination rates. (BMB and Standard Rate & Data)

McCLATCHY BROADCASTING COMPANY

SACRAMENTO, CALIFORNIA PAUL H. RAYMER, National Representative

He's a cowboy who never shoots a varmint or hits leather to head 'em off at Eagle Pass, but a Washington food store chain is gambling $250,000 that he'll rope youngsters and their mothers into buying more Heidi bread than all the chuck wagons in the west could carry.

GIANT STORES BET A WAD ON A PEACE-LOVING COWBOY

By Jane Pinkerton

WHY DOES a local advertiser spend $250,000 a year on television, when the client used only an occasional participation before?

That's an answer which Giant Food Department Stores Inc., Washington, D. C., and WTOP-TV (CBS) find it easy to come by after months of preparation for an all-out promotion in behalf of Giant's 24 stores in the metropolitan area of the nation's capital.

Giant Stores, through Henry J. Kaufman and Assoc., Washington agency, is sponsoring 12 hours weekly of local programming on the CBS outlet there. The program is the *Pick Temple Show*; the star, Mr. Temple, a folksy, singing cowboy minus firearms who loves all the world's little critters and never uses the word varmint.

Random Last Year

Giant during the past year used a random participation schedule on Mr. Temple's show. During an executive review session, however, the food chain officials decided the time had come to push Heidi bread, sold only in the Giant outlets and made by a Giant subsidiary, Heidi Bakeries in nearby Silver Spring, Md. What was conceived as a small spot schedule for the bread, and, very incidentally, as a general Giant promotion, grew into a behemoth of local advertising.

Convinced that advertising should be comprehensive, meaningful and well done, Giant management turned down the less ambitious spot television plans and worked out complex details of an advertising, merchandising and promotion program which will cost about $250,000 the first year.

Because bread can be pitched easily to youngsters, the company went into the *Pick Temple Show* as a full-time vehicle. To gain the maximum in merchandising and a personalized touch, Giant insisted it buy Mr. Temple's services exclusively, using him on a firm one-year contract with option for another 52 weeks. Successful negotiations with WTOP-TV and John S. Hayes, president of the station (which is owned 45% by CBS and 55% by the *Washington Post*) resulted in cancellation of 11 spot schedules on the show and concentration on Giant sales messages starting March 1.

The cowboy-folk singer was selected because of the continuing craze among children for western heroes, and because competitive breads use similar idols (Sunshine bread uses Gene Autry; County Fair bread, the Cisco Kid, and Bond, Hopalong Cassidy). Giant had a wide choice of nationally-known cowboys which it could have sponsored on a local basis, but selected Mr. Temple because of his community identification, local popularity, availability for personal appearances and his uniquely-shaped cowboy personality which stresses the good behavior of children that concerned parents try to impress upon their offspring, usually without success.

Giant, because it is a local enterprise, feels a distinct responsibility to the community which it serves, says Robert Maurer, account executive and television director at Kaufman agency. Good business is good ethics, according to the definition in the

The moral here seems to be that if Heidi bread is good enough for Pick Temple's dog, it's good enough for Pick Temple's small fry audience. Watching Mr. Temple feeding Lady are Robert Maurer, of the Kaufman agency (extreme left) and Clarkson Gemmill, of Giant stores.

Millions of viewers weekly will follow the Visitor through barred gates into the lives of fascinating people. And, wherever he goes,

The Visitor Sells Your Products!

In your markets, at local prices, you can sponsor this high-rated program *exclusively*. As "THE DOCTOR" on NBC Network, it scored a 5-month average Nielsen of 29.2. In brand-new format, the show is fresh, appealing, popular.

What's more, each sponsor's sales efforts are strongly supported by advertising, promotion, publicity, exploitation and merchandising. You get the program PLUS the full force of this powerful backing.

Order "THE VISITOR" immediately for your specific markets. Don't delay. Call or wire today.

NBC FILM PROGRAMS

NEW YORK, CHICAGO, LOS ANGELES

Giant dictionary, and, Mr. Maurer adds, good public relations.

In his presentation to the client, outlining the many advantages of this kind of sponsorship, Mr. Maurer crystallized philosophies of many Giant executives by outlining the "irreparable damage or the immense good" which television can effect. Mr. Temple, they believe, is a force for good, giving entertainment to all members of the household, adults as well as youngsters.

Giant expects, in the first year, to build him into a Heidi trademark, personalizing him to the point where the other national cowboy figures retreat further into a netherland of unreality. Children want, on occasion, to see their favorite stars, a remote eventuality in the case of personalities like Mr. Autry. Mr. Temple, however, will be accessible on many occasions, most of which are tied in directly with the show and the heavy merchandising which accompanies it.

Merchandising experts at the client firm, the agency and the television station have devised an elaborate merchandising program calling for a many-faceted campaign of saturation throughout the entire Washington area.

Saddle-Broken by Mail

Initially, all youngsters can enroll as a Pick Temple Giant Ranger Cowhand by getting a pre-addressed business reply card in any of the 24 stores. (Giant will build six more this year.) This, when forwarded —and no "box top" gimmick is required— entitles the youngster to a cowhand button, membership card and Ranger pledge, health chart and letter of welcome.

The youngster notes his accomplishments during the next month on the health chart, and it is countersigned by his mother (the bunkhouse foreman) and returned to Giant Ranch headquarters, after which he gets a ranch hand button and a Range rule chart. After living up to simplified "rules of living" outlined on the second chart, he returns them to get more material. All youngsters who write in have their names and birth dates on file, and the company plans each year to send the child a gift, beginning with a personally-autographed picture of Mr. Temple.

The March 1 start began with distribution of more than 100,000 balloons, dropped into food store shopping bags by the checkers. The company, in its first printing, published 200,000 16-page full-color comic books, with the television show as the theme; designed and printed dozens of different end-labels for the bread-loaves (drawn from scenes familiar to children watching the show), and printed 45,000 (as the initial order) buttons, health charts, rule charts, membership cards and fan pictures. The pictures, incidentally, are all glossy prints, more expensive but of better quality than photo prints.

In-store promotion complements the out-of-store promotion, with the largest display life-size cardboard cutouts of Mr. Temple standing beside the chuck wagon (the back of a standard covered wagon) on which loaves of Heidi bread are displayed. The real chuck wagon appears on the

HOW'S YOUR LOCAL TV FUTURE?

By Don W. Lyon*

1. How can my station increase its share of audience?

2. How can all stations in my market increase the television sets-in-use index?

3. Are my rates too high?

4. Can I pare my operating expenses even more than they have been?

5. How many stations will there be in this market in five years?

6. How many television homes will there be?

7. What is my cost-per-thousand homes figure going to look like in five years?

8. How good a competitive figure will I be able to offer local advertisers at that time?

These are questions that will need answering, for regardless of the glowing profit picture of many stations, television is still a long-term investment. And although some of the questions are made academic now by an unrealistic competitive situation, one has only to visualize two to four more stations in each market to see how real these questions will be in five years. To answer them for all markets—or for any single market—is not the purpose of this analysis. Rather, this is an approach that can be used in each market so that an owner or manager can figure out his own answers and draw his own conclusions.

The tables should be used as examples of the method. Figures change almost weekly. New factors are added or deleted, and other variables are constantly being introduced. Whereas these variables prevent the tables from being used as answers, a manager nevertheless should, for his own market, be able to project his competitive picture five years into the future and see the problems that face him in administration, programming, promotion and sales.

Assumptions and Sources

Here are the assumptions made and the sources of information used to set up the tables:

A. The particular markets selected were chosen only because of geographic distribution and variety of size.

B. The number of stations for each market as listed in Table 1 is the same as the number of commercial channels allocated by the Commission.

C. In Table 2, the number of stations has been reduced by two in each case, with the exception of Providence, Rhode Island, where only one station was subtracted from the Commission's allocations. The purpose of this is only to help a manager make up his mind in deciding which gives him a lower cost per thousand television homes—i.e., fewer stations or a greater total sets-in-use-index. Notice that in some areas the higher sets-in-use index (60%) is more effective in lowering the cost per thousand homes than eliminating two of the future stations in those areas. This, of course, is due to the fact that in those markets with more than five stations, the increase in audience is greater when a larger percentage of the total is used than when a smaller percentage is divided among fewer stations.

D. The 1958 figure for television homes was obtained from the number of *radio* homes in each of the television market areas, according to an NBC study, as of May 1, 1952. This figure was selected because it seems to offer the most logical maximum. That some day there will be as many television homes as there are now radio homes seems very possible, but it's hard to imagine that, in five years, there will be significantly more television than radio homes. It is largely around this point that a manager must build his local television future. Without either (A) a phenomenally large number of television homes or (B) an unusually high sets-in-use index, so that his station has a great many homes watching his programs, he may not be able to meet the competition of other media. In many markets, this problem is not a great one now, but a lowered sets-in-use index, together with an increased number of stations, might make it an extremely serious one. There is no indication

* Mr. Lyon is a television consultant and director of television and radio at the U. of Rochester, New York.

show, serving as a background for the informal commercials which Mr. Temple gives. Mr. Temple shops in one of the Giant stores each week, but no prior announcement is made as to which store because the traffic flow would be completely disrupted.

Pony Picnic

Giant is planning a pony picnic, and has been scouting the territory around Washington for an appropriate site which could accommodate several thousand youngsters and (considerably fewer) ponies. A feature of the show is a free "ride" for guests on a fake pony in the studio.

Mr. Temple uses no written commercials or script, although he follows a fact sheet. He appears Mondays through Saturdays from 4 to 5:45 p.m. EST, during which time he gives three commercials and/or Giant mentions, all integrated into show continuity woven around the feature film. On Sundays, the program is aired from 11 to 12:30 p.m. Week-day audiences are estimated at 50,000 daily, topped by 75,000 on the weekend.

The initial promotion centers on Heidi bread (Mr. Temple greets his audience with "Heidi, partner") and general promotion for Giant, but subsequent plugs will probably be given to other Giant private-label items, such as its butter, eggs and coffee. Heidi, even though it is only a year old, outsells all other breads in Giant stores at the rate of three to one. In the Washington market, however, it accounts for a very small percentage of total bread sales. Market figures show generally that the top three ranks are taken by Wonder, Bond and Wright's, which, combined, get an estimated 55%-65% of the bread dollar in the area.

Old Hand

Mr. Temple has been a WTOP-TV personality since January 1951, and joined WTOP in 1948 when he handled a series of Sunday afternoon programs of folk music which preceded network broadcast of the New York Philharmonic. He is an authority on folk songs, many of which he has collected himself, and has several recordings in the American Folk Music collection at the Library of Congress in Washington. A so-termed "serious" folk singer, he was transformed into a popular cowboy figure with the addition of a 10-gallon hat and a television camera, both the ideas of Mr. Hayes, president of the station.

He is the "right" vehicle for television, in the opinion of Clarkson Gemmill, advertising director of Giant, who believes strongly in television but "treads carefully" in its presence because of its impact as a mover of merchandise and a molder of children's character.

Fan Letter

He and his Giant associates are delighted with fan and customer reaction, and with a rare kind of letter which a mother sent Mr. Temple last week. Commending the cowboy singer for "the fact that you never exploit children for the sake of a laugh at their expense," she noted "It is easy to play along with children's more primitive inclinations and win their applause, but it takes real skill to bring out the best in them and make them like it!"

As for the Temple folk music, "Our three-year-old copies you, singing (in his own way) sadly for 'When I Walked Down the Streets of Loredo,' and getting a twinkle in his eye and tapping his toe for 'Big Rock Candy Mountain.' I don't mean he sings them accurately, but he *feels* them, and that's what's important."

This kind of response, Giant executives believe, makes good friends, and good friends make fine customers.

---

that television viewing five years from now will be significantly less than it is today, but certainly in view of radio's rather low average sets-in-use index, it is a possibility that must be considered, as audiences become more and more blase' about television.

E. The half-hour Class A rate used in each market is the average of the existing rates as listed in Standard Rate and Data. It is the one-time rate and includes no discounts, but neither does it include any costs for studio time, talent or production expenses.

F. The sets-in-use figure, of course, is either 40% or 60% of the projected television homes, with each station getting an equal share of that audience.

G. The cost per thousand television homes was arrived at by dividing the half-hour Class A average rate by the thousands of homes allotted to each station as its audience.

H. The cost per thousand newspaper homes was obtained as follows: 2400 lines were used as the basis for a full page. The flat line rate for general advertising, as given in Standard Rate and Data, was used for the paper having the largest circulation in each market. No combination rates were allowed, even though in many areas they are possible. No frequency discounts were allowed for either newspapers or television. No production costs for either medium were allowed. No readership figures or number of viewers per set were allowed. The unit of measurement in each instance was the cost per thousand homes—assuming only that a television set in use is being watched and that a newspaper delivered to the home is read.

These are the reasons and assumptions for the following tables, offered in the hope that they will prove helpful to you in determining future plans for the development of your station.

* Only one station was subtracted from the Providence allocations.

DISTINGUISHED service "Washingtonian" award of Washington, D. C., Junior Chamber of Commerce has been presented to John S. Hayes (l), president and general manager of WTOP-AM-TV Washington. Presenting award for "outstanding leadership and imaginative development of radio and TV programs" was Douglas R. Smith (r), National Savings & Trust Co. Chairman of awards committee was Judge Frank H. Myers (center), D. C. Municipal Court.

Stations Compete for Underwriters Awards

TWENTY radio stations and four TV stations, along with 44 newspapers, have been nominated by their respective communities for 1952 Gold Medal awards of the National Board of Fire Underwriters.

In announcing nominations last week, NBFU noted entries were recommended by fire department officials and civic leaders who judged the year-round contributions in fire prevention and fire safety. Radio and television station entries:

WKBW Buffalo, WJPD Ishpeming-Negaunee, Mich., WKZO Kalamazoo, WKMI Kalamazoo, WCCO Minneapolis, KMLB Monroe, La., WGH Norfolk, KFAB Omaha, WDBO Orlando, KWKW Pasadena, WJAR Providence, WRNY Rochester, KXA Seattle, KIRO Seattle, KRSC Seattle, KANS Wichita, WILK Wilkes-Barre, WSJS Winston-Salem, WTOB Winston-Salem, WNAX Yankton, S. D., WAAM-TV Baltimore, WBZ-TV Boston, KRLD-TV Dallas and WFMY-TV Greensboro.

The winner in each of the radio, television and newspaper classifications will receive a gold medal or $500 in cash, NBFU said. Honor awards also will be made. Selection of winners will be announced at a reception in New York April 9. This marks the first time a Gold Medal award will be made to a TV entry.

Judges serving on the panel for radio and television are Stuart Novins, CBS Radio director of public affairs; Leonard Blair, ABC eastern program director; Nat Shoehalter, WAAT-WATV (TV) Newark, N. J., director of public service programming, and Edward Stanley, NBC manager of public service programs.

Phil Rizzuto's Sports Caravan

a sparkling 15 minute transcribed radio series

About Phil. Everyone knows him . . . 12 years with the world champion Yankees.

About the Show. A fast-moving 52 quarter-hour sports program for twice-weekly broadcast. 26 weeks beginning mid-April through September, including a free-upon-request separate disc on which Phil will transcribe 5-second personalized lead-ins to commercials.

Production. Each transcription is double-faced, with 2 complete 15-minute shows, open-end for 1-minute commercials: open—middle—close.

Cost. Priced at incredibly low "quick-sale" rates.

Ad Woman of Year Award Contest Closes April 1

DEADLINE for entries for the annual Advertising Woman of the Year award, sponsored by the Council on Women's Advertising Clubs of the Advertising Federation of America, is April 1.

Full details may be obtained from AFA headquarters, 330 West 42nd St., New York 36, or through any organization affiliated with AFA. Nominations may be made by individuals or organizations. Blanche Clair of Allen, Lane & Scott, Philadelphia, is general national chairman of the award committee. Winner will be announced at AFA's convention in Cleveland, June 14-17.

TV Script Contest

STUDENTS enrolled in colleges or universities offering courses in radio or TV are eligible to compete for the first annual Victor Frenkil TV Script Award. The prize, $500 for the television script showing the "greatest potential of professional ability," was announced last week by Prof. Warren L. Strausbaugh, acting head of the U. of Maryland speech department, which will make the selection. Entries should be sent before May 11 to George F. Batka, assistant professor of speech, U. of Maryland, College Park. Announcement will be made about May 25.

Utley, Murrow to Be Cited

SOUTHWEST Journalism Forum will present awards to NBC's Clifton Utley and CBS' Edward R. Murrow, among other newsmen, in Dallas, Texas, May 2. Mr. Utley, radio-TV commentator at NBC Chicago and columnist of the *Chicago Sun-Times,* will receive an award for "top radio reporting", and Mr. Murrow a similar one for television. Others to be honored include Ralph McGill, *Atlanta Constitution;* James Reston, *New York Times,* and Richard Rovere, *New Yorker* magazine.

MERCHANDISING plan for WOR New York and 4,100 drug stores launched by: (Seated, l to r): Dr. Robert L. Swain, ed., *Drug Trade News* and *Drug Topics;* William Crawford, sls. mgr., WOR; Dominick Forlizzo, pres., Pharmaceutical Council; (standing) Prof. S. B. Jeffries, adv.-merch. adviser to council; Dan McCullough, *Tello-Test,* show used by group; Richard Storm, sls. mgr., Schieffelin & Co.; R. Volkening, sls. mgr., Rogers Drug Co.

DISTINGUISHED service award for 1952 goes to Lowe Runkle (r), of Oklahoma City agency that name, from Jim Willis, WKY-TV, and pres., Oklahoma City Adv. Club for Mr. Runkle's work in city's United Fund Drive.

VISITING FIREMAN by his own admission is Edmund Abbott, radio-TV dept., Foote, Cone & Belding, Cgo., as he gets the treatment at KBIG Avalon, Calif. from secretaries Mary Lou Conte and Gloria Bizari.

FM RADIO pulled 3,000 pieces of mail during a two-week baseball promotion at WNEX-FM Macon, Ga. in a contest sponsored by Graybar Elec. Co., Zenith distributor. Marion Bragg (l), coml. mgr., and Bob Savage, spts. anncr. tabbed mail from 80 cities.

PROGRAMS & PROMOTION —

NBC EVENING PROGRAMS

NBC spot sales has issued a promotion piece designed to point up the sales impact of late evening NBC radio programs aimed at an all-adult audience in New York, Washington, Cleveland, Chicago and San Francisco. Titled "Billy the Kid Packs a Mighty Wallop . . . But it's His Daddy's Wallet That's Loaded," the folder claims that local NBC radio shows between 11 p.m. and midnight can deliver a sales message to "a vast, wide-awake audience for as little as 29 cents per thousand adult listeners."

NEW PACKAGE PLAN

WMAL-TV Washington has inaugurated a new package plan, called the "7-11" plan, according to an announcement made by Harvey Glascock, sales manager for WMAL-TV. Any advertiser buying 11 or more announcements per week now earns a frequency discount of 45% in addition to the station's regularly earned frequency discounts. Prior to the "7-11" plan, this additional discount amounted to 30% for a schedule of 11 or more announcements. Mr. Glascock pointed out that the purpose of the plan is to encourage large-volume advertisers to allocate bigger spot budgets to WMAL-TV and to allow the advertiser a greater spread of his budget throughout all time classifications.

FIRE COVERAGE

DUE to the chance passing of the WWJ-TV Detroit mobile unit, returning from a remote pickup, thousands of Detroiters were able to watch a $500,000 fire from their living rooms. Upon arriving at the scene of the fire, remote engineers obtained permission for the telecast and for newscaster Jack Clark to report the on-the-spot-at-the-moment coverage on his 11 p.m. newscast.

LONG-TERM ADVERTISERS

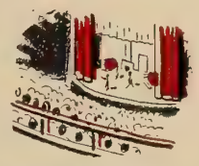
LITTLE Potts Furniture Store and Hampden Rug Cleaners have been advertising on WFBR Baltimore's *Club 1300* for 11 years, according to a trade magazine ad which is now being used as a promotion piece. The ad features the slogan: "Still riding WFBR's 'gravy train' after 11 years!" and further emphasizes the success of WFBR advertisers, both local and national.

DIET PROMOTION

TO PROMOTE Tafon weight-reducing product, Johnston, Freedy & Lampson Inc., Hollywood (distributors of drug products), is following the progress of ex-wrestler Jules Strongbow, who started Feb. 23 to lose 90 pounds in 90 days. In addition to 2½-minute five times weekly *How Much Does Jules Weigh* on KTTV (TV) Hollywood, firm also sponsors Monday evening wrestling, in which he handles interviews and color, half-hour weekly *Tito Guizar Show* and co-sponsors twice-weekly quarter-hour *Glamour Session* on same station. Agency is Frank J. Miller Adv., Hollywood.

ART CONTEST

AS a means of determining, at a low cost, what artistic talent was available in its local area, WLEC Sandusky, Ohio, offered $25 for a win-



magnecord Voyager

for recording the world around

magnecord's new one-case portable professional tape recorder

The Famous Magnecorder— Standard of Broadcasters

Easiest to Handle— At last, a professional portable recorder and amplifier in a single case, light but rugged to take the most difficult remotes. The Voyager has been thoroughly field tested and it's been voted the best of travelers. Lighten *your* remote work, insure perfect recording — use the Voyager, newest member of the Magnecord family.

Professional Quality—Frequency response with tape is ± 2db from 50 to 15,000 cycles per sec. at 15 in. per sec. tape speed. The amplifier has bridging and low impedance mike inputs with 600 ohm output. Headphone monitor jack on front.

A Natural For Advertising Agencies— The Voyager is so flexible you can use it in a multitude of ways — air checks, development of spot announcements, program development, and with an amplifier and speaker, auditions, client presentations. Ultimate in quality.

For further information and demonstration, see your Classified Telephone Directory under "Recorders," or write

Magnecord, INC

Dept. B-3A, 225 W. Ohio St., Chicago 10, Ill.

ning sketch to be used as a visual identification station symbol for promotion material and possible slide TV use later. The board of directors of WLEC, who served as judges, had difficulty in choosing among the 47 entries submitted by commercial artists and students in the advanced art class of the local high school, but finally selected two winners, one for present promotion and one for a future test pattern. The contest stressed the idea angle rather than the finished product.

'CLOONEY CLUB'

IN APPRECIATION for promotion given Rosemary Clooney on KJUC Junction City, Kan., by Dean Curfman and John Webb on their respective programs, *Music for Milady* and *John's Web,* Messrs. Curfman and Webb were awarded a certificate of membership by the "Clooney Club" of Ft. Riley. The certificate, which measured 17 by 22 inches, was written in red ink as is all the club's correspondence, and contained few words other than those beginning with "c." The station relates it has done nothing in particular to promote the club; it just "grew."

CAREER OPPORTUNITIES

CLOSED circuit telecast designed to show high school seniors and juniors in the New York area opportunities for careers in science and engineering were carried from an ABC-TV studio to seven New York theatres March 21, 10-11 a.m. EST. Program was arranged by Technical Societies Council of New York through the cooperation of the Public Service Committee of Theatre Television Industry, New York U., and New York City Board of Education.

Love Those Pitches

LISTENERS in San Antonio like their radio commercials dished up regularly, and object to straight music without spots and participations.

KITE - AM - FM two months ago changed its policy of AM-FM program duplication during the daytime, and fed only music to the FM outlet, eliminating commercials and substituting 30 and 60 second breaks of silence.

After a month, the station surveyed listeners and found only one who preferred the broadcasts minus commercials, with 94 reporting they felt as though they "were missing something" and wanted the commercials back.

KITE-FM spots have been reinstated, continuing at night when the AM affiliate goes off the air.

FRENCH DRAMA SERIES

FRENCH Broadcasting System has recorded especially for the National Assn. of Educational Broadcasters a series of classical French dramas, acted by the Comedie Francaise, and a series of contemporary French music programs with commentary by the composers. The drama series had its premiere over WNYC New York on March 7 and, together with the music programs, will be made available to member stations of NAEB.

CREATURES OF IMPULSE

THE UNIVERSITY of Michigan announces a new series of television dramas to be launched by a half-hour play, "Creatures of Impulse," by W. S. Gilbert. The play, presented by the university in cooperation with WWJ-TV Detroit on March 14, marks the transfer to television of a radio series for children, *Down Story Book Lane,* presented by WWJ for the past four years. The new series of plays is a result of the joint efforts of James Hunter, program manager for WWJ-TV, and Professor Garrison, director, U-M TV. Under the supervision of Robert Ritter of WWJ-TV, the series will present original plays and adaptations, prepared by university students studying TV.

INSIDE THE KREMLIN

NEWSMEN Chris Condon and Bill Porter came up with an "All-Soviet" edition of *Who's News* on March 8, reports WTAG Worcester, Mass. Each week the news series gives biographical profiles of people in the headlines. On the "Soviet" program, Messrs. Condon and Porter presented life stories of Malenkov, Vishinsky, Beria and Stalin, plus speculation on what could be expected from the new regime, and as an extra gimmick, recorded excerpts from a Stalin speech. *Who's News* won a 1949 Peabody Award as the best news program in Massaschusetts.

MASS FOR SHUT-INS

A MASS originating from Dahlgren Chapel on the campus of Georgetown U., Washington, D. C., is being broadcast by WWDC Washington, every Sunday from 7:30 to 8:00 a.m. The "mass for shut-ins," under Father Francis Heyden, is designed for those who are prevented from attending church because of illness or physical disability. Although the program has been a regular radio feature in the Washington area since 1946, its switch to WWDC, as of March 8th, will permit the program to be heard in a wider area, according to a release from the station.

NEWSLETTER ON DEVELOPMENTS

SERIES of news letters on industrial developments in the area covered by the Crosley Broadcasting Corp. station is being sent to the advertising trade, it was revealed by Fred Gregg, promotion chief for WLW and WLWT (TV). The first letter outlined the industrial growth of the Pike County, Ohio, area where construction of the $5 billion atomic energy project is underway. Subsequent letters will be issued as new industry moves into the four-state area or other changes come in the economics of the region served by the Crosley radio and TV stations. The newsletters will quote independent and government sources.

WCBS GOES ON TOUR

IN RESPONSE to "ever increasing demands" from charities, civic clubs and community organizations, WCBS New York has adopted a formula long used successfully by the legitimate theatre. "Road shows" featuring top WCBS talent have been packaged by the station and will appear at benefits and local functions in nearby communities, program director Sam Slate announced last week. Varying in length built around local station personalities heard from 20 to 30 minutes, the "road shows" are daily on the CBS Radio key outlet.

PUBLIC SERVICE

EVERY time KISW-FM Seattle airs a public service announcement, the station returns the copy to the source supplying it with a covering note signed by Ellwood W. Lippincott, station owner. The note reads: "The attached an-

WRNY All-Music Format

ALL-MUSIC schedule of programming has been instituted by WRNY Rochester, 250 w daytime independent, and the station claims a "wonderful response" from both listeners and sponsors.

Mr. Huff

The all-music format, which the station claims is brand new to western New York and "possibly to the entire country," was devised by W. Eccles Huff, general manager. WRNY programming formerly was "very heavy" on sports coverage, Mr. Huff explains.

Instituted as "the successful answer to heavier competition by television in the years ahead in the Rochester market," the WRNY music format now is presented as one single program from sunrise to sunset. Spot news is given on the air as a listener service, but sports play-by-play, daytime serials and other such programs are banned.

Local business at the station, which now identifies itself as "WRNY Music," is up 30% since the change, Mr. Huff reports, adding that greater increases are expected during this year. Each of the four local salesmen carries on calls with him a portable radio to demonstrate WRNY music with his sales pitch. Extensive publicity has been begun to promote the changeover.

"WRNY Music" recently was purchased by Bachman Enterprises, owned by Stanley, Bernard and Jerome Bachman, from a Rochester group headed by Louis A. Wehle, board chairman of the Genesee Brewery.

Now comes April with its Spring Fashions In Western Montana it's fashionable to use . . .

nouncements were broadcast over Seattle's Finer Music Station, KISW-FM, as a PUBLIC SERVICE and without cost." Dates and times of broadcast are indicated on each announcement.

THE EYES HAVE IT

STAN MATLOCK has collected more than 1,000 pairs of glasses in his recent campaign via his disc jockey program, *Magazine of the Air,* on WKRC Cincinnati. Mr. Matlock collected the specs—from sunglasses to bifocals—in conjunction with the national "Eyes for the Needy" organization, which salvages frames, bridgeworks, cases, and melts down gold to procure funds for glasses for needy persons. *Magazine of the Air,* previously a morning program, has been expanded to include an afternoon edition.

APPLE BLOSSOM TIME

FRANK HARDEN and Jackson Weaver, WMAL Washington's comedy disc jockeys, are taking to the road. The pair will air both their 10:15 network program and their 10:35 local program from the 26th Annual Shenandoah Apple Blossom Festival at Winchester, Va. The program will adhere to the same fundamental format of novelty records and ad lib humor plus brief interviews with visitors at the Festival.

AUDITIONING AT THEATRE

PERFORMERS doing their musical quiz program at a movie theatre will be tape recorded by WICC Bridgeport without audience awareness of what is going on. Should the audience's reaction merit it, the program will be put on the broadcasting schedule.

CHILI TODAY

NEWS and public affairs department of CBS Washington is thinking of covering its cluttered news desks with checkered tablecloths. It started when Bill Costello gave President Eisenhower's favorite chili recipe as his *White House Story of the Week* on his March 1 newscast. Network reports that letters began to pour into the office asking for copies of the recipe. More recently, the office began to get requests for another food dish—this time the bean soup which has been served in the Senate Dining Room since 1907. Paul Johnson, the headwaiter, aroused appetities when he mentioned the soup on *Washington, USA,* March 7.

CONTRACT for half-hour wrestling program on KTSM-TV El Paso, Texas, was signed by Richard Azar, owner of Dickshire Distributing Co., on behalf of Coors beer. Standing (l to r): Karl Wyler, KTSM-TV president and general manager; John Conboye, station salesman, and Paul Reeves, advertising manager, Adolph Coors Co. Pact covers 52 weeks of Wednesday evening matches from Chicago. In negotiating agreement, Coors adhered to policy of no-beer-advertising on radio-TV before 9 p.m.

Bird Calls

SUCCESSFUL recording experiment titled "Music and Bird Songs," conducted by James Fassett, CBS Radio supervisor of music, and Prof. P. P. Kellogg of the Lab. of Ornithology at Cornell U., is now being released to consumers through Cornell U. Press, Ithaca, N. Y. Most of the recorded notes of bird calls cannot be heard by the human ear when played at regular speeds. Hence the record was designed for playing at one-eighth the original speed. Recording, featuring 10 bird calls and six "frog calls," was originally broadcast May 25, 1952, on Mr. Fassett's program, *Your Invitation to Music.*

WEARING OF THE GREEN

"SURE and it's going to be a fine St. Patty's day on KYW, KYW-FM, your Westinghouse station in Philadelphia." Station breaks like this marked St. Patrick's Day on KYW from morn until midnight. In addition, the station sent listeners sprigs of real Irish shamrocks flown from Dublin in a tie-in promotion with TWA and conducted an Irish stew contest on *Anne Lee's Notebook.*

SCANDIA COSMETICS SALES BOOM!

WWDC in Washington makes businesses grow. Here's another factual story to prove that statement. Scandia Cosmetics reports more than $5,000 in sales for January alone—supposedly the slowest month in the year. All this with *only one* cosmetics outlet in town—Julius Garfinckel & Company. All this by using *only* WWDC to advertise its line of beauty aids.

Says KAROL LINDBERG, Vice-President in charge of sales for Scandia Corporation: "WWDC has done a phenomenal job for Scandia in the Washington market. From the first week of our operations in Washington, our sales have risen steadily. And the rate of increase is amazing. We are enthusiastic about the results WWDC has produced." WWDC can help *your* sales in the big Washington market, too. Let your John Blair man give you the story.

In Washington, D.C.—it's
WWDC

Andrew N. McLellan appointed TV consultant to Canadian Assn. of Broadcasters, Toronto.

FOLLOWING is a list, released last week, of North American stations which are new, changing power or frequency or call letters, and other modifications and deletions of new and existing standard broadcast stations. The changes are provided member nations of the North American Regional Broadcasting Agreement. Countries providing the list below are Mexico, Cuba and the United States.

The Mexican list is No. 596 and was dated Feb. 10; the Cuban list includes Nos. 2, 3 and 4 which were dated Feb. 11, 12 and 16, and the U. S. list includes Nos. 496 and 497, dated March 4 and 11. The lists were received at B•T March 16.

These changes are made in accordance with Part III, Sec. F, of the NARB Agreement.

MEXICO

Call letters, location, power (in kw), antenna, schedule, class and proposed date of change or commencement of operation.

Stanley Brewer,** principal owner of KOPP Ogden, Utah. Filed March 17.

Opinions and Orders . . .

WOSA Wausau, Wis.—Alvin E. O'Konski. FCC dismissed protest filed Feb. 2, 1953 by WSAU Inc. (WSAU Wausau) directed against the Commission's "conditional grant without hearing, made on Jan. 2, 1953" of application to increase power of station WOSA and to move main studio and transmitter location from Merrill to Wausau, Wis. Action Feb. 19.

KGAL Lebanon, Ore.—W. Gordon Allen. FCC dismissed protest filed Jan. 30, 1953, by Symons Bcstg. Co. (KLXY Spokane, Wash.), directed against grant of CP to KGAL to change frequency from 930 to 920 kc and change from daytime to unlimited time operation. Action Feb. 19.

FCC on March 5 initiated rule making to incorporate in Part 3 of its rule and regulations governing radio broadcast services that part of the CONELRAD Plan which pertains to the conduct of broadcast stations during an alert. As announced Dec. 2, 1952, the plan would enable cooperating AM stations to remain on the air immediately before and during an air attack under conditions which would minimize the use of radio signals as a navigational aid to hostile aircraft. No engineering method has yet been found to enable FM and TV stations to continue broadcasting in such an emergency. Comments may be filed on or before March 24, 1953.

Hearing Cases . . .

The Enterprise Co., Beaumont, Tex. — FCC denied petition to enlarge the hearing issues in the proceeding involving its application and those of Beaumont Bcstg. Corp. and KTRM Inc., each seeking CP for new TV station on vhf Ch. 6, Beaumont. Petition was to include, with respect to the application of KTRM Inc., issues dealing with multiple ownership and the concentration of the media of mass communications. (Dockets 10286 through 10288.) Action March 3.

Remote Control and Operator Rules—On petition of the International Brotherhood of Electrical Workers, AFL, the Commission on March 5 stayed, until further order, effective date of the report and order published Feb. 4, 1953, amending parts 3 and 13 of its rules and regulations with respect to the license requirements of operators of certain AM and FM stations and for the remote control operations of such stations, which were to have become effective March 6, 1953. (Docket 10214.)

Wichita, Kan.—Sunflower TV Co. FCC granted petition to dismiss without prejudice application for new TV station on vhf Ch. 10, Wichita. (Docket 10258; BPCT-677.) Action March 11.

Bradbury Heights, Md.—Chesapeake Bcstg. Co. Final decision announced to deny application for CP for new AM station at Bradbury Heights, Md., to operate on 1540 kc, 1 kw, daytime. Cmr. Hyde dissented. (Dockets 7760; BP-4698.) Final decision March 9.

Scranton, Pa.—Scranton Radio Corp. Final decision to grant application for CP for new AM station at Scranton, Pa., to operate on 1400 kc, 250 w, unlimited time; engineering conditions (Docket 9640; BP-7184.) Final decision March 9.

Danville, Ill.—Vermilion Bcstg. Corp. Final decision to grant application for CP for new AM station at Danville, Ill., 980 kc, 1 kw, unlimited, using same DA day and night; engineering conditions. (Docket 9496; BP-7114.) Final decision March 9.

Flint, Mich.—Trebit Corp. and **W. S. Butterfield Theatres Inc.** Commission denied petitions seeking review of the Hearing Examiner's Memorandum Opinion and Order of Jan. 14, 1953 granting a petition of WJR The Goodwill Station Inc. for leave to amend its application for a new TV station in Flint, Mich. to operate on vhf Ch. 12. (Dockets 10268 et al.) March 9.

Lafayette, La.—Evangeline Bcstg. Co. Commission denied application to mod. CP to change daytime power from 1 kw to 5 kw using non-DA, and change type of transmitter, operating on 1330 kc with 1 kw night, DA night. (Docket 9739; BMP-5098.) March 6.

Reading, Pa. — Radio Reading. Commission denied a petition for rehearing filed by John J. Keel and Lloyd W. Dennis Jr. tr/as Radio Reading, directed against the decision of Sept. 16, 1952 which denied the application of Radio Reading for a CP for new AM station at Reading to operate on 1510 kc, 1 kw, unlimited time DA. (Docket 9446; BP-7589.) March 6.

Spokane, Wash.—Louis Wasmer. Granted motion to amend TV application (vhf Ch. 2) [B•T, March 9], (1) to include his current balance sheet; (2) to include a modified program schedule with attendant changes in staffing, revenue, and operational cost estimates; and (3) to include modified and additional engineering information. (Docket 10422, BPCT-920.) March 17.

WABC Albuquerque, N. M.—Examiner J. D. Cunningham granted motion that **American Broadcasting Paramount Theatres Inc.** (WABC) be substituted for American Broadcasting Co. (WJZ) as a respondent in the proceeding re application of KOB Albuquerque for extension of special service authorization. (Docket 10336; BSSA-275.) March 17.

KPLN Camden, Ark.—Mid-South Bcstg. Co. Granted, in part, petition filed by KPLN insofar as it requests reconsideration of Commission action of Dec. 31, 1952 designating for hearing application for license to cover CP for KPLN (Docket 10363; BL-4782); cancelled hearing and removed said application from hearing docket to be further considered with examination of

pending application for assignment of CP to R. D. James Jr. (BAP-178.)

New Petitions . . .

March 11

Alaska Bcstg. Co. (KTKN), Ketchikan, Alaska. CP for power increase to 5 kw daytime on 930 kc (BP-8463).—Reply to opposition which was filed by Aurora Bcstrs. Inc. (KABI) which opposed application of Alaska Bcstg. Co. (KTKN) for power increase. KTKN asserts in its reply to KABI that the latter assumed "fallacy of high conductivity" in Ketchikan area, and that because population is expanding in the opposite direction from KABI, the latter does not want any other station to increase its power because even from its present location "KABI cannot deliver as good a signal as KTKN over the Ketchikan district. . . . KABI . . . does not want this difference to become even more apparent," alleges KTKN.

March 12

Rudman Television Co., Minot, N. D. CP for new TV station, vhf Ch. 10, ERP 58 kw visual and 31 kw aural, antenna 390 ft. (BPCT-1320).—Protest by North Dakota Bcstg. Co. (KCJB) to grant of CP to Rudman on grounds that erection of Rudman's antenna will cause radiation in directions undersirable to KCJB. KCJB asks that Rudman be required either to insulate its antenna tower or select site far enough from KCJB that it cannot influence KCJB's pattern, or that Rudman CP be rescinded and that application of Rudman be set for hearing.

Key Bcstg. System Inc. Application for new AM station, 1300 kc, 250 w daytime (Docket 10279 BP-8422).—Petition filed by Wodaam Corp. (WOV New York, N. Y.) for authority to intervene in proceeding because grant of application would cause objectionable interference to WOV in seven-mile area.

Spartanburg, S. C. New TV vhf Ch. 7.—Reply and motion to strike petition of Spartan Bcstg. Co. (WORD) filed by WIS-TV Corp. (WIS-TV), Columbia, S. C., because Spartan petition fails to satisfy requirements of Sec. 309 (c) of Communications Act, is not "party in interest", and WORD can still prosecute its application for Spartanburg.

Fort Wayne, Ind. New TV uhf Ch. 33. (Dockets 10299, 10300, BPCT-516, 979).—Proposed findings of fact and conclusions in proceeding involving mutually-exclusive applications of Northeastern Indiana Bcstg. Co. (WKJG) and News Sentinel Bcstg. Co. (WGL) filed by competing applicants and Chief, FCC Broadcast Bureau. Each applicant found itself best qualified, but Chief, FCC Broadcast Bureau. found News Publishing Co., owner of News Sentinel Bcstg. Co., engaging in monopolistic and what Chief, FCC Broadcast Bureau, characterized as illegal practices which reflect upon qualifications of News Sentinel Bcstg. Co. to hold permit sought.

March 13

Memphis, Tenn. Bluff City Bcstg. Co. (WDIA), CP for change from 730 kc to 1070 kc and power increase from 250 w to 50 kw D, 5 kw N, DA-2. (BP-8343).—Protest to grant filed by The Television Corp. (WAPI), Birmingham, Ala., which operates on 1070 kc with 10 kw fulltime but is applicant (BP-8679) for 50 kw fulltime on same frequency. WAPI asserts it is party in interest, that WDIA operating with 50 kw would cause objectionable interference to WAPI operating with 50 kw, and that WDIA grant be rescinded and application set for hearing.

Old Hickory, Tenn. New TV vhf Ch. 5.—Reply by Life & Casualty Insurance Co. to motion for reconsideration of Commission order which passed over Old Hickory, Tenn., of Capitol Bcstg. Co., which requested its application be granted and that of Life & Casualty Insurance Co. be dismissed. Life & Casualty Insurance Co. asserts that to locate its studio in Nashville while occupying a channel allocated to Old Hickory would be for good cause and that Sec. 3.613 is not applicable in this case.

Allocation of vhf Ch. 4 to Fayetteville, W. Va.—Robert F. Thomas Jr. (WOAY), Oak Hill, W. Va., filed petition for extension of time within which to file reply to opposition by Daily Telegraph Co. to proposed rule making and reply to statement by WCAE Inc. (WCAE). In its reply to WCAE WOAY asserts vhf Ch. 4 can be allocated to both Fayetteville, W. Va., and Pittsburgh, Pa., and still meet minimum FCC milage separations.

Chattanooga, Tenn. New TV vhf Ch. 12.—Petition for extension of time filed by Southern Television Inc. in which to reply to petition of Tri-State Telecasting Corp. which seeks conditional grant.

Philadelphia, Pa. New TV uhf Ch. 23.—Petition filed by Daily News Television Co. requesting oral argument on what it calls "deficiencies, discrepancies and inadequacies" of mutually-exclusive application of Lou Poller.

March 16

Bristol, Va. New TV vhf Ch. 5—Opposition to petition for conditional grant of Appalachian Bcstg. Corp. (WCYB) filed by Radiophone Bcstg. Station WOPI Inc. (WOPI) and Tri-State Television Corp., alleging that WCYB conduct may most charitably be evaluated as "gross indiscretion" and that WOPI did not file "block" or "strike" application.

Amherst, Mass., and North Adams, Mass. New TV allocations for uhf Ch. *82 and uhf Ch. *80.—Petition filed by Western Massachusetts Educational Television Council for amendment of Sec. 3.606 of FCC TV Rules in order to have a state-wide educational TV network. Uhf Chs. 82 and 80 are available for allocation to Amherst and North Adams, petition states.

The W. L. Greenshaw Co. (WWHG) and Hornell Bcstg. Corp. (WLEA), Hornell, N. Y. Initial decision favoring fulltime operation for WWHG (Docket 10060 et al., BP-8024, BMP-5636).—Motion to strike, reply to exceptions and request for oral argument filed by WLEA in answer to WWHG.

AB-PT merger (Docket 10031 et al., 10046 et al, and 10110).—Motion to dismiss "protest" of Zenith Radio Corp. filed by Balaban & Katz Corp. Balaban & Katz Corp. asserts Zenith is stranger in AB-PT proceedings and cannot make claim for vhf Ch. 4.

Sacramento, Calif. New TV uhf Ch. 46.—Joint petition of John Poole Bcstg. Co. and Jack O. Gross to dismiss application of Jack Gross and to grant application of John Poole Bcstg. Co. Because applicants were not able to arrive at suitable merger agreement, John Poole Bcstg. Co. has paid Jack Gross $6,701.69 for the latter's expenses involved in filing Sacramento application.

March 17

AB-PT merger (Docket 10031 et al., 10046 et al. and 10110).—Motion to dismiss or deny protest of Zenith Radio Corp. filed by Columbia Bcstg. System. CBS asserts that Zenith chose to stay out of hearing so cannot now petition for a change nor can Zenith assert hearing was not held, claims CBS, when testimony went on for 93 days.

Albuquerque Bcstg. Co. (KOB) for extension of Special Service Authorization (Docket 10336, BSSA-275).—Proposed findings of fact and conclusions filed by Westinghouse Radio Stations Inc., license of WBZ Boston, which assert KOB should stay on 770 kc and that protest of ABC be dismissed.

Glenville, W. Va. New TV vhf Ch. 5.—Petition by Polan Industries to allocate vhf Ch. 5 to Glenville, W. Va., so that good TV coverage may be given to widespread rural area of West Virginia.

WHEC Inc. (WHEC) and Veterans Bcstg. Co. (WVET), Rochester, N. Y. CPs for new TV vhf Ch. 10 stations (share-time).—Protest to grants and request for hearing filed by Federal Bcstg. System Inc. (WSAY), in which protestant requests FCC accept its application for filing, rescind CPs granted WHEC and WVET, and designate all three applications for hearing.

Alvin G. Flanagan. Permit to locate TV studio at San Diego.—Petition to designate application of Alvin Flanagan for hearing filed by Kennedy Bcstg. Co. (KFMB-TV).

NBC and DuMont. Permits to transmit television programs to foreign station.—Petition to designate applications of NBC and DuMont for hearing with that of Alvin G. Flanagan filed by Kennedy Bcstg. Co. (KFMB-TV).

Aladdin Radio & Television Inc. (KLZ) and Denver Television Co., Denver, Col. Initial decision favoring Aladdin Radio & Television Inc. (KLZ) for vhf Ch. 7 (Dockets 9041 and 10240, BPCT-426 and -951).—Statement in support of initial decision filed by Aladdin Radio & Television Inc. (KLZ), exceptions to initial decision filed by Chief, FCC Broadcast Bureau, and Denver Television Inc. Chief, FCC Broadcast Bureau, does not, however, except to examiner's final conclusion in initial decision, but only to certain provisions. Some exceptions to certain provisions also filed by Aladdin, and general exceptions to entire conclusion filed by Denver.

Hearing Calendar . . .

Hearings in Progress

Portland, Ore.—New TV, vhf Ch. 8. Further hearing. Examiner Elizabeth C. Smith. Contestants: Westinghouse Radio Stations Inc. (KEX), Portland TV Inc., Cascade TV Co. and North Pacific TV Inc.

Bargain Basement Season

GENERAL MILLS, for some curious reason, seems bent on knocking the props from under radio and television, the media on which it depends most heavily to sell its products. Two GM agencies, Knox-Reeves for Wheaties, Dancer-Fitzgerald-Sample for Kitchen-Tested Flour, are asking station operators to throw away their rate cards and, in effect, to submit bids for the GM business.

Obviously, General Mills will match the results of the agencies' proposals and whenever either gets a better rate the other will immediately demand it. Indeed, under the standard AAAA contract form, a station is honor-bound to offer any reduction given one client to all other advertisers.

The unique thing here is that General Mills is throwing the same bait to TV stations that it is using on AM outlets. If television succumbs to off-the-card dealing at this stage of its youth, there is not much hope for its acquiring stability as it grows older.

It's a truism that in the long run rate cutting benefits nobody. A special deal given one agency never remains a secret for long; other buyers demand better special deals of their own and none of them is happy with what he gets, each fearing that someone else has secured better terms. And when that somebody else is another agency working for the same advertiser, both agencies are bound to be unhappy all the time.

The advertiser who tries to get special deals from stations often, if not usually, finds that what he gets is no bargain. If he takes run-of-station time he finds his commercials aired at times of minimum audience. If he insists on specified times, he gets only the less desirable stations.

For a station, rate-cutting is a short-cut to bankruptcy. One special deal inevitably leads to others and soon no one is willing to buy time at card rate. As suspicion mounts, few buyers will use the station at all if anything else in town is available.

This is not to say that there is no place for extra discounts for large purchases of time. Volume discounts always have had their rightful place in the broadcasting picture. But when a special price for a special package is set, it should go on the rate card immediately and other advertisers, those already on the station as well as prospects, should be promptly notified that the same price is available to them under the same conditions.

"A thing is worth what you have to pay for it" is still a pretty good rule of business for both buyer and seller. Radio, as the first and only true mass medium, reaching more than 98% of all U. S. homes, farm, small town and big city, is worth more than some buyers, and even some sellers, seem to think.

OUR GOOD neighbor, Canada, has raised the salary of the chairman of Canadian Broadcasting Corp., equivalent to our FCC, from $15,000 to $17,500. No doubt he's well worth it. Our FCC Chairman draws $15,000—as do other FCC members. We think there's a raise due, maybe for all of our Commissioners, but most certainly for the Chairman who is forced to carry a prodigious load.

Congress, Color & Common Carriers

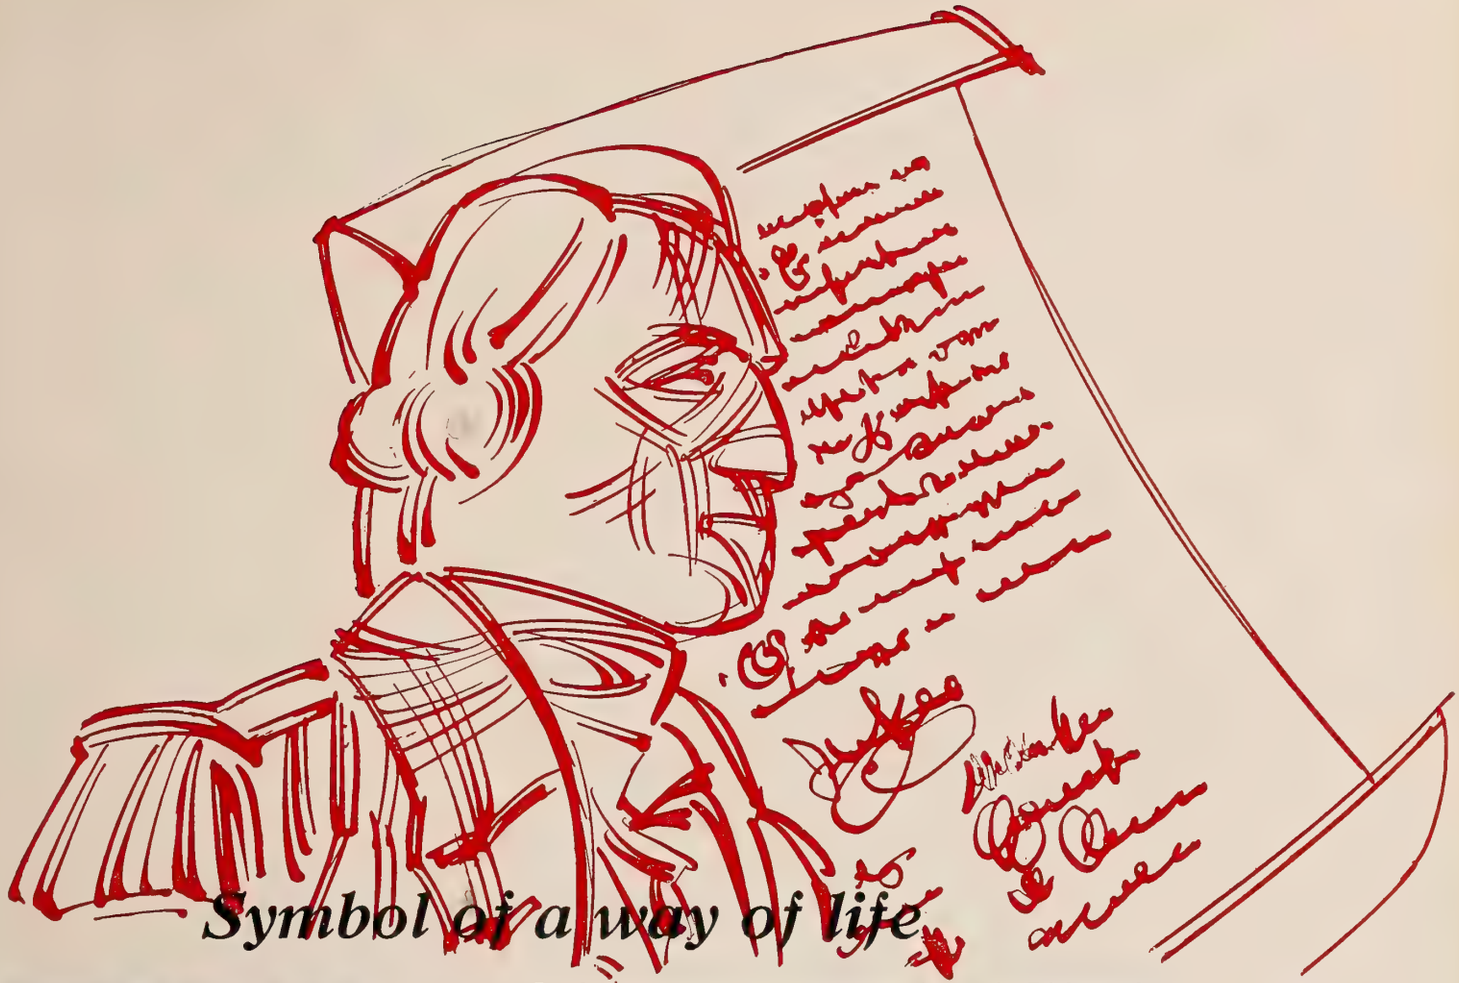
THE MOST radio-active Congress in history is functioning in Washington. One would judge, from a reading of the legislative calendar, that the solons now are for (or against), by, and of radio and television.

And, depending upon where you sit, the legislative activity is for good or evil. Foremost on the slate, headline-wise, are the color TV investigation and the McCarthy-directed imbroglio over the Voice of America. But more deeply significant and dangerous to our free institutions is the talk about applying the common-carrier concept to the broadcast services. That would mean rate-making. It would place radio and television on a level with the railroads, telephone and telegraph companies and other equipment and communications "carriers."

On the plus side is a new bill by Rep. Kit Clardy (R.-Mich.) to change the law so that all licenses issued by the FCC would be for an indefinite term and subject to revocation (not renewal) by the courts, rather than the FCC. It would place the burden of proof on the FCC, where it belongs, and not on the licensee who now lives by the whim of the regulatory authority and on the slender thread of a three-year license for radio and a one-year tenure for TV.

Drawn for BROADCASTING • TELECASTING by Frank Tabor

"I wonder what he'll think of next. Yesterday, I caught him trying to bake beans in the crystal oven."



Evident in this unprecedented activity is a contest for leadership in the handling of publicity-packed broadcast investigations. It is between the Senate and House Commerce Committees. Heretofore the Senate has always taken the lead. But this time it's different. While the new GOP Chairman of the Senate Committee (Mr. Tobey) basks in the limelight of his waterfront investigation (TV pickup and all), the new House Committee chairman (Mr. Wolverton) has scheduled hearings to begin tomorrow on color TV. Mr. Wolverton has other plans, too, including the mischievous common carrier concept, network licensing, clear channels, newspaper ownership and trafficking in licenses.

What makes the veteran Mr. Wolverton grasp the common carrier issue is hard to fathom. While he insists he isn't advocating it, the very fact that he raises the question—dormant for years even during the balmiest days of the New Deal—is alarming. Mr. Wolverton is the head of a committee organized by the Republican majority. The prime plank in the GOP platform is for less, rather than more, government regulation. It fosters full freedom of the media for the dissemination of information. To control rates is to control the every act of the art or industry. It is one step removed from outright government ownership. Besides, the law governing radio, enacted originally in 1927, and reviewed in almost every Congress since, specifically precludes the broadcast services from public utility-common carrier regulation.

Color TV is a headline hunting perennial. It will be another inquisition into "Who killed cock robin?" It will yield the information that progress has been made, but that color tubes (compatible, that is) can't be produced on a production line basis, that costs would be out of line and that at this stage it would take a junior engineer to tune a set. The effect of the publicity will be to depress the sale of black and white sets and perhaps slow up the inauguration of new stations, notably in uhf.

It was, perhaps, inevitable, that Congressional attention should focus on the broadcast media. The impact of coverage of the conventions and the elections presaged that.

The big danger is the going may get so hot that a move to abolish the FCC by ripper legislation will catch on fire. This would place in jeopardy both the regulated and the regulators.

Symbol of a way of life

Houdon's Statue of Washington,
in the Capitol Rotunda, Richmond

In the rotunda of the Capitol Building in Richmond
is Houdon's statue of General George Washington,
labelled by historians the most important in the world.
Symbol of courage, faith, devotion to the cause of freedom,
this memorial (the only one for which Washington posed)
is a fit present-day reminder
that man's pursuit of freedom is eternal.
Among the most powerful weapons of the American way of life
is freedom of expression—
well served by countless radio and television stations. Among these
The First Stations of Virginia, WMBG-AM, WCOD-FM, WTVR-TV,
are privileged to be numbered.

Detroiters never had it so good...

A total of 1,355,000 Detroiters are employed . . . an all-time high! Of this, 736,000 are factory workers—highest figure in the past 8 years, and about equal to the highest in the war years. These factory-employed Detroiters are drawing paychecks averaging over $90 weekly—highest of the nation's major markets.

This all adds up to bank savings that totaled a billion dollars, and retail sales that approached 4 billion dollars last year.

If you've got something to tell and sell Detroiters, you'll always find attentive ears tuned to WWJ . . . through 1½ million home radios and ½ million auto radios. For 32 years, WWJ has been a part of Detroit . . . for 26 years, WWJ has been an NBC affiliate. And because WWJ has drawn the most ears through the years, it costs you LESS-per-thousand listeners than the average cost of radio time in Detroit.

The time to sell Detroit is NOW . . . *the "time" to buy is on WWJ!*

Go where there's GROWTH...

Tourists Love Kentucky... $393,000,000 worth*!

Kentucky has welcomed a steady stream of visitors since the historic visits of Charles Dickens and Louis Phillipe. By 1952 tourist business hit an all-time high with nearly $400 million being spent by tourists in Kentucky. Fostered by excellent roads and splendid state parks, this bonus income benefits farmer and urban business men alike. Already showing an increase of 245% over 1947, this flood of tourist dollars continues to grow. Predictions are that Kentucky's tourist trade will reach the 500 million dollar mark by 1955!

**Estimated from surveys by Kentucky Division of Publicity.*

WHEN PRESIDENT Eisenhower last week named Edward F. Howrey, new appointee, as chairman of Federal Trade Commission to succeed James M. Mead (who remains), it was generally assumed he would follow the same procedure on FCC with John C. Doerfer, Wisconsin Public Service Commission chairman, slated for chairmanship, but that isn't necessarily so. Mr. Doerfer did not discuss FCC chairmanship with White House authorities prior to his appointment (see editorial, page 122).

★ ★ ★

TO BE uncorked at NARTB Convention in Los Angeles next month will be Philco's new 16 mm film scanner described by those who should know as "revolutionary." It's said to improve quality by about 50% and is easily adapted to color by simple process of changing head.

★ ★ ★

WITHIN NEXT month FCC may complete plans for holding hearings on specialized FM services, such as Storecasting, Transit Radio, etc., to ascertain whether they conform with rules as broadcast services. It's possible that pay-as-you-go television also may be drawn into this hearing orbit since issues are related on question "what constitutes broadcasting?"

★ ★ ★

RECENT VISIT of RCA-NBC Chairman David Sarnoff, RCA President Frank Folsom and top NBC executives to NBC Central Division facilities had more than routine significance. NBC Chicago was asked to justify its TV talent originations as part of overall reappraisal that also includes New York and Hollywood. NBC Chicago officials put together hour-long kinescope presentation showcasing local talent.

★ ★ ★

FIRST OFFICIAL move of FCC in modifying its procedures under final TV allocations report expected to give big markets now under-served first break in hearings. Hence such markets as St. Louis, Kansas City and Miami will move to head of list rather than way down line.

★ ★ ★

AFTER SUDDEN call from Chmn. Chas. A. Wolverton of House Interstate & Foreign Commerce Committee, FCC met in extraordinary session Friday afternoon to discuss its testimony before committee on color TV issue tomorrow (Tuesday). Mr. Wolverton said committee desired to have Commission respond to questions raised on color (see story, page 54). It's good guess that FCC won't move on approval of another color system except along lines of its original procedure requiring field testing and meeting of minimum criteria.

★ ★ ★

THAT PLANS for separation of Voice of America and related international information activities are well underway reflected in high-level meetings in Washington last week at call of President Eisenhower's psychological warfare chief, C. D. Jackson. U. S. Advisory Commission had recommended separate agency of government, possibly of cabinet rank, and sentiment generally favors this. April 15 reportedly is deadline of Jackson group, to beat anti-Voice forces to punch, what with five Congressional committees investigating IAA. Truman budget of $135 million also slashed to $80 million, with further cuts in sight. (Last year it was $88 million.)

★ ★ ★

33 CBS-TV Basics On New Rate Card

CBS-TV issued new rate card Friday, effective April 1, which raises number of basic interconnected ("must buy") affiliates from 30 to 33 and provides reduction in Saturday afternoon rates but does not call for any station rate increases not previously announced. New card (No. 9), supplanting one effective last Dec. 1, covers 100 affiliates, of which 82 are interconnected.

Saturday afternoon rate reduction accomplished by making Class A rates no longer applicable to those periods. Class C rates, which currently end at 1 p.m., extended to 2 p.m. local time, and Saturday 2-6 p.m. periods put on Class B rates. Increase in basic interconnected group accomplished by promotion of WHBF-TV Rock Island from supplementary group and by addition of two new stations: KGUL (TV) Galveston (see story page 69) and KTNT-TV Tacoma. Notice of new card being sent to advertisers and agencies by William H. Hylan, CBS-TV sales vice president.

TV Network Officials Ponder $5,000 Fight Levy

TV NETWORK authorities Friday pondering possible effects of decision of International Boxing Managers Guild to demand minimum of $5,000 for each fighter in main bout on network TV, plus reduction of number of TV "fight nights" from six to four per week, effective June 15.

Chris J. Witting, managing director of DuMont, commented briefly as he knew only "what was in papers." He sees possibility of boxing promoters "outpricing themselves" if flat fee is charged for each boxer on network telecast, recommending graduated scale with lower sum for beginners and non-draw names. Whether sponsors would sit still for higher costs would depend on caliber of fight, he said. DuMont pays $8,000 weekly for Monday night package from Brooklyn's Eastern Parkway arena, with $3,000 each for boxers and $2,000 for promoters.

Other network officials did not comment on Guild's decision.

IBMG's stand was voted by delegates to Guild general meeting in New York Thursday and was based largely on theory that fighters are underpaid; that TV has reduced number of fight clubs, and that if fighter makes bad showing in bout that is telecast, then his reputation is damaged, he has hard time getting further matches immediately and should be compensated. Guild secretary-treasurer Bill Daly was quoted as saying ruling would be strictly enforced, with member-violators to be "kicked out of the Guild and boycotted."

Demanded $5,000 minimum said to be considerably larger than fighters have been receiving from network TV except in championship or prestige bouts. Usual payments said to range from around $1,500 to $3,500 or $4,000.

TV FOR BANKS

TELEVISION intercommunication system to speed up identification of signatures on withdrawal slips to be placed into operation at New York Savings Bank today. Spokesman said that when customer wants to make withdrawal, teller gives account number to bookkeeping department which finds proper card, places it under TV camera, and image showing genuine signature is flashed on monitor screen and six others in tellers' department, for comparison with signature tendered at teller's window.

• BUSINESS BRIEFLY

RETURN TO SPOT • Wildroot Co., Buffalo, planning to return to spot announcement radio campaign effective early in April in number of markets. Agency: BBDO, N. Y. Advertiser also sponsors two Mutual network programs.

CORNFETTI ACTIVITY • Some spot activity in radio is expected to pop soon for General Foods' Cornfetti. Agency: Young & Rubicam, N. Y.

ANNOUNCEMENT DRIVE • Kaiser-Frazer cars, through William H. Weintraub & Co., N. Y., placing two-week radio spot announcement campaign starting April 15 in about 20 markets.

CAMELS SPONSOR SHOW • R. J. Reynolds Tobacco Co., Winston-Salem, N. C. (Camels, Cavalier cigarettes), sponsoring Joe E. Brown in show 15 minutes before, and 10 minutes after, all New York Yankee home baseball games over WPIX (TV) New York, starting April 10. Agency: William Esty & Co., N. Y.

SINGER SPONSORS • Singer Sewing Machine Co., N. Y., will sponsor *Singer Four Star Playhouse* every week, instead of alternate weeks (CBS-TV, Thurs., 8:30-9 p.m. EST), effective Sept. 24. Contract, placed through Young & Rubicam, for 52 weeks.

WESTERN UNION ON RADIO • Western Union was to start sponsorship of *Telegrams For You* last night (Sunday) on ABC Radio (8:55-9 p.m.), in what was said to be its first use of network radio. Agency: Albert Frank-Guenther Law, N. Y.

MUSICAL SPOTS • Phil Davis Musical Enterprises signed by C. L. Miller Co. and Corn Products Refining Co. to originate and produce musical commercial for Niagara Instant Cold Water Starch, which is planning southern regional spot radio campaign.

CLIMAX NEARED IN COLOR TV HEARING

CONGRESSIONAL hearing on color TV came closer to climax Friday when Rep. Charles A. Wolverton (R-N.J.), chairman of House Commerce Committee, announced that FCC officials would be interrogated tomorrow (Tuesday) instead of after Easter recess as previously planned (see story page 54).

Friday session saw Dr. W. R. G. Baker, GE Electronics Department vice president and chairman of National Television System Committee, appeal for time to complete compatible NTSC field tests. He asked that FCC recognize and support NTSC program and upon completion of tests that Commission adopt NTSC system. He urged that FCC permit colorcasts during regular program day instead of confining test periods to "off-hours."

Following completion of field tests, NTSC will petition FCC to adopt standards, Dr. Baker said. In statement issued Friday, Philco also announced that it would petition for adoption of NTSC standards following tests. Earlier in week, RCA had said it would ask FCC to adopt NTSC standards.

NTSC was close to complete standards in Spring 1952, Dr. Baker revealed, but signals failed to work with "few hundred thousand" early model receivers still in use. He also told of writing FCC Chairman Paul A. Walker in December 1952, asking that FCC "invite" NTSC to demonstrate system. Chmn. Walker replied Commission could not act without petition, Dr. Baker said.

Color TV is from 9 to 15 months away, Dr. Baker said. He said 18 different "prototype" compatible color TV receivers had been tested with NTSC signals last week, all operating "very well indeed."

Standards evolved by NTSC—comprising 200 engineers from 28 member companies—are broad enough, Dr. Baker said, to provide for free competition among set makers and advances in technology of color TV. He said he believes that RCA and Chromatic (Lawrence) tri-color tubes are most promising, but held out possibility third tube, combining best of these two might appear.

Heated implication that manufacturers engaged in "sit down strike" by failing to produce receivers on FCC-approved field sequential system—as charged earlier this month by Sen. Edwin C. Johnson (D-Colo.) [B•T, March 16] —made by Rep. Carl Hinshaw (R-Calif.). He virtually charged that industry waged "insurrection" against FCC by not falling in line. Dr. Baker denied this and Rep. Wolverton called attention to 1951 FCC color order which held door open for other color systems.

Remarks of Rep. Wolverton that CBS acknowledged deficiencies of field sequential system — made during Friday's meeting — brought immediate telegram of denial from CBS President Frank Stanton. Mr. Stanton said he felt CBS system still "best, most workable and most economical color system."

Deny WLEX Injunction

TEMPORARY injunction denied Tuesday by circuit court in Lexington, Ky., where WLEX sought it as replacement for restraining order issued against WVLK, both of that city [B•T, March 23]. WLEX charges WVLK with "fraudulent" and "false" advertising claims, alleges $55,000 damages and sought an injunction before civil trial begins. Court ruled temporary injunction was not necessitated because many of challenged WVLK acts have been completed. Civil action began in Fayette circuit court fortnight ago, after which WLEX petitioned FCC to open WLVK's upcoming application for license renewal so opposing arguments could be filed.

Three New Mergers; Other FCC Actions

MERGERS of competitive TV applicants for uhf Ch. 27 at Rochester, N. Y., and vhf Ch. 6 at Duluth, Minn.-Superior, Wis., reported in filings at FCC Friday, along with bids for new TV stations in three other cities.

Genessee Valley TV Corp., Rochester, owned 100% by Schine Chain Theatres (55% owner WPTR Albany), amends to transfer half interest to Ch. 27 competitor WRNY Rochester, latter dropping its application.

Complex plan proposed at Duluth-Superior, where WDSM Superior and WREX Duluth are already in hearing for Ch. 6. Lakehead Telecasters Inc., whose principals own WREX, petitions for dismissal of its bid, its owners acquiring option to purchase 49% holding in Ridson Inc., competitor for Ch. 6 and licensee of WDSM. Hearing status would be retained, thus preventing new conflict from another applicant. Ridson Inc. would prosecute its TV bid, but would transfer WDSM to Lake Superior Broadcasting Co., WREX licensee, and Ridson Inc. principals would buy majority interest in Lake Superior Broadcasting. WREX, temporarily off air, would be dropped. ABC affiliate, WDSM is assigned 5 kw on 710 kc, directional night. WREX, Mutual outlet, is assigned 1080 kc, 10 kw day, 5 kw night, directional day and night.

New TV applications:

Mt. Pleasant, Mich.—Paul A. Brandt, owner WCEN there and WBRN Big Rapids, seeks uhf Ch. 47, ERP 21.69 kw visual and 10.85 kw aural, antenna 314.5 ft. above average terrain.

Asheville, N. C.—Asheville-Citizens Times Co. (WWNC) seeks vhf Ch. 13, ERP 58.22 kw visual and 29.11 kw aural, antenna 906 ft.

Wausau, Wis.—Rep. Alvin E. O'Konski (R-Wis.), operator WOSA there, seeks vhf Ch. 7, ERP 11.5 kw visual and 5.75 kw aural, antenna 748 ft.

Dismiss TV Bids

WSMB New Orleans dismisses its bid for uhf Ch. 32 because United Paramount Theatres, 50% owner, acquired five-station maximum in merger with ABC [B•T, Feb. 16]. Action eliminates contest on Ch. 32 for bid of Community TV Corp. (WBOK principals are part owners), newly amended to switch from uhf Ch. 26.

Westinghouse Radio Stations Inc., purchaser of WPTZ (TV) Philadelphia for $8.5 million from Philco Corp., dismisses bid for uhf Ch. 17, freeing competitive bid of WKDN Camden.

Asks Conditional Grant

KOAT Albuquerque, vhf Ch. 7 applicant in contest with Greer & Greer, asks FCC for conditional grant pending hearing, charging bid of its competitor is defective since overlap would occur with new Greer grant (KTVK) on Ch. 2 at Santa Fe.

Seek New Channel

Allocation of vhf Ch. 2 in area of Montgomery and Handley, W. Va., asked of FCC by WTIP Charleston, W. Va., and WMON Montgomery. They plan joint TV bid.

Deny Strike Threat

SPOKESMAN for International Alliance of Theatrical & Stage Employes (AFL) denied Friday that union had threatened to strike against television networks with respect to jurisdiction of front and rear view projector operators employed at NBC and CBS-TV. Jurisdictional question at NBC-TV involves IATSE and National Assn. of Broadcast Engineers & Technicians; CBS-TV, IATSE and International Brotherhood of Electrical Workers. Both cases referred to NLRB for ruling.

PARADE COVERAGE

CBS-TV and NBC reported Friday they are still seeking sponsors for their coverage of Easter parade in New York, and ABC-TV said its program has been sold on local co-op basis by five of 11 stations that thus far have contracted for coverage. ABC-TV and CBS-TV have scheduled Easter Parade programming from 1-2 p.m. EST, and NBC, 12:30-1:30 p.m. Easter Parade last year was sponsored over NBC by Pepsodent Div. of Lever Bros. and General Tire & Rubber Co., over CBS-TV by Susquehanna Waist Co.

Barrett Urges Watchdog

EDWARD W. BARRETT, former Assistant Secretary of State for Public Affairs, recommended Friday to Senate Foreign Relations subcommittee that joint Congressional committee, such as Senate-House Atomic Energy Committee, be established to watchdog International Information Service. In apparent reference to charges aired before Sen. Joseph R. McCarthy's Permanent Investigation Committee, Mr. Barrett said, "There is little basis for the recently headlined and well-rehearsed allegation made elsewhere by a handpicked group of disgruntled and frightened little men."

Lucy First for Year

FOR SOLID YEAR, *I Love Lucy* has outranked all other network shows on ratings and number of viewers, American Research Bureau reports. *Lucy* has been No. 1 in popularity for nine consecutive months, exclusive of summer hiatus. Two competing shows, *Comedy Hour* (NBC) and *Toast of the Town* (CBS), hit their highest audience ratings in March, with both in the 10 for the first time together, ARBI survey for that month shows.

Street Elected ABA Head

MALCOLM STREET, WHMA Anniston, elected president of Alabama Broadcasters Assn. at two-day meeting ended Friday at Florence. J. Dige Bishop, WCTA Andalusia, elected vice president and Richard D. Biddle, WOWL Florence, secretary-treasurer. Ralph W. Hardy, NARTB vice president, addressed ABA on government's attitude toward broadcast regulation.

United Broadcasting Enlarges

COMPLETION of motion picture-TV-industrial film division and appointment of film staff announced by William L. Klein, president of United Broadcasting Co., for his firm. Firm will be known as United Film & Recording Studios after April 1. Appointments involve Arthur E. Haug as photography director and Frank W. Richter Jr. as chief engineer.

J. Walter Thompson Moves

WASHINGTON office of J. Walter Thompson Co. has moved from Washington Star Bldg. to 1737 De Sales St., N. W.

PEOPLE

AL REIBLING, business manager of Kudner Agency, N. Y., promoted to manager of Television and radio department, Myron P. Kirk, vice president and director of radio and television, announced last week. At same time, **HANK LADD,** member of agency's production staff, named general supervisor of television and radio production.

GEORGE L. GREISBAUER, sales manager WMAL-TV Washington, and **EDWARD A. DALY,** NBC station relations contact representative join Paul H. Raymer, station representation firm, as account executives in Television Spot Sales Dept. of New York office. Mr. Greisbauer formerly was sales manager of WMAL, before that account executive with WNBW (TV) Washington. Mr. Daly formerly was account executive, eastern sales office, Paramount Television Productions, owner of KTLA (TV) Los Angeles.

SEYMOUR EDWARDS, owner of housewares business, to Fuller & Smith & Ross, N. Y., as associate account executive on Westinghouse Electronic Tube Div. account.

ALFRED H. BUSCH elected secretary of Stewart-Warner Corp.

DR. HARRY J. SKORNIA, former radio director, U. of Indiana, named executive director of National Assn. of Educational Broadcasters effective June 1. Dr. Skornia now completing two years service as radio attache, American embassy in Austria and Red-White-Red network there. He also will serve on special radio project in U. of Illinois communications division.

ANDERSON F. HEWITT, former chairman of board and chief executive officer of Hewitt, Oglivy, Benson & Mather, on April 1 will join Kenyon & Eckhardt as vice president, account supervisor and director.

IRVING A. FEIN, director of publicity and exploitation for CBS Radio in Hollywood for past 18 months, named to new post of director of public relations, CBS Radio, Hollywood.

BERNARD J. PROCKTER, president of Prockter Television Enterprises, appointed chairman of radio-TV and stage artists division of United Jewish appeal.

Mrs. Muriel King

FUNERAL services were held yesterday (Sunday) for Mrs. Muriel King, 35, wife of Gerald L. King, president of United Television Programs and Standard Radio Transcription Services. Services were held at Riverside Chapel, New York. Mrs. King died Wednesday in Hollywood following cerebral hemorrhage.

Raytheon Merger

MERGER of Raytheon Television & Radio Corp., Chicago, wholly-owned subsidiary of Raytheon Mfg. Co., Waltham, Mass., into parent company as of close of business May 31 announced Thursday by Raytheon President C. F. Adams Jr. Television, radio and government business presently carried on by Raytheon Television & Radio Corp. will be continued as divisional operation of parent company.

Nielsen Adds Agencies

NIELSEN coverage service now comprises agency clients with annual radio-TV billings of over $375 million, A. C. Nielsen, president of market research firm, announced. Nine new agencies added as subscribers to service: Sullivan, Stauffer, Colwell & Bayles; Doherty, Clifford, Steers & Shenefield; Sherman & Marquette; Ruthrauff & Ryan; Hewitt, Ogilvy, Benson & Mather; William Esty Co.; Cunningham & Walsh; Weiss & Geller, and Erwin, Wasey & Co.

In Jackson, Mississippi's Capital, It's...

WJTV
CHANNEL 25

Mississippi's ONLY Television Station

Central Mississippi—one of the nation's fastest growing markets—watches its ONLY TELEVISION STATION, WJTV . . . and what it watches, it likes!

Live local programming? Yes! Although it hit the air only a few weeks ago, already WJTV is programming both live local and interconnected network from ten o'clock in the morning through to midnight. And the live programs it's producing . . . with *multiple-camera operation* . . . number more than 20 per week! A full time, fully staffed station, operating in one of the most modern RCA-equipped television studios in America, WJTV is giving Mississippians intelligent, adult, smooth performance. And Mississippians are giving WJTV a rebel yell of enthusiastic approval.

Proof of their enthusiasm is the increase in number of sets. An RTMA county-by-county survey of the area showed around 7800 sets in the area 10 days after WJTV began operations. But a count derived from a survey of distributors and leading dealers . . . *only nine weeks after WJTV began operations* . . . was 13,426. Almost double . . . and the number is increasing every day.

Take a look at our coverage, too. We are happy to quote from the following unsolicited letter:

> We feel that your station is delivering quality television signals, with coverage comparable to VHF stations that have been established for many years. . . . *Your present coverage of fifty miles radius from Jackson is more than we had anticipated.*
>
> /s/ V. P. Spence
> *Philco Sales Manager*
> *Cabell Electric Co.*

There is no controversy about UHF down here. It's television . . . it's WJTV television . . . it's UHF INTERFERENCE-FREE PICTURE WITH VHF COVERAGE . . . and the thousands of viewers in the Central Mississippi market love it.

THE PARROT

Program: Armstrong Circle Theatre, Tues., March 24, 9:30-10 p.m. on NBC-TV.
Sponsor: Armstrong Cork Co.
Composer: Darrell Peter.
Conductor: Darrell Peter.
Librettist: Frank P. De Felitta.
Cast: Jo Schillig, Marden Bate, Chester Watson, Shannon Bolin, Robert Holland, Michael Pollock and a parrot.
Two-Piano Accompaniment: Bernard Gabriel and Marion Machino.
Director: Garry Simpson.
Producer: Hudson Faussett.

MUSICAL drama as an art form has been conspicuous by its absence in our video world. Except for seasonal performances of *Amahl and the Night Visitor,* which NBC commissioned Gian Carlo Menotti to write two years ago, opera has not been tapped as likely television fare. But last Tuesday, *Armstrong Circle Theatre* took an experimental plunge and presented a half-hour comic opera in English. "The Parrot" concerned itself with a bird that had inherited a fortune and along with it the contempt of three slighted relatives of the deceased.

This was an ambitious undertaking in any man's language and as an experiment it was an interesting show. Although the story line of the piece itself was not adequately developed, the music form which it illustrated certainly has a place in television programming if composers familiarize themselves with the framework of the medium and work within it as dramatists have done.

Fact gets along better with a stopwatch than does fantasy. It's a wise librettist who sticks to a simple plot. Because of the complications which this particular story implied, "The Parrot" more closely resembled an outline of a larger work than an opera complete in itself.

Two pianos were used in the production in place of an orchestra. The chief merit of "The Parrot" was its score. The music didn't dominate the actors or the story but supported them—a pleasant change from the often overdone clashing cymbals and rolling drums of classic opera.

* * *

ACADEMY AWARDS

Simulcast on NBC-AM-TV March 19, 10:30 p.m.-12 midnight.
Sponsor: RCA Victor Div., RCA.
Agency: J. Walter Thompson Co.
M.C.s: Bob Hope, Hollywood; Conrad Nagel, New York.
Radio Commentator: Paul Douglas, Hollywood.
Producer: Robert Welch.
Directors: William Bennington, Hollywood; Warren Jacober, New York.

IT IS doubtful that any known standards of criticism apply to a television what-is-it like the presentation of Hollywood's Academy Awards, an interminable parade of actresses and actors stepping up to eulogize one another, an assignment that obviously strains their every resource in make-believe.

The program would probably have escaped notice here had it not contained a commercial which, while simple in concept and execution, must be acknowledged as being as persuasive as any seen on the screen.

It was a commercial for RCA Victor television sets. An announcer appeared in two images, each outlined by the characteristic shape of an RCA receiving set screen. He pointed out that one indeed was an RCA set and the other was merely a screen-shaped hole in which he was actually appearing. The challenge, of course, was to distinguish which was the image on the set and which was the one being directly shot by the TV camera. At the end of the commercial he put his arm through the empty frame. Until that moment, this viewer had been unable to decide which "screen" was which.

It would be hard to beat that as a demonstration of picture clarity. If an adequate audience stayed around that far through the program, RCA Victor probably got its money's worth out of this extravagant production, for which the sponsor paid the movie academy $100,000 for the privilege of promoting films.

* * *

COLGATE COMEDY HOUR

NBC-TV, Sun. at 8-9 p.m. EST.
Sponsor: Colgate-Palmolive-Peet Co.
Agency: Sherman & Marquette.
Executive Producer: Sam Fuller.
Producer-Director: Ernest Glucksman.
Musical Director: Al Goodman.
Production Supervisor: Edward Sobol.
TV Director: Alan Yorkin.
Origination: El Capitan Theatre, Hollywood.
Stars: Bud Abbott & Lou Costello; Eddie Cantor; Bob Hope; Dean Martin & Jerry Lewis, and Donald O'Connor.
Guest Star: Sid Miller.

COMEDY stars, who usually alternate on Colgate-Palmolive-Peet's *Colgate Comedy Hour* every Sunday evening on NBC-TV, got together on March 22 to stage a super production for the series' 100th telecast. This seemed a happy enough idea. After all, it isn't every day that Bob Hope, Eddie Cantor, Abbott & Costello, Donald O'Connor and Martin & Lewis face the same cameras on the same hour-long show. But the outcome was something of a letdown.

Each of these stellar comic attractions was allotted a certain time to act up in the brand of comedy at which he was most proficient. No attempt was made to relate these segments to one another or to the show as a whole.

The ball started rolling with Bob Hope and a 10-minute gag summation of his success in the motion picture industry. He sang a few songs too—one a parody on "Buttons and Bows" which he didn't bother to commit to memory.

Eddie Cantor, who launched the *Comedy Hour* in 1950, was back for the anniversary doings with a skit in which Maxie the Taxi and Abraham Lincoln had a *tete a tete* on democracy and by-products thereof. "Message" comedy—and apparently there is such a thing—is hard to bring off. But no matter how you slice it, Mr. Cantor has a charm all his own with an Irving Berlin song. The three he did on Sunday's show accounted for some of the brighter moments on the program.

Abbott & Costello went through their usual "who's on first" routine. This time the situation involved a boxer and his trainer but the jokes had a familiar ring.

Donald O'Connor seemed to have a better time than his fellow players and as a consequence his stint was far more entertaining. When this man sings or clowns or does both at the same time, he enjoys himself—a must in show business.

Just to make sure you didn't go away relaxed, Dean Martin and Jerry Lewis appeared to wind up the celebration—and wind it up they did with their usual bang.

This anniversary telecast, which climaxed $14 million worth of entertainment provided by Colgate-Palmolive-Peet since the series be-

gan, would have been a more notable event had the stars shelved their usual routines and worked together as a cast in a single production. As it was, the *Comedy Hour* plodded along in a disconnected slowly-paced fashion. It lacked the over-all polish expected of professional showmen. Pound for pound the show was about as light and palatable as the mammoth cake made out of soap which had been whipped up to fete the program, its producers and its stars.

* * *

BOMB TARGET, U.S.A.

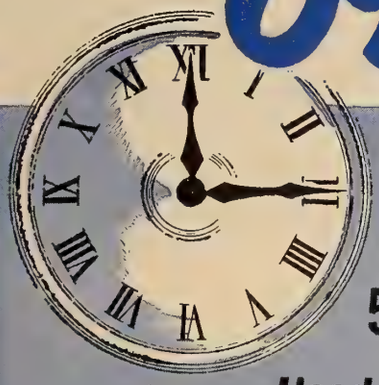
CBS Radio, 9-10 p.m., March 20.
Narrator: Arthur Godfrey.
Commentators: Charles Collingwood, David Moore and Peter Hackes.
Producer: Irving Gitlin.
Supervisor: Stuart Novins.
Original Music: Ben Ludlow.
Musical Conductor: Alfredo Antonini.

THE need for preparedness in civil defense organization was vividly underlined in CBS Radio's full-hour documentary, *Bomb Target, U.S.A.*, tape recorded at more than 100 key points across the country and presented March 20.

The program was a formidable task, and its result deserves tribute to CBS Radio's officials and a staff of 31 newsmen. It had some of the best elements of drama—suspense, pathos, humor, and tragedy. And in the best documentary tradition, it presented facts and figures, opinions and viewpoints from civil defense officials throughout the country, Army and Navy authorities, and the little guy in the street who is doing his share toward making his country safe.

The program built up excitement as CBS correspondents Charles Collingwood, David Moore and Peter Hackes, aboard a B-29 simulating attacks on New York, Chicago, and San Francisco, reported their progress toward their "targets" as radio, ground observer, anti-aircraft, and jet interceptor fight plane units went into action "against" them.

If any criticism can be directed toward such a laudable project, it is that an hour is too long to sustain audience interest. In view of the subject matter here, this criticism might more properly be directed against the public. But as narrator Arthur Godfrey called in officials and volunteers throughout the country, the listener may well have tended to lose contact with the central dramatic motif—the bomb attacks. Though a half-hour program might have necessitated the elimination of much authoritative testimony, it should have brought more sharply into focus the message that many localities are not prepared, and that "it" could happen here.



BOOKS

TELEVISION AND EDUCATION IN THE UNITED STATES. By Charles A. Siepmann. International Documents Service, Columbia U. Press, 2960 Broadway, New York 27. 132 pp. $1.

PUBLISHED by the United Nations Educational, Scientific & Cultural Organization (UNESCO), this paper-bound booklet is described as a preliminary and provisional report, for the benefit of UNESCO member states who plan to develop TV, on the U. S. television system's experiments in the interests of education, science and culture. Chapters on television discuss the U. S. system, audience and effects, network educational policies and practice, TV at colleges and universities, TV and schools, research findings and conclusions.

our respects

to DAVID H. BARNOW

AT Beltone in Chicago, radio is being used to reach the hard-of-hearing at the direction of a dynamic but self-effacing man, a would-be lawyer turned salesman.

He is 40-year-old David Barnow, general sales manager of Beltone Hearing Aid Co., which has mushroomed to leadership in its field in the comparatively short span of 13 years. As sales chief, Mr. Barnow also doubles in advertising, handling radio and other media allocations.

It is no accident that Beltone is perhaps the first hearing aid firm to buy a full half-hour network program—or that it spends more on radio than all such enterprises combined in the industry. Mr. Barnow has been sold on radio because, as he puts it, "Radio has paid for itself a thousand times over—in point of response and sales—radio has sold itself."

Last year Beltone spent approximately $1 million on all advertising, with perhaps another $250,000 at the dealer level. The recent purchase by Beltone of *Life Begins at 80* on nearly 110 ABC radio outlets points up Mr. Barnow's conviction about radio. The program represents an expenditure of more than $350,000 in production alone, not counting time charges.

Show Starts April 8

Beltone has purchased *Life Begins at 80* on an alternate week basis for 26 weeks starting April 8. Mr. Barnow reasons:

"What better program to reach the market we're interested in? We know that it has a certain appeal for oldsters and they, having purchased our product, will convey their satisfaction to their friends."

Beltone originally purchased a one-time shot of *Life* for March 25, using it as a test vehicle. Tracing Beltone's growth—and not incidentally his own philosophy—Mr. Barnow says:

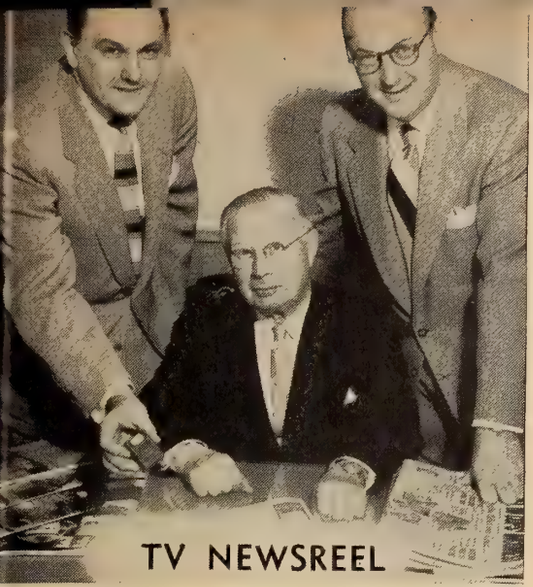
"In advertising, we believe we've been the dominant factor in the hearing aid business. We have averaged better than $1 million a year for the past eight years, with the last few years ranging closer to $1.25 million in both national and local advertising . . . "

If Beltone is one of the outstanding success stories in American business, Mr. Barnow rightfully can claim a large share of credit.

A native Chicagoan, Mr. Barnow was born on Christmas Day 1912. He got his educational grounding at Northwestern U. and set out to learn law at the John Marshall Law School. Finding himself afflicted with a kind of double-vision, he turned away from law and into commerce.

Insurance Salesman

His first sales experiences were as sales correspondent for a music publisher and as agent for Real Silk hosiery. In 1936 he joined the A. B. Kimball Co. (pianos) as a salesman. Insurance seemed a good field to try, so Mr. Barnow became associated with Connecticut Mutual Life Insurance Co. He built an enviable sales record and branched out as an agency supervisor. He received the degree of Chartered Life Underwriter—highest achievement in the insurance field.



His affiliation with the newly-formed Beltone in July 1943 stemmed from a family connection. His sister, Fay, is the wife of Samuel Posen, who founded the firm in 1940. Mrs. Posen checks advertising copy, but the overall advertising—plus important distributor relations—are supervised by Mr. Barnow. He deals directly with Olian & Bronner, the advertising agency which handles the Beltone account.

This distributor relationship is not to be minimized for around this liaison with the field—and the loyalty of distributors—Beltone has built a solid advertising program—attributable in no small measure to Mr. Barnow's friendly working relations. Distributors in turn buy radio time to buttress their local campaigns.

Looks for Two Factors

Riding herd on advertising allocations, Mr. Barnow looks for two factors: Hard-of-hearing prospects who actually will write in for further information, and sales volume. Radio fulfills both requirements satisfactorily, Mr. Barnow feels.

Mr. Barnow and his wife, Ruth, have three sons, Bruce, Barry and Phillip. He is a vice president and board member of the American Hearing Aid Assn. and immediate past chairman of the board of governors of the Hearing Foundation.

National Representative, The Katz Agency

Willard W. Hanes

on all accounts

WILLARD W. HANES, in charge of all West Coast originated radio and TV shows for Campbell-Ewald Co., Hollywood, is currently involved in handling the NBC-AM-TV *Dinah Shore Show* for Chevrolet Motor Div. of General Motors.

Mr. Hanes, who comes from the East, followed a path to the West as a result of a restlessness and a desire to try something new and different.

Born in Buffalo ("never mind when"), he decided after working in a bank for three years that it was no kind of life for him. Heading for Colorado Springs, because a friend said it was a nice place to go, he went to work for the Chamber of Commerce as assistant manager. During the next 13 years he worked on such events as community rodeos and air meets.

There in 1936 Mr. Hanes met the colorful and wealthy Spencer Penrose, who owned and operated the Broadmoor Hotel. He joined forces with Mr. Penrose as manager of the rodeo staged during the Will Rogers Shrine dedication. He added the managerial duties of a stadium and indoor ice rink, and assisted in the promotion and advertising of the hotel itself. Mr. Hanes developed an amateur national collegiate hockey association and started the national figure skating championships held in Colorado Springs.

Joined KMPC in 1943

Mr. Hanes arrived in Hollywood in 1943. For the next three years he directed publicity-promotion-advertising for KMPC.

A photographer by interest, Mr. Hanes made it pay by joining Campbell-Ewald's Los Angeles office in 1948 to do picture stories for Chevrolet's *Friends* magazine.

This activity led to buying radio time for local Chevrolet dealers and writing some commercial copy. The agency made its first West Coast entry into TV for Chevrolet Dealers of Southern Calif. in February 1950, with *Triple Feature Theatre* on KECA-TV Los Angeles.

Late in 1951, Chevrolet placed *Dinah Shore* on NBC-TV for two quarter-hours weekly, and he was assigned to the show's commercials. Now Mr. Hanes has charge of that program and the radio version which Chevrolet has added to its sponsorship.

Three years ago Mr. Hanes walked into a camera shop to pay a bill, met the office manager, Sunny, and shortly thereafter married her. They make their home in suburban Westwood.

WDSU-TV UNMASKS MARDI GRAS FOR THE NATION!

- Millions had heard about it—millions had read about it—but until this year, relatively few Americans had actually *seen* New Orleans' famed Mardi Gras.

- When WDSU-TV—Louisiana's *first* television station—beamed the first network telecast of this colorful spectacle to the nation, it scored a solid hit. The results were mildly sensational—with audience ratings for the entire sixty minute period showing unusually large gains. Reviews in leading papers throughout the country echoed audience reaction by praising the excellent presentation of this local celebration to a national audience.

- This is but another example of our effort to always be "first" in serving New Orleans—and the nation!

- Write, Wire or Phone BLAIR-TV!

Standard

Put You on The Air QUICKER!

Standard Electronics high power 20 KW Amplifier installed at WOR-TV Channel 9, New York, September, 1952.

S-E Money-Saving Features

MINIMUM STATION PACKAGE

Get on the air quickly, inexpensively with Standard Electronics Minimum Station Package. Depending on your channel allocation, *order* a 500 watt VHF or 1KW UHF transmitter, a high gain antenna, sync generator, monitoring equipment and a film system.

EXPANDABLE

The minimum station package can be expanded without scrapping a single piece of equipment, when you are permitted to increase power. Simply add S-E Add-A-Unit amplifiers for higher power even up to 50 KW output.

S-E TRANSMITTERS COST LESS INSTALLED

Add-A-Unit design saves building alteration expense. Units are easily adapted to any station layout, straightline . . . "U" . . . "L".

LOWER TUBE COSTS

Aging tubes, incapable of supplying power in the visual section are interchangeable with the aural section where power requirements are considerably less.

S-E Design Features

TRANSMITTER

Basic VHF unit is the 500 watt visual and 250 watt aural unit; basic UHF is 1,000 watts visual and 500 watts aural—a complete self-contained transmitter, in either case.

INCREASED POWER

Transmitter power can be increased by simply adding a S-E Add-A-Unit amplifier to provide complete transmitters up to 50KW without scrapping a single piece of equipment.

VERSATILE

S-E Add-A-Unit amplifiers can be added to existing station equipment regardless of make.

SELF-CONTAINED

Compact, completely self-contained . . . no external blowers or transformer vaults needed.

ACCESSIBILITY

All tubes and major components are visible and accessible from the front. Full length glass doors provide easy access and add eye appeal.

All S-E VHF-UHF Transmitters are equal to or exceed FCC standards and RTMA Standards as set forth in TR 104-A or latest revision thereof.

Like a cat goes for milk

Just like a cat goes for milk, local merchants go for W-I-T-H in Baltimore. W-I-T-H carries the advertising of twice as many of them as any other station in town. These smart retailers know that W-I-T-H produces big results at low cost. Because W-I-T-H delivers more listeners-per-dollar than any other radio or TV station in town.

W-I-T-H can produce big results for you, too—at low cost. Get your Forjoe man to give you all the details.

BROADCASTING TELECASTING

March 30, 1953 Vol. 44, No. 13

STORER OPTIONS FIFTH TV AS TWO OTHERS REACH LIMIT

Tentative agreement to purchase WBRC-AM-TV Birmingham for $2.4 million is reached by Storer Broadcasting Co., while FCC approves construction permits for fifth TV station for Empire Coil and Wrathall-Carman-Smith groups. Thus, with NBC, CBS and AB-PT, there are six groups in five-station "charmed circle."

TELEVISION'S "charmed circle" of operators who hold the maximum allowable limit of five stations was boosted from three to six by virtue of actions last week.

Storer Broadcasting Co. reached a tentative agreement to purchase WBRC-AM-TV Birmingham from Eloise H. Hanna for $2,400,000.

FCC granted Empire Coil Co. (Herbert Mayer enterprises) its fifth authorization—for uhf Ch. 67 in Indianapolis.

FCC issued to Grant R. Wrathall-Frank C. Carman-David G. Smith group a construction permit of vhf Ch. 2 in Salt Lake City via the marriage procedure, boosting their holdings to substantial interests in five stations.

Thus, these three groups are added to NBC and AB-PT which held the five station maximum prior to the 1948 TV freeze. CBS owns three, substantial minority in two more.

The Storer transaction, subject to FCC approval, gives that company five vhf TV stations. It presently owns seven radio stations. It is presumed that Storer, upon approval of this transfer, will drop its pending applications for Miami (Ch. 10) and Wheeling (Ch. 9). The company, however, has long sought a lifting of the FCC limit of five-TV-station ownership and presumably will pursue that quest. Both NBC and CBS likewise have endorsed an increase in TV ownership quotas.

Storer now operates WSPD-TV Toledo, WJBK-TV Detroit, WAGA-TV Atlanta and KEYL (TV) San Antonio. AM stations are WSPD, WJBK, WAGA, WGBS Miami, WWVA Wheeling, WMMN Fairmont and WSAI Cincinnati.

WBRC-TV is assigned Ch. 6 and has been authorized visual power of 14.25 kw and aural, 7.25 kw. Affiliated with NBC, interconnected, the station began operating in 1949 and is controlled by Mrs. Hanna. The transaction, it is understood, is being negotiated through Howard E. Stark, New York media broker.

WBRC, established in 1925, operates on 960 kc with 5 kw. It likewise is NBC-affiliated.

Empire Coil Co., operator of pre-freeze vhf Ch. 9 WXEL (TV) Cleveland and post-thaw uhf Ch. 27 KPTV (TV) Portland, Ore., was awarded its fifth construction permit—for uhf Ch. 67 at Indianapolis. The New Rochelle, N. Y., electronic parts manufacturer also holds post-thaw grants for uhf Ch. 26 KDEN (TV) Denver and uhf Ch. 25 KCTY (TV) Kansas City, both under construction.

Messrs. Wrathall and Carman hold one-half interest in Utah Broadcasting & Television Corp., awarded vhf Ch. 2 at Salt Lake City, one of three "marriage" applications approved by the Commission last week among its total of 11 new TV station authorizations. Half interest in the grantee is held by the Tribune Pub. Co., former competitor for the channel until the merger a fortnight ago [B•T, March 23]. The publishing firm plans to give up its part interest in KALL there, a condition of the grant. Messrs. Carman and Wrathall retain separate ownership of KUTA there.

Messrs. Wrathall, Carman and Smith own 16.75% each in vhf Ch. 4 KOPR-TV Butte, Mont., and 12.75% each in vhf Ch. 8 KWIK-TV Pocatello, Ida. Messrs. Carman and Smith hold 25% each in vhf Ch. 9 KGEM-TV Boise, Ida., Mr. Wrathall recently dropping his 25% holding in that outlet. Messrs. Carman and Smith hold 12.5% each in vhf Ch. 11 KLIX-TV Twin Falls, Ida., Mr. Wrathall owning 25%. The latter also is 50% owner of uhf Ch. 28 KICU (TV) Salinas, Calif. [See protest of Salinas Ch. 8 action below.]

The other merger applications approved by FCC last week included Television Services of Knoxville for uhf Ch. 26 and Minnesota-Iowa Television Co. for vhf Ch. 6 at Austin, Minn. [B•T, March 23].

Television Services of Knoxville is a merger of the original applicant of the same name and former Ch. 26 competitor W. R. Tuley, an oilman. Mr. Tuley acquires 80% interest. Harold H. Thoms and J. Horton Doughton, former 50% owners, now own 10% each. Mr. Thoms is 99% owner of WISE Asheville, N. C., 75% owner of WEAM Arlington, Va., 13.5% owner of WSSB Durham, N. C., and 25% owner of WAYS Charlotte and WCOG Greensboro, N. C. Mr. Doughton owns 25% in WAYS and WCOG.

Minnesota-Iowa Television is a merger of two former competitors for Ch. 6, South Central Minnesota Television Co. and KAUS Austin, principals in latter retaining control.

Comr. Hennock Dissents

Comr. Frieda B. Hennock dissented in all three of the merger grants.

But while last week's actions represented continuing effort on the part of the Commission to keep new TV station grants flowing as steadily as possible, there were other television developments which observers fear may stem this continuing tide of authorizations.

● In what was termed an unexpected and unprecedented action, FCC did an about-face respecting "economic" protests of non-hearing TV grants pursuant to Sec. 309(c) of the Communications Act and called for hearing on its uhf Ch. 35 grant at Muskegon, Mich., to Versluis Radio & Television Co. Heeding advice of the U. S. Attorney General, FCC reversed an earlier ruling which had dismissed a protest of the Versluis grant, filed by WGRD Battle Creek [B•T, March 23]. FCC set hearing for April 22.

● The reversal, which renders moot WGRD's pending complaint before the U. S. Court of Appeals for the District of Columbia, is seen in both industry and FCC quarters as unloosing a virtual flood of economic protests of non-hearing TV grants, some already received at the Commission. Others also question how far the privilege of protest will be extended under further interpretation of Sec. 309(c).

● One major problem seen as a result of the new interpretation of protestants' rights under Sec. 309(c) stems from the law's requirement that each protest be answered by FCC within 15 days and hearings, where indicated, must be "expedited." It is feared normal new-TV station comparative hearings will be pushed aside as hearing examiners are put on Sec. 309(c) protest cases.

Augment Protests

Gordon Brown's Sec. 309(c) protest of the share-time grant on vhf Ch. 10 at Rochester, N. Y., to WHEC and WVET there [B•T, March 16]—the first believed filed since the WGRD complaint—was augmented last week by the following two new petitions.

● Public Information Corp., licensee of WSSB Durham, N. C., and applicant for uhf Ch. 46 there, filed protest of the Commission's grant several weeks ago of the merger application of T. E. Allen & Sons Inc. and WTOB Winston-Salem for Ch. 46 at Durham [B•T, March 2]. WSSB charges FCC acted too quickly and didn't allow proper notice.

● Salinas-Monterey Television Co., uhf Ch. 28 grantee at Salinas, Calif., protests the Commission's share-time grant on vhf Ch. 8 in that area to KMBY Monterey and KSBW Salinas, charging injury from "monopoly" of the four major network services.

The 11 new grants boost post-thaw authorizations to 325, and the total of outstanding TV authorizations in the U. S. and its territories to 433 stations, of which 147 are now in commercial operation. Two more were to begin over this past weekend (see story page 64).

The new grants:

Knoxville, Tenn. (City priority Group A-2, city No. 21)—Television Services of Knoxville (merger of broadcasters Harold H. Thoms and J. Horton Doughton with former competitor W. R. Tuley, latter acquiring 80%), granted uhf Ch. 26, effective radiated power of 21 kw visual and 10.5 kw aural, antenna height above average terrain 480 ft. (Comr. Frieda B. Hennock dissented).

Austin, Minn. (Group A-2, No. 218)—Minnesota-Iowa Television Co. (merger of South Central Minnesota TV Co. and KAUS, latter retaining control), granted vhf Ch. 6, ERP 18.5

kw visual and 9.3 kw aural, antenna 420 ft. (Comr. Frieda B. Hennock dissented.)

Victoria, Tex. (Group A-2, No. 339)—KNAL Television Co. (KNAL), granted uhf Ch. 19, ERP 20 kw visual and 13.5 kw aural, antenna 330 ft.

Grand Junction, Col. (Group A-2, No. 371)—Western Slope Broadcasting Co. (KFXJ), granted vhf Ch. 5, ERP 1.45 kw visual and 0.85 kw aural, antenna minus 10 ft.

Yuma, Ariz. (Group A-2, No. 571)—Valley Telecasting Co., granted vhf Ch. 11, ERP 29 kw visual and 14.5 kw aural, antenna 260 ft.

Des Moines, Iowa (Group B-3, No. 171)—Rib Mountain Radio Inc. (same ownership as WEAU Eau Claire, Wis.), granted uhf Ch. 17, ERP 180 kw visual and 98 kw aural, antenna 580 ft.

Indianapolis, Ind. (Group B-4, No. 187)—Marion Radio Corp. (WBAT Marion), granted uhf Ch. 26, ERP 95 kw visual and 51 kw aural, antenna 370 ft.

Indianapolis, Ind. (Group B-4, No. 187)—Empire Coil Co., granted uhf Ch. 67, ERP 125 kw visual and 68 kw aural, antenna 510 ft. (Comr. Eugene H. Merrill not participating.) This is fifth TV station granted Empire Coil, limit now allowed by FCC's rules.

Boston, Mass. (Group B-5, No. 208)—E. Anthony & Sons Inc. (WNBH-AM-TV New Bedford), granted uhf Ch. 50, ERP 255 kw visual and 135 kw aural, antenna 540 ft. (Chairman Paul A. Walker and Comrs. Frieda B. Hennock and Eugene H. Merrill dissented.)

San Antonio, Tex. (Group B-5, No. 209)—Alamo Television Co. (owned by oilman W. W. Lechner), granted uhf Ch. 35, ERP 230 kw visual and 120 kw aural, antenna 420 ft. (Comr. Eugene H. Merrill not participating.)

Salt Lake City, Utah (Group B-5, No. 211)—Utah Broadcasting & Television Corp. (merger of original applicant of same name and competitor TV Corp. of Utah, owned by Tribune Pub. Co., part owner KALL there), granted vhf Ch. 2, ERP 27.5 kw visual and 14 kw aural, antenna 3,980 ft. Subject to condition that permittee divest itself of all interest in KALL and Intermountain Network. (Comr. Frieda B. Hennock dissented.)

'Concentration of Control'

As she dissented a fortnight ago when the Commission granted vhf Ch. 11 at Twin Falls, Ida., to KLIX there [B•T, March 23], Comr. Hennock said respecting the Salt Lake City Ch. 2 authorization to Utah Broadcasting:

I dissent from the Commission's grant of a construction permit because there are basic questions of policy raised therein which I believe have not received adequate consideration.

Today's grant of a TV construction permit adds further to the concentration of control of broadcasting facilities by a group composed of Carman-Wrathall-Smith and [Edna O.] McCrea. This group already owns 50% of two TV stations as well as (excluding Wrathall) a majority interest in a third TV station, all in Southern Idaho, and in two of these stations is associated with the J. Robb Brady Trust Co. which has an additional TV station of its own [KIFI-TV Idaho Falls]. And, in addition to ownership of an AM station in Salt Lake City, this same group has other AM-FM interests in same general area.

Comr. Hennock, in her protest of the Ch. 26 grant to Television Services of Knoxville, stated she dissented "on the ground that this application raises substantial questions of undue concentration of control over broadcasting facilities."

It was Comr. Merrill, however, who spelled out his dissent to the grant of Ch. 50 at Boston to E. Anthony & Sons, operator of WNBH-AM-TV New Bedford and WOCB West Yarmouth. Comr. Merrill said in part:

The distance between the transmitters of these two television stations, which will be under common control, is 50 miles. The overlap of areas served by the two stations at maximum power and antenna heights or at even considerably less power and antenna heights is apparent.

I forsee, if the trend continues of permitting over-concentration of limited television facilities in the same area being under common control, a degree of regulation of television broadcasting industry that would not otherwise be necessary. This might follow because of such concentration: (a) limiting competition; (b) adversely affecting the diversification of control over the sources of programs to the television public; (c) causing excessive concentration in the dynamic television field, and (d) affecting the development of competitive practices seriously threatening the capacity of other licensees to compete effectively.

In other actions, the Commission granted a special temporary authorization to Howard-Yale Inc., Palm Springs, Calif., to construct and operate an experimental 2-w booster station atop Howell Peak to amplify signals of all Los Angles vhf stations and providing test wireless community TV system.

Eugene Television Inc., applicant for vhf Ch. 13 at Eugene, Ore., and representing a merger of the TV bids of KORE and KUGN there, was advised a hearing will be necessary on the question of common AM ownership.

FCC also amended earlier grant of vhf Ch. 10, Minot, N. D., to Rudman Television Co., to include condition that the TV antenna must not adversely affect AM operation of KCJB there. FCC dismissed KCJB's protest as moot.

Rudman Television is solely owned by oilman M. B. Rudman, who was the first to acquire four post-thaw TV grants [B•T, March 9]. Besides the Minot permit, Mr. Rudman holds authorizations for vhf Ch. 12 at Bismarck, N. D., uhf Ch. 35 at Galveston, Tex., and vhf Ch. 8 at Billings, Mont., the latter in conjunction with oilman Albert Hayutin.

Besides Mr. Rudman and Storer Broadcasting, another with interests in four TV stations is Crosley Broadcasting Corp. Crosley is operator of WLWT (TV) Cincinnati, WLWC (TV) Columbus, WLWD (TV) Dayton, all Ohio, and WLWA (TV) Atlanta, Ga.

Concerning the controversial case involving WGRD's protest of the Versluis Muskegon grant, FCC stated in its memorandum opinion and order that "upon its own motion" the Commission "has reconsidered its action of Feb. 5, 1953, dismissing the protest of Music Broadcasting Co. [WGRD] to the grant on Dec. 23, 1952, of the [Versluis application]. The Commission has considered further the protest, and the motion to dismiss the protest filed by Versluis Radio and Television Inc., and has taken official notice of the papers on file with U. S. Court of Appeals for District of Columbia Circuit in consolidated action pending for review of Commission's orders herein."

Claim Is Recognized

"In light of its reconsideration," the opinion said, "the Commission concludes that the protest filed by Music contains allegations sufficient to indicate that Music, as the licensee of a standard broadcast station at Grand Rapids, Mich., will be economically injured by the proposed operations of the applicant, and is therefore 'a party in interest' within the meaning of Sec. 309(c) of the Act. The Commission adheres to the view that the term 'party in interest' is a limited one, and that the case of *FCC v. Sanders Bros. Radio Station,* 309 U.S. 470, establishes the boundaries of the category of persons who may be considered parties in interest because of economic injury. . . ."

FCC set aside its dismissal of the WGRD protest and ordered hearing upon "the matters put in issue by said protest," including propriety of the Versluis TV site under the rules, whether "false information" was submitted in certain balance sheets filed with FCC by Versluis Radio and whether applicant's sale of WOOD-TV Grand Rapids (formerly WLAV-TV) "establishes applicant lacks necessary character qualifications to be a TV licensee."

WGRD has charged Leonard Versluis made a $1 million profit in sale of WLAV-TV to WOOD, alleging "trafficking" in the transfer.

Effective immediately, and pending outcome of April 22 hearing, FCC "postponed" its Dec. 23 grant of the Versluis application. Comr. Robert T. Bartley dissented from FCC majority in the reversal, holding the turnabout action is not consistent with legislative history respecting Sec. 309(c), particularly this Senate Committee statement:

Fear has been expressed that use of 'parties in interest' might make possible intervention into proceedings by a host of parties who have no legitimate interest but solely with the purpose of delaying license grants which properly should be made. The Committee does not so construe the term 'party in interest'; 'parties in interest' because of electrical interference are fixed and defined by the Supreme Court decision in the KOA case (319 U.S. 239) and the Commission's rules and regulations; *'parties in interest' from an economic standpoint are defined by the Supreme Court decision in the Sanders case* (309 U. S. 470). (Senate Report No. 44 on S. 658, 82nd Cong. 1st Sess., p. 8). (Emphasis supplied.)

FCC spokesmen last week could not estimate full consequences of the reversal order, but they did say they expect more than a few economic protests of non-hearing grants. One official observed the normal hearing procedures could be put virtually to a standstill by expedited Sec. 309(c) protest hearings.

Another FCC official recalled that the Commission specifically warned Congress of the potential dangers inherent in the McFarland amendments of the Communications Act which resulted in new construction of Sec. 309(c).

Attorney General's View

After WGRD protested to the Court of Appeals, it is understood, FCC learned that the U. S. Attorney General construed Sec. 309(c) to mean WGRD is a party in interest, hence he could not support FCC's reply to the complaint in court. FCC Chairman Walker reportedly met Attorney General Herbert Brownell a fortnight ago, and Mr. Brownell later wrote his views in a letter to Chairman Walker.

As the Attorney General, aside from courts, is chief interpreter of federal laws, it is believed FCC decided to short cut possible lengthy court proceding and on its own motion acknowledged validity of WGRD protest.

Gordon Brown, licensee of WSAY Rochester and applicant for Ch. 10 there, in his protest of the Ch. 10 share-time grant to WHEC and WVET, observes that "the basic purpose of Sec. 309(c) . . . is to permit protests to unreasonable grants made prior to an opportunity for a studio and objection to applications for radio or television facilities."

Mr. Brown charges FCC acted too quickly upon the amended share-time bids, preventing filing and consideration of his Ch. 10 bid.

Similarly, WSSB Durham holds FCC acted too quickly on the Allen grant for uhf Ch. 46 at Durham, pointing out the merger was filed Feb. 20 and announced as granted on Feb. 26, but that on Feb. 25 its own bid had been tendered and the Commission staff had been informed over the Washington Birthday holiday weekend that WSSB planned to file. WSSB claims FCC improperly returned the application since as a matter of law, in view of the holiday on that Monday, its bid was timely.

Salinas-Monterey Television Co., uhf Ch. 28 grantee [KICU], Salinas, Calif., and protestant of share-time grants on vhf Ch. 8 to KSBW and KMBY, is owned by Grant R. Wrathall and S. A. Cisler Jr. Mr. Cisler's protest:

My partner and I are parties in interest as contemplated by Congress in Sec. 309(c) inasmuch as the proposed combination as granted by the Commission will result in unfair competition and an impossible situation as shown below in sales rates and availability of network programs. [We] also protest on behalf of the public . . . in that the combination as authorized by the Commission will result in a strong connection with the networks tying up network programs making it impossible for KICU to obtain a source of programs.

KICU contends KSBW gets funds through advances from 25%-owner *San Francisco Chronicle,* operator of NBC-TV affiliate KRON-TV San Francisco, thus influencing program policy. KICU asserts KMBY is obtaining funds from 24%-owner Bing Crosby, citing his CBS contracts.

AD COUNCIL GAVE $1½ BILLION IN TIME-SPACE DONATIONS—GRAHAM

President Eisenhower addresses a White House meeting of nearly 200 Advertising Council members and high government officials, acknowledging the council's public service work. 'Washington Post' (WTOP-AM-FM-TV and WMBR-AM-TV Jacksonville) publisher Philip Graham becomes the first media executive to assume the council's highest office. NARTB's Harold Fellows, CBS-TV's J. L. Van Volkenburg and NBC's Frank White are elected directors.

TIME and space totaling $1½ billion have been contributed to public services through Advertising Council campaigns, Philip L. Graham, publisher of *The Washington Post* (WTOP-AM-FM-TV and WMBR-AM-TV Jacksonville) told the council Tuesday as he assumed its board chairmanship.

Mr. Graham took office Tuesday during an all-day council session with highest government officials. He was elected by the council board at a Monday meeting [Closed Circuit, March 23].

Work of the council received recognition from President Eisenhower as the Tuesday meeting opened at the Executive Offices in Washington. The President showed familiarity with the council's work and spoke highly of advertising's public service contributions. The remarks were off-the-record.

Ninth White House Session

The conference was the council's ninth White House meeting. Presiding was C. D. Jackson, special advertising assistant to the President. Among those who spoke during the day were Sherman Adams, assistant to the President; Joseph M. Dodge, Director of the Budget; George M. Humphrey, Secretary of the Treasury; Sinclair Weeks, Secretary of Commerce; Charles E. Wilson, Secretary of Defense; John Foster Dulles, Secretary of State, and Ezra Taft Benson, Secretary of Agriculture.

Attending the conference were nearly 200 executives heading a substantial section of important corporations. Among radio delegates were Fred Bohen, Meredith Publishing Co.; Gardner Cowles, Cowles Magazines; Ralph W. Hardy, NARTB; Robert Hinckley, ABC; Edgar Kobak, consultant; Eugene Meyer, *Washington Post;* Paul W. Morency, WTIC Hartford; Frank Stanton, CBS; Niles Trammell, Biscayne Television Corp.; J. L. Van Volkenburg, CBS; Frank White, NBC; Chris J. Witting, DuMont Television Network.

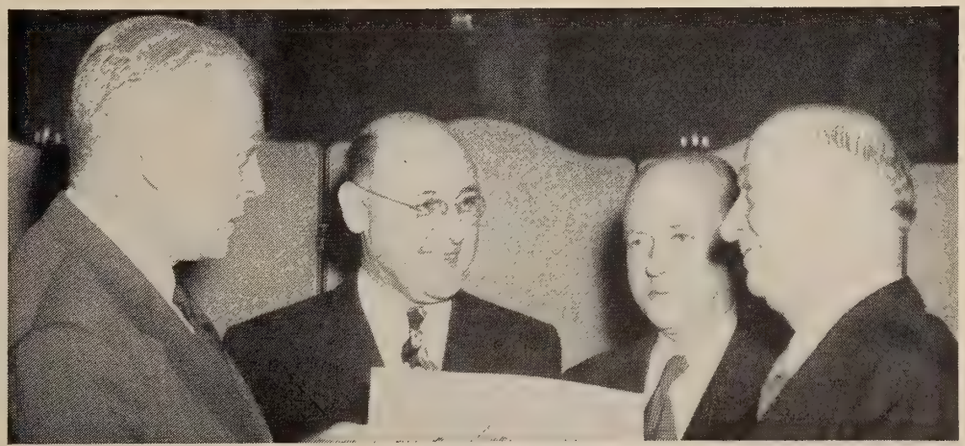
In his acceptance speech, Mr. Graham said the 12-year-old council now is donating over $100 million annually in time and space. He traced the council's part in promoting registration and voting in the last Presidential election, an achievement that brought it the first place award of American Heritage Foundation (see photo).

Mr. Graham reviewed the council's philosophy in preserving the American economic system by increased productivity as a basis for national security. He reminded that the council's work in preserving voluntary solution of problems is conducted at no cost to the American taxpayer and with a half-million dollar budget.

Dispelling any notion that the present Administration is strictly a friend of wealth and power, Mr. Graham warned that President Eisenhower "is not hiring himself out as wet nurse for American business and industry."

In succeeding Henry J. Morgens, vice president in charge of advertising for Procter & Gamble Co., Mr. Graham becomes the eighth person and first media executive to hold the highest office in the national, non-profit public service advertising organization. Mr. Morgens now assumes chairmanship of the board's planning committee and becomes a director-for-life.

AWARD of American Heritage Foundation to the Advertising Council for its register-vote campaign is presented to Philip L. Graham (c), *Washington Post* (WTOP-AM-FM-TV), new chairman of council, and Howard J. Morgens (r), Procter & Gamble Co., retiring chairman, by Thomas D'Arcy Brophy, Kenyon & Eckhardt, Foundation president.



A highlight of the meeting was presentation to the council by Thomas D'Arcy Brophy, president of the American Heritage Foundation, of the first place award in the 1952 national "register and vote" competition. The award is a four-foot-high reproduction in full color of Arthur Szyk's painting of the Declaration of Independence with marginal illuminated sketches of significant events in American history.

Stuart Peabody, assistant vice president of the Borden Co., was elected a vice chairman of the council's board. Re-elected as vice chairmen were Louis N. Brockway, executive vice president of Young & Rubicam, and Leo Burnett, president of Leo Burnett Co.

The directors also re-elected Theodore S. Repplier as president of the council; Allan M. Wilson and George P. Ludlam, as vice presidents; Frederic R. Gamble, president of the American Assn. of Advertising Agencies, as secretary, and Paul B. West, president of the Assn. of National Advertisers, as treasurer.

Eight new directors, who represent various facets of the advertising industry, include:

Harold E. Fellows, NARTB president; J. L. Van Volkenburg, CBS-TV president, and Frank White, NBC president, radio and television; Edward G. Gerbic, vice president in charge of merchandising and advertising, Johnson & Johnson Inc., and H. M. Warren, vice president in charge of advertising and sales promotion, National Carbon Co., advertisers; Fred Adams, president, G. M. Basford Co., advertising agencies; William E. Robinson, executive vice president, *New York Herald Tribune,* newspapers; Myles Standish, chairman of the Outdoor Advertising Assn. of America, outdoor advertising.

FIRST PRIZE citation goes to the City of Rochester from the American Heritage Foundation for its record during the election last fall, when 98.5% of all eligible voters cast a ballot. Taking part in the telecast presentation were, l to r, Thomas D'Arcy Brophy, president, Kenyon & Eckhardt agency, and president of the Foundation; Don U. Bridge, president, Rochester Advertising Council; William Fay, vice president, Stromberg-Carlson and general manager WHAM-AM-TV, and Mayor Samuel B. Dicker. WHAM-TV later sponsored a dinner for 50 of the City's leading businessmen and civic workers.

Week's TV Buys Discredit Warning of Price Boycott

FOR ALL the recent plaints about television pricing itself out of the market, evidence last week suggests favorable TV time periods still are being snatched up as soon as available. Radio, too, came in for additional revenue.

Procter & Gamble's Lilt, for example, will sponsor part of *The Jackie Gleason Show* on CBS-TV, Saturday, 8-9 p.m. EST, which will be dropped by Bristol-Myers May 2.

Lilt will become the third advertiser on the show May 16, when it starts sponsorship for five times with an option to further the contract. Other advertisers are Thomas Leeming & Co. and Schick Inc.

Meanwhile, Bristol-Myers, for its Sal Hepatica, has bought half-hour live hillbilly programs in 20 major cities, once a week, to run until June 30. Agency is Young & Rubicam, New York.

Coca-Cola Co. is plunging into a regular television series, its first. The soft drink firm also will use a radio program. On April 29, Coca-Cola will pick up the NBC-TV 7:30-7:45 p.m. period, Wednesday and Friday, which will be dropped by Procter & Gamble's Tide the preceding week. The show will feature Eddie Fisher, vocalist, and Don Ameche.

Radio Version

The television program will be taped, edited and presented on NBC radio Tuesdays and Fridays, 8-8:15 p.m. EST, to mark Coca-Cola's first return to radio since last July. The firm last sponsored Mario Lanza in a radio program once a week. D'Arcy Agency, New York, handles the Coca-Cola account.

NBC-TV expects to sell the Monday 7:30-7:45 p.m. period to another advertiser by next week.

Colgate-Palmolive-Peet will retain its 11:30-11:45 a.m. Monday-through-Friday time on NBC radio but will replace the present program, *Bob and Ray,* with a new one, effective today (Monday). This show, titled *The Phrase That Pays,* will feature Red Benson as m.c., and will offer such unusual "bonus" prizes as percentage ownership of a professional wrestler, interest in a Broadway play or real estate. Agency is Sherman & Marquette, New York.

Liggett & Myers (Chesterfield cigarettes), through Cunningham & Walsh, New York, has decided upon the summer replacement for its Perry Como show, three times weekly on CBS-TV, effective June 24. The hot weather version of the Chesterfield show will feature vocalists Bob Eberle and Helen O'Connell.

Carter Products, New York (Arrid and Rise), through Sullivan, Stauffer, Colwell & Bayles, New York, had planned to cancel its sponsorship of *City Hospital,* Saturday, 1:30-2 p.m. on CBS Radio, but now has renewed the program for another season.

AMERICAN AIRLINES SIGNS 3-YEAR PACT

SIGNING of a three-year contract described as covering the largest single amount of advertising in the history of radio broadcasting was announced Thursday by Adrian Murphy, president of CBS Radio, and C. R. Smith, president of American Airlines.

Deal, it is understood, will cost American Airlines more than $1 million for the three-year period.

The contract, long under negotiation, provides American Airlines with a total of more than 30,000 radio broadcast hours on six CBS radio stations on schedules after midnight. According to Mr. Murphy, it represents the first large-scale move to exploit the after-midnight audience.

Under terms of the contract, it was announced, American Airlines, starting about mid-April, will promote its services within the hours from midnight to 5:30 a.m. EST Monday through Friday, and Saturday midnight to normal station opening time Sunday morning on WCBS New York, WEEI Boston, WBBM Chicago, KNX Los Angeles, KCBS San Francisco and WTOP Washington. CBS owns all but WTOP, in which it has a 45% non-voting interest.

The programs will be conducted by local station personalities and will feature light music with news on the hour, local weather conditions and general information for the traveling public.

Commenting on the arrangements, Mr. Smith declared:

"American Airlines flies wherever people in its areas want to go, and the program schedule of these six stations reaches the people at our principal points of departure. We are delighted to pioneer in this expansion of radio's usefulness to the community."

Mr. Murphy voiced appreciation of American Airlines' "recognition of radio's reach and vitality," and added that "tangible benefits should accrue to radio stations throughout the country as the effectiveness of all-night broadcasting is demonstrated on such a large scale."

Kiesewetter Assoc. Renamed

KIESEWETTER ASSOC., New York advertising agency founded 23 years ago, has changed its name to Kiesewetter, Baker, Hagedorn & Smith Inc. There are no other changes in personnel or operations, spokesman reported. The agency continues to occupy offices at 9 East 40th St., New York 16. Principals are H. M. Kiesewetter, president, and Vice Presidents Samm S. Baker, Horace Hagedorn and H. Bechtel Smith.

* * *

Mr. Kiesewetter

Mr. Baker

Mr. Hagedorn

Mr. Smith

Frank R. Griffin Dies

FRANK R. GRIFFIN, 58, vice president and member of the board of Compton Adv., New York, died last Monday in Johns Hopkins Hospital, Baltimore, after a long illness. His home was in Bronxville, New York.

Mr. Griffin

Surviving are his widow, Elsie; two daughters, Mary and Elsie, and a sister, Mrs. Morgan Hand of Bellefontaine, Ohio.

Packard Begins Campaign

PACKARD Motor Car Co. last week started a $250,000 test drive utilizing Chicago radio, television and other media on the first lap of a projected six-month campaign for two new car lines [AT DEADLINE, March 23]. The drive may be extended to other markets next fall. Agency is J. R. Pershall Co., Chicago.

NEW BUSINESS

Rich Plan, L. A. (home freezer food plan), added transcribed quarter-hour program, *Friendly Philosopher,* on six stations this month, augmenting original 14-station line-up. Nine mid-western markets will be added soon. Agency: J. Russell Calvert & Assoc., L. A.

Toni Co., Chicago, sponsoring 11:30-11:45 p.m. EST Tues., Thurs. and Fri. portion of *Friend in Need,* ABC radio, Mon.-Fri., 11:30-12 noon EST, audience participation program starring Dennis James, effective last Tues. Agency: Leo Burnett Co., Chicago.

Minnesota Mining & Mfg. Co. (Scotch cellophane tape) to sponsor Tues. segment of *Ding Dong School* on NBC-TV (Mon.-Fri., 10-10:30 a.m. EST), effective May 5. Agency: BBDO Minneapolis.

Agency Appointments

General Cigar Co., N. Y., names Young & Rubicam, N. Y., effective April 1, for Robert Burns Cigars and Robert Burns Cigarillos, in addition to White Owl brand.

United States Tobacco Co. names C. J. LaRoche & Co. for new test of oval, king-sized Sheffield cigarettes in several major markets.

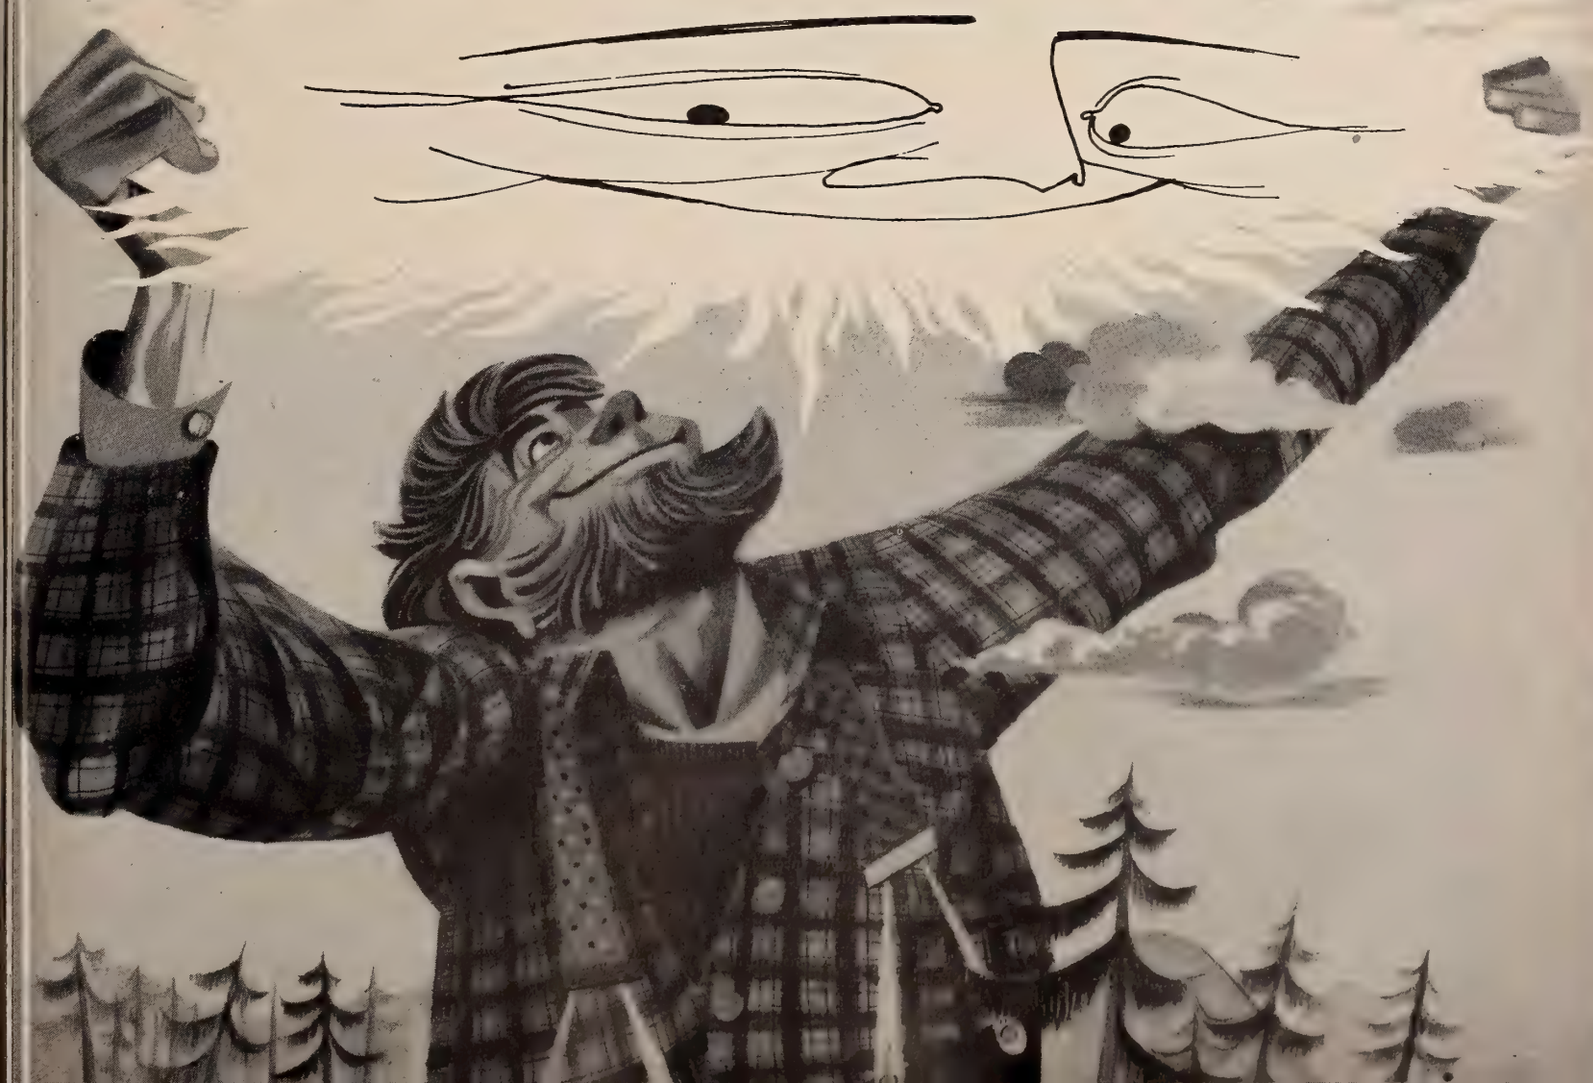
J & J Food Co., Cincinnati ("Pump 'N Joe" food products), appoints Robert Acomb Inc., Cincinnati.

Angostura-Wuppermann Corp. appoints Ruthrauff & Ryan, N. Y., for Angostura bitters, effective immediately.

Burkhardt Brewing Co., Akron, Ohio, appoints Rollman & Peck, Cincinnati.

Buxton Inc., Springfield, Mass. (billfolds), appoints Doyle Dane Bernbach Inc., N. Y.

One of the more delightful Paul Bunyan legends concerns the Time-stretcher. Seems Paul wasn't accomplishing enough in a "normal" day, so he invented a machine to make the days twice as long.*



Tops the Time-stretcher!

Today it's obsolete, because (no legend *this*!) WCCO Radio accomplishes wonders in even the shortest periods of time. By speaking for you to *more people in more markets*, over a vaster area (some 86,700 square miles), than any other Northwest station. WCCO Radio covers 109 primary Northwest counties—reaching more people in 82 of them than any of the more than 200 other stations heard throughout the entire area!** To make time with your Northwest customers, let Northwest favorites such as Cedric Adams, Bob DeHaven, Stew MacPherson, Maynard Speece, Halsey Hall, and Allen Gray speak for you, on... **WCCO RADIO**

TELEVISION RECEIPTS JUMP 43%, BRING IN $336.3 MILLION IN '52

FCC reports the TV industry's business on the basis of preliminary estimates. Most post-freeze stations, being late starters, show red for their year's totals.

THE TELEVISION industry's revenues in 1952 spurted to $336.3 million in a 43% increase over 1951's receipts of $235.7 million, the FCC reported Thursday in a compilation based on preliminary estimates submitted by TV networks and stations. The figure represents sale of time, talent and program material to advertisers.

Income for the TV industry jumped 31% for a total of $54.5 million before federal income tax, the preliminary report indicated. The 1951 figure was $41.6 million.

TV networks and their 15 o & o TV outlets reported total revenues of $191.9 million, nearly 50% over their 1951 receipts of $128.4 million. They reported 1952 expenses at $182.9 million and income of $9 million. A 56% increase in network expenses for 1952 ($117.4 million in 1951) was reported responsible for the $2 million income drop from a 1951 income figure of $11 million.

Conversely, network AM income, including 18 o & o stations, increased in 1952 to $11.2 million, some 18% above 1951 income of $9.5 million and $2.2 million above that of 1952 network TV, because of a decrease in 1952 AM operating expenses ($89.5 to $85.9 million) which more than offset a slight decline ($99 to $97.1 million) in 1952 AM revenues. The 1952 income figure contrasted with 1951 when for the first time network TV income passed that of network AM. (1950 network AM income, $18.7 million; network TV, minus $10 million.)

The 93 non-network-owned pre-thaw TV outlets fared much better in 1952. With a slower expense increase of 28%, they received total revenues of $143.7 million, 33% above 1951, and income before federal tax of $45.6 million, up 51% from 1951. The stations' 1952 TV income figure compared with $49.2 million income received by 2,175 AM stations in 1951, latest year for which data is available.

Revenues received by the 14 post-freeze TV outlets authorized in 1952 were more than offset by expenses, with only three of these in operation more than two months of that year. The 14 estimated total revenues at $700,000 and expenses of $800,000, a loss of $100,000.

Of the 108 TV outlets operating all of 1952 (all pre-thaw), only 94 reported profits. Those making profits reported average income at $453,000, compared to $330,000 in 1951. Of these TV outlets, 16 reported incomes of $1 million or above in 1952.

Smaller Deficits

The number of stations reporting losses in 1952 was the same (14) as 1951, but losses were smaller. Seven estimated losses of less than $100,000. Two stations reported maximum losses of $400,000 to $800,000. For 1951 two stations had reported losses upward of $800,000 and two others from $400,000 to $800,000.

The two seven-station markets, New York and Los Angeles, were where nine of the losing stations were located. Of the 14 losing stations, seven estimated total revenues of $2 million or more. None of the 40 outlets in single-station markets reported a 1952 loss.

The five remaining profitable stations in Los Angeles and New York estimated average total revenues at $5 million, expenses $3.3 million and income $1.7 million. The nine losers reported average total revenues of $2.3 million, expenses $2.6 million and losses of $0.3 million.

The 40 outlets in single-station markets averaged $1,400,000 total revenues, $768,000 expenses and $632,000 incomes. Average total revenues of $745,000 were reported by 13 stations in metropolitan areas of less than 250,000. These reported average expenses of $429,000 and incomes of $316,000.

New York led all cities with $28.2 million in total station revenue. Los Angeles had $18 million. Chicago led cities with at least three TV outlets with $16.2 million total revenues, while Atlanta was last with $2.4 million. Biggest gain in this category was in San Francisco, where three stations estimated total revenue at $5.7 million, an increase of 57.6% over 1951.

Total AM and TV network income for 1952 is estimated at $289 million; for 1951 the figure was $227.4 million. Total AM and TV network expenses for 1952 are estimated at $268.8 million; the 1951 figure, $206.9 million. Total AM and TV network profits for 1952 are estimated at $20.2 million, a drop of $0.3 million from $20.5 million for 1951.

The FCC noted that networks engaged in joint radio-TV operations report that certain overhead expenses not readily allocable have been charged to radio, and figures to that extent may understate AM and overstate TV income.

Of 94 pre-thaw stations which reported income in 1952, 12 estimated incomes of $1.5 million and over, while of 92 stations reporting in 1951 only four were in this income bracket, and none of the 53 reporting in 1950. The number of $1 to $1.5 million stations dropped from seven in 1951 to four in 1952. Only one station in this category was reported in 1950.

Stations with incomes from $600,000 to $1 million increased from 12 in 1951 to 17 in 1952, with only three reporting this figure in 1950. In the $400,000-$600,000 income bracket, outlets increased from 15 in 1951 to 19 in 1952; in the $200,000-$400,000 class, the number dropped from 23 in 1951 to 22 in 1952. The number remained the same for the $100,000-$200,000 stations (16), but outlets with

Experts predicted 300 to 500 new savings accounts

KYW and JACK PYLE PRODUCED 2500

There are two acid tests for pulling power in a radio personality

One is sales. The other, popularity in personal appearances.

KYW personalities score high on both. Here's just one example. At the opening of the new Cottman Street office of Philadelphia's Bell Savings and Loan Association, the big drawing card was Jack Pyle, KYW's terrifically popular star of the "Musical Clock" show. And according to a letter to Jack Pyle from Herbert L. Gross, Bell's executive vice-president:

The experts predicted that we would open between 300 and 500 new savings accounts. But they figured without Pyle. When word got around that you were in the neighborhood, everyone rushed to put his money in a safe place and we opened over 2500 accounts!

To get action like this in Philadelphia.. on the air or on the spot.. put KYW to work for you! Free & Peters has details.

less than $100,000 income dropped from 15 in 1951 to 4 in 1952.

Of 105 stations in operation for a full year during 1951 and 1952, their changes in income status were as follows: Increased loss in 1952 (2), decreased income in 1952 (9), income in 1951 and loss in 1952 (5), decreased loss in 1952 (5), loss in 1951 and income in 1952 (6) and increased income in 1952 (78).

A total of 108 pre-thaw TV outlets in various revenue brackets for 1952 are listed below by number as to whether they reported income or loss, with the average revenue and income per station computed by FCC:

Less than $500,000—income 2, loss 1, revenue $365,000, income $57,000; $500,000-$750,000—income 11, loss 2, revenue $577,000, income $117,000; $750,000-$1,000,000—income 15, loss 2, revenue $878,000, income $225,000; $1,000,000-$1,250,000—income 11, loss 1, revenue $1,091,000, income $437,000; $1,250,000-$1,500,000—income 10, loss 1, revenue $1,384,000, income $366,000; $1,500,000-$2,000,000—income 18, loss 0, revenue $1,732,000, income $585,000; $2,000,000-$2,500,000—income 7, loss 2, revenue $2,231,000, income $560,000; $2,500,000-$3,000,000—income 5, loss 4, revenue $2,688,000, income $312,000; $3,000,000 and over—income 15, loss 1, revenue $4,205,000, income $1,734,000.

Three Months for 'Lucy'

FOR THE THIRD successive month, CBS-TV's *I Love Lucy* took first place in the six cities in the "Hooperade of TV Stars" for February, according to C. E. Hooper Inc. "Hooperade" covers New York, Chicago, Los Angeles, Philadelphia, Boston and Detroit. Three other programs placed among the first 15 in all cities in February. They are NBC-TV's *Dragnet, You Bet Your Life* and *Colgate Comedy Hour.*

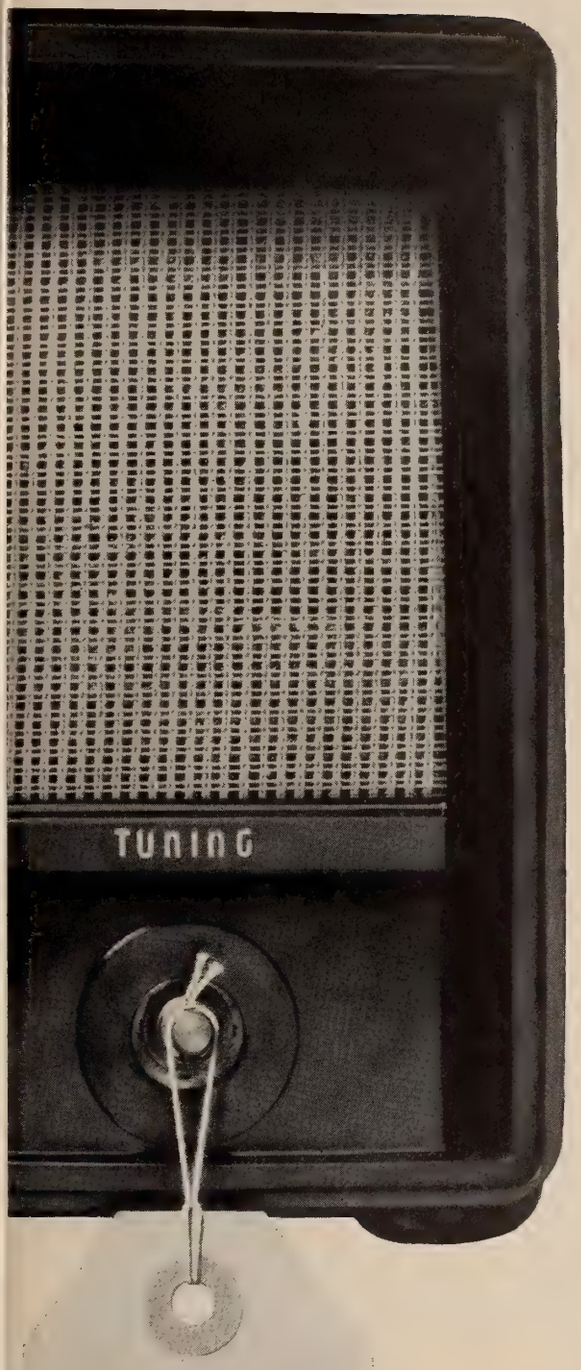
Total Sets in Use 22,468,866

Total Stations on Air 152* Total Markets on Air 100*



* Includes XELD-TV Matamoros, Mexico

Editor's Note: Set estimates appearing here are obtained from stations, which report regularly on special, sworn affidavits. Since not all stations report weekly, set figures in some markets may remain unchanged in successive weeks. Totals for each market represent estimated sets within coverage area of stations in that market. Where coverage areas of different markets overlap, set counts in those markets may be partially duplicated. Total sets in use of U.S. however, is unduplicated estimate.

The day they threw the

This is the first time Americans have selected their most popular radio programs without once turning the dial—day or night.*

And no wonder it took them so long to agree.

For they're the biggest, most varied audience ever served by one medium: 45 million families, who depend so much on radio that in the last seven years alone, they've bought 100 million new sets (with knobs).

When such an audience can agree so completely on 20 favorite shows, 20 sponsors are naturally elated. As are 70 other advertisers on the CBS Radio Network, who are quick to see the value of listening habits that are fast becoming dial fixations. *(CBS Radio stations get more hours of attention than any other network—in both television and non-television areas.)*

All CBS Radio clients are netting a double profit. A marketing advantage from the reach and penetration and low, low cost of radio itself. And an advertising advantage from the clear-cut audience leadership which only the programming imagination of CBS Radio can offer. (Perhaps that's why *the number of advertisers on the CBS Radio Network has grown over 45% in the last five years.)*

When you're using network radio—and it's the only way to combine frequency and impact, coverage and economy—it's pretty clear that there's just one place to be:

THE CBS RADIO NETWORK
Where America Listens Most

because all ten of the most popular nighttime shows— and all ten of the most popular daytime shows— are now on one network!

knob away

State of Union Message	5	22.5
Feature Films	2	11.9
Miscellaneous	4	1.9
Total	687	

Schwerin Advises Pre-Tests

LOW STANDARD of many TV commercials is attributable to the extreme cautiousness of advertisers which, in turn, stems from the high cost of TV production, Horace S. Schwerin, president of Schwerin Research Corp., asserted last Wednesday.

Addressing the Chicago Television Council, Mr. Schwerin said new ideas can be reliably and inexpensively pre-tested in "rough" versions made for a few hundred dollars.

PLANS FOR OPERATION of the new NBC Film Div. are discussed at New York conference by sales staff and two Canadian representatives (l to r): Clifford Ogden, supervisor film sales, Western Div.; Leonard C. Warager, supervisor film sales, Eastern Div.; Robert W. Sarnoff, vice president in charge of Film Div.; John B. Cron, national sales manager; Carl M. Stanton, director, and H. Weller Keever, supervisor of film sales for the Central Division.

NTFC FORUM VIEWS PROGRESS OF FILM

TECHNICAL progress in various areas of television film making was outlined by a panel of seven speakers at a three-hour forum in New York Thursday under auspices of the National Television Film Council.

Centering on the general theme of "Engineers, Electronics and Techniques," the discussion reviewed technological advances in specific fields and embodied suggestions and advice to assist TV film producers. The session was arranged by NTFC to acquaint members with current scientific developments and with techniques under experimentation.

The effect of television on film manufacturing was discussed by E. M. Stifle of the Eastman Kodak Co., Rochester, who noted TV uses about 50% of motion picture film. He stressed importance of TV to film manufacturers by referring to research facilities set up by major manufacturers to test film quality.

"Eastman Kodak, for example," Mr. Stifle continued, "has set up a black-and-white transmission channel, stimulating conditions at the networks, where we are continuously experimenting with such factors as speed and contrast.

"The company also has established a color television studio in Rochester," Mr. Stifle added, and is conducting closed-circuit experimentation.

John Stott of the Tri-Art Color Corp., New York, urged cooperation between TV cameramen and the laboratories to improve television film quality. He cited several techniques developed by laboratory firms to overcome weaknesses in film prints.

Emphasizing that his remarks were "purely speculative," Dr. Peter C. Goldmark, vice president in charge of CBS Labs., expressed belief the use of magnetic recording tape in television would surpass that of films. He said sharp competition "was bound to develop between tape and film," but pointed out this "was certain to lead to improvements in both film and tape."

The use of special effects equipment to reduce television costs was reviewed by C. Graydon Lloyd of General Electric Co., Syracuse. He paid special attention to the development of a montage amplifier by GE and other companies and suggested producers use this device in integrating local commercials with feature films.

Other speakers included Edward Schmidt of Reeves Soundcraft Corp., and Vernon Duke of NBC.

Dr. Alfred N. Goldsmith, television engineering consultant, introduced the speakers and served as moderator. Presiding at the meeting was Arche Mayers, NTFC president.

Film Sales

Two new sales and four renewals of **Paramount Television Productions'** *Time for Beany* children's series were announced last week. Markets carrying series now total 22. WBEN-TV Buffalo and WTVI (TV) St. Louis have purchased five programs a week for 13 weeks. Renewals are WCBS-TV New York, WGN-TV Chicago, KHQ-TV Spokane and KGMB-TV Honolulu.

* * *

Sales of 26 1951-52 feature motion pictures—consisting of the so-called "Lippert Group" to NBC's WNBK (TV) Cleveland and to WWJ-TV Detroit were announced last week by **Joseph P. Smith,** general manager and sales vice president of **Tele-Pictures Inc.,** New York.

* * *

INS-Telenews has sold its entire group of services to the **Nippon Television Network of Tokyo** under a long-term contract and its daily TV news package service to WPTZ (TV) Philadelphia and KDZA-TV Pueblo, Colo.

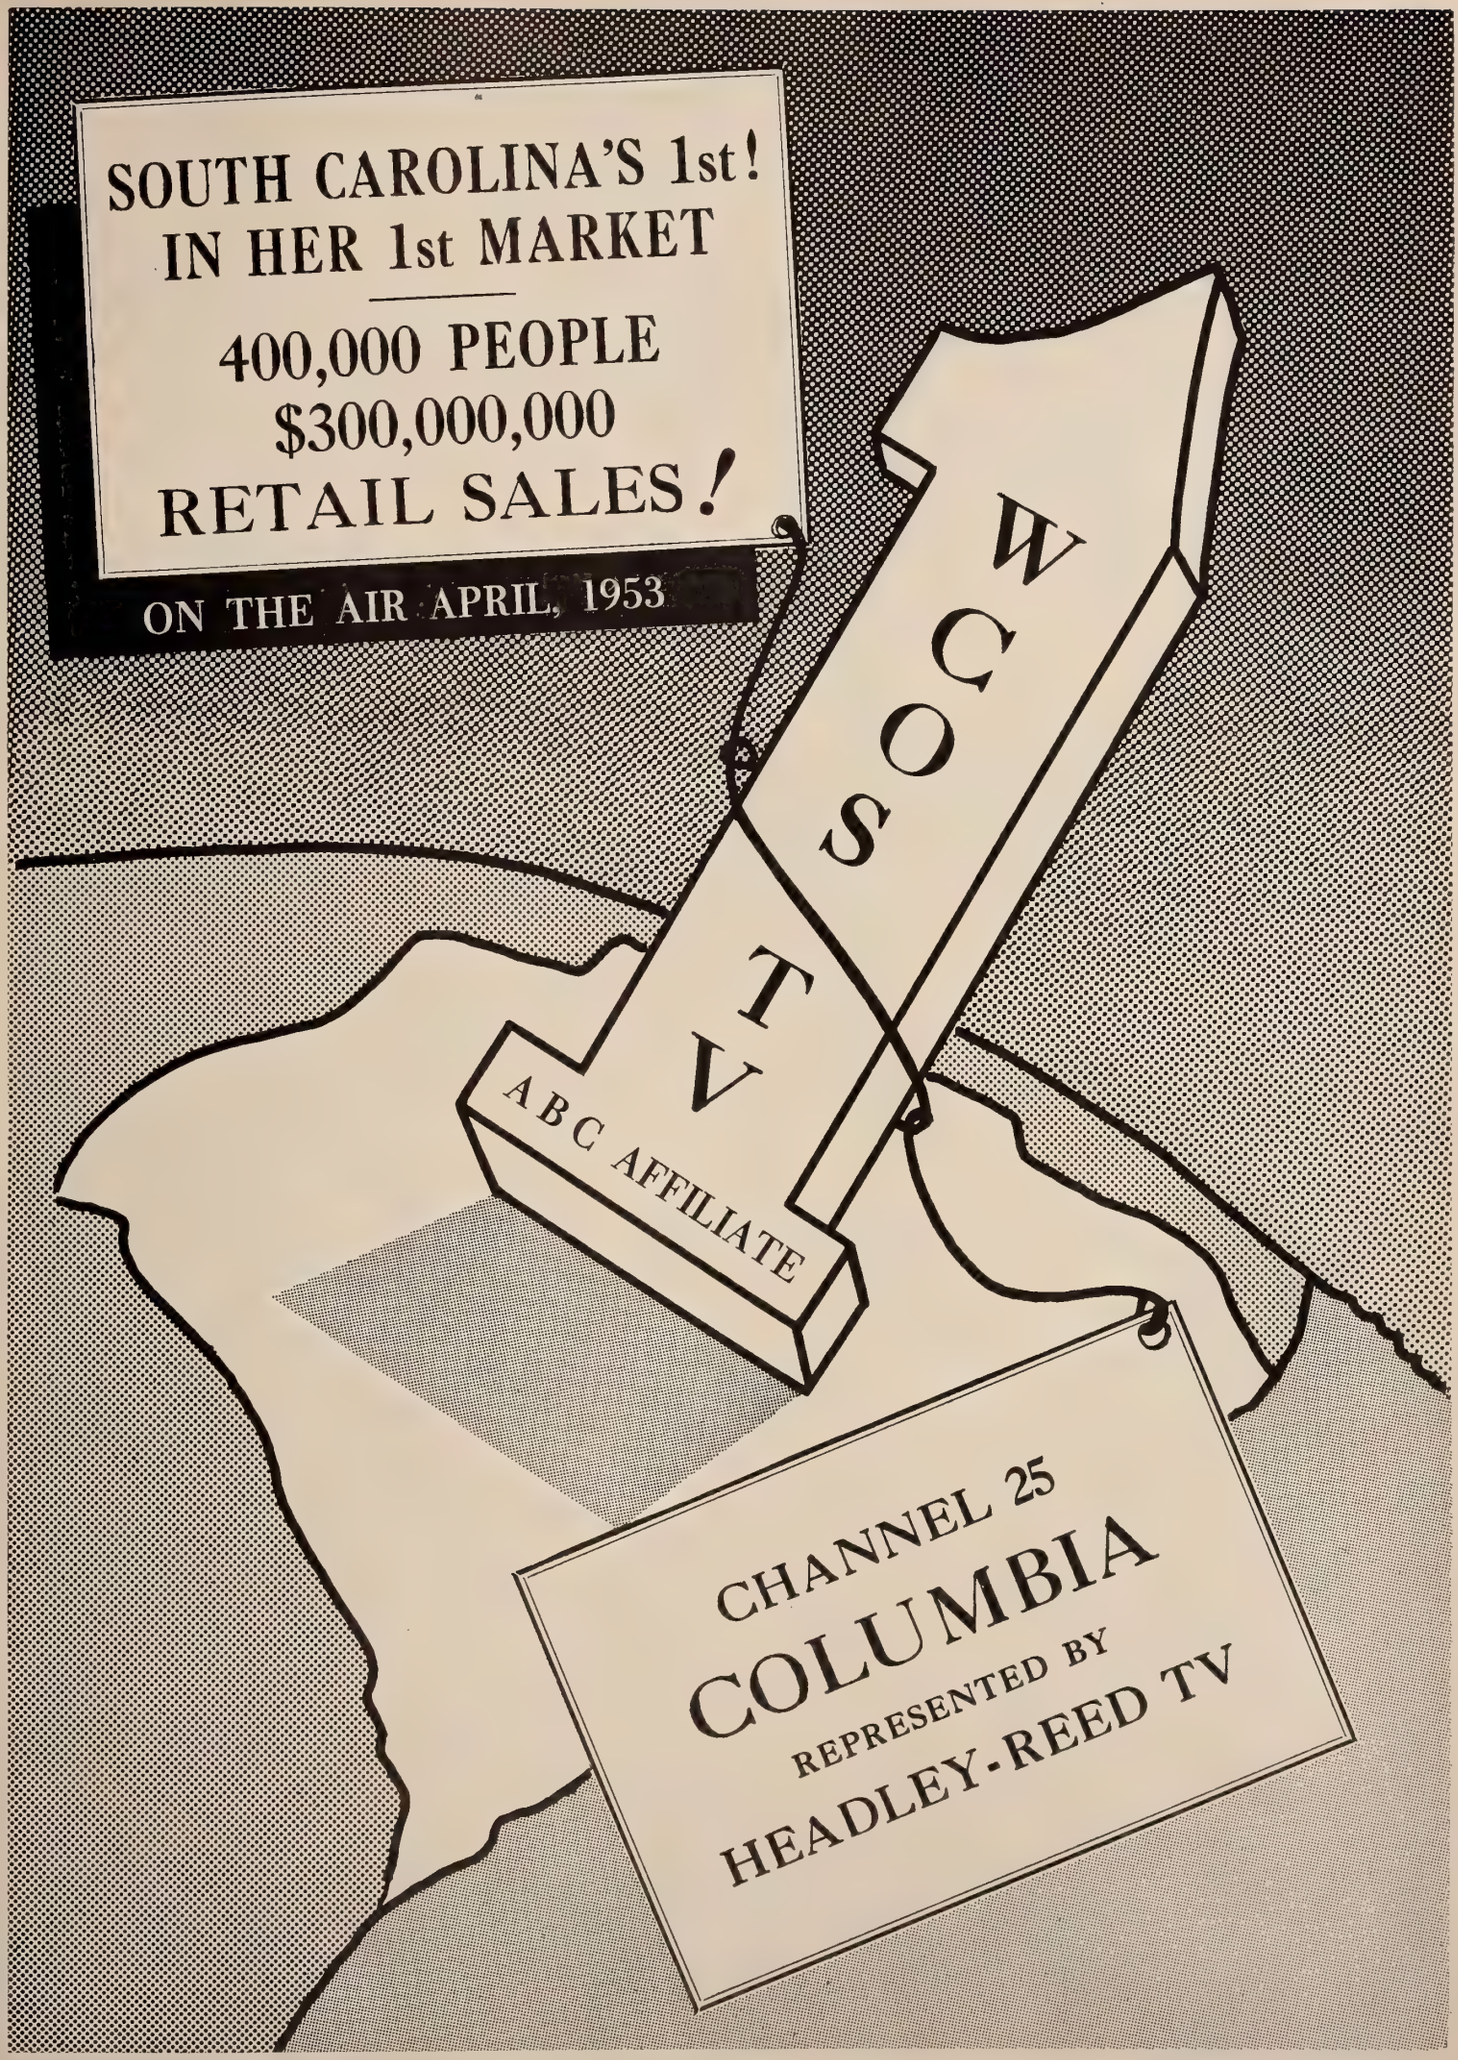
* * *

Sarra Inc., Chicago, has completed a series of film commercials for **Thor Corp.,** ABC-TV's *Quick as a Flash,* through **Henri, Hurst & McDonald; Atchison, Topeka & Sante Fe Railway, Clint Youle's** *Weatherman* program, WNBQ (TV) Chicago, through **Leo Burnett Co.; Sunbeam Corp.,** NBC-TV's *Window on Washington,* through **Perrin-Paus,** and **Pillsbury Mills** for its buttermilk biscuits, through **Campbell-Mithun.**

Distribution

Cornell Film Co., New York, TV film distribution firm, announces signing with the State Dept. for the department's use of 12½-minute film, "Old MacDonald's Farm." The film will be released to U. S. embassies throughout the world in 39 different language versions.

Availabilities



Simmel-Meservey TV Productions Inc., Beverly Hills, has set May 15 as release date on *Stories of Yesterday's World,* a series of 13 quarter-hour programs filmed abroad in kodachrome. Written and photographed by **Jackson Winter** and narrated by **Marvin Miller,** series recounts stories of far-off times and peoples.

Production

Blinkey Productions Inc., New York, has begun its new children's TV series, *The Adventures of Blinkey.* Produced by **Murray King,** series will consist of 26 12½-minute films.

* * *

Screen Gems, New York, film producers, has announced a new half-hour TV series titled *Fair Trial.* The series will consist of documentary dramas of actual court trials. Starting date for first film is April 14.

ROAD SHOWS FOR TV PLANNED BY FIRM

Complete television shows—of the same calibre as network programs—are to be provided local and regional advertisers in individual markets.

TRAVELING companies of actors making one-night stands—the oldest kind of show business—will become the newest kind of television this summer when TV Roadshows Inc. starts sending its packaged video programs out on the road for one-night live local telecasts.

The idea, according to James Beach, who has just resigned as assistant to the radio and TV director of Biow Co. to devote full time to the new venture, is to enable the local and regional advertiser to sponsor the same type of program his national competitors now have on the TV networks.

The plan works like this:

The advertiser gets a half-hour "Show of the Month," delivered to his city every fourth week as a package, produced, rehearsed and ready to go onto the stage of a local theatre or auditorium and before the cameras of his local station, which has received directions, diagrams of camera positions, etc., in advance. The producers guarantee top performers, writers and producers, with a minimum production budget of $50,000 per show.

Each show will be different; each will be built around the special talents of the star; there will be comedy-variety, situation comedy, musical revue and other popular types of entertainment, Mr. Beach said, written, produced and directed by creative people with network credits and industry reputations. The directors for each production during its New York rehearsal period will travel with the company to supervise each local telecast.

The program is being offered for presentation in the following eastern and midwest markets: Baltimore, Boston, Buffalo, Chicago, Cincinnati, Cleveland, Indianapolis, Kansas City, Milwaukee, Minneapolis-St. Paul, New York, Philadelphia, Pittsburgh, Schenectady, St. Louis and Washington.

Prices per production are scaled in accordance with the number of TV sets in the station's coverage area, ranging from $6,300 in markets with 600,000 sets or less to $12,901 for markets with more than 3 million TV receivers. Minimum contract is for six programs, with 13-time (full year) contracts signed before June 1 getting a 5% discount.

Asked about time clearance for one show every four weeks, Mr. Beach said that in many cases he felt the local advertiser would sponsor film programs in the intervening weeks. Even where this does not happen, he said he believes stations advertisers will be glad to have TV Roadshows for the prestige involved.

With Mr. Beach in the new venture as president, he said, are George Duram, former vice president of Geyer Adv., who is sales manager of TV Roadshows, and two other agency executives—Byron McKinney and Richard M. Dunn, who are retaining agency connections.

Thesaurus Baseball Show

RCA Recorded Program Services sent to Thesaurus subscribers last week a series of 10-minute radio sports shows titled *Baseball Today*. Scheduled for use daily during the 26 weeks of the baseball season, the program will feature local and national baseball scores, lineups, and league standings, plus music from the Thesaurus transcription library.

INS-INP Facsimile Service Begins Today at WBAL-TV

A FACSIMILE service furnishing TV stations both news and photos on a single circuit is being announced today (Monday) by Seymour Berkson, general manager of International News Service. WBAL-TV Baltimore is the first station client, but Mr. Berkson said others will be added beginning May 1, and that coast-to-coast service soon will be available.

The use of facsimile to deliver news pictures for telecasts was started by INS-INP's television department Jan. 12 with service for NBC-TV's *Today* program [B•T, Jan. 12].

Under the service, news reports and news photos will be received in client TV stations' studios from INS-INP via facsimile equipment developed by Hogan Labs. International News Facsimile will operate on a 24-hour-a-day leased telephone circuit, according to Mr. Berkson, and pictures will be provided in a form especially processed for TV use.

"For the first time," Mr. Berkson said, "video coverage of national and international news will keep pace with audio coverage. The same machine that delivers a news bulletin will deliver, a few minutes later, a picture to back it up."

Transmissions currently originate from the INS-INP headquarters in New York. Installation of transmitters in bureaus throughout the country is planned.

Essential advantage of the service, Mr. Berkson said, is that it was developed specifically for television. He said the system not only is faster than ordinary methods of news and photo transmissions, but that copy needs no processing at the receiving end. Transmission and reception are at the rate of 1½ inches per minute.

Mr. Berkson said the facsimile wire will carry complete TV newscasts in which "live news, photos and INS-Telenews films are integrated into 5-, 10- or 15-minute programs."

UTP Offers 'Package' For New TV Stations

A PROGRAM package plan designed to assist new TV stations until they build up sufficient set circulation was announced Wednesday by United Television Programs.

It was described as "a special dollar-stretching" plan that will offer a half-hour UTP show for an average price as low as $36.50.

UTP Promotion Manager Monroe Mendelsohn said the plan provides for a contract on a yearly basis, with the stations receiving 390 half-hour programs to be used within the year. The package consists of: *Heart of the City, Royal Playhouse, Counterpoint, Dick Tracy, Old American Barn Dance, Hank McCune Show, Hollywood Off-Beat, Sleepy Joe,* and *Enchanted Music.*

Clients will be provided with extensive program advertising and promotional material, Mr. Mendelsohn said.

ASCAP Luncheon Held

NATIONAL Press Club, Washington, D. C., Thursday honored a group of composers and authors, members of the American Society of Composers, Authors and Publishers (ASCAP) at a luncheon. Guests attending and taking part in the "Newsmen's Musical Matinee" included Pfc. Eddie Fisher, recording artist; Toby Deane, radio-TV songstress; Deems Taylor, past president of ASCAP who served as master of ceremonies, and Hoagy Carmichael.

BAB BOARD OKAYS $642,000 BUDGET

Objectives will be more research, integration of advertiser promotion locally and nationally, and a hike in member services.

AN EXPANDED and strengthened BAB campaign to sell radio's sales effectiveness was set in motion last week with the BAB board's approval of a $642,000 budget for the fiscal year starting April 1.

The new year's campaign objectives as outlined at the board meeting, held Monday in New York, included:

(1) "Searching studies of nighttime radio's audience and sales potential"—for which, it was reported, negotiations with various research organizations are now in progress, with details of the exact type and style of research to be decided upon when the organization is selected.

(2) "Increasing radio's sales effectiveness by three times over"—described as a tripling of the various studies of the sort which have gone into BAB's past "Count Your Customers" and "Sears Counts Its Customers" presentation, and in a similar presentation not yet released.

(3) "A campaign coordinated by BAB which will put all BAB's 785 stations working on local distributors and brokers." Plans for this drive call for BAB staff work at the national level to be backed up by local stations on a coordinated basis. As the BAB staff undertakes to sell a national advertiser on the effectiveness of radio, member stations throughout the country will seek to get the advertiser's local and regional branches to add their persuasive support.

Boost Sales Pressure

(4) "Tripling sales pressure on advertisers at the national level." This is to be accomplished by the addition of at least two fulltime salesmen to the New York staff to augment the selling activities now being handled by three top BAB executives.

(5) "Increasing membership usage of BAB services"—this is an educational project to be accomplished through some 44 clinics planned for the coming year, the forthcoming BAB sales session during the NARTB convention, and other methods.

The $642,000 budget approved for 1953-54 compares with the current $600,000.

The board meeting, presided over by Chairman Charles C. Caley, WMBD Peoria, heard President William B. Ryan predict, on the basis of a six-part membership solicitation plan, that station membership would achieve a net gain of at least 215 to reach a total of 1,000 by April 1954.

In the course of the meeting, the board took action to let radio stations outside the U. S. become members.

The board also heard plans for national and local promotion, and reports from Chairman Caley, BAB staff executives and board officials and committee chairmen.

Simon Goldman, WJTN Jamestown, N. Y., BAB secretary, reported on new members; Gene L. Cagle, KFJZ Fort Worth, membership committee chairman, on current membership status; Donald Thornburgh, WCAU Philadelphia, promotion committee head, on activities of both the promotion and research committees, and Kenyon Brown, KWFT Wichita Falls, Tex., finance committee chairman, on BAB's financial status.

Hopalong Cassidy

More popular than ever, a better salesman than ever, "Hoppy" will move your product too!

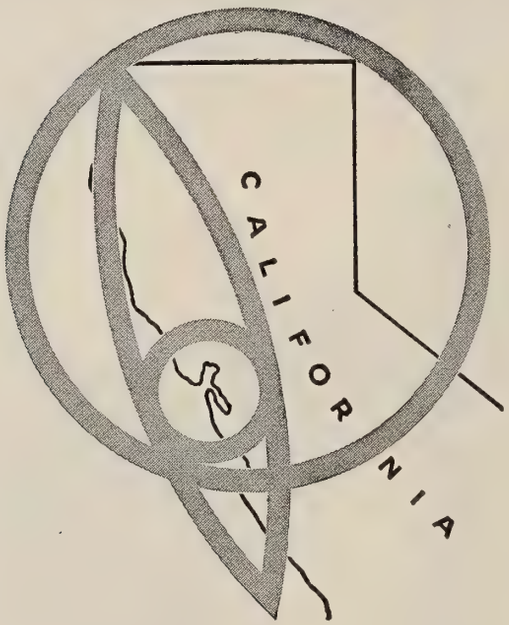
The cowboy who made cowboys famous is available for exclusive sponsorship . . . at a local market price. And Hopalong Cassidy is a bigger buy than ever before.

Ratings like 28.6 in Philadelphia and 28.3 in San Francisco say so.

Success stories like the 200% sales jump for Nehi beverages say so.

And you'll say so when "Hoppy" puts his salesmanship to work for you . . . takes your product to the top of your industry.

Moreover, with this PROFIT-PROVED program you get large and loyal audiences PLUS a field-tested, hard-hitting campaign of local advertising, promotion, publicity, exploitation and merchandising.



"Hoppy" may still be available in your markets. But hurry! Call, wire or write today.

TV TAPE BENEFITS TO ACCRUE SOON, SARNOFF DECLARES AT IRE BANQUET

Reporting on recent demonstrations of TV tape, the RCA board chairman told the Institute that it will be in practical use by 1956.

TAPE RECORDINGS of TV programs will be a reality by 1956, Brig. Gen. David Sarnoff, RCA board chairman, declared Wednesday.

Chief speaker at the annual banquet of the IRE convention at New York's Waldorf-Astoria, where he was awarded the Institute's first Founders Award (see story page 103), Gen. Sarnoff recalled that in 1951, when his 45th anniversary in radio was commemorated by the renaming of RCA Labs. as the David Sarnoff Research Center, he had asked that by 1956 the scientists invent three new devices—an inexpensive tape recorder of television pictures, an electronic air-conditioner and a true amplifier of light.

His first request is well on the way to being fulfilled, Gen. Sarnoff told the IRE. At a recent demonstration he "saw a television program coming from New York and being simultaneously recorded on tape in the Princeton laboratories 45 miles away. The recording was played back instantly," he reported.

"The quality of the recorded picture still needed improvement—but even its present performance convinced me that I will have the television tape recorded before the time I specified," the RCA board chairman stated.

"Tape recordings will obsolete the use of film for television and reduce over-all cost," Gen. Sarnoff said. "Small degradations which mark the various steps in the production of a film, creating a cumlative effect in the final print, will be eliminated. This new method will revolutionize the entire art. As a simpler and cheaper process, it will extend into color television, and it may extend into the motion picture industry itself.

"As you all know, the recording of sound on magnetic tape already has reached a high degree of perfection. When recorded sound has served its purpose it can be wiped off and the tape used over again. I believe that we now stand on the threshold of the same service for sight."

As to his other two wishes, Gen. Sarnoff reported he "saw signs of life" in the all-electronic air-conditioner, although it is "still in the embryonic stage." The true amplifier for light is the "toughest" problem of the three, he said, but he still believes that it will be solved.

Nearer at hand, Gen. Sarnoff foresaw closed circuit TV becoming a common tool of school and home as well as of business. A simplified closed circuit TV system providing "a vidicon camera attachment for a standard home television receiver" (demonstrated by RCA at a Thursday IRE session) can be connected as easily as a record player and makes every TV set in the land a potential closed circuit system, he said. The reduced cost makes it available for small as well as large business concerns, he noted, providing a visual intercommunication system between office-factory and warehouse.

"When the cost of the camera attachments is sufficiently low to permit their use in the average home, they may make the television receiver truly the control center of the home," Gen. Sarnoff predicted. "The snap of a switch will turn the receiver from the broadcast program to view the children asleep in the nursery or at play in the yard, or the cooking on the kitchen range. The housewife not only will hear but also will se the caller at the door before she opens it."

Solid-state electronic developments will produce great changes in industry before 1960, Gen. Sarnoff predicted, as electronic devices become transistorized. Electronic appliances may well find their way into the home, he said. "Air-conditioners, using electronics, eliminating motors, blowers and compressors and therefore noiseless in operation, may lead a mighty procession of household products to new markets."

Electronics also will revolutionize many business procedures and provide new safeguards against disease, Gen. Sarnoff foresaw. Television, heretofore used chiefly in broadcasting, will move in closed circuit form into industry, replacing human observers in positions of "danger, remoteness or discomfort." Schools will use closed circuit TV to "bring talks and demonstrations to the entire school or to selected classes, without loss of time or the confusion attendant to a call for assembly."

As to the future, Gen. Sarnoff told his audience that as engineers they should take "special pride in the fact that America, supremely the land of liberty, is also supremely the land of science. . . . Without freedom," he concluded his address, "there can be no genuine research, which is the uninhibited pursuit of truth no matter where it may lead."

station managers are invited!

To send their women broadcasters and executives to the Second Annual Convention of American Women in Radio and Television. They'll have a chance to meet top clients and time-buyers and hear important discussions like these:

What's Ahead for Women's Programs
From Idea to Sales Success
The Its and Bits of Television
The Operational Activity Behind the Scenes
Take a Look at Yourself
Management Policies and Program Building for the Independent Radio Station
Effective Public Service Programming

The registration fee is $15.00 for members and $20.00 for non-members. The only extra costs are travel and hotel room.

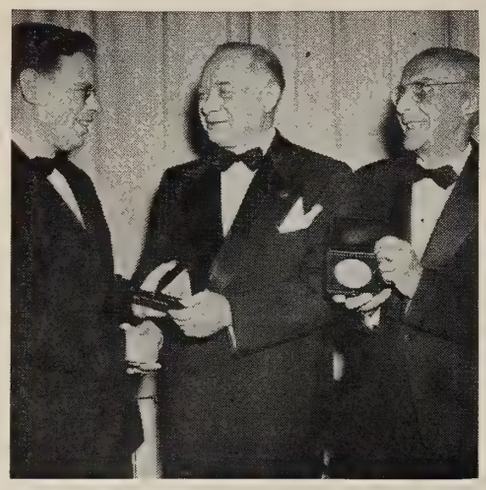
IRE SETS NEW ATTENDANCE MARK; ATTENTION ON COLOR TV'S STATUS

Over 35,000 jammed last week's annual convention of the Institute of Radio Engineers which saw a good portion of the agenda devoted to the NTSC's color system.

THE MORE THAN 35,000 scientists, researchers and engineers attending last week's convention of the Institute of Radio Engineers in New York—breaking all previous attendance records by a healthy margin—talked of many things: Cybernetics, nucleonics, digital computors, airborne electronics, electronics in medicine, of almost everything, in fact, except radio.

Mostly they talked about television, particularly the compatible system of colorcasting now undergoing its final field tests (which developments in Washington indicate soon will become the standard for color TV), and about transistors, those tiny new competitors of the vacuum tube.

The Monday and Tuesday technical sessions on TV were devoted to descriptions of various features of the color system devised by the National Television System Committee, the all-industry group which for more than two years has been working to perfect a compatible method of broadcasting color pictures to provide color to those who want it without taking TV service away from the owners of the 23 million monochrome sets now in use in the country.



Donald Richman of Hazeltine Corp. read two papers on color synchronization problems which he summed up as demonstrating that the NTSC system will deliver the right color to the right place at the right time. William E. Good, General Electric Co., described the use of the crystal filter in color synchronization while Paul W. Howells and J. S. S. Kerr of GE discussed transients and transient response in color TV.

The colorimetric properties of gamma corrected color systems were explained by Donald C. Livingston, Sylvania Electric Products. A. P. Stern, GE, talked on phase measurements in color TV, and Charles E. Page, Hazeltine, described a monitoring system for NTSC color signals. Methods of matrixing in an NTSC receiver were outlined by W. M. Quinn, GE, at a Thursday session on broadcast receivers.

Speaking at the Wednesday morning session on television broadcasting, R. D. Kell of RCA Labs. presented a paper prepared with A. C. Shroeder, also of RCA Labs., dealing with making the optimum use of the radio frequency channel for color in the NTSC system. He pointed out that for compatibility the brightness factor of the picture is transmitted as amplitude modulation in the usual way, with a subcarrier introduced to carry the color information, which need not include any of the already transmitted brightness. Only two colors need be transmitted directly, he said, the third being added at the receiver.

THEY'RE BOTH SMALL, but this comparison emphasizes just how small Westinghouse's new mite-size transistor (r) really is. Development models shown at New York's IRE meeting are expected to have an almost unlimited life, the company reports. Vacuum tube model (l) is in current use.

RADIO ENGINEERS heard Brig. Gen. David Sarnoff (c), RCA board chairman, give the principal address at the banquet Wednesday night when he was named first recipient of the new Founders Award, given to leaders in radio and electronics. IRE's Medal of Honor went to John M. Miller (r), Naval Research Lab., Washington, D. C., for his pioneering scientific and engineering contributions. IRE President James W. McRae is at left.

A "master plan for the organized development" of a radio station just entering TV was described by Allen R. Kramer of Kramer, Winner & Kramer, architects and broadcast engineers, in a paper prepared with Edwin R. Kramer, given at the same session. Plan assumes an initial TV operation almost exclusively of film, network and remote programming, building up to live programs with studio audiences, with the structure so laid out that it is capable not only of expansion along one line but of rearrangement of existing facilities to form totally new plans should TV in that community develop differently than originally contemplated.

R. H. Tanner, Northern Electric Co., described two types of speech input consoles, one designed for use by CBC in major TV studios, the other for more modest layouts outside the major Canadian cities. A novel feature of the first type, he said, provides for accentuating the sound of certain instruments of an orchestra to coincide with the movement of the camera in a musical simulcast, while the pickup for radio broadcast gives a balanced orchestral sound. The smaller station console, only 22 inches long and providing for five input channels, is so built, Mr. Tanner said, to permit two or perhaps three to be joined at the end to double or triple the scope of their service.

Also presented at this session was a paper prepared by F. G. Kear, Kear & Kennedy, and J. G. Preston, ABC, dealing with a change in TV transmitting antenna designs, formerly aimed at concentrating the radiated energy in the direction of the horizon but within the last year designed to cover most effectively the particular type of area the individual station serves with the power available to it.

John Rustin, Allen B. DuMont Labs., discussed the use of high gain amplifiers in high power vhf TV transmitters.

A flexible TV studio intercommunications system for use by directors and supervisors in giving instructions during rehearsals and broadcasts was discussed in a paper prepared by R. D. Chipp and R. F. Bigwood of DuMont and presented by Mr. Chipp at the Wednesday afternoon TV Broadcasting symposium.

Paper Presents Tour

A technical tour of CBS-TV's new Hollywood TV City both in its present four-studio stage and as it will be when all the contemplated 24 studios have been built, was conducted in a three-part paper presented by three CBS-TV engineers, Richard O'Brien gave an overall description, Price Fish went into more details of the video equipment, and Robert Monroe described the audio.

Jess Epstein presented a paper prepared with D. W. Peterson, both of RCA Labs., on an experimental study of wave propagation at 850 mc made last summer, when signals from antennas at various heights on the WOR-TV tower at Bergen, N. J., were measured along two routes, one flat terrain heavily built up, the other hilly rural country. The conclusion presented by Mr. Epstein was that an engineer can take free space theoretical field strength and reduce it by theoretical knife edge diffraction shadow loss and by "suitable empirical experience factors" and come up with a useful prediction of the kind of coverage he may expect from his uhf TV station.

High power uhf by means of Klystron tubes was discussed by N. P. Hiestand, Varian Assoc., A. Rankin and H. M. Crosby of GE, during the afternoon session. Mr. Crosby pointed out that unlike conventional power tubes which operate most efficiently at lower frequencies, the Klystrons are at their best in the uhf region. In addition to the 5 kw Klystron-based uhf

EXPERIMENTAL transistors designed with cooling fins or coolant tanks so they can operate at higher power are examined by Dr. D. A. Jenny of RCA's David Sarnoff Research Center, who appeared before IRE with Dr. L. D. Armstrong to describe the new devices. He reports these transistors can be operated at 1 w, compared to about 5/100ths w for smaller, uncooled transistors.

IRE PRESIDENT James W. McRae (l), Bell Labs., congratulates John V. L. Hogan, Hogan Labs., after presenting him with an IRE Founders plaque last Monday.

transmitter announced by GE two years ago, GE is now building 12-kw transmitters which, with special antennas, will provide an effective radiated power of up to 300 kw, he said. These have already been installed at two stations—WHUM-TV Reading, Pa., and WWLP (TV) Springfield, Mass.—which are getting about 265 kw ERP, Mr. Crosby reported. High transmitting power, he said, will be a major factor in improving uhf reception.

Development of an "internal magnetic focus" gun for TV picture tubes, eliminating the external focus coil and ion trap magnet, was annouced at the convention by General Electric Co., which displayed a 21-inch tube (21JP4) and announced plans for making tubes of this type in all sizes. Grady L. Roark, manager of GE equipment tube sales, predicted that this tube, whose focus is locked in at the factory and cannot be disturbed by servicemen or set owners, will replace present types of picture tubes.

GE meanwhile displayed a new 5 kw power tetrode (GL-6182) designed to operate over the entire uhf band, and a new 250 w power tetrode (GL-6283) for use as a driver tube in uhf transmission. The 5 kw tube was described as the newest and most powerful addition to GE's line of ceramic-and-metal envelope transmitting tubes, and was said to be capable of operating at seal temperatures as high as 200 C. The 250 w tube is designed to drive GE's two 1-kw uhf transmitting tubes and its 15-kw Klystrons, and was said to have, like the GL-6182, a high degree of mechanical strength, capable of resisting seal temperatures as high as 200 C. Both tubes are in production at GE's Schenectady tube plant.

DuMont Labs. introduced during the IRE meeting a miniature TV camera unit, the "Tel-Eye," containing a complete camera chain with associated power, synchronizing, RF, monitoring and output equipment, plus the camera itself, in a camera head about the size of a portable typewriter case. Designed for closed circuit use, it can be used with any standard TV receiver without altering the set and will feed multiple TV sets at distances up to 2,000 feet, company spokesmen said.

IRE conventioners also got the first look at a new DuMont video recorder which uses a special 7-inch high voltage, high definition blue phosphor tube, alumunized to give double the normal light output, plus other features said to produce superior recorded TV programs. The recorder can produce either the usual positive picture for a photographic negagtive or, if speed is essential, a negative picture which can be developed as a positive record after exposure in the recording camera.

Uhf Signal Aired

To enable exhibitors at the IRE convention to show uhf equipment in operation, the DuMont experimental uhf station, KE2XDR New York, kept black-and-white uhf signals on the air during the four-day meeting.

"Transistors will extend electronics and add to the opportunities to use electronics to serve mankind," James McRae, Bell Labs. executive and IRE president, said Monday at a news conference on transistors.

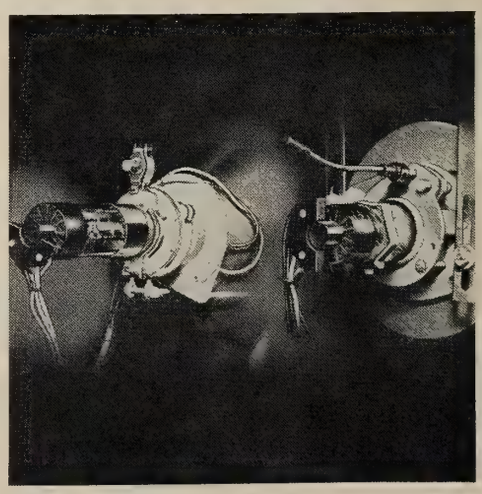
One future use of transistors likely will be to amplify video signals in intercity transmission, said R. L. Wallace Jr. of Bell Labs., who displayed a transistor-amplifier about 1½ inches long and 15/100 inches in diameter, small enough to fit inside a coaxial circuit. He stressed the experimental nature of this development, stating it was still in the laboratory stage and not yet perfected or ready for regular use in TV circuits.

A hermetically-sealed junction transistor operating in a pot of boiling water was demonstrated by General Electric Co. James Sweeney, GE sales manager for germanium products, explained that this demonstration proves the device's ability to operate under conditions of high heat and humidity, often important for commercial as well as military equipment. Small quantities will be available to development labs and engineering groups in a few months, he said, with mass production scheduled for fall.

NEW DuMont video recorder, which Allen B. DuMont Labs. claims is "far superior" to recorded television programs available from current recording systems, was introduced at IRE and demonstrated by Herbert Foster, TV engineer in the DuMont research division. Gains were caused by "refinements in the picture tube and associated electronic circuits," DuMont claims.

Use of transistors in hearing aids was shown and described by Dr. Gedding of Raytheon Mfg. Co. He noted that a transistor-powered hearing aid will operate for a full year, whereas, normal hearing aid batteries have to be replaced daily. Raytheon also demonstrated a transistor-powered portable radio receiver.

Military applications of transistors were shown by Capt. Gerald Epstein and S. E. Petrillo, who said that the normal requirement of a combat division is a boxcar full of batteries every two days, so that small long-lived devices like transistors become of utmost military importance.



Liquid and metallic cooling of transistors

J. B. EPPERSON (l), chief engineer at WEWS (TV) Cleveland, presided at IRE's Wednesday morning symposium on television broadcasting. With him is Lewis Winner, chairman, IRE broadcast transmission systems group, which sponsored the session.

AN 18-POUND portable TV camera designed to replace a standard 350-lb. setup was shown by Allen B. DuMont Labs. at the IRE convention. Called the Tel-Eye, the camera will plug into a standard wall socket. It is 14 in. long, 9⅜ in. high and 4⅝ in. wide. DuMont sets the price at $2,850.

GENERAL ELECTRIC displayed what it says is the first internal magnetic focus gun (l) at the IRE convention last week. Picture shows "simplicity" of installation of the internal system for picture tubes, contrasted with the external magnetic focusing unit (r).

In Detroit, America's 5th Market, this is the proved "success formula":

Take the overwhelming popularity and community acceptance of radio station WWJ. . . . plus the prestige and network programming of its NBC affiliation. Add the ¾-million Auto Radios, and the 1½-million Home Radios in the primary listening area.

A multitude of successful advertisers, during the past 32 years, have followed this formula for doing BIG business in a market with the largest income per family of any major market in the U.S.A.

Through WWJ, you reach more of those families in the middle income group and above, than other Detroit stations do . . . for *less* than the average cost-per-thousand-listeners for radio time in Detroit.

The time to sell Detroit is now . . .
the time to buy is . . .

CALIFORNIA'S KEY-TELEVISION STATION

CHANNEL 3 KEY-T

KEY-Television NEWS

PUBLISHED BY SANTA BARBARA BROADCASTING AND TELEVISION CORPORATION

KEY CALIFORNIA STATION FILLS GAP

Links Northern and Southern Calif. Distribution

Northern and Southern California distribution meets at the San Luis Obispo County line, with *each market larger than most of the forty-eight states* in population, buying power or any other gauge of value. KEY-T links these two great markets which are by far the fastest growing areas in America.

WHEN

KEY-T goes on the air officially this midsummer (on or about July 1, 1953), supplying television coverage which has been needed for years in the huge coastal area of California.

HOW

Because of strong power (50,100 watts), and extreme height of transmitter (4200 feet), KEY-T will be dominant in it's steady flow of signal. It was the need for this type of television coverage in Coastal California which moved the Santa Barbara Broadcasting and Television Corporation to plan and build a powerful regional station for Channel 3.

WHO

KEY-T is owned and operated by the Santa Barbara Broadcasting and Television Corp., with Harry C. Butcher, owner of Radio KIST, Chairman of the Board. Colin M. Selph is President and General Manager, Cecil I. Smith, vice-president and treasurer, Alvin C. Weingand, secretary. Others associated with the corporation are Ronald Colman, Charles H. Jackson, Jr., and Arthur F. Marquette.

COST

KEY-T "down-to-earth" rates are based upon two primary factors: 1—An NBC estimated "to start with" 43,500 sets *unduplicated* by NBC (Channel 4) and CBS (Channel 2) in Los Angeles in the south portion of the KEY-T A and B coverage area. 2—KEY-T regional rates are not only competitive with other media, but the cost per thousand is surprisingly low.

Yours for the Asking!

Wire, write or phone KEY-T, or your nearest Hollingbery office, for *"The Selling Key-To Coastal California"* in handy file folder size. It's loaded with factual information on one of America's most responsive markets . . . served by California's KEY-Television station . . . KEY-T. Phone Santa Barbara 3981 or George P. Hollingbery Company.

Pereira and Luckman Design First Hexagonal Studio With Central Control

The beautiful new KEY-T studio atop Mesa Hill, overlooking the City of Santa Barbara, embodies the ultimate in functional design. Most unusual feature is 52 foot hexagonal-shaped studio, creating six stage areas. Outdoor studios adjacent to the hexagonal will be used for interviews, scenic events and automobile, appliance and similar shows.

"TENT COVERAGE"

Engineering Surveys Forecast Coastal Coverage "Like A Tent" to Nearly Two Million People

The new KEY-T transmitter, like a tent-pole high on TV Peak, 4200 feet above sea level in the Santa Ynez coastal mountain range, will "tent-cover" the entire coastal area. Coverage indicated by tests and reliable authorities will be remarkably free from "dead spots" because of the unusual height from which signal starts. Signal will reach through Santa Barbara, Ventura and San Luis Obispo counties, into Kern County and a large portion of Los Angeles . . . a total coverage area potential of 1,922,502 people, owning 402,692 TV sets, according to conservatively estimated figures as of July 1, 1953. In addition, KEY-T will have an impressive, unduplicated set coverage within the above area.

50,000 WATT KEY-T DEBUTS WITH 4 NETS

NBC, CBS, ABC, Dumont Recognize Station Value

With the signing of affiliation contracts with all four networks, KEY-T assures viewers the finest schedule obtainable from network programming. In addition to the top network programs, KEY-T will provide special features such as local, regional and national news, California Kitchen, Fiesta Hour, Feature Films, current subject forums, farm and ranch roundtables, sports news, public service informational programs, special events, educational and religious programs.

The KEY-T basic policy is to present the best possible programming to the greatest number of homes in the huge area which will be covered. KEY-T thanks Dumont, ABC, CBS and NBC for unusual recognition.

CALLED 'SELLING KEY TO COASTAL CALIF.'

To achieve full coverage necessary for vital coastal areas of California, agencies and timebuyers recognize that the word "key" in KEY-T means the station which cannot be overlooked to reach a great market in the Northern and Southern California distribution link.

Station is called "The Selling Key To Coastal California" for a very important reason . . . over 400 miles of California coast between Los Angeles and San Francisco . . . the area served by KEY-T is strategically located in this rich market. Signals from outside television stations are either weak or nonexistant in a large portion of this area.

A glance at the map of California will show the need for using KEY-T to sell this rich market, where two automobiles per family, a modern home and good living is the standard.

Advertisement Advertisement

were described by Dr. L. D. Armstrong and Dr. D. A. Jenny of RCA's David Sarnoff Research Center during the Tuesday afternoon session on transistors. The first method involves replacement of the plastic case normally surrounding the germanium wafer of a junction transistor by a thimble-sized metal tank filled with a cooling liquid. In metallic cooling, the transistor is encased in a metal cup which offers a relatively wide area for dissipating heat, or special cooling fins are attached to the outer casing.

The alloy process of making a germanium n-p-n (negative-positive-negative) junction transistor was described by Dr. Jenny in another paper at the same session. Laboratory tests, he said, have shown that the new n-p-n transistors can provide an output current 100 times or more greater than input current. Designed as a direct counterpart of RCA's p-n-p type, the n-p-n transistor can be used with the p-n-p type in novel circuit arrangements to compliment or reinforce each other. This relationship was discussed by George C. Sziklai of RCA Wednesday.

Power Transistor Shown

A power transistor, RD-PX, which provides the basis for the power stage of a radio receiver, was demonstrated at the IRE show by Germanium Products Corp. The set employed no vacuum tubes and only two transistors, one the power transistor, which the company said reduces power requirements to less than 1/100th. The transistor demonstrated was running a six-volt battery and was said to be good for at least a year of normal usage.

General Electric Co. demonstrated a new germanium rectifying device, using it to operate a DC motor direct from an AC power line. The device is a custom application of the germanium junction rectifiers now being mass produced by GE, the company said.

First printed circuit component with molded-in inserts tieing in with the printed circuit themselves was shown at the IRE meeting by Mycalex Corp. of America. Development was possible, company said, because the insulation material features a coefficient of thermal expansion close enough to those of most inserts, including silver and steel, to hold the inserts tight over operating temperatures.

Vidicon Camera Uses

Simple Vidicon camera attachment easily connected to the family TV receiver can turn the set into a family control center, with mother switching momentarily from her telecast entertainment to take a swift look at junior asleep in the nursery or at the dinner cooking on the kitchen range, Dr. Vladmir Zworykin, vice president and technical consultant of RCA Labs., said Thursday at the IRE convention, where the hookup was demonstrated. When mass-produced, it is hoped the cost of the unit can be reduced to no more than the price of a TV receiver, he said. He predicted widespread use of this low-cost closed circuit TV device in business and education as well as in the home.

A method of tape recording which permits the time of a speech or musical performance to be compressed as much as ten or 20% without being noticeable to listeners and as much as 80% without losing intelligibility was described and demonstrated Thursday by Prof. Grant Fairbanks, Dean W. L. Everitt and R. P. Jaeger, all of the U. of Illinois [B•T, March 23]. The process also can be worked in reverse to stretch the performance, it was stated. Suggested applications include broadcast use to tailor-make programs running long or short to fit airtime precisely.

BAB SALES AIDS AT NARTB MEET

Broadcast Advertising Bureau's afternoon meeting for broadcasters is set for April 28. Top BAB officers will present the bureau's series of projects.

EXPANDED program of sales aids for radio stations will be unveiled by Broadcast Advertising Bureau during the NARTB Los Angeles convention April 28-May 1. BAB will hold an afternoon meeting for all broadcasters Tuesday, the 28th.

As at Chicago last year, BAB plans a dramatic presentation of its methods of promoting radio sales. The event will be staged in the Biltmore Theatre, which seats 1,600.

NARTB last week worked out details of some of the convention features starting with the formal opening Wednesday, the 29th.

Charles C. Caley, WMBD Peoria, BAB board chairman, will tell the story of the organization's sales-stimulating activities during the past year. William B. Ryan, BAB president, will discuss principal objectives for the coming year.

Kevin Sweeney, vice president, and Jack Hardesty, local promotion director, will give a series of presentations showing how new projects will be handled and describing specific services. Mr. Ryan will join in the presentations (see BAB board story this section).

As now planned, BAB plans a series of projects aimed at stimulation of nighttime radio. Second project is a program directed at retail advertising, including efforts to bring radio bigger slices of the $450 million department store advertising fund and the $260 million grocery budget.

A third project has as its goal the tripling of BAB's sales effort at the national level. Gail Blocki, BAB's midwestern sales director, will explain details of this program.

National Plan

BAB's convention program will outline a plan to extend national advertising penetration at the local level.

The sales-effectiveness (count-your-customers) tests are to be tripled during the year. Package goods and other commodities will be added to the scope of these tests, along with additional media.

BAB's afternoon-long program will be conducted on a rapid-fire basis and kept within a two-hour period. It will include success stories showing how aggressive radio presentations have brought new business to stations and networks.

Three sales rooms will be used by BAB on the second floor of the Biltmore Hotel, where the light equipment-service exposition will be held. Staff members will be available for conference. Attending for BAB, in addition to Messrs. Ryan, Sweeney, Hardesty and Blocki will be Bill Morrison, assistant secretary-treasurer.

Current membership of BAB includes 785 AM stations, with the list of associates also increasing.

As NARTB progressed with its convention planning Clair R. McCollough, Steinman Stations, chairman of the convention committee, announced tentative composition of several panels.

The NARTB's agenda includes invocation at the Wednesday morning general session by James Francis Cardinal McIntyre of Los Angeles, following the formal opening by Mr. McCollough. Brig. Gen. David Sarnoff, RCA chairman of the board, will deliver the keynote address and then receive NARTB's First Annual Keynote Award.

NARTB President Harold E. Fellows will deliver the luncheon address. The afternoon general session is titled "Principles of Profitable Radio Station Operation." Paul W. Morency, WTIC Hartford, will preside. On the afternoon program will be Mr. Fellows and Richard M. Allerton, NARTB research manager. A special panel will join the discussion.

UHF Panel Planned

Robert D. Swezey, WDSU-TV New Orleans, will preside at a TV session Thursday morning in his capacity as TV board chairman. Thad H. Brown Jr., NARTB vice president and TV counsel, will describe NARTB's progress in servicing television members. A panel discussion, "What About Uhf," will be followed by another on "Film's Place in Television."

President Fellows will preside at the noon luncheon, at which FCC Chairman Paul Walker will speak. A special feature will be appearance of one of the Voice of Democracy winners.

Both radio and TV will be covered in the afternoon, which opens with a general panel discussion on "Small Market Television." Following will come two simultaneous panels on labor and radio programming. These, in turn, will be followed by simultaneous panels on radio merchandising and sports-public events (both radio and TV). The annual banquet will be held Thursday night.

The half-day Friday session opens with the annual business. Judge Justin Miller, NARTB board chairman and general counsel, will preside. Mr. McCollough will preside at a panel discussion featuring FCC members and staff executives. Third feature will be a discussion of the Television Code. John E. Fetzer, WKZO-TV Kalamazoo, Mich., will preside as chairman of the Television Code Review Board. Final workshop feature will be a panel titled "Meet the Trade Press." The convention closes Friday noon.

Wayne Coy, KOB-TV Albuquerque and former FCC chairman, will preside at Thursday afternoon panel on small market television, Among others on the panel are Gaines Kelley, WFMY-TV Greensboro, N. C.; W. D. Rogers Jr., KDUB-TV Lubbock, Texas.; James D. Russell, KKTV (TV) Colorado Springs, and Robert Lemon, WTTV (TV) Bloomington, Ind.

Leslie C. Johnson, WHBF Rock Island, Ill., will chairman a radio-TV labor panel Thursday afternoon. Others on the panel will be Victor A. Sholis, WHAS-TV Louisville; Richard A. Moore, KTTV (TV) Los Angeles, and Victor C. Diehm, WAZL Hazleton, Pa., and Joseph A. McDonald, NBC.

William D. Pabst, KFRC San Francisco, newly-elected NARTB District 15 director, will be chairman of a Thursday afternoon radio program panel which will include William B. Quarton, WMT Cedar Rapids, Ia.; Leonard Kapner, WCAE Pittsburgh; Jack L. Pink, KONO San Antonio, and Barney Schwartz KPRL Paso Robles, Calif.

A session for FM stations is scheduled Tuesday morning, prior to the formal opening, with an NARTB TV membership business session to run simultaneously. Slated to be chairman of the FM meeting is Michael R. Hanna, WHCU-FM Ithaca, N. Y., chairman of the association's FM Committee.

Three days of technical papers will feature the annual Engineering Conference starting at 9:15 a.m. Wednesday.

The equipment exposition will open Tuesday.

GOOD

For years, Mister PLUS has been chanting variations on a single theme: *network radio is the best buy in advertising.* As star vocalist for Mutual, he now takes stage center with a resounding new refrain: *network radio—Mutual-style—will keep right on being the best buy, come what may.* And he accompanies these original lyrics with the following solid facts:

1. Throughout Non-TV America, where nearly 17,000,000 radio families are still beyond reach of television, Mutual delivers *double* the audience tuned to any other network.*

2. Throughout TV America (where radio listening still adds up to over 72,000,000 family-hours a day, vs. 85,000,000 for TV)† Mutual now applies a 50% discount to evening radio costs.

3. Throughout all America, Mutual will apply that same discount to evening costs for all affiliates within effective range of TV, six months after each new television tower is installed.*

To the man in the sponsor's box, this means a guaranteed good buy forever—on the one network that's geared for low-cost mass sales, today *and* tomorrow—starting right now in 1953. May we translate this into profit-encores for *you*?

*J. A. Ward, Inc., million-interview Non-TV America study.
†A. C. Nielsen, Inc., January-December, 1952.
*MBS Rate Card #17, effective January 1, 1953.

MUTUAL

the PLUS network of 560 affiliates

Rollinson to Direct SRA Advertiser Relations

CRUSADE for Spot Radio seems "certain of success," John Blair, president of Station Representatives Assn., stated last week in announcing that Reg Rollinson had been engaged, effective April 1, as SRA's director of advertiser relations.

Mr. Rollinson

More than 190 radio stations have agreed to contribute one-half of their one-time daytime announcement rate per month to support the SRA plan for an all-out sales drive for spot radio, T. F. Flanagan, SRA managing director, said, but he and Mr. Blair stressed that additional station subscribers are necessary to carry out the sales plans announced by SRA [B•T, March 2].

NARTB Names Barton

JACK L. BARTON has been named assistant manager of the NARTB Station Relations Dept. by President Harold E. Fellows. He replaces William K. Treynor, recently elevated to manager of station relations and transferred from San Francisco to Washington, D. C.

Mr. Barton

Mr. Barton will be based in San Francisco starting May 1. He left last week on an extended field trip through the south and southwest. Before joining NARTB last October, Mr. Barton was a broadcast representative for Capitol Records.

Coe Named IBA Head

DEE COE, WWCA Gary, was elected president of the Indiana Broadcasters Assn. March 20. Retiring president O. E. Richardson, WASK Lafayette, was named to the board of directors.

Five other officers go into office with Coe. They are: William E. Rippetoe, WBOW Terre Haute, vice president of AM; Harry Bitner Jr., WFBM Indianapolis, vice president of FM-TV; Robert Williams, WFML (FM) Washington, secretary-treasurer; Robert Enoch, WXLW Indianapolis, assistant secretary, and Ronney Householder, WJVA South Bend, assistant treasurer.

Also elected to the board of directors were Bernard Dabney, WSRK Shelbyville; Bruce McConnell, WISH Indianapolis; Ed Thoms, WKJG Ft. Wayne, and Roy Hickox, WLRP New Albany. More than 60 broadcasters attended the one-day session. Next meeting is scheduled for June.

Michigan Newsmen Organize

FRANK BENESH, WKZO Kalamazoo, has been elected president for a one-year term of the newly organized Michigan Assn. of Radio and Television Newsmen. He and other officers were elected a fortnight ago at the first meeting of 15 state newsmen at Michigan State College.

REOPENING OF COLOR TV QUESTION SOON, HOUSE GROUP IS TOLD

The House Interstate & Foreign Commerce Committee last week heard the testimony of leading figures in the color controversy. And it appears that FCC will reopen the question with NTSC color standards to be the next to undergo close examination as to its feasibility.

THE FCC will wait for another four months or so and if no one asks for the reopening of the color television question, it will move to reopen the subject itself. It will issue a notice of proposed rule making to authorize the compatible NTSC color standards as the sole, official color system, call for comments or set hearing dates and decide whether the compatible color system lives up to the claims that have been made for it.

That is the best deduction among informed observers following four days of testimony last week before the House Interstate & Foreign Commerce Committee investigating the status of color TV.

That theory is bolstered by comments of House committee members, notably Rep. J. Percy Priest (D-Tenn.), urging exactly that course be followed by the FCC.

Any idea that the Commission would follow RCA's suggestion—that it immediately authorize the compatible NTSC system and "let the public decide" which system it prefers—was dissipated by FCC officials.

Under the Administrative Procedures Act, they point out, it is necessary for the Commission to go through certain formal steps before it can change an FCC rule. That means notice, comments or a hearing, and finally consideration and a decision.

Last week, the House committee heard RCA's Princeton Labs. Vice President E. W. Engstrom, CBS President Frank Stanton, DuMont President Allen B. DuMont and Chromatic Labs. President Richard Hodgson.

Scheduled for Friday was Dr. W. R. G. Baker, General Electric Electronics Department Vice President and chairman of the all-industry NTSC.

After an Easter recess, the Congressional committee plans to see color TV demonstrations April 14-15 in Princeton, N. J., and New York City.

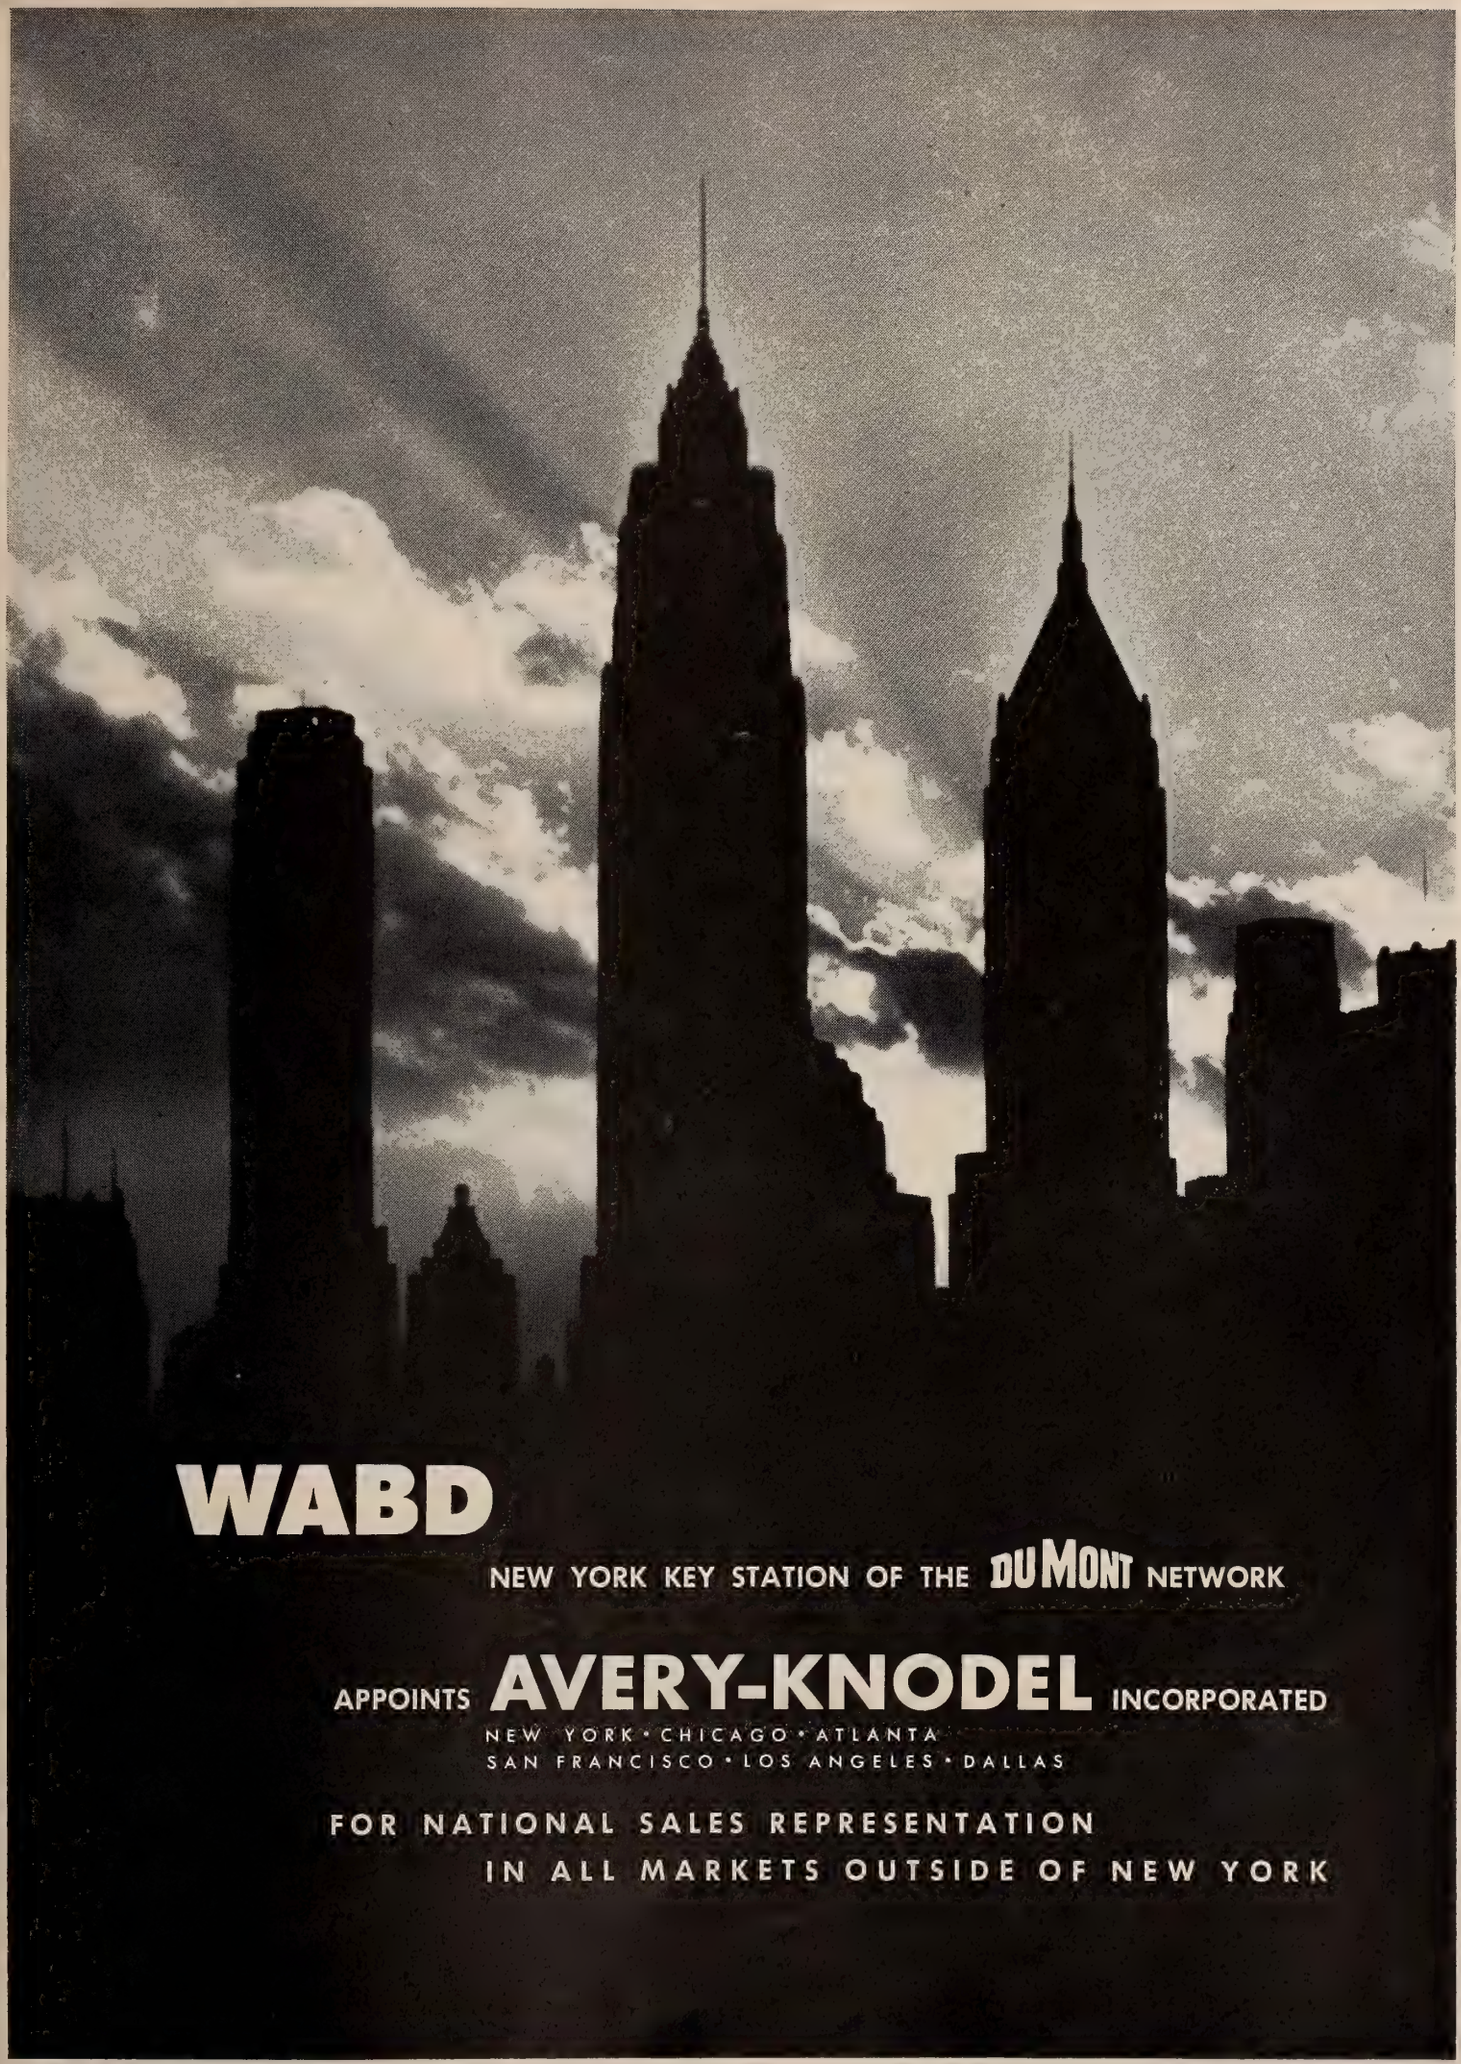
Aside from the testimony of witnesses, last week also saw the revocation of NPA Order M-90, freeing electronics manufacturers for the production of color TV receivers. Production of color sets appeared extremely unlikely however.

NPA in October 1951 forbade the manufacture of color TV receivers in order to conserve strategic materials and skilled engineers. The order was modified last June to permit such production, on authority of NPA. NPA warned, however, that no additional allocations of critical materials would be authorized for this purpose.

Salient points made by industry witnesses before a majority of the 31-man committee were these:

● RCA's Dr. Engstrom called on the FCC to immediately authorize the compatible, NTSC system of color television, said that NBC would immediately start telecasting in color. He also said RCA was ready to begin mass production of its tri-color picture tube, color receivers and studio equipment. He said RCA would petition to reopen the color TV subject "within six months."

● CBS has no intention of picking up and going forward with the non-compatible field sequential system until the FCC clarifies the color video picture, Mr. Stanton said. He said that he was not sure that the NTSC system was as ready for commercialization as its proponents have stated, and he definitely disagreed with the RCA suggestion that the FCC authorize the NTSC without a hearing. He said CBS would back any system which the FCC finally chose as the official method of color TV.



● Color TV is still about five years off, Dr. DuMont bluntly told the House investigators. He said he didn't think the NTSC system was ready for an FCC hearing, and would not be for about a year. He estimated that it would take the FCC about three years to issue notices, hold hearings, consider and make a decision, and another year for the industry to tool up for mass production.

● The Lawrentce tri-color picture tube is ready for mass production, Richard Hodgson,

BOTH Dr. Frank Stanton (l), CBS Inc. president, and Dr. Allen B. DuMont, president, Allen B. DuMont Labs., were industry witnesses at the House Commerce Committee color TV hearing. Dr. Stanton urged quick clarification of the color status. Dr. DuMont asserted color TV still is about five years away; expressed belief NTSC system is not ready for hearing.

Chromatic Television Labs. president, said. It will work with either the field sequential system or the NTSC compatible system, he added.

Questions from some members of the House committee indicated an interest in (1) whether

WAITING to testify on color TV is Richard Hodgson (r), president of Chromatic Television Labs. Inc., shown with Paul Raibourn, Paramount Pictures vice president in charge of television. Paramount owns half of Chromatic.

there was a conspiracy to retard the advent of color television in order to saturate the market with black and white sets, and (2) whether there was a "double play" between the FCC and NPA, or between manufacturers and NPA, to stop the advancement of color.

No direct charges were made by any of the witnesses.

The conspiracy charge was first made by Sen. Edwin C. Johnson (D-Colo.) several weeks ago in a public letter to Sen. Charles A. Tobey (R-N.H.), chairman of the Senate Interstate and Foreign Commerce Committee [B•T, March 16]. The Senate committee staff had begun an investigation on the status of color TV late in February, and according to Sen. Tobey, intends to hold a hearing on the subject.

'When' Is Question

Hearing was opened by Rep. Charles W. Wolverton (R-N.J.), chairman of the House committee, stating that the purpose of the investigation was to find out "when color television will become a reality in the homes of the American people."

Dr. Engstrom led off as the first witness. In addition to recommending that the FCC authorize the compatible NTSC system immediately, he declared that RCA was still convinced the CBS-sponsored field sequential system was unsatisfactory because of its incompatibility and technical standards. He said RCA had spent $20 million on color TV research, $5 million during 1952.

RCA's Lancaster, Pa., tube plant has started about 7,000 tri-color picture tubes with about 80 employes involved in color tube development and production. He said that 477 tri-color tubes have been distributed to 177 different companies for their study. The Lancaster plant has a capacity for the mass production of 2,000 tri-color tubes a month, he said.

The present RCA color TV receiver contains 34 tubes and one tri-color tube, Dr. Engstrom said. This is about half what the first RCA color receiver contained, he pointed out. He said RCA will start color TV receiver production as soon as the go ahead is received from the FCC, gearing production to public demand and drawing upon existing black and white TV receiver facilities to meet demand.

Dr. Engstrom also announced that RCA had developed a single-tube color camera for station use—still in the laboratory stage but with great promise.

Concluding his presentation, Dr. Engstrom—who was accompanied at the hearing by RCA Technical Director C. B. Jolliffe and NBC Chief Engineer O. B. Hanson—said:

We are today prepared to commence broadcasting compatible color programs which can be received in black and white on sets now in the hands of the public without changing these sets at all and without any present set owner being required to buy any new equipment to receive these broadcasts.

We are also prepared to expedite the production of color sets so that those members of the public who want to receive our compatible color broadcasts in color can buy color receivers.

Given this opportunity to judge for itself the advantages or disadvantages of the compatible and incompatible system of color television, the American public would make the final decision as to which system it prefers. In our opinion, this is the quickest way to bring color television service to the American public.

The CBS field sequential system was virtually buried when Dr. Stanton stated that CBS had no intention of "tilting against windmills" by trying to restart color broadcasts and the manufacture of color sets.

Basic barrier, he said, was the fact that there are now 23 million black and white TV sets in use. Unless adapted, the current black and white sets cannot receive the field sequential color signals, even in black and white. A compatible system permits current receivers to receive color signals—in monochrome.

CBS will accept the compatible NTSC system—if it lives up to the promises made for it by its developers, Dr. Stanton said. He urged that the color TV issue be settled quickly, so the public would know exactly what was coming.

Members of the House committee commended Dr. Stanton for his "frankness" and "fairness."

But Dr. Stanton left no doubt that he believed CBS could have put over its type of color TV if it had not been for the RCA court action which delayed the commencement of color TV operations from October 1950 to June 1951, and the NPA ban on the production of color receivers, instituted in October 1951 and revised slightly in June 1952.

Dr. Stanton related the reasons why the FCC chose the CBS system over the competing RCA and Color Telivision Inc. systems and the events that occurred subsequent to the FCC decision.

He referred to the attempts of RCA and NTSC to work out a compatible system and said:

Despite the publicity about the compatible system, I think that there was considerable momentum for the field sequential system. There were substantial indications that if we continued to press forward with our broadcasting and manufacturing efforts, sooner or later other manufacturers would begin to produce color equipment. We had real hope that the log jam would soon be broken. But at that time, most of the others in the industry were focusing their efforts on developing, demonstrating and testing a new compatible system.

Dr. Stanton said the NPA M-90 order was academic. He explained that CBS-Columbia Inc., the manufacturing subsidiary of CBS Inc., tried to get additional materials for the manufacture of color TV receivers and was turned down by NPA.

The CBS sequential system has been continued, Dr. Stanton said—in laboratories, and in closed circuit use for military, medical and theatre TV.

As to the future, Dr. Stanton said:

First, I say reluctantly but realistically, that CBS has no plans so long as the present circumstances exist, to broadcast or manufacture under the approved field sequential system. . . . I think we would be tilting at windmills to undertake now, without any substantial industry support, to try to pick up again where we were forced to leave off in October 1951. . . . That impetus has been lost and the field sequential system has been completely becalmed for a year and a half. . . . I cannot minimize the problems [of 23 million black and white sets] which this creates. I do not think the problem of incompatibility is necessarily fatal. But I do think that the problem of incompatibility has now grown to such proportions that in combination with other factors, it becomes quixotic and economically foolish for us single-handedly at this time to resume a large scale broadcasting and manufacturing program under the field sequential system.

On the basis of "incomplete" information, Dr. Stanton said: "We believe that the new compatible system faces substantial problems, particularly in cost and complexity both at the transmitting and at the receiving end."

Dr. Stanton added:

But this we know. We are for any color system which works well, which is practical and the cost of which is reasonable. We will support such a system whether or not it is one developed by us or by a competitor, or by somebody of whom we never even heard. . . . We are in favor of compatibility. . . . We genuinely hope that this new system fulfills the promises made for it and that it is both compatible, practical and economical. . . . If this new system works, is practical and its price is reasonable, we will support it with all our energies.

Complete disagreement that color TV is "around the corner" was expressed by television pioneer Dr. DuMont. He doubted, he said, that anyone had a marketable color TV set.

Mincing no words, he said that the NPA ban

START of House Commerce Committee inquiry into color TV sees Dr. E. W. Engstrom (l), RCA Princeton Labs. vice president, shaking hands with Rep. Charles A. Wolverton (R-N.J.) (r), committee chairman. Between them are (l to r) Reps. James I. Dolliver (R-Iowa) and Carl Hinshaw (R-Calif.), other members of the House group.

on color TV manufacture was not a move to delay color TV but "a move to take Columbia off the hook." He added, "They were not going anywhere and were going to quit but didn't want to admit it."

He said CBS had made about 500-600 color TV sets, but had sold only 100 in the six months that color TV was free to develop. He said the $650 price on 10-in. color sets could not compete with the $200 price of 17-in. black and white sets. "The public kicked this thing out," Dr. DuMont stated. He said 80% of last year's TV set sales were at prices less than $300.

Compatibility is only one factor in developing a color television system, Dr. DuMont declared. Also important are such matters as resolution, brightness and flicker threshold, he said.

There is no tri-color picture tube that is satisfactory, Dr. DuMont asserted. He was dubious about the RCA single color tube and ventured that Chromatic had about three or four years more to go in completing development of the Lawrence tube.

Dismisses NTSC System

As to the NTSC system, Dr. DuMont said the "system was not good enough and the receivers would be too expensive." He agreed with one questioner that it would be a good idea to force the FCC to permit experimental colorcasts of the compatible system during regular programming hours.

Lawrence tri-color picture tube is ready for advent of color TV, Mr. Hodgson said. He claimed that the tube would work on both field sequential or dot sequential system, and would cost only $25 to $35 more than a black and white tube.

Issuance of NPA Order M-90 was "unusual" and "unnecessary and contrary to public policy," Mr. Hodgson implied, and was for the purpose of stymieing the advance of color television.

The Chromatic Television president urged that the Congress see to it that the FCC doesn't freeze color TV standards so that one manufacturer or group of manufacturers garners the market.

He also called for the committee to continue to "exercise pressure" to see that color television gets out to the public.

Chromatic Television Labs. is half-owned by Paramount Pictures Corp. Dr. Ernest O. Lawrence, nuclear physicist and Nobel prize winner, is the inventor of the Lawrence polychrome tube.

Coronation in Color

CORONATION of Queen Elizabeth next June will be telecast in color in Great Britain. Chromatic Television Labs. Inc., which developed the Lawrence color tube, and Pye Ltd., which has made special color video cameras, will cooperate in the telecasts.

Sets with 22-inch Lawrence tubes will be placed in hospitals and public places for persons unable to see the actual ceremonies. The Lawrence tube has never been used in England, although it has been demonstrated frequently in the U. S. It was developed by Chromatic, an affiliate of Paramount Pictures Corp. Pye Ltd. is a large TV manufacturer in Great Britain, and has made black-and-white equipment for BBC as well as some U. S. telecasters.

Classmate Becker Recalls an 'Industrious' Doerfer

AN ASTUTE lawyer and a sincere, hard-working public servant is the characterization given John C. Doerfer, new Eisenhower nominee to the FCC, by a law school classmate who has known him more than 20 years. A. Harry Becker, Washington attorney who went into private practice last year after 11 years with the FCC, recalled last week experiences shared at Marquette U. law school in Milwaukee.

John Doerfer, a native of West Allis, Wis., a highly-industrialized suburb of Milwaukee, worked his way through the U. of Wisconsin and Marquette law school, which he entered in 1931. Mr. Becker, a freshman at the same time, remembers Mr. Doerfer as a quiet, studious youth who nevertheless had the kind of social balance which led him to attend "boiler-room smokers." Always highly respected by his classmates, John Doerfer was known as a crack law student and "never as a politician."

"Domesticated" and happily married even in his law school years, Mr. Doerfer is remembered as having successfully handled two fulltime jobs—as a student working toward a hard-earned law degree and earning money as an accountant.

Termed "quiet and modest" by Mr. Becker, he would never, however, "back away from a fight." A middle-of-the-roader, in that he could recognize both the liberal and conservative sides of a question, he was interested predominately in public service. This has been proved, Mr. Becker notes, in Mr. Doerfer's public service record in Wisconsin, which began a few years after he was admitted to the bar and when be became city attorney of West Allis.

Although he is not a "social" person, in the Washington cocktail party sense, he likes people and gets along well with them, has a strong sense of humor and "knows the world about him," Mr. Becker says. He's well-balanced in his concepts of work and play, although his work demands have relegated the latter to a secondary position.

Mr. Doerfer is described as a conservative dresser, long ago having adopted the "Brooksy" type of dress although "at the time he probably didn't know what Brooks Bros. was."

"The hackneyed word, industrious, was made for him," Mr. Becker says, "and during school we all knew the mark of industry was upon him." Their paths occasionally have crossed since then, and Mr. Doerfer's latest appointment brings him into a bailiwick familiar to his former classmate.

Mr. Becker, at time of his resignation from the FCC a year ago, was chief of the administration branch in the litigation and administration division under supervision of the general counsel.

SENATE UNIT SETS DOERFER HEARING

Interstate and Foreign Commerce Committee moves quickly to act on President's nomination. Walker likely to stay until June 30.

MOVING quickly to put a Republican complexion on the FCC, the Senate Interstate and Foreign Commerce Committee last week scheduled a hearing April 1 on the nomination of John C. Doerfer, chairman of the Wisconsin Public Service Commission, to be a member of FCC [B•T, March 23].

The hearing will be held in the Committee's hearing room in the Capitol at 10 a.m. Also to be considered are two nominations for the Civial Aeronautics Board.

As of last Thursday, the Committee had heard from no one, other than the nominee, desiring to be heard. No opposition to the 48-year-old appointee's nomination has been received, according to the Committee staff.

Mr. Doerfer was named by President Eisenhower to complete the unexpired term of former Republican Comr. Robert F. Jones, who resigned in the fall of 1952. This runs to July 1, 1954. It had been held by Democratic Comr. Eugene H. Merrill of Utah, appointed as a recess FCC member last October [B•T, Oct. 13, 1952]. Mr. Merrill was nominated formally by President Truman on Jan. 9. President Eisenhower's nomination of Mr. Doerfer on March 20 was accompanied by his withdrawal of the Merrill nomination.

Still uncertain is whether Mr. Doerfer also will be named Chairman of the FCC. When asked about that possibility two weeks ago, he said he would "just as well not discuss that."

John C. Doerfer
FCC Nominee

A clue in that direction was seen by some observers who pointed to the naming last week of Edward F. Howrey as chairman of the Federal Trade Commission. Mr. Howrey only recently was confirmed by the Senate as a member of the FTC.

Up to two weeks ago it was generally reported that Comr. Rosel H. Hyde, Wyoming Republican who came up through FCC ranks to a Commissionership, might be named chairman.

Present Democratic Chairman Paul A. Walker is serving past the compulsory retirement age of 70 under an executive waiver issued by President Truman last year. His term expires June 30. However, the naming of a

chairman is done at the President's "pleasure." This means that President Eisenhower may at any time name another commissioner as chairman.

But it was generally thought last week that while the President probably would name a Republican chairman, he nevertheless would permit Mr. Walker to serve until his term expires June 30.

Technically, Comr. Merrill remains in office until his successor takes his oath of office, it was explained by a White House source last week. However, should a successor fail to be approved before the conclusion of the present session of the 83d Congress, Mr. Merrill's recess appointment will lapse with the end of the Congressional session. President Eisenhower, however, could terminate the recess appointment momentarily if he so wished, since it runs "at the pleasure of the President."

Comr. Merrill stated last Wednesday that he has no plans for the future, but indicated he might vacation for a short time once he leaves his FCC post since he has not had a real vacation during many years of government service. It is understood Comr. Merrill has a sizable accrual of annual leave to his credit as a result of this service.

In a statement prepared for BROADCASTING • TELECASTING, Comr. Merrill said:

I am grateful to the President of the United States for having afforded me the privilege of being on this Commission to serve the American people. It has been among my objectives to make decisions wholly in the public interest, simplify and make current the work of the Commission as well as to eliminate needless procedures and regulations.

The television and radio broadcasting industry has a tremendous responsibility to the American people. I am hopeful that the Commission and the industry will continuously keep in the forefront their public responsibility.

I am also appreciative for the opportunity of having served the American people and the people of my state (Utah) in various other capacities in the public utility field in the past 18 years, including five years of service in Germany in the post-war period. This assignment included organizing and supervising the German communications system (telephone, telegraph, postal, bus transportation, commercial bank, savings bank and radio frequency allocation) with its 300,000 employes, rebuilding its physically destroyed plant, establishing and maintaining it in financial solvency and implementing policies to destroy communist influences.

KOB SSA Extension Proposed In Cunningham Initial Decision

AN INITIAL decision looking toward grant of that part of KOB Albuquerque's application requesting extension of its special service authorization to operate on 770 kc, 50 kw day, 25 kw night, unlimited time, was issued Thursday by FCC Hearing Examiner James D. Cunningham.

The decision also ordered on the FCC's own motion that, until final decision on KOB's application for a regular license to operate on 770 kc with 50 kw unlimited, the station may continue operating under the SSA until expiration of KOB's current license May 1, 1954, which authorizes it to operate on 1030 kc with 10 kw unlimited.

KOB has been operating on the 770 kc with 50 kw since 1941 under succeeding SSAs. WABC (formerly WJZ) New York is regular clear channel licensee of this frequency. The New York ABC outlet has protested the KOB SSA since 1941, claiming interference with its signal.

A pending hearing would decide whether KOB may share 770 kc with WABC permanently. KOB's last SSA for the frequency was made Sept. 30, 1952, for a period of six months [B•T, Oct. 6, 1952]. The KOB case has been before FCC for more than a decade.

'Dorfer' or 'Derfer'?

DOES FCC Commissioner-designate John C. Doerfer pronounce his name 'Dorfer' or 'Derfer'? The answer is either.

Mr. Doerfer told B•T last week that it always had been 'Derfer' but because he has a colleague on the Wisconsin Public Service Commission whose name is Durfee (James R.), most folks switched to 'Dorfer' to avoid confusion.

"I guess it will be 'Derfer' in Washington," he said.

L. A. RED PROBE MAY CONTINUE IN JUNE

UNABLE to hear all 80 witnesses subpoenaed for a Los Angeles hearing last week, a House Un-American Activities subcommittee investigating Communist infiltration in radio, television, motion pictures and other fields, has postponed several appearances. A subsequent Los Angeles hearing may start June 23.

"Friendly" witnesses last week added new names to the known list of alleged past and present party members, but none was identified with radio or television. Testifying last week were Danny Dare, film and TV producer, Max Nathan (Mac) Benoff, radio-TV comedy writer-producer, ex-radio writer Bart Lytton and Mrs. Sylvia Richards.

FCC Approves KFMB AM-TV Sale to Wrather and Alvarez

FCC APPROVAL of the $3.15 million sale of KFMB-AM-TV San Diego by John A. Kennedy to J. D. Wrather Jr. and Helen M. Alvarez was announced last week.

Contract for the transfer was signed Jan. 24 subject to Commission approval [B•T, March 2, Feb. 2]. Mr. Kennedy, who bought the San Diego interests from Jack Gross about two years ago for around $1 million, reportedly is disposing of the facilities because of ill health. He recently sold the *San Diego Journal*.

The transaction calls for payment of $200,000 cash in escrow at time of signing plus an additional $400,000 at FCC approval. The remaining $2.4 million will be paid at the rate of $20,000 per month, the balance hearing 4% interest. Sale includes the newly-remodeled KFMB Bldg. and adjacent property, owned and under lease, covering about a full block. In addition, under terms of the contract Mr. Kennedy will receive a $150,000 retainer over the next five years as a management consultant.

Mr. Wrather is an independent oil producer and heads Wrather Productions, Hollywood. He and Mrs. Alvarez also own KOTV (TV) Tulsa, of which Mrs. Alvarez is general manager.

The KFMB sale was handled by Blackburn-Hamilton Co., station brokerage firm.

Howrey FTC Chaiman

EDWARD F. HOWREY, attorney in the Washington law firm of Sanders, Gravelle, Whitlock and Howrey and well-known in broadcast circles, has been named chairman of the Federal Trade Commission by President Eisenhower. He replaces James M. Mead, who resigned last week. Mr. Howrey was named to the FTC by the President, and approved by the Senate three weeks ago. The new appointment did not require Senate confirmation.

RCA 'Ike Mikes' Presented at White House

TWO RCA uniaxial microphones that President Eisenhower used during the election campaign were presented Tuesday to the Chief Executive by Frank K. White, NBC president. Mr. White also handed him two reels of kinescopes showing the inaugural ceremonies and parade as well as the inaugural balls. Mr. White discussed proposals for telecasting White House news conferences with the President and his news secretary, James Hagerty.

Accompanying Mr. White during his 9:15 a.m. call were Frank Bourgholtzer, recently named to head the NBC Paris bureau [B•T, March 23] and Ray Scherer, who succeeds Mr. Bourgholtzer as White House correspondent for the network. The President wished Mr. Bourgholtzer good luck on his three-year mission and welcomed Mr. Scherer.

The two tiny microphones used by the President in his campaign are known as "Ike Mikes" by NBC engineers. They were mounted on a plaque bearing the inscription: "The Eisenhower victory microphones. A memento of a 50,000-mile campaign tour beginning Sept. 4, 1952, to Nov. 4, 1952. National Broadcasting Co."

The Model 823 microphones were the only ones used for radio-TV-newsreel-public address pickups on much of the campaign.

TWO new-model "Ike Mikes" developed by RCA and used by President Eisenhower during campaign are presented by Frank K. White, NBC president.

Hofheinz 75% Sale of KTHT Filed at FCC; $600,000 Is Price

HOUSTON'S Mayor-Broadcaster Roy Hofheinz has sold three-fourths interest in KTHT to a group of local businessmen for $600,000, according to the transfer application awaiting FCC approval [B•T, March 23].

While retaining substantial interest in KTHT, Mr. Hofheintz wants to consolidate his capital position and financing for a TV application. The change to corporate structure, according to the application, is because of tax reasons.

The new corporation is called Texas Radio Corp.

Fourteen Houston businessmen, plus Mayor Hofheinz, compose Texas Radio Corp. Among those holding 7½% interest are William Bartholmew Bates, attorney and formerly 55% owner of KCRT Baytown, Tex.; Stephen Power Farish Jr., ⅓ partner in Threeway Drilling Co. (oil well drilling) and ⅓ partner in S. P. Farish & Co.; Alfred C. Glassell Jr., oil and gas production; Floyd C. Karsten, oil production; Frank W. Michaux, oil production; Robert David Straus, executive vice president of Straus-Frank Co. (wholesale distributors), and president and partner in Lee Land Realty Co. and Alexander Bales Bldg. Co., and William D. Southerland, president of Henke & Pillot Inc. Supermarkets.

NBC Control of KOA Hinted In Renewal Delay Request

FCC was asked to defer action on application of KOA Denver for renewal of its license in a petition filed by Curtis B. Plummer, chief of the Commission's Broadcast Bureau. Mr. Plummer said that during proceedings involving application of Metropolitan Television Co. (KOA) for right to build a TV station in Denver on Ch. 4, the question of KOA ownership was raised. He added that extensive evidence on the question whether NBC has retained some control of KOA has been submitted.

KMYR Denver last week asked FCC to defer action on KOA's license renewal on the ground Metropolitan's right to hold a license now involves a "critical" question because of agreements in NBC's sale of KOA. This ownership question should be resolved first, KMYR contends. A week before KMYR had asked FCC to reopen the record in the Denver Ch. 4 TV hearing on the ground it had new evidence on KOA's program practices [B•T, March 23].

WPTZ NBC Affiliation Valued At $5 Million in Application

FORMAL application was tendered at FCC last week for approval of the $8.5 million sale of WPTZ (TV) Philadelphia by Philco Corp. to Westinghouse Radio Stations Inc. [B•T, Feb. 23].

Breakdown of the $8.5 million sale price shows that all physical assets (land and equipment) are being sold for $2 million; goodwill, $1.5 million, and NBC-TV affiliation contract, $5 million.

Westinghouse already has sent Philco a check for $500,000, but this money will be returned to WRS if the Commission fails to approve the transfer before Aug. 1.

The transfer application also revealed that WRS expects the yearly operating cost of WPTZ (TV) to total $2,090,000, with total revenue of $3,850,000.

Congressmen Show Interest In Costs of Color Sets

COSTS of color receivers intrigued members of the House Commerce Committee investigating the status of color TV last week.

Estimates for a combination color and black and white set ranged from 50% higher than today's black and white receivers, falling down to about 25% above today's prices, by RCA's E. W. Engstrom, to the flat prediction that color-black-and-white TV receivers would always cost about half as much again as today's sets, by DuMont's Dr. Allen B. DuMont.

All witnesses agreed that conversion of today's monochrome sets for compatible color was economically out of the question. Costs would be as much as the original price, they estimated. Most people would wait until they were ready for a new set, then buy a combination set, they agreed.

Adaption and conversion of existing monochrome sets for the field sequential system of color TV is possible, both CBS' Frank Stanton and Chromatic Television's Richard Hodgson declared. Both said it would cost about $100 to transform a black-and-white receiver into a color set capable of receiving the field sequential signals.

"HE PROFITS MOST WHO SERVES BEST"

—Rotary International

For the fourth consecutive year (1952-'53) KFH has been awarded First Place for its Public Service by Billboard Magazine's distinguished list of judges.

This simply means that KFH is a radio station with high standards . . . a good radio station. It is highly respected, nationally and locally. This has been proved by all audience measurement standards.

KFH reaches most of the people most of the time and all of the people some of the time. Advertisers profit most by using the station which serves Wichita and greater Kansas best . . . KFH.

FCC Dismisses Zenith Protest In WBBM-TV Renewal, Sale

PROTEST by Zenith Radio Corp. against renewal of license of WBBM-TV (formerly WBKB) Chicago and approval of the sale of that station to CBS [B•T, March 23] was dismissed by the FCC last week.

Commission held that the "protest" provisions of the Communications Act applied only to grants made without hearing. Since WBBM-TV's license renewal and transfer to CBS were made after a hearing, FCC said Zenith erred in the following protest procedure.

Comr. Frieda B. Hennock dissented, holding that Zenith had a right to protest since no hearing had been held on the change of WBBM-TV from Ch. 4 to Ch. 2. This was ordered by FCC in its new allocations decision.

Commission called attention to Zenith petition for reconsideration in the same case [B•T, Feb. 23], and said it was still under consideration. Zenith claims that FCC must hold a hearing on its application for Ch. 2 in Chicago, in competition with WBBM-TV. Commission dismissed Zenith's application when it decided multi-faceted Paramount case [B•T, Feb. 16].

KGON, KVAN File Findings In Portland Ch. 21 Case

PROPOSED findings were tendered to FCC Hearing Examiner Elizabeth C. Smith last week by contestants in the comparative hearing for ufh Ch. 21 at Portland, Ore., the shortest proceeding of its kind, thus far, in number of hearing days. Competitors are KGON Portland and KVAN Vancouver, Wash. The hearing opened Oct. 1, 1952, and closed Feb. 9, 1953, and ran 11 days [B•T, March 16].

The Chief of FCC's Broadcast Bureau, in his proposed finding, concludes both proposed TV stations should be in accord with FCC's rules and neither is to be preferred for engineering reasons.

FCC Denies WLAN Motion In Lancaster Controversy

FCC last Wednesday denied a motion by Peoples Broadcasting Co. (WLAN) Lancaster, Pa., asking that issues in its controversy with WGAL-TV Lancaster, Pa., be changed and enlarged. WLAN and WGAL-TV are competing for the Ch. 8 facility in Lancaster.

Commission refused to strike from its hearing order the finding that WGAL Inc. is legally qualified to build and operate a Ch. 8 station. It denied a plea to add issues about multiple ownership and concentration of media, contending the issues now specified are adequate. The hearing order was amended to specify the FCC "cannot now determine whether Peoples Broadcasting Co. is financially and otherwise qualified."

Murrow Testifies on VOA

U. S. overseas information program, which includes Voice of America, should be separated from State Dept. jurisidiction and operated by professional newsmen rather than "striped-pants diplomats," according to Edward R. Murrow, CBS commentator. He appeared Thursday before a Senate Foreign Relations subcommittee headed by Sen. Bourne B. Hickenlooper (R-Iowa). Ben Hibbs, editor, *Saturday Evening Post,* also testified.

STATIONS

STORER OFFICES SHIFT TO FLORIDA

Board also elects George B. Storer Jr. to vice presidency as broadcasting company plans concentration of executive functions in Miami Beach.

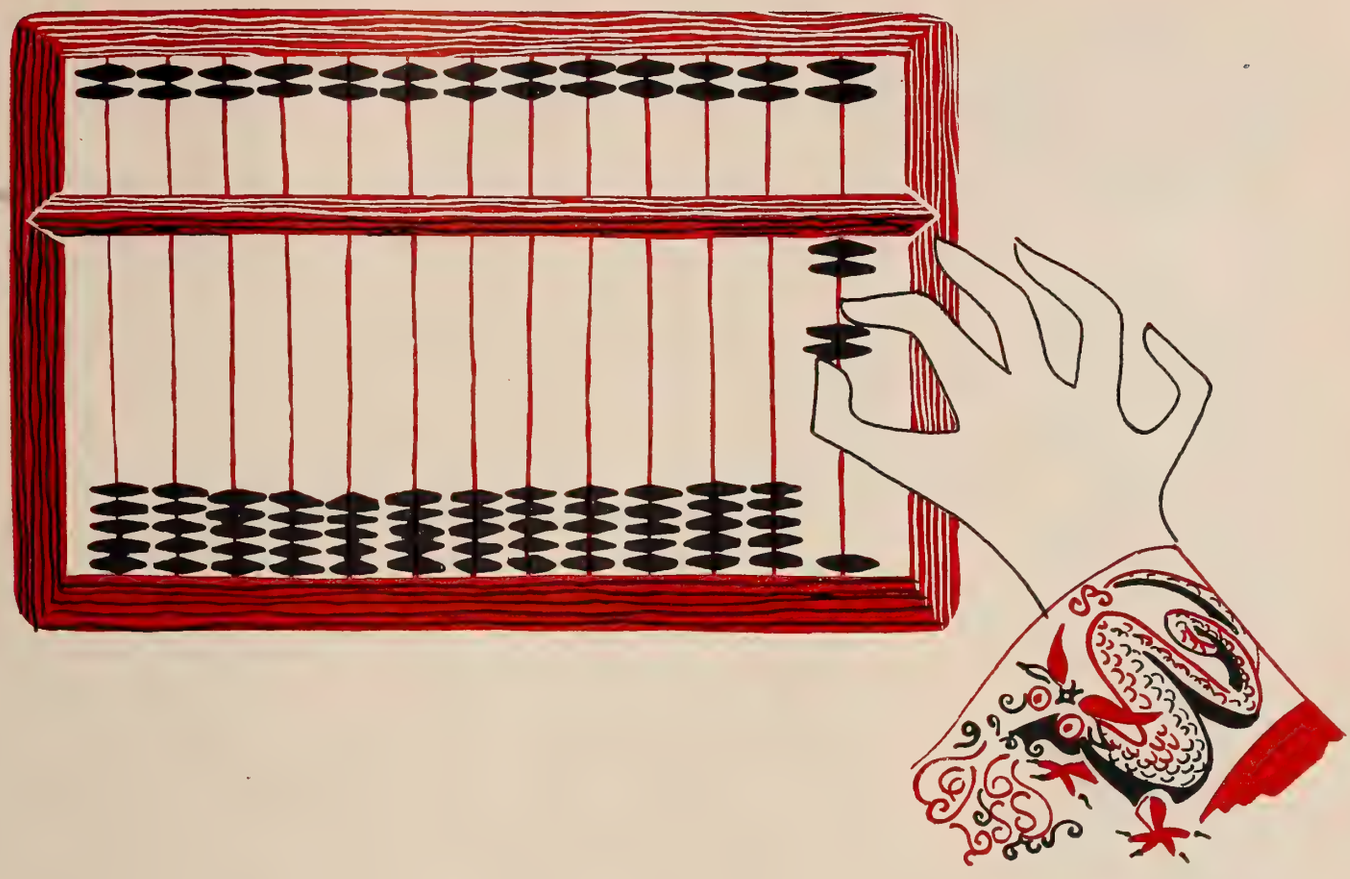
CONSOLIDATION of all Storer Broadcasting Co. executive functions in a new headquarters at Miami Beach was announced Thursday by President George B. Storer.

Simultaneously, the company's board of directors, meeting in Miami, announced the election of George B. Storer Jr. to the position of vice president of the parent company. He also will continue as managing director of KEYL (TV) San Antonio and as vice president of the San Antonio Television Co., KEYL licensee.

Mr. Storer Jr.

Plans for the concentration of executive operations in Miami Beach call for construction of a new building on Kane Concourse, Bay Harbor Island. It is expected to be ready for occupancy in mid-September.

All home office personnel, who have functioned in Birmingham, Mich., Toledo, and Miami Beach, will be transferred to the new location. Moving from the Birmingham office will be George B. Storer, president; Lee B. Wailes, executive vice president; Glenn Boknday, director of engineering, and the secretary and assistant secretary of the parent company with their respective staffs. Transferring from Toledo will be J. Harold Ryan, treasurer; Harry Steensen, assistant treasurer and comptroller, their immediate staffs, and accountants, clerks and bookkeepers.



N. Y., Chicago Offices Stay

Storer offices in both New York and Chicago will remain in those cities, it was announced, because of their proximity to agencies and advertisers. The New York office, preparing to move to the new five-story Storer House, 118 East 57th St., is headed by Tom Harker, vice president and national sales director, with Arthur C. Schofield as advertising and sales promotion manager. Chicago office, under Midwest sales manager Bob Wood, will remain at 230 North Michigan Ave.

A recent reorganization of the company set up two operating districts. Stanton P. Kettler, as southern district vice president, will headquarter in the new home office building, and William Rine, northern district vice president, will make his office in Detroit.

George B. Storer Jr., eldest son of the president, assumed his post as managing director of KEYL(TV) in October 1951. He previously served with the Storer TV engineering department in Birmingham and as manager of WAGA-AM-TV Atlanta.

Mr. Storer has been a member of the company's board of directors for the past two years. He also is a director of the Standard Tube Co., Detroit, and the San Antonio Television Co.

This formula is so simple it scares you.

For eighteen years The Killian Company has been one of WMT's most successful—and consistent—advertisers. Their formula: lucid commercials tagged to a first-rate newscast.

One of their projects was the promotion of an authority on home decorating, Richard Gump. For one week, fifteen spots augmented the daily newscast, urging listeners to attend a lecture in the store.

Three thousand people turned up. Every floor in the store was crowded. Most who attended couldn't get near the speaker—had to hear him over the p.a. system.

Moral: 2 + 2 = 4, consistently.

KVTV (TV), WICC-TV UNDERWAY SUNDAY

TWO more television stations were slated to take the air this past weekend, while a third outlet—delayed from its original test pattern start—hopes to commence within a few days.

WKST-TV New Castle, Pa., was thwarted in its efforts to begin programming over the weekend because a snowstorm last Thursday prevented hoisting the station's antenna to the top of its tower. A spokesman for the uhf Ch. 45 outlet said programming probably will begin this week. Representative is Meeker TV Inc.

KVTV (TV) Sioux City, Iowa, vhf Ch. 9, was to have begun programming yesterday (Sunday). Owned and operated by Cowles Broadcasting Co., the station is represented by the Katz Agency and is a CBS-TV affiliate.

WICC-TV Bridgeport, Conn., also was to have started yesterday. Film and network features are planned for the first two weeks of operation, to be followed by live programming. The uhf Ch. 43 station, represented by Adam Young, operates from 4:30 p.m. to 11:15 p.m. and is an ABC-TV affiliate.

Stations which expect to begin commercial programming Wednesday are: KCJB-TV Minot, N. D., KELO-TV Sioux Falls, S. D., KFDA-TV Amarillo, Tex., KFDX-TV Wichita Falls, Tex., and WLEV-TV Bethlehem, Pa. [B•T, March 23].

Of last week's new television station permittees, Rex Howell, president and general manager, KFXJ-TV Grand Junction Colo., vhf Ch. 5 grantee, told B•T he plans to build "slowly but permanently."

"We have no desire to begin operations until we have completed our installation of the station with assurance of maximum service," Mr. Howell said.

"Tentatively, we have set May 1, 1954, as possible starting date as that will mark our 28th anniversary," he said.

Construction of a completely new building adjacent to KFXJ-AM is planned, Mr. Howell reported. Equipment is on order from RCA, and by July it is expected that enough equipment will be on hand to set up studio operations to train personnel.

KFXJ's national representative is the Hal Holman Co. Network affiliation is planned, Mr. Howell said.

Others plan starting dates as early as next June.

Herbert Mayer, president of the Empire Coil Co., grantee for uhf Ch. 67 in Indianapolis, Ind., told B•T he is planning to be on the air there in October. RCA equipment will be used, he said. As yet no arrangements have been made for network affiliation and national representation.

Frank Carman, one of the principals of Utah Broadcasting & Television Corp., vhf Ch. 2 grantee in Salt Lake City, said starting date has been set for next fall. George Hollingbery Co. will be the national representative and the station will be an ABC-TV affiliate. RCA equipment has been ordered.

L. L. McCurnin, general manager of the Minnesota-Iowa Television Co., vhf Ch. 6 grantee for Austin, Minn., said the target date has been set for June 14. The station will use DuMont transmitter and RCA antenna. John E. Pearson TV Inc. will be the national representative. Mr McCurnin said network affiliation is to be determined.

KPRC-AM-TV Dedicates New Radio-TV Center

TEXANS yesterday (Sunday) saw KPRC-AM-TV Houston's new radio-television center and met its 150 employes in a tour conducted by Jack Harris, vice president and general manager.

Ceremonies marked opening of the center and KPRC-TV's temporary increase to 65 kw effective radiated power. It is scheduled to go to 100 kw maximum upon erection of a 750-foot tower with a six-bay antenna. The new 40,000-sq.-ft. air conditioned structure includes a two-story administration section, TV studios and facilities, radio studios, a cafeteria and a property room 40 by 100 ft.

Designed basically by Paul Huhndorff, chief engineer, the structure provides for a year-around garden studio 42 by 60 ft., in the center of an open square. Two other TV studios, A and B, each have more space than the entire television studio space in the old plant. A, 40 by 70 ft, houses eight permanent sets and can seat an audience of 200. Both A and B, 40 by 50 ft., have separate control rooms with dual facilities.

Each studio has a rear screen projector, viewing booths and 12 "tracked" microphones. The center has a 350-sq. ft. conference room, three film preview rooms and three "memory" booths for announcers and actors. The radio section includes four studios.

Visitors for ceremonies included Harry Bannister, NBC vice president in charge of station relations, who presented KPRC a plaque for 25 years of NBC affiliation; Edward Petry of the station representative firm of the same name; Hugh Halff, WOAI San Antonio; Martin Campbell, WFAA Dallas; P. A. Sugg, WKY Oklahoma City; Harold Hough and George Cranston, WBAP Fort Worth, and Ogden Knapp, NBC.

* * *

KPRC-AM-FM-TV Houston's call letters stand out sharply at the stations' new radio-television center, as shown in this sketch. Building was dedicated yesterday.

You're in the picture...

for everybody in America lives better because we have railroads which, every day in the year, haul for you—and for every other man, woman and child in the country—an average of more than 10 tons of freight a mile.

That's more freight than is moved by all other forms of transportation put together—and it is moved at a lower average cost than by any other form of general transportation.

Last year, for the sixth time in a row, railroad freight trains set a new efficiency record—hauling more goods, on the average, and hauling them faster, than ever before.

And these trains are important to you because they help keep down the cost of the things you eat, wear and use—and help make your highways safer and longer lasting.

TELECASTING
March 30, 1953

—E. J. (Eph) Davis, Manager of Traffic and Order Dept., with new Caterpillar DW20 Tractor

"This Cat will never be an orphan!"

"Construction men work against deadlines. If machinery can't be serviced —regardless of age—with genuine manufacturer's parts, they don't want it. It's an 'orphan'!

"This can't happen when it's Caterpillar-built.

"If the Caterpillar dealer is temporarily out of stock, he can get any part practically overnight—by Air Express! Air Express speed, closely coordinated with our Special Order department, gives all domestic Caterpillar dealers—over 375 stores—complete parts service for every model ever built. It gives them an 'inventory' of some 80,000 different parts!

" 'Down time' is cut to the minimum . . . machine life extended to the maximum . . . with the help of Air Express speed and dependability.

"That's why Caterpillar dealers frequently tell us 'Ship it Air Express'—averaging more than 18 times a day!"

Air Express gets there first—and often *saves money,* too! In many weights and distances, rates are *lowest* of all commercial air carriers!

It pays to express yourself clearly. Say Air Express! Division of Railway Express Agency.

AIR EXPRESS

GETS THERE FIRST

KGUL-TV TAKES AIR WITH 235 KW SIGNAL

KGUL-TV Galveston, Tex., began commercial operation March 22, with James Stewart, movie actor and minority stockholder of the station, acting as the m.c.

The 235-kw station, claiming to be the highest-powered operation in the Southwest, operates on Ch. 11 and is represented nationally by CBS TV Spot Sales. A basic CBS-TV affiliate carrying ABC and DuMont shows as well, KGUL-TV's initial weekly commercial schedule includes 16 hours of CBS network time and two hours each from ABC and DuMont.

Paul E. Taft is president and general manager of the Gulf Television Co., licensee of KGUL-TV. Other executives: Ray Jones, assistant to Mr. Taft; Henry Williamson, program director; George Smith, chief engineer, and Bud Johnson, film director. V. W. McLeod is secretary-treasurer and a director, and T. G. Blocker Jr. and R. Lee Kempner are directors also.

Participating in the formal dedicatory program were Merle Jones, CBS-TV vice president in charge of stations and general services; John Paul Goodwin, Houston agency man and applicant for Ch. 13 there; Arthur Scharfeld, Scharfeld, Jones & Baron, Washington attorneys for KGUL-TV; Mayors Roy Hofheinz of Houston, Herbert Y. Cartwright, Galveston, L. A. Robinson, Texas City, and City Manager Darwin Middleton of Baytown.

Stockholder Jimmie Stewart greets President Paul E. Taft of Gulf Television Co.

Kelly Becomes Station Mgr., Dougherty Sales Mgr. at WSRS

JOHN D. KELLY has been promoted to station manager of WSRS Cleveland Heights, Ohio, the outlet's president and founder, S. R. Sague, announced last week. Mr. Sague also reported the promotion of Willard S. Dougherty to sales manager.

Mr. Dougherty

Mr. Kelly

WOAI-TV Boosts Power; WOOD-TV Plans Increase

WOAI-TV San Antonio, a pre-freeze television station, increased its power to 100 kw visual March 22.

Meanwhile, Willard Schroeder, manager of WOOD-TV, announced that the station will increase its power from 28.5 kw to 316 kw Dec. 31. At the same time, the station will move from vhf Ch. 7 to vhf Ch. 8, and will receive network programs through a new, improved AT&T relay system, he said.

WAVE-TV To Be First to Get RCA 10 kw Vhf Transmitter

WAVE-TV Louisville, Ky., will receive RCA's first 10 kw vhf transmitter, the manufacturing firm said last week. The 5,000-pound instrument was to be shipped to WAVE-TV Friday from the RCA Engineering Products Dept. transmitter plant at Camden, N. J., the firm announced.

Other RCA transmitters have been shipped to WKNX-TV Saginaw, Mich., and KFOR-TV Lincoln, Neb.

YOU

CAN BE IN

T-V

EVERY TELEVISION STATION NEEDS

• Engineers • Announcers • Writers
• Salesmen • Cameramen
• Program and Production Managers

Here is the opportunity of a lifetime for professional personnel who plan a television career—TV engineering and production classes offered by operators of the Tennessee School of Broadcasting which, since 1949, has trained scores of first class radio engineers and announcers.

You are trained by experienced instructors—who hold important positions in television—in our new, fully equipped Television Studios. You work on a daily schedule of actual station operation, plus four hours of classroom work. You use every piece of television equipment.

The course is highly intensive, with small classes and individual training. Upon graduation, you will be thoroughly competent to handle any TV job!

New classes start every six weeks. Investigate now! (If you have no previous experience, write for information on elementary courses.)

CBS RADIO TAKES LEAD IN PREDICTING STABLE NETWORK RATES FOR 1953-54

Network President Murphy reports the encouraging news. Affiliates commend the network as BAB Chairman Caley hails the CBS position as confirmation of an upsurge in radio business.

THE FLOOR is back under radio rates.

CBS Radio, which took the lead in the two rounds of network radio rate cuts effected during the past two years, took the lead last week in affirming that stability appears to have returned.

President Adrian Murphy announced:

"To the best of our belief it appears at this time that the 1953-54 season will not require changes in network radio nighttime rates and discounts affecting the stations unless the sales situation changes because of competitive moves or other major factors."

The statement was hailed by BAB Board Chairman Charles C. Caley, WMBD Peoria, as "the most important and most significant announcement that has come in the past two years," and also as confirmation at network level of an upsurge in radio business reported at the local level by BAB member stations across the country.

Mr. Caley voiced hope for even greater stability "and a better rate structure by the first of next year."

Other broadcasters similarly praised the CBS Radio stand, which was made known first to the network's Affiliates Business Standards Committee and then made public by Mr. Murphy.

Referring to CBS Radio's pledge to hold the line on rates for another year from last August—a pledge given to the Business Standards Committee and all other CBS Radio affiliates when the August 1952 nighttime 25% "rate cut" was effected via increased discounts —Mr. Murphy added that the present outlook "holds the strong possibility of an extension of the present station affiliation contract amendments from August 1953 to August 1954."

Policy on Evening Time

Coincident with the statement, CBS Radio announced a change in policy to make evening time less costly for advertisers with daytime programs. But officials emphasized that this move merely puts CBS Radio on a competitive footing with other networks in this respect, and neither daytime rates nor rate of compensation to affiliates is being reduced.

Under the old plan, a quarter-hour cost 40% of the full-hour rate, day or night. Under the new policy the advertiser can buy, for each daytime quarter-hour he sponsors, a nighttime quarter-hour for 25% of the full-hour rate. He continues to pay 40% of the full-hour rate for each daytime quarter-hour.

This change was made, the announcement said, "in accordance with other networks' accepted practice of taking into account an advertiser's use of daytime periods in computing that advertiser's network gross rate for fractional quarter-hours." The new policy is most nearly comparable to the various "contiguity" rates of other networks, but officials in announcing the change said it "is not contiguity in the accepted sense."

In forecasting rate and discount stability for the 1953-54 season, Mr. Murphy also said:

"We are convinced that radio will go into next season stronger and more useful from both the audience and advertiser point of view than at any time in the last several years. Among the encouraging signs for radio's stability next season is the generally high level of interest in radio on the part of many sponsors and agencies as well as the early signing this past week of Edgar Bergen for return to radio next fall."

The official statement made no reference to renewal of sponsorship of the Bergen program by Warner-Hudnut Co., current sponsor. But officials said renewal, although not yet set, is confidently expected.

Mr. Murphy's confidence in a return to stability for the long-plagued radio medium was seen by BAB Chairman Caley, whose station also is affiliated with CBS Radio, as confirmation of reports from BAB members who report local business up by 5 to 6% during the past four months, and predicted that 1953 overall will show an approximately 20% gain in local sales, largely from the department store and grocery fields.

Among other broadcasters commending CBS Radio was Arthur B. Church, KMBC Kansas City, who said he and other officials of his station "earnestly hope the other networks will follow your lead."

Clyde Rembert of KRLD Dallas, another affiliate, notified the network that he was "indeed happy" with the news and sent "congratulations on the great job you are doing," declaring "the optimistic report is most encouraging."

F. C. Sowell of WLAC, CBS Radio affiliate in Nashville, wired the network that he was "tremendously pleased," and added: "We are confident this will resound to the prestige and profit both of the network and its affiliates. Your statement will go a long way toward solidifying radio's strong position in the media field. Congratulations."

Carl George, WGAR Cleveland, sent word that the CBS Radio stand was "most encouraging" and "a shot in the arm to us as an affiliate."

John M. Rivers, WCSC Charleston, S. C., called the announcement a "very optimistic note . . ."

To Support Its Belief

ON-THE-AIR campaign designed to show radio's strength and its own claimed dominance is being waged by CBS Radio, with plans for expansion in the making. The campaign is based on such spots as: "America listens to 105 million radio sets—and listens most to the CBS Radio network."

Variations on this theme are used, with such announcements as: "America drives to 25 million automobile radios" and "America wakes up to 3 million clock radios."

Sparking the CBS campaign is the 1953 spurt in production of radio receivers [B•T, March 9]. According to figures compiled last week by Radio-Television Mfrs. Assn., radio production for 10 weeks of 1953 totaled 2,901,498 sets compared to 1,778,316 in the same 1952 period, a two-thirds increase. TV output rose from 1,019,426 in 10 weeks of 1952 to 1,783,345 in 1953, a three-fifths gain.

NBC, Heeding Tax Matters, Realigns Financial Posts

IN A MOVE attributed to a need for more attention to taxation matters, NBC last week realigned its controller's department, consolidating the office of the controller of the company with that of the controller for the networks division.

Mr. Cresswell

Financial Vice President Joseph V. Heffernan, announcing the changes, reported the following appointments, effective immediately:

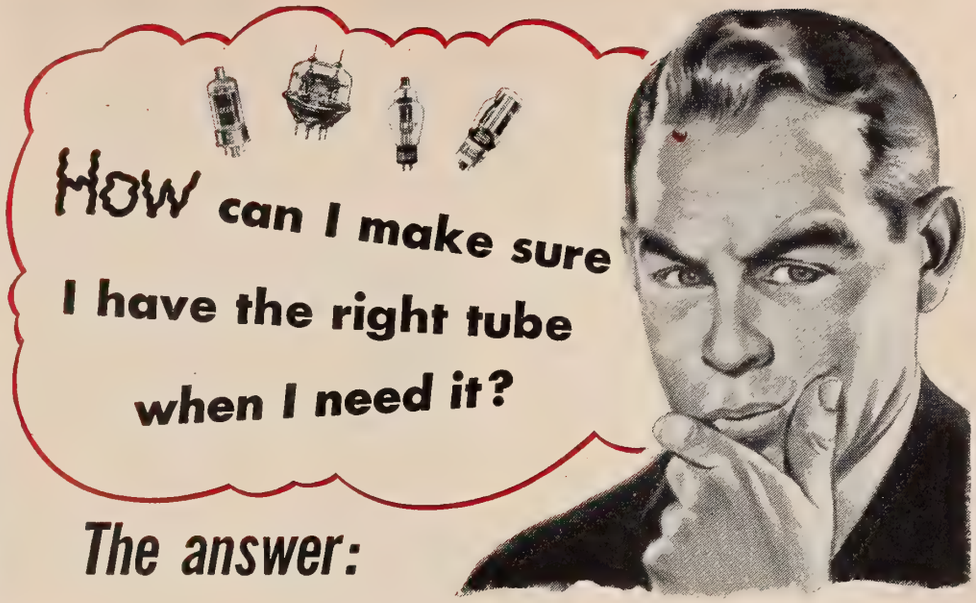
Charles J. Cresswell, former controller for the networks division, becomes controller of the company, reporting to Mr. Heffernan. Harry F. McKeon, former controller of the company, becomes director of the tax department, reporting to Treasurer Joseph A. McDonald.

William V. Sargent, former assistant controller for the networks division, becomes director of financial planning and control, reporting to Mr. Cresswell. Reporting to Mr. Sargent will be John J. Heywood, financial planning manager, and Edward Stegeman, programming and production financial manager.

Hamilton Young, former budget director, becomes director of auditing and systems, reporting to Mr. Cresswell. Francis X. O'Shea, former chief accountant for the networks, becomes chief accountant for the company, reporting to Mr. Cresswell. Frank Dellet continues as West Coast controller, also reporting to Mr. Cresswell.

Mr. McKeon

Joseph J. Akulonis, formerly assistant budget director, becomes assistant director of the tax department, reporting to Mr. McKeon. Joseph A. Kent, tax accountant, also will report to Mr. McKeon.



Mr. Cresswell, new controller of the company, joined NBC in April 1950 as controller for the TV network, becoming controller for the networks division the following July.

Mr. Sargent

Mr. McKeon has been with NBC since its formation in 1926, and before that was with WEAF (now WNBC) New York. He started with NBC as its auditor, and launched its first first accounting system. He became controller in 1942.

Mr. Sargent, formerly with RCA, moved to NBC in 1950 as assistant controller for the TV network, becoming controller for the networks division after the integration of services. Working at RCA from 1945 to 1950, he served successively as staff assistant to the controller of the Victor Div., plant controller at the Pulaski, Va., installation and at the Camden plant as manager of systems, procedures and auditing.

The answer:

RCA's new Tube Requirement Analysis!

Now you can stop worrying about the possibility of a station shutdown because of tube failure—in the event you have neglected to reorder a key tube type. Now you can also save money by avoiding "overstocks." RCA's new Tube Requirement Analysis gives you smooth control over your broadcast tube requirements.

Get in touch with your RCA Tube Distributor

Give him all the information you can about your electronic equipment, the tube types involved, and your special requirements. In this way, you bring him up to date on the services in which your tubes are operated.

He analyzes your needs

Then your RCA Tube Distributor can prepare a record of movement on each tube type required for your station equipment—can study *your* specific tube requirements.

He recommends a plan for YOU

Now, your RCA Tube Distributor presents a tube inventory plan—simplified and "tailored" specifically to your operations. He keeps up to date on your inventory . . . and backs it up with inventory service on his end, too! No overstocking. No shortages. Yet you can be sure you have the right tube—when you need it!

RCA's new Tube Requirement Analysis is available exclusively through your local RCA Tube Distributor. Call or write him, today. There is no charge or obligation for this service.

MBS Advances DST Block To Clear Early Baseball

MUTUAL is putting half its annual Daylight Saving Time operations into effect today (Mon.)—a month ahead of time—so that affiliates can carry major league exhibition games on the network's *Game of the Day* baseball series.

Earl M. Johnson, vice president in charge of engineering and station relations, said two of Mutual's four DST networks are being instituted today. These are networks A and B. Network A consists of affiliates on DST schedules in Eastern and Central Time zones. Network B is composed of affiliates on Standard Time schedules in the Eastern and Central Zones (including MBS stations broadcasting *Game of the Day*).

MBS networks C (affiliates on Standard Time in Eastern and Central zones which do not broadcast *Game of the Day*) and D (affiliates in Mountain and Pacific zones) will switch to DST operations—as will other network organizations—when DST goes into effect April 26.

Mutual this year is putting a new control-recording center into operation at its New York headquarters. This center will be the major point through which all network programming will be circuited. Programs to be repeated will be recorded and realigned on summertime network lineups.

Networks A and D normally will carry programs released on Eastern Daylight Saving Time schedule, with networks B and C carrying these one hour later. During *Game of the Day* times, networks B and D are temporarily joined so Pacific and Mountain Zone affiliates can carry the games.

AB-PT MAKES FIRST 'ANNUAL' REPORT

Financial summary of the new merger is based on separate standings of ABC and UPT at the end of 1952, but does reflect some adjustments for the combined operation.

THE NEW American Broadcasting-Paramount Theatres Inc., formed Feb. 9 by the merger of ABC and United Paramount Theatres, was shown in a special "annual" report last Friday to have cash and government securities of $32,573,301 working capital amounting to $27,644,000, and total assets of $141,101,491 including $8,756,620 in intangibles. Long-term debt was placed at $42,881,361.

These figures were based on the balance sheets of the respective companies as of the end of 1952, before the merger was effected. But they do give effect to the retirement of $7,662,000 of ABC's term debt four days after the merger, and on proceeds resulting from the $6 million sale of WBKB (TV) Chicago by AB-PT to CBS.

"The merged company is starting in a sound financial condition," AB-PT President Leonard H. Goldenson said in discussing the merger in UPT's annual report to stockholders, which was accompanied by an annual report on ABC's 1952 financial status.

The ABC report, signed by Edward J. Noble, chairman of the board before he became finance committee chairman in the AB-PT organization, showed ABC ended 1952 with $8,853,409 in current assets, $11,603,697 in fixed assets, and $8,756,620 in intangibles, all of which, with $33,236 in deferred charges, put total assets at $29,246,962.

Total current liabilities of ABC were placed at $7,200,000 and long-term debt (before the subsequent payment by AB-PT) at $7,527,749, plus $3,039,506 which, being due within a year, was included in the computation of current liabilities.

Note of Optimism

In his message to stockholders Mr. Noble sounded a note of strong optimism for the future of ABC as an AB-PT division, at the same time noting the growth of ABC in the past and thanking shareholders for their "understanding of the problems that faced your company because of the tremendous resources and entrenched positions of our competitors and because of our inability to complete the merger until the FCC had thoroughly considered the matter over a period of almost two years."

"I look forward with great confidence to the future of AB-PT Inc.," Mr. Noble said. He also noted that he plans to remain active, and that the ABC operation will continue under President Robert E. Kintner and other veteran executives, "importantly strengthened" by former UPT officials.

Mr. Goldenson similarly was optimistic. Referring to the earmarking of $2 million to boost the power of ABC's five owned TV stations, plans for new radio and TV programming (including the signing of "a limited number" of name stars), and expansion of affiliations, Mr. Goldenson said "these improvements will be helpful to ABC in its efforts to achieve a stronger competitive position." But, as in the past, he cautioned that "we do not expect to accomplish miracles overnight. Steady effort and substantial resources must be applied over a period of years."

Discussing ABC's problems, Mr. Goldenson said:

"Other than the need to develop stronger programming, particularly in the entertainment and dramatic field, ABC faces one basic problem in television—the fact that the scarcity of available television outlets in important cities throughout the country continues to exist.

"While this scarcity will be somewhat reduced over the next few months, the 1953-54 season will bring a continuance of the so-called 'clearance problem' for programs, occasioned by the fact that there will not be sufficient television stations in individual cities to accommodate programs from the four television networks. On the basis of present procedures, it would appear that this situation can continue for several years. In this connection, ABC is affiliating with a number of new stations which have been authorized in the uhf field."

The 1952 report for UPT showed that net earnings, after taxes, totaled $6,961,113 as compared with $10,705,011 in 1951. Major part of the decline came from a drop in capital gains, most of which represent proceeds from the sale of theatre interests. Mr. Goldenson said the capital gains drop "reflects the fact that we are nearing the end of our theatre divestiture program."

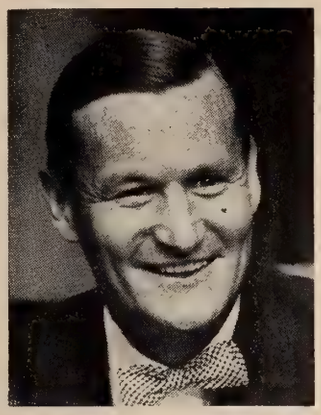
After-taxes net earnings from operations were down from $6,702,421 in 1951 to $5,613,626 last year. But it was stressed that in the fourth quarter of 1952, profits for a current quarter exceeded, for the first time in the more than three years UPT had been operating, the profits for the same quarter of a previous year.

UPT current assets at the end of 1952 aggregated $36,328,000, a gain of $2,113,000 over the 1951 figure. Current liabilities were down $370,000 to a total of $9,294,000, while working capital was up $2,483,000 to a total of $27,034,000.

At the end of 1952 UPT owned 651 theatres and had an interest in 57 others. Under the 1949 consent decree it still had to divest itself of 43 wholly owned theatres and terminate its joint interest in 43 others, of which it may retain five as wholly owned.

Light Succeeds Sonnenburg In Don Lee-KHJ Position

ROBERT M. LIGHT, for the past three years radio-TV director of Abbott Kimball Co., Los Angeles, has been named sales promotion manager of Don Lee Broadcasting System and KHJ-AM-TV Hollywood, Willet H. Brown, president, announced last week.



Mr. Light

Succeeding Herb H. Sonnenburg, who resigned, Mr. Light will report to Norman Boggs and George Whitney, vice presidents in charge of sales for Don Lee and KHJ-AM-TV respectively.

KWFC to ABC Affiliation

KWFC Hot Springs, Ark., became an ABC radio affiliate effective last Monday. The station, which operates with 250 w on 1340 kc, is owned by the Spa Broadcasting Co., of which Frank O. Myers is general manager.

Networks Announce Plans For Coronation Coverage

PLANS for extensive radio and TV coverage of the Coronation of Queen Elizabeth June 2, including use of British jet planes to fly pooled television films to the U. S., were announced last week by the networks.

Radio coverage will begin at 5:30 a.m. on all networks and continue an estimated three hours or longer. ABC-TV plans a telecast at 9-10 p.m., NBC-TV, 10:30 p.m. to midnight, and CBS-TV, 11 p.m. to midnight. CBS-TV also plans a 5:30 a.m. telecast on Coronation Day, using film clips in New York with audio pickup from London. DuMont TV Network has not disclosed plans.

CBS-TV announced it plans to charter a Boeing Stratocruiser from the British Overseas Airways Corp. to fly some of its own film to the U. S., and other networks also were said planning to charter their own planes. The actual Coronation ceremony inside Westminster Abbey will be covered only by BBC, which will service other TV agencies.

Willys-Overland Motors will sponsor coverage by CBS Radio and CBS-TV; General Motors, NBC radio and TV, and Pepperell Mfg. Co. (sheets and fabrics), ABC radio.

Fleming Projects Planned

NEXT assignment for James Fleming, news editor of *Today* on NBC-TV for the past 14 months, will be to prepare and perform special projects for both radio and TV, William R. McAndrew, NBC manager of news and special events, announced last week. Before beginning his new assignment, Mr. Fleming will complete his second album for RCA Victor. He has been succeeded on *Today* by Merrill Mueller [B•T, March 23].

Bergen on CBS-TV

EDGAR BERGEN and Charlie McCarthy definitely are set for appearances on CBS-TV during 1953-54 season under exclusive contract, CBS-TV President J. L. Van Volkenburg announced March 20. Present plans are for five TV shows. Earlier, CBS Radio, in announcing the signing of Mr. Bergen to continue his radio show next season, said he "may" also appear on CBS-TV.

NBC Signs Celeste Holm

CELESTE HOLM, stage and screen star, has signed a contract with NBC, Charles C. Barry, vice president in charge of network programs, announced last week. Details were not given.

THOMAS, BOLGER SIGN WITH ABC

ABC continued to move forward with its planned expansion of both programs and plant facilities last week, signing comedian Danny Thomas and dancer Ray Bolger to long-term exclusive radio-TV contracts and announcing it soon would launch into a $1.5 million reconstruction project to create a new ABC Radio-TV Center in downtown San Francisco [B•T, March 16].

President Robert E. Kintner, on a West Coast tour with other top network officials, announced the signings of Messrs. Thomas and Bolger, each of whom is to be starred in a weekly half-hour show over ABC-TV starting next fall. Terms of the contracts were not disclosed, although there were reports Mr. Bolger was guaranteed a minimum of $150,000 a year.

Both the Thomas and Bolger shows will be filmed in Hollywood, said Robert M. Weitman, vice president for programming and talent.

Program in San Francisco

The San Francisco reconstruction program will transform ABC's four-story Golden Gate Avenue property—acquired by the network in 1951—into studio and office space for all ABC San Francisco personnel. ABC-owned KGO-TV San Francisco will retain its current transmitter site on Mount Sutro.

Preliminary plans have been completed and final plans are expected within 60 days, officials said, for reconstruction to provide eight studios as well as office space and other quarters for KGO and KGO-TV.

DUMONT INCOME UP $2 MILLION

Freeze-lift was a big impetus to network and equipment sales, setting a record high in 1952. Substantial growth is anticipated this year because of high defense and commercial activity.

GIVEN MARKED impetus by FCC's mid-year lifting of the TV freeze, Allen B. DuMont Labs.' gross income reached a new high mark of $76,367,000 in 1952, enabling the company to record net earnings of $1,425,010 as against a $583,000 loss in 1951.

These figures are being revealed today (Monday) with the release of DuMont's 1952 annual report, signed by President Allen B. DuMont, who said that "with both defense and commercial activities at high level, we anticipate substantial growth this year, which should help our profit picture."

The report also noted that the DuMont TV network division of the company showed a 29% increase in gross billings in 1952, surpassing the $10 million level, that the number of network sponsors increased from 35 to 43 during the year, and that the number of affiliated stations went up 29% to a total of 81 [B•T, Jan. 5].

Gross For 1952

The year's gross of $76,367,000 for the overall DuMont operations compares with $50,742,000 for 1951 and an average of $32,448,000 per year for the 1946-50 period. Total costs and other deductions, including federal income tax (which amounted to $1,473,000 in 1952), amounted to $74,942,000 as compared to $51,325,000 in 1951 and an annual average of $30,055,000 for 1946-50. The year's net earnings amounted to 55 cents per share of common stock. For 1951, the comparable figure was a net loss of 30 cents per share, and the average for the 1946-50 period was $1.14 net earnings per share.

The company paid $1 in dividends per share of preferred stock during the year—the same as in prior years—and 25 cents per share of common stock, the same as in 1951 and 10 cents less than the 1946-50 average.

Working capital at the end of 1952 totaled $18,277,000. This represents a gain of more than $4 million over the $14,119,000 figure for 1951, and compares with the $8,155,000 average for 1946-50.

The report also noted that bank credits permitting the company to borrow up to $6 million until Dec. 1 of this year have been renewed, and that the company is negotiating to double its present V-loan agreement on major defense contracts from $5 million to $10 million.

Production High

Dr. DuMont said the company "ended the year with both production and sales at the highest levels in our history," with greatest improvement during the latter part of the year coincident with the lifting of FCC's freeze, which he termed the "most important contribution" to the sales rise. Lifting of credit restrictions on installment purchases also contributed to the upsurge in the company's commercial business, he noted.

He warned that, "paradoxically," the current outlook for a banner year for the industry also "makes for a very real danger" of industry overproduction. "For this reason," he said, "we have taken on a sizeable ratio of government business, which, while not so profitable, helps to balance our production schedules."

Dr. DuMont said the volume of the company's government shipments, in 1952 tripled that of the previous year, and that the firm entered 1953 with government orders on which the final shipments should represent $60 million. Government shipments this year are expected to "increase sharply," he said.

Among other research activities, stockholders were told, the company continued development of high-power uhf transmitters, with completion of a 5 kw model expected shortly.

Effect of Thaw

The freeze lift, according to the report, brought a "dynamic" response in business. Demand for cathode-ray tubes exceeded the supply, despite doubling the number of employes and putting production on a three-shift, six-day work basis. Total shipments of transmitters and associated electronic equipment almost doubled the 1951 record and exceeded 1950 figures by 480%, while new products developed during the year—including continuous-motion film scanner, mobil-mount dolly and new uhf transmitters—are expected to add "materially" to shipments in 1953.

The report said "DuMont's pioneering in closed circuit TV is meeting with outstanding acceptance and success in many new areas," and, with reference to company facilities, called attention to the DuMont network's new Tele-Center in New York City, completion of which is expected in July, and to the new 119,000-square-foot Allwood home of the Instrument Div., near Clifton, N. J. Further, it was pointed out, the company organized an International Div. during the year and set up its first wholly-owned foreign subsidiary, DuMont Television & Electronics Ltd., in Montreal.

Zenith Plugs Subscription TV

"SOME 20 million Americans will be without local TV, or deprived of TV entirely, unless subscription television is established," Zenith Radio Corp., declared in its annual report released March 9. Zenith tabbed theatre TV as the "unbeatable competitor" for home TV, and cited fight blackouts, the NCAA limited football TV program, and views of some baseball, hockey and basketball promoters over declining attendance, as well as its own surveys on Phonevision. Zenith reported 1952 record sales of $137,637,697—a 25% boost over 1951—and greater public interest in larger screen TV receivers, smaller radio sets and clock radios.

New Transistor Material

BATTELLE Memorial Institute, Columbus, Ohio, reportedly has developed a new material which it believes may replace germanium and silicon in transistors and other electronic devices. The new development combines aluminum and antimony, both of which sell for less than 50 cents per pound, contrasted with germanium at $350 per pound, it was said.

SEG, TV Film Producers Sign 'Extra' Contract

THREATENED strike of the Screen Extras Guild against Hollywood TV film producers has been averted by the signing of a new bargaining contract covering extra players in video entertainment films. Contract is subject to guild members' ratification.

Although the guild relinquished demands of repayment for re-runs of TV films, the contract gives extras playing silent "bits" a 37½% increase in day rates. There is also added compensation for appearing in telecast episodes other than the one for which they are hired originally.

Besides Roland Reed Productions and Hal Roach Productions, 13 member companies of the Alliance of Television Film Producers agreed to the SEG terms. They include William Boyd Productions, William F. Broidy Productions, Cosman Productions, Bing Crosby Enterprises Inc.; Flying A Pictures, Gross-Krasne Inc., Roy Rogers Productions, Screen Televideo, Sovereign Productions, TCA Productions, Adrian Weiss Productions, Frank Wisbar Productions and Ziv Television Programs.

In addition to raising pay from $40 to $55 per day for silent bit players, other salary adjustments include (1) general extra work per day, $18.50; (2) dress extras, dancers, skaters, swimmers, riders, special ability extras, $25; (3) stand-ins, $17.

New contract gives an extra appearing in more than one TV film in the same day (other than multiple episodes of the same series) a full day's pay for each picture worked in. It further specifies that a player in a series may work in a number of episodes of the same series in one day equal to the number of days of continuous employment, but if the number of episodes exceeds the number of days of employment the extra gets an additional half-day's pay for each of these episodes provided he is notified in advance as to how many episodes are to be worked in. If he is not notified, he receives a full day's pay for each episode.

All basic wage increases are retroactive to Sept. 17. The contract runs to Jan. 2, 1958. Both groups have the right to reopen negotiations at the start of 1954 and 1956.

Doherty Asks Amendments To Labor Management Act

A BROADCAST labor expert told the Senate and House Labor committees last week the Labor Management Relations Act should be amended to include the anti-featherbedding provisions of the Communications Act, ban secondary boycotts, permit more freedom of speech for employers, reconcile administration of welfare fund with current trends and set up adequate procedures to resolve national emergency strikes.

Richard P. Doherty, employer-employe relations vice president of NARTB and a former member of the Wage Stabilization Board, lauded the union-management record of the broadcasting industry. He said working conditions are constantly improving and that radio-TV unions always have lived up to contracts.

Mr. Doherty urged that definitions of unfair labor practices be expanded to cover work not necessary or not required.

In speaking on secondary boycotts, Mr. Doherty referred to a 1946 demand by American Federation of Musicians that networks stop supplying programs to stations designated by AFM as "unfair." He said networks have no control over station policies.

wonderfull
spot

Want to buy spots for less than in 1946? Well, the place is Memphis, and the Station is WREC—where your advertising actually costs 10% less per thousand listeners than in 1946.

Your Katz man has latest Standard Audit and Measurement Reports and Hooper Ratings that will show you how advertisers get complete coverage of both rural and metropolitan listeners with a single schedule on WREC.

Ask salesmen who travel the huge Memphis territory—ask advertisers on WREC . . . they will tell you from experience a spot on WREC is a wonderful spot in a thriving area completely covered by Memphis No. 1 Station.

NEW PORTABLE CAMERA CHAIN IN FIELD TESTS

Program Flexibility, Performance, and Ease of Maintenance Impresses WBZ-TV Engineers

In line with General Electric's continuing policy of proving-in new equipment, the recently designed and completed G-E Portable Camera Chain underwent extensive field trial tests at Station WBZ-TV, Boston.

Station engineers made particular note of the compact design, its flexibility for programming which includes corner insertion and maintenance simplicity. They also pointed out such welcome features as quick IO tube change, new cooling methods and ease of adjustment.

On a final report WBZ-TV engineers made several suggestions for further refinement that are now being incorporated in G-E's production design. In-use results from such field testing will enable General Electric to perfect and market this product with optimum performance assured. The new piece of TV equipment boasts a built-in special effects panel—the only portable camera chain on the market with this feature.

John P. Moses, Sidney U. Stadig, and Robert W. Kingman, members of WBZ-TV staff, inspect G-E Portable Camera equipment while in use.

Victor L. Laboissonniere and Garth C. E. Linder, WBZ-TV engineers, turn G-E Portable Camera Channel Chain on John Macfarlane during his weekly "Animal Fair" children's program.

Students at Nashville's Southeastern Radio and Television Institute work with the same selection of television equipment as shown here in General Electric's model Syracuse studio.

NASHVILLE OPENS SOUTH'S FIRST PROFESSIONAL TELEVISION SCHOOL

Southeastern Radio and TV Institute, the first school in the South to teach television production and engineering, was opened this month in Nashville, Tenn., using General Electric equipment exclusively.

Bailey Manthey, president of the Nashville Institute, recently said, ". . . in extending our teaching activities to the broadening field of TV, we were desirous of providing the best possible tools for our students. We checked with TV station owners and operators, and with those planning on entry into TV throughout this section, and after listening to their advice and our own careful consideration, we chose General Electric equipment for our school."

General Electric TV equipment now being used at the institute includes one film camera channel, one studio camera channel, a sync generator and other necessary auxiliary pieces of equipment needed to complete studio and film facilities. This selection of equipment is almost exactly the same as that on display for demonstration at G-E's model TV studio in Syracuse, N. Y.

The Southeastern Radio and Television Institute classes are made up of first-class engineers and production people sent to the school by Southern radio stations who have applied for TV grants. Mr. Manthey said classes for untrained personnel will begin later.

Bailey Manthey, president Southeastern Radio and TV Institute, Nashville, Tenn.

Supervisors and instructors are all from Nashville, Tenn., Station WSM-TV. They teach courses that are of a completely practical nature, including a daily television station "working schedule."

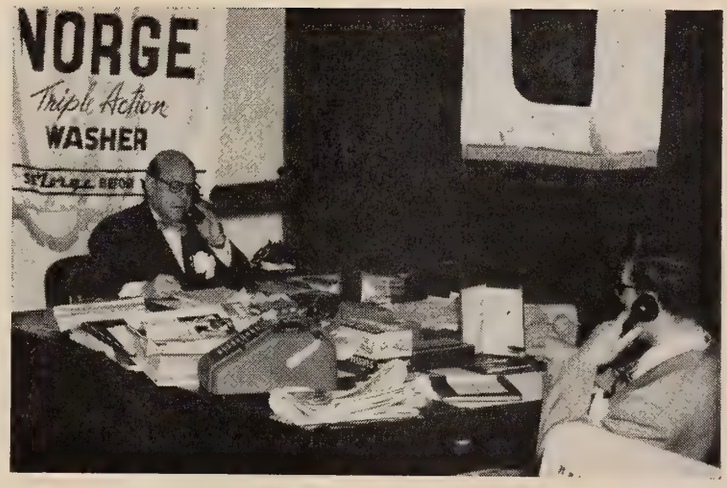
A radio success story:

MYSTERY TUNES BUILD APPLIANCE SALES

A WELL-PLANNED radio campaign in Cleveland has netted large profits for a TV and appliance dealer and for WSRS that city, where a spot schedule has grown from two per day to 100 weekly in less than one year.



Universal Television & Appliance, which also sponsors three quarter-hours of programming per week, has grown to prominence in the appliance field. It ranks now as one of the largest Norge retailers, and has consistently been one of the busiest Tele-King outlets in the area, as well as tops in both the Westinghouse and Stromberg-Carlson lines.

Universal, owned by Mort Frankel, went into business when the market was glutted with unsold appliances and dealer inventories were high—in a location where three previous appliance concerns had gone out of business. Mr. Frankel, who had spent eight years in the appliance field as a factory representative and sales manager of a distributing company, planned a one-station spot campaign built around a "mystery tune" format with Willard L. Dougherty, sales manager of WSRS.

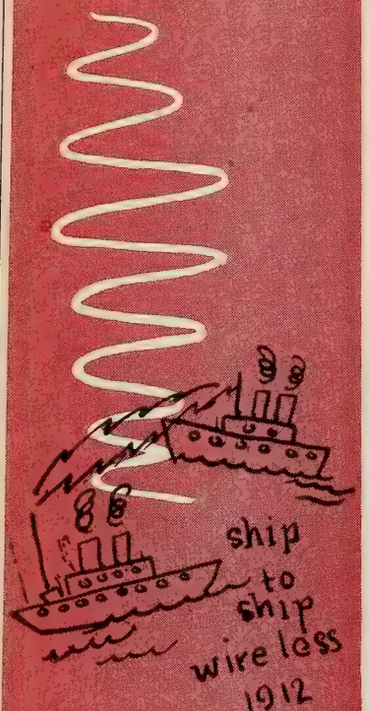
Mystery tunes were backed with copy punch, promotion stunts and special trade ideas, worked out cooperatively by the two men, in an effort to get a maximum telephone response from prospective customers. Despite audience pulls in other directions—seven competing radio stations in the metropolitan area, three television outlets and three strong daily newspapers—prospects and customers flocked to the piper of the mystery tunes.

The successful pitch is clinched into a successful sale by a stringent follow-through routine insisted upon by Mr. Frankel. Every lead and every sale is followed with a personal call in the home by one of six outside salesmen. Their external work is backed internally by a crew of four technicians and a supervisor in the appliance service department, which also operates as an individual unit and is promoted in radio spots of its own.

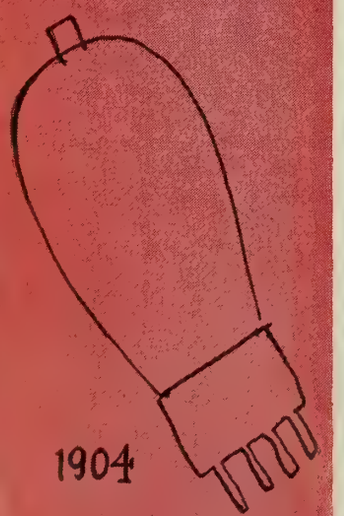
Universal uses its spots on a run-of-schedule basis, concentrating its program sponsorship, however, in a five-hour segment each afternoon beamed to WSRS' specialized audiences. These include *Lightning Bug,* from 1 to 3 p.m.; *Polka Lovers Time,* 3 to 4, and the *Bob Forster Show,* 4 to 6. Each slot is programmed selectively with music of interest to Negroes, polka fans and the general public, in that order, with all new recording releases aired on the last segment.

HERE'S how the calls roll in from listeners trying to identify the "mystery tune" that is the central gimmick in Universal's WSRS advertising. Al Frankel (l), brother of the owner of the store, and Bob Preston, Universal salesman, are shown collecting prospects.

The Universal mystery song matches the audience segment in which it is spotted, so that a polka is the tune in question when broadcast in the second time bracket. Twenty seconds of a tune are played, with listeners urged to call the sponsoring firm direct if they know the name of the song.



Each program nets between 40 and 50 calls, with spots adding another group of prospects. If tunes are identified correctly, winners receive up to $100 on a trade-in for a new appliance. The tune in each of the show segments is changed when it has lost its "pulling" power, Mr. Dougherty explained.



The follow-through, with field men pursuing leads, is in Mr. Frankel's opinion a major factor in evolving a successful radio advertising plan. The concentrated spot schedule on a single station, sandwiched in WSRS' beamed program format, has established Universal Television & Appliance as a retailer in the forefront of Cleveland's appliance trade.

OF RADIO

EVEN the most experienced radio and television executives would find it hard to answer all the questions of how these businesses came about, how they operate, what they consist of. This primer provides the answers. Keep it in your files. Some day it will come in handy if you have to write a speech or explain to a client what radio and TV are all about. It was prepared by George O. Gillingham, FCC information chief.

HISTORY OF RADIO

THE ADVENT of radio was a natural result of advances made in the fields of electricity and magnetism. In the 1860's Maxwell predicted the existence of radio waves. Hertz later demonstrated that rapid variations of electric current can be projected into space in the form of waves similar to those of light and heat. In 1895, Marconi transmitted radio signals for a short distance and, at the turn of the century, conducted successful transatlantic tests.

The first practical application of radio was for ship-to-ship and ship-to-shore wireless telegraphic communication. Marine disasters early demonstrated the speed and effectiveness of radio-telegraphy for safeguarding life and property at sea.

This new communication medium was first known as "wireless." American adoption of the term "radio" is traced to about 1912 when the Navy, feeling that "wireless" was too inclusive, adopted the word "radiotelegraph." Though the British still cling to the older term, "radio" continues to be the American designation. The word "broadcast" likewise stems from early United States naval reference to "broadcast" of orders to the fleet.

There was some military radiotelephony in World War I—between ground and planes, also between ship and shore—but most early radio communication was confined to ships at sea, and to amateurs. The latter were highly instrumental in arousing popular interest in radio and otherwise contributing to its progress.

Radio broadcasting as we know it today was largely made possible by development of the vacuum tube by Fleming in 1904, and its improvement by De Forest in 1906.

The first voice broadcast is a subject for debate. Claims to that distinction range from "Hello, Rainey" said to have been wafted from Stubblefield to a partner in a demonstration near Murray, Ky., in 1892, to an impromptu program from Brant Rock, Mass., by Fessenden in 1906, which was picked up by nearby ships.

There were other early experimental audio transmissions—such as De Forest putting the singer Caruso on the air in 1910 and transatlantic voice tests by the Navy station at Arlington, Va., in 1915—but it was not until after World War I that regular broadcasting began. But here, too, there is controversy. In 1919, station WHA of the University of Wisconsin was transmitting weather and market reports. A Detroit experimental station, which later became WWJ, claimed to have started daily programs on July 7, 1920. However, records of the Department of Commerce, which first supervised radio show KDKA Pittsburgh, as the first commercially licensed standard AM (amplitude modulation) broadcast station, dating from November 1920.

Other AM stations on the air by 1921 were WJZ Newark, N. J.; WRR Dallas; WBZ Springfield, Mass.; WDY Roselle Park, N. J.; WCJ New Haven; KQL Los Angeles; KQV Pittsburgh; WJX New York, and KYW Chicago. They were joined by many stations the following year.

There was experimental network operation over telephone lines as early as 1922. In that year, WJZ, now New York, and WGY Schenectady, broadcast the world series. Early in 1932 WEAF New York and WNAC Boston, picked up a football game from Chicago. Later that same year WEAF and WGY were connected with KDKA Pittsburgh and KYW Chicago to carry talks made at a dinner in New York. President Coolidge's message to Congress was broadcast by six stations in December of 1923. In 1926 the National Broadcasting Co. started the first regular network with 24 stations. Its first coast-to-coast hookup, in 1927, broadcast a football game. In the latter year the Columbia Broadcasting System was organized. The first round-the-world broadcast was made from Schenectady in 1930. Today, thanks to telephone lines, coaxial cable, microwave and other relay facilities, it is possible to send the same program over many stations at the same time.

FM (frequency modulation) and TV (television) broadcast emerged from their experimental stage just before World War II. Wartime restrictions retarded normal expansion of radio facilities but that emergency produced new techniques and apparatus which have invaluable peacetime application.

Regular broadcasting did not develop until after World War I. In 1919 broadcasters were classified as "limited commercial stations." In 1922 the "wavelength" of 360

& TELEVISION

meters (approximately 830 kilocycles) was assigned for the transmission of "important news items, entertainment, lectures, sermons, and similar matter." Stations engaged in this service, also their operators, were licensed by the Department of Commerce.

Recommendations of the First National Radio Conference, held at Washington in 1922, resulted in further regulations by the Secretary of Commerce. A new type of broadcast station came into being, with minimum power of 500 watts and maximum not to exceed 1000 watts. Two frequencies (750 and 833 kilocycles) were assigned for program transmission.

So rapid was the development of broadcasting that, upon recommendation of subsequent National Radio Conferences (1923 and 1924), the Department of Commerce allocated the present standard broadcast band (AM being the only form of broadcast at that time), and authorized power up to 5000 watts for experimental use.

Increase in the number of broadcast stations caused so much interference that, in 1925, a Fourth National Radio Conference asked for a limitation on broadcast time and power. The Secretary of Commerce was unable to deal with the situation because court decisions held that the Radio Act of 1912 did not give him this authority. As a result, many broadcasters jumped their frequencies and increased their power and operating time at will, regardless of the effect on other stations. This caused bedlam on the air.

In 1926 President Coolidge urged Congress to remedy matters. The result was the Dill-White Radio Act of 1927.

Federal Radio Commission

The Radio Act of 1927 created a five-member Federal Radio Commission to have certain regulatory powers over radio in general, including the issuance of station licenses, the allocation of frequency bands to various services, assignment of specified frequencies to individual stations, and control of station power.

Moreover, the same act also delegated to the Secretary of Commerce authority to inspect radio stations, to examine and license radio operators, and to assign radio call signals.

Much of the early activity of the Federal Radio Commission was devoted to straightening out the confusion in the broadcast band. It was impossible to care for the 732 broadcast stations as then operating. New rules and regulations caused about 150 of them to surrender their licenses.

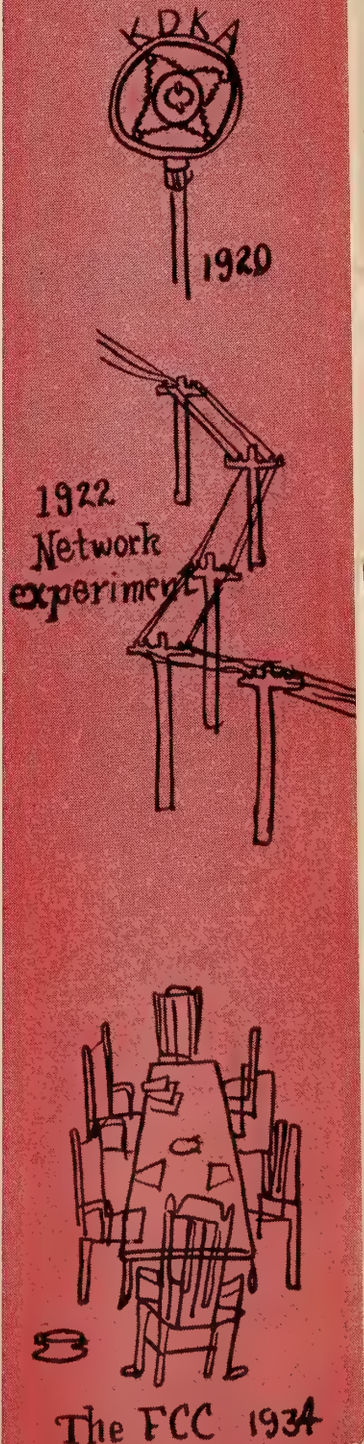
THE FCC

At the request of President Roosevelt, the Secretary of Commerce in 1933 appointed an interdepartmental committee to study the overall interstate and international electrical communications situation. The committee reported that "the communications service, as far as Congressional action is involved, should be regulated by a single body". Accordingly, it recommended the establishment of a new agency which would regulate all interstate and foreign communication by wire and radio, including telegraph, telephone and broadcast. The resultant Communications Act of 1934 created the present Federal Communications Commission.

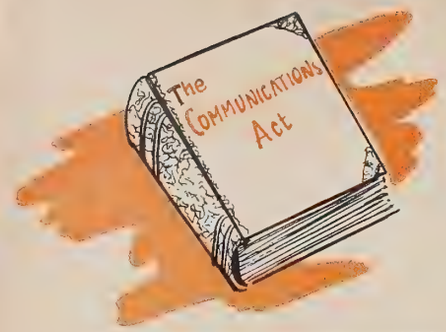
The Communications Act coordinated in the Federal Communications Commission broadcast regulatory functions previously exercised by the Federal Radio Commission; supervision of certain telegraph and telephone operations formerly vested in the Interstate Commerce Commission, jurisdiction over Government telegraph rates which had been under the Post Office Department, and some powers of the Department of State with respect to the Cable Landing License Act. The Communications Act gave the Federal Communications Commission additional authority, including supervision of rates of interstate and international common carriers, and domestic administration of international agreements relating to electrical communication generally.

The Federal Communications Commission began to function on July 11, 1934. It is composed of seven Commissioners appointed by the President, subject to confirmation by the Senate. One of the Commissioners is designed Chairman by the President. Not more than four Commissioners may be members of the same political party. The normal term of a Commissioner is seven years with the termination dates staggered so that only one new Commissioner will be appointed each year.

The authority of the Commission extends to United States territories and possessions, but not to the Canal Zone.



FCC Regulation



One of the major activities of the Federal Communications Commission is the general regulation of broadcasting—now visual as well as aural. This regulation, largely technical in nature, may be divided into two phases.

The first phase deals with the allocation of spectrum space to the different types of broadcast services in accordance with Commission policies and rules to carry out the intent of international agreements, the Communications Act, and other domestic laws affecting broadcasting.

The second phase is concerned more directly with individual stations, and embraces consideration of applications to build and operate; the assignment of specific frequencies, power, time of operation and call letters; the periodic inspection of equipment and the engineering aspects of operation; passing upon transfers and assignments of facilities; also the many varied changes in existing authorizations; modifying and renewing construction permits and licenses; reviewing the past general service of each particular station to determine whether it has been operating in the public interest; licensing radio operators, and otherwise discharging domestic regulatory responsibilities.

The Communciations Act, in providing for the licensing and control of radio, prohibits unauthorized transmission. Since radio waves know no state boundaries, courts have held that operation of any

radio transmitter anywhere within the United States or its possessions requires the licensing and regulation of both the apparatus and its operator by the Federal Communications Commission.

The Communications Act defines broadcasting as a radio communication service intended for general public reception. Consequently, broadcast of material addressed to or intended to be received by specific individuals rather than by the listening public is contrary to the terms of a broadcast license. This limitation applies equally to all forms of broadcasting, including television.

Broadcast stations are licensed to serve the public interest, convenience and necessity. Because radio channels are limited and are a part of the public domain, it is important that they be entrusted to licensees who have a high sense of public responsibility.

Licensee Qualifications

The Communications Act sets up certain basic requirements which must be met by broadcast applicants. In general, applicants must be legally, technically and financially qualified, and show that their proposed operation will be in the public interest.

The license privilege is limited by the Communications Act to citizens of the United States. It is denied to corporations wherein any officer or director is an alien or of which more than one-fifth of the capital stock is owned or voted by aliens or their representatives or by any controlling foreign corporation or government or their representatives.

The Commission can issue cease and desist orders and institute revocation proceedings for violations of the act and its rules and regulations. The affected permittee or licensee is afforded opportunity to request a hearing.

Programs.—Under the Communications Act, it is the responsibility of each broadcast station licensee to arrange his program structure so that his operations will be in the public interest. Pursuant to duties imposed by the act, the Commission periodically reviews the overall performance of stations, usually when they apply for renewal of licenses, to determine whether they have lived up to their obligations, and the promises they made in applying for facilities.

Censorship and free speech.—This review of broadcast station performance does not, however, give the Commission authority to direct a station to put a particular program on or off the air. The Communications Act states: "Nothing in this Act shall be understood or construed to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication". The Commission has held that freedom of speech on the radio must be broad enough to provide full and equal opportunity for the presentation of both sides of public issues. Under such conditions, licensees of broadcast stations have the right to editorialize.

Political broadcasts.—The Communications Act expressly provides: "If any licensee shall permit any person who is a legally qualified candidate for any public office to use a broadcasting station, he shall afford equal opportunities to all other such candidates for that office in the use of such broadcasting station: Provided, that such licensee shall have no power of censorship over the material broadcast under the provisions of this section. No obligation is hereby imposed upon any licensee to allow the use of its station by any such candidiate. The charges made for the use of any broadcasting station for any of the purposes set forth in this section shall not exceed the charges made for comparable use of such station for other purposes."

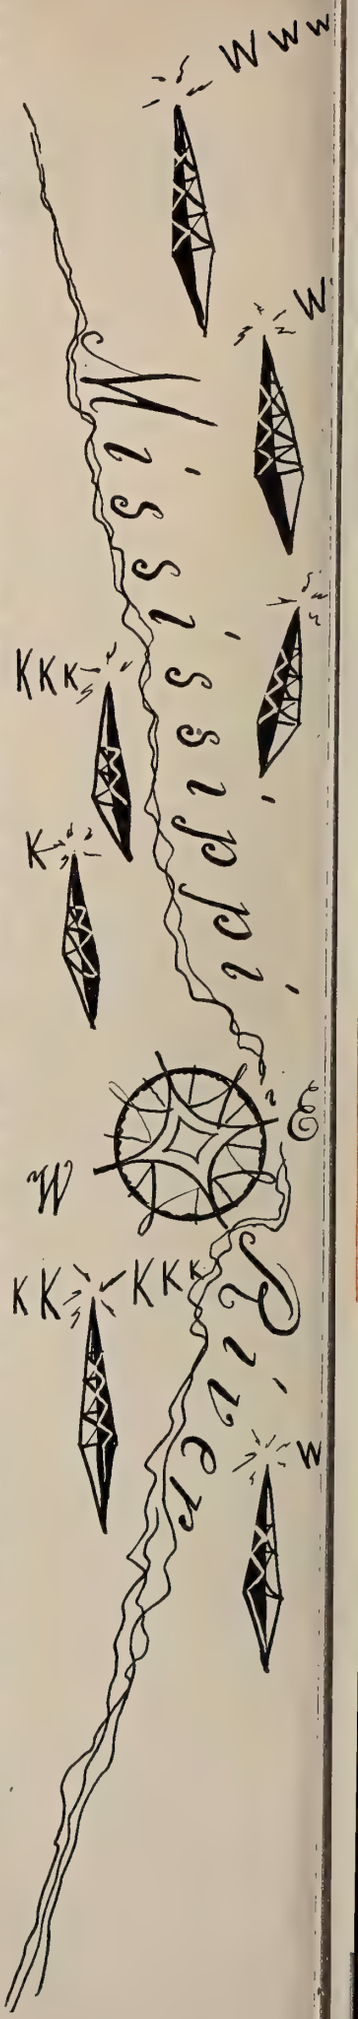
Lotteries, obscenity and fraud.—The United States Criminal Code prohibits broadcast of information concerning "any lottery, gift enterprise, or similar scheme", also utterance of obscene, indecent or profane language, and fraud by wire, radio or television.

Time charges and station management.—The Communications Act declares that broadcasting is not a common carrier operation; consequently a broadcast station is not required to sell or to give time to all who seek to go on the air. Because programming is primarily the responsibility of broadcast station licensees, the Commission does not ordinarily monitor or pass upon individual programs, or require the filing of radio scripts. However, broadcast stations are required to keep a program log and a technical log, and a record of all requests for political broadcast time. The Commission does not maintain surveillance of the day-by-day internal management of broadcast stations.

Networks.—The Commission does not license networks as such, but issues licensees to individual stations. However, stations are subject to the chain broadcasting regulations adopted by the Commission in 1941 to insure free competition in broadcasting.

Monopoly.—There is Commission prohibition against the same interest or group from operating more than one network, or more than one AM, FM or TV station in the same area, or more than six FM stations or five TV stations throughout the country as a whole. Certain Commission rules with respect to chain broadcasting (mentioned under "Network") were promulgated to insure that the licensees of stations affiliated with networks do not surrender control of the day-by-day operation of their stations to the networks. Persons whose licenses have been revoked by a court for anti-trust violations are by law denied further authorizations by the Commission.

Call letters. — International agreement provides for the national identification of a radio station by the first letter or first two letters of its assigned call signal, and for this purpose apportions the alphabet among different nations. United States stations use the initial letters K, N and W, exclusively, and part of the A series. Except for blocks of call signals assigned to the Government, call signals are assigned by the Commission upon an individual basis. The initial letter N is generally reserved for the Navy and Coast Guard, whereas the letters A, K and W are shared by other stations, both Government and non-Government.

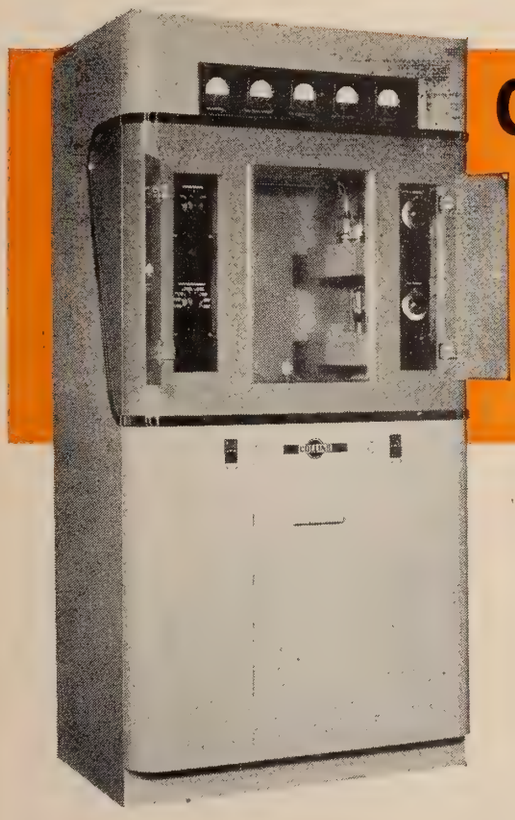


Broadcast stations are assigned call letters beginning with K or W. Generally speaking, those begining with K are assigned to stations west of the Mississippi River and in the territories and possessions, while W is assigned to broadcast stations east of the Mississippi.

Since many AM broadcast licensees also operate FM and TV stations, a common practice is to authorize the use of the call letters of the AM station followed by a dash and "FM" or "TV", as the case may be.

During radio's infancy, most of the broadcast stations were in the East. As inland stations developed, the Mississippi River was made the dividing line of K and W calls. KDKA Pittsburgh was assigned the K letter before the present system was put into effect.

When radio first gained popularity, the demand for call letters having a special significance reached its climax in the Detroit Police Department selecting KOP. This brought a flood of requests for call letters embodying the initials of places, names or slogans. Thus, WRC became the Washington station of the Radio Corporation; WGN was selected by the Chicago *Tribune* because of its slogan, "World's Greatest Newspaper,"; WCCO by the Washburn Crosby Co., Minneapolis, and WACO by the Texas city of that name. WMCA started in the Hotel McAlpin, New York; WNEW took its name from the New York Daily News; WINS, New York, from the International News Service, and WLIB, New York, from its slogan, "The Voice of Liberty"; and WNYC is operated by New York City.



WCFL bears the initials of the

For ailing AM signals

COLLINS 300J 250W TRANSMITTER

PREMIUM PERFORMANCE
Guaranteed by advanced engineering research and design.

ASSURED DEPENDABILITY
Simplified circuitry and control system.

MAXIMUM ECONOMY
Lower initial, maintenance and operating cost.

For premium performance at 250 watts, or for standby use, the Collins 300J Broadcast Transmitter offers maximum quality at minimum cost. Lower *initial* cost . . . lower operating and maintenance costs, plus great dependability make the 300J your best buy in a 250 watt transmitter.

Tuning and operating controls are conveniently located on the front. Blower cooled tubes, oversized components, and all terminals are quickly accessible from the rear. All tubes are visible at a glance.

Collins can serve your broadcasting needs best. Write today for complete details and descriptive literature.

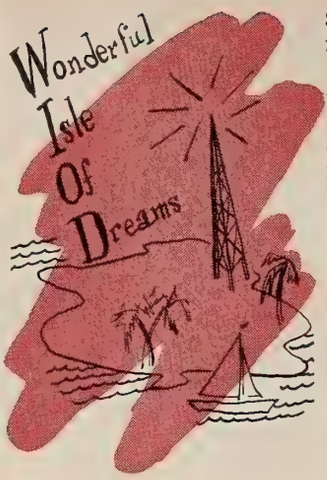
Chicago Federation of Labor; WEVD, New York, identifies the (E.V.) Debs Memorial Radio Fund; and WCBS and WNBC New York, incorporate the initials of the Columbia Broadcasting System and the National Broadcasting Co., respectively.

Other broadcast station calls honor individuals. Examples are KFDR Grand Coulee, Wash., initialed for President Franklin D. Roosevelt; WJJD Chicago, for Senator James J. Davis; WMMN Fairmont, W. Va., for Sentor Matthew M. Neely; WABD New York, for Allen B. DuMont; WTTG Washington, for Thomas T. Goldsmith, DuMont engineer, and WRGB(TV) Schenectady, N. Y., for Dr. W. R. G. Baker of the General Electric Co.

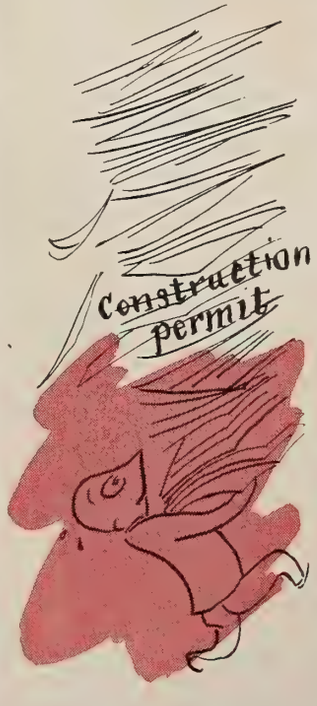
Many stations use calls indicative of their local areas. WFTW Fort Wayne is typical. Others refer to slogans. WIOD Miami typifies "Wonderful Isle of Dreams", and KAGH Crossett, Ark., stands for "Keep Arkansas Green Home".

KXGI Richmond was licensed to ex-G.I.s. In Washington, WTOP signifies "Top of the Dial"; WGMS, "Washington's Good Music Station", and WCFM, "Washington's Cooperative Frequency Modulation Station".



Radio operators.—The law requires the Commission to approve operators of radio transmitting apparatus as well as the stations. Accordingly the Commission prescribes the kinds and classes of radio operators and the technical and other qualifications which they must possess in order to be licensed.

Policing the ether.—Regulation of radio transmission is necessary to prevent confusion on the air. Because stations are identified by call signals and, further, are assigned channels for their emissions to travel in, any strange signal may be noted by one or several of the Commission's monitoring stations which patrol the radio spectrum 24 hours a day. The direction-finders operated at these stations are of such a type that a bearing is obtained even though a transmission may be intermittent.



At each radio district headquarters, special cars are maintained. Some of the are equipped with all-wave receivers and antenna which can be operated from the car's battery while the vehicle is in motion. Sometimes it is necessary to observe an illicit station over a period of time. In such cases the receiver can be removed from the car and connected with the power supply in a building or other place selected as a base of operation.

With several portable receivers covering an area, it is then possible to "fix" the general location of the illegal station. This procedure involves the same triangulation method used in determining the position of ships at sea.

Serious cases of unlawful operation are referred to local United States District Attorneys for prosecution. The Communications Act prescribes a maximum penalty of $10,000 fine or two years imprisonment, or both, for offenders.

Besides tracing illegal operation, the field staff inspect all classes of stations, investigates interference complaints, monitors transmissions for adherence to assigned frequencies and quality of emission, examines operators for various classes of licenses, participates in technical studies, and furnishes bearing to ships or aircraft in distress.

Application Procedure

The application procedure is substantially the same for all classes of broadcast stations. Application is made in triplicate on forms furnished by the Commission. These forms require information as to the citizenship and character of the applicant as well as his financial, technical and other qualifications to construct and operate a station, plus details about his proposed service. Applicants must themselves determine the availability of a frequency under appropriate Commission rules for the type (AM, FM or TV) and class (local, etc.) of stations they propose. If there are no interference or other problems which require a hearing, and if the Commission determines that a grant will serve the public interest, a construction permit is issued. Upon completion of construction, application is made for a regular license.

The Communications Act provides that the Commission normally may grant construction permits and station licenses, or modifications or renewals thereof, upon written application only. Consequently, a large portion of the Commission's broadcast work involves the processing of applications by existing and prospective broadcasters. A brief description of the chief types of applications follows:

Construction permit.—A person seeking a new station must first file an application for a "construction permit." If the grant is made subject to certain engineering or other conditions, he may be required to file an application for "modification of construction permit" to meet these conditions. If this application is approved, he may then proceed to build the station. A permittee normally has two months in which to start construction and six more months in which to complete it (or eight months in all), but extensions of time may be granted upon filing an application with adequate showing of need. Under the act, no license can be issued for a station unless a permit for construction has been granted by the commission.

License.—After equipment tests, the holder of a construction permit applies for the actual "license". He must show compliance with all terms, conditions and obligations set forth in the application and the outstanding construction permit. After applying for a license, the holder of a construction permit may request specific Commission authorization to conduct program tests pending receipt of his license. Station licenses do not vest in the holder any right to operate beyond the term of the authorization, nor in any manner other than specified therein.

Renewal.—Under the Communications Act, broadcast licenses may not be granted for a longer period than three years. At present, both AM and FM licenses are issued for the maximum statutory period, whereas TV stations (because of that service's relative newness) are licensed for one year. In 1951, all broadcast license renewals were put on a geographical basis so that the licenses of stations located in contiguous areas would expire at the same time. Pending final decision on any regular renewal application, the license of the station is continued in effect.

Change in facility.—If a permittee desires to change locality, increase power, shift to another frequency, etc., he applies for "modification" of his construction permit. A licensee wishing to change facilities may sometimes file for a modification of license but more often he has to ask for a new construction permit. (Any station authorization may be modified by the Commission in the public interest after affording the holder an opportunity for a hearing.)

Transfer of control.—Another common type of broadcast application is for "assignment" of construction permit or license, or "transfer of control". This arises from provisions of the act which prohibit such changes without prior consent of the Commission.

Any grant made by the Commission without a hearing is subject to protest within a period of 30 days, during which the protesting party may request a hearing. Within 15 days thereafter the Commission must determine whether the objection merits a hearing.

Hearings.—Where it appears that interference would be caused to another station beyond the degree prescribed in the Commission's rules, regulations and standards, or if other serious questions are involved, a hearing is usually required before a determination can be made. A hearing is also necessary where two or more applicants for stations in the same community request the same frequency or channel.

If unable to grant an application, the Commission is required to notify the applicant and other known parties of interest as to the reason. The applicant is normally given 30 days in which to reply. After that, if the Commission is still unable to make a grant, a hearing is ordered.

Hearings are customarily conducted by an examiner. He has authority to administer oaths, examine witnesses and rule upon the admission of evidence.

Within 20 days after the close of

a hearing before an examiner, each party and the chief of the Broadcast Bureau has the privilege of filing proposed findings of fact and conclusions. After review of the evidence and statements, the hearing examiner issues an initial decision.

The applicant or any other interested party has 20 days from the date the initial decision is announced to file exceptions and to request oral argument before the Commission. After oral argument, the Commission may adopt, modify or reverse the initial decision. Within 30 days thereafter, any party involved may petition for rehearing.

If no exceptions are filed, and the Commission does not initiate a review of the initial decision, the latter becomes effective 40 days after its issuance.

Commission actions in granting or refusing applications for licenses can be reviewed by the United States Courts of Appeals. Parties may further request the Supreme Court of the United States to review decisions of these courts.

RADIO SPECTRUM

Radio operation is confined to a comparatively small part of what is known as the electromagnetic spectrum. The latter embraces many kinds of radiant energy, ranging from sub-audible frequencies used for power to the frequencies of cosmic rays, and arranged progressively according to their respective frequencies.

Before World War II, the usable portion of the radio spectrum was limited to between 10 kilocycles and 300 megacycles. However, developments made it possible, in 1945, to extend the potentially useful radio spectrum to 30,000 megacycles (30,000,000 kilocycles).

For convenience, the radio spectrum below 30 kilocycles is known as the VLF (Very Low Frequency) range; from 30 to 300 kilocycles, LF (Low Frequency); from 300 to 3000 kilocycles, MF (Medium Frequency); 3000 to 30,000 kilocycles, HF (High Frequency); 30,000 kilocycles to 300 megacycles, VHF (Very High Frequency); 300 to 3000 megacycles, UHF (Ultra High Frequency); 3000 to 30,000 megacycles, SHF (Super High Frequency); and 30,000 to 300,000 megacycles, EHF (Extremely High Frequency).

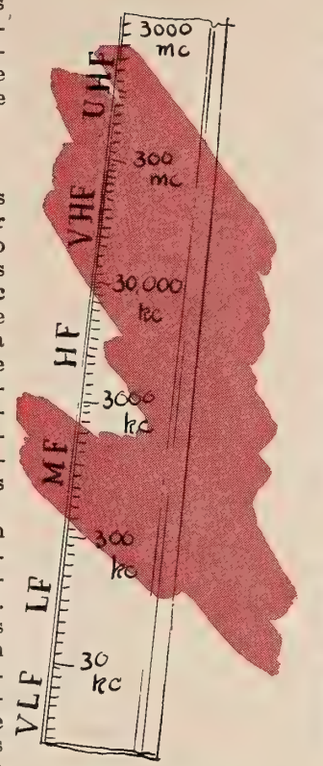
However, for practical purposes, the present ceiling for commercial utilization is around 10,000 megacycles (10,000,000 kilocycles). The demand for frequencies far exceeds the available supply.

The radio spectrum might be compared to a vertical ruler with inches or fractions of inches marking off, but in irregular fashion, the relative positions of the different radio services. At the lower part of the ruler are radio aids to air and sea navigation, followed, in turn, by AM broadcasting, long distance communication, FM and TV broadcasting, developmental services, radar and other aids, and experimental operation. Sandwiched in between are segments for various other Government and non-Government services. Thus, the AM broadcast band, for example, is only one thirty-thousandth of the entire known radio spectrum.

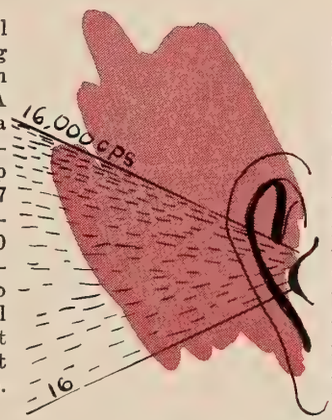
Radio Waves

The radio spectrum contains those waves which can be used for communication purposes. Radio waves, like waves of water, waves of sound and waves of electric current, travel in "cycles." The time it takes for a wave to complete a cycle determines what is called the "frequency" of the wave. For example, the electrical waves of alternating house current have a frequency of 60 cycles per second—that is to say, 60 complete waves occur every 60 seconds.

The distance and manner in which a particular radio wave travels depend in large part upon the frequency with which it is transmitted. Radio waves of certain frequencies travel great distances—they span the ocean, even circle the globe. Radio waves of some other frequencies do not go much beyond the horizon. And some radio waves can be obstructed by buildings, even rain.



Hearing differs, but the normal human ear is capable of registering sounds ranging in frequency from 16 to 16,000 cycles a second. A certain type of dog whistle emits a tone which cannot be heard by humans. A piano keyboard sets up fundamental vibrations of from 27 to 4,000 cycles, and produces overtones extending up to around 16,000 cycles. Aural broadcast transmission and reception can be made to cover all or any part of the tonal range which the ear can discern, but generally is limited by equipment design to less than the entire range.



Bands & Frequencies

It is customary to speak of the spectrum space occupied by each radio service as a "band," meaning the group of frequencies in a particular region of the spectrum allocated for the use of a specified service. These bands are further broken down into "channels" which are, in effect, the traffic lanes assigned for the transmissions of individual stations.

Within these channels each station operates on a designated "frequency" which, as previously noted, means that it transmits so many waves per second. Frequencies are measured by "kilocycles" and "megacycles," which are the convenient markings on a receiving set dial. "Kilo" means 1,000, and "cycle" refers to a complete swing of an electric vibration. Thus, a kilocycle is an easy way of denoting a thousand of these vibrations or oscillations a second. A megacycle is equvalent to 1,000 kilocycles. So, with a receiving set capable of tuning in a particular band, it is easy to adjust the dial to the frequency of any station operating within that band.

In a sense, these radio paths may be compared to land highways. A radio emission travels the spectrum route with identifying call signals akin to the license plates of an automobile speeding over a roadway. Each must keep within a prescribed lane to keep from colliding with traffic in adjacent lanes. A radio channel can be used by a number of stations in the same kind of service if the stations are far enough apart or use directional antennas.

However, not all channels are the same width. Some types of transmission require wider paths than others. Thus, an FM broadcast station needs a channel 20 times wider than that used by an AM station, while a TV station requires about 600 times the spectrum space occupied by an AM station.

Frequency Allocations

A fundamental task of the Federal Communications Commission is to allocate the radio spectrum to the various radio services and to write the rules and regulations to govern the operation of stations in these services on the particular frequencies that are assigned to them.

It would be wasteful and chaotic to attempt to operate a broadcast station on one frequency and, say, a police radio station and a ship radio station on adjacent frequencies. There must be respective bands of frequencies for the some 60 radio services with which the Commission deals, and within these bands assignments of particular frequencies must be made to individual stations. Thus, frequency "allocation" refers to setting up bands of frequencies for the use of the various radio services, while frequency "assignment" pertains to assigning a specific frequency for use by a particular station.

Frequency allocation is a complex subject. It may, in brief, be likened to building communication highways in the spectrum. In ordinary road building there is a wide choice of land routes. However, most of the usable radio lanes are already crowded and, unlike land traffic, radio transmissions do not obey traffic signals to allow other traffic to pass, or go just to the point where they are to be heard. They spread out to thousands of other points as well, crossing political and geographical boundary lines in all directions.

As the spectrum becomes more congested, interference grows in seriousness. It can come not only from domestic stations, but also from foreign stations. That is why mutual working arrangements between nations to handle radio's expanded usage is necessary.

The international aspect of radio has developed to such an extent that almost no major frequency allocation can be made without considering international usage. Hence, the primary allocation of frequencies is now determined by international treaty or other agreement. In this connection, the Federal Communi-

cations Commission is called upon by the Department of State to do a large share of the preparatory work for international radio conferences, and to furnish a large proportion of United States delegates and advisers to these conferences.

BROADCAST OPERATION

At some time or other you have observed, from a distance, a gun being fired. You noticed that the sound of the explosion reached your ears after you witnessed the actual flash. Yet it is possible for a person at a receiving set to hear a sound broadcast from miles away before a person can hear it over a loudspeaker in the same room where the actual broadcast takes place.

This is because radio travels with the speed of light—186,000 miles a second—as compared with only about 1,100 feet a second for sound. Thus, it requires just about one-sixtieth of a second for a voice from Europe to be electrically wafted to your home receiving set.

Without being too technical, here is how an aural (AM or FM) broadcast station works:

A person talks into a microphone as if it were a telephone. His voice sets up vibrations of varying intensity and frequency. The lower the pitch the slower the vibration.

In the microphone these vibrations are converted into electrical impulses like those in the originating sound. They are sent over wires to the transmitting station (usually some miles distant), or by leased telephone lines to other radio stations carrying the same broadcast.

At the transmitting station the electrical vibrations are greatly amplified — sometimes millions of times—before being put on the "carrier" wave. The intensity and frequency of the carrier wave are constant and this wave, by itself, does not transmit music or speech. So it is varied to correspond with the fluctuations of the speech or music received at the microphone. This is called "modulation."

In AM broadcast the audio waves are impressed on the carrier wave in a manner to cause its amplitude (or power) to vary with the audio waves. This is known as "amplitude modulation." In "frequency modulation" (FM), the amplitude remains unchanged but the frequency is varied. (Television, which uses AM for its visual transmission and FM for its sound, is discussed elsewhere in this primer.)

These modulated waves speed from the antenna tower as invisible ripples, radiating in various directions. Some of them follow the contour of the ground and are called "ground waves." Others dart upward and are called "skywaves." Skywaves are often forced back to earth by a ceiling of electrical particles which science calls the ionosphere. This rebound gives the listener a choice of more distant AM stations at night. Daytime reception is largely dependent upon ground waves.

Radio waves used in broadcast may pass through buildings and other objects but are subject to absorption and interference. As in the case of ripples on water, radio vibrations weaken with distance. Seasonal disturbances and sunspot periods can throw them off their course and cause "freak" reception.

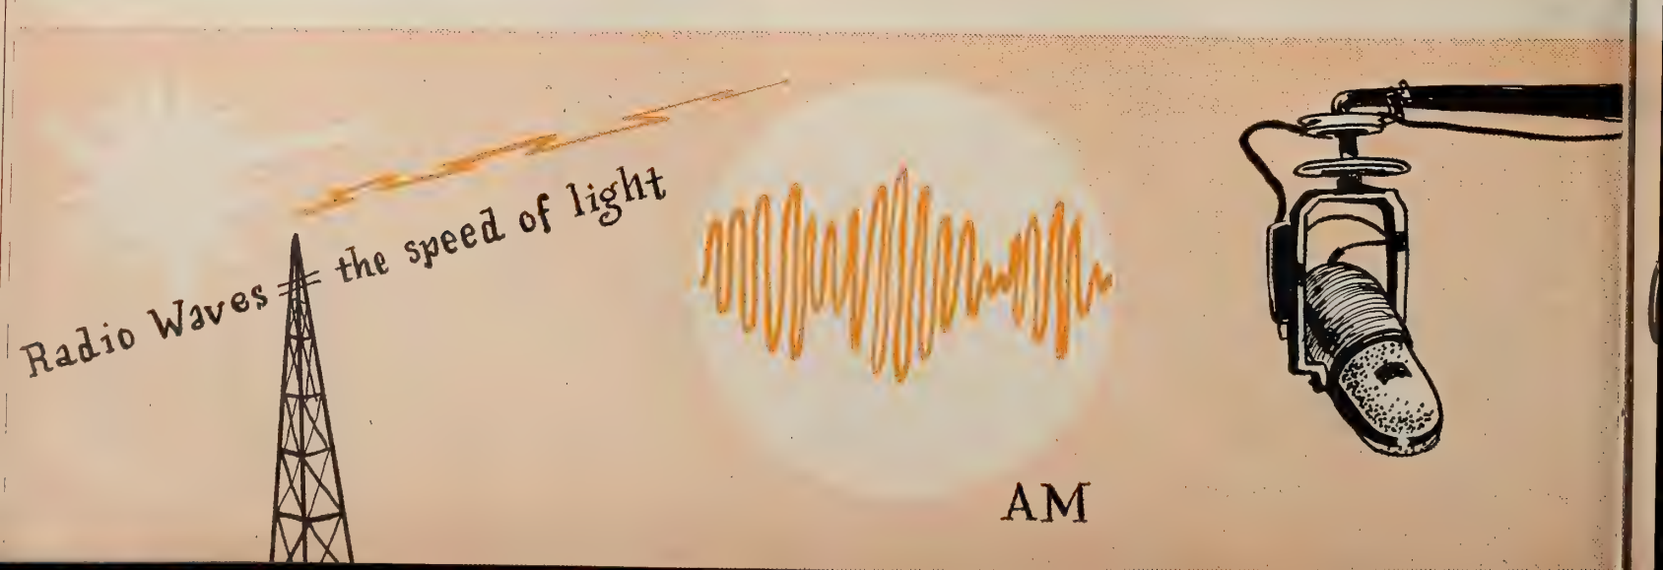
AM broadcast stations use "medium waves." That is to say, they transmit 550,000 to 1,600,000 waves a second. At 550,000 waves a second, the distance between the crests is approximately 1,800 feet. This is known as "wave length." A station transmitting 550,000 waves a second is said to have a "frequency" of 550,000 cycles or 550 kilocycles.

The so-called "short-wave" broadcast stations transmit from from 6,000,000 to 25,000,000 waves per second. These waves are sent out one after another so rapidly that the distance between their crests (wave length) is only about 37 to 150 feet.

The modulated radio wave from the radio station is picked up by the home receiving antenna (exterior or set-inclosed). In other words, the wave sets up in the receiving antenna a current having the same frequency characteristics as the one transmitted. In the receiver the audio and carrier waves are separated by a device called a detector or demodulator. The carrier wave, no longer needed, is dissipated while the audio wave is relayed to the loud speaker, or headset, where it is transformed back into the sound that you hear.

Relay Broadcast

Relay broadcast depends largely upon common carrier interconnecting facilities. Most live-talent AM network programs are sent over wires, many across the continent, for rebroadcast. AM and FM stations also use transcriptions (recordings), and TV stations show many films. Broadcast stations usually employ wire connections between studios and transmitters, but some use radio (see "Auxiliary Broadcast Services").



Besides being transmitted over telephone lines, both AM and FM (and to some extent, TV) programs can be picked out of the air for rebroadcast. All broadcast can be relayed by microwave or coaxial cable systems. Because of its characteristics, TV cannot be sent over ordinary wire lines for any great distance but must depend upon coaxial cable or microwave relay, which can also handle AM and FM transmission, as well as telephone, telegraph and facsimile communication.

Coaxial cable had its first experimental operation between New York and Philadelphia in 1936. Commercial service was inaugurated between Milwaukee and Stevens Point, Wis., in 1941. The American Telephone and Telegraph Co. (Bell Telephone System) operates a transcontinental coaxial cable and microwave system which was put into operation in 1951.

Besides containing wires for regular telephone and telegraph communication, certain cables embody two to four pairs of coaxial copper tubes, with a special wire centrally located in each, for TV relay. The center wire is held in place by thin slotted disks spaced throughout the tubing. The latter is slightly thicker than a lead pencil. Only one TV program can be sent over a tube at a time.

Microwave is a means of transmitting visual and aural broadcast programs; also other types of communication, simultaneously, over the air. This is accomplished by a chain of relay stations spaced 20 to 50 miles apart which, in effect, beam from one to another. Static and man-made noise is at a minimum on the frequencies employed for microwave operation.

Various communications interests

operate microwave facilities. Those of the Bell System tie in with its coaxial cable system.

Directional Antennas

Directional antennas are devices which enable radio stations to control their service patterns. As broadcast stations began to multiply on shared channels, it became necessary to employ directional antennas to prevent interference. Since 1937, directional antennas have been one factor in helping new stations squeeze into the congested AM broadcast band. Hundreds of directional antennas are utilized by AM stations. One complex array includes 10 towers. Directional antennas are used also in international communications to beam transmissions to particular points.

TYPES OF STATIONS

In 1952 there were nearly 5,000 broadcast stations in 11 categories. The three principal commercial broadcast services are the older AM (amplitude modulation); the newer FM (frequency modulation) type of high-fidelity and static-free broadcasting, and TV (television), also known as video. In addition, there are noncommercial educational FM and TV and international broadcast facilities; remote pickup and studio links, TV auxiliary service, and experimental and developmental broadcast stations.

The growth of the AM, FM and TV commercial broadcast services since 1943 is shown in the following table of statistics for the close of the fiscal years indicated:

	AM		FM		TV		Total	
	Authorized	Licensed	Authorized	Licensed	Authorized	Licensed	Authorized	Licensed
1943	912	911	48	37	6	6	966	954
1944	924	912	52	45	9	6	985	963
1945	955	931	53	46	25	6	1,033	983
1946	1,215	961	456	48	30	6	1,701	1,015
1947	1,795	1,298	918	48	66	6	2,779	1,352
1948	2,034	1,693	1,020	142	109	7	3,163	1,842
1949	2,179	1,963	865	377	117	13	3,161	2,353
1950	2,303	2,118	732	493	109	47	3,144	2,658
1951	2,385	2,248	659	534	109	81	3,153	2,863
1952	2,420	2,333	648	582	108	96	3,176	3,011

AM BROADCAST

Amplitude modulation (AM) is the oldest system of program transmission (see early history under chapter on "Evolution of Broadcasting," also description of operation in "Broadcast Operation"). Besides being used in the standard broadcast band, it is also employed in most long-distance shortwave broadcast as well as for the visual part of TV programs.

The 535 to 1605 kilocycles portion of the radio spectrum is used for standard AM broadcast. This pioneer service started operation on the lower frequencies and, as a result, has continued to occupy the band in which it developed.

The AM broadcast band consists of 107 channels, each 10 kilocycles in width. Individual stations are assigned to frequencies in the center of each channel, such as 540 kilocycles, 550 kilocycles, etc.

AM broadcast stations use power of from 100 watts up to 50 kilowatts (50,000 watts). The latter is the present maximum power prescribed by the Commission for this service.

Classes of AM Stations

There are four classes of AM stations.

A Class I station operates on a "clear" channel (see later explanation), and employs 10,000, 25,000 or 50,000 watts power to serve remote rural areas as well as a large center of population.

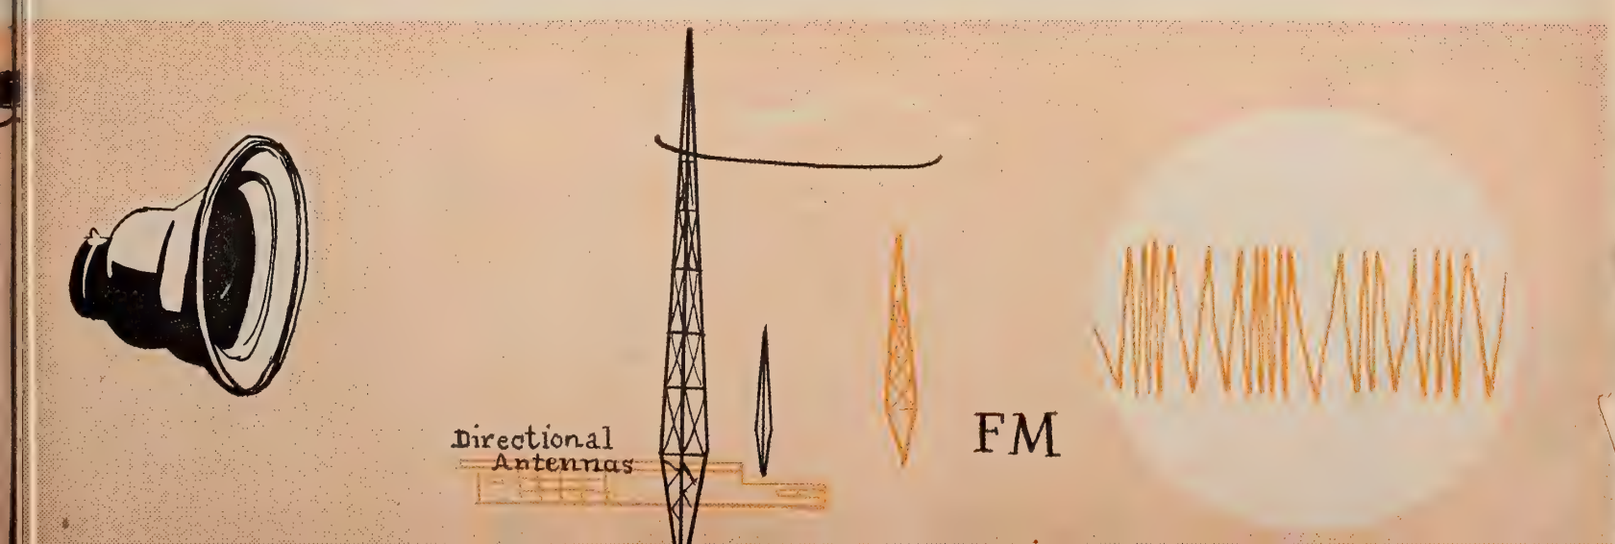
A Class II station is a secondary station which operates on a clear channel with a power of 250, 500, 1,000, 5,000, 10,000, 25,000 or 50,000 watts to give some service beyond the primary service area.

A Class III station, which shares a "regional" channel with several similar stations, uses power of 500, 1,000 or 5,000 watts and serves a center of population and adjacent rural area.

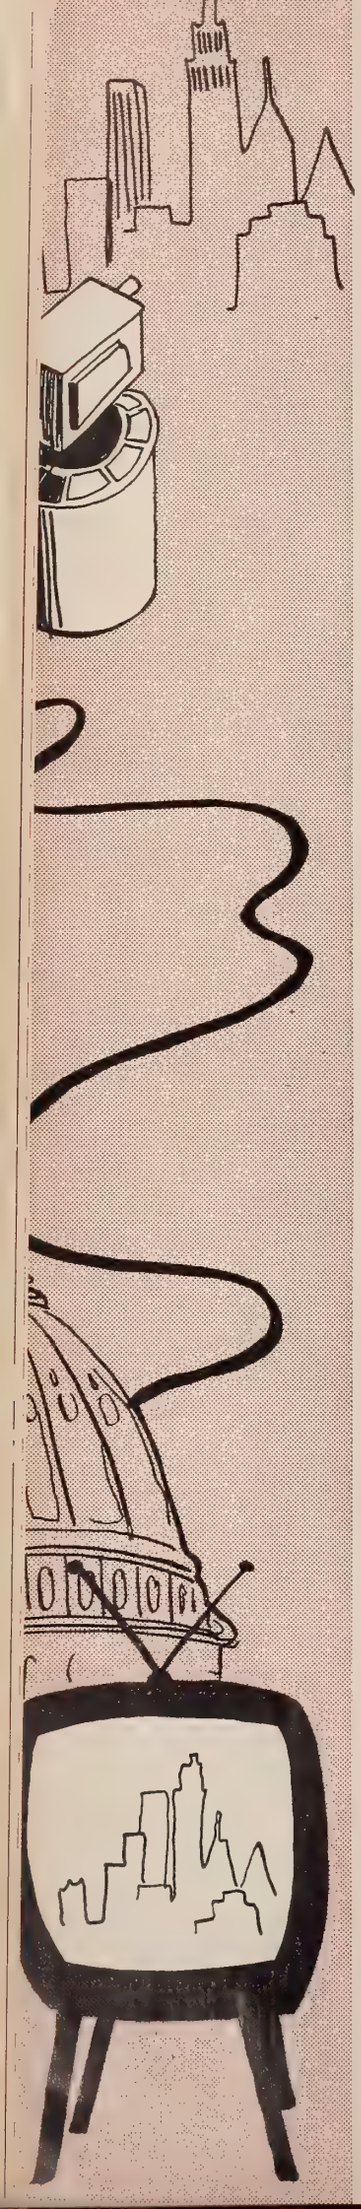
A Class IV station operates on a "local" channel (shared by many similar stations elsewhere) and employs 100 to 250 watts for purely local service.

"Primary service area" means the area in which the signal is not subject to objectionable interference and fading. "Secondary service area" means an area served without objectionable interference but subject to occasional variations in strength of signal. "Intermittent service area" means an area receiving service beyond the primary service area and subject to some interference and fading.

Clear Channels



"Clear channels" are set apart by international agreement for the operation of maximum powered AM stations to serve remote rural areas. The other channels are shared by so many regional and local stations that people living outside populous communities must at night depend largely upon the strong signals of distant clear channel stations which are protected against night-time interference.



FM BROADCAST

FM (frequency modulation) broadcast has several advantages over the older AM (amplitude modulation) broadcast. FM has higher fidelity characteristics and is ordinarily free of static, fading and background overlapping of other station programs.

FM's greater tonal range capability is due primarily to the fact that it uses a wider channel than that employed for AM broadcast. Then, too, FM occupies a higher portion of the radio spectrum where static and other noise is less prevalent than at lower frequencies. FM signals have the peculiar ability to suppress weaker stations and other interference.

Since the frequencies on which FM operates do not ordinarily reflect back to earth from ionospheric layers ("skywaves"), it is possible for many scattered FM stations to share the same frequency without

interfering with one another. Most FM stations serve areas within a radius of approximately 35 to 75 miles, although high powered FM stations sometimes reach out 100 miles or more.

FM History

The principle of frequency modulation has long been known but its advantages for broadcasting were not evinced until shortly before World War II. Largely as a result of interest evoked by extensive FM development work by Edwin H. Armstrong in the 1930s, the Commission authorized increased FM experimentation and, in 1940, after extensive public hearings, provided for commercial FM operation to start Jan. 1, 1941. It set apart 35 channels for commercial FM and 5 channels for noncommercial educational FM use.

There was no "first" individual commercial FM grant because, on Oct. 31, 1940, the Commission authorized construction permits to 15 such stations simultaneously. By the end of 1940 the number of authorizations had increased to 25.

The first commercial FM station licensed by the Commission was WSM-FM Nashville (May 29, 1941), which operated until 1951.

Though all radio construction was frozen by World War II, more than 40 prewar FM stations continued to serve some 400,000 receivers.

Because of skywave interference experienced on the then FM band of 42-50 megacycles, the Commission in 1945, after public hearing, moved FM to its present higher and more immune position in the radio spectrum—88 to 108 megacycles—and at the same time increased the number of channels to 100. This provided 80 channels for commercial FM and 20 channels for nonprofit educational broadcast (see "Educational Broadcast").

Classes of FM Stations

FM commercial stations are of two classes: Class A, for community service, and Class B, for metropolitan or rural coverage.

Commercial FM stations are licensed for unlimited time operation and are required to program a minimum of six hours a day. As an encouragement, new FM stations can start with interim equipment until they obtain higher power apparatus.

FM Service

The peak year for commercial FM authorizations was 1948, when more than one thousand such authorizations were outstanding. By the close of 1951 there were less than 700. However, the number of licensed operating commercial FM stations has been increased steadily —from less than 150 in 1948 to nearly 600 in 1952.

Approximately 650 commercial FM stations (including licensees and construction permittees) were on the air in 1952. They provided service over almost all of the Eastern half of the United States, over most of the West Coast area, and in a number of cities and adjacent rural areas in the West. It was estimated that more than 100,000,000 people were within range of one or more FM stations.

At that time the number of receivers in use able to tune in FM broadcast approximated 9,000,000.

TV BROADCAST

Television (TV) broadcasting involves radio transmission of visual and aural programs so synchronized that at the receiving set they are seen and heard in a manner resembling talking motion pictures.

The picture phase of television is accomplished by sending a rapid succession of electrical impulses through the air which the receiver transforms into scenes and images. The method is complex, but the following is a brief explanation of monochrome (black-and-white) video operation.

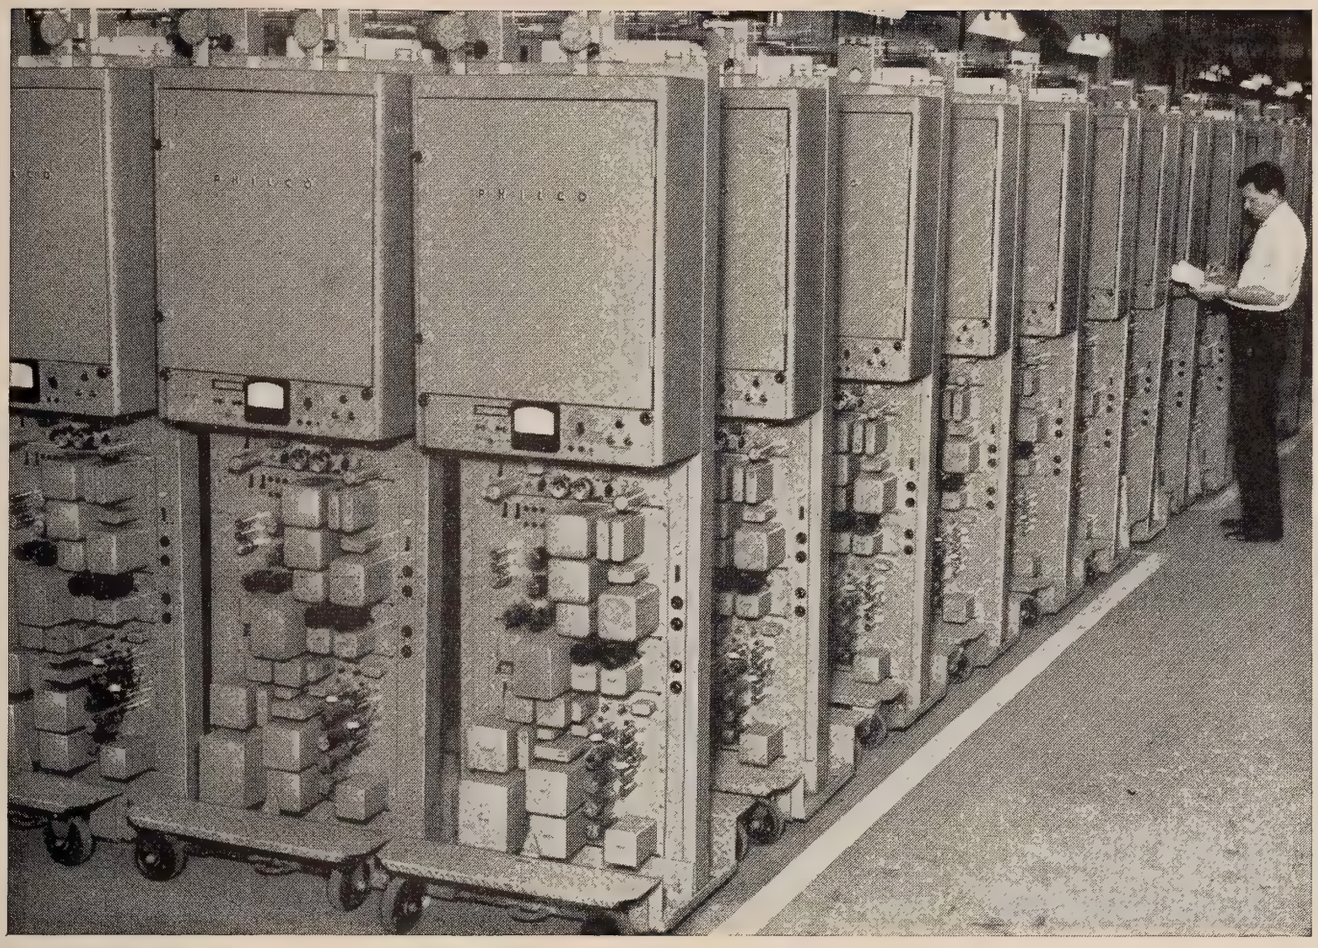
The subject is first "shot" by a television camera. The latter looks like a movie camera but, unlike the ordinary photographic apparatus, uses no film. Instead, it has a special pickup tube—either an "iconoscope" or an "image orthicon," but whose basic principle is the same. This tube is honeycombed with about 367,000 microscopic dots, each of which functions as a photoelectric cell. The light coming through the camera lens strikes these dots and sets up in them electrical charges in proportion to the illumination falling on their respective areas. The more light, the greater the charge. In this way, the highlights and shadows of the scene being telecast create a pattern of electrical impulses on the dotted surface of the tube.

The entire picture area composed by these dots is know as a "mosaic." The dots are "scanned," each one in turn, by a beam of electrons about the size of a pinhead. This electron gun sweeps back and forth, from left to right and from top to bottom (just as a printed page is read by the human eye), until it has completely scanned the dots. It repeats this performance 30 times a second. Each scanning is known as a "frame." Each frame is scanned into 525 lines, which is the United States standard with respect to definition. As the electron beam sweeps over the dots, it neutralizes their respective electrical charges and sends equivalent electrical currents, in sequence, over cables to be amplified, monitored and then put on the air.

In the receiver, this process is reversed. The visual transmission is received—one dot at a time—but so rapidly that the varying electrical charges are able to reassemble the picture. This is made possible by the reproducing tube. The latter is coated with a fluorescent material that glows when bombarded by the electrons and recreates the object or scene being telecast. The face of this tube is the screen that you see, directly or indirectly, in viewing the resulting picture.

In television, the receiver has a particular lock-and-key relationship to the transmitter. The receiver must be able not only to get the broadcast of any TV station within range, but is controlled by the transmission in such a way that the receiving screen responds to the release of electrons so as to furnish the light and dark areas which make up the picture.

In this respect, video operation has a certain resemblance to printing a picture from a plate. The latter, if examined under a magnifying glass, reveals a surface composed of many small raised dots. These dots form the varying shades when the picture is reproduced.



The TV viewer does not see a complete picture at any one time. However, the line reproductions follow one another so quickly that, due to the retentive ability of the eye, there is a complete animated picture as far as the observer is concerned. The high rate of repetition is needed to minimize flicker and to avoid the effect of jerkiness when moving objects are shown.

The TV transmitter is, in effect, two separate units. One sends out the picture and the other the sound. Visual transmission is by amplitude modulation (AM). The sound portion employs frequency modulation (FM) and operates much like the regular FM broadcast described elsewhere in this booklet.

TV History

Many persons in many lands have contributed to the development of television. Like other forms of radio, TV was made possible by electronic discoveries in the late 19th century and early 20th century. In 1884 Nipkow, a German, patented a scanning disk for transmitting pictures by wireless. In our own country, Jenkins began his study of the subject about 1890. Rignoux and Fournier conducted "television" experiments in France in the 1900s. In 1915 Marconi predicted "visible telephone." In 1923 Zworykin applied for a patent on the iconoscope (TV camera tube). Two years later Jenkins demonstrated mechanical TV apparatus. There were experiments by Alexanderson, Farnsworth and Baird in 1926-1927. An experimental TV program was sent by wire between New York and Washington by the Bell Telephone Laboratories at a public demonstration in 1927, in which Herbert Hoover, then Secretary of Commerce, participated. The next year the same laboratories experimentally telecast outdoor programs.

The Federal Radio Commission (predecessor of the Federal Communications Commission) reported that "a few" broadcast stations were experimenting with video in 1928. In that year, WGY Schenectady experimentally broadcast the first drama by TV. Large-screen TV was demonstrated by RCA at a New York theater in 1930, and RCA

PHILCO IS THE WORLD'S LEADING MANUFACTURER OF MICROWAVE EQUIPMENT

Philco leads the world in mass production of quality microwave equipment to meet modern industry's demands for relay systems of the highest reliability and performance.

Philco microwave components meet most JAN (Joint Army-Navy) specifications without any changes in circuitry, thereby permitting other users of microwave communications equipment to have the built-in reliability required by the Armed Forces. That is why commercial users of Philco microwave equipment include such famous names as American Telephone & Telegraph Co., Santa Fe Railway System, Bonneville Power Administration, Platte Pipeline Company and many others.

Where quality and reliability are important, look to Philco . . . world's leading manufacturer of microwave equipment!

tested outdoor TV pickup at Camden, N. J., in 1936.

Seventeen experimental TV stations were operating in 1937. The first experimental mobile TV station was placed in operation that year. The first United States President seen on TV was Franklin D. Roosevelt, when he opened the New York World's Fair in 1939. That year saw the first telecast major league baseball game, college football game and professional boxing match. In 1940 the Republican and Democratic conventions were televised, that of the former making pioneer use of coaxial cable for long-distance TV relay purposes. Previously, in the same year, WNBT New York, and WRGB Schenectady, were joined by radio relay for a rebroadcast test.

Meanwhile, in 1939, the *Milwaukee Journal* filed the first application to broadcast TV programs on a commercial basis. At a hearing held in 1940, the Federal Communications Commission found industry divided on the question of whether TV was ready for commercial use and at odds on engineering standards. At that time various TV systems required different receivers. A National Television System Committee considered standardization and reported in 1941. Subsequent Commission hearings showed the industry to be in substantial agreement on commercialization and standards. The latter fixed the present line and frame frequencies at 527 and 30 respectively. On April 30, 1941, the Commission authorized commercial TV operation to start July 1 of that year.

Meanwhile, a number of TV stations which had been operating experimentally applied for commercial authorization. The first grant looking to regular TV operation was issued to WNBT New York, on June 17, 1941, effective July 1 of that year. On June 24, 1941, WCBW (now WCBS-TV) New York, was authorized to commence program tests July 1 thereafter. By May of 1942 ten commercial TV stations were on the air. Six of these continued to provide service during the war.

In 1945 the Commission allocated 13 vhf (very high frequency) channels between 44 and 216 megacycles for commercial television. In doing so, it pointed out that there was insufficient spectrum space below 300 megacycles for an adequate nation-wide and competitive TV broadcasting system. Twelve of these channels were to be shared with certain nonbroadcast (fixed and mobile) services. At the same time, that portion of the uhf (ultra high frequency) spectrum between 480 and 920 megacycles was made available for experimental TV operation looking to future television expansion, and between 1245 and 1325 megacycles for TV relay.

In 1948, because of interference to commercial TV operation, the Commission stopped the sharing of television vhf channels with other services, and deleted TV channel No. 1 (44-50 mc) by assigning it to the nonbroadcast services affected. The Commission reiterated its opinion that frequency economy required intercity TV relaying to be handled ultimately by common carriers but, pending availablity of adequate facilities, it temporarily provided for such relaying by TV broadcasters in bands allocated for TV auxiliary purposes.

The Freeze

As predicted by the Commission in 1945, it became increasingly evident that the few available vhf channels were inadequate to provide a truly nation-wide competitive TV service. Also, operating stations developed interference which had not been anticipated when TV broadcasting began. This interference is caused by a bending or reflection of radio waves by an atmospheric layer known as the troposphere. As a result, the Commission on Sept. 30, 1948 stopped granting new TV stations pending a study of the situation. This was the so-called television "freeze" order.

The resultant study showed that, before additional stations could be authorized, it was necessary to determine various engineering and other questions which would govern TV operation for years to come.

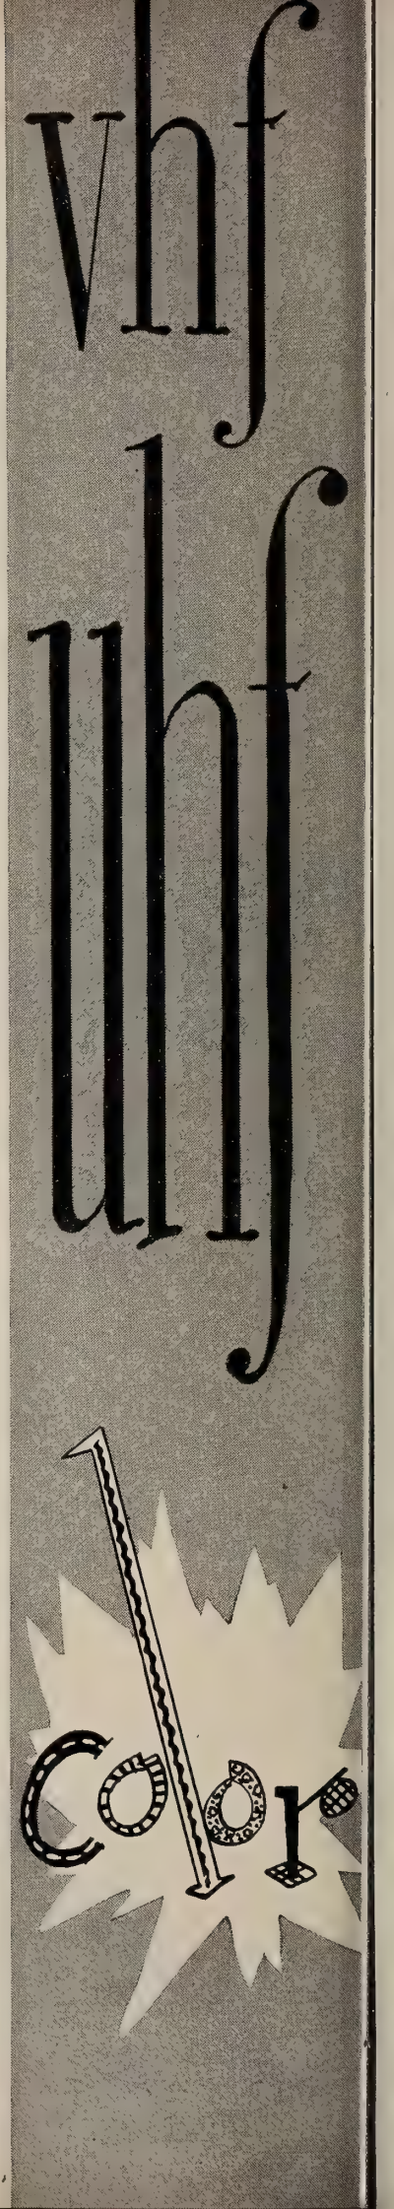
Consequently, on July 11, 1949 the Commission proposed comprehensive changes looking to the improvement and extension of TV service. These included new engineering standards; opening uhf channels for TV broadcasting; consideration of color systems; reservation of channels for noncommercial educational use; possibilities of "stratovision" (broadcasting from planes) and "polycasting" (community service by a series of low-powered stations); and a national assignment plan incorporating vhf and uhf channels.

The color question was the first subject considered because up to the actual hearing it had not been determined if color could operate in the same channel width (six megacycles) used for black-and-white TV transmission.

Color TV.—In color television much the same process of monochrome (black-and-white) television is followed except that each picture is transmitted in three primary colors—red, blue and green. These colors are sent in sequence.

Details of the method are complex. In the "field sequential" system, which is the adopted standard in the United States, the colors are changed at the end of each scanning of the field of dots, or 144 times a second. Thus, the odd lines in the first field are scanned in red; in the second field the even lines are scanned in blue; in the third field the odd lines are scanned in green; in the fourth field the even lines are scanned in red; in the fifth field the odd lines are scanned in blue; and in the sixth field the even lines are scanned in green. It requires six complete fields to produce one complete color picture. However, 24 color pictures are transmitted each second.

Color TV has been the subject of study and experimentation for a quarter of a century. In 1928, Baird, in England, demonstrated an early system. The next year color pictures were sent over wire in a test at the Bell Telephone Laboratories in New York. RCA gave an experimental color TV demonstration in February 1940, and CBS tested color TV broadcast the following August.



The question of color TV was considered initially by the Federal Communications Commission in 1941, when it proposed alternative standards for monochrome and color. In 1945 it allocated certain uhf frequencies for experimentation in developing color and high definition black-and-white TV. It was not until 1946 that it received a formal proposal for the adoption of color. In denying that CBS petition in 1947, the Commission urged further experimentation with particular reference to making color transmission possible in the 6-megacyle band width used by monochrome TV.

Three competitive color systems were offered for Commission consideration in the general TV proceedings which started in 1949. They were the CBS "field sequential" system, the RCA "dot sequential" system, and the Color Television, Inc., "line sequential" system. Each of these systems would require special or converted sets to receive color. The CBS system could not be received in black-and-white on existing receivers without adapters; the two others claimed they could.

On the basis of testimony and demonstrations, the Commission on Sept. 1, 1950 found that the field sequential system was the only system meeting its criteria for color operation. However, in view of the fact that this system could not be received in monochrome on existing receivers, and the possibility of improvements in TV color systems generally, the Commission proposed postponing a color decision and adopting monochrome "bracket standards" which would enable future black-and-white TV sets incorporating those standards to receive color transmissions in black-and-white. This proposal was conditioned upon receiver manufacturers agreeing to equip new TV sets with a switch and an appropriate circuit for that purpose.

But the response from manufacturers was insufficient and, in accordance with its September announcement, the Commission on Oct. 11, 1950 adopted the field sequential system for color TV broadcasting to become effective Nov. 20 thereafter. In so doing, it held the door open for consideration of competitive systems or developments on the basis of practical tests and actual demonstrations.

Start of commercial color broadcasting was delayed when RCA

WALTER KING, *Director, radio and television*

obtained a preliminary injunction in the United States District Court at Chicago. On May 28, 1951 the Supreme Court of the United States upheld the validity of the Commission's action and CBS began limited color broadcasts on June 25 of that year. Because of the materials shortage, the National Production Authority on the following Nov. 20 prohibited the manufacture of color TV sets or attachments except for experimental, defense, industrial, and certain hospital and educational uses. This ban was relaxed to some extent on June 24, 1952.

The Thaw

On April 14, 1952, the Commission announced the lifting of the TV "freeze", the addition of 70 uhf channels (between 470-890 megacycles) to the 12 vhf channels (between 54-216 megacycles) then in use, and the adoption of a table making more than 2,000 channel assignments to nearly 1,300 communities throughout the United States and its territories, including 242 assignments for noncommercial educational use.

TV stations operate in accordance with tables of minimum and maximum power which may vary with antenna height. Minimum effective radiated power with a 500-foot antenna above average terrain is fixed at 50 kilowatts for stations serving a city with a population of one million or more; 10 kilowatts in cities with 250,000 to a million; 2 kilowatts for cities of 50,000 to 250,000; and with a 300-foot antenna power of 1 kilowatt for those cities under 50,000 population. Maximum effective radiated power on vhf channels 2-6 is fixed at 100 kilowatts, on vhf channels 7-13 at 316 kilowatts, and on uhf channels 14-83 at 1000 kilowatts; with very high antennas these powers are reduced.

Station separations are determined by three geographical zones. Minimum co-channel separations are 170 miles for vhf channels, and 155 miles for uhf channels in Zone I which encompasses the entire states of Massachusetts, Rhode Island, Connecticut, New Jersey, Maryland, Pennsylvania, Delaware, District of Columbia, Ohio, Indiana, Illinois, and parts of Maine, New Hampshire, Vermont, New York, Virginia, West Virginia, Michigan and Wisconsin.

Minimum co-channel separations are 190 miles for vhf channels, and 175 miles for uhf channels in Zone II, which includes the territories and possessions, and the entire states of Kentucky, Tennessee, North Carolina, South Carolina, Missouri, Iowa, Minnesota, Arkansas, Kansas, Nebraska, Oklahoma, North Dakota, South Dakota, Utah, Idaho, Arizona, New Mexico, Montana, Wyoming, Nevada, Colorado, Oregon, Washington and California, and parts of Maine, New Hampshire, Vermont, New York, Virginia, West Virginia, Georgia, Alabama, Mississippi, Louisiana, Michigan, Wisconsin and Texas.

Minimum co-channel separations are 220 miles for vhf channels, and 205 miles for uhf channels in Zone III, which includes Florida and parts of Georgia, Alabama, Louisiana, Mississippi and Texas.

At the time the freeze was lifted, 108 vhf stations were serving some 17,000,000 TV receivers in 63 cities and metropolitan areas with a population of approximataly 87,-000,000 persons in 34 states.

Following the lifting of the freeze, a temporary procedure was instituted for processing TV applications which gives priority consideration to places without television stations and to communities with uhf assignments only; also to noncommercial educational applications and applications from the territories and possessions.

The first commercial TV grants following the lifting of the freeze were made on July 11, 1952, simultaneously, to three Denver, Colo., stations—KFEL-TV, KDEN and KBTV. KFEL-TV began program operation on July 19th thereafter. The first uhf commercial television station to go on the air was KPTV Portland, Ore., on Sept. 20, 1952.

The initial commercial grant to the territories and possessions was made on July 23, 1952, to WKAQ-TV San Juan, Puerto Rico.

Miscellaneous

Being in a higher part of the spectrum, uhf television cannot be received on vhf sets without changes in the set or the addition of an adapter. The type of tuner in the set will generally determine the steps necessary. Otherwise, a special receiver is required to get both TV bands. In many cases, uhf reception also requires some slight changes in home antennas which were installed for vhf use, or may require a new antenna.

TV stations engaged in commercial operation are required normally to broadcast a minimum of 28 hours a week except in their initial stages when there is a graduated scale of operation starting with 12 hours.

Developments in "phonevision" and other means of sending scrambled TV programs—by wire or radio—to subscribers with unscrambling devices constitute experimental operation for which no service has yet been authorized.

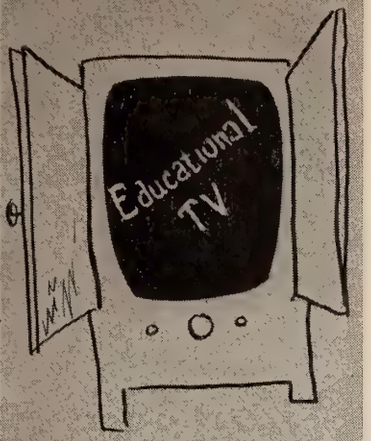
Requests for special channels for theatre television are the subject of a separate Commission proceeding.

TV Networking

Television is no longer limited by local talent and facilities. Network operation is made possible in large measure by the development of coaxial cable and microwave relay facilities. As early as 1937 motion pictures were televised and sent over the coaxial cable link between New York and Philadelphia. Network operation was begun by WNBT New York; WRGB Schenectady, and WPTZ Philadelphia. in 1944. Regular coaxial cable TV relay service was inaugurated between Washington and New York in 1946. The following year, microwave relay extended this service to Boston. A midwestern relay system, opened in 1948, was joined with the eastern system in 1949. The first link in the transcontinental relay system was opened between New York and Chicago in 1950. It was extended to San Francisco the following year and, on Sept. 4, 1951, carried telecasts of the Japanese peace treaty conference. By 1952 the Bell System's coaxial cable and microwave system totaled nearly 30,000 channel miles, served TV stations in some 70 cities, and was still being expanded. In many fringe areas, so-called "community" antennas pick TV programs from the air and bring them to local subscribers' homes by means of special cable.

In addition to live studio presentations, television uses films. The latter include "kinescope" recordings, a rapid filming process which makes it possible to show scenes of events soon after they occur. Magnetic wire and magnetic tape, which would carry both picture and sound, are being experimented with as a means of TV programming.

EDUCATIONAL BROADCAST



AM Educational Stations

Educational institutions were among the earliest licensees of standard broadcast stations. University engineers pioneered in the construction of many of the nation's first AM stations, and a considerable proportion of the early broadcast licenses were issued to educational institutions.

By 1925, educational groups held 171 such licenses. For various reasons, notably the increased competition from commercial broadcasting, most of these stations were off the air when the Federal Communications Commission was created. However, about 35 educational stations still operate in the AM broadcast band, a score of them on a completely noncommercial basis.

The Communications Act of 1934, in establishing the Federal Communications Commission, specifically launched its activities in the field of educational broadcasting. As directed by Section 307(c) of that act, the Commission made a study of the proposal that Congress by statute should allocate fixed percentages of radio facilities for particular types of nonprofit radio programs and activities, including education.

The Commission's report to Congress following such a study, on January 22, 1935, recommended that no statutory allocation of radio facilities be made at that time for any such nonprofit programs or activities. The Commission was of the opinion, among the reasons stated for its recommendation, that there was "no need for a change in the existing law to accomplish the helpful purposes of the proposal". It recognized, however, the need

for expanding the role of broadcasting in the educational program of the country and expressed its intention "actively to assist the determination of the rightful place of broadcasting in education and to see that it is used in that place."

To further the development of noncommercial educational broadcasting, the Commission in 1938 set aside certain AM channels between 41 and 42 megacycles for the exclusive use of educational institutions. Due, however, to the inability of the ordinary public-held radio set to receive broadcasts on these frequencies, only a few educational institutions secured licenses for such operation. Those which did later changed to frequency modulation operation when provision in FM was made for educational broadcasting.

FM Educational Stations

When regular FM broadcasting was authorized to start in 1941, five channels between 42 and 43 megacycles were allocated for noncommercial educational use, in lieu of educational AM facilities previously provided in the 41-42 megacycle band.

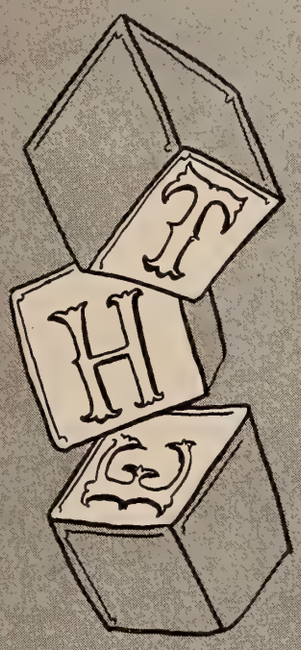
In 1945, as part of an extensive revision of frequency allocations, the Commission reserved 20 FM channels between 88 and 92 megacycles to accommodate noncommercial educational FM stations. This educational portion of the FM band is contiguous to that containing the commercial FM stations, and present FM receivers are capable of tuning in both noncommercial and commercial stations within range. The number of these noncommercial educational FM stations has steadily grown since 1945; there were slightly more than 100 of them in operation in 1952.

The Commission's authorization in 1948 of low power (10 watt) operation on these reserved FM channels provided an additional incentive to educational broadcasting. With such low power equipment easily installed and operated, schools may begin broadcasting to a limited area of from two to five miles in radius for an outlay of as little as $2,000, exclusive of studio equipment, which costs from $1,000 and up. Higher power equipment may be added when desired and economically feasible to do so. In 1951, as a further aid, the Commission authorized remote control operation of low power noncommercial educational FM stations.

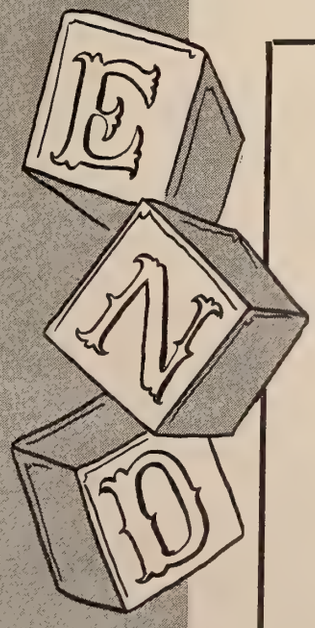
While a number of states are planning to build state-wide FM educational networks, Wisconsin, with eight FM stations in operation (in addition to one AM station), leads the field in this type of activity.

In 1950 the Commission reserved a noncommercial educational frequency for the use of the United Nations.

Stations in the Noncommercial Educational FM Broadcast Service are licensed principally to school systems, colleges and universities for furnishing educational programs to teachers and students, as well as for public educational and entertainment purposes.



TV Educational Stations



The Commission, for the first time, allocated TV facilities for exclusive noncommercial educational use as a result of its lengthy study of this question in the general television proceedings (discussed under "TV Broadcast"). The Commission determined therein that "the need for noncommerical educational stations has been amply demonstrated"; that "the records show the desire and ability of education to make a substantial contribution to the use of television"; that "the actual process of formulating plans and of enacting necessary legislation or of making adequate financing available is one which will generally require more time for educational organizations than for commercial interests . . . and that to insure an extensive rather than a sparse and haphazard development of educational television, channels must be reserved by the Commission at this time". Consequently, in its Sixth Report and Order of April 14, 1952, the Commission made channel assignments to 242 communities exclusively for noncommercial educational purposes.

Forty-six of these educational channels are to places designated as "primarily educational centers". Of the total of 242 channels so assigned, 80 are in the vhf and 162 in the uhf.

The Commission anticipates that the educational licensee on one of these channels reserved for education will make its station's facilities available to other local educational institutions, since such assignments have primarily been made to serve the educational and cultural needs of the community. Except in particular cases, noncommercial educational eligibility is not extended to municipal authorities in places where an independent educational authority—such as a board of education—is established. Although there is no requirement that noncommercial educational stations broadcast a specified minimum number of hours, commerical and educational television stations in general are both subject to the same TV service requirements, such as station separation, antenna height and power, etc.

The first noncommercial educational TV grant was made July 23, 1952 to the Kansas State College of Agriculture and Applied Science (KSAC-TV), at Manhattan, Kans.

TALKS TO STUDENTS

JEFFERSON Standard Broadcasting Co., licensee of WBT-WBTV (TV) Charlotte, N. C., is sponsoring personnel lectures on careers in radio and television at universities and high schools in North and South Carolina. The speaker is W. Chase Idol, personnel manager of the company, who promotes the concept of "Opportunities Unlimited at WBT-WBTV." General Manager Charles H. Crutchfield says "We're always interested in filling our staff openings with homefolks, where that is possible. With the variety of communications, broadcasting and allied studies offered in North Carolina, we hope to build in the minds of undergraduates the ambition to become a part of our organization if they plan a broadcast career."

WLOW GADGET TIE-INS

WLOW Norfolk, Va., in a 13-week promotion campaign, has been sending gifts with station tie-ins to the top 104 advertisers in that area, using material supplied by Gettier-Montayne, Baltimore. In February it was a memo pad: "Write this down, WLOW is your best buy in Tidewater;" in March, a whisk broom: "Let WLOW whisk away your lagging sales," and for April, a carpenter's rule: "By any measure, WLOW is tops." Other promotion includes bus dashes and roadside billboards.

FOOD PROMOTION

EIGHT-PAGE two-color sales brochure on "How to sell food in the St. Louis market?" is being mailed by KSD-TV St. Louis. Station claims it reaches 80,000 homemakers daily with its daytime features, and outlines how a sponsor can get 1,000 viewers for 73 cents. Free & Peters is the representative.

MID-AIR camera being lifted by crane in Baltimore shipyards is recording the 1,753d remote telecast of *The Port That Built a City* by WMAR-TV. Camera cable extends from camera to a WMAR-TV mobile unit below.

KYW EASTER EGG PARTY

KYW Philadelphia has scheduled an Easter egg party contest Thursday for children 4 to 10 with the party to be broadcast by Anne Lee, KYW home economist, on her regular program. Cash gift certificates will be awarded to three children with the most beautifully decorated and colored eggs. Mothers of winners will receive Easter finery. The eggs will be distributed to underprivileged children.

MATCH THIS

MATCH books bearing the recipient's name in gold letters on the front cover were sent by WXLW Indianapolis to present and prospective advertisers. Inside the cover were the station's emblem and dial number. For a year cartons of 25 match books were sent out monthly. According to the station, "the personal touch pays off" to the tune of 60%.

MR. WIGGLES

MR. WIGGLES, a chihuahua disc jockey on WINZ Miami, "woofs" into the mike, plays records he approves for children, and tries to find homes for his friends in the animal world. Each Saturday, with the help of his assistants, Lee and Lorraine, he phones three boys and girls who have written to him previously, puts the conversation on the air, and plays the favorite record of each. Mr. Wiggles also gives the youngsters a chance to win the type pet they desire. Fred Coots, composer of "Santa Claus Is Coming To Town," was so impressed with the chihuahua that he wrote a song called, "Little Mr. Wiggles."

FULL PAGE AD

WMIL Milwaukee recently bought a full page ad in the *Milwaukee Sentinel* with the headline, "We Hope We're a 'Good Neighbor.'" The ad went on to say that the independent station has "a selfish policy of unselfishness . . . that the greater contribution a radio station makes to its community, the greater will be the community's support of the station." Pictured

Livestock Clinic

PUBLIC service programming with a solid sell found a unique format when WKY AM-TV Oklahoma City aired 13 shows in what it believes was the first "Radio-TV Livestock Clinic of the Air."

The regularly-scheduled *Farm Reporter* on WKY and *Oklahoma Farmer* on WKY-TV, as well as two special radio features, publicized all phases of livestock management and disease control, with the entire series paid for by Lederle Labs., through Conklin Mann & Son.

To promote the air clinic, and also to encourage the use of high-quality bulls in livestock production, the stations' farm reporters, Sandy Saunders and Harold Dedrick, offered a pure-bred bull as top prize in a letter-writing contest.

Regular sponsors of the AM show are Chickasha Cotton Oil Co. and Mathieson Chemical Co.

was a drawing of a cat and dog, viewed from the back, sitting side by side.

FORUM ON PROGRESS

DURING the months an embryo TV station is struggling to get on the air, the people in the service area are interested in the progress being made, according to KVOS-TV Bellingham, Wash. As a result every Friday evening the station owner, general manager, chief engineer, and production manager appear on a forum on KVOS-AM to discuss what has been done during the past week. In this way, as well as discussing questions that are sent in, KVOS feels it has found an effective method of keeping the community aware and even more interested than usual in the why and wherefores of TV in the Pacific Northwest.

'VALLEY FORGE GIRL'

VALLEY FORGE Beer is introducing a new personality on radio and TV. She is the "Valley Forge Girl," featured in a new, concentrated advertising and merchandising campaign to "Make friends with Valley Forge Beer." She will make her television debut on WFIL-TV Philadelphia, and will be seen and heard by sports fans during broadcasts of the Philadelphia A's and Phillies baseball games on radio and TV.

HISTORY ON THE AIR

KQV Pittsburgh, in cooperation with Pittsburgh area schools, is broadcasting a series of pro-

Food Promotion

ELEVEN participating sponsors have been signed by WFBR Baltimore for its new hour-long daytime strip, *Hometown, America,* offering extensive merchandising and point-of-sale promotion in cooperation with 2,700 grocery stores in the greater Baltimore area.

The station, with the Independent Retail Grocers and Meat Dealers Assn. of Baltimore Inc., claims it can place display material in stores accounting for 60% of the retail food volume in the area with its new merchandising program. *Hometown, America,* 3 to 4 p.m., starting April 6, permits a sponsor to increase grocery outlet distribution for his product, promote it with in-store merchandising materials and on the radio program, and entertain a large listening audience.

Show features giveaway stunts, such as a telephone auction in which bidding is made on the basis of labels, wrappers and box tops from products of participating sponsors. Merchandising service for buyers of participations includes spot-checks in stores for distribution, product displays, taking of orders and introduction of new products.

How Good a Value IS Meat?

THE best way to figure the value of anything is to compare *what you get out of it* with what you pay for it.

According to a study of the U. S. Department of Agriculture, if you are an average American, you spend 24% of your food budget for meat.

The meat you get for this 24% of your food money, gives you approximately

***63% of your protein (in the form of *complete* protein)**
47% of your food iron
28% of your phosphorus
42% of your vitamin B_1 (thiamine)
24% of your vitamin B_2 (riboflavin)
79% of your niacin
(plus generous amounts of other B vitamins—including the important B_{12})

**Percentages of daily dietary allowances based on recommendations of the National Research Council for an average 154-lb. sedentary man.*

There's still another way to judge the value of meat—that's to compare the price *you* pay with what the meat packer pays the farmer. Department of Agriculture figures just published show that meat is brought to you at a *lower service cost from farm to table than almost any other food.*

But how do you place a value on the *pleasure* which you measure for yourself every time you sink your teeth into a juicy forkful of meat?

Did you know

that Americans eat on the average, *60 million pounds* of meat every day... that it takes the combined services of more than *4,000 different meat packing companies* to supply it ... that the meat packing industry is noted for the many services it performs for a profit that averages less than *1¢ for every 3 pounds of meat you buy?*

WIP Drug Raid Scoop

WIP Philadelphia claimed an exclusive in its on-the-scene tape-recording of a narcotics raid on more than a hundred known or suspected dens March 18—its second within a year.

Briefed at 3:30 a.m. in the office of Commissioner Joseph Bransky, federal narcotics investigator, Murray Arnold, WIP program director, and Varner Paulsen, assistant program director, joined the raiders in what was described as the biggest crackdown in six years on illegal drug traffic in the three-state federal district of Pennsylvania, New York and New Jersey.

WIP taped an hour and a half of action, including routing of dope pushers and wholesalers, breaking down doors and questioning suspects. The station broke its scoop on its 8:15 a.m. newscast and followed with a half-hour report at 8:30 p.m.

grams for in-school listening as well as for the at-home audience. The transcribed series, *The American Trail,* presents dramatic sketches of American history. These 15-minute programs, which are coordinated with classroom assignments, are broadcast weekly.

SLUMBER CAMPAIGN

WPIC Sharon, Pa., has begun a series of 55-minute programs, *The Pillow Parade,* in cooperation with the operator of coin pillow-radios recently installed in hospitals throughout the area. The program consists of musical requests sent in by friends and relatives of hospital patients. Sponsors of the program distribute to all patients in Sharon General Hospital a little folder containing a coin to operate their radios for an hour. This coin service soon will be extended to patients in other hospitals in the county.

TV POWER

QUICK results of a TV announcement have been reported by WPTZ Philadelphia. Mary Wilson, star of *Pots, Pans and Personalities,* mentioned that viewers could take a short air flight without charge by stopping at the Pan-American center city office and obtaining a ticket. Pan-American's "get acquainted flight" campaign was to start the following day, and Miss Wilson's announcement was intended as only a "feeler" to test reaction. Less than two hours later Pan-American had issued 400 tickets, the total amount available, had sent a petition to the telephone company to suspend all phone calls for the rest of the day, and had cancelled its entire campaign of newspaper publicity.

SONG SEARCH

SINGER-disc jockey Lee Sullivan has received, through his *Sullivan Song Search* on WERE Cleveland, more than 600 unpublished songs from talented Clevelanders. Every song receives a personal going-over from Mr. Sullivan, who so far has been able to use 17 amateur songs on his morning shows. More than 1,500 people have written to tell Mr. Sullivan which song they like. The first amateur work, "Confusion" by Anthony Casals, drew 493 letters in one week, and a Chicago publisher and New York recording company have expressed an interest in it.

JAYWALKER CONTEST

WORCESTER New Car Dealers Assn. sponsored a Mrs. Jaywalker contest on WTAG-AM-FM Worcester's *Julie 'n Johnny.* Each day a jaywalker, after giving clues to her identity on the air the day before, violated pedestrian traffic rules in a combined station and Safety Council promotion. Pedestrians could win a jackpot prize by spotting the jaywalker on the street and identifying her as the person on the broadcast. Final prize was $100, with $5 added each day.

EXCLUSIVELY RADIO

BEYOND TV horizons is the claim made by KOA Denver for its coverage in this "almost exclusively radio country." Most of the portions of the 15 states which the station reaches will be beyond the reach of television "for years," KOA claims in a three-color mailing piece. Although KOA serves a large rural audience, it maintains a steady "city folks" following, which likes its "careful scheduling and solid evenings of network entertainment."

RECIPES AND RADIO

WNOE New Orleans is reminding agencies and advertisers, using a string-tied southern colonel, that "In New Orleans it's creole recipes for good eating and WNOE for good coverage." Both, the station adds, have "public acceptance" there. The singlecard mailing piece is printed in two shades of green, and points up H-R Reps, national representative for the 50 kw Mutual station

UTAH COVERAGE

HIGH, Wide and Handsome is the copy theme in a new sales brochure being released by KSL-TV Salt Lake City, which claims its transmitter ("America's highest") reaches 87% of Utah's population. Coverage area comprises 89.7% of the state's effective buying income, the CBS affiliate reports.

Editorials Aired

A FEW hours after W. Gordon Allen, president of KGAL Lebanon and KGAE Salem, both Oregon, initiated a saturation editorial campaign demanding public hearings and re-examination of a 20% power surcharge to consumers by power companies, a bill was introduced in the Oregon legislature by Rep. Monroe Sweetland to make a public hearing mandatory on any future surcharge, the station reports.

A second bill introduced by Rep. Sweetland asked that money so far collected by power companies be held in escrow until legality of the surcharge has been established, Mr. Allen said, adding that State Sen. Warren Gill has asked a Senate investigation of the surcharge matter. The five-minute radio editorials were run six times daily.

SPEECH SCHOLARSHIP

GRAND prize winner in the sixth annual WGAR Cleveland-Western Reserve U. speech tournament will receive a four-year scholarship to Western this year and work at WGAR part-time. Winners in four speech contest divisions will receive a clock radio. All high school seniors in northern Ohio are eligible to compete during April and May. Plans were completed by John F. Patt, WGAR president and co-chairman of the tournament, and Warren Guthrie, chairman of the speech department at WRU.

PASSOVER PROGRAMS

WEEK of programming commemorating the Passover holiday, which ended yesterday (Sunday), was prepared by WLIB New York in cooperation with KOL ZION, Israel's overseas broadcasting service, United Parent-Teacher Assn. of Jewish Schools, the Jewish Education Committee and organizations representing New York synogogues. Schedule included a radio visit to a new matzoh (unleavened bread) bakery on Long Island, messages from civic officials and Passover services.

PEOPLE

Advertisers

William T. French, National Dairy Products Corp., N. Y., appointed assistant director of advertising in charge of Sealtest advertising.

From where I sit
by Joe Marsh

A Difficult "Situation"

Did you see that "Classified Ad" in our paper last week? The one that wanted a farmhand who had to be "an expert agriculturist, sheep herder, tractor driver, bridge player," *plus* being "an authority on chemistry and mathematics"?

Slim Thomas, who ran that ad more or less as a joke, called and said, "I got 23 answers and almost every one claimed they could meet all those qualifications! That means I want to keep the man I have—'Handy' Peters.

"He was thinking of quitting next month but now I've *got* to talk him into staying. Handy never pretends to be an expert, he's just a good all-around hired hand."

From where I sit, Slim's smart to be wary of people who consider themselves to be all-around "experts." Some folks will "expert" on anything —from the clothes a man should wear to whether he ought to drink beer or buttermilk. Personally I don't want to "classify" myself as knowing all the right answers.

Like to catch Philadelphia

. . . or New York, for example, with a "live" Hollywood glamour show at 9 P.M. (EST) . . . then "air" the same show same day in Los Angeles 3 hours later—9 P.M. (PST)? Want to bridge this coast-to-coast gap of time and space effectively, brilliantly—at low cost?

ANSWER: **Use Eastman Film** (Air for N. Y. and TV-Record at 6; be ready to project and show in L.A. at 9 as specified).

Eastman Television Recording Camera Installation—NBC—New York.

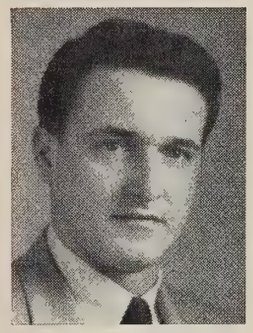
Ohio, to WSDC Marine City, Mich., as program director.

Bob Reynolds appointed sports director, WJR Detroit.

Henry Kelpe, production manager, KOIL Omaha, promoted to program director. **Amos Eastridge** appointed promotion manager.



Jack Duffield, assistant sales service manager, KTTV (TV) Hollywood, promoted to merchandising manager.

Bob Blackwood to KNEA Jonesboro, Ark., as announcer-librarian.

Bill Oliver to announcing staff of WBBM Chicago.

Frederick P. Laffey, program director, WLAW Boston, received Bronze Star Medal for meritorious service performed as chief of radio division of Army's Psychological Warfare Section, Tokyo.

Jack Turley, director-producer at WKY-TV Oklahoma City, to executive producer and sales service director, KOB-TV Albuquerque.

Mr. Turley

Anne Minahan to WCCM Lawrence, as educational director. **Gladys Eldridge** to station in traffic department.

Louise Langley to traffic department, WSB-TV Atlanta.

Ernest Czelti to WOOD - AM - TV Grand Rapids, Mich., as reporter and photographer.

Roger A. Langston, advertising manager of Florida State Theatres, to promotion manager, WMBR-AM-FM-TV Jacksonville.

Harry Clarkson, production coordinator, promoted to TV producer, WMAL-TV Washington. **Jerry Gregoris** and **William Lotzer** named production coordinators there. **Ed Call, Pat Gilvary, Harry Cullis, Frank Berfield** and **Jacob Koser** to station's production staff.

William C. Lacey, manager of film dept. of WABD (TV) New York, to WCBS-TV New York in same capacity.

HUGH TERRY (l), KLZ-AM-FM Denver general manager, welcomes Dudley Tichenor, new local sales manager for the station. Mr. Tichenor formerly was with KANS Wichita, Kan., and served for three years after World War II as KLZ national sales representative.

Johnny Littlejohn, disc jockey with WMIS Natchez, Miss., and WJXN Jackson, Miss., to XEDM Hermosillo, Mexico, in same capacity.

Stu Wilson, production and public service manager, KBIG Avalon, Calif., adds duties as commercial announcer on KECA-TV Los Angeles *The Ruggles.*

Glenn M. Cook Jr., formerly chief engineer, KECK Odessa, Tex., to KLBS Houston in same capacity.

David Maxwell, chief announcer and program director, KSWS Roswell, N. M., to KBIG Avalon, Calif., as announcer.

Carolee Waite appointed assistant to owner and **Robert Loeb** named announcer-technician, KISW (FM) Seattle.

Ernie Colling, radio-TV department, Foote, Cone & Belding, N. Y., to KTTV (TV) Hollywood, as writer-producer-director.

Carol Evans to KTLA (TV) Hollywood as publicist.

Otto Bremers, assistant manager of advertising and promotion, WMAQ WNBQ (TV) Chicago, to KMOX St. Louis as sales promotion director.

William Oliver Grieve to KCKY Coolidge, Ariz.

Vaughn Bjere, announcer, CKFH Toronto, to program staff of CFRA Ottawa.

William T. Heaton, merchandising field representative, *Pasadena Star-News,* to KTTV (TV) Hollywood, in same capacity.

Shirley Dennis appointed music librarian at KIRO Seattle, replacing **Jo Daniels,** now with KFAR Fairbanks.

Clarke W. Davis to writing staff of WBBM-AM-TV Chicago, assigned to write special shows for radio.

Marjorie King, star of own daily program on KGO-TV San Francisco, adds daily program of interviews and music on KNBC that city.

Jackson Lowe returns to WOL Washington as disc jockey.

Betty Goble to accounting department, WSYR Syracuse.

Ray Walsh appointed copy chief of WCSC Charleston, replacing **Alma Davis,** now radio-TV promotion director.

George Reeves, star of *Superman,* syndicated TV film series, assigned role in Columbia Pictures feature film, "From Here to Eternity."

Kem Dibbs, radio-TV actor who played title role in former *Buck Rogers* radio program, assigned role in Warner Bros. feature film,"Riding Shotgun."

Gerald Mohr, Hollywood radio-TV film actor, assigned role in Hal Wallis Productions feature film, "Money From Home."

Russell C. Kaiser, program coordinator, KWK St. Louis, elected to board of directors of Eastern Missouri chapter of Arthritis & Rheumatism Foundation.

Pat Bishop, news editor, KFI Los Angeles, named radio committee chairman of World Trade Week, May 13-23.

Jim Reid, sports director, WPTF Raleigh, elected president of Southern Conference Sports Writers' Assoc.

Bill Gordon, disc jockey on WHK Cleveland, hospitalized for complete rest.

Arnold Starr, account executive with WPAT Paterson, N. J., father of boy, Mitchell, March 2.

Irving E. Rogers Jr., member of board of directors, WLAW Boston, and Jacqueline Hervey have announced their engagement.

Len Beardsley, announcer, KECA Los Angeles, father of boy, Brian Orlo, March 1.

Jack Wagner, disc m.c., KHJ Hollywood, father of boy, Michael Dennis, March 1.

Don Elliot, newsman at WSB-AM-TV Atlanta, father of boy, David, March 6.

Al Leibert, announcer WICC Bridgeport, and

Jean Israel have announced their marriage.

Joyce Ann Price, WOR New York-Mutual press information department, and Stanley R. Goodman have announced their engagement.

Bert Demers, KOMO Seattle account executive, father of girl, Diane Elizabeth.

Networks

Daniel L. Schorr, CBS Radio special correspondent in Belgium and the Netherlands, to Washington news staff of CBS Radio, effective May 1.

Arthur Godfrey, CBS Radio and TV star, named Grand Marshal of parade of 26th Shenandoah Apple Blossom Festival, Winchester, Va., May 1.

Clem McCarthy, NBC sports commentator, will receive a citation from the Sports Broadcasters Assn. in New York April 13 for "outstanding performances over the years."

Bud Coulson, director of public relations, Don Lee Broadcasting, System, Hollywood, adds similar duties with KHJ-TV that city. He succeeds **Jim Parsons,** resigned.

Bert Briller, radio-TV reporter-critic for *Variety,* to ABC as copy chief in sales development department, effective April 1.

Ann Sothern, star of CBS-TV's *Private Secretary,* named "the secretary we'd most like to imitate" by Hollywood Chapter of National Secretaries Assn.

Jack Creamer, West Coast offices of William Morris Agency, handling talent and program packaging in TV sales dept., to ABC television sales dept. as account executive.

Tony Messuri to NBC-TV New York, as freelance writer on *Scott Music Hall.*

Marge Kerr, radio-TV producer and head of creative TV package programming for William Morris Agency, N. Y., to NBC-TV's *American Inventory* program as public information consultant.

Dennis Day and **Cliff Arquette,** stars on NBC-TV *Dennis Day Show,* named first in "Funny Man in Music" and "Fun Foil" categories, respectively, by National Assn. of Gagwriters for Laugh Week, April 1-8.

Don Kraatz, ABC-TV Chicago production department, father of boy, Paul Kevin.

Bob Savage, continuity director of ABC Central Div., father of boy, Sean Christopher.

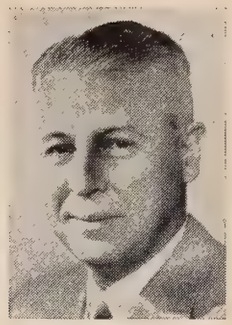
Jack Moyles, star of Columbia Pacific Radio Network *Rocky Jordan,* father of girl, March 20.

Representatives

J. Robert Sullivan to Dora-Clayton Agency, Atlanta, Ga., as account executive.

Janice Shearer, KSTN Stockton, Calif., to Weed & Co., S. F. She succeeds **Mollie Eastman,** in Europe for extended vacation.

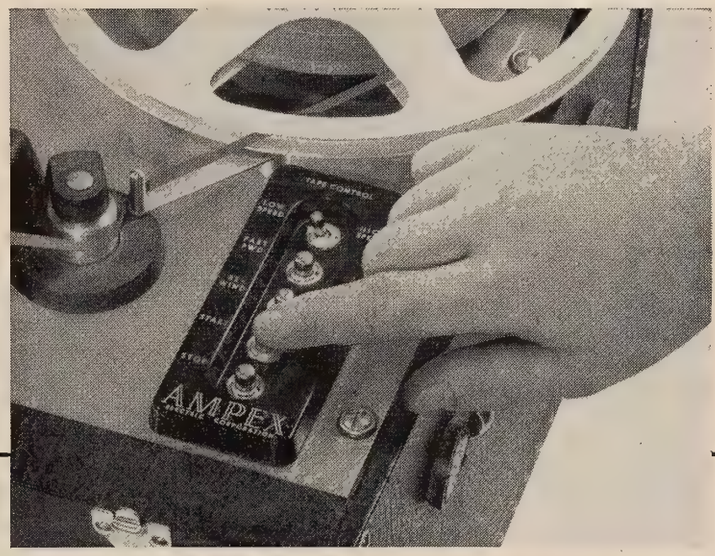
Manufacturing



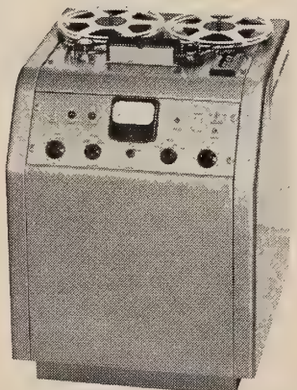
Herbert E. Delp appointed manager of newly created Kansas City TV-radio sales region of Capehart-Farnsworth Corp.

O. L. Dupy, recording supervisor, Metro-Goldwyn-Mayer Studios, to Minitape Corp., Hollywood, Calif., as president.

Arnold K. Weber appointed director of organization development and **John M. Clifford** named director of personnel, RCA Victor Div., RCA, Camden, N. J.

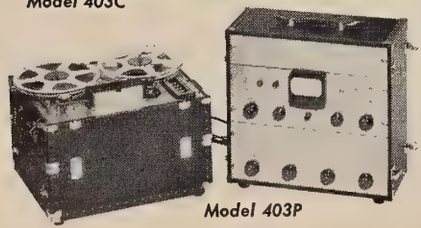


Mr. Weber



Mr. Clifford

F. Gilbert White, sales representative for Adams Distributor Co., Boston, to Sylvania Electric Products radio and TV division,



AN AMPEX IS ALWAYS READY TO GO

— Even after thousands of hours of service

Model 403C

Model 403P

Supreme reliability is the most important quality your tape recorder can have — whether your station is 250 watts or 50,000 watts. Countless operators have found that AMPEX eliminates the fussing, the adjustments and the uncertainty they had previously suffered in using tape recorders that were "built to a price."

The AMPEX 400 Series Recorder is the one outstanding bargain in tape recorder service. It costs least per hour of use; it minimizes maintenance and adjustment; it protects your programs from the hazard of sudden failure; and its reliability frees your engineer's attention for other tasks.

Even after thousands of hours of service, your AMPEX Recorder will be reliable in these important ways:

- *When you press the button, it operates*
- *Program timing stays accurate*
- *Starting, stopping and rewind will operate smoothly*
- *Fidelity will still be high*
- *Maintenance costs will still be low*

If you plan for tomorrow, buy an AMPEX today

Program Services

Earnest Hoberecht, UP general manager for Asia, elected vice president.

Ulysses Kay, contemporary composer, to BMI as editorial adviser on contemporary concert music.

Marvin Holtzman, Louchheim Co., Phila., named syndicate sales manager of Columbia Records Inc., replacing **James Sparling,** who becomes manager of phonograph div.

J. Hugh E. Davis, former executive vice president, Foote, Cone & Belding Inc., Chicago, opens **J. Hugh E. Davis Co.,** Hollywood, at 6233 Hollywood Blvd., to package-produce live and film TV and radio programs. **Bob Hope,** NBC-AM-TV star, is inactive associate, with other associates to be announced shortly.

Rudy Rudolph, account executive, Leonard Shane Agency, L. A., to Universal Recorders, Hollywood, as account executive.

Services

Jay I. Weston rejoins Hal A. Salzman Inc., N. Y., public relations firm, after service with U. S. Army in Korea.

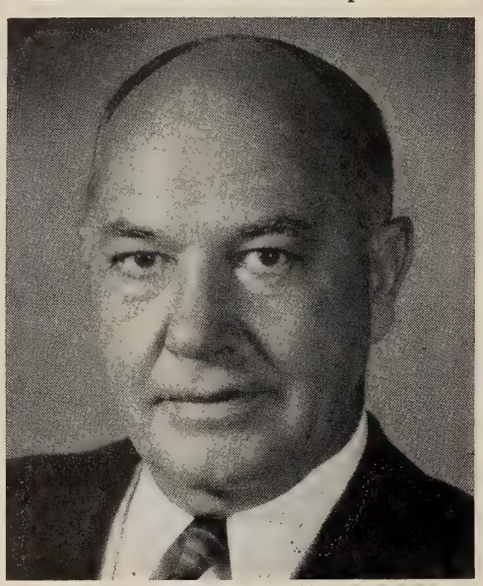
Leonard Shannon, publicist, RKO Radio Pictures, Hollywood, to Ted Loeff & Assoc., Beverely Hills publicity firm, as associate.

Joel Preston, associate, Arthur P. Jacobs, Beverly Hills public relations firm, to Blowitz-Maskel, Hollywood firm, in same capacity.

Steve Strassberg, publicity director for Eagle Lion Films Co., to David O. Alber Assoc., N. Y., public relations firm, as account executive.

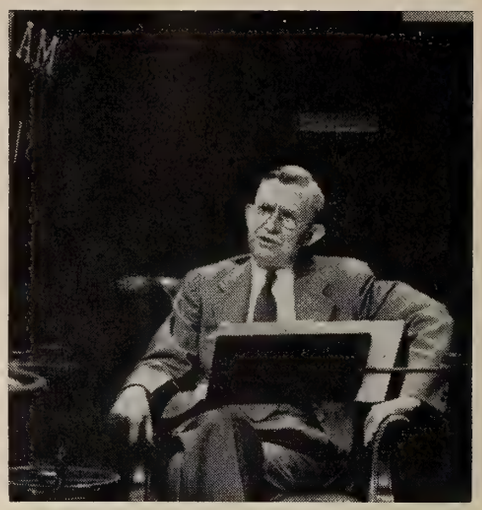
Government

Lt. E. R. Hoffman, USNR, named liaison officer for Defense Dept. activity of Armed Forces Radio Service, Hollywood. He replaces **Lt. Cmdr. George Marakas,** USNR, reassigned to duty in Italy.



ANNUAL DUPONT AWARDS PRESENTED

WBNS-TV, WMT and WAAM (TV) commentator Johnson take honors for outstanding achievement in the radio, television fields.



TENTH annual Alfred I. duPont Awards were presented Friday night to a radio and a television station and a non-network commentator, with three other stations and three commentators receiving special commendations. At the awards presentation dinner in Washington's Mayflower Hotel, WBNS-TV Columbus, WMT Cedar Rapids, and Gerald W. Johnson, commentator at WAAM (TV) Baltimore, earned the top three citations and $1,000 each from the awards foundation.

WBNS-TV was cited by the five-person judging committee for its "extensive utilization of local activities, institutions, interests and talents, with a number of novel program ideas to awaken the community to its own human and material resources." The station, affiliated with CBS, was to have been represented by Edgar T. Wolfe, chairman of the board of directors and publisher of the Columbus *Dispatch.*

Mr. Wolfe has termed the impact of television similar to that of radio and newspapers, "but much more dramatic in its overtones. We have felt the 'armchair circle' has a right to expect that television be provocative and informative in presenting the world of politics, business, science, art and education, as well as the world of sequins and clowns."

Edgar T. Wolfe
"Right to expect provocative TV"

Gerald W. Johnson
"Pointed, witty and wise analysis . . ."

The award-winning radio station was WMT Cedar Rapids, commended for "its notably comprehensive and intensive effort in political education at the national, state and local levels." WMT, a basic CBS Radio affiliate, was to have been represented at the dinner by William B. Quarton, general manager, and Mrs. Helen S. Mark, co-owner with William B. Dolph of Washington.

The first non-network commentator to receive the duPont award was Gerald W. Johnson, author of several books and editorial writer for the Baltimore *Sun,* who appears on WAAM (TV) Baltimore, *Viewpoint—How Things Look From Bolton St.* He was commended for his "pointed, witty and wise analysis and comment on international, national and local news for a local audience." Ken Carter, general manager, was scheduled to receive the award on behalf of the staff.

All three of the primary winners were chosen generally for "meritorious service to the American people" in 1952.

Special mentions for programming in the public interest last year went to WBAL-TV Baltimore, WDIA Memphis and WNAX Yankton, S. D. WBAL-TV was commended for its "wide range of public service programs ably presented and directed to many community interests," while WDIA was cited for its "thoughtful awareness of the special problems and interests of the Negro community, with a liberal use of its facilities to serve those interests."

"Impressive service to rural communities in four western states in time of blizzard, flood and fire danger, as well as for the prevention of accidents" occasioned the special mention of WNAX, which received a duPont station award in 1945.

Network Commentators

Network commentators winning mention were Clifton Utley of WMAQ-WNBQ (TV), NBC stations in Chicago; Martin Agronsky, ABC Washington, and Erwin Canham, editor of the *Christian Science Monitor* who broadcasts on ABC from Boston.

Last year's major winners were WCAU-AM-TV Philadelphia, WEEI Boston and Joseph C. Harsch, for his commentaries originating at WOL Washington.

Award presentations were made by Dr.

Francis P. Gaines, chairman of the awards committee and president of Washington and Lee U., Lexington, Va., which administers the awards for the Alfred I. duPont Awards Foundation. The foundation was established in 1942 by Mrs. Jessie Ball duPont in memory of her husband and in recognition of "loyal service" by radio and television stations and commentators "to the nation and the communities they serve." Annual winners are invited to use the $1,000 cash awards to establish student fellowships in their areas for advanced work in some phase of mass communications.

The awards committee which made selections includes Mrs. duPont, Dr. Gaines, Ben McKelway, editor of the Washington *Star;* Dr. Hadley Cantril, professor of psychology and director of the Office of Public Opinion Research at Princeton U., and Mrs. Oscar A. Ahlgren, president of the General Federation of Women's Clubs.

Curator of the awards foundation is O. W. Riegel, director of the Lee Memorial Journalism Foundation at Washington and Lee, which has administered the awards for the past two years.

Scheduled to attend the dinner were: Paul A. Walker, FCC chairman; Rosel H. Hyde, FCC vice chairman; Judge Justin Miller, board chairman and counsel, NARTB; Harold Fellows, president, NARTB; Ted Koop, CBS Washington and president of the National Press Club; C. Edmonds Allen, radio editor, United Press; Oliver Gramling, assistant general manager, Associated Press. James D. Secrest, executive vice president, Radio-Television Mfrs. Assn.; Sol Taishoff, editor and publisher, B•T; Frank White, president, NBC; Adrian Murphy, president, CBS; J. L. Van Volkenburg, president, CBS Television; J. G. Taylor, vice president, MBS; Chris J. Witting, director, DuMont Television Network; Ernest Lee Jahncke Jr., assistant to the president, ABC, and R. A. Borel, director of television, WBNS-TV Columbus.

WMT Cedar Rapids general manager

Proetz Competition Plans

ED (SHEPHERD) MEAD, TV copy chief at Benton & Bowles, New York, and author of "How To Succeed in Business Without Really Trying," will judge TV entries in the Erma Proetz Awards competition sponsored by the Women's Advertising Club of St. Louis. Radio winners will be selected by Horace Schwerin, president, Schwerin Research Corp., New York. Judging chairman is David Ogilvy, president, Hewitt, Ogilvy, Benson & Mather, New York.

Of the four annual awards of $100 and a plaque, one each goes to a woman in radio and in television. TV award will be given by George M. Burbach, general manager, KSD-TV St. Louis, who served on the Harvard award committee which first cited Erma Proetz for her work in the advertising field.

FIRST IRE FOUNDERS AWARD IS PRESENTED TO SARNOFF

Award to Gen. Sarnoff is for outstanding contributions to radio engineering. Other top presentations go to Miller and Page of Naval Research Lab., Gray of Bell Telephone, Pierce of Harvard, Booton of MIT, and Johnson and Webster of RCA Labs.

THE FOUNDERS AWARD, a newly established award of the Institute of Radio Engineers to be bestowed on outstanding leaders in the field, was presented for the first time last Wednesday to Brig. Gen. David Sarnoff, board chairman of RCA, who delivered the main address of the New York convention. (See separate story, this issue.)

The award was given to Gen. Sarnoff for "outstanding contributions to the radio engineering profession through wise and courageous leadership in the planning and administration of technical developments which have greatly increased the impact of electronics on the public welfare."

Also presented at the banquet were the following IRE awards for 1953:

Medal of Honor—to John D. Miller, Naval

Canadian TV Debate Rages in Parliament

TELEVISION will play an important role in the forthcoming Canadian general election, judging from the mid-March debate in the Canadian House of Commons at Ottawa in connection with appointment of a CANADA parliamentary radio committee.

Government supporters upheld the policy of developing a Canadian TV system with the government's Canadian Broadcasting Corp. having stations in major markets and independent stations being allocated to smaller markets. Opposition members urged competition between CBC and privately-owned stations to better develop Canadian TV.

Transport Minister Lionel Chevrier stated that no private TV stations would be licensed for the present in major centers where the stations would import American programs for large profits. He said CBC stations would be licensed there because CBC must have access to areas where large revenues could be earned to finance production for national distribution by both CBC and private stations.

Other government supporters and Socialist Party speakers dealt with the amount of advertising on American TV, and stated they did not want to see Canadian TV develop along similar lines. Socialist Party leader M. J. Coldwell said that Canadian TV should be developed as a national service and not left to advertisers, profit-seekers and hucksters.

Opposition chief George Drew charged Mr. Chevrier with distorting the facts and pointed out that a healthy state of competition between public and private broadcasting will give Canada the best TV. He stated his party believes in the maintenance of public and private broadcasting and that this policy should be adopted for television in the densely populated centers.

On the subject of American programs, Mr. Drew said that while the government "held up its hands in horror" at the thought of U. S. TV programs that would be imported into Canada by private stations, the CBC had agreed to pay the Bell Telephone Co. a rental of more than $200,000 a year so it could do just that by microwave.

J. A. MacLean, a Progressive-Conservative member, contended that the CBC was inclined to be jealous of the preference displayed so far by Canadian TV audiences for private station TV, as indicated in the Toronto area where 80% of the audience regularly tuned in to United States border stations rather than to CBLT, the CBC station at Toronto.

Report on Brazil

RADIO and TV stations in Brazil are using modern American equipment, but their operating methods resemble those of U. S. radio in the 1920s, according to Ferris E. Rahall, owner of eastern broadcast outlets (WWNR Beckley, W. Va.; WNAR Norristown, Pa.; WKAP Allentown, Pa.).

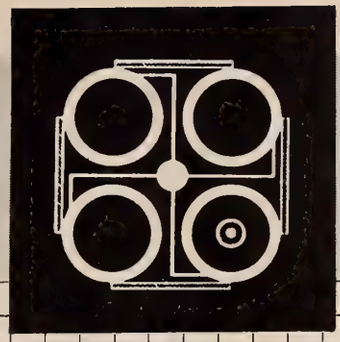
Just back from a three-month tour of Brazil, Mr. Rahall did a series of broadcasts for Brazilian stations and Voice of America. He said that Adm. Pena Botto, head of the Brazilian anti-Communist crusade, was released from his duties as port authority for that nation after a radio interview with him.

Mr. Rahall interviewed leading radio, TV and publication executives in Brazil. He said Assis Chateaubriand, owner of 14 radio stations, two of the three TV outlets and 21 publications there, is an advocate of American enterprise in Brazil and is a leader in the effort to establish a middle class.

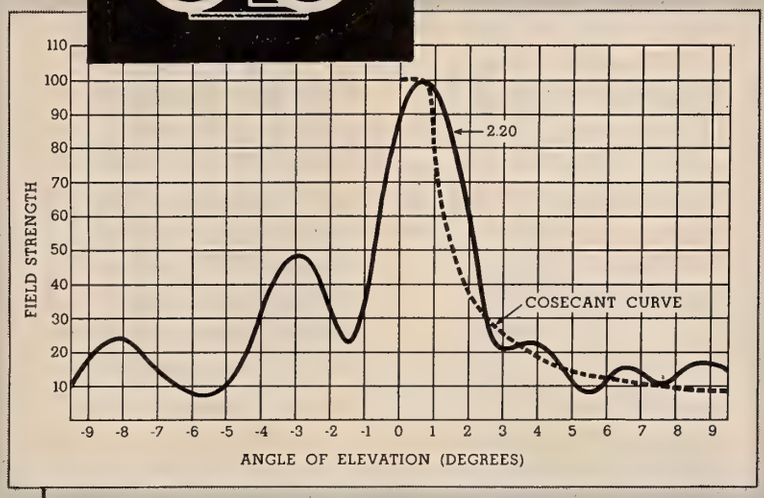
TV growth is hampered by lack of receivers and by a government ruling confining licenses to native-born persons.

Mr. Rahall and two brothers, Sam and N. Joe Rahall, are applicants for TV stations in Allentown, Beckley and Charleston, W. Va.

STORY of communism's spread in Brazil was broadcast over stations in that country, as well as by the Voice of America, by Ferris E. Rahall (r), head of Rahall stations in the U. S., and Adm. Pena Botto, president of the Brazilian anti-Communist crusade.

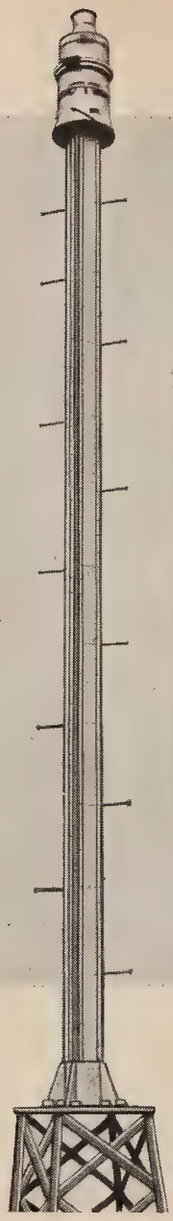


CBC Personnel Shift



NEW POSTS CONTINUE to be created and top management shifts near completion in the overhaul of Canadian Broadcasting Corp. under its new general manager, Al Ouimet, who took over active control the first of the CANADA year. Latest change is the appointment of Dan C. McArthur, news editor of CBC national program headquarters at Toronto for the past twelve years, to the new post of executive assistant to management.

Aurele Seguin, director of TV at CBFT Montreal, has been appointed program director of CBC for Quebec. Howard Hilliard, CBC area engineer at Toronto, has been promoted to regional engineer for Ontario, and Henri Audet has been moved from area engineer at Montreal to regional CBC engineer for Quebec. C. R. Delafield, program department at Toronto, goes to Montreal as assistant director-general of CBC International Service.



THE NEW WORKSHOP COSECANT UHF ANTENNA for Television

Cross-sectional view showing the four vertical tubes that form the radiating structure. These tubes are actually slots and are further subdivided into resonant sections. They are fed by a single vertical inner conductor.

Radiation pattern of Model WA-25-XX with null fill-in and beam tilt of 0.65°.

ELECTRICAL DATA

Model WA-14-XX

POWER GAIN — 14
INPUT IMPEDANCE — 50 ohms
POWER HANDLING CAPACITY — 16 kw. (limited only by Transmission Line Capacity)
HORIZONTAL RADIATION PATTERN — Circular within 1 db
VERTICAL BEAMWIDTH — 4.2°
VSWR — less than 1.1

Model WA-25-XX

POWER GAIN — 25
INPUT IMPEDANCE — 50 ohms
POWER HANDLING CAPACITY — 16 kw. (limited only by Transmission Line Capacity)
HORIZONTAL RADIATION PATTERN — Circular within 1 db
VERTICAL BEAMWIDTH — 2.1°
VSWR — less than 1.1

Performance Data on WA-25-XX Null Fill-In and Beam Tilt

No Beam Tilt or Null Fill-In	Power Gain 27.2
With Null Fill-In	Power Gain 24.3
Null Fill-In and Beam Tilt	Power Gain at Beam Peak 21.5
	Power Gain on Horizon 17.5

To meet the entire range of broadcast requirements from small isolated communities to large metropolitan areas, the Gabriel Laboratories has designed a high-gain UHF television antenna for the Workshop which combines simplicity, ruggedness, and reliability.

With 25 and 14 power gain models in production, plus another with smaller gain, in development, this new antenna can be supplied to fit the special conditions of any broadcast area. Its radiation pattern is the closest approach to a cosecant curve of any antenna now available. Null fill-in, if desired, is built in electrically — not just a compromise with ground reflections. Beam tilt is also available to provide maximum coverage and field strength.

Simple mechanical design results in a relatively low-cost antenna which has no insulators except for gas seal, no de-icing problems, and no field repair problems. The plastic weatherizing windows which protect the radiating structure are dyed "international orange" so that the antenna never requires painting. Galvanized, welded steel construction assures excellent rigidity, corrosion resistance, and long life.

Live Trans-Atlantic TV Is Nearer, Sloan Says

LIVE trans-Atlantic telecasts are "nearer than most people think", according to F. N. Sloan, manager of operations for the radio-TV division of Westinghouse.

EUROPE

Technological progress in Europe "convinces me," he said, "that the day is not far off when these live telecasts will be a reality."

Mr. Sloan has just returned from a two-week trip to Europe, where he attended a series of electronics conferences and visited with officials of the Westinghouse International Corp. of Europe. Completion of the communications link between Europe and America, he said, would enable "us to look forward to a better understanding of the problems involved in today's complex international relations."

Mr. Sloan

Westinghouse is sponsoring a "European Holiday" promotion for its radio-TV dealers and distributors. Sales winners get all-expense 12-day trips to several European countries.

British 3-D TV System Obviates Need for Spectacles

INVENTION of a three-dimensional system for television which obviates the need for viewers to wear special spectacles reportedly has been developed by British technicians.

British Broadcasting Corp. officials are said to agree the invention will work on all existing TV systems, with little if any alteration to existing TV cameras and wave systems, and only a few dollars additional expense to viewers for a small set attachment.

GREAT BRITAIN

A small scrambling box 18 inches square, carrying a line of six camera lenses across the front, is fixed to the camera. Spaced 2½ inches apart (average width between the human eyes), the lenses converge and focus themselves automatically as human eyes do when the camera is moved nearer the object.

Mechanics of Box

A high-speed shutter opens and closes the lenses in rotation, producing more than a hundred complete frames per second. The TV camera picks up a scrambled picture thrown to a translucent screen at the back of the box, and sends the image over the air.

A special screen on the home set rearranges the picture and sends out to a wide angle for viewers thousands of pairs of parallel pictures each 2½ inches apart, and the viewer's right and left eyes each receive different images, making polarized or other spectacles unnecessary.

Most known color processes can be used, it was reported, and when a permanent record is needed a cine-camera is used instead of an electron camera.

► WDZ Decatur, which claims it is the third oldest station in the U. S., marked its 32nd anniversary last week. Station took the air March 17, 1921, airing only grain market reports from its location in Tuscola, Ill. It went commercial in 1929. For the past three and one-half years, WDZ has operated in Decatur under management of Frank C. Schroeder Jr. Curt Marsh, who handles a daily show from Tuscola studios, has been on the staff more than 20 years.

► TWENTY-EIGHT local shows at WSB Atlanta marked the 31st anniversary of the station the week of March 9-15, with the birthday climaxed by broadcast of *The Voice Speaks,* a Sunday show. The documentary presented historical highlights of the station since 1922 in musical and dramatic form. Promotion of the anniversary was tied-in with WSB's "Operation Listen" campaign, designed to create more interest in radio.

► MARCH 16 was the 31st anniversary of WIP Philadelphia, which took the air in 1922 on a share-time basis with WFAN, which it absorbed in the early 1930s. Station, under the direction of Benedict Gimbel Jr., president and general manager, has won numerous awards during its history and has originated many broadcast "firsts," it is noted.

► ST. PATRICK'S DAY and KWK St. Louis' 26th anniversary was marked there by 65 station staffers. The station founder, Thomas Patrick Convey, chose St. Patrick's Day in 1927 to put his station on the air, believing no project begun on that day could fail. His son, Robert T. Convey, succeeded him as president in 1934.

► ROLLIE TRUITT tomorrow (Tuesday) marks his silver anniversary of handling play-by-play broadcasting with the Portland Beavers baseball team. A pioneer northwest sportscaster, Mr. Truitt has been broadcasting the games locally for 25 years, and this year will be heard on a Beaver Network of stations in Oregon and Washington. He and Bob Blackburn are originating the series in Portland for the two-state release.

►PAUL E. LUCAS, assistant program director, WTIC Hartford, marks his 25th anniversary with the station Thursday. A producer, Mr. Lucas joined WTIC in 1925. He was named to his present post in 1946.

ON THE SIXTH anniversary and 2,000th broadcast of the *Frank Ford Show* on WPEN Philadelphia, the station feted the sponsor, Frankford Grocery Co., chain made up of independent grocers, described as the largest in the world. Present were (l to r): William B. Caskey, WPEN general manager; Frank Ford, program m. c.; Bernhardt Mosler, Frankford president, and Herbert Ringold, Philip Klein Adv. agency.

UPROAR IN ALBANY OVER TV REPORTED

Democratic opposition accuses Gov. Dewey of dictating a negative report. But he stresses need for outside advice.

UPROAR over educational TV in New York state broke out again last week as Gov. Thomas E. Dewey, accused by members of the Democratic opposition of dictating a negative report on proposals for a state-owned TV network [B•T, March 2, et seq.], announced he would appoint a committee to help develop "the greatest potentials of educational television for our people."

Asserting that there had been too much stress on "letting the government do it," he said the committee would enlist the aid of numerous educational, broadcasting and other groups. He said he hoped these would "work on special projects in their respective fields and help, through local initiative, to establish workshops at which practical ideas can be tested and even bring about the creation of non-profit corporations for the erection of noncommercial television stations with private funds."

The Dewey Program

Gov. Dewey's program was to implement the controversial report of a special commission which found no desirability or need for putting into effect a proposal that the state build and operate a 10-station network of educational TV outlets. As recommended in that report, Gov. Dewey also urged FCC continue the reservation of educational channels beyond the June 2 deadline to permit thorough and further study of the situation.

Referring to the controversial report, which held that educators are not taking advantage of the time made available to them by commercial stations and should concentrate on that while leaving construction of noncommercial outlets to private interests, Gov. Dewey said:

"There is general agreement that television can be used successfully for certain educational purposes. There are many measures that the state can undertake, consistent with the report, to assist in the establishment of educational television under proper auspices."

Gov. Dewey's announcement was greeted by Democratic leaders with charges that he was trying "to bail himself and his party out of an embarrassing situation"; that his plan to appoint a committee represented "delaying tactics," and that his program in general was a concession to "the Madison Ave. hucksters."

These opponents, who had sought unsuccessfully for a $500,000 state appropriation for a "pilot" educational station, also contended that if Gov. Dewey were sincere in his plan he would call a special session of the legislature before the June deadline and make provision for an experimental outlet.

WFIL-TV-Temple Course

IN-THE-STUDIO course on television is being offered by the radio-TV division of Temple U., Philadelphia, with the cooperation of WFIL-TV there. Students produce live shows via closed circuit each Friday afternoon. Members of the station staff are advisers. John Roberts, radio-TV director, Temple, has lauded Roger W. Clipp, general manager of WFIL-AM-TV, and the Philadelphia *Inquirer*, licensee of the stations, for donation of the studio space.

WACO Trains Its Staff—and Baylor U. Students—in TV

FOR a good long time Waco Television Corp. (WACO), a mutually exclusive applicant for vhf Ch. 11 in Waco, Tex., not only has honed its own staff's training on television technique down to razor sharpness, but also has been making its TV facilities available to nearby Baylor U. for training of students in video.

Buys GE Equipment

In anticipation of a TV grant, WACO in March 1952 bought two GE TV camera chains and other equipment to train its staff for television operation. After the staff was thoroughly trained, WACO General Manager R. E. Lee Glasgow offered the station's TV facilities for use by Baylor U.

Both the Baylor radio-television department and the drama department hold several classes a week at WACO studios, according to Mr. Glasgow. The radio-TV department students learn TV terminology, production techniques, lighting and camera manipulation. They become familiar with production problems and produce and direct various types of closed-circuit TV shows, using their own scripts. The drama department is concerned mainly with dramatic programs and the TV knowledge necessary to stage them.

Taught by Snider

The production courses are taught by WACO's Ted L. Snider, who holds bachelor's and master's degrees in radio and speech and who has completed the UCLA-NBC TV institute at Hollywood. Mr. Snider was with KFMB-TV San Diego from 1950-52 and worked in commercial radio several years.

23d Ohio State Institute Will Stress TV Future

ARGUMENT, pro and con, on telecasting legislative hearings will open Ohio State U.'s 23d annual Institute for Education by Radio-Television in Columbus April 16-19. The legislative TV discussion will be led by I. Keith Tyler, director of the institute and of radio education for Ohio State.

The second general broadcast session April 17 will feature a panel on "The Role of Educational Communications in Society", with Graydon Ausmus, president, National Assn. of Educational Broadcasters, presiding.

John Crabbe, president, Assn. for Education by Radio-Television, will conduct a Sunday session on "Supporting Educational Television." Floor talk at the three general sessions will be directed by H. B. McCarty, executive director, State Radio Council, U. of Wisconsin.

More than 30 workshop sessions will supplement the general meetings, Dr. Tyler said. All sessions will take place at the Deshler-Wallick Hotel.

MARY LOUISE MARSHALL

Stuffed 'em With Marshwood Stuffing

Dad's Cookie Company—makers of popular brand of breads and cookies—also make Marshwood's Sage & Onion Stuffing, a dressing for poultry. To promote this product, they bought two participations on the WOC "Shopping With Mary Louise Marshall" program the week before Thanksgiving—the week before Christmas—the week before New Year's Day.

Before Thanksgiving, sold more than 2,000 packages of Marshwood—retail price 35¢ a pkg. Then came the deluge. Firm head Lawrence Kohler says: "Mary L made demand for Marshwood stuffing so big that our route men dreaded going out on their routes; they knew they couldn't supply retailers' wants. Most of our workers came back at night to help us prepare and package this stuffing. Even then we couldn't catch up with demand. We haven't yet been able to figure out how many packages we sold but we can tell you this—*sales were terrific.*"

If you are interested in "terrific sales" in the Quint-City area, ask your nearest F & P man about the "Shopping With Mary Louise Marshall" . . . it's a real sales-winner.

CBS-TV's New 'Adventure' To Feature N. Y. Museum

Network signs five-year contract to produce full-year show, open to commercial sponsorship, dramatizing the famous museum's resources by using timely news tie-ins, as part of its educational programming policy.

AS PART of its overall educational programming project, CBS-TV announced Wednesday it has signed a five-year contract with the American Museum of Natural History in New York and will begin a full-year program dramatizing the vast resources of the museum.

Titled *Adventure*, the series will be carried on CBS-TV Sundays, 5-6 p.m. EST, starting May 10, replacing a portion of the Ford Foundation TV Radio Workshop's *Omnibus*, which starts summer hiatus at that time. Produced by Perry Wolff, the program will utilize CBS-TV newsman Charles Collingwood as anchor man, reporting timely news incidents relating to the subjects to be explored.

Commercials Okay

The series will be offered for commercial sponsorship.

Pointing out that the network last week announced an educational series in cooperation with leading colleges and universities [B•T, March 23], Hubbell Robinson Jr., CBS-TV vice president in charge of network programs, declared *Adventure* fits into the network's pattern for expanded educational shows. He added the museum series is "far more than a television program based on the achievements of science," and represents "a rare opportunity to throw open the door of this great museum and bring its treasures right into the homes of America's television millions."

Dr. Albert E. Parr, director of the museum, expressed hope the program would enable viewers "to gain greater insight into the fascinating work carried on by scientists in the field and in the laboratory" and " to derive even more pleasure from their visits to the museum."

Budget for the program each week was estimated by Sig Mickelson, CBS-TV director of news and public affairs, at $25,000.

Pittsburgh Ch. 13 Gets $300,000 from Foundations

THREE foundations have pledged $300,000 for the Metropolitan Pittsburgh Educational Television Station, the National Committee for Educational Television, Washington, reported last week. Grants include $100,000 each from the Ford Foundation's Fund for Adult Education, the Arbuckle-Jamison Foundation and the A. W. Mellon Educational and Charitable Trust, with an additional $50,000 from the Mellon Trust for organizational expenses before the proposed station takes the air.

The Arbuckle-Jamison grant is the first of its kind, as normal practice is for its administrators to support only established institutions. Station would be operated by MPTES, a non-profit corporation approved recently by the Court of Common Pleas in Pittsburgh, which will file for a Ch. 13 construction permit shortly.

The board of directors estimates annual operating expenses will be $200,000, with this sum supplied by several sources, including city and county school systems and public contributions.

ML-5681—coaxial terminal tube for high-power AM and TV transmitting facilities.

WHY GRAYBAR RECOMMENDS MACHLETT ELECTRON TUBES

When you buy Machlett electron tubes via Graybar, you get stable, reliable, long-term tube performance backed by carefully-controlled Machlett production methods.

1. **Machlett vacuum firing at higher than operating temperatures . . .** *thoroughly* frees internal components from occluded gases, for greater stability.
2. **Special Machlett processing of filament wires and other internal components . . .** assures lifetime, stress-free, alignment of electrodes. X-Ray of all hidden electrodes after assembly detects (and rejects) misalignments and potential grid-filament shorts.
3. **Machlett high-voltage techniques during final pumping . . .** smooths electrode surfaces and minimizes arcing.

Add Machlett's comprehensive customer engineering service and you can see why Graybar recommends the products of this 55-year old manufacturer of quality electron tubes.

For tubes or any other Broadcast or TV equipment need, make it a point to call Graybar *first*. Your local Graybar office will be happy to provide complete price information as well as technical data. *Graybar Electric Company, Inc. Executive Offices: Graybar Building, 420 Lexington Avenue, New York 17, N. Y.* 337-13

Note: Processing of uncontested TV applications has been extended through both the Group A-2 and Group B city priority lists.

West Coast

$185,000.00

A fulltime network station located in one of the most desirable western markets—retail sales in excess of $200,000,000.00. Due to favorable circumstances we can handle this transaction for $50,000.00 down with a well qualified purchaser.

Southwestern

$95,000.00

An extremely successful fulltime network facility. The only station in a city of 16,000 serving a steady growth market area comprised of agriculture, manufacturing and oil development. Write for further details of this remarkable property. Financing available.

Decisions

San Diego, Calif.—Airfan Radio Corp. Ltd. (KFSD). Granted Ch. 10 (192-198 mc); ERP 316 kw visual, 180 kw aural; antenna height above average terrain 420.5 ft., above ground 416 ft. Engineering conditions include provision that no construction shall be commenced until an appropriate informal application to modify the antenna of AM station KFSD as proposed for tower support, is filed and granted. Estimated construction cost $729,885, first year operating cost $475,000, revenue $525,000. Post office address: 326 Broadway, San Diego 12, Calif. Studio and transmitter location: On Emerald Hills Golf course 5 mi. east of 5th & Broadway. Geographic coordinates: 32° 43′ 13″ N. Lat., 117° 04′ 14″ W. Long. Transmitter and antenna RCA. Legal counsel Hogan & Hartson, Washington. Consulting engineer George C. Davis, Washington. Principals include President and Director **Thomas E. Sharp** (99.75%), Vice President and Assistant Secretary **A. C. Blecksmith,** and Secretary-Treasurer and Director **Amy Dickson** (0.25%). Option agreement has been made by

NEW! Gray Telojector

—for automatic projection of 2x2 slides in unlimited, uninterrupted sequence!

You've *always* needed it—for low-cost, professional-quality TV commercials–and here it is! Gray Research, maker of Telop, Telop II and other specialized TV equipment, proudly announces the new Gray TELOJECTOR. This compact, portable unit gives you *remote control* projection of standard 2x2 slides in uninterrupted sequence . . . with studio effects of fading, lapping and superimposition.

In the TELOJECTOR, projection alternates between two lens systems. Two loaded slide turrets give you a sequence of twelve slides. Additional loaded turrets can be substituted in seconds, providing an *unlimited* sequence. Overall dimensions: 14½" x 18½" x 16". Weight: 32 pounds.

This new Gray TELOJECTOR solves many problems for large and small stations alike. Production is underway. Get *all* the facts —*now!*

Please write for TELOJECTOR Bulletin RD-3A

Applications Amended

New Orleans, La.—Community TV Corp. Request amendment to revise application from uhf Ch. 26 to uhf Ch. 32, change ERP from 75.2 kw visual, 42.6 kw aural to 85.5 kw visual, 48.4 kw aural; antenna height above average terrain 472 ft. Amendment contingent upon termination of rule making procedure (Docket 10373) which would remove the sub-minimum mileage separations and thus make Ch. 32 usable in New Orleans (BPCT-1378). Filed March 23.

Worcester, Mass.—Salisbury Bcstg. Corp. Request amendment of application to change ERP from 212 kw visual, 112.5 kw aural to 200 kw visual, 106 kw aural; antenna height above average terrain from 837 ft. to 812 ft.; change transmitter location and other equipment. (BPCT-1068.) Filed March 24.

Albuquerque, N. M.—Alvarado Bcstg. Co. Request amendment to change frequency from vhf Ch. 13 (210-216 mc) to vhf Ch. 7 (174-180 mc); change ERP from 33.7 kw visual, 16.8 kw aural to 30.4 kw visual, 15.2 kw aural, and other equipment changes. Also add financial data. (BPCT-721). Filed March 20.

Knoxville, Tenn.—Television Services of Knoxville. Request amendment to change name from J. Horton Doughton and Harold H. Thoms, doing business as TV Services of Knoxville to include in list of principals W. R. Tuley, who was formerly applicant for same channel (uhf Ch. 26). (See Ownership Changes.) March 20.

Salt Lake City, Utah—Utah Bcstg. and TV Corp. Request amendment to change officers, directors, stockholders to effect merger with competitor (see Ownership Changes); change ERP from 39.9 kw visual, 19.95 kw aural to 27.6 kw visual, 13.8 kw aural; antenna height above average terrain from 3420 ft. to 4261 ft.; type of antenna and transmitter; geographic coordinates; studio location from 29 S. State St., Salt Lake City, Utah, to Rear 113 S. State St., Salt Lake City, and other equipment changes. (BPCT-1496) Filed March 20.

Spokane, Wash. — Louis Wasmer. Request amendment to change ERP from 100 kw visual, 52.5 kw aural to 100 kw visual, 85.23 kw aural; antenna height above average terrain from 781 ft. to 837 ft; antenna system; geographic co-

Co., owner of TV Corp. of Utah, acquires 50% of Utah Bcstg. & TV Corp. Frank Carman and Grant Wrathall, former co-owners of Utah Bcstg. & TV Corp. now own 25% each. Filed March 20.

Opinions and Orders . . .

Lancaster, Pa.—Peoples Bcstg. Co. (WLAN) Commission dismissed as moot the petition filed Jan. 19, 1953 requesting FCC to reconsider its grant of applications of NBC to increase visual power and antenna height of WNBT (TV) New York and WNBW (TV) Washington, both on Ch. 4, because grants were conditioned by grant of identical relief asked by Peoples Bcstg. Co. on Jan. 23, 1953, in Ch. 8 competition at Lancaster. March 19.

WAND Canton, Ohio, P.C. Wilson—By memorandum opinion and order, dismissed application (BSSA-277) for SSA to operate pre-sunrise 6 a.m. to local sunrise, Sunday only.

Hearing Cases . . .

Foley, Ala. — Alabama-Gulf Radio. (Docket 10019; BP-8012.) Commission granted application for new AM station to operate on 1310 kc, 1 kw daytime (engineering conditions); and granted petition requesting severance from hearing. Application had been in consolidated proceeding with those of Gulf Beaches Bcstg. Co. for new AM station at St. Petersburg, Fla., on same facilities (Docket 9605; BP-7302.) and Hollsboro Bcstg. Co. (WEBK Tampa) for change in facilities from 1590 kc, 1 kw daytime to 1300 kc, 1 kw daytime (Docket No. 9997; BP-7892). March 24.

Intercity TV Relays (Docket 9539)—FCC announced memorandum opinion and order denying petition by Western Union Telegraph Co. rehearing and reconsideration of Commission decision of Oct. 9, 1952, which terminated dismissed proceeding in Docket 9539 relative to question of whether FCC should order connection of Western Union and Bell [illegible] intercity facilities for TV transmission purposes. Comrs. Rosel Hyde, Frieda Hennock and Eugene Merrill issued concurring opinions. March 23.

Classification and locations of users in tariff regulations of Western Union Telegraph Co. (Docket 10112.)—Commission announced final decision that classification and locations set up for users of interstate and foreign leased facilities for dissemination of horse or dog racing news is unjust, unreasonable and discriminatory. Commission orders Western Union to file revised tariff schedules within 40 days and to cease and desist using the schedules in question. Final decision March 20.

Policy in assignment of frequencies in 72-76 mc band (Docket 10315) — Secretary of FCC granted petition by NBC to extend time within which replies to comments may be filed, through the close of business April 13, 1953. Granted March 18.

Theatre Television Hearing — Commission granted petition of American Veterans Committee Inc. to accept its late appearance and statement in proceeding relating to the allocation of frequencies and promulgation of rules and regulations for a theatre-TV service (Docket 9552). March 19.

Lancaster, Pa. New TV vhf Ch. 8—FCC announced memorandum opinion and order to deny motion by Peoples Bcstg. Co. (WLAN), Lancaster, requesting enlargement and change of issues in comparative TV hearing involving its application for Ch. 8 and that of WGAL-TV Lancaster. Action March 20; announced March 25.

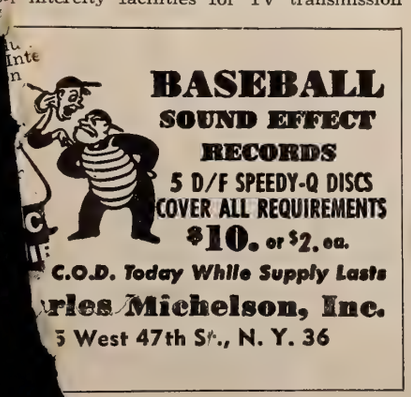
Theatre Television—Allocation of frequencies of exclusive theatre TV circuits. Before Commission *en banc.*



New Petitions . . .

March 18

Spokane, Wash. New TV vhf Ch. 2 (Dockets 10422, 10423; BPCT-920, 1037).—Petition for modification of issues specified in hearing order to delete issues concerned with Louis Wasmer's financial condition and proposed geographic coordinates corrected in amendment already filed, and that objections raised through proposal to use AM tower of KREM as TV antenna tower were simultaneously met, so that only the financial qualifications of petitioner's opponent, Television Spokane Inc., should be at issue. Petitioner wants no delay in start of hearing, however, and if consideration of petition would delay start of hearing, he would prefer to meet issues in hearing.

Sec. 1.342 of FCC Rules on contract filing (Docket 10409).—Comments of Storer Bcstg. Co. requesting that interpretation (b) (ii) (b) and (c) should be clarified, that (b) (ii) (d) should be deleted or limited, that (e) should be deleted, and that (f) should be clarified.

Denver, Colo. New TV vhf Ch. 4 (Dockets

"Hey, Mac, which Altoona station packs more punch, power, pep and personalities"?

"That's easy, Jack,

naturally it's always . . .

WVAM"

"It reaches *more* people in central Pennsylvania with *more* power (1000 watts, day and night) with *more* of radio's best shows—CBS.

"That's why *more* local and national sponsors are putting their sales messages on WVAM."

ARE YOU?

9043, 10238; BPCT-488, -941).—Petition filed by KMYR Bcstg. Co. to reopen record for taking of testimony concerning present advertising and commercial continuity practices and policies of KOA Denver and alleged conflict between present practices and policies and those policies represented by Metropolitan Television (KOA licensee) during comparative hearing.

March 19

Denver, Col. New TV vhf Ch. 7 (Dockets 9041, 10240; BPCT-426, -951).—Motion filed by Denver Television Co. to strike notice of exceptions to examiner's order granting Denver Television Co.'s petition to reopen record and supplemental motion for correction of transcript filed by Aladdin Radio & Television Inc. (KLZ). Denver TV asserts Aladdin filed its notice too late.

Milwaukee, Wis. New TV vhf Ch. 10 (Docket 8955, BPCT-383).—Petition filed by Hearst Radio Inc. (WISN) for rehearing and vacating action of FCC in which Commission dismissed petitioner's application erroneously and improperly [FCC later reinstated application].

Theatre Television (Docket 9552).—Reply of National Exhibitors Theatre Television Committee and Motion Picture Assn. of America to opposition of American Telephone & Telegraph Co.

Alaska Bcstg. Co. (KTKN), Ketchikan, Alaska. CP for power increase to 5 kw daytime on 930 kc (BP-8463).—Reply filed by Aurora Bcstrs. Inc. (KABI) to reply of Alaska Bcstg. Co. (KTKN) which was filed as reply to opposition of Aurora. Aurora asserts that Alaska filed its reply two days too late, and that soil conductivity assumed by Alaska is probably in error and that operation of KTKN would not meet FCC standards.

Harold L. Sudbury (KLCN), Blytheville, Ark. Mod. CP for power increase from 1 kw to 5 kw (Docket 10349, BMP-5961).—Petition filed by Sudbury requesting reconsideration of FCC's order which set aside earlier grant of CP to Sudbury. Petition of WCOC Meridian was filed too late and was in error, KLCN claims.

Spartanburg, S. C. New TV vhf Ch. 7.—Reply filed by Spartan Bcstg. Co. (WORD) in answer to WIS-TV Corp. (WIS-TV), Columbia, S. C., in which WORD asserts Bcstg. Co. of the South (parent company of WIS-TV Corp.) is "protecting its AM investment in Spartanburg by preventing effective television service there. The facts of record do not attest to good faith on the part of The Bcstg. Co. of the South in filing its Spartanburg application . . ." asserts WORD.

THE BIG DOG GETS THE BONE

Our Great Dane is an Irishman who never gets in the Dog House. Jo-Jo has more national advertisers on his 7:00-9:00 AM show than all other local stations combined. The *ONLY* morning personality in Western Pennsylvania's 3rd largest market.

WEED & CO., Representative

March 20

Sec. 3.614 (b) of FCC Rules.—Petition of WSAZ Inc. (WSAZ-TV), Huntington, W. Va., for amendment of rules to allow vhf stations in Zone I to operate at maximum power with antenna heights above average terrain in excess of 1,000 ft.

AB-BT merger (Docket 10031 et al., 10046 et al. and 10110).—Opposition filed by Chief, FCC Broadcast Bureau, to petition for reconsideration of that portion of merger decision which found Paramount controlled DuMont, filed by Allen B. DuMont Labs. Inc. Broadcast Bureau Chief asserts DuMont petition does not present matters not previously considered by Commission and should be summarily denied.

Assignment of frequencies in 72-76 mc band (Docket 10315).—Answer and petition filed by Radio Service Corp. of Utah (KSL-TV), Salt Lake City, Utah, answering comments submitted in behalf of State of California and petitioning for additional time to submit additional exhibits. KSL-TV asserts it is experiencing considerable interference from stations operating in 72-76 mc band and submits photographs purporting to show interference caused to its signal.

Allocation of vhf Ch. 4 to Fayetteville, W. Va.—Further answer filed by Daily Telegraph Printing Co. (WHIS), Bluefield, W. Va., to reply of Robert R. Thomas Jr. (WOAY Oak Hill). Telegraph asserts that Fayetteville proposal of WOAY must be denied and Bluefield proposal adopted, or at least that full hearing be held.

Denver, Col. New TV vhf Ch. 7.—Opposition of Aladdin Radio & Television Inc. (KLZ) to Denver Television Co.'s motion to strike notice of exception filed by Aladdin in which Aladdin asserts it could not answer the order until it had received it, so that Aladdin's notice of exception was filed within allowable ten-day period.

Chattanooga, Tenn. New TV vhf Ch. 12.—Opposition filed by Southern Television Inc. to petition of Tri-State Bcstg. Co. for a conditional grant. Southern Television Inc. asserts FCC did not actually question its financial qualifications and that Tri-State did not make a case for its plea for a conditional grant of a CP.

Chattanooga, Tenn. New TV vhf Ch. 12.—Opposition filed by WDEF Bcstg. Co. to petition of Tri-State Bcstg. Co. for conditional grant. WDEF asserts there is no urgent need for vhf service to Chattanooga since two uhf channels have been awarded, that other answers should be made at a hearing and that Tri-State's application for conditional CP be denied.

Denver, Col. New TV vhf Ch. 7.—Petition filed by Denver Television Co. for extension of time in which to file reply to exceptions and brief of Aladdin Radio & Television Inc. and Chief, FCC Broadcast Bureau.

Sec. 1.342 of FCC Rules (Docket 10409).—Statement of Head of Lakes Bcstg. Co. (WEBC Duluth, et al.) approves purpose of rules but questions certain phrasing.

Sec. 1.342 of FCC Rules (Docket 10409).—National Assn. of Radio & Television Bcstrs. requests an extension of time for filing of comments.

Sec. 1.342 of FCC Rules (Docket 10409).—WCAR Inc. (WCAR), Pontiac, Mich., filed letter generally approving amendment of rules but favoring certain additional clarifying clauses.

Sec. 1.342 of FCC Rules (Docket 10409).—Comments filed by National Broadcasting Co. indicate general accord with amendment but favor certain changes in language.

Bristol, Va. New TV vhf Ch. 5.—Affidavit of Robert H. Smith on behalf of Appalachian Bcstg. Corp. (WCYB) petition for conditional grant and response to opposition filed by Radiophone Bcstg. Station WOPI Inc. (WOPI) and Tri-Cities Television Corp. Mr. Smith reasserts that WOPI application was "block" application and that he should receive conditional grant until hearing held on all three applicants' requests.

March 23

AB-PT merger (Docket 10031 et al., 10046 et al. and 10110).—Opposition filed by Zenith Radio Corp. to petitions filed by Balaban & Katz Corp. and Columbia Bcstg. System which sought to dismiss Zenith's protest. Zenith is "pointing out the inconsistency of the positions taken" by Balaban & Katz and CBS.

Portland, Ore., and Vancouver, Wash. New TV uhf Ch. 21 (Docket 10248, 10249; BPCT-939, -959).—Proposed findings of fact and conclusions filed by Mt. Scott Telecasters and Vancouver Radio Corp. (KVAN), mutually exclusive applicants. Each applicant found itself best qualified; Mt. Scott, principally from a financial viewpoint, Vancouver, principally from the fact no other TV outlet is likely to be built in Vancouver.

Rudman Television Co., Minot, N. D. CP for new TV station, vhf Ch. 10, ERP 58 kw visual and 31 kw aural, antenna 390 ft. (BPCT-1320).—Answer filed by Rudman to protest of North Dakota Bcstg. Co. (KCJB) in which Rudman asserts that TV station will cause no interference to KCJB's directional antenna pattern.

March 24

Denver, Col. New TV vhf Ch. 4 (Docket 9043, 10238; BPCT-488, -941).—Petition of Chief, FCC Broadcast Bureau, to defer action of application for renewal of license filed by KOA Denver because of question of ownership and control of KOA (whether National Bcstg. Co. retains substantial element of control).

The W. L. Greenshaw Co. (WWHG) and Hornell Bcstg. Corp. (WLEA), Hornell, N. Y. Initial decision favoring fulltime operation for WWHG (Docket 10060 et al., BP-8024, BMP-5636).—Reply filed by WWHG to motion to strike and to exceptions and request for oral argument filed by WLEA. WWHG asserts it is not necessary to reopen record, the WLEA request to do so should be denied, and that initial decision should be affirmed without delay.

Conelrad Plan (Docket 10420).—Comments of National Assn. of Radio & Television Broadcasters, motion of National Bcstg. Co. for opportunity to file comments on Conelrad proposals after issuance of Conelrad manual.

T. E. Allen & Sons Inc. (WCIG-TV), Durham, N. C. CP for new TV uhf Ch. 46 station.—Protest by Public Information Corp. to grant of CP to T. E. Allen & Sons, in which Public Information asserts it was led to believe it could file application for mutually-exclusive TV station as late as sometime next June and still be considered, and that Allen application was "rushed" through FCC processing after merger of Allen with competitor had been effected, not giving opportunity to Public Information to file before FCC granted Allen application.

Economic Danger Ahead?

ECONOMIC DANGER for new television broadcasters lies ahead as the outgrowth of a controversy in which a majority of the FCC found itself in violent disagreement with new GOP Attorney General Brownell. The upshot last week, departing radically from precedent, was confession of error by enough of the FCC membership to rescind its previous action.

The question: Is a *radio* station licensee a party in interest in protesting a *television* grant in the same market? The FCC majority originally said it wasn't. Comr. Frieda B. Hennock then dissented, holding that television and radio are competitive for business and audience. The Attorney General not only agreed with her view, but in fact handed the majority an ultimatum: Either admit error or the Dept. of Justice would argue against the FCC majority in court. Only Comr. Robert T. Bartley refused to reverse his vote.

Consequences could be appalling. It could mean that any radio station or even a newspaper, motion picture chain or outdoor advertising company can get a hearing and thereby block a TV grant on grounds of unfair competition.

The case started last December when the FCC dismissed a petition of WGRD Grand Rapids, protesting a new uhf grant to Versluis Radio and Television Inc., in Muskegon, close by. Versluis also operates WLAV-AM-FM in Grand Rapids. After the grant, WGRD again protested, alleging that the Versluis stations could be sold in combination and thereby reduce the WGRD business. The majority (Hennock dissenting) again denied WGRD the right to a hearing. WGRD went to court. It was here that the Attorney General, in person, moved in. With argument already set a week ahead, the FCC last Monday reversed itself, after receiving a scorching letter from Mr. Brownell. FCC called a hearing for April 22, and postponed the grant to Versluis, pending final action on the hearing.

Thus, the FCC extends the doctrine of the Sanders Case, wherein the Supreme Court allowed economic injury between radio stations as ground for intervention, to apply to television competition. This is a complete about-face.

Immediately activated is the protest of WSAY Rochester (Gordon Brown) against the split-time grants to WHEC and WVET Rochester on Ch. 10. Also presumably brought within its purview is the move of Transit Riders Assn. to intervene in Transit Radio proceedings.

Congress last year broadened hearing provisions of the law in adopting the so-called McFarland Amendments. The FCC then warned there would be trouble.

This new legal approach could open the flood-gates to "legal" strike applications—the very evil the FCC and Congress have sought to root out. It could practically stop uncontested grants. In the extreme, it could give aid and comfort to those who propose not only divorcement of newspapers from any kind of station ownership, but also to force physical separation of radio and TV operations.

The remedy, it is obvious, lies with Congress.

The Hyde Enigma

NO ONE seems to know just what is in President Eisenhower's mind on the FCC chairmanship. But those close to the agency feel—in fact know—that the President has erred in having failed to date to elevate Rosel Hyde to the chairmanship.

Mr. Eisenhower has nominated John C. Doerfer, Wisconsin Public Service Commission chairman, for one of the two possible vacancies. From what we can gather, this is an excellent selection *for the Commission.* He is reputed to be a good lawyer and administrator, with a fine background in public utilities-common carrier regulation. But he admittedly knows little about the broadcast services, which occupy 80% of the FCC's time.

We question whether Mr. Doerfer himself would want the chairmanship *now.* It may be the President plans to promote Mr. Hyde later—perhaps after Mr. Doerfer is confirmed, and a successor (preferably one versed in broadcasting) is selected to replace Paul A. Walker. Mr. Walker's term runs to June 30 on an "at the pleasure of the President" basis, since he is past the statutory retirement age of 70. But Mr. Walker has no notion of quitting.

Mr. Hyde visited with the President for half an hour on March 6. He saw Gov. Sherman Adams, the President's chief assistant, both before and after. We would guess that Mr. Hyde didn't do an optimum job of selling himself. He is a modest, self-effacing person, who probably answered all questions with legalistic preciseness rather than in the direct, monosyllabic language of the military—which President Ike knows best.

Drawn for BROADCASTING • TELECASTING by Sid Hix

"Hey, where's that live goat we use in the bock beer commercial?"

Frankly, we wouldn't recommend Mr. Hyde as a dynamic salesman, notably of himself. But we do contend that he has demonstrated his capacity as a Government official of integrity and industry in a quarter century of service on the old Federal Radio Commission and the FCC—from docket clerk to vice chairman.

Some politicians oppose Mr. Hyde on the ground that a "new broom" is needed. They do not know that he has always been in the Republican minority, or that there has never been a GOP chairman. He did more in three months while acting chairman in 1948 than had been done in the preceding three years.

It all may be academic now. Perhaps Mr. Eisenhower has made up his mind (or could it be Gov. Adams?). If it's the intention to slow down the FCC processes while a newcomer learns the ropes, and to fire technical career people wholesale in the lust for patronage, then Mr. Hyde shouldn't be made chairman.

'Slightly Mousetrapped'

THE BILLION-dollar fund that members of the Assn. of National Advertisers use to exploit sales is a major economic factor in American life. It is dispensed by advertising executives through advertising agencies. The two groups operate, in effect, as expert purchasing agents seeking the most media value per dollar.

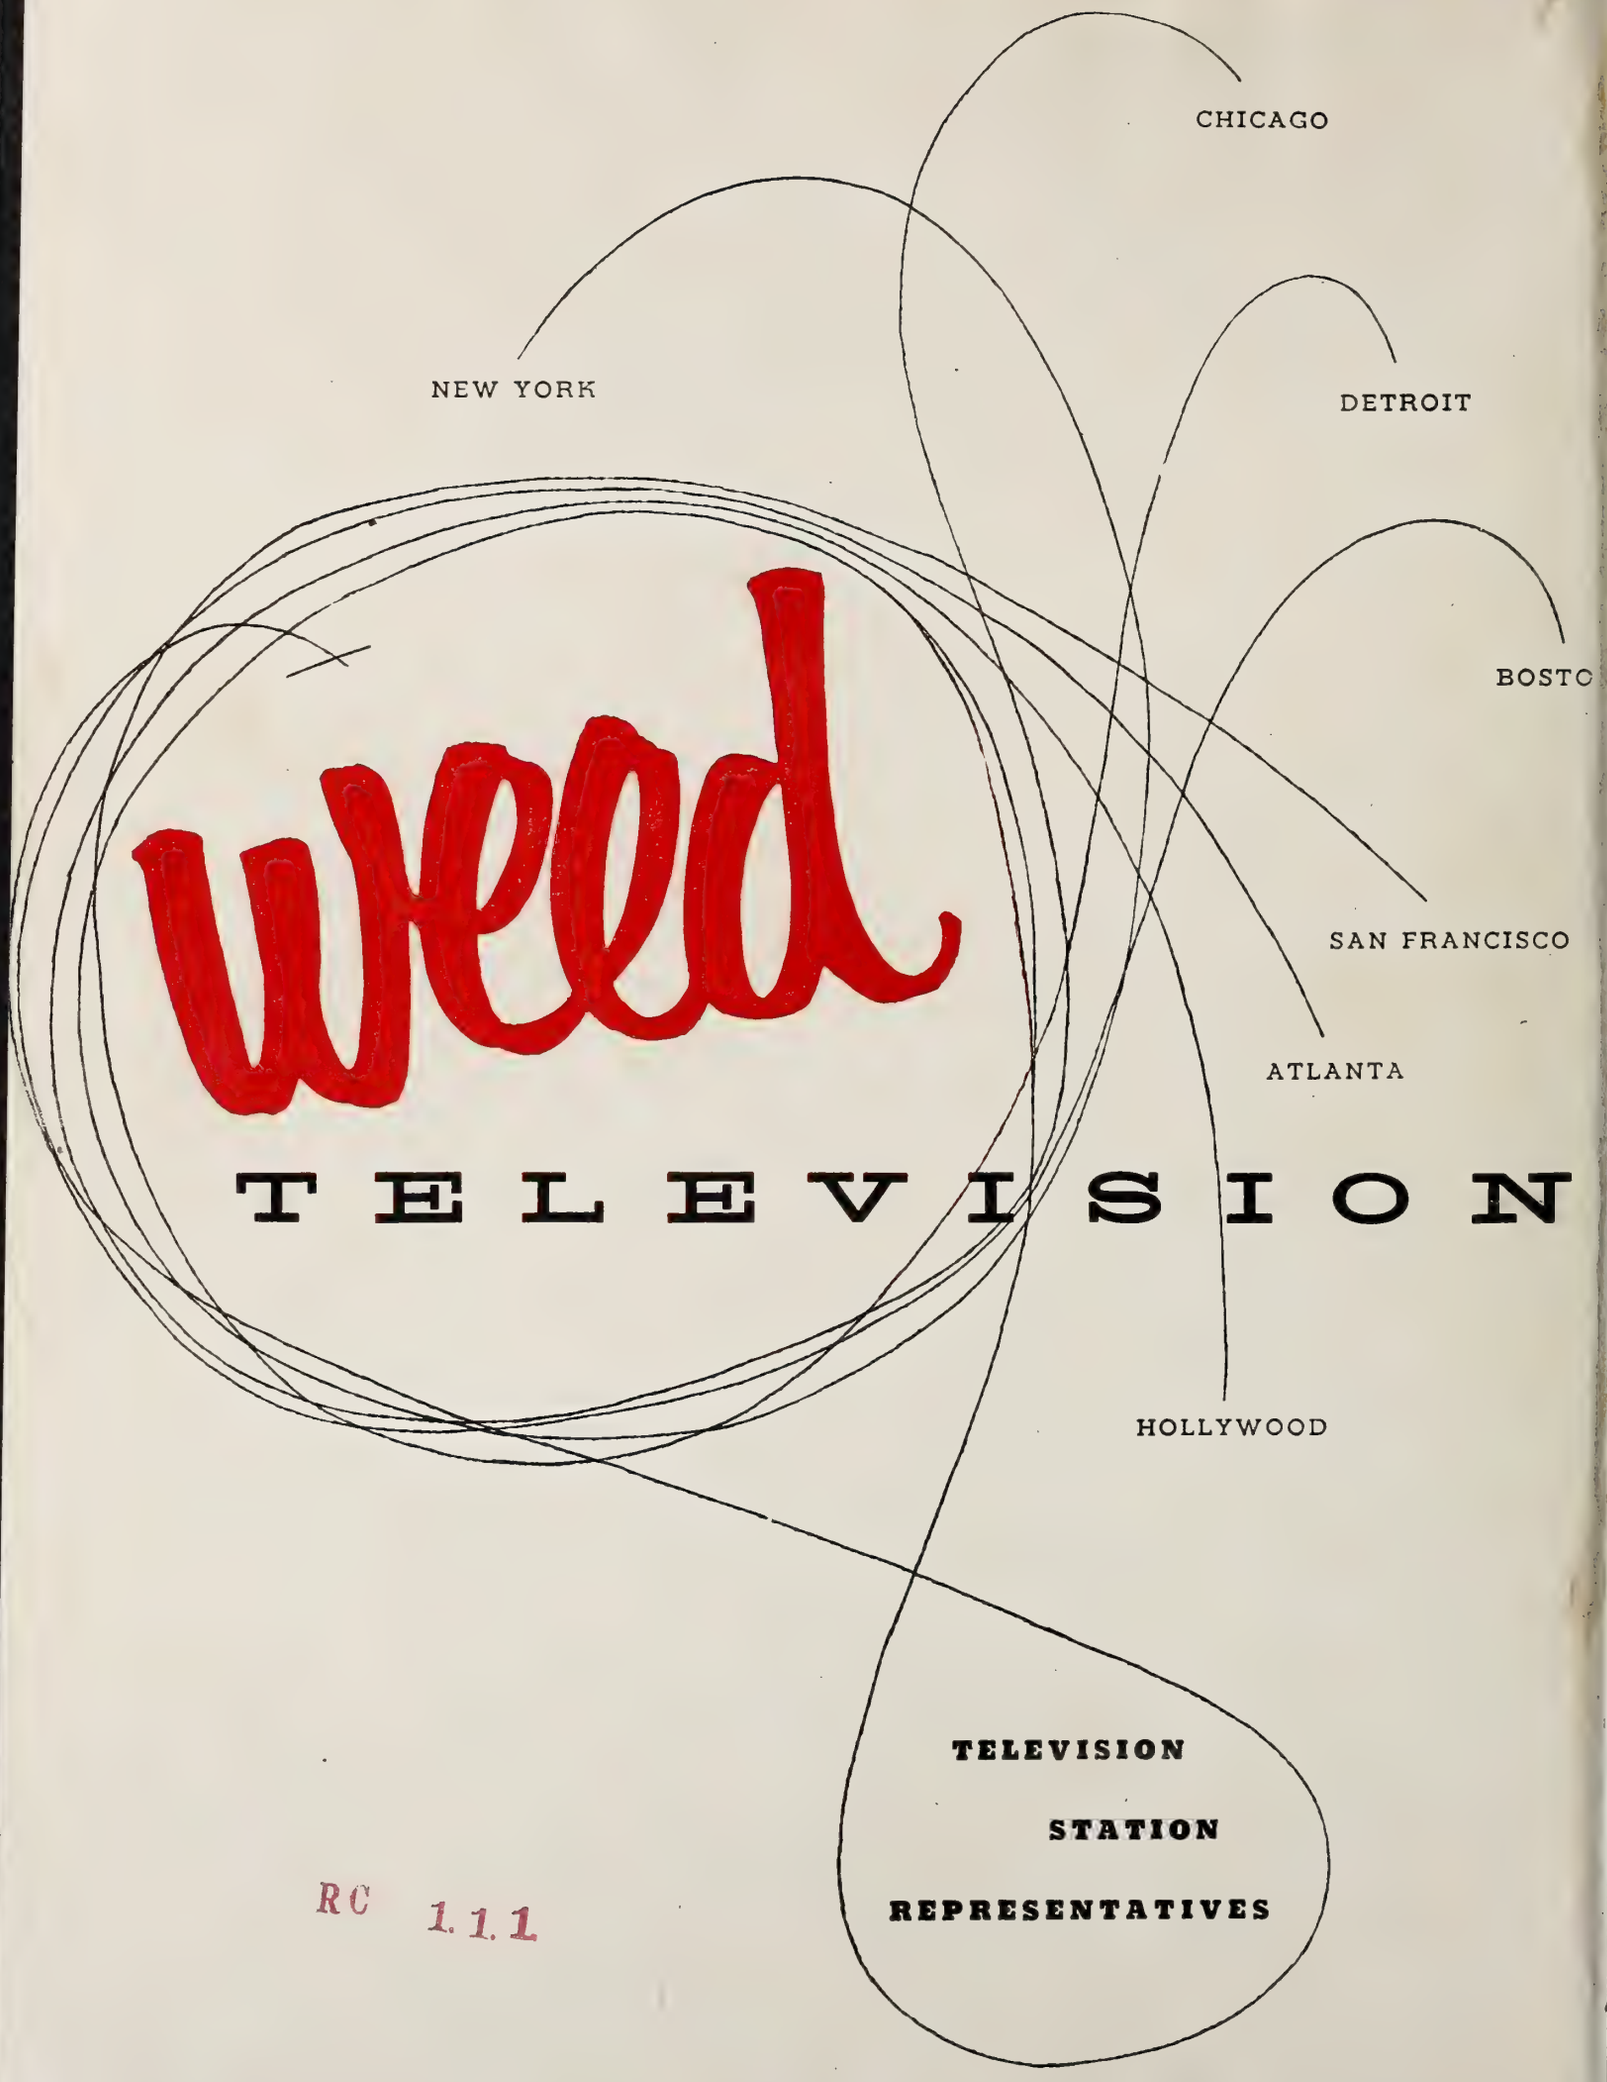
A fortnight ago the ANA membership spent three days supplying newsmen with assorted speeches and messages designed to show that television is getting too expensive for even the richest advertisers [B•T, March 23]. These newsmen, guests of ANA, fed the party line to their respective newspapers and business journals.

Two superbly equipped network presidents — Frank Stanton (CBS) and Frank White (NBC)—were invited to tell television's side of the story in the fag-end hours of ANA's three-day meeting. Guarding the door to the auditorium, with its small quota of delegates who stuck to the end, was a house officer who barred any reporters who wanted to tell TV's side of the story.

There's nothing novel about ANA's attack on television. It's a milder version of the slashing radio attack of two years ago.

No media man will dispute an advertiser's right to shop around for good media buys. That's good business. But when several hundred advertisers who dominate the national field attack a medium's rate structure, the problem becomes serious. If one medium is hurt, others will suffer. That could create an anomaly in which advertisers would be undermining the very economic powers that have successfully stimulated their sales.

As one official put it, "TV was slightly mousetrapped by ANA."



Once in a while, one radio station comes close to capturing the true nature of its city . . . draws its strength from the same forces that have made its city great . . . and because of this gives strong, forceful, popular voice to the entire city. This has happened in Pittsburgh . . . and the station is WWSW.

liked most by Pittsburghers . . .

because it is most like Pittsburgh!
